EXAMPLE 5. Joe and Ray Johnson were partners in a farm partnership that they had owned for 12 years in 2011 when the assets of the partnership were sold to Ray's son Charles. Joe Johnson had materially participated in the partnership for the whole time that the business was in operation, so he could exclude the capital gain he had received from the sale of the partnership assets. Although Ray Johnson had not materially participated in the farm business, he could exclude the capital gain he received from the sale of the assets of the partnership because the sale of the partnership assets was to his son, a lineal descendant.

EXAMPLE 6. Kevin and Ron Barker owned a partnership which owned a chain of six gas stations in an Iowa city. In 2011, the Barkers sold 100 percent of the property of two of the gas stations and received a capital gain of \$30,000 from the sale. Separate business records were kept for each of the gas stations. Since the partnership was considered to be a unitary business and the Barkers sold less than 90 percent of the fair market value of the business, the Barkers could not exclude the capital gain from the sale of the gas stations from the incomes reported on their 2011 Iowa returns. However, any gain from the sale of the real property may qualify for exclusion, assuming the ten-year time held and material participation qualifications are met.

EXAMPLE 7. Rudy Stern owned a cafe in one Iowa city and a fast-food restaurant in another Iowa city. Mr. Stern had held both businesses and had materially participated in the operation of both businesses for ten years. Each business was operated with a separate manager and kept separate business records.

In 2011, Mr. Stern sold all the tangible and intangible assets associated with the cafe and received a capital gain from the sale of the cafe. Mr. Stern can exclude the capital gain from his net income for 2011 because the cafe and fast-food restaurant were considered to be separate and distinct nonunitary businesses.

EXAMPLE 8. Doug Jackson is a shareholder in an S corporation, Jackson Products Corporation. Mr. Jackson has a 75 percent ownership interest in the S corporation, and he has materially participated in the operations of the S corporation since its incorporation in 1980. In 2008, Mr. Jackson transferred 10 percent of his ownership interest in the S corporation to Doug Jackson Irrevocable Trust. The income from the irrevocable trust was reported on Mr. Jackson's individual income tax return. In 2011, the assets of Jackson Products Corporation were sold, resulting in a capital gain. Mr. Jackson can claim the capital gain deduction on both his 65 percent ownership held in his name and the 10 percent irrevocable trust ownership since the capital gain from the irrevocable trust flows through to Mr. Jackson's income tax return, and Mr. Jackson retained a 75 percent interest in the S corporation for more than ten years.

40.38(4) *Net capital gains from sales of cattle or horses used for certain purposes which were held for 24 months by taxpayers who received more than one-half of their gross incomes from farming or ranching operations.* Net capital gains from the sales of cattle or horses held for 24 months or more for draft, breeding, dairy, or sporting purposes qualify for the capital gain deduction if more than 50 percent of the taxpayer's gross income in the tax year is from farming or ranching operations. Proper records should be kept showing purchase and birth dates of cattle and horses. The absence of records may make it impossible for the owner to show that the owner held a particular animal for the necessary holding period. Whether cattle or horses are held for draft, breeding, dairy, or sporting purposes depends on all the facts and circumstances of each case.

a. Whether cattle or horses sold by the taxpayer after the taxpayer has held them 24 months or more were held for draft, breeding, dairy, or sporting purposes may be determined from federal court cases on such sales and the standards and examples included in 26 CFR §1.1231-2.

b. In situations where the qualifying cattle or horses are sold by the taxpayer to a lineal descendant of the taxpayer, the taxpayer does not need to have had more than 50 percent of gross income in the tax year from farming or ranching activities in order for the capital gain to be excluded.

c. Capital gains from sales of qualifying cattle or horses by an S corporation, partnership, or limited liability company, where the capital gains flow through to the individual owners for federal income tax purposes, are eligible for the exclusion only in situations in which the individual owners have more than 50 percent of their gross incomes in the tax year from farming or ranching activities, or where the sale of the qualifying cattle or horses was to lineal descendants of the owners reporting the capital gains from the sales of the qualifying cattle or horses.

d. Capital gains from sales of qualifying cattle or horses by a C corporation are not eligible for the capital gain deduction.

e. A taxpayer's gross income from farming or ranching includes amounts the individual has received in the tax year from cultivating the soil or raising or harvesting any agricultural commodities. Gross income from farming or ranching includes the income from the operation of a stock, dairy, poultry, fish, bee, fruit, or truck farm, plantation, ranch, nursery, range, orchard, or oyster bed, as well as income in the form of crop shares received from the use of the taxpayer's land. Gross income from farming or ranching also includes total gains from sales of draft, breeding, dairy, or sporting livestock. In the case of individual income tax returns for the 2011 tax year, gross income from farming or ranching includes the total of the amounts from line 9 or line 50 of Schedule F and line 7 of Form 4835, Farm Rental Income and Expenses, plus the share of partnership income from farming, the share of distributable net taxable income from farming of an estate or trust, and total gains from the sale of livestock held for draft, breeding, dairy, or sporting purposes, as shown on Form 4797, Sale of Business Property. In the case of an individual's returns for tax years beginning after 2011, equivalent lines from returns and supplementary forms would be used to determine a taxpayer's gross income from farming or ranching for those years.

To make the calculation as to whether more than half of the taxpayer's gross income in the tax year is from farming or ranching operations, the gross income from farming or ranching as determined in the

previous paragraph is divided by the taxpayer's total gross income. If the resulting percentage is greater than 50 percent, the taxpayer's capital gains from sales of cattle and horses will be considered for the capital gain deduction.

In instances where married taxpayers file a joint return, the gross income from farming or ranching of both spouses will be considered for the purpose of determining whether the taxpayers received more than half of their gross income from farming or ranching. However, in situations where married taxpayers file separate Iowa returns or separately on the combined return form, each spouse must separately determine whether that spouse has more than 50 percent of gross income from farming or ranching operations.

EXAMPLE. Bob Deen had a cattle operation that owned black angus cattle in the operation for breeding purposes. In 2011, Mr. Deen sold 40 head of cattle that had been held for breeding purposes for two years. Mr. Deen's total gross income from farming was \$125,000, but he had a \$10,000 loss from his farming operation. Mr. Deen also had wages of \$25,000 from a job at a local farming cooperative. Because Mr. Deen had more than 50 percent of his gross income in 2011 from farming operations, he could exclude the capital gain from the sale of the breeding cattle. Although Mr. Deen had a loss from his farming activities, he still had more than 50 percent of his gross income in the tax year from those activities.

40.38(5) *Net capital gains from sale of breeding livestock, other than cattle or horses, held for 12 or more months by taxpayers who received more than one-half of their gross incomes from farming or ranching operations.* Net capital gains from the sale of breeding livestock, other than cattle or horses, held for 12 or more months from the date of acquisition qualify for the capital gain deduction, if more than one-half of the taxpayer's gross income is from farming or ranching. For the purposes of this subrule, "livestock" has a broad meaning and includes hogs, mules, donkeys, sheep, goats, fur-bearing mammals, and other mammals. Livestock does not include poultry, chickens, turkeys, pigeons, geese, other birds, fish, frogs, or reptiles. If livestock other than cattle or horses is considered to have been held for breeding purposes under the criteria established in 26 CFR §1.1231-2, the livestock will also be deemed to have been breeding livestock for purposes of this subrule. In addition, for the purposes of this subrule livestock does not include cattle and horses held for 24 or more months for draft, breeding, dairy, or sporting purposes which were described in subrule 40.38(4).

a. The procedure in subrule 40.38(4) for determining whether more than one-half of a taxpayer's gross income is from farming or ranching operations is also applicable for this subrule.

b. In an instance in which a taxpayer sells breeding livestock other than cattle or horses which have been held for 12 or more months, and the sale of the livestock is to a lineal descendant of the taxpayer, the taxpayer is not required to have more than one-half of the gross income in the tax year from farming or ranching operations to be eligible for the capital gain deduction.

c. Capital gains from sales of qualifying livestock other than cattle or horses by an S corporation, partnership, or limited liability company, where the capital gains flow through to the owners of the respective business entity for federal income tax purposes, qualify for the capital gain deduction to the extent the owners receiving the capital gains meet the qualifications for the deduction on the basis of having more than one-half of the gross income in the tax year from farming or ranching operations.

d. Capital gains from the sale of qualifying livestock other than cattle or horses by a C corporation are not eligible for the capital gain deduction.

40.38(6) *Net capital gains from sales of timber held by the taxpayer for more than one year.* Capital gains from qualifying sales of timber held by the taxpayer for more than one year are eligible for the capital gain deduction. In all of the following examples of circumstances where gains from sales of timber qualify for capital gain treatment, it is assumed that the timber sold was held by the owner for more than one year at the time the timber was sold. The owner of the timber can be the owner of the land on which the timber was cut or the holder of a contract to cut the timber. In the case where a taxpayer sells standing timber the taxpayer held for investment, any gain from the sale is a capital gain. Timber includes standing trees usable for lumber, pulpwood, veneer, poles, pilings, cross ties, and other wood products. Timber eligible for the capital gain deduction does not apply to sales of pulpwood cut by a contractor from the tops and limbs of felled trees. Under the general rule, the cutting of timber results in no gain or loss, and it is not until the sale or exchange that gain or loss is realized. But if a taxpayer

owned or had a contractual right to cut timber, the taxpayer may make an election to treat the cutting of timber as a sale or exchange in the year the timber is cut. Gain or loss on the cutting of the timber is determined by subtracting the adjusted basis for depletion of the timber from the fair market value of the timber on the first day of the tax year in which the timber is cut. For example, the gain on this type of transaction is computed as follows:

Fair market value of timber on January 1, 2011	\$400,000
Adjusted basis for depletion	– \$100,000
Capital gain on cutting of timber	\$300,000

The fair market value shown above of \$400,000 is the basis of the timber. A later sale of the cut timber including treetops and stumps would result in ordinary income for the taxpayer and not a capital gain.

a. Evergreen trees, such as those used as Christmas trees, that are more than six years old at the time they are severed from their roots and sold for ornamental purposes, are included in the definition of timber for purposes of this subrule. The term “evergreen trees” is used in its commonly accepted sense and includes pine, spruce, fir, hemlock, cedar, and other coniferous trees. Where customers of the taxpayer cut down the Christmas tree of their choice on the taxpayer’s farm, there is no sale until the tree is cut. However, evergreen trees sold in a live state do not qualify for capital gain treatment.

b. Capital gains or losses also are received from sales of timber by a taxpayer who has a contract which gives the taxpayer an economic interest in the timber. The date of disposal of the timber shall be the day the timber is cut, unless payment for the timber is received before the timber is cut. Under this circumstance, the taxpayer may treat the date of the payment as the date of disposal of the timber. Additional information about gains and losses from the sale of timber is included under 26 CFR §1.631-1 and §1.631-2.

c. Capital gains from the sale of qualifying timber by an S corporation, partnership, or limited liability company, which flow to the owners of the respective business entity for federal individual income tax purposes, are eligible for the capital gain deduction.

d. Capital gains from the sale of timber by a C corporation do not qualify for the capital gain deduction.

40.38(7) *Capital gains from the liquidation of assets of corporations which are recognized as sales of assets for federal income tax purposes.* Capital gains realized from liquidations of corporations which are recognized as sales of assets for federal income tax purposes under Section 331 of the Internal Revenue Code may be eligible for the capital gain deduction. To the extent the capital gains are reported by the shareholders of the corporations for federal income tax purposes and the shareholders are individuals, the shareholders are eligible for the capital gain deduction if the shareholders meet the qualifications for time of ownership and time of material participation in the corporation being liquidated. The burden of proof is on the shareholders to show they meet these time of ownership and material participation requirements.

40.38(8) *Capital gains from certain stock sales which are treated as acquisitions of assets of the corporation for federal income tax purposes.* Capital gains received by individuals from a sale of stock of a target corporation which is treated as an acquisition of the assets of the corporation under Section 338 of the Internal Revenue Code may be excluded if the individuals receiving the capital gains had held an interest in the target corporation and had materially participated in the corporation for ten years prior to the date of the sale of the corporation. The burden of proof is on the taxpayer to show eligibility to exclude the capital gains from these transactions in the computation of net income for Iowa individual income tax purposes.

40.38(9) *Treatment of capital gain deduction for tax years with net operating losses and for tax years to which net operating losses are carried.* The following paragraphs describe the tax treatment of the capital gain deduction in a tax year with a net operating loss and the tax treatment of a capital gain deduction in a tax year to which a net operating loss was carried:

a. The capital gain deduction otherwise allowable on a return is not allowed for purposes of computing a net operating loss from the return which can be carried to another tax year and applied against the income for the other tax year.

EXAMPLE. Joe Jones filed a 2011 return showing a net loss of \$12,000. On this return, Mr. Jones claimed a capital gain deduction of \$3,000 from sale of breeding livestock, other than cattle or horses, held for 12 months or more which was considered in computing the loss of \$12,000. However, the \$3,000 capital gain deduction is not allowed in the computation of the net operating loss deduction for 2011 for purposes of carrying the net operating loss deduction to another tax year. Thus, the net operating loss deduction for 2011 is \$9,000.

b. In the case of net operating losses which are carried back to a tax year where the taxpayer has claimed the capital gain deduction, the capital gain deduction is not allowed for purposes of computing the income to which the net operating loss deduction is applied.

EXAMPLE. John Brown had a net operating loss of \$20,000 on the Iowa return he filed for 2011. Mr. Brown elected to carry back the net operating loss to his 2009 Iowa return. The 2009 return showed a taxable income of \$27,000 which included a capital gain deduction of \$3,000. For purposes of computing the income in the carryback year to which the net operating loss would be applied, the income was increased by \$3,000 to disallow the capital gain deduction properly allowed in computing taxable income for the carryback year. Therefore, the net operating loss deduction from 2011 was applied to an income of \$30,000 for the carryback year.

40.38(10) Sale of employer securities to an Iowa employee stock ownership plan. For tax years beginning on or after January 1, 2012, 50 percent of the net capital gain from the sale or exchange of employer securities of an Iowa corporation to a qualified Iowa employee stock ownership plan (ESOP) may be eligible for the Iowa capital gain deduction. To be eligible for the capital gain deduction, the qualified Iowa ESOP must own at least 30 percent of all outstanding employer securities issued by the Iowa corporation after completion of the transaction.

a. Definitions. The following definitions apply to this subrule:

“*Employer securities*” means the same as defined in Section 409(l) of the Internal Revenue Code. “*Employer securities*” includes common stock issued by the employer and preferred stock if the provisions of Section 409(l)(3) of the Internal Revenue Code are met.

“*Iowa corporation*” means a corporation whose commercial domicile, as defined in Iowa Code section 422.32, is in Iowa. A limited liability company is not considered an Iowa corporation.

“*Qualified Iowa ESOP*” means an employee stock ownership plan, as defined in Section 4975(e)(7) of the Internal Revenue Code, and trust that are established by an Iowa corporation for the benefit of the employees of the corporation.

b. The material participation requirements set forth in subrule 40.38(1) do not apply for the sale of employer securities to an Iowa ESOP. In addition, the holding period requirements set forth in paragraph 40.38(2)“a” do not apply for the sale of employer securities to an Iowa ESOP.

This rule is intended to implement Iowa Code section 422.7 as amended by 2012 Iowa Acts, House File 2465, division XII.

[ARC 7761B, IAB 5/6/09, effective 6/10/09; ARC 0073C, IAB 4/4/12, effective 5/9/12; ARC 0398C, IAB 10/17/12, effective 11/21/12; ARC 1303C, IAB 2/5/14, effective 3/12/14]

701—40.39(422) Exemption of interest from bonds or notes issued to fund the E911 emergency telephone system. Interest received on or after May 4, 1990, from bonds or notes issued by the Iowa finance authority to fund the E911 emergency telephone system is exempt from the state income tax.

This rule is intended to implement Iowa Code sections 422.7 and 477B.20.

701—40.40(422) Exemption of active-duty military pay of national guard personnel and armed forces reserve personnel received for services related to operation desert shield. For tax years ending on or after August 2, 1990, military pay received by persons in the national guard and persons in the armed forces military reserve is exempt from state income tax to the extent the military pay is not otherwise excluded from taxation and the military pay is for active-duty military service on or after August 2, 1990, pursuant to military orders related to Operation Desert Shield. The exemption applies

to individuals called to active duty in Iowa to replace other persons who were in military units who were called to serve on active duty outside Iowa provided the military orders specify that the active duty assignment in Iowa pertains to Operation Desert Shield.

Persons filing original returns or amended returns on Form IA 1040X for tax years where the exempt income was received should print the notation, "Operation Desert Shield" at the top of the original return form or amended return form. A copy of the military orders showing the person was called to active duty and was called in support of Operation Desert Shield should be attached to the original return form or amended return form to support the exemption of the active duty military pay.

This rule is intended to implement Iowa Code section 422.7.

701—40.41(422) Disallowance of private club expenses. Rescinded IAB 11/24/04, effective 12/29/04.

701—40.42(422) Depreciation of speculative shell buildings.

40.42(1) For tax years beginning on or after January 1, 1992, speculative shell buildings constructed or reconstructed after that date may be depreciated as 15-year property under the accelerated cost recovery system of the Internal Revenue Code. If the taxpayer has deducted depreciation on the speculative shell building on the taxpayer's federal income tax return, that amount of depreciation must be added to the federal adjusted gross income in order to deduct depreciation computed under this rule.

40.42(2) On sale or other disposition of the speculative building, the taxpayer must report on the taxpayer's Iowa individual income tax return the same gain or loss as is reported on the taxpayer's federal individual income tax return. If, while owned by the taxpayer, the building is converted from a speculative shell building to another use, the taxpayer must deduct the same amount of depreciation on the taxpayer's Iowa tax return as is deducted on the taxpayer's federal tax return.

40.42(3) For the purposes of this rule, the term "speculative shell building" means a building as defined in Iowa Code section 427.1(27) "c."

This rule is intended to implement Iowa Code section 422.7.

701—40.43(422) Retroactive exemption for payments received for providing unskilled in-home health care services to a relative. Retroactive to January 1, 1988, for tax years beginning on or after that date, supplemental assistance payments authorized under Iowa Code section 249.3(2) "a"(2) which are received by an individual providing unskilled in-home health care services to a member of the caregiver's family are exempt from state income tax to the extent that the individual caregiver is not a licensed health care professional designated in Iowa Code section 147.13, subsections 1 to 10.

For purposes of this exemption, a member of the caregiver's family includes a spouse, parent, stepparent, child, stepchild, brother, stepbrother, sister, stepsister, lineal ancestor such as grandparent and great-grandparent, and lineal descendant such as grandchild and great-grandchild, and those previously described relatives who are related by marriage or adoption. Those licensed health care professionals who are not eligible for this exemption include medical doctors, doctors of osteopathy, physician assistants, psychologists, podiatrists, chiropractors, physical therapists, occupational therapists, nurses, dentists, dental hygienists, optometrists, speech pathologists, audiologists, and other similar licensed health care professionals.

This rule is intended to implement Iowa Code section 422.7.

[ARC 7761B, IAB 5/6/09, effective 6/10/09; ARC 8589B, IAB 3/10/10, effective 4/14/10]

701—40.44(422,541A) Individual development accounts. Individual development accounts are authorized for low-income taxpayers for tax years beginning on or after January 1, 1994. Additions to the accounts are described in the following subrule:

40.44(1) Exemption of additions to individual development accounts. The following additions to individual development accounts are exempt from the state income tax of the owners of the accounts to the extent the additions were subject to federal income tax:

a. The amount of contributions made in the tax year to an account by persons and entities other than the owner of the account.

b. The amount of any savings refund or state match payments made in the tax year to an account as authorized for contributions made to the accounts by the owner of the account.

c. Earnings on the account in the tax year or interest earned on the account.

40.44(2) *Additions to net income for withdrawals from individual development accounts.* Rescinded IAB 9/11/96, effective 10/16/96.

This rule is intended to implement Iowa Code sections 422.7, 541A.2 and 541A.3 as amended by 2008 Iowa Acts, Senate File 2430.

701—40.45(422) Exemption for distributions from pensions, annuities, individual retirement accounts, or deferred compensation plans received by nonresidents of Iowa. For tax years beginning on or after January 1, 1994, a distribution from a pension plan, annuity, individual retirement account, or deferred compensation plan which is received by a nonresident of Iowa is exempt from Iowa income tax to the extent the distribution is directly related to the documented retirement of the pensioner, annuitant, owner of individual retirement account, or participant in a deferred compensation arrangement. For tax years beginning on or after January 1, 1996, distributions of nonqualified retirement benefits which are paid by a partnership to its retired partners and which are received by a nonresident of Iowa are exempt from Iowa income tax to the extent the distribution is directly related to the documented retirement of the partner. In a situation where the pensioner, annuitant, owner of the individual retirement account, or participant of a deferred compensation arrangement dies before the date of documented retirement, any distribution from the pension, annuity, individual retirement account, or deferred compensation arrangement will not be taxable to the beneficiary receiving the distributions if the beneficiary is a nonresident of Iowa. If the pensioner, annuitant, owner of the individual retirement account, or participant of a deferred compensation arrangement dies after the date of documented retirement, any distributions from the pension, annuity, individual retirement account, or deferred compensation arrangement will not be taxable to a beneficiary receiving distributions if the beneficiary is a nonresident of Iowa.

For purposes of this rule, the distributions from the pensions, annuities and deferred compensation arrangements were from pensions, annuities, and deferred compensation earned entirely or at least partially from employment or self-employment in Iowa. For purposes of this rule, distributions from individual retirement arrangements were from individual retirement arrangements that were funded by contributions from the arrangements that were deductible or partially deductible on the Iowa income tax return of the owner of the individual retirement accounts.

The following subrules include definitions and examples which clarify when distributions from pensions, annuities, individual retirement accounts, and deferred compensation arrangements are exempt from Iowa income tax, when the distributions are received by nonresidents of Iowa:

40.45(1) Definitions.

a. The word “beneficiary” means an individual who receives a distribution from a pension or annuity plan, individual retirement arrangement, or deferred compensation plan as a result of either the death or divorce of the pensioner, annuitant, participant of a deferred compensation arrangement, or owner of an individual retirement account.

b. The term “individual’s documented retirement” means any evidence that the individual can provide to the department of revenue which would establish that the individual or the individual’s beneficiary is receiving distributions from the pension, annuity, individual retirement account, or the deferred compensation arrangement due to the retirement of the individual.

Examples of documents that would establish an individual’s retirement may include: copies of birth certificates or driver’s licenses to establish an individual’s age; copies of excerpts from an employer’s personnel manual or letter from employer to establish retirement or early retirement policies; a copy of a statement from a physician to establish an individual’s disability which could have contributed to a person’s retirement.

c. The term “nonresident” applies only to individuals and includes all individuals other than those individuals domiciled in Iowa and those individuals who maintain a permanent place of abode in Iowa. See 701—subrule 38.17(2) for the definition of domicile.

40.45(2) Examples:

a. John Jones had worked for the same Iowa employer for 32 years when he retired at age 62 and moved to Arkansas in March of 1994. Mr. Jones started receiving distributions from the pension plan from his former employer starting in May 1994. Because Mr. Jones was able to establish that he was receiving the distributions from the pension plan due to his retirement from his employment, Mr. Jones was not subject to Iowa income tax on the distributions from the pension plan. Note that Mr. Jones had sold his Iowa residence in March and established his domicile in Arkansas at the time of his move to Arkansas.

b. Wanda Smith was the daughter of John Smith who died in February 1994 after 25 years of employment with a company in Urbandale, Iowa. Wanda Smith was the sole beneficiary of John and started receiving distributions from John's pension in April 1994. Wanda Smith was a bona fide resident of Oakland, California, when she received distributions from her father's pension. Wanda was not subject to Iowa income tax on the distributions since she was a nonresident of Iowa at the time the distributions were received.

c. Martha Graham was 55 years old when she quit her job with a firm in Des Moines to take a similar position with a firm in Dallas, Texas. Ms. Graham had worked for the Des Moines business for 22 years before she resigned from the job in May 1994. Starting in July 1994, Ms. Graham received monthly distributions from the pension from her former Iowa employer. Although Ms. Graham was a nonresident of Iowa, she was subject to Iowa income tax on the pension distribution since the taxpayer didn't have a documented retirement.

d. William Moore was 58 years old when he quit his job with a bank in Mason City in February 1994 after 30 years of employment with the bank. By the time Mr. Moore started receiving pension payments from his employment with the bank, he had moved permanently to New Mexico. Shortly after he arrived in New Mexico, Mr. Moore secured part-time employment. The pension payments were not taxable to Iowa as Mr. Moore was retired notwithstanding his part-time employment in New Mexico.

e. Joe Brown had worked for an Iowa employer for 25 years when he retired in June 1992 at the age of 65. Mr. Brown started receiving monthly pension payments in July 1992. Mr. Brown resided in Iowa until August 1994, when he moved permanently to Nevada to be near his daughter. Mr. Brown was not taxable to Iowa on the pension payments he received after his move to Nevada. Mr. Brown's retirement occurred in June 1992 when he resigned from full-time employment.

This rule is intended to implement Iowa Code section 422.8.

701—40.46(422) Taxation of compensation of nonresident members of professional athletic teams. Effective for tax years beginning on or after January 1, 1995, the Iowa source income of a nonresident individual who is a member of a professional athletic team includes the portion of the individual's total compensation for services provided for the athletic team that is in the ratio that the number of duty days spent in Iowa rendering services for the team during the tax year bears to the total number of duty days spent both within and without Iowa in the tax year. Thus, if a nonresident member of a professional athletic team has \$50,000 in total compensation from the team in 1995 and the athlete has 20 Iowa duty days and 180 total duty days for the team in 1995, \$5,556 of the compensation would be taxable to Iowa ($\$50,000 \times 20/180 = \$5,556$).

The following subrules include definitions, examples, and other information which clarify Iowa's taxation of nonresident members of professional athletic teams:

40.46(1) Definitions.

a. The term "professional athletic team" includes, but is not limited to, any professional baseball, basketball, football, soccer, or hockey team.

b. The term "member of a professional athletic team" includes those employees who are active players, players on the disabled list, and any other persons required to travel and who travel with and perform services on behalf of a professional athletic team on a regular basis. This includes, but is not limited to, coaches, managers, and trainers.

c. The term "total compensation for services rendered as a member of a professional athletic team" means the total compensation received during the taxable year for services rendered. "Total

compensation” includes, but is not limited to, salaries, wages, bonuses (as described in subparagraph (1) of this paragraph), and any other type of compensation paid during the taxable year to a member of a professional athletic team for services performed in that year. Such compensation does not include strike benefits, severance pay, termination pay, contract or option year buy-out payments, expansion or relocation payments, and any other payments not related to services rendered for the team.

For purposes of this paragraph, “bonuses” included in “total compensation for services rendered as a member of a professional athletic team” subject to the allocation described in this rule are:

(1) Bonuses earned as a result of play (i.e., performance bonuses) during the season, including bonuses paid for championship, playoff, or “bowl” games played by a team, or for the member’s selection to all-star, league, or other honorary positions; and

(2) Bonuses paid for signing a contract, unless all of the following conditions are met:

1. The payment of the signing bonus is not conditional upon the signee playing any games for the team, or performing any subsequent services for the team, or even making the team;

2. The signing bonus is payable separately from the salary and any other compensation; and

3. The signing bonus is nonrefundable.

d. Except as provided in subparagraphs (4) and (5) of this paragraph, the term “duty days” means all days during the taxable year from the beginning of the professional athletic team’s official preseason training period through the last game in which the team competes or is scheduled to compete. Duty days are included in the allocation described in this rule for the tax year in which they occur, including where a team’s official preseason training period through the last game in which the team competes, or is scheduled to compete, occurs during more than one tax year.

(1) Duty days also includes days on which a member of a professional athletic team renders a service for a team on a date which does not fall within the previously mentioned period (e.g., participation in instructional leagues, the “Pro Bowl” or promotional “caravans”). Rendering a service includes conducting training and rehabilitation activities, but only if conducted at the facilities of the team.

(2) Included within duty days are game days, practice days, days spent at team meetings, promotional caravans and preseason training camps, and days served with the team through all postseason games in which the team competes or is scheduled to compete.

(3) Duty days for any person who joins a team during the period from the beginning of the professional athletic team’s official preseason training period through the last game in which the team competes, or is scheduled to compete, begins on the day the person joins the team. Conversely, duty days for any person who leaves a team during such period ends on the day the person leaves the team. When a person switches teams during a taxable year, separate duty day calculations are to be made for the period the person was with each team.

(4) Days for which a member of a professional athletic team is not compensated and is not rendering services for the team in any manner, including days when the member of a professional athletic team has been suspended without pay and prohibited from performing any services for the team, are not to be treated as duty days.

(5) Days for which a member of a professional athletic team is on the disabled list and does not conduct rehabilitation activities at facilities of the team and is not otherwise rendering services for the team in Iowa, are not to be considered duty days spent in Iowa. However, all days on the disability list are considered to be included in total duty days spent both within and outside the state of Iowa.

(6) Total duty days for members of a professional athletic team that are not professional athletes are the number of days in the year that the members are employed by the professional athletic team. Thus, in the case of a coach of a professional athletic team who was coach for the entire year of 1995, the coach’s total duty days for 1995 would be 365.

(7) Travel days in Iowa by a team member that do not involve a game, practice, team meeting, all-star game, or other personal service for the team are not considered to be duty days in Iowa. However, to the extent these days fall within the period from the team’s preseason training period through the team’s final game, these Iowa travel days will be considered in the total duty days spent within and outside Iowa, for team members who are professional athletes.

(8) Duty days in Iowa do not include days a team member performs personal services for the professional athletic team in Iowa on those days that the team member is a bona fide resident of a state with which Iowa has a reciprocal tax agreement. See rule 701—38.13(422).

40.46(2) *Filing composite Iowa returns for nonresident members of professional athletic teams.* Professional athletic teams may file composite Iowa returns on behalf of team members who are nonresidents of Iowa and who have compensation that is taxable to Iowa from duty days in Iowa for the athletic team. However, the athletic team may include on the composite return only those team members who are nonresidents of Iowa and who have no Iowa source incomes other than the incomes from duty days in Iowa for the team. The athletic team may exclude from the composite return any team member who is a nonresident of Iowa and whose income from duty days in Iowa is less than \$1,000. See rule 701—48.1(422) about filing Iowa composite returns.

40.46(3) *Examples of taxation of nonresident members of professional athletic teams.*

a. Player A, a member of a professional athletic team, is a nonresident of Iowa. Player A's contract for the team requires A to report to such team's training camp and to participate in all exhibition, regular season, and playoff games. Player A has a contract which covers seasons that occur during year 1/year 2 and year 2/year 3. Player A's contract provides that A is to receive \$500,000 for the year 1/year 2 season and \$600,000 for the year 2/year 3 season. Assuming player A receives \$550,000 from the contract during taxable year 2 (\$250,000 for one-half the year 1/year 2 season and \$300,000 for one-half the year 2/year 3 season), the portion of compensation received by player A for taxable year 2, attributable to Iowa, is determined by multiplying the compensation player A receives during the taxable year (\$550,000) by a fraction, the numerator of which is the total number of duty days player A spends rendering services for the team in Iowa during taxable year 2 (attributable to both the year 1/year 2 season and the year 2/year 3 season) and the denominator of which is the total number of player A's duty days spent both within and outside Iowa for the entire taxable year.

b. Player B, a member of a professional athletic team, is a nonresident of Iowa. During the season, B is injured and is unable to render services for B's team. While B is undergoing medical treatment at a clinic, which is not a facility of the team, but is located in Iowa, B's team travels to Iowa for a game. The number of days B's team spends in Iowa for practice, games, meetings, for example, while B is present at the clinic, are not to be considered duty days spent in Iowa for player B for that taxable year for purposes of this rule, but these days are considered to be included within total duty days spent both within and outside Iowa.

c. Player C, a member of a professional athletic team, is a nonresident of Iowa. During the season, C is injured and is unable to render services for C's team. C performs rehabilitation exercises at the facilities of C's team in Iowa as well as at personal facilities in Iowa. The days C performs rehabilitation exercise in the facilities of C's team are considered duty days spent in Iowa for player C for that taxable year for purposes of this rule. However, days player C spends at personal facilities in Iowa are not to be considered duty days spent in Iowa for player C for that taxable year for purposes of this rule, but the days are considered to be included within total duty days spent both within and outside Iowa.

d. Player D, a member of a professional athletic team, is a nonresident of Iowa. During the season, D travels to Iowa to participate in the annual all-star game as a representative of D's team. The number of days D spends in Iowa for practice, the game, meetings, for example, are considered to be duty days spent in Iowa for player D for that taxable year for purposes of this rule, as well as included within total duty days spent both within and outside Iowa.

e. Assume the same facts as given in paragraph "d," except that player D is not participating in the all-star game and is not rendering services for D's team in any manner. Player D is instead traveling to and attending this game solely as a spectator. The number of days player D spends in Iowa for the game is not to be considered to be duty days spent in Iowa for purposes of this rule. However, the days are considered to be included within total duty days spent both within and outside Iowa.

40.46(4) *Use of an alternative method to compute taxable portion of a nonresident's compensation as a member of a professional athletic team.* If a nonresident member of a professional athletic team believes that the method provided in this rule for allocation of the member's compensation to Iowa is not equitable, the nonresident member may propose the use of an alternative method for the allocation

of the compensation to Iowa. The request for an alternative method for allocation must be filed no later than 60 days before the due date of the return, considering that the due date may be extended for up to 6 months after the original due date if at least 90 percent of the tax liability was paid by the original due date (April 30 for taxpayers filing on a calendar-year basis).

The request for an alternative method should be filed with the Taxpayer Services and Policy Division, P.O. Box 10457, Des Moines, Iowa 50306. The request must set forth the alternative method for allocation to Iowa of the compensation of the nonresident professional team member. In addition, the request must specify, in detail, why the method for allocation of the compensation set forth in this rule is not equitable, as well as why the alternative method for allocation of the compensation is more equitable than the method provided in this rule. The burden of proof is on the nonresident professional team member to show that the alternative method is more equitable than the method provided in the rule.

If the department determines that the alternative method is more reasonable for allocation of the taxable portion of the team member's compensation than the method provided in this rule, the team member can use the alternative method on the current return and on subsequent returns.

If the department rejects the team member's use of the alternative method, the team member may file a protest within 60 days of the date of the department's letter of rejection. The nonresident team member's protest of the department's rejection of the alternate formula must be made in accordance with rule 701—7.8(17A) and must state, in detail, why the method provided in this rule is not equitable, as well as why the alternative method for allocation of the compensation is more equitable than the method set forth in this rule.

This rule is intended to implement Iowa Code sections 422.3, 422.7, and 422.8.
[ARC 7761B, IAB 5/6/09, effective 6/10/09; ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—40.47(422) Partial exclusion of pensions and other retirement benefits for disabled individuals, individuals who are 55 years of age or older, surviving spouses, and survivors. For tax years beginning on or after January 1, 1995, an individual who is disabled, is 55 years of age or older, is a surviving spouse, or is a survivor with an insurable interest in an individual who would have qualified for the exclusion is eligible for a partial exclusion of retirement benefits received in the tax year. For tax years beginning on or after January 1, 2001, the partial exclusion of retirement benefits received in the tax year is increased up to a maximum of \$6,000 for a person other than a husband or wife who files a separate state return and up to a maximum of \$12,000 for a husband and wife who file a joint Iowa return. For tax years beginning on or after January 1, 1998, the partial exclusion of retirement benefits received in the tax year was increased up to a maximum of \$5,000 for a person, other than a husband or wife who files a separate state income tax return, and up to a maximum of \$10,000 for a husband and wife who file a joint state income tax return. A husband and wife filing separate state income tax returns or separately on a combined state return are allowed a combined exclusion of retirement benefits of up to a maximum of \$10,000 for tax years beginning in 1998, 1999 and 2000 and a combined exclusion of up to a maximum of \$12,000 for tax years beginning on or after January 1, 2001. The \$10,000 or \$12,000 exclusion shall be allocated to the husband and wife in the proportion that each spouse's respective pension and retirement benefits received bear to the total combined pension and retirement benefits received by both spouses. See rule 701—40.80(422) for the exclusion of military retirement pay for tax years beginning on or after January 1, 2014.

EXAMPLE 1. A married couple elected to file separately on the combined return form. Both spouses were 55 years of age or older. The wife received \$95,000 in retirement benefits and the husband received \$5,000 in retirement benefits. Since the wife received 95 percent of the retirement benefits, she would be entitled to 95 percent of the \$10,000 retirement income exclusion or a retirement income exclusion of \$9,500. The husband would be entitled to 5 percent of the \$10,000 retirement income exclusion or an exclusion of \$500.

EXAMPLE 2. A married couple elected to file separately on the combined return form. Both spouses were 55 years of age or older. The husband had \$15,000 in retirement benefits from a pension. The wife received no retirement benefits. In this situation, the husband can use the entire \$10,000 retirement

income exclusion to exclude \$10,000 of his pension benefits since the spouse did not use any of the \$10,000 retirement income exclusion for the tax year.

EXAMPLE 3. A married couple elected to file separately on the combined return form. One spouse was 52 years of age and received a pension income of \$20,000. The other spouse was 55 years of age and received no pension income. Since the spouse receiving the pension income was not 55 years of age, no exclusion is allowed on the Iowa return.

EXAMPLE 4. A married couple elected to file separately on the combined return form. One spouse was 52 years of age and received a pension income of \$10,000. The other spouse was 55 years of age and received a pension income of \$8,000. Since only one spouse receiving the pension income was 55 years of age, an exclusion of \$8,000 is allowed on the Iowa return. The exclusion of \$8,000 is allowed since a married couple is allowed a combined exclusion of up to \$12,000.

For tax years beginning on or after January 1, 1995, but prior to January 1, 1998, the retirement income exclusion was up to \$3,000 for single individuals, up to \$3,000 for each married person filing a separate Iowa return, up to \$3,000 for each married person filing separately on the combined return form, and up to \$6,000 for married taxpayers filing joint Iowa returns. For example, a married couple elected to file separately on the combined return form and both spouses were 55 years of age or older. One spouse had \$2,000 in pension income that could be excluded, since the pension income was \$3,000 or less. The other spouse had \$6,000 in pension income and could exclude \$3,000 of that income due to the retirement income exclusion. This second spouse could not exclude an additional \$1,000 of the up to \$3,000 retirement income exclusion that was not used by the other spouse.

“*Insurable interest*” is a term used in life insurance which also applies to this rule and is defined to be “such an interest in the life of the person insured, arising from the relations of the party obtaining the insurance, either as credit of or surety for the assured, or from the ties of blood or marriage to him, as would justify a reasonable expectation of advantage or benefit from the continuance of his life.” *Warnock v. Davis*, 104 U.S. 775, 779, 26 L.Ed. 924; *Connecticut Mut. Life Ins. Co. v. Luchs*, 2 S.Ct. 949, 952, 108 U.S. 498, 27 L.Ed. 800; Appeal of Corson, 6 A. 213, 215, 113 Pa. 438, 57 Am. Rep. 479; *Adams’ Adm’r v. Reed*, Ky., 36 S.W. 568, 570; *Trinity College v. Travelers’ Co.*, 18 S.E. 175, 176, 113 N.C. 244, 22 L.R.A. 291; *Opitz v. Karel*, 95 N.W. 948, 951, 118 Wis. 527, 62 L.R.A. 982. It is not necessary that the expectation of advantage or profit should always be capable of pecuniary estimation, for a parent has an insurable interest in the life of his child, and a child in the life of his parent, a husband in the life of his wife, and a wife in the life of her husband. The natural affection in cases of this kind is considered as more powerful, as operating the more efficaciously, to protect the life of the insured than any other consideration, but in all cases there must be a reasonable ground, founded on relations to each other, either pecuniary or of blood or affinity, to expect some benefit or advantage from the continuance of the life of the assured. *Warnock v. Davis*, 104 U.S. 775, 26 L.Ed. 924; Appeal of Corson, 6 A. 213, 215, 113 Pa. 438, 57 Am. Rep. 479; *Connecticut Mut. Life Ins. Co. v. Luchs*, 2 S.Ct. 949, 952, 108 U.S. 498, 27 L.Ed. 800.

For purposes of this rule, the term “insurable interest” will be considered to apply to a beneficiary receiving retirement benefits due to the death of a pensioner or annuitant under the same circumstances as if the beneficiary were receiving life insurance benefits as a result of the death of the pensioner or annuitant.

For purposes of this rule, the term “survivor” is a person other than the surviving spouse of an annuitant or pensioner who is receiving the annuity or pension benefits because the person was a beneficiary of the pensioner or annuitant at the time of death of the pensioner or annuitant. In addition, in order for this person to qualify for the partial exclusion of pensions or retirement benefits, this survivor must have had an insurable interest in the pensioner or annuitant at the time of death of the annuitant or pensioner.

A survivor other than the surviving spouse will be considered to have an insurable interest in the pensioner or annuitant if the survivor is a son, daughter, mother, or father of the annuitant or pensioner. The relationship of these individuals to the pensioner or annuitant is considered to be so close that no separate pecuniary or monetary interest between the pensioner or annuitant and any of these relatives must be established.

A survivor may include relatives of the pensioner or annuitant other than those relatives that were mentioned above. However, before any of these relatives can be considered to be a survivor for purposes of this rule, the relative must have had some pecuniary interest in the continuation of the life of the pensioner or annuitant. That is, the relative must establish a relationship with the pensioner or annuitant that shows there was a reasonable expectation of an advantage or benefit which the person would have received with the continuance of the life of the pensioner or annuitant.

The fact that a niece of the pensioner or annuitant was named beneficiary of an uncle's pension where the uncle had no closer relatives does not in itself establish that the niece had an insurable interest in the pension benefits, if the niece was not receiving monetary benefits or the niece did not have some special relationship to the uncle at the time of the uncle's death.

If a grandson was receiving college tuition regularly from his grandfather and received the grandfather's pension as a beneficiary of the grandfather after the grandfather's death, the grandson would be deemed to have an insurable interest in the benefits and would be eligible for the partial retirement benefit exclusion.

A person who is not related to the pensioner or annuitant, such as a partner in a business or a creditor, may have an insurable interest in the pensioner or annuitant. However, the burden of proof is on a nonrelated person to show that the person had an insurable interest in the pensioner or the annuitant at the time of death of the pensioner or annuitant.

There are numerous court cases which deal with whether a person had established an insurable interest in the life of an individual that was insured. These cases may be used as a guideline to determine whether or not a person receiving a pension or annuity due to the death of an annuitant or pensioner had an insurable interest in the annuitant or pensioner at the time of death of the pensioner or annuitant. Thus, if a person would have met criteria for an insurable interest for purposes of an interest in a person's life insurance policy, the person would also be considered to be qualified for an insurable interest in a pensioner or annuitant.

Retirement benefits subject to the retirement income exclusion include, but are not limited to: benefits from defined benefit or defined contribution pension and annuity plans, benefits from annuities, incomes from individual retirement accounts, benefits from pension or annuity plans contributed by an employer or maintained or contributed by a self-employed person and benefits and earnings from deferred compensation plans. However, the exclusion does not apply to social security benefits. A surviving spouse who is not disabled or is not 55 years of age or older can only exclude retirement benefits received as a result of the death of the other spouse and on the basis that the deceased spouse would have been eligible for the exclusion in the tax year. In order for a survivor other than the surviving spouse to qualify for the partial exclusion of retirement benefits, the survivor must have received the retirement benefits as a result of the death of a pensioner or annuitant who would have qualified for the exclusion in the tax year on the basis of age or disability. In addition, the survivor other than the surviving spouse would have had to have an insurable interest in the pensioner or annuitant at the time of the death of the pensioner or annuitant.

For purposes of this rule, a disabled individual is a person who is receiving benefits as a result of retirement from employment or self-employment due to disability. In addition, a person is considered to be a disabled individual if the individual is determined to be disabled in accordance with criteria established by the Social Security Administration or other federal or state governmental agency.

Note that the pension or other retirement benefits that are excluded from taxation for certain individuals are to be considered as a part of net income for purposes of determining whether or not a particular individual's income is low enough to exempt that taxpayer from tax. In addition, the pension or other retirement benefits that are excluded from taxation for certain individuals are to be considered as a part of net income for the alternative tax computation, which is available to all taxpayers except those taxpayers filing as single individuals.

Finally, the pension or other retirement benefits are to be considered as a part of net income for individuals using the single filing status whose tax liabilities are limited so the liabilities cannot reduce the person's net income plus exempt benefits below \$9,000, or below \$18,000 for taxpayers 65 years of

age or older for the 2007 and 2008 tax years, or below \$24,000 for taxpayers 65 years of age or older for the 2009 and subsequent tax years.

This rule is intended to implement Iowa Code sections 422.5 and 422.7.
[ARC 8605B, IAB 3/10/10, effective 4/14/10; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—40.48(422) Health insurance premiums deduction. For tax years beginning on or after January 1, 1996, the amounts paid by a taxpayer for health insurance for the taxpayer, the taxpayer's spouse, and the taxpayer's dependents are deductible in computing net income on the Iowa return to the extent the amounts paid were not otherwise deductible in computing adjusted gross income. However, amounts paid by a taxpayer for health insurance on a pretax basis whereby the portion of the wages of the taxpayer used to pay health insurance premiums is not included in the taxpayer's gross wages for income tax or social security tax purposes are not deductible on the Iowa return.

In situations where married taxpayers pay health insurance premiums from a joint checking or other joint account and the taxpayers are filing separate state returns or separately on the combined return form, the taxpayers must allocate the deduction between the spouses on the basis of the net income of each spouse to the combined net income unless one spouse can show that only that spouse's income was deposited to the joint account.

In circumstances where a taxpayer is self-employed and takes a deduction on the 1996 federal return for 30 percent of the premiums paid for health insurance on the federal return, the taxpayer would be allowed a deduction on the Iowa return for the portion of the health insurance premiums that was not deducted on the taxpayer's federal return, including any health insurance premiums deducted as an itemized medical deduction under Section 213 of the Internal Revenue Code.

For purposes of the state deduction for health insurance premiums, the same premiums for the same health insurance or medical insurance coverage qualify for this deduction as would qualify for the federal medical expense deduction. Thus, premiums paid for contact lens insurance qualify for the health insurance deduction. Also eligible for the deduction for tax years beginning in the 1996 calendar year are premiums paid by a taxpayer before the age of 65 for medical care insurance effective after the age of 65, if the premiums are payable (on a level payment basis) for a period of ten years or more or until the year the taxpayer attains the age of 65 (but in no case for a period of less than five years). For tax years beginning on or after January 1, 1997, premiums for long-term health insurance for nursing home coverage are eligible for this deduction to the extent the premiums for long-term health care services are eligible for the federal itemized deduction for medical and dental expenses, irrespective of the limitations set forth in Section 213(d)(10) of the Internal Revenue Code. For example, a 55-year-old taxpayer who paid \$1,050 in premiums for long-term health insurance for nursing home coverage for the 2004 tax year would be allowed a deduction for Iowa purposes for the entire \$1,050, even though the limitation for the federal itemized deduction for medical expenses in Section 213(d)(10) of the Internal Revenue Code for these premiums for this taxpayer is \$980.

Amounts paid under an insurance contract for other than medical care (such as payment for loss of limb or life or sight) are not deductible, unless the medical charge is stated separately in the contract or provided in a separate statement.

This rule is intended to implement Iowa Code section 422.7 as amended by 1997 Iowa Acts, Senate File 129.

701—40.49(422) Employer social security credit for tips. Employers in the food and beverage industry are allowed a credit under Section 45B of the Internal Revenue Code for a portion of the social security taxes paid or incurred after 1993 on employee tips. The credit is equal to the employer's FICA obligation attributable to tips received which exceed tips treated as wages for purposes of satisfying minimum wage standards of the Fair Labor Standards Act. The credit is allowed only for tips received by an employee in the course of employment from customers on the premises of a business for which the tipping of employees serving food or beverages is customary. To the extent that an employer takes the credit for a portion of the social security taxes paid or incurred, the employer's deduction for the

social security tax is reduced accordingly. For Iowa income tax purposes, the full deduction for the social security tax paid or incurred is allowed for tax years beginning on or after January 1, 1994.

This rule is intended to implement Iowa Code Supplement section 422.7.

701—40.50(422) Computing state taxable amounts of pension benefits from state pension plans. For tax years beginning on or after January 1, 1995, a retired member of a state pension plan, or a beneficiary of a member, who receives benefits from the plan where there was a greater contribution to the plan for the member for state income tax purposes than for federal income tax purposes can report less taxable income from the benefits on the Iowa individual income tax return than was reported on the federal return for the same tax year. This rule applies only to a member of a state pension plan, or the beneficiary of a member, who received benefits from the plan sometime after January 1, 1995, and only in circumstances where the member received wages from public employment in 1995, 1996, 1997, or 1998, or possibly in 1999 for certain teachers covered by the state pension plan authorized in Iowa Code chapter 294 so the member had greater contributions to the state pension plan for state income tax purposes than for federal income tax purposes. Starting with wages paid on or after January 1, 1999, to employees covered by a state pension plan other than teachers covered by the state pension plan authorized in Iowa Code chapter 294, contributions made to the pension plan will be made on a pretax basis for state income tax purposes as well as for federal income tax purposes. However, in the case of teachers covered by the state pension plan authorized in Iowa Code chapter 294, contributions to the pension plan on behalf of these teachers on a pretax basis for state income tax purposes may start after January 1, 1999.

For example, in the case of a state employee who was covered by IPERS and had wages from covered public employment of \$41,000 or more in 1995, that person would have made posttax contributions to IPERS of \$1,517 for state income tax purposes for 1995 and zero posttax contributions to IPERS for federal income tax purposes for 1995. The \$1,517 in contributions to IPERS for federal income tax purposes was made on a pretax basis and was considered to have been made by the employee's employer or the state of Iowa and not the employee. At the time this employee receives retirement benefits from IPERS, the retired employee will be subject to federal income tax on the portion of the benefits that is attributable to the \$1,517 IPERS contribution made in 1995. However, this employee will not be subject to state income tax on the portion of the IPERS benefits received which is attributable to the \$1,517 contribution to IPERS for 1995.

This rule does not apply to members or beneficiaries of members who elect to take a lump sum distribution of benefits from a state pension plan in lieu of receiving monthly payments of benefits from the plan.

The following subrules further clarify how the portion of certain state pension benefits that is taxable for state individual income tax purposes for tax years beginning on or after January 1, 1995, is determined.

40.50(1) Definitions related to state taxation of benefits from state pension plan. The following definitions clarify those terms and phrases that have a bearing on the state's taxation of certain individuals who receive retirement benefits from state pension plans:

a. For purposes of this rule, the terms "state pension," "state pensions," and "state pension plans" mean only those pensions and those pension plans authorized in Iowa Code chapter 97A for public safety peace officers, chapter 97B for Iowa public employees (IPERS), chapter 294 for certain teachers, and chapter 411 for police officers and firefighters. There are other pension plans available for some public employees in the state which may be described as "state pensions" or "state pension plans" in other contexts or situations, but these pension plans are not covered by this rule. An example of a pension plan that is not a "state pension plan" for purposes of this rule is the judicial retirement system for state judges authorized in Iowa Code section 602.9101.

b. For purposes of this rule, "member" is an individual who was employed in public service covered by a state pension plan and is either receiving or was receiving benefits from the pension plan.

c. For purposes of this rule, “beneficiary” is a person who has received or is receiving benefits from a state pension plan due to the death of an individual or member who earned benefits in a state pension plan.

d. For purposes of this rule, the term “IPERS” means the Iowa public employees retirement system.

e. For purposes of this rule, the term “pretax,” when the term is applied to a contribution made to a state pension plan during a year from a public employee’s compensation, means a contribution to a state pension plan that is not taxed on the employee’s income tax return for the tax year in which the contribution is made. The contribution is considered to have been made by the state or the employee’s employer and not by the employee so this contribution is not part of the employee’s basis in the pension that is not taxed when the pension is received.

f. For purposes of this rule, the term “posttax,” when the term is applied to a contribution made to a state pension plan during a year from a public employee’s compensation, means the contribution is included in the employee’s taxable income for the tax year of the contribution and the contribution is considered to have been made by the employee. That is, the contribution is part of the employee’s basis in the pension which is not taxed at the time the pension is received.

40.50(2) *Computation of the taxable amount of the state pension for federal income tax purposes.* An individual who receives benefits in the tax year from one of the state pension plans is not subject to federal income tax on the benefits to the extent of the pensioner’s or member’s recovery of posttax contribution to the pension plan. The individual receiving benefits in the year from a state pension plan should get a Form 1099-R showing the total benefits received in the tax year from the pension plan. The individual can determine the federal taxable amount of the benefits by using the general rule or the simplified general rule which is described in federal publication 17 or federal publication 575. Note that members who first receive pension benefits after November 18, 1996, must compute the federal taxable amount of their pension benefits by using the simplified general rule shown in the federal tax publications. Note also that individuals receiving benefits in the tax year from IPERS who started receiving benefits in 1993 or in later years will receive information with the 1099-R form which shows the amount of gross benefits received in the tax year that is taxable for federal income tax purposes.

40.50(3) *Computing the taxable amount of state pension benefits for state individual income tax purposes.* An individual receiving state pension benefits in the tax year must have a number of facts about the state pension in order to be able to compute the taxable amount of the pension for Iowa income tax purposes. The individual must know the gross pension benefits received in the tax year, the taxable amount of the pension for federal income tax purposes, the employee’s contribution to the pension for federal income tax purposes, and the employee’s contribution to the pension for state income tax purposes. In situations where the employee’s contribution for state income tax purposes is equal to the contribution for federal income tax purposes, the same amount of the pension will be taxable on the state income tax return as is taxable on the federal return.

In cases when all of an individual’s employment covered by a state pension plan occurred on or after January 1, 1995, so that all the contributions to the pension plan (other than posttax service purchases) for the employee were made on a pretax basis for federal income tax purposes, all of the benefits received from the pension would be taxed on the federal income tax return. In this situation, the state taxable amount of the pension would be computed using the general rule or the simplified general rule shown in federal publication 17 or federal publication 575. The employee’s state contribution or state basis would be entered on line 2 of the worksheet in the federal publication that is usually used to compute the taxable amount of the pension for the federal income tax return.

To compute the state taxable amount of the state pension in situations where the employee had a contribution to the pension for federal tax purposes, the federal taxable amount for the year is first subtracted from the gross pension benefit received in the year which leaves the amount of the pension received in the year which was not taxable on the federal return. Next, the member’s posttax contribution or basis in the pension for federal tax purposes is divided by the member’s posttax contribution or basis in the pension for state income tax purposes which provides the ratio of the member’s federal basis or contribution to the member’s state contribution or basis. Next, the amount of the state pension received

in the year that is not taxed on the federal return is divided by the ratio or percentage that was determined in the previous step, which provides the exempt amount of the pension for state tax purposes. Finally, the state exempt amount determined in the previous step is subtracted from the gross amount received in the year, which leaves the taxable amount for state income tax purposes. Note that individuals who retired in 1993 and in years after 1993 and are receiving benefits from IPERS will receive information from IPERS which will advise them of the taxable amount of the pension for state income tax purposes. The examples in subrule 40.50(4) are provided to illustrate how the state taxable amounts of state pension benefits received in the tax year are computed in different factual situations.

40.50(4) Examples.

a. A state employee retired in April 1996 and started receiving IPERS benefits in April 1996. The retired state employee received \$1,794.45 in gross benefits from IPERS in 1996. The federal taxable amount of the benefits was \$1,690.36. The employee's federal posttax contribution or basis in the pension was \$4,907 and the state posttax contribution or basis was \$7,194. The nontaxable amount of the IPERS benefits for federal income tax was \$104.09 which was calculated by subtracting the federal taxable amount of \$1,690.36 from the gross amount of the benefits of \$1,794.45. The ratio of the employee's posttax contribution to the pension for federal income tax purposes was 68.21 percent of the employee's contribution to the pension for state income tax purposes. This was determined by dividing \$4,907 by \$7,194. The nontaxable amount of the IPERS benefit for federal income tax purposes of \$104.09 was then divided by 68.21 percent, which is the ratio determined in the previous step, and which results in a total of \$152.60. This was the nontaxable amount of the pension for state income tax purposes. When \$152.60 is subtracted from the gross benefits of \$1,794.45 paid in the year, the remaining amount is \$1,641.85 which is the taxable amount of the pension that should be reported on the individual's Iowa individual income tax return for the 1996 tax year.

b. A state employee retired in July 1995. The retired employee received \$1,881.88 in IPERS benefits in 1996 and \$1,790.60 of the benefits was taxable on the individual's federal return for 1996. The person's federal posttax contribution to the IPERS pension was \$3,130 and the posttax contribution for state income tax purposes was \$3,821. The amount of benefits not taxable for federal income tax purposes was \$91.28 which was computed by subtracting the amount of pension benefits of \$1,790.60 that was taxable on the federal income tax return from the gross benefits of \$1,881.88 received in 1996. The retiree's federal posttax contribution of \$3,130 to IPERS was divided by the retiree's posttax contribution of \$3,821 to IPERS for state income tax purposes which resulted in a ratio of 81.91 percent. The amount of IPERS benefits of \$91.28 exempt for federal income tax purposes is divided by the 81.91 percent computed in the previous step which results in an amount of \$111.44 which is the amount of IPERS benefits received in 1996 which is not taxable on the Iowa return. \$111.44 is subtracted from the gross benefits of \$1,881.88 received in 1996 which leaves the state taxable amount for 1996 of \$1,770.44.

This rule is intended to implement Iowa Code section 422.7 as amended by 1998 Iowa Acts, House File 2513.

701—40.51(422) Exemption of active-duty military pay of national guard personnel and armed forces military reserve personnel for overseas services pursuant to military orders for peacekeeping in the Bosnia-Herzegovina area. For active duty military pay received on or after November 21, 1995, by national guard personnel and by armed forces military reserve personnel, the pay is exempt from state income tax to the extent the military pay was earned overseas for services performed pursuant to military orders related to peacekeeping in the Bosnia-Herzegovina area. In order for the active duty pay to qualify for exemption from tax, the military service had to have been performed outside the United States, but not necessarily in the Bosnia-Herzegovina area.

This rule is intended to implement Iowa Code section 422.7 as amended by 1997 Iowa Acts, House File 355.

701—40.52(422) Mutual funds. Iowa does not tax dividend or interest income from regulated investment companies to the extent that such income is derived from interest on United States Government obligations or obligations of this state and its political subdivisions. The exemption is

also applicable to income from regulated investment companies which is derived from interest on government-sponsored enterprises and agencies where federal law specifically precludes state taxation of such interest. Income derived from interest on securities which are merely guaranteed by the federal government or from repurchase agreements collateralized by the United States Government obligations is not excluded and is subject to Iowa income tax. There is no distinction between Iowa's tax treatment of interest received by a direct investor as compared with a mutual fund shareholder. The interest retains its same character when it "flows-through" the mutual fund and is subject to taxation accordingly.

Taxpayers may subtract from federal adjusted gross income, income received from any of the obligations listed in subrule 40.2(1) and rule 701—40.3(422) above, even if the obligations are owned indirectly through owning shares in a mutual fund:

1. If the fund invests exclusively in these state tax-exempt obligations, the entire amount of the distribution (income) from the fund may be subtracted.

2. If the fund invests in both exempt and nonexempt obligations, the amount represented by the percentage of the distribution that the mutual fund identifies as exempt may be subtracted.

3. If the mutual fund does not identify an exempt amount or percentage, taxpayers may figure the amount to be subtracted by multiplying the distribution by the following fraction: as the numerator, the amount invested by the fund in state-exempt United States obligations; as the denominator, the fund's total investment. Use the year-end amounts to figure the fraction if the percentage ratio has remained constant throughout the year. If the percentage ratio has not remained constant, take the average of the ratios from the fund's quarterly financial reports.

Therefore, if the federal adjusted gross income of an individual, taxable by Iowa, includes dividends or interest of this type, an adjustment must be made deducting the amount of the dividend or interest.

This rule is intended to implement Iowa Code section 422.7.

701—40.53(422) Deduction for contributions by taxpayers to the Iowa educational savings plan trust and addition to income for refunds of contributions previously deducted. The Iowa educational savings plan trust was created so that individuals can contribute funds on behalf of beneficiaries in accounts administered by the treasurer of state to cover future higher education costs of the beneficiaries. The Iowa educational savings plan trust includes the college savings Iowa plan and the Iowa advisor 529 plan. The following subrules provide details on how individuals' net incomes are affected by contributions to beneficiaries' accounts, interest and any other earnings earned on beneficiaries' accounts, and refunds of contributions which were previously deducted.

40.53(1) Deduction from net income for contributions made to the Iowa educational savings plan trust on behalf of beneficiaries. Effective with contributions made on or after July 1, 1998, an individual referred to as a "participant" can claim a deduction on the Iowa individual income tax return for contributions made by that individual to the Iowa educational savings plan trust on behalf of a beneficiary. The deduction on the 1998 Iowa return cannot exceed \$2,000 per beneficiary for contributions made in 1998 or the adjusted maximum annual amount for contributions made after 1998. Note that the maximum annual amount that can be deducted per beneficiary may be adjusted or increased to an amount greater than \$2,000 for inflation on an annual basis. Rollover contributions from other states' educational savings plans will qualify for the deduction, subject to the maximum amount allowable. Starting with tax years beginning in the 2000 calendar year, a participant may contribute an amount on behalf of a beneficiary that is greater than \$2,000, but may claim a deduction on the Iowa individual return of the lesser of the amount given or \$2,000 as adjusted by inflation. For example, if a taxpayer made a \$5,000 contribution on behalf of a beneficiary to the educational savings plan in 2000, the taxpayer may claim a deduction on the IA 1040 return for 2000 in the amount of \$2,054, as this amount is \$2,000 as adjusted for inflation in effect for 2000.

For example, an individual has ten grandchildren from the age of six months to 12 years. In October 1998, the person became a participant in the Iowa educational savings plan trust by making \$2,000 contributions to the trust on behalf of each of the ten grandchildren. When the participant files the 1998 Iowa individual income tax return, the participant can claim a deduction on the return for the \$20,000 contributed to the Iowa educational savings plan trust on behalf of the individual's ten grandchildren.

40.53(2) *Exclusion of interest and earnings on beneficiary accounts in the Iowa educational savings plan trust.* To the extent that interest or other earnings accrue on a beneficiary's account in the Iowa educational savings plan trust, the interest or other earnings are excluded for purposes of computing net income on the Iowa individual income tax return of the participant or the return of the beneficiary.

40.53(3) *Including on the Iowa individual return amounts refunded to the participant from the Iowa educational savings plan trust that had previously been deducted.* If a participant cancels a beneficiary's account in the Iowa educational savings plan trust and receives a refund of the funds in the account made on behalf of the beneficiary, or if a participant makes a withdrawal from the Iowa educational savings plan trust for purposes other than the payment of qualified education expenses, the refund of the funds is to be included in net income on the participant's Iowa individual income tax return to the extent that contributions to the account had been deducted on prior state individual income tax returns of the participant.

For example, because a beneficiary of a certain participant died in the year 2000, this participant in the Iowa educational savings plan trust canceled the participant agreement for the beneficiary with the trust and received a refund of \$4,200 of funds in the beneficiary's account. Because \$4,000 of the refund represented contributions that the participant had deducted on prior Iowa individual income tax returns, the participant was to report on the Iowa return for the tax year 2000, \$4,000 in contributions that had been deducted on the participant's Iowa returns for 1998 and 1999.

40.53(4) *Deduction for contributions made to the endowment fund of the Iowa educational savings plan trust.* To the extent that the contribution was not deductible for federal income tax purposes, an individual can deduct on the Iowa individual income tax return a gift, grant, or donation to the endowment fund of the Iowa educational savings plan trust. The contribution must be made on or after July 1, 1998, but before April 15, 2004. Effective April 15, 2004, the deduction for contributions made to the endowment fund is repealed.

This rule is intended to implement Iowa Code section 422.7 as amended by 2007 Iowa Acts, House File 923.

[ARC 7761B, IAB 5/6/09, effective 6/10/09]

701—40.54(422) Roth individual retirement accounts. Roth individual retirement accounts were authorized in the Taxpayer Relief Act of 1997 and are applicable for tax years beginning after December 31, 1997. Generally, no deduction is allowed on either the federal income tax return or the Iowa individual income tax return for a contribution to a Roth IRA. The following subrules include information about tax treatment of certain transactions for Roth IRAs.

40.54(1) *Taxation of income derived from rolling over or converting existing IRAs to Roth IRAs.* At the time existing IRAs are rolled over to or converted to Roth IRAs in the 1998 calendar year or in a subsequent year, any income realized from the rollover or conversion of the existing IRA is taxable. However, in the case of conversion of existing IRAs to Roth IRAs in 1998, the taxpayer can make an election to have all the income realized from the conversion subject to tax in 1998 rather than have the conversion income spread out over four years. If the conversion income is spread out over four years, one-fourth of the conversion income is included on the 1998 Iowa and federal returns of the taxpayer and one-fourth of the income is included on the taxpayer's Iowa and federal returns for each of the following three tax years. Note that if an existing IRA for an individual is converted to a Roth IRA for the individual in a calendar year after 1998, all the income realized from the conversion is to be reported on the federal return and the Iowa return for that tax year for the individual. That is, when conversion of existing IRAs to Roth IRAs occurs after 1998, there is no provision for having the conversion income taxed over four years.

For example, an Iowa resident converted three existing IRAs to one Roth IRA in 1998, realized \$20,000 in income from the conversion, and did not elect to have all the conversion income taxed on the 1998 Iowa and federal returns. Because the taxpayer did not make the election so all the conversion income was taxed in 1998, \$5,000 in conversion income was to be reported on the taxpayer's federal and Iowa returns for 1998 and similar incomes were to be reported on the federal and Iowa returns for 1999, 2000, and 2001. Note that to the extent the recipient of the Roth IRA conversion income is

eligible, the conversion income is subject to the pension/retirement income exclusion described in rule 701—40.47(422).

40.54(2) Roth IRA conversion income for part-year residents. To the extent that an Iowa resident has Roth IRA conversion income on the individual's federal income tax return, the same income will be included on the resident's Iowa income tax return. However, when an individual with Roth IRA conversion income in the tax year is a part-year resident of Iowa, the individual may allocate the conversion income on the Iowa return in the ratio of the taxpayer's months in Iowa during the tax year to 12 months. In a situation where an individual spends more than half of a month in Iowa, that month is to be reported to Iowa for purposes of the allocation.

For example, an individual moved to Des Moines from Omaha on June 12, 1998, and had \$20,000 in Roth IRA conversion income in 1998. Because the individual spent 7 months in Iowa in 1998, 7/12, or 60 percent, of the \$20,000 in conversion income is allocated to Iowa. Thus, \$12,000 of the conversion income should be reported on the taxpayer's Iowa return for 1998.

This rule is intended to implement Iowa Code section 422.7 as amended by 1998 Iowa Acts, Senate File 2357.

701—40.55(422) Exemption of income payments for victims of the Holocaust and heirs of victims. For tax years beginning on or after January 1, 2000, income payments received by individuals because they were victims of the Holocaust or income payments received by individuals who are heirs of victims of the Holocaust are excluded in the computation of net incomes, to the extent the payments were included in the individuals' federal adjusted gross incomes. Victims of the Holocaust were victims of persecution in the World War II era for racial, ethnic or religious reasons by Nazi Germany or other Axis regime.

Holocaust victims may receive income payments for slave labor performed in the World War II era. Income payments may also be received by Holocaust victims as reparation for assets stolen from, hidden from, or otherwise lost in the World War II era, including proceeds from insurance policies of the victims. The World War II era includes the time of the war and the time immediately before and immediately after the war. However, income from assets acquired with the income payments or from the sale of those assets shall not be excluded from the computation of net income. The exemption of income payments shall only apply to the first recipient of the income payments who was either a victim of persecution by Nazi Germany or any other Axis regime or a person who is an heir of the victim of persecution.

This rule is intended to implement Iowa Code sections 217.39 and 422.7.

701—40.56(422) Taxation of income from the sale of obligations of the state of Iowa and its political subdivisions. For tax years beginning on or after January 1, 2001, income from the sale of obligations of the state of Iowa and its political subdivisions shall be added to Iowa net income to the extent not already included. Gains or losses from the sale or other disposition of bonds issued by the state of Iowa or its political subdivisions shall be included in Iowa net income unless the law authorizing these obligations specifically exempts the income from the sale or other disposition of the bonds from the Iowa individual income tax.

This rule is intended to implement Iowa Code section 422.7 as amended by 2001 Iowa Acts, chapter 116.

701—40.57(422) Installment sales by taxpayers using the accrual method of accounting. For tax years beginning on or after January 1, 2000, and prior to January 1, 2002, taxpayers who use the accrual method of accounting and who have sales or exchanges of property that they reported on the installment method for federal income tax purposes must report the total amount of the gain or loss from the transaction in the tax year of the sale or exchange pursuant to Section 453 of the Internal Revenue Code as amended up to and including January 1, 2000.

EXAMPLE 1. Taxpayer Jones uses the accrual method of accounting for reporting income. In 2001, Mr. Jones sold farmland he had held for eight years for \$200,000 which resulted in a capital gain of

\$50,000. For federal income tax purposes, Mr. Jones elected to report the transaction on the installment basis, where he reported \$12,500 of the gain on his 2001 federal return and will report capital gains of \$12,500 on each of his federal returns for the 2002, 2003 and 2004 tax years.

However, for Iowa income tax purposes, Mr. Jones must report on his 2001 Iowa return the entire capital gain of \$50,000 from the land sale. Although Taxpayer Jones must report a capital gain of \$12,500 on each of his federal income tax returns for 2002, 2003 and 2004, from the installment sale of the farmland in 2001, he will not have to include the installments of \$12,500 on his Iowa income tax returns for those three tax years because Mr. Jones had reported the entire capital gain of \$50,000 from the 2001 transaction on his 2001 Iowa income tax return.

EXAMPLE 2. Taxpayer Smith uses the accrual method of accounting for reporting income. In 2002, Mr. Smith sold farmland he had held for eight years for \$500,000 which resulted in a capital gain of \$100,000. For federal income tax purposes, Mr. Smith elected to report the transaction on the installment basis, where he reported \$20,000 of the gain on his 2002 federal return and will report the remaining capital gains on federal returns for the four subsequent tax years. Because this installment sale occurred in 2002, Mr. Smith shall report \$20,000 of the capital gain on his Iowa income tax return for 2002 and will report the balance of the capital gains from the installment sale on Iowa returns for the next four tax years, the same as reported on his federal returns for those years.

This rule is intended to implement Iowa Code section 422.7 as amended by 2002 Iowa Acts, House File 2116.

701—40.58(422) Exclusion of distributions from retirement plans by national guard members and members of military reserve forces of the United States. For tax years beginning on or after January 1, 2002, members of the Iowa national guard or members of military reserve forces of the United States who are ordered to national guard duty or federal active duty are not subject to Iowa income tax on the amount of distributions received during the tax year from qualified retirement plans of the members to the extent the distributions were taxable for federal income tax purposes. In addition, the members are not subject to state penalties on the distributions even though the members may have been subject to federal penalties on the distributions for early withdrawal of benefits. Because the distributions described above are not taxable for Iowa income tax purposes, a national guard member or armed forces reserve member who receives a distribution from a qualified retirement plan may request that the payer of the distribution not withhold Iowa income tax from the distribution.

This rule is intended to implement 2011 Iowa Code Supplement section 422.7 as amended by 2012 Iowa Acts, Senate File 2097.

[ARC 0337C, IAB 9/19/12, effective 10/24/12]

701—40.59(422) Exemption of payments received by a beneficiary from an annuity purchased under an employee's retirement plan when the installment has been included as part of a decedent employee's estate. Rescinded ARC 1137C, IAB 10/30/13, effective 12/4/13.

701—40.60(422) Additional first-year depreciation allowance.

40.60(1) Assets acquired after September 10, 2001, but before May 6, 2003. For tax periods ending after September 10, 2001, but beginning before May 6, 2003, the additional first-year depreciation allowance ("bonus depreciation") of 30 percent authorized in Section 168(k) of the Internal Revenue Code, as enacted by Public Law No. 107-147, Section 101, does not apply for Iowa individual income tax. Taxpayers who claim the bonus depreciation on their federal income tax return must add the total amount of depreciation claimed on assets acquired after September 10, 2001, but before May 6, 2003, and subtract the amount of depreciation taken on such property using the modified accelerated cost recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(k).

If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss

reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets.

The adjustment for both depreciation and the gain or loss on the sale of qualifying assets acquired after September 10, 2001, but before May 6, 2003, can be calculated on Form IA 4562A.

See 701—subrule 53.22(1) for examples illustrating how this subrule is applied.

40.60(2) *Assets acquired after May 5, 2003, but before January 1, 2005.* For tax periods beginning after May 5, 2003, but beginning before January 1, 2005, the bonus depreciation of 50 percent authorized in Section 168(k) of the Internal Revenue Code, as amended by Public Law No. 108-27, Section 201, may be taken for Iowa individual income tax. If the taxpayer elects to take the 50 percent bonus depreciation, the depreciation deduction allowed on the Iowa individual income tax return is the same as the depreciation deduction allowed on the federal income tax return for assets acquired after May 5, 2003, but before January 1, 2005.

a. If the taxpayer elects to take the 50 percent bonus depreciation and had filed an Iowa return prior to February 24, 2005, which reflected the disallowance of 50 percent bonus depreciation, the taxpayer may choose between two options to reflect this change. Taxpayer may either file an amended return for the applicable tax year to reflect the 50 percent bonus depreciation provision, or taxpayer may reflect the change for 50 percent bonus depreciation on the next Iowa return filed subsequent to February 23, 2005. Taxpayer must choose only one of these two options. Regardless of the option chosen, taxpayer must complete and attach a revised Form IA 4562A to either the amended return or the return filed subsequent to February 23, 2005.

EXAMPLE 1: Taxpayer filed a 2003 Iowa individual income tax return on April 15, 2004, which reflected an adjustment of \$50,000 for the difference between federal depreciation and Iowa depreciation relating to the disallowance of 50 percent bonus depreciation. Taxpayer now elects to take the 50 percent bonus depreciation for Iowa tax purposes. Taxpayer may either amend the 2003 Iowa return to reflect a \$50,000 reduction in Iowa taxable income, or taxpayer may take the additional deduction of \$50,000 on taxpayer's 2004 Iowa return that is filed after February 23, 2005.

EXAMPLE 2: Assume the same facts as given in Example 1, and taxpayer filed a 2004 Iowa return prior to February 24, 2005. Taxpayer did not take an additional \$50,000 deduction on the 2004 Iowa return. Taxpayer may either amend the 2003 Iowa return to reflect a \$50,000 reduction in Iowa taxable income, or taxpayer may take the additional deduction of \$50,000 on taxpayer's 2005 Iowa return.

b. If the taxpayer elects not to take the 50 percent bonus depreciation, taxpayer must add the total amount of depreciation claimed on assets acquired after May 5, 2003, but before January 1, 2005, and subtract the amount of depreciation taken on such property using the modified accelerated cost recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(k). If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets. The adjustment for both depreciation and the gain or loss on the sale of qualifying assets acquired after May 5, 2003, but before January 1, 2005, can be calculated on Form IA 4562A.

40.60(3) *Assets acquired after December 31, 2007, but before January 1, 2010.* For tax periods beginning after December 31, 2007, but beginning before January 1, 2010, the bonus depreciation of 50 percent authorized in Section 168(k) of the Internal Revenue Code, as amended by Public Law No. 110-185, Section 103, and Public Law 111-5, Section 1201, does not apply for Iowa individual income tax. Taxpayers who claim the bonus depreciation on their federal income tax return must add the total amount of depreciation claimed on assets acquired after December 31, 2007, but before January 1, 2010, and subtract the amount of depreciation taken on such property using the modified accelerated cost recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(k).

If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss

reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets.

The adjustment for both depreciation and the gain or loss on the sale of qualifying assets acquired after December 31, 2007, but before January 1, 2010, can be calculated on Form IA 4562A.

See rule 701—53.22(422) for examples illustrating how this rule is applied.

40.60(4) *Qualified disaster assistance property.* For property placed in service after December 31, 2007, with respect to federal declared disasters occurring before January 1, 2010, the bonus depreciation of 50 percent authorized in Section 168(n) of the Internal Revenue Code for qualified disaster assistance property, as amended by Public Law 110-343, Section 710, does not apply for Iowa individual income tax. Taxpayers who claim the bonus depreciation on their federal income tax return must add the total amount of depreciation claimed on qualified disaster assistance property and subtract the amount of depreciation taken on such property using the modified accelerated cost recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(n).

If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of this property for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of such property.

The adjustment for both depreciation and the gain or loss on the sale of qualifying disaster assistance property can be calculated on Form IA 4562A.

40.60(5) *Assets acquired after December 31, 2009, but before January 1, 2014.* For tax periods beginning after December 31, 2009, but beginning before January 1, 2014, the bonus depreciation authorized in Section 168(k) of the Internal Revenue Code, as amended by Public Law No. 111-240, Section 2022, Public Law No. 111-312, Section 401, and Public Law No. 112-240, Section 331, does not apply for Iowa individual income tax. Taxpayers who claim the bonus depreciation on their federal income tax return must add the total amount of depreciation claimed on assets acquired after December 31, 2009, but before January 1, 2014, and subtract the amount of depreciation taken on such property using the modified accelerated cost recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(k).

If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets.

The adjustment for both depreciation and the gain or loss on the sale of qualifying assets acquired after December 31, 2009, but before January 1, 2014, can be calculated on Form IA 4562A.

See 701—subrule 53.22(3) for examples illustrating how this subrule is applied.

This rule is intended to implement Iowa Code section 422.7 as amended by 2013 Iowa Acts, Senate File 106.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 9820B, IAB 11/2/11, effective 12/7/11; ARC 1101C, IAB 10/16/13, effective 11/20/13]

701—40.61(422) Exclusion of active duty pay of national guard members and armed forces military reserve members for service under orders for Operation Iraqi Freedom, Operation Noble Eagle, Operation Enduring Freedom or Operation New Dawn. For tax years beginning on or after January 1, 2003, active duty pay received by national guard members and armed forces reserve members is excluded to the extent the income is included in federal adjusted gross income and to the extent the active duty pay is for service under military orders for Operation Iraqi Freedom, Operation Noble Eagle or Operation Enduring Freedom. For tax years beginning on or after January 1, 2010, active duty pay received by national guard members and armed forces reserve members is excluded to the extent the income is included in federal adjusted gross income and to the extent the active duty pay is for service under military orders for Operation New Dawn. National guard members and military reserve members receiving active duty pay on or after January 1, 2003, but before January 1, 2011, for service not covered

by military orders for one of the operations specified above are subject to Iowa income tax on the active duty pay to the extent the active duty pay is included in federal adjusted gross income. For active duty pay received on or after January 1, 2011, see rule 701—40.76(422). An example of a situation where the active duty pay may not be included in federal adjusted gross income is when the active duty pay was received for service in an area designated as a combat zone or in an area designated as a hazardous duty area so the income may be excluded from federal adjusted gross income. That is, if an individual's active duty military pay is not subject to federal income tax, the active duty military pay will not be taxable on the individual's Iowa income tax return.

National guard members and military reserve members who are receiving active duty pay for service on or after January 1, 2003, that is exempt from Iowa income tax, may complete an IA W-4 Employee Withholding Allowance Certificate and claim exemption from Iowa income tax for active duty pay received during the time they are serving on active duty pursuant to military orders for Operation Iraqi Freedom, Operation Noble Eagle, Operation Enduring Freedom or Operation New Dawn.

This rule is intended to implement Iowa Code section 422.7 as amended by 2011 Iowa Acts, House File 652.

[ARC 9822B, IAB 11/2/11, effective 12/7/11]

701—40.62(422) Deduction for overnight expenses not reimbursed for travel away from home of more than 100 miles for performance of service as a member of the national guard or armed forces military reserve. A taxpayer may subtract, in computing net income, the costs not reimbursed that were incurred for overnight transportation, meals and lodging expenses for travel away from the taxpayer's home more than 100 miles, to the extent the travel expenses were incurred for the performance of services on or after January 1, 2003, by the taxpayer as a national guard member or an armed forces military reserve member. The deduction for Iowa tax purposes is the same that is allowed for federal income tax purposes.

This rule is intended to implement Iowa Code section 422.7 as amended by 2005 Iowa Acts, House File 186.

701—40.63(422) Exclusion of income from military student loan repayments. Individuals serving on active duty in the national guard, armed forces military reserve or the armed forces of the United States may subtract, to the extent included in federal adjusted gross income, income from military student loan repayments made on or after January 1, 2003.

This rule is intended to implement Iowa Code section 422.7 as amended by 2003 Iowa Acts, House File 674.

701—40.64(422) Exclusion of death gratuity payable to an eligible survivor of a member of the armed forces, including a member of a reserve component of the armed forces who has died while on active duty. An eligible survivor of a member of the armed forces, including a member of a reserve component of the armed forces, who has died while on active duty may subtract, to the extent included in federal adjusted gross income, a gratuity death payment made to the eligible survivor of a member of the armed forces who died while on active duty after September 10, 2001. This exclusion applies to a gratuity death payment made to the eligible survivor of any person in the armed forces or a reserve component of the armed forces who died while on active duty after September 10, 2001.

The purpose of the death gratuity is to provide a cash payment to assist a survivor of a deceased member of the armed forces to meet financial needs during the period immediately following a service member's death and before other survivor benefits, if any, become available.

This rule is intended to implement Iowa Code section 422.7 as amended by 2003 Iowa Acts, House File 674.

701—40.65(422) Section 179 expensing. For tax periods beginning on or after January 1, 2003, but beginning before January 1, 2006, the increase in the expensing allowance for qualifying property authorized in Section 179(b) of the Internal Revenue Code, as enacted by Public Law No. 108-27, Section 202, may be taken for Iowa individual income tax. If the taxpayer elects to take the increased

Section 179 expensing, the Section 179 expensing allowance on the Iowa individual income tax return is the same as the Section 179 expensing allowance on the federal income tax return for tax years beginning on or after January 1, 2003, but beginning before January 1, 2006. In addition, for tax periods beginning on or after January 1, 2008, but beginning before January 1, 2009, the increase in the expensing allowance for qualifying property authorized in Section 179(b) of the Internal Revenue Code, as enacted by Public Law No. 110-185, Section 102, may be taken for Iowa individual income tax. For tax periods beginning on or after January 1, 2009, but beginning before January 1, 2010, the increase in the expensing allowance for qualifying property authorized in Section 179(b) of the Internal Revenue Code, as enacted by Public Law No. 111-5, Section 1202, cannot be taken for Iowa individual income tax purposes. The maximum amount of Section 179 expensing allowed for tax periods beginning on or after January 1, 2009, but beginning before January 1, 2010, is \$133,000 for Iowa individual income tax purposes. For tax years beginning on or after January 1, 2010, the increase in the expensing allowance for qualifying property authorized in Section 179(b) of the Internal Revenue Code, as enacted by Public Law No. 111-240, Section 2021, Public Law No. 111-312, Section 402, and Public Law No. 112-240, Section 315, may be taken for Iowa individual income tax.

40.65(1) If the taxpayer elects to take the increased Section 179 expensing and had filed an Iowa return prior to February 24, 2005, which reflected the disallowance of increased Section 179 expensing, the taxpayer may choose between two options to reflect this change. Taxpayer may either file an amended return for the applicable tax year to reflect the increased Section 179 expensing, or taxpayer may reflect the change for increased Section 179 expensing on the next Iowa return filed subsequent to February 23, 2005. Taxpayer must choose only one of these two options. Regardless of the option chosen, taxpayer must complete and attach a revised Form IA 4562A to either the amended return or the return filed subsequent to February 23, 2005.

EXAMPLE 1: Taxpayer filed a 2003 Iowa individual income tax return on April 15, 2004, which reflected an adjustment of \$50,000 for the difference between the federal Section 179 expensing allowance and the Iowa Section 179 expensing allowance. Taxpayer now elects to take the increased Section 179 expensing allowance for Iowa tax purposes. Taxpayer may either amend the 2003 Iowa return to reflect a \$50,000 reduction in Iowa taxable income, or taxpayer may take the additional deduction of \$50,000 on taxpayer's 2004 Iowa return that is filed after February 23, 2005.

EXAMPLE 2: Assume the same facts as given in Example 1, and taxpayer filed a 2004 Iowa return prior to February 24, 2005. Taxpayer did not take an additional \$50,000 deduction on the 2004 Iowa return. Taxpayer may either amend the 2003 Iowa return to reflect a \$50,000 reduction in Iowa taxable income, or taxpayer may take the additional deduction of \$50,000 on taxpayer's 2005 Iowa return.

40.65(2) If the taxpayer elects not to take the increased Section 179 expensing, the expensing allowance is limited to \$25,000 for Iowa tax purposes. The difference between the federal Section 179 expensing allowance on such property, if in excess of \$25,000, and the Iowa expensing allowance of \$25,000 can be depreciated using the modified accelerated cost recovery system (MACRS) applicable under Section 168 of the Internal Revenue Code without regard to the bonus depreciation provision in Section 168(k).

If any such property was sold or disposed of during the tax year, the applicable Section 179 and related depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets.

The adjustment for both the Section 179 expensing allowance and related depreciation, along with the gain or loss on the sale of qualifying assets for tax years beginning on or after January 1, 2003, but beginning before January 1, 2006, can be calculated on Form IA 4562A.

See 701—subrule 53.23(2) for examples illustrating how this subrule is applied.

This rule is intended to implement Iowa Code section 422.7 as amended by 2013 Iowa Acts, Senate File 106.

[ARC 9103B, IAB 9/22/10, effective 10/27/10; ARC 9820B, IAB 11/2/11, effective 12/7/11; ARC 1101C, IAB 10/16/13, effective 11/20/13]

701—40.66(422) Deduction for certain unreimbursed expenses relating to a human organ transplant. For tax years beginning on or after January 1, 2005, a taxpayer, while living, may subtract up to \$10,000 in unreimbursed expenses that were incurred relating to the taxpayer's donation of all or part of a liver, pancreas, kidney, intestine, lung or bone marrow to another human being for immediate human organ transplantation. The taxpayer can claim this deduction only once, and the deduction can be claimed in the year in which the transplant occurred. The unreimbursed expenses must not be compensated by insurance to qualify for the deduction.

The unreimbursed expenses which are eligible for the deduction include travel expenses, lodging expenses and lost wages. If the deduction is claimed for travel expenses and lodging expenses, these expenses cannot also be claimed as an itemized deduction for medical expenses under Section 213(d) of the Internal Revenue Code for Iowa tax purposes. The deduction for lost wages does not include any sick pay or vacation pay reimbursed by an employer.

This rule is intended to implement Iowa Code section 422.7 as amended by 2005 Iowa Acts, House File 801.

701—40.67(422) Deduction for alternative motor vehicles. For tax years beginning on or after January 1, 2006, but beginning before January 1, 2015, a taxpayer may subtract \$2,000 for the cost of a clean fuel motor vehicle if the taxpayer was eligible to claim for federal tax purposes the alternative motor vehicle credit under Section 30B of the Internal Revenue Code for this motor vehicle.

The vehicles eligible for this deduction include new qualified fuel cell motor vehicles, new advanced lean burn technology motor vehicles, new qualified hybrid motor vehicles, qualified plug-in electric drive motor vehicles and new qualified alternative fuel vehicles. The advanced lean burn technology, qualified hybrid and qualified alternative fuel vehicles must be placed in service before January 1, 2011, to qualify for the deduction. The qualified plug-in electric drive motor vehicles must be placed in service before January 1, 2012, to qualify for the deduction. The qualified fuel cell motor vehicles must be placed in service before January 1, 2015, to qualify for the deduction. A taxpayer must claim a credit on the taxpayer's federal income tax return on federal Form 8910 to claim the deduction on the Iowa return.

This rule is intended to implement Iowa Code section 422.7.
[ARC 9820B, IAB 11/2/11, effective 12/7/11]

701—40.68(422) Injured veterans grant program.

40.68(1) For tax years beginning on or after January 1, 2006, a taxpayer who receives a grant under the injured veterans grant program provided in 2006 Iowa Acts, Senate File 2312, section 1, may subtract, to the extent included in federal adjusted gross income, the amount of the grant received. The injured veterans grant program is administered by the Iowa department of veterans affairs, and grants of up to \$10,000 are provided to veterans who are residents of Iowa and are injured in the line of duty in a combat zone or in a zone where the veteran was receiving hazardous duty pay after September 11, 2001.

40.68(2) For tax years beginning on or after January 1, 2006, a taxpayer may subtract, to the extent not otherwise deducted in computing adjusted gross income, the amounts contributed to the department of veterans affairs for the purpose of providing grants under the injured veterans grant program established in 2006 Iowa Acts, Senate File 2312, section 1. If a deduction is claimed for these amounts contributed to the injured veterans grant program, this deduction cannot also be claimed as an itemized deduction for charitable contributions under Section 170 of the Internal Revenue Code for Iowa tax purposes.

This rule is intended to implement Iowa Code section 422.7 as amended by 2006 Iowa Acts, Senate File 2312.

701—40.69(422) Exclusion of ordinary or capital gain income realized as a result of involuntary conversion of property due to eminent domain. For tax years beginning on or after January 1, 2006, a taxpayer may exclude the amount of ordinary or capital gain income realized as a result of the involuntary conversion of property due to eminent domain for Iowa individual income tax. Eminent domain refers to the authority of government agencies or instrumentalities of government to requisition or condemn

private property for any public improvement, public purpose or public use. The exclusion for Iowa individual income tax can only be claimed in the year in which the ordinary or capital gain income was reported on the federal income tax return.

In order for an involuntary conversion to qualify for this exclusion, the sale must occur due to the requisition or condemnation, or its threat or imminence, if it takes place in the presence of, or under the threat or imminence of, legal coercion relating to a requisition or condemnation. There are numerous federal revenue rulings, court cases and other provisions relating to the definitions of the terms “threat” and “imminence,” and these are equally applicable to the exclusion of ordinary or capital gains realized for tax years beginning on or after January 1, 2006.

40.69(1) Reporting requirements. In order to claim an exclusion of ordinary or capital gain income realized as a result of involuntary conversion of property due to eminent domain, the taxpayer must attach a statement to the Iowa individual income tax return in the year in which the exclusion is claimed. The statement should state the date and details of the involuntary conversion, including the amount of the gain being excluded and the reasons why the gain meets the qualifications of an involuntary conversion relating to eminent domain. In addition, if the gain results from the sale of replacement property as outlined in subrule 40.69(2), information must be provided in the statement on that portion of the gain that qualified for the involuntary conversion.

40.69(2) Claiming the exclusion when gain is not recognized for federal tax purposes. For federal tax purposes, an ordinary or capital gain is not recognized when the converted property is replaced with property that is similar to, or related in use to, the converted property. In those cases, the basis of the old property is simply transferred to the new property, and no gain is recognized. In addition, when property is involuntarily converted into money or other unlike property, any gain is not recognized when replacement property is purchased within a specified period for federal tax purposes.

For Iowa individual income tax purposes, no exclusion will be allowed for ordinary or capital gain income when there is no gain recognized for federal tax purposes. The exclusion will only be allowed in the year in which ordinary or capital gain income is realized due to the disposition of the replacement property for federal tax purposes, and the exclusion is limited to the amount of the ordinary or capital gain income relating to the involuntary conversion. The basis of the property for Iowa individual income tax purposes will remain the same as the basis for federal tax purposes and will not be altered because of the exclusion allowed for Iowa individual income tax.

EXAMPLE: In 2007, taxpayer sold some farmland as a result of an involuntary conversion relating to eminent domain and realized a gain of \$50,000. However, the taxpayer purchased similar farmland immediately after the sale, and no gain was recognized for federal tax purposes. Therefore, no exclusion is allowed on the 2007 Iowa individual income tax return. In 2009, taxpayer sold the replacement farmland that was not subject to an involuntary conversion and realized a total gain of \$70,000, which was reported on the 2009 federal income tax return. The taxpayer can claim a deduction of \$50,000 on the 2009 Iowa individual income tax return relating to the gain that resulted from the involuntary conversion.

This rule is intended to implement Iowa Code section 422.7.

701—40.70(422) Exclusion of income from sale, rental or furnishing of tangible personal property or services directly related to production of film, television or video projects.

40.70(1) Projects registered on or after January 1, 2007, but before July 1, 2009. For tax years beginning on or after January 1, 2007, a taxpayer who is a resident of Iowa may exclude, to the extent included in federal adjusted gross income, income received from the sale, rental or furnishing of tangible personal property or services directly related to the production of film, television, or video projects that are registered with the film office of the Iowa department of economic development.

Income which can be excluded on the Iowa return must meet the criteria of a qualified expenditure for purposes of the film qualified expenditure tax credit as set forth in rule 701—42.37(15,422). See rule 701—38.17(422) for the determination of Iowa residency.

However, if a taxpayer claims this income tax exclusion, the same taxpayer cannot also claim the film qualified expenditure tax credit as described in rule 701—42.37(15,422). In addition, any taxpayer

who claims this income tax exclusion cannot have an equity interest in a business which received a film qualified expenditure tax credit. Finally, any taxpayer who claims this income tax exclusion cannot participate in the management of the business which received the film qualified expenditure tax credit.

EXAMPLE: A production company which registers with the film office for a project is a limited liability company with three members, all of whom are Iowa residents. If any of the three members receives income that is a qualified expenditure for purposes of the film qualified expenditure tax credit, such member(s) cannot exclude this income on the Iowa income tax return because the member(s) has an equity interest in the business which received the credit.

40.70(2) *Projects registered on or after July 1, 2009.* For tax years beginning on or after July 1, 2009, a taxpayer who is a resident of Iowa may exclude no more than 25 percent of the income received from the sale, rental or furnishing of tangible personal property or services directly related to the production of film, television, or video projects that are registered with the film office of the Iowa department of economic development in the year in which the qualified expenditure occurred. A reduction of 25 percent of the income is allowed to be excluded for the three subsequent tax years.

EXAMPLE: An Iowa taxpayer received \$10,000 in income in the 2010 tax year related to qualified film expenditures for a project registered on February 1, 2010. The \$10,000 was reported as income on taxpayer's 2010 federal tax return. Taxpayer may exclude \$2,500 of income on the Iowa individual income tax return for each of the tax years 2010-2013.

40.70(3) *Repeal of exclusion.* The exclusion of income from the sale, rental or furnishing of tangible personal property or services directly related to production of film, television or video projects is repealed for tax years beginning on or after January 1, 2012. However, the exclusion is still available if the contract or agreement related to a film project was entered into on or before May 25, 2012. Assuming the same facts as those in the example in subrule 40.70(2), the taxpayer can continue to exclude \$2,500 of income on the Iowa individual income tax return for the 2012 and 2013 tax years since the contract or agreement was entered into on or before May 25, 2012.

This rule is intended to implement 2012 Iowa Acts, House File 2337, sections 38 to 40, and Iowa Code section 422.7 as amended by 2012 Iowa Acts, House File 2337, section 33.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 0398C, IAB 10/17/12, effective 11/21/12]

701—40.71(422) Exclusion for certain victim compensation payments. Effective for tax years beginning on or after January 1, 2007, a taxpayer may exclude from Iowa individual income tax any income received from certain victim compensation payments to the extent this income was reported on the federal income tax return. The amounts which may be excluded from income include the following:

1. Victim compensation awards paid under the victim compensation program administered by the department of justice in accordance with Iowa Code section 915.81, and received by the taxpayer during the tax year.

2. Victim restitution payments received by a taxpayer during the tax year in accordance with Iowa Code chapter 910 or 915.

3. Damages awarded by a court, and received by a taxpayer, in a civil action filed by a victim against an offender during the tax year.

This rule is intended to implement Iowa Code section 422.7 as amended by 2007 Iowa Acts, Senate File 70.

701—40.72(422) Exclusion of Vietnam Conflict veterans bonus.

40.72(1) For tax years beginning on or after January 1, 2007, but before January 1, 2013, a taxpayer who received a bonus under the Vietnam Conflict veterans bonus program may subtract, to the extent included in federal adjusted gross income, the amount of the bonus received. The Vietnam Conflict veterans bonus is administered by the Iowa department of veterans affairs, and bonuses of up to \$500 are awarded to residents of Iowa who served on active duty in the armed forces of the United States between July 1, 1973, and May 31, 1975.

40.72(2) For tax years beginning on or after January 1, 2008, but before January 1, 2013, a taxpayer who received a bonus under the Vietnam Conflict veterans bonus program may subtract, to the extent

included in federal adjusted gross income, the amount of the bonus received. The Vietnam Conflict veterans bonus is administered by the Iowa department of veterans affairs. Bonuses of up to \$500 are awarded to veterans who were inducted into active duty service from the state of Iowa, who served on active duty in the United States armed forces between July 1, 1958, and May 31, 1975, and who have not received a bonus for that service from Iowa or another state.

This rule is intended to implement 2011 Iowa Code Supplement section 422.7 as amended by 2012 Iowa Acts, Senate File 2038.
[ARC 0337C, IAB 9/19/12, effective 10/24/12]

701—40.73(422) Exclusion for health care benefits of nonqualified tax dependents. Effective for tax years beginning on or after January 1, 2009, but beginning before January 1, 2011, a taxpayer may exclude from Iowa individual income tax the income reported from including nonqualified tax dependents on the taxpayer's health care plan, to the extent this income was reported on the federal income tax return.

40.73(1) Term of coverage. Iowa Code section 509A.13B provides that group insurance, group insurance for public employees, and individual health insurance policies or contracts permit continuation of existing coverage for an unmarried child of an insured or enrollee, if the insured or enrollee so elects. If the election is made, it will be in effect through the policy anniversary date on or after the date the child marries, ceases to be a resident of Iowa, or attains the age of 25, whichever occurs first, so long as the unmarried child maintains full-time status as a student in an accredited institution of postsecondary education. These children can be included on the health care coverage even though they are not claimed as a dependent on the federal and Iowa income tax returns.

40.73(2) Federal treatment. Section 105(b) of the Internal Revenue Code provides that the income reported from including dependents on the taxpayer's health care coverage is exempt from federal income tax. However, income is reported for federal income tax purposes on the value of the health care coverage of children who are not claimed as dependents on the taxpayer's federal and Iowa income tax returns for tax years beginning on or after January 1, 2009, but beginning before January 1, 2011. The amount of income included on the federal income tax return is allowed to be excluded on the Iowa return. For tax years beginning on or after January 1, 2011, income is no longer reported on the federal income tax return on the value of health care coverage of children who are not claimed as dependents and who have not attained age 27 as of the end of the tax year; therefore, no adjustment is required on the Iowa return.

This rule is intended to implement Iowa Code section 422.7 as amended by 2011 Iowa Acts, Senate File 512.
[ARC 8605B, IAB 3/10/10, effective 4/14/10; ARC 9820B, IAB 11/2/11, effective 12/7/11]

701—40.74(422) Exclusion for AmeriCorps Segal Education Award. Effective for tax years beginning on or after January 1, 2010, a taxpayer may exclude from Iowa individual income tax any amount of AmeriCorps Segal Education Award to the extent the education award was reported as income on the federal income tax return. The AmeriCorps Segal Education Award is available to individuals who complete a year of service in the AmeriCorps program. The education award can be used to pay education costs at institutions of higher learning, for educational training, or to repay qualified student loans.

This rule is intended to implement Iowa Code section 422.7 as amended by 2009 Iowa Acts, Senate File 482.
[ARC 8605B, IAB 3/10/10, effective 4/14/10]

701—40.75(422) Exclusion of certain amounts received from Iowa veterans trust fund. For tax years beginning on or after January 1, 2010, a taxpayer may subtract, to the extent included in federal adjusted gross income, the amounts received from the Iowa veterans trust fund related to travel expenses directly related to follow-up medical care for wounded veterans and their spouses and amounts received related to

unemployment assistance during a period of unemployment due to prolonged physical or mental illness or disability resulting from military service.

This rule is intended to implement Iowa Code section 422.7 as amended by 2010 Iowa Acts, House File 2532.

[ARC 9103B, IAB 9/22/10, effective 10/27/10]

701—40.76(422) Exemption of active duty pay for armed forces, armed forces military reserve, or the national guard. For tax years beginning on or after January 1, 2011, all pay received from the federal government for military service performed while on active duty status in the armed forces, armed forces military reserve, or the national guard is excluded to the extent the pay was included in federal adjusted gross income.

40.76(1) Definition of active duty personnel. Active duty personnel who qualify for the exclusion include the following:

a. Active duty members of the regular armed forces, which include the Army, Navy, Marines, Air Force and Coast Guard of the United States.

b. Members of a reserve component of the Army, Navy, Marines, Air Force and Coast Guard who are on an active duty status as defined in Title 10 of the United States Code.

c. Members of the national guard who are in an active duty status as defined in Title 10 of the United States Code.

40.76(2) Military personnel who do not qualify for the exclusion include the following:

a. Members of a reserve component of the Army, Navy, Marines, Air Force and Coast Guard who are not in an active duty status as defined in Title 10 of the United States Code.

b. Full-time members of the national guard who perform duties in accordance with Title 32 of the United States Code.

c. Other members of the national guard who are not in an active duty status as defined in Title 10 of the United States Code.

d. Other members of the national guard who do not receive pay from the federal government.

40.76(3) Income from nonmilitary activities. Any wages earned from nonmilitary wages for personal services conducted in Iowa by both residents and nonresidents of Iowa will still be subject to Iowa individual income tax. In addition, both residents and nonresidents of Iowa who earn income from businesses, trades, professions or occupations operated in Iowa that are unrelated to military activity will be subject to Iowa individual income tax on that income.

40.76(4) Exemption from Iowa withholding. Active duty personnel meeting the requirements of subrule 40.76(1) who are receiving pay from the federal government on or after January 1, 2011, that is exempt from Iowa individual income tax may complete an IA W-4 Employee Withholding Allowance Certificate and claim exemption from Iowa income tax for active duty pay received from the federal government.

This rule is intended to implement Iowa Code section 422.7 as amended by 2011 Iowa Acts, House File 652.

[ARC 9822B, IAB 11/2/11, effective 12/7/11]

701—40.77(422) Exclusion of biodiesel production refund. A taxpayer may exclude, to the extent included in federal adjusted gross income, the amount of the biodiesel production refund described in rule 701—12.18(423).

This rule is intended to implement Iowa Code section 422.7 as amended by 2011 Iowa Acts, Senate File 531.

[ARC 9821B, IAB 11/2/11, effective 12/7/11]

701—40.78(422) Allowance of certain deductions for 2008 tax year.

40.78(1) For the tax year beginning on or after January 1, 2008, but before January 1, 2009, the following deductions provided in the federal Emergency Economic Stabilization Act of 2008, Public Law No. 110-343, will be allowed on the Iowa individual income tax return:

a. The deduction for certain expenses of elementary and secondary school teachers allowed under Section 62(a)(2)(D) of the Internal Revenue Code.

b. The deduction for qualified tuition and related expenses allowed under Section 222 of the Internal Revenue Code.

c. The deduction for disaster-related casualty losses allowed under Section 165(h) of the Internal Revenue Code.

40.78(2) Taxpayers who did not claim these deductions on the Iowa return for 2008 as originally filed, or taxpayers who claimed these deductions on the Iowa return as filed and subsequently filed an amended return disallowing these deductions, must file an amended return for the 2008 tax year to claim these deductions. The amended return must be filed within the statute of limitations provided in 701—subrules 43.3(8) and 43.3(15). If the amended return is filed within the statute of limitations, the taxpayer is only entitled to a refund of the excess tax paid. The taxpayer will not be entitled to any interest on the excess tax paid.

This rule is intended to implement Iowa Code sections 422.7 and 422.9 as amended by 2011 Iowa Acts, Senate File 533.

[ARC 9820B, IAB 11/2/11, effective 12/7/11]

701—40.79(422) Special filing provisions related to 2010 tax changes.

40.79(1) For the tax year beginning on or after January 1, 2010, but before January 1, 2011, the following adjustments will be allowed on the Iowa individual income tax return:

a. The deduction for certain expenses of elementary and secondary school teachers allowed under Section 62(a)(2)(D) of the Internal Revenue Code.

b. The deduction for qualified tuition and related expenses allowed under Section 222 of the Internal Revenue Code.

c. The increased expensing allowance authorized under Section 179(b) of the Internal Revenue Code.

40.79(2) Taxpayers who did not claim these adjustments on the Iowa return for 2010 as originally filed have two options to reflect these adjustments. Taxpayer may either file an amended return for the 2010 tax year to reflect these adjustments or taxpayer may reflect these adjustments on the tax return for the 2011 tax year. If the taxpayer elects to reflect these adjustments on the 2011 tax return, the following provisions are suspended related to the claiming of the following adjustments for 2011:

a. The limitation based on income provisions and regulations of Section 179(b)(3) of the Internal Revenue Code with regard to the Section 179(b) adjustment.

b. The applicable dollar limit provision of Section 222(b)(2)(B) of the Internal Revenue Code with regard to the qualified tuition and related expenses adjustment.

40.79(3) Examples. The following noninclusive examples illustrate how this rule applies:

EXAMPLE 1: Taxpayer claimed a \$150,000 Section 179 expense on the federal return for 2010. Taxpayer only claimed a \$134,000 Section 179 expense on the Iowa return as originally filed for 2010. Taxpayer elects not to file an amended return for 2010, but to make the adjustment on the 2011 Iowa return. Taxpayer reported a loss from the taxpayer's trade or business on the 2011 federal return, so no Section 179 expense can be claimed on the federal return for 2011 in accordance with Section 179(b)(3) of the Internal Revenue Code. Taxpayer can claim the \$16,000 (\$150,000 less \$134,000) difference as a deduction on the Iowa return for 2011 since the income provision of Section 179(b)(3) is suspended for Iowa tax purposes.

EXAMPLE 2: Taxpayers are a married couple who claimed a \$4,000 tuition and related expenses deduction on their federal return for 2010. Taxpayers did not claim this deduction on their Iowa return as originally filed for 2010. Taxpayers elected not to file an amended return for 2010, but to make the adjustment on the 2011 Iowa return. Taxpayers reported federal adjusted gross income in excess of \$160,000 on their 2011 federal return, so no deduction for tuition and related expenses can be claimed on the 2011 federal return in accordance with Section 222(b)(2)(B) of the Internal Revenue Code. Taxpayers can claim the \$4,000 deduction on the Iowa return for 2011 since the dollar limit provision of Section 222(b)(2)(B) is suspended for Iowa tax purposes.

EXAMPLE 3: Taxpayer is an elementary school teacher who claimed a \$250 deduction for out-of-pocket expenses for school supplies on the federal return for 2010. Taxpayer did not claim this deduction on the Iowa return as originally filed for 2010. Taxpayer elected not to file an amended return for 2010, but to make the adjustment on the 2011 Iowa return. Taxpayer also claimed a \$200 deduction for out-of-pocket expenses for school supplies on the federal return for 2011. Taxpayer can claim a \$450 (\$250 plus \$200) deduction on the Iowa return for 2011.

This rule is intended to implement 2011 Iowa Acts, Senate File 533, section 143.
[ARC 9820B, IAB 11/2/11, effective 12/7/11]

701—40.80(422) Exemption for military retirement pay. For tax years beginning on or after January 1, 2014, retirement pay received by taxpayers from the federal government for military service performed in the armed forces, armed forces reserves, or national guard is exempt from state income tax. In addition, amounts received by a surviving spouse, former spouse, or other beneficiary of a taxpayer who served in the armed forces, armed forces reserves, or national guard under the Survivor Benefit Plan are also exempt from state income tax for tax years beginning on or after January 1, 2014. The retirement pay is only deductible to the extent it is included in the taxpayer's federal adjusted gross income.

40.80(1) Coordination with pension exclusion. The exclusion of retirement pay is in addition to the partial exclusion, provided in rule 701—40.47(422), of pensions and other retirement benefits for disabled individuals, individuals who are 55 years of age or older, surviving spouses and survivors. In addition, taxpayers who receive retirement pay under federal law that combines retirement pay for both uniformed service and the federal civil service retirement system or federal employees' retirement system must prorate the retirement pay based on years of service.

EXAMPLE 1: A married individual who is 60 years of age receives \$20,000 of federal retirement pay from military service and \$30,000 in retirement pay from the Iowa public employees' retirement system during the 2014 tax year. The taxpayer can exclude \$20,000 of military retirement pay and \$12,000 as a pension exclusion under rule 701—40.47(422), for a total exclusion of \$32,000 on the taxpayer's Iowa individual income tax return for the 2014 tax year.

EXAMPLE 2: A single taxpayer who is 65 years of age receives \$60,000 as a federal pension during the 2014 tax year. The taxpayer has 20 years of military service and 27 years of civilian employment with the federal government. The military retirement pay portion is \$25,532 (20 years divided by 47 years multiplied by \$60,000). The taxpayer can exclude \$25,532 of military retirement pay and \$6,000 as a pension exclusion under rule 701—40.47(422), for a total exclusion of \$31,532 on the taxpayer's Iowa individual income tax return for the 2014 tax year.

40.80(2) Coordination with filing threshold and alternate tax. The military retirement pay is excluded from the calculation of income used to determine whether an Iowa income tax return is required to be filed pursuant to 701—subrules 39.1(1) and 39.5(10) through 39.5(13). In addition, the military retirement pay is excluded from the calculation of the special tax computation for all low-income taxpayers except single taxpayers pursuant to rule 701—39.9(422) and is excluded from the calculation of the special tax computation for taxpayers who are 65 years of age or older under rule 701—39.15(422).

40.80(3) Iowa withholding. The amount of military retirement pay is excluded from the calculation of payments used to determine whether Iowa tax should be withheld from pension and annuity payments as determined pursuant to 701—subrule 46.3(4).

This rule is intended to implement Iowa Code sections 422.5 and 422.7 as amended by 2014 Iowa Acts, Senate File 303.

[◇] Two or more ARCs

CHAPTER 41
DETERMINATION OF TAXABLE INCOME
[Prior to 12/17/86, Revenue Department[730]]

701—41.1(422) Verification of deductions required. Deductions from gross income, otherwise allowable, will not be allowed in cases where the department requests the taxpayer to furnish information sufficient to enable it to determine the validity and correctness of such deductions, until such information is furnished. For taxpayers using an electronic data interchange process or technology also see 701—subrule 11.4(4).

This rule is intended to implement Iowa Code section 422.25.

701—41.2(422) Federal rulings and regulations. In determining whether “taxable income,” “net operating loss deduction” or any other deductions are computed for federal tax purposes under, or have the same meaning as provided by, the Internal Revenue Code, the department will use applicable rulings and regulations that have been duly promulgated by the commissioner of internal revenue, unless the director has created rules and regulations or has exercised discretionary powers as prescribed by statute which calls for an alternative method for determining “taxable income,” “net operating loss deduction” or any other deduction, or unless the department finds that an applicable internal revenue ruling or regulation is unauthorized according to the Iowa Code.

This rule is intended to implement Iowa Code sections 422.7 and 422.9.

701—41.3(422) Federal income tax deduction and federal refund. Federal income taxes paid or accrued during the tax year are a permissible deduction for Iowa income tax purposes, adjusted by any federal refunds received or accrued during the tax year. Taxpayers who are not on an accrual basis of accounting shall deduct their federal income taxes in the year paid.

41.3(1) Federal income tax deduction. The federal income tax deduction for cash basis taxpayers equals the sum of the following:

a. The entire amount of federal income tax withheld during the taxable year from compensation of the taxpayer. Where a husband and wife file separate returns or separately on a combined Iowa return, the actual federal income tax withheld from wages earned by either spouse or both spouses must be deducted by each in accordance with wage statement(s) and may not be prorated between the spouses.

b. Tax paid at any time during the taxable year on a filing of federal estimated tax or on any amendment to such filing. Where a husband and wife file separate Iowa returns or separately on a combined Iowa return, the federal estimated tax payments made in the tax year shall be prorated between the spouses by the ratio of each spouse’s income not subject to withholding to the total income not subject to withholding of both spouses, including the federal estimated tax payment made in January of the tax year which was made for the prior tax year. If an estimated tax payment or portion of the payment is made for self-employment tax, then the spouse who has earned the self-employment income shall report the amount of estimated tax designated as self-employment tax. The federal tax deduction for the tax year does not include the self-employment tax paid through the federal estimated payments made in the tax year. In addition, the federal tax deduction does not include the additional .9 percent Medicare tax computed under Section 3101(b)(2) of the Internal Revenue Code for tax years beginning on or after January 1, 2013. However, one-half of the self-employment tax paid in the tax year is deductible in computing federal adjusted gross income pursuant to Section 164(f) of the Internal Revenue Code, so this self-employment tax is also deductible in computing net income. If an estimated tax payment or portion of the payment is made for the federal net investment income tax computed under Section 1411 of the Internal Revenue Code for tax years beginning on or after January 1, 2013, see paragraph 41.3(1) “f” on how the federal net income tax should be prorated between spouses.

c. Any additional federal tax on a prior federal return paid during the taxable year. Where a husband and wife file separately or separately on a combined Iowa return, additional federal tax paid shall be prorated between the spouses by the ratio of net income reported by each spouse to total net income of both spouses in the year for which the additional federal tax was paid. If additional federal tax

paid includes federal self-employment tax, then that amount of self-employment tax shall be deducted by the spouse who earned the self-employment income. Any federal tax paid for a tax year in which an Iowa individual income tax return was not required to be filed is not allowed as a deduction in the year the federal taxes were paid. If additional federal tax paid includes the federal net investment income tax computed under Section 1411 of the Internal Revenue Code for tax years beginning on or after January 1, 2013, see paragraph 41.3(1)“f” on how the federal net income tax should be prorated between spouses.

EXAMPLE 1. Individual A earned \$8,500 in income for the 2004 tax year and paid \$200 in federal tax with the filing of the federal return in 2005. Individual A was not required to file an Iowa return for 2004 because the Iowa net income was under \$9,000. Individual A cannot claim a deduction for the \$200 in federal tax paid on the 2005 Iowa return because an Iowa return was not required to be filed for the 2004 tax year.

EXAMPLE 2. Individual B moved into Iowa on January 1, 2005, and filed an initial Iowa individual income tax return for the 2005 tax year. Individual B paid \$1,000 in additional federal income tax with the filing of the 2004 federal income tax return in 2005. Individual B cannot claim a deduction for the \$1,000 in federal tax paid on the 2005 Iowa return because an Iowa return was not filed for the 2004 tax year.

d. The earned income credit computed under Section 32 of the Internal Revenue Code and the additional child tax credit computed under Section 24(d) of the Internal Revenue Code, to the extent that these credits reduce the federal income tax liability on the prior federal return filed during the taxable year. Where a husband and wife file separately or separately on a combined Iowa return, the earned income credit and the additional child tax credit shall be prorated between the spouses by the ratio of net income reported by each spouse to total net income of both spouses in the year for which these credits were claimed.

EXAMPLE: Individual A filed a 2003 federal income tax return reporting a tax liability of \$2,000. Individual A had \$500 of federal income tax withheld and \$2,500 of earned income credit. Individual A can deduct \$500 as a federal income tax deduction on the Iowa return for 2003 and \$1,500 as a federal tax deduction on the Iowa return for 2004, since the federal tax deduction is limited to the extent it reduced the federal income tax liability.

e. The motor vehicle fuel tax credit computed under Section 34 of the Internal Revenue Code for the taxable year. Where a husband and wife file separately or separately on a combined Iowa return, the motor vehicle fuel tax credit shall be prorated between the spouses by the ratio of net income reported by each spouse to total net income of both spouses in the year for which these credits were claimed.

EXAMPLE: Individual B filed a 2003 federal income tax return reporting a tax liability of \$1,500. Individual B paid \$1,000 in federal estimated tax during 2003 and claimed a \$400 motor vehicle fuel tax credit on the 2003 federal return. Individual B can deduct \$1,400 as a federal income tax deduction on the Iowa return for 2003.

f. For tax years beginning on or after January 1, 2013, the federal net investment income tax, also known as the unearned income Medicare contribution tax, computed under Section 1411 of the Internal Revenue Code. The federal net investment income tax is computed on the lesser of net investment income for the tax year or the excess of the modified adjusted gross income for the tax year over a threshold amount.

Where a married couple file separate returns or separately on a combined Iowa return, the federal net investment income tax, if computed on net investment income, shall be prorated between the spouses by the ratio of net investment income reported by each spouse to total net investment income of both spouses in the year for which the federal net investment income tax was paid. Where a married couple file separate returns or separately on a combined Iowa return, the federal net investment income tax, if computed on the excess of modified adjusted gross income over a threshold amount, shall be prorated between the spouses by the ratio of net income reported by each spouse to total net income of both spouses in the year for which the federal net investment income tax was paid.

41.3(2) Federal income tax refunds.

a. Any refund of federal income tax received during the taxable year must be used to reduce the amount deducted for federal income tax to the extent the refunded amount was deducted on the

Iowa return in a prior year. When a husband and wife file separately or separately on a combined Iowa return, the federal income tax refund to be reported shall be prorated between the spouses by the ratio of net income reported by each spouse to total net income reported by both spouses. If an amount of self-employment tax is required to be added back to Iowa net income, then the spouse who earned the self-employment income which generated the self-employment tax shall report that amount as an addition to net income. Any federal tax refund received for a tax year in which an Iowa individual income tax return was not required to be filed is not required to be reported in the year the federal refund was received.

EXAMPLE 1: Individual A earned \$7,500 in income for the 2004 tax year and had \$1,000 in federal income tax withheld. Individual A received a refund of the entire \$1,000 federal tax withheld with the filing of the federal return in 2005. Individual A was not required to file an Iowa return for 2004 because the Iowa net income was under \$9,000. Individual A does not have to report the \$1,000 federal refund received on the 2005 Iowa return because an Iowa return was not required to be filed for the 2004 tax year.

EXAMPLE 2: Individual B moved into Iowa on July 1, 2005, and filed an initial Iowa individual income tax return for the 2005 tax year. Individual B received a \$2,000 federal income tax refund with the filing of the 2004 federal income tax return in 2005. Individual B does not have to report the \$2,000 federal refund on the 2005 Iowa return because an Iowa return was not filed for the 2004 tax year.

b. Any portion of the federal refund received due to the earned income credit computed under Section 32 of the Internal Revenue Code or the additional child tax credit computed under Section 24(d) of the Internal Revenue Code does not have to be reported on the Iowa return. However, any portion of the federal refund received due to the motor vehicle fuel tax credit computed under Section 34 of the Internal Revenue Code does have to be reported on the Iowa return.

EXAMPLE 1: Individual A filed a 2003 federal income tax return reporting a tax liability of \$2,000. Individual A had \$500 of federal income tax withheld and \$2,500 of earned income credit and received a federal income tax refund of \$1,000 after filing the return in 2004. Individual A does not have to report the \$1,000 federal refund on the Iowa return for 2004, since the refund resulted from the earned income credit.

EXAMPLE 2: Individual B filed a 2003 federal income tax return reporting a tax liability of \$500. Individual B had \$1,000 of federal income tax withheld and \$1,000 of earned income credit and received a federal income tax refund of \$1,500 after filing the return in 2004. Individual B must report a \$500 federal refund on the Iowa return for 2004, since the portion of the refund relating to the earned income credit does not have to be reported.

EXAMPLE 3: Individual C filed a 2003 federal income tax return reporting a tax liability of \$1,000. Individual C paid \$900 in federal estimated tax and claimed a \$400 federal motor vehicle fuel tax credit and received a federal refund of \$300 after filing the return in 2004. Individual C must report the \$300 federal refund on the Iowa return for 2004, since the refund resulted from the motor vehicle fuel tax credit.

c. Any portion of the federal refund received due to the first-time homebuyer credit computed under Section 36 of the Internal Revenue Code does not have to be reported on the Iowa return. Similarly, any recapture of the credit under Section 36(f) of the Internal Revenue Code is not allowed as a deduction for federal taxes paid.

EXAMPLE: Individual A filed a 2008 federal income tax return reporting a tax liability of \$1,000. Individual A had \$1,200 of federal tax withheld and \$7,500 of first-time homebuyer credit and received a federal income tax refund of \$7,700 after filing the return in 2009. Individual A must report a \$200 federal refund on the Iowa return for 2009, since the portion of the federal refund relating to the first-time homebuyer credit does not have to be reported. The \$500 of federal taxes that will be recaptured and paid for each year on the federal income tax return for 2009-2023 in accordance with Section 36(f) of the Internal Revenue Code will not be allowed as a deduction on the Iowa return for federal taxes paid.

41.3(3) *Federal income tax deduction—part-year residents.*

a. For tax years beginning on or before December 31, 1981, the federal income tax deduction attributable to Iowa by part-year residents shall be determined by multiplying the federal tax paid or

accrued for the entire taxable year by a fraction, the numerator of which is the Iowa net income and the denominator of which is the federal adjusted gross income except that the taxpayer can deduct actual federal income tax withheld on that income subject to withholding which was earned while the taxpayer was an Iowa resident if the federal tax withheld on the Iowa income is separately shown on the wage statement(s) of the taxpayer.

b. For tax years beginning on or after January 1, 1982, the federal income tax deduction attributable to Iowa by part-year residents shall be the same deduction as is available for resident taxpayers.

41.3(4) *Federal income tax deduction—nonresidents.*

a. For tax years beginning on or before December 31, 1981, the federal income tax deduction attributable to Iowa by nonresidents shall be determined by multiplying the federal tax paid or accrued for the entire taxable year by a fraction, the numerator of which is the Iowa net income and denominator of which is the federal adjusted gross income.

If separate Iowa nonresident returns are filed by a husband and wife who filed a joint federal return, each spouse's Iowa adjusted gross income must be divided by the total federal net income of both spouses in order to compute a ratio that can be used to determine the federal tax deduction attributable to each spouse. In any event, the ratio including the combined ratio of husband and wife cannot exceed 100 percent.

Federal income taxes paid during the taxable year on prior years' federal income tax returns will not be allowable on the nonresident return for the taxable year unless Iowa returns were filed for the prior years for which the federal taxes were paid.

Any federal income tax, either paid by a nonresident or withheld from their compensation, which is later refunded to the taxpayer, shall be included as Iowa income by the nonresident for the year the refund is received, in the same portion that such federal tax was deducted by the nonresident in a prior Iowa income tax return.

b. For tax years beginning on or after January 1, 1982, the federal income tax deduction attributable to Iowa by nonresidents of Iowa shall be the same deduction as is available for resident taxpayers.

41.3(5) *Federal rebate received in 2001.* Rescinded IAB 10/16/13, effective 11/20/13.

41.3(6) *Federal rate reduction credit and the federal income tax deduction for the 2002 tax year.* Rescinded IAB 10/16/13, effective 11/20/13.

41.3(7) *Federal rebate received in 2008.* For tax years beginning in the 2008 calendar year, the federal tax rebate or advanced refund of federal income tax provided to certain individuals in 2008 pursuant to the federal Economic Stimulus Act of 2008 is not to be included as part of an individual's federal income tax refund for the individual's federal tax deduction for Iowa individual income tax purposes.

EXAMPLE. Frank and Jane Casey received a federal refund of \$1,300 in March 2008 from federal income tax that had been deducted on their 2007 Iowa individual income tax return. Frank and Jane also received a \$1,200 federal rebate in June 2008. When Frank and Jane file their 2008 Iowa return, they must report a federal income tax refund of \$1,300. However, they are not required to include as part of the federal income tax refund shown on their 2008 Iowa return the \$1,200 federal rebate they received in June 2008.

41.3(8) *Federal rate reduction credit and the federal income tax deduction for the 2009 tax year.* For tax years beginning in the 2009 calendar year, the tax reduction credit or the advanced refund of federal income tax provided to certain individuals pursuant to the federal Economic Stimulus Act of 2008 is to be included as part of an individual's federal income tax refund for Iowa individual income tax purposes. The tax reduction credit was also referred to as the federal rebate when it was refunded to some taxpayers during the 2008 calendar year. This subrule does not apply to those taxpayers who received the federal rebate in the 2008 calendar year.

EXAMPLE: When Fred and Barbara Jones completed their 2008 federal income tax return, they received the benefit of a rate reduction credit of \$1,200, which resulted in the Browns' receiving a

federal income tax refund of \$1,300 in May 2009. Fred and Barbara need to report the entire \$1,300 refund of federal income tax when they complete their Iowa income tax return for 2009.

This rule is intended to implement Iowa Code section 422.9 as amended by 2008 Iowa Acts, House File 2417.

[**ARC 8589B**, IAB 3/10/10, effective 4/14/10; **ARC 1101C**, IAB 10/16/13, effective 11/20/13; **ARC 1303C**, IAB 2/5/14, effective 3/12/14; **ARC 1665C**, IAB 10/15/14, effective 11/19/14]

701—41.4(422) Optional standard deduction. An optional standard deduction is provided on the Iowa individual income tax return for both residents and nonresidents. In the case of married taxpayers filing separate returns or separately on the combined return, if one spouse takes the optional standard deduction, the other spouse must also take the optional standard deduction. The standard deduction claimed by the taxpayer may not exceed the taxpayer's income before the standard deduction.

A taxpayer has the option of itemizing deductions or of using the optional standard deduction on the Iowa return, regardless of the deduction method used on the federal return.

For tax years beginning on or after January 1, 1990, the optional standard deduction amounts are indexed or increased for inflation by the cumulative standard deduction factor. The cumulative standard deduction factor is described in rule 701—38.12(422).

41.4(1) *Direct charitable contribution for individuals claiming the optional standard deduction.* Rescinded IAB 3/26/08, effective 4/30/08.

41.4(2) Reserved.

This rule is intended to implement Iowa Code sections 422.4 and 422.9.

701—41.5(422) Itemized deductions. Deductions may be itemized on the Iowa return to the same extent that they are allowable on the federal return with the following exceptions:

41.5(1) To the extent that Iowa income taxes were included in itemized deductions allowable for federal income tax purposes, they must be subtracted from the itemized deductions to be deducted on the Iowa return.

41.5(2) For the tax years beginning on or after January 1, 2004, and before January 1, 2008, and for tax years beginning on or after January 1, 2010, but before January 1, 2014, the itemized deduction for state sales and use taxes is allowed on the Iowa return only if the taxpayer elected to deduct state sales and use taxes as an itemized deduction in lieu of the deduction for state income taxes on the federal return under Section 164 of the Internal Revenue Code.

If the taxpayer elected to deduct state income taxes as an itemized deduction on the federal return, taxpayer cannot claim an itemized deduction for state sales and use taxes on the Iowa return. In addition, if taxpayer claimed the standard deduction in accordance with Section 63 of the Internal Revenue Code on the federal return, taxpayer cannot claim an itemized deduction for state sales and use taxes on the Iowa return.

If the taxpayer is allowed to deduct state sales and use taxes as an itemized deduction on the Iowa return, taxpayer cannot claim an itemized deduction on the Iowa return for either the school district surtax imposed under Iowa Code section 257.21 or the emergency medical services income surtax imposed under Iowa Code chapter 422D.

41.5(3) Adoption expense deduction. Unreimbursed amounts paid by the taxpayer in the adoption of a child if placed by a licensed agency under Iowa Code chapter 238, by an agency that meets the provisions of the interstate compact in Iowa Code section 232.158 or by a person making an independent placement under Iowa Code chapter 600, which exceed 3 percent of the taxpayer's net income, or the combined net income of a husband and wife in the case of married taxpayers filing a joint return, will be allowed as a deduction in the year paid. Qualifying expenses include all medical, hospital, legal fees, welfare agency fees, and all other costs relating to the adoption of a child. Those expenses claimed for adoption purposes may not be claimed elsewhere on the individual income tax return for tax years beginning before January 1, 2014. For tax years beginning on or after January 1, 2014, an adoption tax credit equal to the first \$2,500 of qualified adoption expenses can be claimed in accordance with rule 701—42.52(422), but the expenses claimed for the credit cannot be allowed as a deduction under this subrule.

EXAMPLE: The Joneses, a married couple whose combined net income for 2014 is \$100,000, incur \$6,000 of qualified adoption expenses and claim a \$2,500 adoption tax credit in accordance with rule 701—42.52(422). The amount of expenses in excess of 3 percent of their combined net income is \$3,000. Since the taxpayers claimed a \$2,500 adoption tax credit, only \$500 of expenses is eligible for the deduction.

41.5(4) Deduction for expenses for the care of certain disabled relatives.

a. For tax years beginning on or after January 1, 1983, a deduction from net income may be taken for expenses incurred by a taxpayer for care of a disabled person who is unable to live independently. Such care must be provided in the home in which the taxpayer resides throughout the year. A person is considered to be incapable of living independently if as a result of a physical or mental defect the person is incapable of caring for the person's hygienical or nutritional needs or requires the full-time attention of another person for personal safety or the safety of others. The fact that an individual, by reason of a physical or mental defect, is unable to engage in any substantial gainful activity, or is unable to perform the normal household functions of a homemaker or to care for minor children, does not of itself establish that the individual is physically or mentally incapable of self-care. An individual who is physically handicapped or is mentally defective, and for such reason requires the constant attention of another person, is considered to be physically or mentally incapable of self-care.

To qualify for the deduction, in addition to being disabled, the person must be the grandchild, child, parent or grandparent of the taxpayer or the taxpayer's spouse, and

- (1) Be receiving medical assistance benefits under Iowa Code chapter 249A; or
- (2) Be eligible to receive such benefits under the income and resource levels established in Iowa Code chapter 239B; or
- (3) Would be eligible to receive such benefits if living in a health-care facility licensed under Iowa Code chapter 135C.

Expenses incurred for a taxpayer's disabled spouse do not qualify for the deduction.

b. The deductible amount is limited to \$5,000 for each disabled person cared for in the taxpayer's home and the expenses must not be otherwise deductible as a deduction from net income under Iowa Code section 422.9.

c. Qualifying expenses include a proportionate share of food expenses as well as amounts spent directly on the disabled person for such items as clothing, medical care, dental care and transportation.

Medical expenses incurred for a disabled relative, which are eliminated from federal itemized deductions because of the federal adjusted gross income percentage limitation, may be included in the deduction for expenses incurred for the care of the disabled relative providing the other requirements are met. Following are examples to illustrate the portion of medical expenses incurred which would be deductible.

EXAMPLE 1. Mr. and Mrs. Smith care for Mrs. Smith's mother in their home. Mrs. Smith's mother is physically unable to live independently and qualifies for medical assistance benefits under Iowa Code chapter 249A. Mr. and Mrs. Smith paid medical expenses of \$1,500 for themselves and \$500 for Mrs. Smith's mother. The medical expenses for Mrs. Smith's mother are includable as federal itemized deductions. Mr. and Mrs. Smith's federal adjusted gross income is \$20,000. For 1983, the federal deduction for medical expenses would be \$1,000 (\$2,000 minus 5 percent of \$20,000 or \$1,000). Since the deductible amount for federal tax purposes is \$1,000 or 50 percent of the total medical expenses of Mr. and Mrs. Smith and Mrs. Smith's mother, there remains 50 percent of the \$500 expense for Mrs. Smith's mother (or \$250) which can be included in the Iowa deduction for a disabled relative.

EXAMPLE 2. Mr. and Mrs. Smith's medical expenses were \$400 and Mrs. Smith's mother's expenses were \$200. None of the \$600 in expenses would be deductible as a federal itemized deduction but the mother's \$200 in expenses would be includable in the Iowa deduction for expenses incurred for a disabled relative.

d. Expenses not directly related to care of a disabled relative are not deductible. This category includes rent, mortgage interest, utilities, house insurance and taxes. Such expenses would be incurred without the disabled relative in the home and unless an expense can be directly attributed to the disabled relative, it may not be deducted.

e. In the event that the person being cared for is receiving assistance benefits under Iowa Code chapter 239B, the expenses qualifying for deduction shall be the net difference between the expenses actually incurred in caring for the person which are not otherwise deductible as a deduction to net income and the assistance benefits under Iowa Code chapter 239B. Iowa Code chapter 239B covers family investment program payments.

f. In order to claim a deduction for expenses for care of a disabled relative, a schedule of qualifying expenses must be provided with the tax return as well as a statement from a qualified physician certifying that the disabled individual is unable to live independently. Such certification must be filed with the tax return in the initial year for the deduction and every third year thereafter.

41.5(5) Rescinded IAB 5/6/09, effective 6/10/09.

41.5(6) Rescinded IAB 11/24/04, effective 12/29/04.

41.5(7) Deduction of multipurpose vehicle registration fee. For tax years beginning on or after January 1, 1992, and before January 1, 2005, individuals who itemize deductions for Iowa income tax purposes may claim a deduction for 60 percent of the amount of the registration fee paid for a multipurpose vehicle under Iowa Code section 321.124, subsection 3, paragraph “*h.*” “Multipurpose vehicle” means a motor vehicle designed to carry not more than ten people and constructed either on a truck chassis or with special features for occasional off-road operation. The registration certificate for a multipurpose vehicle has the letters “MV” printed next to the word “style” on the certificate.

This subrule applies only to model year 1992 and older model year multipurpose vehicles. The registration fees for multipurpose vehicles for the 1993 model year and for model years after 1993 are the same as for other motor vehicles where the fees for newer model year vehicles are based on the value and weight of the vehicle. In order to qualify for this deduction, no part of the multipurpose vehicle registration fee may have been deducted as an itemized deduction under Section 164 of the Internal Revenue Code or as an ordinary and necessary business expense.

See also subrule 41.5(9), which provides for the deduction for registration fees for older motor vehicles. Subrule 41.5(7) also applies to multipurpose vehicles to the extent those vehicles are for the 1993 model year or for model years after 1993.

For tax years beginning on or after January 1, 2005, the itemized deduction for Iowa income tax for multipurpose vehicle registration fees is the same as allowed under Section 164 of the Internal Revenue Code for federal tax purposes.

41.5(8) Medical expense deduction limitation. For tax years beginning on or after January 1, 1996, to the extent that a taxpayer has a medical care expense deduction on the federal return under Section 213 of the Internal Revenue Code, the taxpayer must compute the medical care expense deduction on the Iowa return by excluding those health insurance premiums deducted in computing net income in accordance with Iowa Code subsection 422.7(29) and rule 701—40.48(422).

41.5(9) Deduction of older motor vehicle registration fee. For tax years beginning on or after January 1, 2002, and before January 1, 2005, individuals who itemize deductions for Iowa income tax purposes may claim a deduction for 60 percent of the annual registration fee paid for certain older motor vehicles. This deduction applies to a 1994 model year vehicle or a newer model year vehicle that is nine model years old or older. This deduction also applies to a 1993 or older motor vehicle which has been transferred to a new owner or to a 1993 or older model vehicle that was brought into Iowa on or after January 1, 2002. However, the deduction otherwise allowed pursuant to this subrule is not allowed to the extent that the vehicle was used in the taxpayer’s trade or business so that the deduction for the registration of the vehicle has already been allowed in the computation of Iowa net income.

For tax years beginning on or after January 1, 2005, the itemized deduction for Iowa income tax for older motor vehicle registration fees is the same as allowed under Section 164 of the Internal Revenue Code for federal tax purposes.

41.5(10) Additional first-year depreciation allowance. For tax periods ending on or after September 10, 2001, any federal itemized deductions that are determined based on a percentage of a taxpayer’s federal adjusted gross income may have to be adjusted for Iowa tax purposes. These itemized deductions for Iowa individual tax purposes are based on federal adjusted gross income as adjusted by

the disallowance of the additional first-year depreciation allowance authorized in Section 168(k) of the Internal Revenue Code as described in rule 701—40.60(422).

EXAMPLE: Mr. and Mrs. Jones reported \$50,000 in federal adjusted gross income on their 2002 federal income tax return. Mr. and Mrs. Jones paid medical expenses of \$5,000 for 2002, but could only claim an itemized deduction for medical expenses for federal tax purposes equal to \$1,250, or to the extent the medical expenses exceeded 7.5 percent of their federal adjusted gross income (\$50,000 times 7.5% = \$3,750. \$5,000 - \$3,750 = \$1,250). Mr. and Mrs. Jones reported a \$5,000 increase in Iowa adjusted gross income due to the disallowance of additional first-year depreciation on their Iowa return for 2002. Mr. and Mrs. Jones can claim an itemized deduction on the 2002 Iowa return for medical expenses of \$875, or to the extent the medical expenses exceeded 7.5 percent of their adjusted gross income for Iowa purposes of \$55,000 (\$55,000 times 7.5% = \$4,125. \$5,000 - \$4,125 = \$875).

41.5(11) Charitable contributions made in January 2005 for relief of victims of the Indian Ocean tsunami. For cash contributions made after December 31, 2004, and before February 1, 2005, to charitable organizations for the purpose of helping victims of the Indian Ocean tsunami, the taxpayer may claim this contribution as an itemized deduction on the 2004 Iowa income tax return if the taxpayer elected to claim this contribution as an itemized deduction on the 2004 federal tax return. If the taxpayer elected to claim the cash contribution made in January 2005 as an itemized deduction on the 2005 federal tax return, then it must be claimed as an itemized deduction on the 2005 Iowa return.

41.5(12) Medical expense deduction for certain unreimbursed expenses relating to a human organ transplant. For tax years beginning on or after January 1, 2005, a taxpayer who claims a deduction for unreimbursed travel and lodging expenses relating to a human organ transplant in accordance with rule 701—40.66(422) cannot claim an itemized deduction for medical expenses under Section 213(d) of the Internal Revenue Code for these same expenses for Iowa tax purposes.

41.5(13) Charitable contributions relating to the injured veterans grant program. For tax years beginning on or after January 1, 2006, a taxpayer who claims a deduction for contributions to the injured veterans grant program in accordance with 701—subrule 40.68(2) cannot claim an itemized deduction for charitable contributions under Section 170 of the Internal Revenue Code for the same contribution for Iowa tax purposes.

41.5(14) Charitable contributions relating to school tuition organizations. For tax years beginning on or after January 1, 2006, a taxpayer who claims a school tuition organization tax credit in accordance with rule 701—42.32(422) cannot claim an itemized deduction for charitable contributions under Section 170 of the Internal Revenue Code for the amount of the contribution to the school tuition organization for Iowa tax purposes.

41.5(15) Charitable contributions relating to the charitable conservation contribution tax credit. For tax years beginning on or after January 1, 2008, a taxpayer who claims a charitable conservation contribution tax credit in accordance with rule 701—42.40(422) cannot claim an itemized deduction for charitable contributions for the amount of the contribution for which the tax credit is claimed. See 701—subrule 42.40(2) for examples illustrating how this subrule is applied.

41.5(16) Charitable contributions relating to the endow Iowa tax credit. For tax years beginning on or after January 1, 2010, a taxpayer who claims an endow Iowa tax credit in accordance with rule 701—42.24(15I,422) cannot claim an itemized deduction for charitable contributions under Section 170 of the Internal Revenue Code for the amount of the contribution for which the tax credit is claimed for Iowa tax purposes.

41.5(17) Charitable contributions relating to the from farm to food donation tax credit. For tax years beginning on or after January 1, 2014, a taxpayer who claims a from farm to food donation tax credit in accordance with rule 701—42.51(422,85GA,SF452) cannot claim an itemized deduction for charitable contributions under Section 170 of the Internal Revenue Code for the amount of the contribution for which the tax credit is claimed for Iowa tax purposes.

This rule is intended to implement Iowa Code section 422.7 and section 422.9 as amended by 2014 Iowa Acts, House File 2468.

[ARC 7761B, IAB 5/6/09, effective 6/10/09; ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9820B, IAB 11/2/11, effective 12/7/11; ARC 1101C, IAB 10/16/13, effective 11/20/13; ARC 1138C, IAB 10/30/13, effective 12/4/13; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—41.6(422) Itemized deductions—separate returns by spouses. Where both spouses itemize deductions, the deductions must be divided between them in the ratio that each spouse's separate Iowa net income bears to the total Iowa net income of both spouses unless each spouse can show that the spouse paid for or is entitled to accrue the deductions. It will be presumed that the deductions are paid by both spouses and must be prorated if the deductions were paid from a joint checking account of both spouses. In any event, all itemized deductions must either be prorated between spouses or must be specifically deducted by the spouse that paid for the deductions. No combinations of the two methods will be permitted.

This rule is intended to implement Iowa Code section 422.9.

701—41.7(422) Itemized deductions—part-year residents.

41.7(1) Rescinded IAB 3/26/08, effective 4/30/08.

41.7(2) For tax years beginning on or after January 1, 1982, itemized deductions attributable to Iowa by part-year residents shall be the itemized deductions allowable for resident taxpayers.

This rule is intended to implement Iowa Code sections 422.7, 422.8 and 422.9.

701—41.8(422) Itemized deductions—nonresidents.

41.8(1) Rescinded IAB 3/26/08, effective 4/30/08.

41.8(2) For tax years beginning on or after January 1, 1982, itemized deductions attributable to Iowa by nonresidents shall be the itemized deductions available for resident taxpayers.

This rule is intended to implement Iowa Code sections 422.5, 422.7 and 422.9.

701—41.9(422) Annualizing income. Where a taxpayer is required to annualize income for federal income tax purposes the taxpayer must also annualize on the Iowa return.

This rule is intended to implement Iowa Code section 422.7.

701—41.10(422) Income tax averaging. There is no provision in the Iowa Code which allows income tax averaging.

This rule is intended to implement Iowa Code sections 422.7 and 422.5.

701—41.11(422) Reduction in state itemized deductions for certain high-income taxpayers. For tax years beginning after December 31, 1990, the itemized deductions for certain high-income taxpayers are reduced for federal income tax purposes by the lesser of 3 percent of the excess of adjusted gross income (AGI) over the applicable amount, or 80 percent of the amount of itemized deductions otherwise allowable for the taxable year. For 1991, the applicable amount is \$100,000 (\$50,000 in the case of a married person filing a separate federal return). The applicable amount is to be increased each tax year to reflect inflation in the taxable years after 1991. For example, for 1995 the applicable amount is \$114,700 (\$57,350 in the case of a married person filing a separate return). This reduction in itemized deductions for certain high-income taxpayers applies for Iowa individual income tax purposes for the same tax years that the provision applies for federal income tax purposes. The following subrules clarify how the reduction in itemized deductions is to be determined on the Iowa individual income tax return:

41.11(1) Itemized deduction worksheet (Form 41-104). High-income taxpayers who are itemizing deductions on the Iowa income tax return and whose itemized deductions for federal income tax purposes were subject to reduction because their federal adjusted gross incomes exceeded certain amounts (the amounts for 1996 were \$117,950 for all taxpayers except married taxpayers who filed separate federal returns and \$58,975 for married individuals who filed separate federal returns) must complete Itemized Deduction Worksheet (Form 41-104) to determine the amount of federal itemized deductions that can be claimed on the Iowa income tax return. This worksheet must also be used to compute the itemized deductions allowable on the Iowa return for taxpayers who claimed the standard deduction on their federal individual income tax return, but are itemizing deductions for Iowa income tax purposes and whose deductions would have been subject to reduction, if they had itemized deductions on their federal income tax return. These taxpayers must complete the worksheet (Form 41-104) as if they had itemized deductions on their federal returns. Generally, the itemized deductions allowed on the federal income tax

return for high-income taxpayers are also allowed for Iowa individual income tax purposes, except that the Iowa income tax that was allowable as a deduction on the federal Schedule A is not allowed as an Iowa itemized deduction. In addition, the deduction for medical expenses claimed as an itemized deduction on the federal income tax return should be reduced by the amount of health insurance premiums claimed as a deduction on line 18 of the IA 1040. The line references on Form 41-104 are to the federal 1040 and to the federal Schedule A for 1996 and to the IA 1040 for the 1996 tax year. Similar line references will apply on Form 41-104 and to IA 1040 for any later tax year when the taxpayer's federal itemized deductions were subject to reduction because the taxpayer's federal adjusted gross income exceeded the threshold amount for that year and the taxpayer itemized deductions on the Iowa income tax return. Note that if a taxpayer's itemized deductions are less than the Iowa standard deduction amount, the taxpayer may elect to claim the Iowa standard deduction.

Form 41-104 follows:

1. Enter the allowable federal itemized deductions as shown on line 34 of the 1040.	1. _____
2. Add the amounts on federal Schedule A, lines *4, 13, 19 plus any gambling losses including on line 27 and enter the total here.	2. _____
3. Subtract line 2 amount from line 1 amount.	3. _____
4. Add the amounts on federal Schedule A, lines *4, 9, 14, 18, 19, 26, and 27 and enter the total here.	4. _____
5. Subtract line 2 amount from line 4 amount.	5. _____
6. Divide line 3 by line 5 and enter percentage here.	6. _____ %
7. Enter the amount of Iowa income tax that is included in line 5 of the federal Schedule A.	7. _____
8. Multiply line 7 by the percentage on line 6.	8. _____
9. Subtract line 8 from line 1. Enter this amount here and on line 39 of the IA 1040.	9. _____

*The deduction for medical expenses from line 4 of federal Schedule A must be reduced by the amount of any health insurance premiums that were deducted on line 18 of Form IA 1040 in computing the taxpayer's net income for the tax year.

41.11(2) *Possible problem with itemized deduction worksheets for 1992, 1993, and 1994 returns.* Rescinded IAB 3/26/08, effective 4/30/08.

This rule is intended to implement Iowa Code sections 422.3 and 422.9.

701—41.12(422) Deduction for home mortgage interest for taxpayers with mortgage interest credit. For tax years beginning on or after January 1, 1996, any taxpayer who had the mortgage interest credit on the federal return can claim a deduction on the Schedule A of the IA 1040 for all the mortgage interest paid in the tax year, including the mortgage interest that was not deducted on the federal return due to the mortgage interest credit.

This rule is intended to implement Iowa Code sections 422.3 and 422.9.

701—41.13(422) Iowa income taxes and Iowa tax refund. As provided in subrule 41.5(1), Iowa individual income taxes paid or accrued are allowable itemized deductions for federal income tax purposes, but are not allowable itemized deductions for Iowa income tax purposes. To the extent Iowa income taxes were deducted as itemized deductions for federal tax purposes, they shall be disallowed as an itemized deduction for Iowa income tax purposes.

Refunds of Iowa income taxes to the extent that the refunds were included in the determination of federal adjusted gross income shall be allowed as a reduction to Iowa adjusted gross income, only to the extent that an itemized deduction for Iowa income taxes was disallowed on a prior Iowa return. Iowa

income tax refunds resulting from Iowa refundable income tax credits are not allowed as a reduction for Iowa income tax purposes.

EXAMPLE: Individual A made Iowa estimated payments of \$2,000 during the 2003 tax year. The \$2,000 of estimated payments was claimed as an itemized deduction for federal tax purposes, but was not allowed as an itemized deduction for Iowa tax purposes. The 2003 Iowa return reported a tax liability of \$1,600. Individual A had \$2,000 of Iowa estimated payments and a \$500 ethanol blended gasoline tax credit, and received a \$900 Iowa tax refund in 2004. Of the \$900 refund reported as income on the federal return, Individual A will be allowed a \$400 (\$2,000 - \$1,600) reduction on the Iowa return for 2004.

This rule is intended to implement Iowa Code section 422.9.

CHAPTER 42
ADJUSTMENTS TO COMPUTED TAX AND TAX CREDITS
[Prior to 12/17/86, Revenue Department[730]]

701—42.1(257,422) School district surtax. Iowa law provides for the implementation of an income surtax for increasing local school district budgets. The surtax must be approved by the voters of a school district in a special election or by a resolution of the board of directors of a school district. The surtax rate is determined by the department of management on the basis of the revenue to be raised by the surtax for the particular school district with the surtax.

The school district surtax is imposed on the income tax liabilities of all taxpayers residing in the school district on the last day of the taxpayers' tax years. For purposes of the school district surtax, income tax liability is the tax computed under Iowa Code section 422.5, less the nonrefundable credits against computed tax which are authorized in Iowa Code chapter 422, division II.

In a situation where an individual is residing in a school district with a surtax and the individual dies during the tax year, the individual will be considered to be subject to the surtax, since the individual was residing in the school district on the last day of the individual's tax year.

An individual serving in the Armed Forces of the United States who maintains permanent residence in an Iowa school district with a surtax is subject to the surtax regardless of whether the individual is physically residing in the school district on the last day of the tax year.

A person who is present in the school district on the last day of the tax year on a temporary basis due to annual leave or in transit between duty stations is not subject to the surtax.

This rule is intended to implement Iowa Code sections 257.21, 257.29, and 422.15.
[ARC 8702B, IAB 4/21/10, effective 5/26/10]

701—42.2(422D) Emergency medical services income surtax. Effective July 1, 1992, a county board of supervisors may offer for voter approval a local option income surtax, an ad valorem property tax, or a combination of the two taxes to generate revenues for emergency medical services. However, this rule pertains only to the local option income surtax for emergency medical services. If a majority of those voting in the election approve the emergency medical services income surtax, the income surtax will be imposed for tax years beginning on or after January 1 of the fiscal year in which the election is held. Thus, if an election is held in the 2007-2008 fiscal year (July 1, 2007, through June 30, 2008) and the income surtax is approved in the election, the income surtax will be imposed on 2008 returns for individuals filing on a calendar-year basis. In the case of individuals filing on a fiscal-year basis, the income surtax will be imposed on returns for tax years beginning in the 2008 fiscal year. If an emergency medical services income surtax is imposed for a county, it can be imposed only for a maximum period of five years. When the emergency medical income surtax is repealed because the five-year imposition has expired, the income surtax is repealed as of December 31 for tax years beginning on or after that date.

42.2(1) *The rate of the income surtax imposed for emergency medical services.* After the income surtax is approved by an election of county voters, the board of supervisors will set the rate of tax to be imposed, which can be expressed in tenths of 1 percent or hundredths of 1 percent but cannot exceed 1 percent. In addition, because the cumulative total of the percents of income surtax imposed on any taxpayer in the county cannot exceed 20 percent, the rate of an emergency medical services income surtax may be limited, if a school district income surtax has been approved previously by a school district in the county and the surtax rate exceeds 19 percent. Therefore, assuming that a school district in the county had previously approved an income surtax rate of 19.4 percent, the medical emergency income surtax rate would be limited to six-tenths of 1 percent. If a school district income surtax and emergency medical income surtax are approved on or about the same date and the cumulative total of the income surtaxes is greater than 20 percent, the income surtax approved on the earlier of the two dates will be allowed at the rate approved and the second income surtax approved will be limited accordingly so that the cumulative rate will not exceed 20 percent. If a school district income surtax and an emergency medical income surtax are approved on the same date with a proposed cumulative rate that exceeds 20 percent, each of the surtaxes will be reduced equally so that the cumulative surtax rate will not exceed 20 percent. Assuming that a school district in a particular county approves an income surtax of 20 percent

on November 4, 2008, and an emergency medical income surtax of 1 percent is approved on the same date, both surtaxes will be reduced by five-tenths of 1 percent so that the cumulative rate of the two income surtaxes does not exceed 20 percent. The department of management can provide information about any income surtaxes that have been approved for the school districts in the county.

42.2(2) *Imposing the emergency medical income surtax.* The emergency medical income surtax will be imposed on the state income tax liability on each individual residing in the county at the end of the individual's tax year, whether the individual's tax year ends at the end of the calendar year or fiscal year. For purposes of the emergency medical income surtax, an individual's income tax liability is the aggregate of the state income taxes determined in Iowa Code section 422.5 less the nonrefundable credits against computed income tax which are authorized in Iowa Code chapter 422, division II.

42.2(3) *Administering the emergency medical income surtax.* The director of revenue shall administer the emergency medical income surtax in the same way as other state individual tax laws are administered. All powers and requirements related to administering the state income tax law apply to the administration of the emergency medical income surtax including, but not limited to, the provisions of Iowa Code sections 422.4, 422.20 to 422.31, 422.68, 422.70, and 422.72 to 422.75. The county board of supervisors and county officials shall confer with the director for assistance in drafting the ordinance imposing the emergency medical income surtax. Certified copies of the ordinance shall be filed with the department of revenue and the department of management within 30 days after the emergency medical income surtax is approved.

42.2(4) *Accounting for the emergency medical income surtax and paying the surtax.* The department shall account for the emergency medical income surtax and any interest and penalties on the surtax so that there is a separate accounting for each county where the income surtax is imposed. The accounting shall be applicable to those individual income tax returns filed on or before November 1 of the calendar year following the tax year for which the tax is imposed. The emergency medical income surtax and any penalties and interest should be credited to a "local income surtax fund" established in the office of the state treasurer. On or before December 15 of the year after the tax year, the director of revenue shall certify to the state treasurer the income surtax and any interest and penalties collected from returns filed on or before November 1.

This rule is intended to implement Iowa Code chapter 422D.
[ARC 8702B, IAB 4/21/10, effective 5/26/10]

701—42.3(422) Exemption credits.

42.3(1) A single person shall deduct from the computed tax a personal exemption credit of \$40. A single person is defined in 701—subrule 39.4(1).

42.3(2) A married person living with husband or wife at the close of the taxable year, or living with husband or wife at the time of the death of that spouse during the taxable year, shall, if a joint return is filed, deduct from the computed tax a personal exemption of \$80. Where such spouse files a separate return, each spouse is entitled to deduct from the computed tax a personal exemption of \$40. The personal exemption may not be divided between the spouses in any other proportion.

42.3(3) A taxpayer shall deduct from computed tax an exemption of \$40 for each dependent. "Dependent" has the same meaning as provided by the Internal Revenue Code, and the same dependents shall be claimed for Iowa income tax purposes as the taxpayer is entitled to claim for federal income tax purposes. If each spouse furnished 50 percent of the support, the spouses must elect between them which spouse is to be entitled to claim the dependent. The dividing of dependent credits applies only to the number of dependents and not to the credit amount for a particular dependent.

42.3(4) A head of household as defined in 701—subrule 39.4(7) is allowed a personal exemption credit of \$80.

42.3(5) A taxpayer who is 65 years of age on or before the first day following the end of the tax year is allowed an additional personal exemption credit of \$20 in addition to any other credits allowed by this rule.

42.3(6) A taxpayer who is blind, as defined in Iowa Code section 422.12(1) "e," is allowed a personal exemption credit of \$20 in addition to any other credits allowed by this rule.

42.3(7) A nonresident taxpayer or a part-year resident taxpayer will be allowed to deduct personal exemption credits as if the nonresident taxpayer or part-year taxpayer was a resident for the entire year.

This rule is intended to implement Iowa Code section 422.12.

[ARC 8702B, IAB 4/21/10, effective 5/26/10]

701—42.4(422) Tuition and textbook credit for expenses incurred for dependents attending grades kindergarten through 12 in Iowa. Effective for tax years beginning on or after January 1, 1998, taxpayers who pay tuition and textbook expenses of dependents who attend grades kindergarten through 12 in an Iowa school may receive a tax credit of 25 percent of up to \$1,000 of qualifying expenses for each dependent attending an elementary or secondary school located in Iowa. In order for the taxpayer to qualify for the tax credit for tuition and textbooks, the elementary school or secondary school that the dependent is attending must meet the standards for accreditation of public and nonpublic schools in Iowa provided in Iowa Code section 256.11. In addition, the school the dependent is attending must not be operated for profit and must adhere to the provisions of the United States Civil Rights Act of 1964, and the provisions of Iowa Code chapter 216, which is known as the Iowa civil rights Act of 1965. The following definitions and criteria apply to the determination of the tax credit for amounts paid by the taxpayer for tuition and textbooks for a dependent attending an elementary or secondary school in Iowa:

42.4(1) Tuition. For purposes of the tuition and textbook tax credit, “tuition” means any charge made by an elementary or secondary school for the expense of personnel, buildings, equipment and materials other than textbooks, and other expenses of elementary or secondary schools which relate to the teaching of only those subjects that are legally and commonly taught in public elementary or secondary schools in Iowa. “Tuition” includes charges by a qualified school for summer school classes or for private instruction of a child who is physically unable to attend classes at the site of the elementary or secondary school.

“Tuition” does not include charges or fees which relate to the teaching of religious tenets, doctrines, or worship in cases where the purpose of the teaching is to inculcate the religious tenets, doctrines, or worship. In addition, “tuition” does not include amounts paid to an individual or other entity for private instruction of a dependent who attends an elementary or secondary school in Iowa. Amounts paid to a school for meals, lodging, or clothing for a dependent do not qualify for the tax credit for tuition.

Amounts paid to an individual or organization for home schooling of a dependent or the teaching of a dependent outside of an elementary or secondary school may not be claimed for purposes of the tuition and textbook tax credit.

42.4(2) Textbooks. For purposes of the tuition and textbook tax credit, “textbooks” means books and other instructional materials used in elementary and secondary schools in Iowa to teach only those subjects legally and commonly taught in public elementary and secondary schools in Iowa. “Textbooks” includes fees or charges by the elementary or secondary school for required supplies or materials for classes in art, home economics, shop or similar courses. “Textbooks” also includes books and materials used for extracurricular activities, such as sporting events, musical events, dramatic events, speech activities, driver’s education, or programs of a similar nature.

“Textbooks” does not include amounts paid for books or other instructional materials used in the teaching of religious tenets, doctrines, or worship, in cases where the purpose of the teaching is to inculcate the religious tenets, doctrine, or worship. “Textbooks” also does not include amounts paid for books or other instructional materials used in teaching a dependent subjects in the home or outside of an elementary or secondary school.

42.4(3) Extracurricular activities. For purposes of the tuition and textbook tax credit, amounts paid for dependents to participate in or to attend extracurricular activities may be claimed as part of the tuition and textbook tax credit. “Extracurricular activities” includes sporting events, musical events, dramatic events, speech activities, driver’s education if provided at a school, and programs of a similar nature.

a. The following are specific examples of expenditures related to a dependent’s participation in or attendance at extracurricular activities that may qualify for the tuition and textbook tax credit:

- (1) Fees for participation in school sports activities.
- (2) Fees for field trips.

(3) Rental fees for instruments for school bands or orchestras but not rental fees in rent-to-own contracts.

(4) Driver's education fees, if paid to a school.

(5) Cost of activity tickets or admission tickets to school sporting, music and dramatic events.

(6) Fees for events such as homecoming, winter formal, prom, or similar events.

(7) Rental of costumes for school plays.

(8) Purchase of costumes for school plays if the costumes are not suitable for street wear.

(9) Purchase of track shoes, football shoes, or other athletic shoes with cleats, spikes, or other features that are not suitable for street wear.

(10) Costs of tickets or other admission fees to attend banquets or buffets for school academic or athletic awards.

(11) Trumpet grease, woodwind reeds, guitar picks, violin strings and similar types of items for maintenance of instruments used in school bands or orchestras.

(12) Band booster club or athletic booster club dues, but only if dues are for the dependent attending the school and not the parent or adult.

(13) Rental of formal gown or tuxedo for school dance or other school event.

(14) Dues paid to school clubs or school-sponsored organizations such as chess club, photography club, debate club, or similar organizations.

(15) Amounts paid for music that will be used in school music programs, including vocal music programs.

(16) Fees paid for general materials for shop class, agriculture class, home economics class, or auto repair class and general fees for equivalent classes.

(17) Fees for a dependent's bus trips to attend school if paid to the school.

b. The following are specific examples of expenditures related to a dependent's participation in or attendance at extracurricular activities that will not qualify for the tuition and textbook credit.

(1) Purchase of a musical instrument used in a school band or orchestra.

(2) Purchase of basketball shoes or other athletic shoes that are readily adaptable to street wear.

(3) Amounts paid for special testing such as SAT or PSAT, and for Iowa talent search tests.

(4) Payments for senior trips, band trips, and other overnight school activity trips which involve payment for meals and lodging.

(5) Fees paid to K-12 schools for courses for college credit.

(6) Amounts paid for T-shirts, sweatshirts and similar clothing that is appropriate for street wear.

(7) Amounts paid for special programs at universities and colleges for high school students.

(8) Payment for private instrumental lessons, voice lessons or similar lessons.

(9) Amounts paid for a school yearbook, annual or class ring.

(10) Fees for special materials paid for shop class, agriculture class, auto repair class, home economics class and similar classes. For purposes of this paragraph, "special materials" means materials used for personal projects of the dependents, such as materials to make furniture for personal use, automobile parts for family automobiles and other materials for projects for personal or family benefit.

42.4(4) *Claiming the credit.* The credit can only be claimed by the spouse who claims the dependent credit on the Iowa tax return as described in subrule 42.3(3). For example, for divorced or separated parents, only the spouse who claims the dependent credit on the Iowa return can claim the tuition and textbook credit for tuition and textbook expenses for that dependent.

In cases where married taxpayers file separately on a combined return form, the tuition and textbook credit shall be allocated between the spouses in the ratio in which the dependent credit was claimed between the spouses.

EXAMPLE: A married couple has two dependent children and claimed a tuition and textbook credit of \$500 related to both children on their 2011 Iowa return. The taxpayers filed separately on a combined Iowa return form for 2011. One spouse claimed both of the dependent credits on the Iowa return. The \$500 tuition and textbook credit will be claimed by the spouse who claimed the dependent credits on the Iowa return.

EXAMPLE: A married couple has three dependent children and claimed a tuition and textbook credit of \$600 related to all three children on their 2011 Iowa return. The taxpayers filed separately on a combined Iowa return form for 2011. One spouse claimed one dependent credit, and the other spouse claimed two dependent credits on the Iowa return. The spouse who claimed one dependent credit will claim \$200 of the tuition and textbook credit, while the spouse who claimed two dependent credits will claim \$400 of the tuition and textbook credit.

This rule is intended to implement Iowa Code section 422.12.
[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9820B, IAB 11/2/11, effective 12/7/11]

701—42.5(422) Nonresident and part-year resident credit. For tax years beginning on or after January 1, 1982, an individual who is a nonresident of Iowa for the entire tax year, or an individual who is an Iowa resident for a portion of the tax year, is allowed a credit against the individual's Iowa income tax liability for the Iowa income tax on the portion of the individual's income which was earned outside Iowa while the person was a nonresident of Iowa. This credit is computed on Schedule IA 126, which is included in the Iowa individual income tax booklet. The following subrules clarify how the nonresident and part-year resident credit is computed for nonresidents of Iowa and taxpayers who are part-year residents of Iowa during the tax year.

42.5(1) Nonresident/part-year resident credit for nonresidents of Iowa. A nonresident of Iowa shall complete the Iowa individual return in the same way an Iowa resident completes the form by reporting the individual's total net income, including income earned outside Iowa, on the front of the IA 1040 return form. A nonresident individual is allowed the same deduction for federal income tax and the same itemized deductions as an Iowa resident taxpayer with identical deductions for these expenditures. Thus, a nonresident with a taxable income of \$40,000 would have the same initial Iowa income tax liability as a resident taxpayer with a taxable income of \$40,000 before the nonresident/part-year resident credit is computed.

The nonresident/part-year resident credit is computed on Schedule IA 126. The lines referred to in this subrule are from Schedule IA 126 and Form IA 1040 for the 2008 tax year. Similar lines on the schedule and form may apply for subsequent tax years. The individual's Iowa source net income from lines 1 through 25 of the schedule is totaled on line 26 of the schedule. If the nonresident's Iowa source net income is less than \$1,000, the taxpayer is not subject to Iowa income tax and is not required to file an Iowa income tax return for the tax year. However, if the Iowa source net income amount is \$1,000 or more, the Iowa source net income is then divided by the person's all source net income on line 27 of Schedule IA 126 to determine the percentage of the Iowa net income to all source net income. This Iowa income percentage, which is rounded to the nearest tenth of a percent, is inserted on line 28 of the schedule, and this percentage is then subtracted from 100 percent to arrive at the nonresident/part-year resident credit percentage or the percentage of the individual's total income which was earned outside Iowa. The nonresident/part-year resident credit percentage is entered on line 29 of Schedule IA 126. The Iowa income tax on total income from line 43 of the IA 1040 is entered on line 30 of Schedule IA 126. The total of nonrefundable credits from line 49 of the IA 1040 is then shown on line 31 of Schedule IA 126. The amount on line 31 is subtracted from the amount on line 30, which results in the Iowa total tax after nonrefundable credits, which is entered on line 32. This Iowa tax-after-credits amount is multiplied by the nonresident/part-year resident credit percentage from line 29 to compute the nonresident/part-year resident credit. The amount of the credit is inserted on line 33 of Schedule IA 126 and on line 51 of the IA 1040.

EXAMPLE A. A single resident of Nebraska had Iowa source net income of \$15,000 in 2008 from wages earned from employment in Iowa. The rest of this person's income was attributable to sources outside Iowa. This nonresident of Iowa had an all source net income of \$40,000 and a taxable income of \$30,000 due to a federal tax deduction of \$7,000 and itemized deductions of \$3,000. The Iowa income percentage is computed by dividing the Iowa source net income of \$15,000 by the taxpayer's all source net income of \$40,000, which results in a percentage of 37.5. This percentage is subtracted from 100 percent which leaves a nonresident/part-year resident credit percentage of 62.5.

The Iowa tax from line 43 of the IA 1040 is \$1,508. The total nonrefundable credit from line 49 is \$40, which leaves a tax amount of \$1,468 when the credit is subtracted from \$1,508. When \$1,468 is multiplied by the nonresident/part-year resident credit percentage of 62.5, a nonresident credit of \$918 is computed which is entered on line 33 of Schedule IA 126 as well as on line 51 of the IA 1040 for 2008.

EXAMPLE B. A California resident, who was married, had \$20,000 of Iowa source income in 2008 from an Iowa farm. This individual had an additional \$80,000 in income that was attributable to sources outside Iowa, but the individual's spouse had no income. The taxpayers had paid \$18,000 in federal income tax in 2008 and had itemized deductions of \$12,000 in 2008.

The taxpayers' taxable income on their joint Iowa return was \$70,000. The taxpayers had an Iowa income tax liability of \$4,583 after application of the personal exemption credits of \$80. The taxpayers had an Iowa source income of \$20,000 and an all source net income of \$100,000. Therefore, the Iowa income percentage was 20. Subtracting the Iowa income percentage of 20 percent from 100 percent leaves a nonresident/part-year resident credit percentage of 80.

When the Iowa income tax liability of \$4,583 is multiplied by 80 percent, this results in a nonresident/part-year resident credit of \$3,666. This credit amount is entered on line 33 of the Schedule IA 126 and on line 51 of Form IA 1040.

42.5(2) *Nonresident/part-year resident credit for part-year residents of Iowa.* An individual who is a resident of Iowa for part of the tax year shall complete the front of the IA 1040 income tax return form as a resident taxpayer by showing the taxpayer's total income, including income earned outside Iowa, on the front of the IA 1040 return form. A part-year resident of Iowa is allowed the same federal tax deduction and itemized deductions as a resident taxpayer who has paid the same amount of federal income tax and has paid for the same deductions that can be claimed on Schedule A in the tax year. Therefore, a part-year resident would have the same initial Iowa income tax liability as an Iowa resident with the same taxable income before computation of the nonresident/part-year resident credit.

The nonresident/part-year resident credit for a part-year resident is computed on Schedule IA 126. The lines referred to in this subrule are from the IA 1040 income tax return form and the Schedule IA 126 for 2008. Similar lines may apply for tax years after 2008. The individual's Iowa source income is totaled on line 26 of Schedule IA 126 and includes all the individual's income received while the taxpayer was a resident of Iowa and all the Iowa source income received during the period of the tax year when the individual was a resident of a state other than Iowa. Iowa source income includes, but is not limited to, wages earned in Iowa while a resident of another state as well as income from Iowa farms and other Iowa businesses that was earned during the portion of the year that the taxpayer was a nonresident of Iowa. In the case of interest from a part-year resident's account at an Iowa financial institution, only interest earned during the period of the individual's Iowa residence is Iowa source income unless the account is for an Iowa business. If the part-year resident's account at a financial institution is for an Iowa business, all interest earned in the year by the part-year resident from the account is taxable to Iowa.

Income earned outside Iowa by the part-year resident during the portion of the year the individual was an Iowa resident is taxable to Iowa and is part of the individual's Iowa source income. To compute the nonresident/part-year resident credit for a part-year resident, the taxpayer's Iowa source income on Schedule IA 126 is totaled. If the Iowa source income is less than \$1,000, the taxpayer is not subject to Iowa income tax and is not required to file an Iowa return. If the Iowa source income is \$1,000 or more, it is divided by the taxpayer's all source net income on line 27 of Schedule IA 126. The percentage computed by this procedure is the Iowa income percentage and is entered on line 28 of the Schedule IA 126. The Iowa income percentage, which is rounded to the nearest tenth of a percent, is then subtracted from 100 percent to arrive at the nonresident/part-year resident credit percentage, which is entered on line 29 of Schedule IA 126. The Iowa tax from line 43 of the IA 1040 is then shown on line 30 of Schedule IA 126. The total of the Iowa nonrefundable credits from line 49 of the IA 1040 is entered on line 31 of Schedule IA 126 and is subtracted from the Iowa tax amount on line 30. The tax-after-credits amount on line 32 is next multiplied by the nonresident/part-year resident credit percentage from line 28. The amount calculated from this procedure is the nonresident/part-year resident credit, which is shown on line 33 of Schedule IA 126 and on line 51 of Form IA 1040.

EXAMPLE A. A single individual was a resident of Nebraska for the first half of 2008 and moved to Iowa on July 1, 2008, to accept a job in Des Moines. This individual earned \$20,000 from wages, \$200 from interest, and \$4,000 from a ranch in Nebraska from January 1, 2008, through June 30, 2008. In the last half of 2008, this person had wages of \$30,000, interest income of \$300, and \$4,000 from the Nebraska ranch. This part-year resident had federal income tax paid in 2008 of \$11,000 and had itemized deductions of \$3,000.

The part-year resident's all source net income was \$58,500 and the Iowa source net income was \$34,300, which includes the Iowa wages, the Nebraska ranch income of \$4,000 earned during the individual's period of Iowa residence, as well as the interest income of \$300 earned during that time of the tax year. The Iowa taxable income for the part-year resident for 2008 was \$44,500, which included the federal income tax deduction of \$11,000 and itemized deductions of \$3,000. The individual's Iowa income percentage was 58.6 which was determined by dividing the Iowa source income of \$34,300 by the all source income of \$58,500. Subtracting the Iowa income percentage of 58.6 from 100 percent results in a nonresident/part-year resident credit percentage of 41.4. The Iowa tax on total income was \$2,529 which was reduced to \$2,489 after subtraction of the personal exemption credit of \$40.

When \$2,489 is multiplied by the nonresident/part-year resident percentage of 41.4, a nonresident/part-year resident credit of \$1,030 is computed for this part-year resident.

EXAMPLE B. A single individual moved from Minnesota to Iowa on July 1, 2008. This person had received \$5,000 in income from an Iowa farm in March of the tax year and another \$10,000 from this farm in September of 2008. This person had \$10,000 in wages from employment in Minnesota in the first half of the year and another \$15,000 in wages from employment in Iowa in the last half of 2008. This person had \$2,000 in interest from a Minnesota bank in the first half of the year and \$2,000 in interest from an Iowa bank in the last six months of 2008. This taxpayer had \$8,000 in federal income tax withheld from wages in 2008 and claimed the standard deduction on both the Iowa and federal income tax returns.

The part-year resident's all source income was \$44,000 and the Iowa source income was \$32,000 which consisted of \$15,000 in wages, \$2,000 in interest income, and \$15,000 in income from the Iowa farm. Since the farm was in Iowa, the farm income received in the first half of 2008 was taxable to Iowa as well as the farm income received while the individual was an Iowa resident. The individual's Iowa taxable income was \$34,250 which was computed after subtracting the federal income tax deduction of \$8,000 and a standard deduction of \$1,750. The taxpayer's Iowa income tax liability was \$1,757 after subtraction of a personal exemption credit of \$40.

The taxpayer's Iowa income percentage was 72.7 which was computed by dividing the Iowa source income of \$32,000 by the all source income of \$44,000. The nonresident/part-year resident credit percentage was 27.3 which was arrived at by subtracting the Iowa income percentage of 72.7 from 100 percent. The taxpayer's nonresident/part-year resident credit is \$480. This was determined by multiplying the Iowa income tax liability after personal exemption credit amount of \$1,757 by the nonresident/part-year resident percentage of 27.3.

This rule is intended to implement Iowa Code section 422.5.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—42.6(422) Out-of-state tax credits.

42.6(1) General rule. Iowa residents are allowed an out-of-state tax credit for taxes paid to another state or foreign country on income which is also reported on the taxpayer's Iowa return. The out-of-state tax credit is allowable only if the taxpayer files an Iowa resident income tax return.

If the Iowa resident is a partner, shareholder, member, or beneficiary of a partnership, S corporation, limited liability company, or trust which files a composite income tax return in another state on behalf of the partners, shareholders, members or beneficiaries, the out-of-state tax credit will be allowed for the Iowa resident. The Iowa resident must provide a schedule of the resident's share of the income tax paid to another state on a composite basis, and the out-of-state tax credit is limited based upon the calculation set forth in subrule 42.6(2).

However, if the partnership, S corporation, limited liability company or trust is directly subject to tax in another state and the tax is not directly imposed on the resident taxpayer, then the out-of-state tax credit is not allowed for the Iowa resident on the tax directly imposed on the partnership, S corporation, limited liability company, or trust. For example, if another state does not recognize the S corporation election for state purposes and a corporation income tax is imposed directly on the S corporation, then the out-of-state tax credit is not allowed for the Iowa resident shareholder on the corporation income tax paid to the other state.

42.6(2) *Limitation of out-of-state tax credit.* If an Iowa resident taxpayer pays income tax to another state or foreign country on any of the taxpayer's income, the taxpayer is entitled to a net tax credit; that is, the taxpayer may deduct from the taxpayer's Iowa net tax (not from gross income) the amount of income tax actually paid to the other state or country, provided the amount deducted as a credit does not exceed the amount of Iowa net income tax on the same income which was taxed by the other state or foreign country.

42.6(3) *Computation of tax credit.*

a. The limitation on the tax credit must be computed according to the following formula: Gross income taxed by another state or foreign country that is also taxed by Iowa shall be divided by the total gross income of the Iowa resident taxpayer. This quotient, multiplied by the net Iowa tax as determined on the total gross income of the taxpayer as if entirely earned in Iowa, shall be the maximum tax credit against the Iowa net tax. This quotient shall be computed as a percentage rounded to the nearest tenth of a percent. However, if the income tax paid to the other state or foreign country on the gross income taxed by the other state or foreign country is less than the maximum tax credit against the Iowa tax, the out-of-state credit allowed against the Iowa tax may not exceed the income tax paid to the other state or foreign country. The income tax paid to the other state or foreign country is the net state or foreign income tax actually paid for the tax year on the income taxed by the other state or foreign country and not the state or foreign income tax paid during the tax year, such as state income tax or foreign income tax withheld from the income taxed by the other state or foreign country.

b. Out-of-state tax credit examples. An individual who is an Iowa resident for the entire tax year can claim an out-of-state tax credit against the person's Iowa income tax liability for any income tax paid to another state or foreign country for the tax year on any gross income received by the individual for the year which was derived from sources outside of Iowa to the extent this gross income is also subject to Iowa income tax.

However, in the case of an individual who is a part-year resident of Iowa for the tax year, that individual can only claim an out-of-state tax credit against the person's Iowa income tax liability for income tax paid to another state or foreign country on gross income derived from sources outside of Iowa during the period of the tax year that the individual was an Iowa resident and only to the extent this gross income derived from sources outside of Iowa was also subject to Iowa income tax.

The taxpayer's out-of-state credit is computed on Schedule IA 130 which is to be filed with the taxpayer's Iowa individual income tax return. The taxpayer's income tax return or other document of the other state or foreign country supporting the income tax paid to the other state or foreign country shall be filed with the individual's Iowa income tax return to support the out-of-state tax credit claimed.

EXAMPLE 1. Gene Miller was an Iowa resident for the entire year 2008. Mr. Miller lived in Council Bluffs and worked the entire year for a company in Omaha, Nebraska. Mr. Miller had wages of \$30,000 and Nebraska income tax withheld of \$1,000. He also had income of \$10,000 from rental of an Iowa farm and another \$10,000 in interest income from a personal savings account in an Iowa bank. The amount of Mr. Miller's gross income that was taxed by Nebraska (the other state or foreign country) was \$30,000. His total gross income in 2008 was \$50,000. Thus, 60 percent of his income was earned in Nebraska. Mr. Miller's Iowa tax on line 54 of Form IA 1040 was \$917, which resulted in a potential out-of-state credit of 60 percent of the Iowa tax or \$550 because 60 percent of Mr. Miller's income was earned outside Iowa and was taxed by Nebraska. However, Mr. Miller's income tax liability on the Nebraska income tax return was only \$500. Thus, the out-of-state tax credit allowed was \$500, because that was less than the potential out-of-state tax credit of \$550.

EXAMPLE 2. Ben Smith was a part-year Iowa resident in 2008. He resided in Missouri for the first six months of the year until he moved to Keokuk, Iowa, on July 1. Mr. Smith was employed in Missouri for the entire year and had wages of \$30,000 and had Missouri income tax liability of \$1,000. Half of Mr. Smith's wages or \$15,000 of the wages was earned during the time Mr. Smith was an Iowa resident. Mr. Smith also had \$10,000 in farm rental income from farmland located in Iowa. The amount of gross income taxed by Missouri while Mr. Smith was an Iowa resident was \$15,000. Mr. Smith's gross income earned while an Iowa resident for the year was \$25,000. Thus, 60 percent of the gross income was earned in the other state while Mr. Smith was an Iowa resident. Mr. Smith's Iowa income tax on line 54 of the IA 1040 was \$1,292. This resulted in a potential out-of-state credit of \$775 because 60 percent of the gross income was earned in Missouri during the period Mr. Smith was an Iowa resident. However, since 50 percent of the income earned in Missouri was earned while Mr. Smith was a resident of Iowa and the Missouri income tax liability for the year was \$1,000, the out-of-state credit was \$500 or 50 percent of the Missouri income tax liability. The out-of-state credit allowed was \$500, because this was less than the Iowa income tax of \$775 that was applicable to the gross income earned in Missouri during the period Mr. Smith was an Iowa resident.

42.6(4) Proof of claim for tax credit. The credit may be deducted from Iowa net income tax if written proof of such payment to another state or foreign country is furnished to the department. The department will accept any one of the following as proof of such payment:

a. A photocopy, or other similar reproduction, of either:

- (1) The receipt issued by the other state or foreign country for payment of the tax, or
- (2) The canceled check (both sides) with which the tax was paid to the other state or foreign country together with a statement of the amount and kind (whether wages, salaries, property or business) of total income on which such tax was paid.

b. A copy of the income tax return filed with the other state or foreign country which has been certified by the tax authority of that state or foreign country and showing thereon that the income tax assessed has been paid to them.

This rule is intended to implement Iowa Code section 422.8.
 [ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—42.7(422) Out-of-state tax credit for minimum tax.

42.7(1) General rule. Iowa residents are allowed an out-of-state tax credit for minimum taxes or income taxes paid to another state or foreign country on preference items derived from sources outside of Iowa. Part-year residents who pay minimum tax to another state or foreign country on preference items derived from sources outside Iowa will be allowed an out-of-state tax credit only to the extent that the minimum tax paid to the other state or foreign country relates to preference items that occurred during the period the taxpayer was an Iowa resident. Taxpayers who were nonresidents of Iowa for the entire tax year are not eligible for an out-of-state tax credit on their Iowa returns for minimum taxes paid to another state or foreign country on preference items.

If the Iowa resident is a partner, shareholder, member, or beneficiary of a partnership, S corporation, limited liability company, or trust which files a composite income tax return and pays minimum tax in another state on behalf of the partners, shareholders, members or beneficiaries, the out-of-state tax credit will be allowed for the Iowa resident. The Iowa resident must provide a schedule of the resident's share of the minimum tax paid to another state on a composite basis, and the out-of-state tax credit is limited based upon the calculation set forth in subrule 42.7(2).

However, if the partnership, S corporation, limited liability company, or trust is directly subject to minimum tax in another state and the minimum tax is not directly imposed on the resident taxpayer, then the out-of-state tax credit is not allowed for the Iowa resident on the minimum tax directly imposed on the partnership, S corporation, limited liability company, or trust. For example, if another state does not recognize the S corporation election for state tax purposes and a corporation income tax is imposed directly on the S corporation which includes minimum tax, then the out-of-state tax credit is not allowed for the Iowa resident shareholder on the corporation income tax, including minimum tax, paid to the other state.

42.7(2) *Limitation of out-of-state tax credit for minimum tax.* The limitation on the out-of-state tax credit for minimum tax is that the credit shall not exceed the Iowa minimum tax that would have been computed on the same preference items which were taxed by the other state or foreign country. The limitation may be determined according to the following formula: The total of preference items earned outside of Iowa and taxed by another state or foreign country shall be divided by the total of preference items of the resident taxpayer. This quotient, multiplied by the state minimum tax on the total of preference items as if entirely earned in Iowa, shall be the maximum credit against the Iowa minimum tax. However, if the minimum tax imposed by the other state or foreign country is less than the minimum tax computed under the limitation formula, the out-of-state credit for minimum tax will not exceed the minimum tax imposed by the other state or foreign country.

No out-of-state credit will be allowed on the Iowa return for minimum tax paid to another state or foreign country to the extent that the minimum tax of the other state or foreign country is imposed on items of tax preference not subject to the Iowa minimum tax. In addition, no out-of-state credit will be allowed for minimum tax paid to another state or foreign country of capital gains or losses from distressed sales which are excluded from the Iowa minimum tax. Capital gains or losses from distressed sales are described in rule 701—40.27(422).

42.7(3) *Proof of claim for out-of-state tax credit for minimum tax.* The out-of-state credit for minimum tax may be claimed on the return of a taxpayer if proof of payment of minimum tax to the state or foreign country is included with the return. Documents needed for proof of payment are a photocopy of the minimum tax form of the state or country to which minimum tax was paid as well as instructions from the minimum tax form or other information which specifies how the minimum tax is imposed and what preference items are subject to the minimum tax of that state or foreign country.

In the case of audit by the department of a taxpayer claiming an out-of-state tax credit for minimum tax paid, the department may require additional proof of payment of the out-of-state tax credit. The department will accept any of the following documents as verification of payment of the minimum tax:

- a. A photocopy, or other similar reproduction, of either:
 - (1) The receipt issued by the other state or foreign country for payment of the tax, including the minimum tax, or
 - (2) The canceled check (both sides) which was used for payment of the minimum tax to the other state or foreign country.
- b. A copy of the return filed with the other state or foreign country which has been certified by the tax authority of that state or foreign country and which shows that the income tax, including the minimum tax, has been paid.

This rule is intended to implement Iowa Code section 422.8.
[ARC 8702B, IAB 4/21/10, effective 5/26/10]

701—42.8(422) *Withholding and estimated tax credits.* An employee from whose wages tax is withheld shall claim credit for the tax withheld on the employee's income tax return for the year during which the tax was withheld. Credit will be allowed only if a copy of the withholding statement is attached to the return. Taxpayers who have made estimated income tax payments shall claim credit for the estimated tax paid for the taxable year.

This rule is intended to implement Iowa Code section 422.16.
[ARC 8702B, IAB 4/21/10, effective 5/26/10]

701—42.9(422) *Motor fuel credit.* An individual, partnership, limited liability company, or S corporation may elect to receive an income tax credit in lieu of the motor fuel tax refund provided by Iowa Code chapter 452A. An individual, partnership, limited liability company, or S corporation which holds a motor fuel tax refund permit under Iowa Code section 452A.18 when it makes this election must cancel the permit within 30 days after the first day of the tax year. However, if the refund permit is not canceled within this period, the permit becomes invalid at the time the election to receive an income tax credit is made. The election will continue for subsequent tax years unless a new motor fuel tax refund permit is obtained.

The motor fuel income tax credit must be the amount of Iowa motor fuel tax paid on qualifying fuel purchases as determined by Iowa Code chapter 452A and Iowa Code section 422.110 less any state sales tax as determined by 701—subrule 231.2(2). The credit must be claimed on the tax return covering the tax year in which the motor fuel tax was paid. If the motor fuel credit results in an overpayment of income tax, the overpayment may be refunded or may be credited to income tax due in the subsequent tax year.

The motor fuel tax credits for fuel taxes paid by partnerships, limited liability companies, and S corporations are not claimed on returns filed for the partnerships, limited liability companies, and S corporations. Instead, the pro rata shares of the motor fuel tax credits are allocated to the partners, members, and shareholders in the same ratio as incomes are allocated to the partners, members, and shareholders. A schedule must be attached to the individual's returns showing the distribution of gallons and the amount of credit claimed by each partner, member, or shareholder.

The partnership, limited liability company, or S corporation must attach to its return a schedule showing the allocation to each partner, member, or shareholder of the motor fuel purchased by the partnership, limited liability company, or S corporation which qualifies for the credit.

This rule is intended to implement Iowa Code sections 422.110 and 422.111.
[ARC 8702B, IAB 4/21/10, effective 5/26/10]

701—42.10(422) Alternative minimum tax credit for minimum tax paid in a prior tax year. Minimum tax paid in prior tax years commencing with tax years beginning on or after January 1, 1987, by a taxpayer can be claimed as a tax credit against the taxpayer's regular income tax liability in a subsequent tax year. Therefore, 1988 is the first tax year that the minimum tax credit is available, and the credit is based on the minimum tax paid by the taxpayer for 1987. The minimum tax credit may only be used against regular income tax for a tax year to the extent that the regular tax is greater than the minimum tax for the tax year. If the minimum tax credit is not used against the regular tax for a tax year, the remaining credit is carried over to the following tax year to be applied against the regular income tax liability for that period. The minimum tax credit is computed on Form IA 8801.

42.10(1) Examples of computation of the minimum tax credit and carryover of the credit.

EXAMPLE 1. The taxpayers reported \$5,000 of minimum tax for 2007. For 2008, the taxpayers reported regular tax less credits of \$8,000, and the minimum tax liability is \$6,000. The minimum tax credit is \$2,000 for 2008 because, although the taxpayers had an \$8,000 regular tax liability, the credit is allowed only to the extent that the regular tax exceeds the minimum tax. Since only \$2,000 of the carryover credit from 2007 was used, there is a \$3,000 minimum tax carryover credit to 2009.

EXAMPLE 2. The taxpayers reported \$2,500 of minimum tax for 2007. For 2008, the taxpayers reported regular tax less credits of \$8,000, and the minimum tax liability is \$5,000. The minimum tax credit is \$2,500 for 2008 because, although the regular tax less credits exceeded the minimum tax by \$3,000, the credit is allowed only to the extent of minimum tax paid for prior tax years. There is no minimum tax carryover credit to 2009.

42.10(2) Minimum tax credit for nonresidents and part-year residents. Nonresident and part-year resident taxpayers who paid Iowa minimum tax in tax years beginning on or after January 1, 1987, are eligible for the minimum tax credit to the extent that the minimum tax they paid was attributable to tax preferences and adjustments. Therefore, if a nonresident or part-year resident taxpayer had Iowa source tax preferences or adjustments, then all the minimum tax that was paid would qualify for the minimum tax credit.

The minimum tax credit for a tax year as computed above applies to the regular income tax liability less credits including the nonresident part-year credit to the extent this regular tax amount exceeds the minimum tax for the tax year. To the extent the credit is not used, the credit can be carried over to the next tax year.

This rule is intended to implement Iowa Code section 422.11B.
[ARC 8702B, IAB 4/21/10, effective 5/26/10]

701—42.11(15,422) Research activities credit. Effective for tax years beginning on or after January 1, 1985, taxpayers are allowed a credit equal to 6½ percent of the state's apportioned share of qualified

expenditures for increasing research activities. Effective for tax years beginning on or after January 1, 1991, the Iowa research activities credit will be computed on the basis of the qualifying expenditures for increasing research activities as allowable under Section 41 of the Internal Revenue Code in effect on January 1, 1999. The state's apportioned share of the qualifying expenditures for increasing research activities is a percent equal to the ratio of qualified research expenditures in Iowa to the total qualified research expenditures. The Iowa research activities credit is made permanent for tax years beginning on or after January 1, 1991, even though there may no longer be a research activities credit for federal income tax purposes.

42.11(1) Qualified expenditures in Iowa are:

- a. Wages for qualified research services performed in Iowa.
- b. Cost of supplies used in conducting qualified research in Iowa.
- c. Rental or lease cost of personal property used in Iowa in conducting qualified research. Where personal property is used both within and without Iowa in conducting qualified research, the rental or lease cost must be prorated between Iowa and non-Iowa use by the ratio of days used in Iowa to total days used both within and without Iowa.
- d. Sixty-five percent of contract expenses paid by a corporation to a qualified organization for basic research performed in Iowa.

42.11(2) Total qualified expenditures are:

- a. Wages paid for qualified research services performed everywhere.
- b. Cost of supplies used in conducting qualified research everywhere.
- c. Rental or lease cost of personal property used in conducting qualified research everywhere.
- d. Sixty-five percent of contract expenses paid by a corporation to a qualified organization for basic research performed everywhere.

"Qualifying expenditures for increasing research activities" is the smallest of the amount by which the qualified research expenses for the taxable year exceed the base period research expenses or 50 percent of the qualified research expenses for the taxable year.

A taxpayer may claim on the taxpayer's individual income tax return the pro rata share of the credit for qualifying research expenditures incurred in Iowa by a partnership, subchapter S corporation, or estate or trust. The portion of the credit claimed by the individual must be in the same ratio as the individual's pro rata share of the earnings of the partnership, subchapter S corporation, or estate or trust.

Any research credit in excess of the individual's tax liability, less the nonrefundable credits authorized in Iowa Code chapter 422, division II, may be refunded to the taxpayer or may be credited to the estimated tax of the taxpayer for the following year.

42.11(3) Research activities credit for tax years beginning in 2000. Effective for tax years beginning on or after January 1, 2000, the taxes imposed for individual income tax purposes will be reduced by a tax credit for increasing research activities in this state.

a. The credit equals the sum of the following:

(1) Six and one-half percent of the excess of qualified research expenses during the tax year over the base amount for the tax year based upon the state's apportioned share of the qualifying expenditures for increasing research activities.

(2) Six and one-half percent of the basic research payments determined under Section 41(e)(1)(A) of the Internal Revenue Code during the tax year based upon the state's apportioned share of the qualifying expenditures for increasing research activities. The state's apportioned share of the qualifying expenditures for increasing research activities is a percent equal to the ratio of qualified research expenditures in this state to total qualified research activities.

b. In lieu of the credit computed under paragraph 42.11(3)"a," a taxpayer may elect to compute the credit amount for qualified research expenses incurred in this state in a manner consistent with the alternative incremental credit described in Section 41(c)(4) of the Internal Revenue Code for tax years beginning on or after January 1, 2000, but beginning before January 1, 2010. The taxpayer may make this election regardless of the method used by the taxpayer on the taxpayer's federal income tax return. The election made under this paragraph is for the tax year, and the taxpayer may use another method or this same method for any subsequent tax year. For purposes of this alternative incremental research

credit computation, the credit percentages applicable to qualified research expenses described in clauses (i), (ii), and (iii) of Section 41(c)(4)(A) of the Internal Revenue Code are 1.65 percent, 2.20 percent, and 2.75 percent, respectively.

c. In lieu of the credit computed under paragraph 42.11(3)“a,” a taxpayer may elect to compute the credit amount for qualified research expenses incurred in this state in a manner consistent with the alternative simplified credit described in Section 41(c)(5) of the Internal Revenue Code for tax years beginning on or after January 1, 2010. The taxpayer may make this election regardless of the method used by the taxpayer on the taxpayer’s federal income tax return. The election made under this paragraph is for the tax year, and the taxpayer may use another method or this same method for any subsequent tax year.

For purposes of this alternative simplified research credit computation, the credit percentages applicable to qualified research expenses described in Section 41(c)(5)(A) and clause (ii) of Section 41(c)(5)(B) of the Internal Revenue Code are 4.55 percent and 1.95 percent, respectively.

d. For purposes of this subrule, the terms “base amount,” “basic research payment,” and “qualified research expense” mean the same as defined for the federal credit for increasing research activities under Section 41 of the Internal Revenue Code, except that, for purposes of the alternative incremental credit described in paragraph 42.11(3)“b” and the alternative simplified credit described in paragraph 42.11(3)“c,” such amounts are limited to research activities conducted within this state. For purposes of this subrule, “Internal Revenue Code” means the Internal Revenue Code in effect on January 1, 2014.

e. An individual may claim a research activities credit incurred by a partnership, S corporation, limited liability company, estate, or trust electing to have the income of the business entity taxed to the individual. The amount claimed by an individual from the business entity shall be based upon the pro rata share of the individual’s earnings from a partnership, S corporation, estate or trust. Any research credit in excess of the individual’s tax liability, less the nonrefundable credits authorized in Iowa Code chapter 422, division II, may be refunded to the individual or may be credited to the individual’s tax liability for the following tax year.

f. An eligible business approved under the new jobs and income program prior to July 1, 2005, is eligible for an additional research activities credit as described in 701—subrule 52.7(4). An eligible business approved under the enterprise zone program is eligible for an additional research activities credit as described in 701—subrules 52.7(5) and 52.7(6).

g. Tax years ending on or after July 1, 2005, but before July 1, 2009. For eligible businesses approved under the enterprise zone program and the high quality job creation program, research activities allowable for the Iowa research activities credit include expenses related to the development and deployment of innovative renewable energy generation components manufactured or assembled in Iowa. These expenses are not eligible for the federal credit for increasing research activities. These innovative renewable energy generation components do not include components with more than 200 megawatts in installed effective nameplate capacity. The research activities credit related to renewable energy generation components under the enterprise zone program and the high quality job creation program shall not exceed \$1 million in the aggregate.

These expenses are available only for the additional research activities credit set forth in subrule 42.11(3), paragraph “f,” for businesses in enterprise zones and the additional research activities credit set forth in subrule 42.29(1) for businesses approved under the high quality job creation program. These expenses are not available for the research activities credit set forth in subrule 42.11(3), paragraphs “a,” “b” and “c.”

h. Tax years ending on or after July 1, 2009. For eligible businesses approved under the enterprise zone program prior to July 1, 2014, research activities allowable for the Iowa research activities credit include expenses related to the development and deployment of innovative renewable energy generation components manufactured or assembled in Iowa; such expenses related to the development and deployment of innovative renewable energy generation components are not eligible for the federal credit for increasing research activities. The enterprise zone program was repealed on July 1, 2014. However, any research activities credit earned by businesses approved under the enterprise zone program prior to July 1, 2014, remains valid and can be claimed on tax returns filed after July 1, 2014.

(1) For purposes of this paragraph, innovative renewable energy generation components do not include components with more than 200 megawatts in installed effective nameplate capacity.

(2) The research activities credit related to renewable energy generation components under the enterprise zone program and the high quality jobs program described in subrule 42.42(1) shall not exceed \$2 million for the fiscal year ending June 30, 2010, and \$1 million for the fiscal year ending June 30, 2011.

(3) These expenses related to the development and deployment of innovative renewable energy generation components are applicable only to the additional research activities credit set forth in subrule 42.11(3), paragraph “f,” for businesses in enterprise zones and the additional research activities credit set forth in subrule 42.42(1) for businesses approved under the high quality jobs program, and are not applicable to the research activities credit set forth in subrule 42.11(3), paragraphs “a,” “b” and “c.”

42.11(4) Reporting of research activities credit claims. Beginning with research activities credit claims filed on or after July 1, 2009, the department shall issue an annual report to the general assembly of all research activities credit claims in excess of \$500,000. The report, which is due by February 15 of each year, will contain the name of each claimant and the amount of the research activities credit for all claims filed during the previous calendar year in excess of \$500,000.

This rule is intended to implement Iowa Code sections 15.335 and 422.10 as amended by 2014 Iowa Acts, House File 2435.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 9820B, IAB 11/2/11, effective 12/7/11; ARC 0337C, IAB 9/19/12, effective 10/24/12; ARC 1101C, IAB 10/16/13, effective 11/20/13; ARC 1545C, IAB 7/23/14, effective 8/27/14; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—42.12(422) New jobs credit. A tax credit is available to an individual who has entered into an agreement under Iowa Code chapter 260E and has increased employment by at least 10 percent.

42.12(1) Definitions.

a. The term “new jobs” means those jobs directly resulting from a project covered by an agreement authorized by Iowa Code chapter 260E (Iowa industrial new jobs training Act) but does not include jobs of recalled workers or replacement jobs or other jobs that formerly existed in the industry in this state.

b. The term “jobs directly related to new jobs” means those jobs which directly support the new jobs but do not include in-state employees transferred to a position which would be considered to be a job directly related to new jobs unless the transferred employee’s vacant position is filled by a new employee. The burden of proof that a job is directly related to new jobs is on the taxpayer.

EXAMPLE A. A taxpayer who has entered into a chapter 260E agreement to train new employees for a new product line, transfers an in-state employee to be foreman of the new product line but does not fill the transferred employee’s position. The new foreman’s position would not be considered a job directly related to new jobs even though it directly supports the new jobs because the transferred employee’s old position was not refilled.

EXAMPLE B. A taxpayer who has entered into a chapter 260E agreement to train new employees for a new product line transfers an in-state employee to be foreman of the new product line and fills the transferred employee’s position with a new employee. The new foreman’s position would be considered a job directly related to new jobs because it directly supports the new jobs and the transferred employee’s old position was filled by a new employee.

c. The term “taxable wages” means those wages upon which an employer is required to contribute to the state unemployment fund as defined in Iowa Code subsection 96.19(37) for the year in which the taxpayer elects to take the new jobs tax credit. For fiscal year taxpayers, “taxable wages” shall not be greater than the maximum wage upon which an employer is required to contribute to the state unemployment fund for the calendar year in which the taxpayer’s fiscal year begins.

d. The term “agreement” means an agreement entered into under Iowa Code chapter 260E after July 1, 1985, an amendment to that agreement, or an amendment to an agreement entered into before July 1, 1985, if the amendment sets forth the base employment level as of the date of the amendment. The term “agreement” also includes a preliminary agreement entered into under Iowa Code chapter 260E provided the preliminary agreement contains all the elements of a contract and includes the necessary elements and commitments relating to training programs and new jobs.

e. The term “base employment level” means the number of full-time jobs an industry employs at a plant site which is covered by an agreement under Iowa Code chapter 260E on the date of the agreement.

f. The term “project” means a training arrangement which is the subject of an agreement entered into under Iowa Code chapter 260E.

g. The term “industry” means a business engaged in interstate or intrastate commerce for the purpose of manufacturing, processing, or assembling products, conducting research and development, or providing services in interstate commerce, but excludes retail, health, and professional services. “Industry” does not include a business which closes or substantially reduces its operations in one area of the state and relocates substantially the same operation in another area of the state. “Industry” is a business engaged in the above-listed activities rather than the generic definition encompassing all businesses in the state engaged in the same activities. For example, in the meat-packing business, an industry is considered to be a single corporate entity or operating division, rather than the entire meat-packing business in the state.

h. The term “new employees” means the same as new jobs or jobs directly related to new jobs.

i. The term “full-time job” means any of the following:

- (1) An employment position requiring an average work week of 35 or more hours;
- (2) An employment position for which compensation is paid on a salaried full-time basis without regard to hours worked; or
- (3) An aggregation of any number of part-time or job-sharing employment positions which equal one full-time employment position. For purposes of this subrule, each part-time or job-sharing employment position shall be categorized with regard to the average number of hours worked each week as one-quarter, half, three-quarters, or full-time position, as set forth in the following table:

Average Number of Weekly Hours	Category
More than 0 but less than 15	$\frac{1}{4}$
15 or more but less than 25	$\frac{1}{2}$
25 or more but less than 35	$\frac{3}{4}$
35 or more	1 (full-time)

42.12(2) How to compute the credit. The credit is 6 percent of the taxable wages paid to employees in new jobs or jobs directly related to new jobs for the taxable year in which the taxpayer elects to take the credit.

EXAMPLE 1. A taxpayer enters into an agreement to increase employment by 20 new employees which is greater than 10 percent of the taxpayer’s base employment level of 100 employees. In year one of the agreement, the taxpayer hires 20 new employees but elects not to take the credit in that year. In year two of the agreement, only 18 of the new employees hired in year one are still employed and the taxpayer elects to take the credit. The credit would be 6 percent of the taxable wages of the 18 remaining new employees. In year three of the agreement, the taxpayer hires two additional new employees under the agreement to replace the two employees that left in year two and elects to take the credit. The credit would be 6 percent of the taxable wages paid to the two replacement employees. In year four of the agreement, three of the employees for which a credit had been taken left employment and three additional employees were hired. No credit is available for these employees. A credit can only be taken one time for each new job or job directly related to a new job.

EXAMPLE 2. A taxpayer operating two plants in Iowa enters into a chapter 260E agreement to train new employees for a new product line at one of the taxpayer’s plants. The base employment level on the date of the agreement at plant A is 300 and at plant B is 100. Under the agreement, 20 new employees will be trained for plant B which is greater than a 10 percent increase of the base employment level for plant B. In the year in which the taxpayer elects to take the credit, the employment level at plant A is 290 and at plant B is 120. The credit would be 6 percent of the wages of 10 new employees at plant B as 10 new jobs were created by the industry in the state. A credit for the remaining 10 employees can be taken if the employment level at plant A increases back to 300 during the period of time that the credit can be taken.

42.12(3) *When the credit can be taken.* The taxpayer may elect to take the credit in any tax year which either begins or ends during the period beginning with the date of the agreement and ending with the date by which the project is to be completed under the agreement. However, the taxpayer may not take the credit until the base employment level has been exceeded by at least 10 percent.

EXAMPLE: A taxpayer enters into an agreement to increase employment from a base employment level of 200 employees to 225 employees. In year one of the agreement, the taxpayer hires 20 new employees which is a 10 percent increase over the base employment level but elects not to take the credit. In year two of the agreement, two of the new employees leave employment. The taxpayer elects to take the credit which would be 6 percent of the taxable wages of the 18 employees currently employed. In year three, the taxpayer hires 7 new employees and elects to take the credit. The credit would be 6 percent of the taxable wages of the 7 new employees.

A taxpayer may claim on the taxpayer's individual income tax return the pro rata share of the Iowa new jobs credit from a partnership, subchapter S corporation, estate or trust. The portion of the credit claimed by the individual shall be in the same ratio as the individual's pro rata share of the earnings of the partnership, subchapter S corporation, or estate or trust. All partners in a partnership, shareholders in a subchapter S corporation and beneficiaries in an estate or trust shall elect to take the Iowa new jobs credit the same year.

For tax years beginning prior to January 1, 2007, any Iowa new jobs credit in excess of the individual's tax liability less the credits authorized in Iowa Code sections 422.12 and 422.12B may be carried forward for ten years or until it is used, whichever is the earlier. For tax years beginning on or after January 1, 2007, any Iowa new jobs credit in excess of the individual's tax liability less the credits authorized in Iowa Code section 422.12 may be carried forward for ten years or until it is used, whichever is the earlier.

This rule is intended to implement Iowa Code section 422.11A.
[ARC 8702B, IAB 4/21/10, effective 5/26/10]

701—42.13(422) Earned income credit.

42.13(1) *Tax years beginning before January 1, 2007.* Effective for tax years beginning on or after January 1, 1990, an individual is allowed an Iowa earned income credit equal to a percentage of the earned income credit to which the taxpayer is entitled on the taxpayer's federal income tax return as authorized in Section 32 of the Internal Revenue Code. The Iowa earned income credit is nonrefundable; therefore, the credit may not exceed the remaining income tax liability of the taxpayer after the personal exemption credits and the other nonrefundable credits are deducted. The percentage of the earned income credit for tax years beginning in the 1990 calendar year is 5 percent. The percentage of the earned income credit for tax years beginning on or after January 1, 1991, is 6.5 percent.

For federal income tax purposes, the earned income credit is available for a low-income worker who maintains a household in the United States that is the principal place of abode of the worker and a child or children for more than one-half of the tax year or the worker must have provided a home for the entire tax year for a dependent parent. In addition, the worker must be (1) a married person who files a joint return and is entitled to a dependency exemption for a son or daughter, adopted child or stepchild; (2) a surviving spouse; or (3) an individual who qualifies as a head of household as described in Section 2(b) of the Internal Revenue Code. The federal earned income credit for a taxpayer is determined by computing the taxpayer's earned income on a worksheet provided in the federal income tax return instructions and determining the allowable credit from a table included in the instructions for the 1040 or 1040A. For purposes of the credit, a taxpayer's earned income includes wages, salaries, tips, or other compensation plus net income from self-employment.

In the case of married taxpayers who filed a joint federal return and who elected to file separate state returns or separately on the combined return form, the Iowa earned income credit is allocated between the spouses in the ratio that each spouse's earned income relates to the earned income of both spouses.

Nonresidents and part-year residents of Iowa are allowed the same earned income credits as resident taxpayers.

42.13(2) *Tax years beginning on or after January 1, 2007.* Effective for tax years beginning on or after January 1, 2007, but beginning before January 1, 2013, an individual is allowed an Iowa earned income credit equal to 7 percent of the earned income credit to which the taxpayer is entitled on the taxpayer's federal income tax return as authorized in Section 32 of the Internal Revenue Code. For tax years beginning on or after January 1, 2013, but beginning before January 1, 2014, an individual is allowed an Iowa earned income tax credit equal to 14 percent of the earned income credit to which the taxpayer is entitled on the taxpayer's federal income tax return as authorized in Section 32 of the Internal Revenue Code. For tax years beginning on or after January 1, 2014, an individual is allowed an Iowa earned income tax credit equal to 15 percent of the earned income credit to which the taxpayer is entitled on the taxpayer's federal income tax return as authorized in Section 32 of the Internal Revenue Code. The Iowa earned income credit is refundable; therefore, the credit may exceed the remaining income tax liability of the taxpayer after the personal exemption credits and other nonrefundable credits are deducted.

In the case of married taxpayers who filed a joint federal return and who elected to file separate state returns or separately on the combined return form, the Iowa earned income credit is allocated between the spouses in the ratio that each spouse's earned income relates to the earned income of both spouses.

Nonresidents or part-year residents of Iowa must determine the Iowa earned income tax credit in the ratio of their Iowa source net income to their total source net income. In addition, if nonresidents or part-year residents of Iowa are married and elect to file separate returns or separately on the combined return form, the Iowa earned income credit must be allocated between the spouses in the ratio of each spouse's Iowa source net income to the combined Iowa source net income.

EXAMPLE: A married couple lives in Omaha, Nebraska. One spouse worked in Iowa in 2007 and had wages and other income from Iowa sources of \$12,000. That spouse had a federal adjusted gross income from all sources of \$15,000. The other spouse had no Iowa source net income and had a federal adjusted gross income from all sources of \$10,000. The taxpayers had a federal earned income credit of \$2,800.

The federal earned income credit of \$2,800 multiplied by 7 percent equals \$196. The ratio of Iowa source net income of \$12,000 divided by total source net income of \$25,000 equals 48 percent. The Iowa earned income tax credit equals \$196 multiplied by 48 percent, or \$94.

This rule is intended to implement Iowa Code section 422.12B as amended by 2013 Iowa Acts, Senate File 295.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 1102C, IAB 10/16/13, effective 11/20/13]

701—42.14(15) Investment tax credit—new jobs and income program and enterprise zone program.

42.14(1) *General rule.* An investment tax credit of up to 10 percent of the new investment which is directly related to new jobs created by the location or expansion of an eligible business is available for businesses approved by the economic development authority under the new jobs and income program and the enterprise zone program. The new jobs and income program was repealed on July 1, 2005, and has been replaced with the high quality job creation program. See rule 701—42.29(15) for information on the investment tax credit under the high quality job creation program. Any investment tax credit earned by businesses approved under the new jobs and income program prior to July 1, 2005, remains valid and can be claimed on tax returns filed after July 1, 2005. The credit is available for machinery and equipment or improvements to real property placed in service after May 1, 1994. The credit shall be taken in the year the qualifying asset is placed in service. The enterprise zone program was repealed on July 1, 2014. Any investment tax credit earned by businesses approved under the enterprise zone program prior to July 1, 2014, remains valid and can be claimed on tax returns filed after July 1, 2014. For business applications received by the economic development authority on or after July 1, 1999, purchases of real property made in conjunction with the location or expansion of an eligible business, the cost of land and any buildings and structures located on the land will be considered to be new investment which is directly related to new jobs for purposes of determining the amount of new investment upon which an investment tax credit may be taken. For projects approved on or after July 1, 2005, under the enterprise

zone program, the investment tax credit will be amortized over a five-year period, as described in subrule 42.29(2).

For eligible businesses approved by the Iowa department of economic development on or after March 17, 2004, certain lease payments made by eligible businesses to a third-party developer will be considered to be new investment for purposes of computing the investment tax credit. The eligible business shall enter into a lease agreement with the third-party developer for a minimum of ten years. The investment tax credit is based on the annual base rent paid to a third-party developer by the eligible business for a period not to exceed ten years. The total costs of the annual base rent payments for the ten-year period cannot exceed the cost of the land and the third-party developer's cost to build or renovate the building used by the eligible business. The annual base rent is defined as the total lease payment less taxes, insurance and operating and maintenance expenses.

Any credit in excess of the tax liability for the tax year may be carried forward seven years or until used, whichever is the earlier.

If the business is a partnership, S corporation, limited liability company, or an estate or trust electing to have the income taxed directly to an individual, an individual may claim the credit. The amount of the credit claimed by the individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

42.14(2) Investment tax credit—value-added agricultural products or biotechnology-related processes. For tax years beginning on or after July 1, 2001, an eligible business whose project primarily involves the production of value-added agricultural products may elect to receive a refund for all or a portion of an unused investment tax credit. For tax years beginning on or after July 1, 2001, but before July 1, 2003, an eligible business includes a cooperative described in Section 521 of the Internal Revenue Code which is not required to file an Iowa corporation income tax return and whose project primarily involves the production of ethanol. For tax years beginning on or after July 1, 2003, an eligible business includes a cooperative described in Section 521 of the Internal Revenue Code which is not required to file an Iowa corporation income tax return. For tax years ending on or after July 1, 2005, an eligible business approved under the enterprise zone program whose project primarily involves biotechnology-related processes may elect to receive a refund for all or a portion of an unused investment tax credit.

Eligible businesses shall apply to the Iowa department of economic development for tax credit certificates between May 1 and May 15 of each fiscal year through the fiscal year ending June 30, 2009. The election to receive a refund of all or a portion of an unused investment tax credit is no longer available beginning with the fiscal year ending June 30, 2010. Only those businesses that have completed projects before the May 1 filing date may apply for a tax credit certificate. The Iowa department of economic development will not issue tax credit certificates for more than \$4 million during a fiscal year for this program and eligible businesses described in subrule 42.29(2). If applications are received for more than \$4 million, the applicants shall receive certificates for a prorated amount.

The economic development authority will issue tax credit certificates within a reasonable period of time. Tax credit certificates are valid for the tax year following project completion. The tax credit certificate must be included with the tax return for the tax year during which the tax credit is claimed. The tax credit certificate shall not be transferred, except for a cooperative described in Section 521 of the Internal Revenue Code which is required to file an Iowa corporation income tax return and whose project primarily involves the production of ethanol for tax years beginning on or after January 1, 2002, or for a cooperative described in Section 521 of the Internal Revenue Code which is required to file an Iowa corporation income tax return for tax years beginning on or after July 1, 2003.

For value-added agricultural projects, for a cooperative that is not required to file an Iowa income tax return because it is exempt from federal income tax, the cooperative must submit a list of its members and the share of each member's interest in the cooperative. The Iowa department of economic development will issue a tax credit certificate to each member on the list.

See 701—subrule 52.10(4) for examples illustrating how this subrule is applied.

For tax years beginning on or after January 1, 2002, but before July 1, 2003, a cooperative described in Section 521 of the Internal Revenue Code which is required to file an Iowa corporation income tax return and whose project primarily involves the production of ethanol may elect to transfer all or a portion of its tax credit to its members. For tax years beginning on or after July 1, 2003, a cooperative described in Section 521 of the Internal Revenue Code which is required to file an Iowa corporation income tax return may elect to transfer all or a portion of its tax credit to its members. The amount of tax credit transferred and claimed by a member shall be based upon the pro rata share of the member's earnings in the cooperative. The economic development authority will issue a tax credit certificate to each member of the cooperative to whom the credit was transferred provided that tax credit certificates which total no more than \$4 million are issued during a fiscal year. The tax credit certificate must be included with the tax return for the tax year during which the tax credit is claimed.

42.14(3) Repayment of credits. If an eligible business fails to maintain the requirements of the new jobs and income program or the enterprise zone program, the taxpayer may be required to repay all or a portion of the tax incentives taken on Iowa returns. Irrespective of the fact that the statute of limitations to assess the taxpayer for repayment of the tax credits may have expired, the department may proceed to collect the tax incentives forfeited by failure to maintain the requirements of the new jobs and income program or the enterprise zone program because this repayment is a recovery of an incentive, rather than an adjustment to the taxpayer's tax liability. Details on the calculation of the repayment can be found in 261—subrule 187.5(4) of the administrative rules of the economic development authority. If the business is a partnership, limited liability company, S corporation, estate or trust where the income of the taxpayer is taxed to the individual owner(s) of the business, the department may proceed to collect the tax incentives against the partners, members, shareholders or beneficiaries to whom the tax incentives were passed through. See Decision of the Administrative Law Judge in *Damien & Colette Trebilcock, et al.*, Docket No. 11DORF 042-044, June 11, 2012.

If the eligible business, within five years of purchase, sells, disposes of, razes, or otherwise renders unusable all or a part of the land, buildings, or other existing structures for which a tax credit was claimed under this rule, the income tax liability of the eligible business for the year in which all or part of the property is sold, disposed of, razed, or otherwise rendered unusable shall be increased by one of the following amounts:

- a. One hundred percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within one full year after being placed in service.
- b. Eighty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within two full years after being placed in service.
- c. Sixty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within three full years after being placed in service.
- d. Forty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within four full years after being placed in service.
- e. Twenty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within five full years after being placed in service.

This rule is intended to implement Iowa Code section 15.333 as amended by 2010 Iowa Acts, Senate File 2380.

[**ARC 8702B**, IAB 4/21/10, effective 5/26/10; **ARC 9104B**, IAB 9/22/10, effective 10/27/10; **ARC 1744C**, IAB 11/26/14, effective 12/31/14]

701—42.15(422) Child and dependent care credit. Effective for tax years beginning on or after January 1, 1990, there is a child and dependent care credit which is refundable to the extent the amount of the credit exceeds the taxpayer's income tax liability less other applicable income tax credits.

42.15(1) Computation of the Iowa child and dependent care credit. The Iowa child and dependent care credit is computed as a percentage of the child and dependent care credit which is allowed for federal income tax purposes under Section 21 of the Internal Revenue Code. For taxpayers whose federal child and dependent care credit is limited to their federal tax liability, the Iowa credit shall be computed based on the lesser amount for tax years beginning on or after January 1, 2012, but before January 1,

2015. For tax years beginning on or after January 1, 2015, the Iowa credit is computed without regard to whether or not the federal credit was limited to the taxpayer's federal tax liability. In addition, for tax years beginning on or after January 1, 2015, the Iowa credit will be allowed even if the taxpayer's adjusted gross income is below \$0. The credit is computed so that taxpayers with lower adjusted gross incomes (net incomes in tax years beginning on or after January 1, 1991) are allowed higher percentages of their federal child care credit than taxpayers with higher adjusted gross incomes (net incomes). The following is a schedule showing the percentages of federal child and dependent care credits allowed on the taxpayers' Iowa returns on the basis of the federal adjusted gross incomes (or net incomes) of the taxpayers for tax years beginning on or after January 1, 1993.

*Federal Adjusted Gross Income (Net Income for Tax Years Beginning on or after January 1, 1993)	Percentage of Federal Child and Dependent Care Credit Allowed for 1993 through 2005 Iowa Returns	Percentage of Federal Credit Allowed for 2006 and Later Tax Years
Less than \$10,000	75%	75%
\$10,000 or more but less than \$20,000	65%	65%
\$20,000 or more but less than \$25,000	55%	55%
\$25,000 or more but less than \$35,000	50%	50%
\$35,000 or more but less than \$40,000	40%	40%
\$40,000 or more but less than \$45,000	No Credit	30%
\$45,000 or more	No Credit	No Credit

*Note that in the case of married taxpayers who have filed joint federal returns and elect to file separate returns or separately on the combined return form, the taxpayers must determine the child and dependent care credit by the schedule provided in this rule on the basis of the combined federal adjusted gross income of the taxpayers or their combined net income for tax years beginning on or after January 1, 1991. The credit determined from the schedule must be allocated between the married taxpayers in the proportion that each spouse's federal adjusted gross income relates to the combined federal adjusted gross income of the taxpayers or in the proportion that each spouse's net income relates to the combined net income of the taxpayers in the case of tax years beginning on or after January 1, 1991.

42.15(2) Examples of computation of the Iowa child and dependent care credit. The following are examples of computation of the child and dependent care credit and the allocation of the credit between spouses in situations where married taxpayers have filed joint federal returns and are filing separate Iowa returns or separately on the combined return form. For tax years beginning on or after January 1, 1991, the taxpayers' net incomes are used to compute the Iowa child and dependent care credit and allocate the credit between spouses in situations where the taxpayers file separate Iowa returns or separately on the combined return form.

EXAMPLE A. A married couple has filed a joint federal return on which they showed a federal adjusted gross income of \$40,000 or a combined net income of \$40,000 on their state return for the tax year beginning January 1, 2007. Both spouses were employed. They had a federal child and dependent care credit of \$600 which related to expenses incurred for care of their two small children. One of the spouses had a federal adjusted gross income of \$30,000 or a net income of \$30,000 and the second spouse had a federal adjusted gross income of \$10,000 or a net income of \$10,000.

The taxpayers' Iowa child and dependent care credit was \$180 since they were entitled to an Iowa child and dependent care credit of 30 percent of their federal credit of \$600. If the taxpayers elect to file separate Iowa returns, the \$180 credit would be allocated between the spouses on the basis of each spouse's net income to the combined net income of both spouses as shown below:

$$\begin{aligned}
 \$180 \times \frac{\$30,000}{\$40,000} &= \$135 && \text{child and dependent care credit for spouse} \\
 &&& \text{with \$30,000 net income for 2007} \\
 \\
 \$180 \times \frac{\$10,000}{\$40,000} &= \$45 && \text{child and dependent care credit for spouse} \\
 &&& \text{with \$10,000 net income for 2007}
 \end{aligned}$$

EXAMPLE B. A married couple filed a joint federal return for 2007 and filed their 2007 Iowa return using the married filing separately on the combined return form filing status. Both spouses were employed. They had a federal child and dependent care credit of \$800 which related to expenses incurred for care of their children. One spouse had a net income of \$25,000 and the other spouse had a net income of \$12,500.

The taxpayers' Iowa child and dependent care credit was \$320, since they were entitled to an Iowa credit of 40 percent of their federal credit of \$800. The \$320 credit is allocated between the spouses on the basis of each spouse's net income as it relates to the combined net income of both spouses as shown below:

$$\begin{aligned}
 \$320 \times \frac{\$25,000}{\$37,500} &= \$213 && \text{child and dependent care credit for spouse} \\
 &&& \text{with \$25,000 net income for 2007} \\
 \\
 \$320 \times \frac{\$12,500}{\$37,500} &= \$107 && \text{child and dependent care credit for spouse} \\
 &&& \text{with \$12,500 net income for 2007}
 \end{aligned}$$

42.15(3) *Computation of the Iowa child and dependent care credit for nonresidents and part-year residents.* Nonresidents and part-year residents who have incomes from Iowa sources in the tax year may claim child and dependent care credits on their Iowa returns. To compute the amount of child and dependent care credit that can be claimed on the Iowa return by a nonresident or part-year resident, the following formula shall be used:

Federal child and dependent care credit	×	Percentage of federal child and dependent credit allowed on Iowa return from table in subrule 42.15(1)	×	$\frac{\text{*Iowa net income}}{\text{Federal adjusted grossincome or all source netincome}}$
--	---	--	---	---

*Iowa net income for purposes of determining the child care credit that can be claimed on the Iowa return by a nonresident or part-year resident taxpayer is the total of the Iowa source incomes less the Iowa source adjustments to income on line 26 of the Form IA 126.

In cases where married taxpayers are nonresidents or part-year residents of Iowa and are filing separate Iowa returns or separately on the combined return form, the child and dependent care credit allowable on the Iowa return should be allocated between the spouses in the ratio of the Iowa net income of each spouse to the combined Iowa net income of the taxpayers.

42.15(4) *Example of computation of the Iowa child and dependent care credit for nonresidents and part-year residents.* The following is an example of the computation of the Iowa child and dependent care credit for nonresidents and part-year residents.

A married couple lives in Omaha, Nebraska. One of the spouses worked in Iowa and had wages and other income from Iowa sources or an Iowa net income of \$15,000. That spouse had an all source net income of \$18,000. The second spouse had an Iowa net income of \$10,000 and an all source net income of \$12,000. The taxpayers had a federal child and dependent care credit of \$800 which related to expenses incurred for the care of their two young children. The taxpayers' Iowa child and dependent care credit is calculated below for the 2007 tax year:

Federal child and dependent care credit	Percentage of federal child and dependent credit allowed on Iowa return	Iowa net income <hr style="width: 100%; border: 0.5px solid black; margin: 0;"/> All source net income
\$800	× 50% = \$400	× $\frac{\$25,000}{\$30,000}$ = \$333

The \$333 credit is allocated between the spouses as shown below for the 2007 tax year:

\$333	× $\frac{\$10,000}{\$25,000}$	= \$133 for spouse with Iowa source net income of \$10,000
\$333	× $\frac{\$15,000}{\$25,000}$	= \$200 for spouse with Iowa source net income of \$15,000

This rule is intended to implement Iowa Code section 422.12C as amended by 2014 Iowa Acts, Senate File 2337.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 0337C, IAB 9/19/12, effective 10/24/12; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—42.16(422) Franchise tax credit. For tax years beginning on or after January 1, 1997, a shareholder in a financial institution, as defined in Section 581 of the Internal Revenue Code, which has elected to have its income taxed directly to the shareholders may take a tax credit equal to the shareholder's pro rata share of the Iowa franchise tax paid by the financial institution.

For tax years beginning on or after July 1, 2004, a member of a financial institution organized as a limited liability company that is taxed as a partnership for federal income tax purposes which has elected to have its income taxed directly to its members may take a tax credit equal to the member's pro rata share of the Iowa franchise tax paid by the financial institution.

The credit must be computed by recomputing the amount of tax computed under Iowa Code section 422.5 by reducing the shareholder's or member's taxable income by the shareholder's or member's pro rata share of the items of income and expenses of the financial institution and subtracting the credits allowed in Iowa Code sections 422.12 and 422.12B for tax years beginning prior to January 1, 2007. The recomputed tax must be subtracted from the amount of tax computed under Iowa Code section 422.5 reduced by the credits allowed in Iowa Code sections 422.12 and 422.12B for tax years beginning prior to January 1, 2007. For tax years beginning on or after January 1, 2007, only the credits allowed in Iowa Code section 422.12 are reduced in computing the franchise tax credit.

The resulting amount, not to exceed the shareholder's or member's pro rata share of the franchise tax paid by the financial institution, is the amount of tax credit allowed the shareholder or member.

This rule is intended to implement Iowa Code section 422.11.

[ARC 8702B, IAB 4/21/10, effective 5/26/10]

701—42.17(15E) Eligible housing business tax credit. An individual who qualifies as an eligible housing business may receive a tax credit of up to 10 percent of the new investment which is directly related to the building or rehabilitating of homes in an enterprise zone. The enterprise zone program was repealed on July 1, 2014, and the eligible housing business tax credit has been replaced with the workforce housing tax incentives program. See rule 701—42.53(15) for information on the tax incentives provided under the workforce housing tax incentives program. Any investment tax credit earned by businesses approved under the enterprise zone program prior to July 1, 2014, remains valid and can be claimed on tax returns filed after July 1, 2014. The tax credit may be taken on the tax return for the tax year in which the home is ready for occupancy.

An eligible housing business is one which meets the criteria in 2014 Iowa Code section 15E.193B.

42.17(1) Computation of credit. New investment which is directly related to the building or rehabilitating of homes includes but is not limited to the following costs: land, surveying, architectural services, building permits, inspections, interest on a construction loan, building materials, roofing, plumbing materials, electrical materials, amounts paid to subcontractors for labor and materials provided, concrete, labor, landscaping, appliances normally provided with a new home, heating and cooling equipment, millwork, drywall and drywall materials, nails, bolts, screws, and floor coverings.

New investment does not include the machinery, equipment, or hand or power tools necessary to build or rehabilitate homes.

A taxpayer may claim on the taxpayer's individual income tax return the pro rata share of the Iowa eligible housing business tax credit from a partnership, S corporation, limited liability company, estate, or trust. The portion of the credit claimed by the individual shall be in the same ratio as the individual's pro rata share of the earnings of the partnership, S corporation, limited liability company, or estate or trust, except for projects beginning on or after July 1, 2005, which used low-income housing tax credits authorized under Section 42 of the Internal Revenue Code to assist in the financing of the housing development. For these projects, the partnership, limited liability company or S corporation may designate the amount of the tax credit to be allocated to each partner, member or shareholder.

For tax years beginning prior to January 1, 2007, any Iowa eligible housing business tax credit in excess of the individual's tax liability, less the credits authorized in Iowa Code sections 422.12 and 422.12B, may be carried forward for seven years or until it is used, whichever is the earlier. For tax years beginning on or after January 1, 2007, any Iowa eligible housing business tax credit in excess of the individual's tax liability less the credits authorized in Iowa Code section 422.12 may be carried forward for seven years or until it is used, whichever is the earlier.

If the eligible housing business fails to maintain the requirements of 2014 Iowa Code section 15E.193B, the taxpayer, in order to be an eligible housing business, may be required to repay all or a part of the tax incentives the taxpayer received. Irrespective of the fact that the statute of limitations to assess the taxpayer for repayment of the income tax credit may have expired, the department may proceed to collect the tax incentives forfeited by failure to maintain the requirements of 2014 Iowa Code section 15E.193B. This repayment is required because it is a recovery of an incentive, rather than an adjustment to the taxpayer's tax liability. Details on the calculation of the repayment can be found in 261—subrule 187.5(4) of the administrative rules of the economic development authority. If the business is a partnership, limited liability company, S corporation, estate or trust where the income of the taxpayer is taxed to the individual owner(s) of the business, the department may proceed to collect the tax incentives against the partners, members, shareholders or beneficiaries to whom the tax incentives were passed through. See Decision of the Administrative Law Judge in *Damien & Colette Trebilcock, et al.*, Docket No. 11DORF 042-044, June 11, 2012.

Prior to January 1, 2001, the tax credit cannot exceed 10 percent of \$120,000 for each home or individual unit in a multiple dwelling unit building. Effective January 1, 2001, the tax credit cannot exceed 10 percent of \$140,000 for each home or individual unit in a multiple dwelling unit building.

Effective for tax periods beginning on or after January 1, 2003, the taxpayer must receive a tax credit certificate from the economic development authority to claim the eligible housing business tax credit. The tax credit certificate shall include the taxpayer's name, the taxpayer's address, the taxpayer's tax identification number, the date the project was completed, the amount of the eligible housing business tax credit and the tax year for which the credit may be claimed. In addition, the tax credit certificate shall include a place for the name and tax identification number of a transferee and the amount of the tax credit being transferred, as provided in subrule 42.17(2). The tax credit certificate must be included with the income tax return for the tax period in which the home is ready for occupancy. The administrative rules for the eligible housing business tax credit for the economic development authority may be found under 261—Chapter 59.

42.17(2) Transfer of the eligible housing business tax credit. For tax periods beginning on or after January 1, 2003, the eligible housing business tax credit certificates may be transferred to any person or entity if low-income housing tax credits authorized under Section 42 of the Internal Revenue Code are

used to assist in the financing of the housing development. In addition, the eligible housing business tax credit certificates may be transferred to any person or entity for projects beginning on or after July 1, 2005, if the housing development is located in a brownfield site as defined in Iowa Code section 15.291, or if the housing development is located in a blighted area as defined in Iowa Code section 403.17. No more than \$3 million of tax credits for housing developments located in brownfield sites or blighted areas may be transferred in a calendar year, with no more than \$1.5 million being transferred for any one eligible housing business in a calendar year.

The excess of the \$3 million limitation of tax credits eligible for transfer in the 2013 and 2014 calendar years for housing developments located in brownfield sites or blighted areas cannot be claimed by a transferee prior to January 1, 2016. The eligible housing business must have notified the economic development authority in writing before July 1, 2014, of the business's intent to transfer any tax credits for housing developments located in brownfield sites or blighted areas. If a tax credit certificate is issued by the economic development authority for a housing development approved prior to July 1, 2014, that is located in a brownfield site or blighted area, the tax credit can still be claimed by the eligible business, but the tax credit cannot be transferred by the eligible business if the economic development authority was not notified prior to July 1, 2014.

EXAMPLE 1: A housing development located in a brownfield site was completed in December 2013 and was issued a tax credit certificate totaling \$250,000. The \$3 million calendar cap for transferred tax credits for brownfield sites and blighted areas has already been reached for the 2013 and 2014 tax years. The \$250,000 tax credit is going to be transferred to Bill Smith, and the economic development authority was notified of the transfer prior to July 1, 2014. Once a replacement tax credit certificate has been issued, Mr. Smith cannot file an amended Iowa individual income tax return for the 2013 tax year until January 1, 2016, to claim the \$250,000 tax credit.

EXAMPLE 2: A housing development located in a blighted area was completed in May 2014 and was issued a tax credit certificate totaling \$150,000. The \$3 million calendar cap for transferred tax credits for brownfield sites and blighted areas has already been reached for the 2014 tax year. The \$150,000 tax credit is going to be transferred to Greg Rogers, and the economic development authority was notified of the transfer prior to July 1, 2014. Once a replacement tax credit certificate has been issued, Mr. Rogers cannot file an amended Iowa individual income tax return for the 2014 tax year until January 1, 2016, to claim the \$150,000 tax credit.

Within 90 days of transfer of the tax credit certificate for transfers prior to July 1, 2006, the transferee must submit the transferred tax credit certificate to the economic development authority, along with a statement which contains the transferee's name, address and tax identification number and the amount of the tax credit being transferred. For transfers on or after July 1, 2006, the transferee must submit the transferred tax credit certificate to the department of revenue. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee for transfers prior to July 1, 2006, the economic development authority will issue a replacement tax credit certificate to the transferee. For transfers on or after July 1, 2006, the department of revenue will issue the replacement tax credit certificate to the transferee. If the transferee is a partnership, limited liability company or S corporation, the transferee shall provide a list of the partners, members or shareholders and information on how the housing business tax credit should be divided among the partners, members or shareholders. The transferee shall also provide the tax identification numbers and addresses of the partners, members or shareholders. The replacement tax credit certificate must contain the same information that was on the original certificate and must have the same expiration date as the original tax credit certificate.

The transferee may use the amount of the tax credit for any tax period for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credits shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

This rule is intended to implement 2014 Iowa Code section 15E.193B.
[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—42.18(422) Assistive device tax credit. Effective for tax years beginning on or after January 1, 2000, a taxpayer that is a small business that purchases, rents, or modifies an assistive device or makes workplace modifications for an individual with a disability who is employed or will be employed by the taxpayer may qualify for an assistive device tax credit, subject to the availability of the credit. The assistive device credit is equal to 50 percent of the first \$5,000 paid during the tax year by the small business for the purchase, rental, or modification of an assistive device or for making workplace modifications. Any credit in excess of the tax liability may be refunded or applied to the taxpayer's tax liability for the following tax year. If the taxpayer elects to take the assistive device tax credit, the taxpayer shall not deduct for Iowa income tax purposes any amount of the cost of an assistive device or workplace modification that is deductible for federal income tax purposes. A small business will not be eligible for the assistive device credit if the device is provided for an owner of the small business unless the owner is a bona fide employee of the small business.

42.18(1) Submitting applications for the credit. A small business that wishes to receive the assistive device tax credit must submit an application for the credit to the Iowa department of economic development and provide other information and documents requested by the Iowa department of economic development. If the taxpayer meets the criteria for qualification for the credit, the Iowa department of economic development will issue the taxpayer a certificate of entitlement for the credit. However, the aggregate amount of assistive device tax credits that may be granted by the Iowa department of economic development to all small businesses during a fiscal year cannot exceed \$500,000. The certificate of entitlement for the assistive device credit shall include the taxpayer's name, the taxpayer's address, the taxpayer's tax identification number, the estimated amount of the tax credit, the date on which the taxpayer's application was approved, the date when it is anticipated that the assistive device project will be completed and a space on the application where the taxpayer shall enter the date that the assistive device project was completed. The certificate of entitlement will not be considered to be valid for purposes of claiming the assistive device credit on the taxpayer's Iowa income tax return until the taxpayer has completed the assistive device project and has entered the completion date on the certificate of entitlement form. The tax year of the small business in which the assistive device project is completed is the tax year for which the assistive device credit may be claimed. For example, in a case where taxpayer A received a certificate of entitlement for an assistive device credit on September 15, 2007, and completed the assistive device workplace modification project on January 15, 2008, taxpayer A could claim the assistive device credit on taxpayer A's 2008 Iowa return, assuming that taxpayer A is filing returns on a calendar-year basis.

The department of revenue will not allow the assistive device credit on a taxpayer's return if the certificate of entitlement or a legible copy of the certificate is not included with the taxpayer's income tax return. If the taxpayer has been granted a certificate of entitlement and the taxpayer is a partnership, limited liability company, S corporation, estate, or trust, where the income of the taxpayer is taxed to the individual owner(s) of the business entity, the taxpayer must provide a copy of the certificate to each of the owners with a statement showing how the credit is to be allocated among the individual owners of the business entity. An individual owner shall include a copy of the certificate of entitlement and the statement of allocation of the assistive device credit with the individual's state income tax return.

42.18(2) Definitions. The following definitions are applicable to this rule:

"Assistive device" means any item, piece of equipment, or product system which is used to increase, maintain, or improve the functional capabilities of an individual with a disability in the workplace or on the job. "Assistive device" does not mean any medical device, surgical device, or organ implanted or transplanted into or attached directly to an individual. "Assistive device" does not include any device for which a certificate of title is issued by the state department of transportation, but does include any item, piece of equipment, or product system otherwise meeting the definition of "assistive device" that is incorporated, attached, or included as a modification in or to such a device issued a certificate of title.

"Business entity" means partnership, limited liability company, S corporation, estate, or trust, where the income of the business is taxed to each of the individual owners of the business, whether the individual owner is a partner, member, shareholder, or beneficiary.

“*Disability*” means the same as defined in Iowa Code section 15.102. Therefore, “disability” means, with respect to an individual, a physical or mental impairment that substantially limits one or more of the major life activities of the individual, a record of physical or mental impairment that substantially limits one or more of the major life activities of the individual, or being regarded as an individual with a physical or mental impairment that substantially limits one or more of the major life activities of the individual. “Disability” does not include any of the following:

1. Homosexuality or bisexuality.
2. Transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders, or other sexual behavior disorders.
3. Compulsive gambling, kleptomania, or pyromania.
4. Psychoactive substance abuse disorders resulting from current illegal use of drugs.
5. Alcoholism.

“*Employee*” means an individual who is employed by the small business and who meets the criteria in Treasury Regulation § 31.3401(c)-1(b), which is the definition of an employee for federal income tax withholding purposes. An individual who receives self-employment income from the small business shall not be considered an employee of the small business for purposes of this rule.

“*Small business*” means that the business either had gross receipts in the tax year before the current tax year of \$3 million or less or employed not more than 14 full-time employees during the tax year prior to the current tax year.

“*Workplace modifications*” means physical alterations to the office, factory, or other work environment where the disabled employee is working or will work.

42.18(3) Allocation of assistive tax credit to owners of a business entity. If the taxpayer that was entitled to an assistive device credit is a business entity, the business entity shall allocate the allowable credit to each of the individual owners of the entity on the basis of each owner’s pro rata share of the earnings of the entity to the total earnings of the entity. Therefore, if a partnership has an assistive device credit of \$2,500 for a tax year and one partner of the partnership receives 25 percent of the earnings of the partnership, that partner would receive an assistive device credit for the tax year of \$625 or 25 percent of the total assistive device credit of the partnership.

42.18(4) Repeal of credit. The assistive device credit is repealed on July 1, 2009.

This rule is intended to implement Iowa Code section 422.11E.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—42.19(404A,422) Historic preservation and cultural and entertainment district tax credit for projects with Part 2 applications approved and tax credits reserved prior to July 1, 2014. A historic preservation and cultural and entertainment district tax credit, subject to the availability of the credit, may be claimed against a taxpayer’s Iowa individual income tax liability for 25 percent of the qualified costs of rehabilitation of property to the extent the costs were incurred on or after July 1, 2000, for approved rehabilitation projects of eligible property in Iowa.

The general assembly has mandated that the department of cultural affairs and the department of revenue adopt rules to jointly administer Iowa Code chapter 404A. 2014 Iowa Acts, House File 2453, amended the historic preservation and cultural and entertainment district tax credit program effective July 1, 2014. The department of revenue’s provisions for projects with tax credits reserved prior to July 1, 2014, are found in this rule. The department of revenue’s provisions for projects with agreements entered into on or after July 1, 2014, are found in rule 701—42.54(404A,422). The department of cultural affairs’ rules related to this program may be found at 223—Chapter 48. Division I of 223—Chapter 48 applies to projects with reservations approved prior to July 1, 2014. Division II of 223—Chapter 48 applies to projects with agreements entered into on or after July 1, 2014.

Notwithstanding anything contained herein to the contrary, the department of cultural affairs shall not reserve tax credits under 2013 Iowa Code chapter 404A as amended by 2013 Iowa Acts, chapter 112, section 1, for applicants that do not have an approved Part 2 application and a tax credit reservation on or before June 30, 2014. Projects with approved Part 2 applications and provisional tax credit reservations on or before June 30, 2014, shall be governed by 2013 Iowa Code chapter 404A as amended by 2013

Iowa Acts, chapter 112, section 1; by 223—Chapter 48, Division I; and by rule 701—42.19(404A,422). Projects for which Part 2 applications were approved and agreements entered into after June 30, 2014, shall be governed by 2014 Iowa Acts, House File 2453; by 223—Chapter 48, Division II; and by rule 701—42.54(404A,422).

42.19(1) *Eligible properties for the historic preservation and cultural and entertainment district tax credit.* The following types of property are eligible for the historic preservation and cultural and entertainment district tax credit:

- a. Property verified as listed on the National Register of Historic Places or eligible for such listing.
- b. Property designated as of historic significance to a district listed in the National Register of Historic Places or eligible for such designation.
- c. Property or district designated a local landmark by a city or county ordinance.
- d. Any barn constructed prior to 1937.

42.19(2) *Application and review process for the historic preservation and cultural and entertainment district tax credit.*

a. Taxpayers who want to claim an income tax credit for completing a historic preservation and cultural and entertainment district project must submit an application for approval of the project. The application forms for the historic preservation and cultural and entertainment district tax credit may be requested from the State Tax Credit Program Manager, State Historic Preservation Office, Department of Cultural Affairs, 600 E. Locust, Des Moines, Iowa 50319-0290. The telephone number for this office is (515)281-4137. Applications for the credit will be accepted by the state historic preservation office on or after July 1, 2000, until such time as all the available credits allocated for each fiscal year are encumbered.

b. Applicants for the historic preservation and cultural and entertainment district tax credit must include all information and documentation requested on the application forms for the credit in order for the application to be processed.

42.19(3) *Computation of the amount of the historic preservation and cultural and entertainment district tax credit.* The amount of the historic preservation and cultural and entertainment district tax credit is 25 percent of the qualified rehabilitation costs made to an eligible property in a project. Qualified rehabilitation costs are those rehabilitation costs approved by the state historic preservation office for a project for a particular taxpayer to the extent those rehabilitation costs are actually expended by that taxpayer.

a. In the case of commercial property, qualified rehabilitation costs must equal at least \$50,000 or 50 percent of the assessed value of the property, excluding the value of the land, prior to rehabilitation, whichever is less. In the case of property other than commercial property, the qualified rehabilitation costs must equal at least \$25,000 or 25 percent of the assessed value, excluding the value of the land, prior to the rehabilitation, whichever amount is less.

b. In computing the tax credit, the only costs which may be included are the qualified rehabilitation costs incurred commencing from the date on which the first qualified rehabilitation cost is incurred and ending with the end of the taxable year in which the property is placed in service. The rehabilitation period may include dates that precede approval of a project, provided that any qualified rehabilitation costs incurred prior to the date of approval of the project are qualified rehabilitation costs.

c. For purposes of the historic preservation and cultural and entertainment district tax credit, qualified rehabilitation costs include those costs properly included in the basis of the eligible property for income tax purposes. Costs treated as expenses and deducted in the year paid or incurred and amounts that are otherwise not added to the basis of the property for income tax purposes are not qualified rehabilitation costs. Amounts incurred for architectural and engineering fees, site survey fees, legal expenses, insurance premiums, development fees, and other construction-related costs are qualified rehabilitation costs to the extent they are added to the basis of the eligible property for tax purposes. Costs of sidewalks, parking lots, and landscaping do not constitute qualified rehabilitation costs. Any rehabilitation costs used in the computation of the historic preservation and cultural and entertainment district tax credit are not added to the basis of the property for Iowa income tax purposes if the rehabilitation costs were incurred in a tax year beginning on or after January 1, 2000, but prior

to January 1, 2001. Any rehabilitation costs incurred in a tax year beginning on or after January 1, 2001, are added to the basis of the rehabilitated property for income tax purposes except those rehabilitation expenses that are equal to the amount of the computed historic preservation and cultural and entertainment district tax credit for the tax year.

EXAMPLE: The basis of a commercial building in a historic district was \$500,000, excluding the value of the land, before the rehabilitation project. During a project to rehabilitate this building, \$600,000 in rehabilitation costs were expended to complete the project and \$500,000 of those rehabilitation costs were qualified rehabilitation costs which were eligible for the historic preservation and cultural and entertainment district tax credit of \$125,000. Therefore, the basis of the building for Iowa income tax purposes was \$975,000, since the qualified rehabilitation costs of \$125,000, which are equal to the amount of the historic preservation and cultural and entertainment district tax credit for the tax year, are not added to the basis of the rehabilitated property. The basis of the building for federal income tax purposes was \$1,100,000. It should be noted that this example does not consider any possible reduced basis for the building for federal income tax purposes due to the rehabilitation investment credit provided in Section 47 of the Internal Revenue Code.

42.19(4) *Completion of the historic preservation and cultural and entertainment district project and claiming the historic preservation and cultural and entertainment district tax credit on the Iowa return.* After the taxpayer completes an authorized rehabilitation project, the taxpayer must be issued a certificate of completion of the project from the state historic preservation office of the department of cultural affairs. After verifying the taxpayer's eligibility for the historic preservation and cultural and entertainment district tax credit, the state historic preservation office shall issue a historic preservation and cultural and entertainment district tax credit certificate, which shall be included with the taxpayer's income tax return for the tax year in which the rehabilitation project is completed or the year the credit was reserved, whichever is later. For example, if a project was completed in 2008 and the credit was reserved for the state fiscal year ending June 30, 2010, the credit can be claimed on the 2009 calendar year return that is due on April 30, 2010. The tax credit certificate shall include the taxpayer's name, the taxpayer's address, the taxpayer's tax identification number, the address or location of the rehabilitation project, the date the project was completed, the year the tax credit was reserved and the amount of the historic preservation and cultural and entertainment district tax credit. In addition, the tax credit certificate shall include a place for the name and tax identification number of a transferee, the amount of the tax credit being transferred, and any consideration received in exchange for the tax credit, as provided in subrule 42.19(6). In addition, if the taxpayer is a partnership, limited liability company, estate or trust, where the tax credit is allocated to the owners or beneficiaries of the entity, a list of the owners or beneficiaries and the amount of credit allocated to each owner or beneficiary shall be provided with the certificate. The tax credit certificate shall be included with the income tax return for the period in which the project was completed.

For tax years ending on or after July 1, 2007, any historic preservation and cultural and entertainment district tax credit in excess of the taxpayer's tax liability is fully refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

42.19(5) *Allocation of historic preservation and cultural and entertainment district tax credits to the individual owners of the entity for tax credits reserved for fiscal years beginning on or after July 1, 2012.* For tax credits reserved for fiscal years beginning on or after July 1, 2012, the partnership, limited liability company or S corporation may designate the amount of the tax credit to be allocated to each partner, member or shareholder. The credit does not have to be allocated based on the pro rata share of earnings of the partnership, limited liability company or S corporation.

42.19(6) *Transfer of the historic preservation and cultural and entertainment district tax credit.* For tax periods beginning on or after January 1, 2003, the historic preservation and cultural and entertainment district tax credit certificates may be transferred to any person or entity. A tax credit certificate of less than \$1,000 shall not be transferable.

a. For transfers on or after July 1, 2006, the department of revenue will issue the replacement tax credit certificate to the transferee. Within 90 days of the transfer of the tax credit certificate, the

transferee must submit the transferred tax credit certificate to the department of revenue along with a statement containing the transferee's name, tax identification number and address, the denomination that each replacement tax credit certificate is to carry, the amount of all consideration provided in exchange for the tax credit and the names of recipients of any consideration provided in exchange for the tax credit. If a payment of money was any part of the consideration provided in exchange for the tax credit, the transferee shall list the amount of the payment of money in its statement to the department of revenue. If any part of the consideration provided in exchange for the tax credit included nonmonetary consideration, including but not limited to any promise, representation, performance, discharge of debt or nonmonetary rights or property, the tax credit transferee shall describe the nature of nonmonetary consideration and disclose any value the transferor and transferee assigned to the nonmonetary consideration. The tax credit transferee must indicate on its statement to the department of revenue if no consideration was provided in exchange for the tax credit. If the transferee is a partnership, limited liability company or S corporation, the transferee shall provide a list of the partners, members or shareholders and information on how the historic preservation and cultural and entertainment district tax credit should be divided among the partners, members or shareholders. The transferee shall also provide the tax identification numbers and addresses of the partners, members or shareholders. The replacement tax credit certificate must contain the same information that was on the original certificate and must have the same expiration date as the original tax credit certificate.

b. The transferee may use the amount of the tax credit for any tax period for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

c. If the historic preservation and cultural and entertainment district tax credit of the transferee exceeds the tax liability shown on the transferee's return, the tax credit shall be fully refundable.

This rule is intended to implement Iowa Code chapter 404A as amended by 2013 Iowa Acts, Senate File 436, and Iowa Code section 422.11D.

[**ARC 8702B**, IAB 4/21/10, effective 5/26/10; **ARC 9104B**, IAB 9/22/10, effective 10/27/10; **ARC 9876B**, IAB 11/30/11, effective 1/4/12; **ARC 0398C**, IAB 10/17/12, effective 11/21/12; **ARC 1138C**, IAB 10/30/13, effective 12/4/13; **ARC 1968C**, IAB 4/15/15, effective 5/20/15]

701—42.20(422) Ethanol blended gasoline tax credit. Effective for tax years beginning on or after January 1, 2002, a retail gasoline dealer may claim an ethanol blended gasoline tax credit against that individual's individual income tax liability. The taxpayer must operate at least one retail motor fuel site at which more than 60 percent of the total gallons of gasoline sold and dispensed through one or more motor fuel pumps by the taxpayer in the tax year is ethanol blended gasoline. The tax credit shall be calculated separately for each retail motor fuel site operated by the taxpayer. The amount of the credit for each eligible retail motor fuel site is two and one-half cents multiplied by the total number of gallons of ethanol blended gasoline sold and dispensed through all motor fuel pumps located at that retail motor fuel site during the tax year in excess of 60 percent of all gasoline sold and dispensed through motor fuel pumps at that retail motor fuel site during the tax year.

For taxpayers having a fiscal year ending in 2002, the tax credit is available for each eligible retail motor fuel site based on the total number of gallons of ethanol blended gasoline sold and dispensed through all motor fuel pumps located at the taxpayer's retail motor fuel site from January 1, 2002, until the end of the taxpayer's fiscal year. Assuming a tax period that began on July 1, 2001, and ended on June 30, 2002, the taxpayer would be eligible for the tax credit based on the gallons of ethanol blended gasoline sold from January 1, 2002, through June 30, 2002. For taxpayers having a fiscal year ending in 2002, a claim for refund to claim the ethanol blended gasoline tax credit must be filed before October 1, 2003, even though the statute of limitations for refund set forth in 701—subrule 43.3(8) has not yet expired.

EXAMPLE 1: A taxpayer sold 100,000 gallons of gasoline at the taxpayer's retail motor fuel site during the tax year, 70,000 gallons of which was ethanol blended gasoline. The taxpayer is eligible for the credit since more than 60 percent of the total gallons sold was ethanol blended gasoline. The number

of gallons in excess of 60 percent of all gasoline sold is 70,000 less 60,000, or 10,000 gallons. Two and one-half cents multiplied by 10,000 equals a \$250 credit available.

The credit may be calculated on Form IA 6478. The credit must be calculated separately for each retail motor fuel site operated by the taxpayer. Therefore, if the taxpayer operates more than one retail motor fuel site, it is possible that one retail motor fuel site may be eligible for the credit while another retail motor fuel site may not. The credit may be taken only for those retail motor fuel sites for which more than 60 percent of gasoline sales involves ethanol blended gasoline.

Any credit in excess of the taxpayer's tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

Starting with the 2006 calendar tax year, a taxpayer may claim the ethanol blended gasoline tax credit even if the taxpayer also claims the E-85 gasoline promotion tax credit provided in rule 701—42.31(422) for the same tax year for the same ethanol gallons.

EXAMPLE 2: A taxpayer sold 200,000 gallons of gasoline at a retail motor fuel site in 2006, of which 160,000 gallons was ethanol blended gasoline. Of these 160,000 gallons, 1,000 gallons was E-85 gasoline. Taxpayer is entitled to claim the ethanol blended gasoline tax credit of two and one-half cents multiplied by 40,000 gallons, since this amount constitutes the gallons in excess of 60 percent of the total gasoline gallons sold. Taxpayer may also claim the E-85 gasoline promotion tax credit on the 1,000 gallons of E-85 gasoline sold.

42.20(1) Definitions. The following definitions are applicable to this rule:

"Ethanol blended gasoline" means the same as defined in Iowa Code section 214A.1.

"Gasoline" means any liquid product prepared, advertised, offered for sale or sold for use as, or commonly and commercially used as, motor fuel for use in a spark-ignition, internal combustion engine, and which meets the specifications provided in Iowa Code section 214A.2.

"Motor fuel pump" means a pump, meter, or similar commercial weighing and measuring device used to measure and dispense motor fuel for sale on a retail basis.

"Retail dealer" means a person engaged in the business of storing and dispensing motor fuel from a motor fuel pump for sale on a retail basis, regardless of whether the motor fuel pump is located at a retail motor fuel site including a permanent or mobile location.

"Retail motor fuel site" means a geographic location in Iowa where a retail dealer sells and dispenses motor fuel on a retail basis. For example, tank wagons are considered retail motor fuel sites.

"Sell" means to sell on a retail basis.

42.20(2) Allocation of credit to owners of a business entity. If the taxpayer that was entitled to the ethanol blended gasoline tax credit is a partnership, limited liability company, S corporation, estate, or trust, the business entity shall allocate the allowable credit to each of the individual owners of the entity on the basis of each owner's pro rata share of the earnings of the entity to the total earnings of the entity. Therefore, if a partnership has an ethanol blended gasoline tax credit of \$3,000 and one partner of the partnership receives 25 percent of the earnings of the partnership, that partner would receive an ethanol blended gasoline tax credit for the tax year of \$750 or 25 percent of the total ethanol blended gasoline tax credit of the partnership.

42.20(3) Repeal of ethanol blended gasoline tax credit. The ethanol blended gasoline tax credit is repealed on January 1, 2009. However, the tax credit is available for taxpayers whose fiscal year ends after December 31, 2008, for those ethanol gallons sold beginning on the first day of the taxpayer's fiscal year until December 31, 2008. The ethanol promotion tax credit described in rule 701—42.37(15,422) is available beginning January 1, 2009, for retail dealers of gasoline.

See 701—subrule 52.19(3) for an example illustrating how this subrule is applied.

This rule is intended to implement Iowa Code section 422.11C.

[ARC 8702B, IAB 4/21/10, effective 5/26/10]

701—42.21(15E) Eligible development business investment tax credit. Effective for tax years beginning on or after January 1, 2001, a business which qualifies as an eligible development business may receive a tax credit of up to 10 percent of the new investment which is directly related to the

construction, expansion or rehabilitation of building space to be used for manufacturing, processing, cold storage, distribution, or office facilities.

An eligible development business must be approved by the Iowa department of economic development prior to March 17, 2004, and meet the qualifications of Iowa Code section 15E.193C. Effective March 17, 2004, the eligible development business program is repealed.

New investment includes the purchase price of land and the cost of improvements made to real property. The tax credit may be claimed by an eligible development business in the tax year in which the construction, expansion or rehabilitation is completed.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following seven years or until used, whichever is the earlier.

If the business is a partnership, S corporation, limited liability company, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

If the eligible development business fails to meet and maintain any one of the requirements to be an eligible business, the business shall be subject to repayment of all or a portion of the amount of tax incentives received. For example, if within five years of project completion the development business sells or leases any space to any retail business, the development business shall proportionally repay the value of the investment credit. The proportion of the investment credit that would be due for repayment by an eligible development business for selling or leasing space to a retail business would be determined by dividing the square footage of building space occupied by the retail business by the square footage of the total building space.

An eligible business which is not a development business and which operates in an enterprise zone cannot claim an investment tax credit if the property is owned, or was previously owned, by an approved development business that has already received an investment tax credit. An eligible business which is not a development business can claim an investment tax credit only on additional new improvements made to real property that was not included in the development business's approved application for the investment tax credit.

This rule is intended to implement Iowa Code section 15E.193C.
[ARC 8702B, IAB 4/21/10, effective 5/26/10]

701—42.22(15E,422) Venture capital credits.

42.22(1) *Investment tax credit for an equity investment in a qualifying business or community-based seed capital fund.* See rule 123—2.1(15E) for the discussion of the investment tax credit for an equity investment in a qualifying business or community-based seed capital fund, along with the issuance of tax credit certificates by the Iowa capital investment board, for equity investments made before January 1, 2011. For equity investments made on or after January 1, 2011, see 261—Chapter 115 for information regarding eligibility for qualifying businesses and community-based seed capital funds, applications for the investment tax credit for equity investments in a qualifying business or community-based seed capital fund, and the issuance of tax credit certificates by the economic development authority.

The department of revenue will be notified by the Iowa capital investment board or the economic development authority when the tax credit certificates are issued. The credit is equal to 20 percent of the taxpayer's equity investment in a qualifying business or community-based seed capital fund. An investment shall be deemed to have been made on the same date as the date of acquisition of the equity interest as determined by the Internal Revenue Code. For investments made prior to January 1, 2014, a taxpayer shall not claim the tax credit prior to the third tax year following the tax year in which the investment is made. For investments made in qualifying businesses on or after January 1, 2014, the credit can be claimed in the year of the investment. However, for investments made in qualifying businesses during the 2014 calendar year, the credit cannot be redeemed prior to January 1, 2016. For example, if an individual taxpayer whose tax year ends on December 31, 2012, makes an equity investment during the 2012 calendar year, the individual taxpayer cannot claim the tax credit until the tax year ending December 31, 2015. However, if the taxpayer dies prior to redeeming the tax credit, the remaining tax

credit may be redeemed on the decedent's final income tax return. For fiscal years beginning July 1, 2011, the amount of tax credits authorized cannot exceed \$2 million. The tax credit certificate must be included with the taxpayer's return for the tax year in which the credit may be redeemed as stated on the tax credit certificate.

If a tax credit is carried over and issued for the tax year immediately following the year in which the investment was made because the \$2 million cap has been reached, the tax credit may be claimed by the taxpayer for the third tax year following the tax year for which the credit is issued. For example, if an individual taxpayer makes an equity investment in December 2012 and the \$2 million cap for the fiscal year ending June 30, 2013, had already been reached, the tax credit will be issued for the tax year ending December 31, 2013, and cannot be redeemed until the tax year ending December 31, 2016.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier. The tax credit cannot be carried back to a tax year prior to the tax year in which the taxpayer claims the tax credit. The tax credit is not transferable to any other taxpayer.

For equity investments made in a community-based seed capital fund or equity investments made in a qualifying business on or after January 1, 2004, an individual may claim the credit if the investment was made by a partnership, S corporation, limited liability company, or an estate or trust electing to have the income directly taxed to the individual. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

For equity investments made in a qualifying business prior to January 1, 2004, only direct investments made by an individual are eligible for the investment tax credit. Individuals receiving income from a revocable trust's investment in a qualifying business are eligible for the investment tax credit for the portion of the revocable trust's equity investment in a qualifying business.

42.22(2) *Investment tax credit for an equity investment in a venture capital fund.* See rule 123—3.1(15E) for the discussion of the investment tax credit for an equity investment in a venture capital fund, along with the issuance of tax credit certificates by the Iowa capital investment board. This credit is repealed for investments in venture capital funds made after July 1, 2010.

The department of revenue will be notified by the Iowa capital investment board when the tax credit certificates are issued. The tax credit certificate must be attached to the taxpayer's return for the tax year in which the credit may be redeemed as stated on the tax credit certificate.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier.

For equity investments made in a venture capital fund, an individual may claim the credit if the investment was made by a partnership, S corporation, limited liability company, or an estate or trust electing to have the income directly taxed to the individual. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

42.22(3) *Contingent tax credit for investments in Iowa fund of funds.* See rule 123—4.1(15E) for the discussion of the contingent tax credit available for investments made in the Iowa fund of funds organized by the Iowa capital investment corporation. Tax credit certificates related to the contingent tax credits will be issued by the Iowa capital investment board.

The department of revenue will be notified by the Iowa capital investment board when these tax credit certificates are issued and, if applicable, when they are redeemed. If the tax credit certificate is redeemed, the certificate must be attached to the taxpayer's return for the tax year in which the credit may be redeemed as stated on the tax credit certificate.

If the tax credit certificate is redeemed, any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following seven years or until used, whichever is the earlier.

If the tax credit certificate is redeemed, an individual may claim the credit if the investment was made by a partnership, S corporation, limited liability company, or an estate or trust electing to have the income directly taxed to the individual. The amount claimed by an individual must be based on the

individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

42.22(4) Innovation fund investment tax credit. See 261—Chapter 116 for information regarding eligibility for an innovation fund, applications for the investment tax credit for investments in an innovation fund, and the issuance of tax credit certificates by the economic development authority.

The department of revenue will be notified by the economic development authority when the tax credit certificates are issued. The credit is equal to 20 percent of the taxpayer's equity investment in the form of cash in an innovation fund for tax years beginning and investments made on or after January 1, 2011, and before January 1, 2013. For tax years beginning and investments made on or after January 1, 2013, the taxpayer may claim a tax credit equal to 25 percent of the taxpayer's equity investment in the form of cash in an innovation fund. An investment shall be deemed to have been made on the same date as the date of acquisition of the equity interest as determined by the Internal Revenue Code. A taxpayer shall claim the tax credit for the tax year in which the investment is made. For fiscal years beginning July 1, 2011, the amount of tax credits authorized cannot exceed \$8 million. No tax credit certificates will be issued prior to September 1, 2014. The tax credit certificate must be attached to the taxpayer's return for the tax year in which the investment was made as stated on the tax credit certificate.

If a tax credit is carried over and issued for the tax year immediately following the year in which the investment was made because the \$8 million cap has been reached, the tax credit may be claimed by the taxpayer for the tax year following the tax year for which the credit is issued. For example, if an individual taxpayer makes an equity investment in December 2013 and the \$8 million cap for the fiscal year ending June 30, 2014, had already been reached, the tax credit will be issued for the tax year ending December 31, 2014, and can be redeemed for the tax year ending December 31, 2014.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until depleted, whichever is the earlier. The tax credit cannot be carried back to a tax year prior to the tax year in which the taxpayer claims the tax credit.

The innovation fund tax credit certificate may be transferred once to any person or entity.

Within 90 days of transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department, along with a statement which contains the transferee's name, address and tax identification number and the amount of the tax credit being transferred. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee, the department will issue a replacement tax credit certificate to the transferee. If the transferee is a partnership, limited liability company, S corporation, or estate or trust claiming the credit for individual or corporation income tax, the transferee shall provide a list of the partners, members, shareholders or beneficiaries and information on how the innovation fund tax credit should be divided among the partners, members, shareholders or beneficiaries. The transferee shall also provide the tax identification numbers and addresses of the partners, members, shareholders or beneficiaries. The replacement tax credit certificate must contain the same information as that on the original tax credit certificate and must have the same effective taxable year and the same expiration date as the original tax credit certificate. The replacement tax credit certificate may reflect a different tax type than the original tax credit certificate.

The transferee may use the amount of the tax credit for any tax year for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit certificate shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit certificate shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

For equity investments made in an innovation fund, an individual may claim the credit if the investment was made by a partnership, S corporation, limited liability company, estate or trust electing to have the income directly taxed to the individual. The amount claimed by an individual must be based

on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

This rule is intended to implement Iowa Code sections 15E.51, 15E.52, 15E.66, 422.11F, and 422.11G and section 15E.43 as amended by 2014 Iowa Acts, Senate File 2359.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 9966B, IAB 1/11/12, effective 2/15/12; ARC 1102C, IAB 10/16/13, effective 11/20/13; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—42.23(15) New capital investment program tax credits. Effective for tax periods beginning on or after January 1, 2003, a business which qualifies under the new capital investment program is eligible to receive tax credits. An eligible business under the new capital investment program must be approved by the Iowa department of economic development and meet the qualifications of 2003 Iowa Acts, chapter 125, section 4. The new capital investment program was repealed on July 1, 2005, and has been replaced with the high quality job creation program. See rule 701—42.29(15) for information on the tax credits available under the high quality job creation program. Any tax credits earned by businesses approved under the new capital investment program prior to July 1, 2005, remain valid and can be claimed on tax returns filed after July 1, 2005.

42.23(1) Research activities credit. A business approved under the new capital investment program is eligible for an additional research activities credit as described in 701—subrule 52.7(5). This credit for increasing research activities is in lieu of the research activities credit described in subrule 42.11(3).

42.23(2) Investment tax credit.

a. General rule. An eligible business can claim an investment tax credit equal to a percentage of the new investment directly related to new jobs created by the location or expansion of an eligible business. The percentage is equal to the amount provided in paragraph “b.” New investment directly related to new jobs created by the location or expansion of an eligible business includes the following:

(1) The cost of machinery and equipment, as defined in Iowa Code section 427A.1(1), paragraphs “e” and “j,” purchased for use in the operation of the eligible business. The purchase price shall be depreciated in accordance with generally accepted accounting principles.

(2) The purchase price of real property and any buildings and structures located on the real property.

(3) The cost of improvements made to real property which is used in the operation of the eligible business.

For eligible businesses approved by the Iowa department of economic development on or after March 17, 2004, certain lease payments made by eligible businesses to a third-party developer will be considered to be new investment for purposes of computing the investment tax credit. The eligible business shall enter into a lease agreement with the third-party developer for a minimum of five years. The investment tax credit is based on the annual base rent paid to a third-party developer by the eligible business for a period not to exceed ten years. The total costs of the annual base rent payments for the ten-year period cannot exceed the cost of the land and the third-party developer's cost to build or renovate the building used by the eligible business. The annual base rent is defined as the total lease payment less taxes, insurance and operating and maintenance expenses.

Any credit in excess of the tax liability for the tax period may be carried forward seven years or until used, whichever is the earlier.

If the business is a partnership, S corporation, limited liability company, cooperative organized under Iowa Code chapter 501 and filing as a partnership for federal tax purposes, or estate or trust electing to have the income taxed directly to an individual, an individual may claim the credit. The amount of the credit claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, cooperative organized under Iowa Code chapter 501 and filing as a partnership for federal tax purposes, or estate or trust.

b. Tax credit percentage. The amount of tax credit claimed shall be based on the number of high quality jobs created as determined by the Iowa department of economic development:

(1) If no high quality jobs are created but economic activity within Iowa is advanced, the eligible business may claim a tax credit of up to 1 percent of the new investment.

(2) If 1 to 5 high quality jobs are created, the eligible business may claim a tax credit of up to 2 percent of the new investment.

(3) If 6 to 10 high quality jobs are created, the eligible business may claim a tax credit of up to 3 percent of the new investment.

(4) If 11 to 15 high quality jobs are created, the eligible business may claim a tax credit of up to 4 percent of the new investment.

(5) If 16 or more high quality jobs are created, the eligible business may claim a tax credit of up to 5 percent of the new investment.

c. Investment tax credit—value-added agricultural products or biotechnology-related processes. An eligible business whose project primarily involves the production of value-added agricultural products or uses biotechnology-related processes may elect to receive a refund for all or a portion of an unused investment tax credit. An eligible business includes a cooperative described in Section 521 of the Internal Revenue Code whose project primarily involves the production of ethanol.

Eligible businesses that elect to receive a refund shall apply to the Iowa department of economic development for tax credit certificates between May 1 and May 15 of each fiscal year through the fiscal year ending June 30, 2009. The election to receive a refund of all or a portion of an unused investment tax credit is no longer available beginning with the fiscal year ending June 30, 2010. Only those businesses that have completed projects before the May 1 filing date may apply for a tax credit certificate. The Iowa department of economic development shall not issue tax credit certificates for more than \$4 million during a fiscal year to eligible businesses for this program and eligible businesses described in subrule 42.14(2). If applications are received for more than \$4 million, the applicants shall receive certificates for a prorated amount.

The economic development authority shall issue tax credit certificates within a reasonable period of time. Tax credit certificates are valid for the tax year following project completion. The tax credit certificate must be included with the tax return for the tax year during which the tax credit is claimed. The tax credit certificate shall not be transferred, except for a cooperative described in Section 521 of the Internal Revenue Code whose project primarily involves the production of ethanol, as provided in subrule 42.14(2). For value-added agricultural projects involving ethanol, the cooperative must submit a list of its members and the share of each member's interest in the cooperative. The economic development authority shall issue a tax credit certificate to each member on the list.

d. Repayment of benefits. If an eligible business fails to maintain the requirements of the new capital investment program, the taxpayer may be required to repay all or a portion of the tax incentives taken on Iowa returns. Irrespective of the fact that the statute of limitations to assess the taxpayer for repayment of the tax credits may have expired, the department may proceed to collect the tax incentives forfeited by failure to maintain the requirements of the new capital investment program. This repayment is required because it is a recovery of an incentive, rather than an adjustment to the taxpayer's tax liability. Details on the calculation of the repayment can be found in 261—subrule 187.5(4) of the administrative rules of the economic development authority. If the business is a partnership, limited liability company, S corporation, estate or trust where the income of the taxpayer is taxed to the individual owner(s) of the business, the department may proceed to collect the tax incentives against the partners, members, shareholders or beneficiaries to whom the tax incentives were passed through. See Decision of the Administrative Law Judge in *Damien & Colette Trebilcock, et al.*, Docket No. 11DORF 042-044, June 11, 2012.

An eligible business in the new capital investment program may also be required to repay all or a portion of the tax incentives received on Iowa returns if the eligible business experiences a layoff of employees in Iowa or closes any of its facilities in Iowa.

If, within five years of purchase, the eligible business sells, disposes of, razes, or otherwise renders unusable all or a part of the land, buildings, or other existing structures for which a tax credit was claimed under this subrule, the income tax liability of the eligible business shall be increased by one of the following amounts:

(1) One hundred percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within one full year after being placed in service.

(2) Eighty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within two full years after being placed in service.

(3) Sixty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within three full years after being placed in service.

(4) Forty percent of the tax credit claimed if the property ceases to be eligible for the tax credit within four full years after being placed in service.

(5) Twenty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within five full years after being placed in service.

This rule is intended to implement Iowa Code section 15.333 as amended by 2010 Iowa Acts, Senate File 2380, and sections 15.335 and 15.381 to 15.387.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—42.24(15E,422) Endow Iowa tax credit. Effective for tax years beginning on or after January 1, 2003, a taxpayer who makes an endowment gift to an endow Iowa qualified community foundation may qualify for an endow Iowa tax credit, subject to the availability of the credit. For tax years beginning on or after January 1, 2003, but before January 1, 2010, the credit is equal to 20 percent of a taxpayer's endowment gift to an endow Iowa qualified community foundation approved by the Iowa department of economic development. For tax years beginning on or after January 1, 2010, the credit is equal to 25 percent of a taxpayer's endowment gift to an endow Iowa qualified community foundation approved by the Iowa department of economic development. For tax years beginning on or after January 1, 2010, a taxpayer cannot claim a deduction for charitable contributions under Section 170 of the Internal Revenue Code for the amount of the contribution for which the tax credit is claimed for Iowa tax purposes. The administrative rules for the endow Iowa tax credit for the Iowa department of economic development may be found under 261—Chapter 47.

The total amount of endow Iowa tax credits available is \$2 million in the aggregate for the 2003 and 2004 calendar years. The total amount of endow Iowa tax credits is \$2 million annually for the 2005-2007 calendar years, and \$200,000 of these tax credits on an annual basis is reserved for endowment gifts of \$30,000 or less. The maximum amount of tax credit granted to a single taxpayer shall not exceed \$100,000 for the 2003-2007 calendar years. The total amount of endow Iowa tax credits annually for the 2008 and 2009 calendar years is \$2 million plus a percentage of the tax imposed on the adjusted gross receipts from gambling games in accordance with Iowa Code section 99F.11(3). The total amount of endow Iowa tax credits annually for 2010 is \$2.7 million plus a percentage of the tax imposed on the adjusted gross receipts from gambling games in accordance with Iowa Code section 99F.11(3). The total amount of endow Iowa tax credits annually for 2011 is \$3.5 million plus a percentage of the tax imposed on the adjusted gross receipts from gambling games in accordance with Iowa Code section 99F.11(3). The maximum amount of tax credit granted to a single taxpayer shall not exceed 5 percent of the total endow Iowa tax credit amount authorized for 2008 and subsequent years. For the 2012 calendar year and subsequent calendar years, the total amount of endow Iowa tax credits is \$6 million; the maximum amount of tax credit authorized to a single taxpayer is \$300,000 (\$6 million multiplied by 5 percent). The endow Iowa tax credit cannot be transferred to any other taxpayer.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier.

If a taxpayer is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement Iowa Code section 15E.305 as amended by 2013 Iowa Acts, House File 620, and section 422.11H.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 9876B, IAB 11/30/11, effective 1/4/12; ARC 0398C, IAB 10/17/12, effective 11/21/12; ARC 1138C, IAB 10/30/13, effective 12/4/13]

701—42.25(422) Soy-based cutting tool oil tax credit. Effective for tax periods ending after June 30, 2005, and beginning before January 1, 2007, a manufacturer may claim a soy-based cutting tool oil tax credit. A manufacturer, as defined in Iowa Code section 428.20, may claim the credit equal to the costs incurred during the tax year for the purchase and replacement costs relating to the transition from using nonsoy-based cutting tool oil to using soy-based cutting tool oil.

All of the following conditions must be met to qualify for the tax credit:

1. The costs must be incurred after June 30, 2005, and before January 1, 2007.
2. The costs must be incurred in the first 12 months of the transition from using nonsoy-based cutting tool oil to using soy-based cutting tool oil.
3. The soy-based cutting tool oil must contain at least 51 percent soy-based products.
4. The costs of the purchase and replacement must not exceed \$2 per gallon of soy-based cutting tool oil used in the transition.
5. The number of gallons used in the transition cannot exceed 2,000 gallons.
6. The manufacturer shall not deduct for Iowa income tax purposes the costs incurred in the transition to using soy-based cutting tool oil which are deductible for federal tax purposes.

Any credit in excess of the taxpayer's tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

If a taxpayer is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to an individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement Iowa Code section 422.11I.

[ARC 8702B, IAB 4/21/10, effective 5/26/10]

701—42.26(15I,422) Wage-benefits tax credit. Effective for tax years ending on or after June 9, 2006, a wage-benefits tax credit equal to a percentage of the annual wages and benefits paid for a qualified new job created by the location or expansion of the business in Iowa is available for qualified businesses.

42.26(1) Definitions. The following definitions are applicable to this rule:

"Average county wage" means the annualized average hourly wage calculated by the Iowa department of economic development using the most current four quarters of wage and employment information as provided in the Quarterly Covered Wage and Employment Data report provided by the department of workforce development. Agricultural/mining and governmental employment categories are deleted in compiling the wage information.

"Benefits" means all of the following:

1. Medical and dental insurance plans.
2. Pension and profit-sharing plans.
3. Child care services.
4. Life insurance coverage.
5. Vision insurance plan.
6. Disability coverage.

"Department" means the Iowa department of revenue.

"Full-time" means the equivalent of employment of one person:

1. For 8 hours per day for a five-day, 40-hour workweek for 52 weeks per year, including paid holidays, vacations, and other paid leave, or
2. The number of hours or days per week, including paid holidays, vacations, and other paid leave, currently established by schedule, custom or otherwise, as constituting a week of full-time work for the kind of service an individual performs for an employing unit.

"Grow Iowa values fund" means the grow Iowa values fund created in Iowa Code Supplement section 15G.108.

"Nonqualified new job" means any one of the following:

1. A job previously filled by the same employee in Iowa.
2. A job that was relocated from another location in Iowa.

3. A job that is created as a result of a consolidation, merger, or restructuring of a business entity if the job does not represent a new job in Iowa.

“*Qualified new job*” or “*job creation*” means a job that meets all of the following criteria:

1. Is a new full-time job that has not existed in the business in Iowa within the previous 12 months.
2. Is filled by a new employee for at least 12 months.
3. Is filled by a resident of the state of Iowa.
4. Is not created as a result of a change in ownership.
5. Was created on or after June 9, 2005.

“*Retail business*” means a business which sells its product directly to a consumer.

“*Retained qualified new job*” or “*job retention*” means the continued employment, after the first 12 months of employment, of the same employee in a qualified new job for another 12 months.

“*Service business*” means a business which is not engaged in the sale of tangible personal property, and which provides services to a local consumer market and does not have a significant proportion of its sales coming from outside Iowa.

42.26(2) Calculation of credit. A business which is not a retail or service business may claim the wage-benefits tax credit which is determined as follows:

a. If the annual wages and benefits for the qualified new job equal less than 130 percent of the average county wage, the credit is 0 percent of the annual wage and benefits paid.

b. If the annual wages and benefits for the qualified new job equal at least 130 percent but less than 160 percent of the average county wage, the credit is 5 percent of the annual wage and benefits paid for each qualified new job.

c. If the annual wages and benefits for the qualified new job equal at least 160 percent of the average county wage, the credit is 10 percent of the annual wage and benefits paid for each qualified new job.

If the business is a partnership, S corporation, limited liability company, or estate or trust electing to have the income taxed directly to the individual, an individual may claim the tax credit. The amount claimed by the individual shall be based upon the pro rata share of the individual’s earnings of the partnership, S corporation, limited liability company, or estate or trust.

Any credit in excess of the taxpayer’s tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

42.26(3) Application for the tax credit; tax credit certificate; amount of tax credit available.

a. In order to claim the wage-benefits tax credit, the business must submit an application to the department along with information on the qualified new job or retained qualified new job. The application cannot be submitted until the end of the twelfth month after the qualified job was filled. For example, if the new job was created on June 9, 2005, the application cannot be submitted until June 9, 2006. The following information must be submitted in the application:

- (1) Name, address and federal identification number of the business.
- (2) A description of the activities of the business. If applicable, the proportion of the sales of the business which come from outside Iowa shall be included.
- (3) The amount of wages and benefits paid to each employee for each new job for the previous 12 months.
- (4) A computation of the amount of credit being requested.
- (5) The address and state of residence of each new employee.
- (6) The date that the qualified new job was filled.
- (7) An indication of whether the job is a qualified new job or a retained qualified new job for which an application was filed for a previous year.

(8) The type of tax for which the credit will be applied.

(9) If the business is a partnership, S corporation, limited liability company, or estate or trust, a schedule of the partners, shareholders, members or beneficiaries. This schedule shall include the names, addresses and federal identification numbers of the partners, shareholders, members or beneficiaries, along with their percentage of the pro rata share of earnings of the partnership, S corporation, limited liability company, or estate or trust.

b. Upon receipt of the application, the department has 45 days either to approve or deny the application. If the department does not act on the application within 45 days, the application is deemed approved. If the department denies the application, the business may appeal the decision to the Iowa economic development board within 30 days of the notice of denial.

c. If the application is approved, or if the Iowa economic development board approves the application that was previously denied by the department, a tax credit certificate will be issued by the department to the business, subject to the availability of the amount of credits that may be issued. The tax credit certificate shall contain the name, address and tax identification number of the business (or individual, estate or trust, if applicable), the date of the qualified new job(s), the wage and benefits paid for each job(s) for the 12-month period, the amount of the credit, the tax period for which the credit may be applied, and the type of tax for which the credit will be applied.

d. The tax credit certificates that are issued in a fiscal year cannot exceed \$10 million for the fiscal year ending June 30, 2007, and shall not exceed \$4 million for the fiscal years ending June 30, 2008, through June 30, 2011. The tax credit certificates are issued on a first-come, first-served basis. Therefore, if tax credit certificates have already been issued for the \$10 million limit for the fiscal year ending June 30, 2007, any applications for tax credit certificates received after the \$10 million limit has been reached will be denied. Similarly, if tax credit certificates have already been issued for the \$4 million limit for the fiscal years ending June 30, 2008, through June 30, 2011, any applications for tax credit certificates received after the \$4 million limit has been reached will be denied. If a business failed to receive all or a part of the tax credit due to the \$10 million or \$4 million limitation, the business may reapply for the tax credit for the retained new job for a subsequent tax period.

e. A business which qualifies for the tax credit for the fiscal year ending June 30, 2007, is eligible to receive the tax credit certificate for each of the fiscal years ending June 30, 2008, through June 30, 2011, subject to the \$4 million limit for tax credits for the fiscal years ending June 30, 2008, through June 30, 2011, if the business retains the qualified new job during each of the fiscal years ending June 30, 2008, through June 30, 2011. The business must reapply by June 30 of each fiscal year for the tax credit, and the percentage of the wages and benefits allowed for the credit set forth in subrule 42.26(2) for the first year is applicable for each subsequent period. Preference will be given in issuing tax credit certificates for those businesses that retain qualified new jobs, and preference will be given in the order in which applications were filed for the fiscal year ending June 30, 2007. Therefore, those businesses which received the first \$4 million of tax credits for the year ending June 30, 2007, in which the qualified jobs were created will automatically receive a tax credit for the fiscal years ending June 30, 2008, through June 30, 2011, as long as the qualified jobs are retained and an application is completed.

f. For the fiscal years ending June 30, 2008, through June 30, 2011, if credits become available because the jobs were not retained by businesses which received the first \$4 million of credits for the year ending June 30, 2007, an application which was originally denied will be considered in the order in which the application was received for the fiscal year ending June 30, 2007.

EXAMPLE: Wage-benefits tax credits of \$4 million are issued for the fiscal year ending June 30, 2007, relating to applications filed between July 1, 2006, and March 31, 2007. For the next fiscal year ending June 30, 2008, the same businesses that received the \$4 million in wage-benefits tax credits filed applications totaling \$3 million for the retained jobs for which the application for the prior year was filed on or before March 31, 2007. The first \$3 million of the available \$4 million will be allowed to these same businesses. The remaining \$1 million that is still available for the fiscal year ending June 30, 2008, will be allowed for those retained jobs for which applications for the prior year were filed starting on April 1, 2007, until the remaining \$1 million in tax credits is issued.

g. A business may apply in writing to the Iowa economic development board for a waiver of the average wage and benefit requirement. If a waiver is granted, the business must provide the department with the waiver and it must be attached to the application.

h. A business may receive other federal, state, and local incentives and tax credits in addition to the wage-benefits tax credit. However, a business that receives a wage-benefits tax credit cannot receive tax incentives under the high quality job creation program set forth in Iowa Code chapter 15 or moneys from the grow Iowa values fund.

42.26(4) Examples. The following noninclusive examples illustrate how this rule applies:

EXAMPLE 1: Business A operates a grocery store and hires five new employees, each of whom will earn wages and benefits in excess of 130 percent of the average county wage. Business A would not qualify for the wage-benefits tax credit because Business A is a retail business.

EXAMPLE 2: Business B operates an accounting firm and hires two new accountants, each of whom will earn wages and benefits in excess of 160 percent of the average county wage. The accounting firm provides services to clients wholly within Iowa. Business B would not qualify for the wage-benefits tax credit because it is a service business. The majority of its sales are generated from within the state of Iowa and thus Business B, because it is a service business, is not eligible for the credit.

EXAMPLE 3: Business C operates a software development business and hires two new programmers, each of whom will earn wages and benefits in excess of 160 percent of the average county wage. Over 50 percent of the customers of Business C are located outside Iowa. Business C would qualify for the wage-benefits tax credit because a majority of its sales are coming from outside the state, even though Business C is engaged in the performance of services.

EXAMPLE 4: Business D is a manufacturer that hires a new employee in Clayton County, Iowa, on July 8, 2005. The average county wage for Clayton County for the third quarter of 2005 is \$11.86 per hour. If the average county wage per hour for Clayton County is \$11.95 for the fourth quarter of 2005, \$12.05 for the first quarter of 2006, and \$12.14 for the second quarter of 2006, the annualized average county wage for this 12-month period is \$12.00 per hour. This wage equates to an average annual wage of \$24,960 ($\$12.00 \times 40 \text{ hours} \times 52 \text{ weeks}$). In order for Business D to qualify for the 5 percent wage-benefits tax credit, the new employee must receive wages and benefits totaling \$32,448 (130 percent of \$24,960) for the 12-month period from July 8, 2005, through July 7, 2006. In order for Business D to qualify for the 10 percent wage-benefits tax credit, the new employee must receive wages and benefits totaling \$39,936 (160 percent of \$24,960) for the 12-month period from July 8, 2005, through July 7, 2006.

EXAMPLE 5: Business E is a manufacturer that hires three new employees in Grundy County, Iowa, on July 1, 2005. If the average county wage for the 12-month period from July 1, 2005, through June 30, 2006, is \$13.75 per hour in Grundy County, this wage equates to an average county wage of \$28,600. The wages and benefits for each of these three new employees is \$40,000 for the period from July 1, 2005, through June 30, 2006, which is 140 percent of the average county wage. Business E is entitled to a wage-benefits tax credit of \$2,000 for each employee ($\$40,000 \times 5 \text{ percent}$), for a total wage-benefits tax credit of \$6,000. If Business E files on a calendar-year basis, the \$6,000 wage-benefits tax credit can be claimed on the tax return for the period ending December 31, 2006.

EXAMPLE 6: Business F is a manufacturer that hires ten new employees on July 1, 2005, and qualifies for the wage-benefits tax credit because the wages and benefits paid exceed 130 percent of the average county wage. Business F receives a wage-benefits tax credit in July 2006 for these ten employees, which can be used on the tax return for the period ending December 31, 2006. On August 31, 2006, two of the employees leave the business and are replaced by two new employees. Business F is entitled to a wage-benefits tax credit for only eight employees in July 2007 because only eight employees continued employment for the subsequent 12 months in a job which meets the definition of a retained qualified new job. Business F cannot request a wage-benefits tax credit for the two employees hired on August 31, 2006. Business F cannot request the wage-benefits tax credit because these two full-time jobs existed in the business within the previous 12 months in Iowa, and these jobs do not meet the definition of a qualified new job or retained qualified new job.

EXAMPLE 7: Business G is a manufacturer that hires ten new employees on July 1, 2005, and qualifies for the wage-benefits tax credit because the wages and benefits paid exceed 130 percent of the average county wage. Business G receives a wage-benefits tax credit in July 2006 for these ten employees equal to 5 percent of the wages and benefits paid. On October 1, 2006, Business G hires an additional five employees, each of whom receives wages and benefits in excess of 130 percent of the average county wage. Business G can apply for the wage-benefits tax credit on October 1, 2007, for these five employees, since these employees have now been employed for 12 months. However, the credit may not be allowed

if more than \$4 million of retained job tax credits have been issued for the fiscal year ending June 30, 2008.

EXAMPLE 8: Assume the same facts as Example 6, except that the \$10 million limit of tax credits has already been met for the fiscal year ending June 30, 2007, and Business F hired five new employees on August 31, 2006. Business F can apply for the wage-benefits tax credit for the three employees on August 31, 2007, a number which is above the ten full-time jobs originally created, but Business F may not receive the tax credit if more than \$4 million of retained job tax credits have been issued for the fiscal year ending June 30, 2008.

EXAMPLE 9: Assume the same facts as Example 7, except that the ten employees hired on July 1, 2005, by Business G received wages and benefits equal to 155 percent of the average county wage, and the five employees hired on October 1, 2006, by Business G received wages equal to 161 percent of the average county wage. Business G can apply for the tax credit on October 1, 2007, equal to 10 percent of the wages and benefits paid for the employees hired on October 1, 2006. On July 1, 2007, Business G can reapply for the tax credit equal to 5 percent of the wages and benefits paid only for the ten employees originally hired on July 1, 2005, even if the wages and benefits for these ten employees exceed 160 percent of the average county wage for the period from July 1, 2006, through June 30, 2007.

42.26(5) *Repeal of the wage-benefits tax credit.* The wage-benefits tax credit is repealed effective July 1, 2008. However, the wage-benefits tax credit is still available through the fiscal year ending June 30, 2011, as provided in subrule 42.26(3), paragraphs “d,” “e,” and “f.” A business is not entitled to a wage-benefits tax credit for a qualified new job created on or after July 1, 2008.

This rule is intended to implement Iowa Code chapter 15I and section 422.11L.
[ARC 8702B, IAB 4/21/10, effective 5/26/10]

701—42.27(422,476B) Wind energy production tax credit. Effective for tax years beginning on or after July 1, 2006, an owner of a qualified wind energy production facility that has been approved by the Iowa utilities board may claim a wind energy production tax credit for qualified electricity sold by the owner or used for on-site consumption against a taxpayer’s Iowa individual income tax liability. The administrative rules for the certification of eligibility for the wind energy production tax credit for the Iowa utilities board may be found in rule 199—15.18(476B).

42.27(1) *Application and review process for the wind energy production tax credit.* An owner of a wind energy production facility must be approved by the Iowa utilities board in order to qualify for the wind energy production tax credit. The facility must be an electrical production facility that produces electricity from wind, that is located in Iowa, and that is placed in service on or after July 1, 2005, but before July 1, 2012. For applications filed on or after March 1, 2008, a facility must consist of one or more wind turbines which have a combined nameplate generating capacity of at least 2 megawatts and no more than 30 megawatts. For applications filed on or after July 1, 2009, by a private college or university, community college, institution under the control of the state board of regents, public or accredited nonpublic elementary and secondary school, or public hospital as defined in Iowa Code section 249J.3, the facility must have a combined nameplate generating capacity of no less than $\frac{3}{4}$ of a megawatt.

The maximum amount of nameplate generating capacity for all qualified wind energy production facilities cannot exceed 50 megawatts. An owner shall not own more than two qualified facilities. A facility that is not operational within 18 months after issuance of the approval from the Iowa utilities board will no longer be considered a qualified facility. However, a facility that is not operational within 18 months due to the unavailability of necessary equipment shall be granted an additional 12 months to become operational.

An owner of the qualified facility must apply to the Iowa utilities board for the wind energy production tax credit. The application for the tax credit must be filed no later than 30 days after the close of the tax year for which the credit is applied. The information to be included in the application is set forth in 199—subrule 15.20(1).

42.27(2) *Computation of the credit.* The wind energy production credit equals one cent multiplied by the number of kilowatt-hours of qualified electricity sold or used for on-site consumption by the owner

during the tax year. For the first tax year in which the credit is applied, the kilowatt-hours of qualified electricity sold may exceed 12 months.

EXAMPLE: A qualified facility was placed in service on April 1, 2006, and the taxpayer files on a calendar-year basis. The first year for which the credit can be claimed is the period ending December 31, 2007, since that is the first tax year that began on or after July 1, 2006. The credit for the 2007 tax year can include electricity sold between April 1, 2006, and December 31, 2007.

The credit is not allowed for any kilowatt-hours of electricity sold to a related person. The definition of “related person” uses the same criteria set forth in Section 45(e)(4) of the Internal Revenue Code relating to the federal renewable electricity production credit. Persons shall be treated as related to each other if such persons are treated as a single employer under Treasury Regulation § 1.52-1. In the case of a corporation that is a member of an affiliated group of corporations filing a federal consolidated return, such corporation shall be treated as selling electricity to an unrelated person if such electricity is sold to the person by another member of the affiliated group.

The utilities board will notify the department of the number of kilowatt-hours of electricity sold by the qualified facility or generated and used on site by the qualified facility during the tax year. The department will calculate the credit and issue a tax credit certificate to the owner. The tax credit certificate will include the taxpayer’s name, address and federal identification number, the tax type for which the credit will be claimed, the amount of the credit and the tax year for which the credit may be claimed. In addition, the tax credit certificate will include a place for the name and tax identification number of a transferee and the amount of the tax credit certificate, as provided in subrule 42.27(3). If the department refuses to issue the tax credit certificate, the taxpayer shall be notified in writing and the taxpayer will have 60 days from the date of denial to file a protest in accordance with rule 701—7.8(17A). The department will not issue a tax credit certificate if the facility is not operational within 18 months after approval was given by the utilities board, unless a 12-month extension is granted by the utilities board as provided in subrule 42.27(1).

If the taxpayer is a partnership, limited liability company, S corporation, or estate or trust requesting a credit for individual or corporation income tax, the tax credit certificate will be issued to the partners, members, shareholders or beneficiaries based on the partner’s, member’s, shareholder’s or beneficiary’s pro rata share of earnings of the partnership, limited liability company, S corporation, or estate or trust, except when the taxpayer is eligible to receive renewable electricity production tax credits authorized under Section 45 of the Internal Revenue Code. In cases where the taxpayer is eligible to receive renewable electricity production tax credits under Section 45 of the Internal Revenue Code, the partnership, limited liability company or S corporation may designate the amount of the tax credit to be allocated to each partner, member or shareholder. In addition, if a taxpayer is a partnership, limited liability company, S corporation, or estate or trust that is eligible to receive renewable electricity production tax credits under Section 45 of the Internal Revenue Code, the taxpayer may distribute the tax credit to an equity holder or beneficiary as a liquidating distribution, or portion thereof, of an equity holder’s interest in the partnership, limited liability company or S corporation, or the beneficiary’s interest in the estate or trust.

The credit can be allowed for a ten-year period beginning on the date the qualified facility was originally placed in service. For example, if a facility was placed in service on April 1, 2006, the credit can be claimed for kilowatt-hours of electricity sold between April 1, 2006, and March 31, 2016.

To claim the tax credit, the taxpayer must include the tax credit certificate with the tax return for the tax year set forth on the certificate. Any tax credit in excess of the tax liability may be carried forward for seven years or until it is used, whichever is the earlier.

42.27(3) *Transfer of the wind energy production tax credit certificate.* The wind energy production tax credit certificate may be transferred to any person or entity.

Within 30 days of transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department, along with a statement which contains the transferee’s name, address and tax identification number and the amount of the tax credit being transferred. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee, the department will issue a replacement tax credit certificate to the transferee. If the transferee is a partnership, limited

liability company, S corporation, or estate or trust claiming the credit for individual or corporation income tax, the transferee shall provide a list of the partners, members, shareholders or beneficiaries and information on how the wind energy production tax credit should be divided among the partners, members, shareholders or beneficiaries. The transferee shall also provide the tax identification numbers and addresses of the partners, members, shareholders or beneficiaries. The replacement tax credit certificate must contain the same information as that on the original tax credit certificate and must have the same effective taxable year and the same expiration date as the original tax credit certificate. The replacement tax credit certificate may reflect a different tax type than the original tax credit certificate.

The transferee may use the amount of the tax credit for any tax year for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit certificate shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit certificate shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

This rule is intended to implement Iowa Code section 422.11J and Iowa Code chapter 476B as amended by 2011 Iowa Acts, House File 672.

[**ARC 8702B**, IAB 4/21/10, effective 5/26/10; **ARC 9876B**, IAB 11/30/11, effective 1/4/12; **ARC 0251C**, IAB 8/8/12, effective 9/12/12; **ARC 1744C**, IAB 11/26/14, effective 12/31/14]

701—42.28(422,476C) Renewable energy tax credit. Effective for tax years beginning on or after July 1, 2006, a purchaser or producer of renewable energy whose facility has been approved by the Iowa utilities board may claim a renewable energy tax credit for qualified renewable energy against a taxpayer's Iowa individual income tax liability. The administrative rules for the certification of eligibility for the renewable energy tax credit for the Iowa utilities board may be found in rule 199—15.19(476C).

42.28(1) Application and review process for the renewable energy tax credit. A producer or purchaser of a renewable energy facility must be approved by the Iowa utilities board in order to qualify for the renewable energy credit. The eligible renewable energy facility can be a wind energy conversion facility, biogas recovery facility, biomass conversion facility, methane gas recovery facility, solar energy conversion facility or refuse conversion facility. The facility must be located in Iowa and placed in service on or after July 1, 2005, and before January 1, 2017.

The maximum amount of nameplate generating capacity of all wind energy conversion facilities cannot exceed 363 megawatts. The maximum amount of energy production capacity for biogas recovery facilities, biomass conversion facilities, methane gas recovery facilities, solar energy conversion facilities and refuse conversion facilities cannot exceed a combined output of 53 megawatts of nameplate generating capacity and 167 billion British thermal units of heat for a commercial purpose. A facility that is not operational within 30 months after issuance of approval from the utilities board will no longer be considered a qualified facility. However, if the facility is a wind energy conversion property and is not operational within 18 months due to the unavailability of necessary equipment, the facility may apply for a 12-month extension of the 30-month limit. Extensions can be renewed for succeeding 12-month periods if the facility applies for the extension prior to expiration of the current extension period. A producer of renewable energy, who is the person who owns the renewable energy facility, cannot own more than two eligible renewable energy facilities. A person that has an equity interest equal to or greater than 51 percent in an eligible renewable energy facility cannot have an equity interest greater than 10 percent in any other renewable energy facility.

A producer or purchaser of a renewable energy facility must apply to the utilities board for the renewable energy tax credit. The application for the tax credit must be filed no later than 30 days after the close of the tax year for which the credit is applied. The information to be included in the application is set forth in 199—subrule 15.21(1).

42.28(2) Computation of the credit. The renewable energy tax credit equals 1½ cents per kilowatt-hour of electricity, or 44 cents per 1000 standard cubic feet of hydrogen fuel, or \$4.50 per 1 million British thermal units of methane gas or other biogas used to generate electricity, or \$4.50 per 1 million British thermal units of heat for a commercial purpose generated by and purchased from an eligible renewable energy facility or used for on-site consumption by the producer during the tax year.

For the first tax year in which the credit is applied, the kilowatt-hours, standard cubic feet or British thermal units generated by and purchased from the facility or used for on-site consumption by the producer may exceed 12 months if the facility was operational for fewer than 12 months in its initial year of operation.

EXAMPLE: A qualified wind energy production facility was placed in service on April 1, 2006, and the taxpayer files on a calendar-year basis. The first year for which the credit can be claimed is the year ending December 31, 2007, since that is the first tax year that began on or after July 1, 2006. The credit for the 2007 tax year can include electricity generated and purchased or used for on-site consumption by the producer between April 1, 2006, and December 31, 2007.

The credit is not allowed for any kilowatt-hours, standard cubic feet or British thermal units that are purchased from an eligible facility by a related person. Persons shall be treated as related to each other if either person owns an 80 percent or more equity interest in the other person.

The utilities board will notify the department of the number of kilowatt-hours, standard cubic feet or British thermal units that are generated and purchased from an eligible facility or used for on-site consumption by the producer during the tax year. The department will calculate the credit and issue a tax credit certificate to the purchaser or producer. The tax credit certificate will include the taxpayer's name, address and federal identification number, the tax type for which the credit will be claimed, the amount of the credit and the tax year for which the credit may be claimed. In addition, the tax credit certificate will include a place for the name and tax identification number of a transferee and the amount of the tax credit certificate, as provided in subrule 42.28(3). If the department refuses to issue the tax credit certificate, the taxpayer shall be notified in writing and the taxpayer will have 60 days from the date of denial to file a protest in accordance with rule 701—7.8(17A). The department will not issue a tax credit certificate if the facility is not operational within 30 months after approval was given by the utilities board, unless a 12-month extension is granted by the utilities board as provided in subrule 42.28(1). In addition, the department will not issue a tax credit certificate to any person who received a wind energy production tax credit in accordance with Iowa Code chapter 476B.

If the taxpayer is a partnership, limited liability company, S corporation, or estate or trust requesting a credit for individual or corporation income tax, the tax credit certificate will be issued to the partners, members, shareholders or beneficiaries based on the partner's, member's, shareholder's or beneficiary's pro rata share of earnings of the partnership, limited liability company, S corporation, or estate or trust, except when the taxpayer is eligible to receive renewable electricity production tax credits authorized under Section 45 of the Internal Revenue Code. In cases where the taxpayer is eligible to receive renewable electricity production tax credits under Section 45 of the Internal Revenue Code, the partnership, limited liability company or S corporation may designate the amount of the tax credit to be allocated to each partner, member or shareholder. In addition, if a taxpayer is a partnership, limited liability company, S corporation, or estate or trust that is eligible to receive renewable electricity production tax credits under Section 45 of the Internal Revenue Code, the taxpayer may distribute the tax credit to an equity holder or beneficiary as a liquidating distribution, or portion thereof, of an equity holder's interest in the partnership, limited liability company or S corporation, or the beneficiary's interest in the estate or trust.

The credit can be allowed for a ten-year period beginning on the date the qualified facility was originally placed in service. For example, if a renewable energy facility was placed in service on April 1, 2006, the credit can be claimed for kilowatt-hours, standard cubic feet or British thermal units generated and purchased or used for on-site consumption by the producer between April 1, 2006, and March 31, 2016. Tax credit certificates cannot be issued for renewable energy purchased or produced for on-site consumption after December 31, 2024.

To claim the tax credit, the taxpayer must include the tax credit certificate with the tax return for the tax period set forth on the certificate. Any tax credit in excess of the tax liability may be carried forward for seven years or until it is used, whichever is the earlier.

42.28(3) *Transfer of the renewable energy tax credit certificate.* The renewable energy tax credit certificate may be transferred once to any person or entity. A decision between a producer and purchaser of renewable energy regarding who may claim the tax credit is not considered a transfer.

Within 30 days of transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department, along with a statement which contains the transferee's name, address and tax identification number and the amount of the tax credit being transferred. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee, the department will issue a replacement tax credit certificate to the transferee. If the transferee is a partnership, limited liability company, S corporation, or estate or trust claiming the credit for individual or corporation income tax, the transferee shall provide a list of the partners, members, shareholders or beneficiaries and information on how the renewable energy tax credit should be divided among the partners, members, shareholders or beneficiaries. The transferee shall also provide the tax identification numbers and addresses of the partners, members, shareholders or beneficiaries. The replacement tax credit certificate must contain the same information as that on the original tax credit certificate and must have the same effective taxable year and the same expiration date as the original tax credit certificate. The replacement tax credit certificate may reflect a different tax type than the original tax credit certificate.

The transferee may use the amount of the tax credit for any tax year for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit certificate shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit certificate shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

42.28(4) *Small wind innovation zones.* Effective for tax years beginning on or after January 1, 2009, an owner of a small wind energy system operating within a small wind innovation zone which has been approved by the Iowa utilities board is eligible for the renewable energy tax credit. The administrative rules of the Iowa utilities board for the certification of eligibility for owners of small wind energy systems operating within a small wind innovation zone may be found in rule 199—15.22(476).

This rule is intended to implement Iowa Code section 422.11J and Iowa Code chapter 476C as amended by 2014 Iowa Acts, Senate File 2343.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9876B, IAB 11/30/11, effective 1/4/12; ARC 0251C, IAB 8/8/12, effective 9/12/12; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—42.29(15) High quality job creation program. Effective for tax periods ending on or after July 1, 2005, for programs approved on or after July 1, 2005, but before July 1, 2009, a business which qualifies under the high quality job creation program is eligible to receive tax credits. The high quality job creation program replaces the new jobs and income program and the new capital investment program. An eligible business under the high quality job creation program must be approved by the Iowa department of economic development and meet the qualifications of Iowa Code section 15.329. The administrative rules for the high quality job creation program for the Iowa department of economic development may be found at 261—Chapter 68.

The high quality job creation program was repealed on July 1, 2009, and has been replaced with the high quality jobs program. See rule 701—42.42(15) for information on the investment tax credit and additional research activities credit under the high quality jobs program. Any investment tax credit and additional research activities credit earned by businesses approved under the high quality job creation program prior to July 1, 2009, remains valid and can be claimed on tax returns filed after July 1, 2009.

42.29(1) *Research activities credit.* An eligible business approved under the high quality job creation program is eligible for an additional research activities credit as described in 701—subrule 52.7(4).

Research activities allowable for the Iowa research activities credit include expenses related to the development and deployment of innovative renewable energy generation components manufactured or assembled in Iowa; such expenses related to the development and deployment of innovative renewable energy generation components are not eligible for the federal credit for increasing research activities. For purposes of this subrule, innovative renewable energy generation components do not include components with more than 200 megawatts in installed effective nameplate generating capacity. The research activities credit related to renewable energy generation components under the high quality job creation program and the enterprise zone program shall not exceed \$1 million in the aggregate.

These expenses related to the development and deployment of innovative renewable energy generation components are applicable only to the additional research activities credit set forth in this subrule and are not applicable to the research activities credit set forth in subrule 42.11(3), paragraphs “a” and “b.” The research activities credit is subject to the threshold amounts of qualifying investment set forth in Iowa department of economic development 261—subrule 68.4(7).

42.29(2) Investment tax credit.

a. General rule. An eligible business can claim an investment tax credit equal to a percentage of the new investment directly related to new jobs created by the location or expansion of an eligible business. The percentage is equal to the amount provided in Iowa department of economic development 261—subrule 68.4(7). New investment directly related to new jobs created by the location or expansion of an eligible business includes the following:

(1) The cost of machinery and equipment, as defined in Iowa Code section 427A.1(1), paragraphs “e” and “j,” purchased for use in the operation of the eligible business. The purchase price shall be depreciated in accordance with generally accepted accounting principles.

(2) The purchase price of real property and any buildings and structures located on the real property.

(3) The cost of improvements made to real property which is used in the operation of the eligible business.

In addition, certain lease payments made by eligible businesses to a third-party developer will be considered to be new investment for purposes of computing the investment tax credit. The eligible business shall enter into a lease agreement with the third-party developer for a minimum of five years. The investment tax credit is based on the annual base rent paid to a third-party developer by the eligible business for a period not to exceed ten years. The total costs of the annual base rent payments for the ten-year period cannot exceed the cost of the land and the third-party developer’s cost to build or renovate the building used by the eligible business. The annual base rent is defined as the total lease payment less taxes, insurance and operating and maintenance expenses.

The investment tax credit can be claimed in the tax year in which the qualifying assets are placed in service. The investment tax credit will be amortized over a five-year period. Any credit in excess of the tax liability for the tax period may be carried forward seven years or until used, whichever is the earlier.

EXAMPLE: An eligible business which files tax returns on a calendar-year basis earned \$100,000 of investment tax credits for new investment made in 2006. The business can claim \$20,000 of investment tax credits for each of the years from 2006 through 2010. The \$20,000 of investment tax credit that can be claimed in 2006 can be carried forward to the 2007-2013 tax years if the entire credit cannot be claimed on the 2006 return. Similarly, the \$20,000 investment tax credit that can be claimed in 2007 can be carried forward to the 2008-2014 tax years if the entire credit cannot be claimed on the 2007 return.

If the business is a partnership, S corporation, limited liability company, cooperative organized under Iowa Code chapter 501 and filing as a partnership for federal tax purposes, or estate or trust electing to have the income taxed directly to an individual, an individual may claim the credit. The amount of the credit claimed by an individual must be based on the individual’s pro rata share of the individual’s earnings of the partnership, S corporation, limited liability company, cooperative organized under Iowa Code chapter 501 and filing as a partnership for federal tax purposes, or estate or trust electing to have the income taxed directly to an individual.

b. Investment tax credit—value-added agricultural products or biotechnology-related processes. An eligible business whose project primarily involves the production of value-added agricultural products or uses biotechnology-related processes may elect to receive a refund for all or a portion of an unused investment tax credit. An eligible business includes a cooperative described in Section 521 of the Internal Revenue Code whose project primarily involves the production of ethanol.

Eligible businesses that elect to receive a refund shall apply to the Iowa department of economic development for tax credit certificates between May 1 and May 15 of each fiscal year through the fiscal year ending June 30, 2009. The election to receive a refund of all or a portion of an unused investment tax credit is no longer available beginning with the fiscal year ending June 30, 2010. Only those businesses that have completed projects before the May 1 filing date may apply for a tax credit certificate. The Iowa department of economic development shall not issue tax credit certificates for more than \$4 million

during a fiscal year to eligible businesses for this program and the enterprise zone program described in subrule 42.14(2). If applications are received for more than \$4 million, the applicants shall receive certificates for a prorated amount.

The economic development authority shall issue tax credit certificates within a reasonable period of time. Tax credit certificates are valid for the tax year following project completion. The tax credit certificate must be included with the tax return for the tax year during which the tax credit is claimed. The tax credit certificate shall not be transferred, except for a cooperative described in Section 521 of the Internal Revenue Code whose project primarily involves the production of ethanol, as provided in subrule 42.14(2). For value-added agricultural projects involving ethanol, the cooperative must submit a list of its members and the share of each member's interest in the cooperative. The economic development authority shall issue a tax credit certificate to each member on the list.

c. Repayment of benefits. If an eligible business fails to maintain the requirements of the high quality job creation program, the taxpayer may be required to repay all or a portion of the tax incentives taken on Iowa returns. Irrespective of the fact that the statute of limitations to assess the taxpayer for repayment of the tax credits may have expired, the department may proceed to collect the tax incentives forfeited by failure of the eligible business to maintain the requirements of the high quality job creation program because the repayment is a recovery of an incentive, rather than an adjustment to the taxpayer's tax liability. Details on the calculation of the repayment can be found in 261—subrule 187.5(4) of the administrative rules of the economic development authority. If the business is a partnership, limited liability company, S corporation, estate or trust where the income of the taxpayer is taxed to the individual owner(s) of the business, the department may proceed to collect the tax incentives against the partners, members, shareholders or beneficiaries to whom the tax incentives were passed through. See Decision of the Administrative Law Judge in *Damien & Colette Trebilcock, et al.*, Docket No. 11DORF 042-044, June 11, 2012.

An eligible business in the high quality job creation program may also be required to repay all or a portion of the tax incentives received on Iowa returns if the eligible business experiences a layoff of employees in Iowa or closes any of its facilities in Iowa.

If, within five years of purchase, the eligible business sells, disposes of, razes, or otherwise renders unusable all or a part of the land, buildings, or other existing structures for which a tax credit was claimed under this subrule, the income tax liability of the eligible business shall be increased by one of the following amounts:

- (1) One hundred percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within one full year after being placed in service.
- (2) Eighty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within two full years after being placed in service.
- (3) Sixty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within three full years after being placed in service.
- (4) Forty percent of the tax credit claimed if the property ceases to be eligible for the tax credit within four full years after being placed in service.
- (5) Twenty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within five full years after being placed in service.

42.29(3) Determination of tax credit amounts. The amount of tax credit claimed under the high quality job creation program shall be based on the number of high quality jobs created and the amount of qualifying investment made as determined by the Iowa department of economic development.

a. If the high quality jobs have a starting wage, including benefits, equal to or greater than 130 percent of the average county wage but less than 160 percent of the average county wage, see Iowa department of economic development 261—paragraph 68.4(7)“*a*” for the amount of tax credits that may be claimed.

b. If the high quality jobs have a starting wage, including benefits, equal to or greater than 160 percent of the average county wage, see Iowa department of economic development 261—paragraph 68.4(7)“*b*” for the amount of tax credits that may be claimed.

c. An eligible business approved under the high quality job creation program is not eligible for the wage-benefits tax credit set forth in rule 701—42.26(15I,422).

This rule is intended to implement Iowa Code sections 15.326 to 15.337.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—42.30(15E,422) Economic development region revolving fund tax credit. Effective for tax years ending on or after July 1, 2005, but beginning before January 1, 2010, a taxpayer who makes a contribution to an economic development region revolving fund may claim a tax credit, subject to the availability of the credit. The tax credit is equal to 20 percent of a taxpayer's contribution to the economic development region revolving fund approved by the Iowa department of economic development. The administrative rules for the economic development region revolving fund tax credit for the Iowa department of economic development may be found at 261—Chapter 32. The tax credit is repealed for tax years beginning on or after January 1, 2010.

The total amount of economic development region revolving fund tax credits available shall not exceed \$2 million per fiscal year. The tax credit shall not be carried back to a tax year prior to the year in which the taxpayer redeems the credit. The economic development region revolving fund tax credit is not transferable to any other taxpayer.

Any tax credit in excess of the tax liability for the tax year may be credited to the tax liability for the following ten years or until used, whichever is the earlier.

If a taxpayer is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement Iowa Code sections 15E.232 and 422.11K as amended by 2010 Iowa Acts, Senate File 2380.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9104B, IAB 9/22/10, effective 10/27/10]

701—42.31(422) Early childhood development tax credit. Effective for tax years beginning on or after January 1, 2006, taxpayers may claim a tax credit equal to 25 percent of the first \$1,000 of expenses paid to others for early childhood development for each dependent three to five years of age. The credit is available only to taxpayers whose net income is less than \$45,000. If a taxpayer claims the early childhood development tax credit, the taxpayer cannot claim the child and dependent care credit described in rule 701—42.15(422). The early childhood development tax credit is refundable to the extent that the credit exceeds the taxpayer's income tax liability. For the tax year beginning in the 2006 calendar year only, amounts paid for early childhood development expenses in November and December of 2005 shall be considered paid in 2006 for purposes of computing the credit.

For married taxpayers who elect to file separately on a combined form or elect to file separate returns for Iowa tax purposes, the combined income of the taxpayers must be less than \$45,000 to be eligible for the credit. If the combined income is less than \$45,000, the early childhood development tax credit shall be prorated to each spouse in the proportion that each spouse's respective net income bears to the total combined income.

42.31(1) Expenses eligible for the credit. The following expenses qualify for the early childhood development tax credit, to the extent they are paid during the time period that a dependent is either three, four or five years of age:

a. Expenses for services provided by a preschool, as defined in Iowa Code section 237A.1. The preschool may only provide services for periods of time not exceeding three hours per day.

b. Books that improve child development, including textbooks, music books, art books, teacher editions and reading books.

c. Expenses paid for instructional materials required to be used in a child development or educational lesson activity. These materials include, but are not limited to, paper, notebooks, pencils, and art supplies. In addition, software and toys which are directly and primarily used for educational or learning purposes are considered instructional materials.

- d. Expenses paid for lesson plans and curricula.
- e. Expenses paid for child development and educational activities outside the home. These activities include, but are not limited to, drama, art, music and museum activities, including the entrance fees for such activities.

42.31(2) Expenses not eligible for the credit. The following expenses do not qualify for the early childhood development tax credit:

- a. Any expenses paid to a preschool once a dependent reaches the age of six.
- b. Expenses relating to food, lodging, membership fees, or other nonacademic expenses relating to child development and educational activities outside the home.
- c. Expenses related to services, materials, or activities for the teaching of religious tenets, doctrines, or worship, in cases where the purpose of the teaching is to inculcate the religious tenets, doctrines, or worship.

This rule is intended to implement Iowa Code section 422.12C.
[ARC 8702B, IAB 4/21/10, effective 5/26/10]

701—42.32(422) School tuition organization tax credit. Effective for the tax year beginning on or after January 1, 2006, but beginning before January 1, 2007, a school tuition organization tax credit is available which is equal to 65 percent of the amount of the voluntary cash contributions made by a taxpayer to a school tuition organization. For tax years beginning on or after January 1, 2007, the school tuition organization tax credit is available which is equal to 65 percent of the amount of voluntary cash or noncash contributions made by a taxpayer to a school tuition organization. There are numerous federal revenue regulations, rulings, court cases and other provisions relating to the determination of the value of a noncash contribution, and these are equally applicable to the determination of the amount of a school tuition organization tax credit for tax years beginning on or after January 1, 2007.

42.32(1) Definitions. The following definitions are applicable to this rule:

“Certified enrollment” means the enrollment at schools served by school tuition organizations as of October 1, or the first Monday in October if October 1 falls on a Saturday or Sunday, of the appropriate year.

“Contribution” means a voluntary cash or noncash contribution to a school tuition organization that is not used for the direct benefit of any dependent of the taxpayer or any other student designated by the taxpayer.

“Eligible student” means a student residing in Iowa who is a member of a household whose total annual income during the calendar year prior to the school year in which the student receives a tuition grant from a school tuition organization does not exceed an amount equal to three times the most recently published federal poverty guidelines in the Federal Register by the United States Department of Health and Human Services.

“Qualified school” means a nonpublic elementary or secondary school in Iowa which is accredited under Iowa Code section 256.11, including a prekindergarten program for students who are five years of age by September 15 of the appropriate year, and adheres to the provisions of the federal Civil Rights Act of 1964 and Iowa Code chapter 216, and which is represented by only one school tuition organization.

“School tuition organization” means a charitable organization in Iowa that is exempt from federal taxation under Section 501(c)(3) of the Internal Revenue Code and that does all of the following:

1. Allocates at least 90 percent of its annual revenue in tuition grants for children to allow them to attend a qualified school of their parents’ choice.
2. Awards tuition grants only to children who reside in Iowa.
3. Provides tuition grants to students without limiting availability to students of only one school.
4. Provides tuition grants only to eligible students.
5. Prepares an annual financial statement certified by a public accounting firm.

“Tuition grant” means a grant to a student to cover all or part of the student’s tuition at a qualified school.

42.32(2) Initial registration. In order for contributions to a school tuition organization to qualify for the credit, the school tuition organization must initially register with the department. The following information must be provided with this initial registration:

- a. Verification from the Internal Revenue Service that Section 501(c)(3) status was granted and that the school tuition organization is exempt from federal income tax.
- b. A list of all qualified schools that the school tuition organization serves.
- c. The names and addresses of all the members of the board of directors of the school tuition organization.

Once the school tuition organization is registered with the department, it is not required to subsequently register unless there is a change in the qualified schools that the organization serves. The school tuition organization must notify the department in writing of any changes in the qualified schools it serves.

42.32(3) Participation forms. Each qualified school that is served by a school tuition organization must annually submit a participation form to the department by November 1. The following information must be provided with this participation form:

- a. The certified enrollment of the qualified school as of October 1, or the first Monday in October if October 1 falls on a Saturday or Sunday.
- b. The name of the school tuition organization that represents the qualified school.

For the tax year beginning in the 2006 calendar year only, each qualified school served by a school tuition organization must submit to the department a participation form postmarked on or before August 1, 2006, which provides the certified enrollment as of the third Friday of September 2005, along with the name of the school tuition organization that represents the qualified school.

42.32(4) Authorization to issue tax credit certificates.

- a. By December 1 of each year, the department will authorize school tuition organizations to issue tax credit certificates for the following tax year. For the tax year beginning in the 2006 calendar year only, the department, by September 1, 2006, will authorize school tuition organizations to issue tax credit certificates for the 2006 calendar year only. The total amount of tax credit certificates that may be authorized is \$2.5 million for the 2006 calendar year, \$5 million for the 2007 calendar year, \$7.5 million for the 2008 through 2011 calendar years, \$8.75 million for the 2012 and 2013 calendar years, and \$12 million for 2014 and subsequent calendar years.

- b. The amount of authorized tax credit certificates for each school tuition organization is determined by dividing the total amount of tax credit available by the total certified enrollment of all qualified participating schools. This result, which is the per-student tax credit, is then multiplied by the certified enrollment of each school tuition organization to determine the tax credit authorized to each school tuition organization.

EXAMPLE: For determining the authorized tax credits for the 2008 calendar year, if the certified enrollment of each qualified school in Iowa, as provided to the department by November 1, 2007, was 37,500, the per-student tax credit would be \$200 (\$7.5 million divided by 37,500). If a school tuition organization located in Scott County represents four qualified schools with a certified enrollment of 1,400 students, the school tuition organization would be authorized to issue \$280,000 (\$200 times 1,400) of tax credit certificates for the 2008 calendar year. The department would notify this school tuition organization by December 1, 2007, of the authorization to issue \$280,000 of tax credit certificates for the 2008 calendar year. This authorization would allow the school tuition organization to solicit contributions totaling \$430,769 (\$280,000 divided by 65%) during the 2008 calendar year which would be eligible for the tax credit.

42.32(5) Issuance of tax credit certificates. The school tuition organization shall issue tax credit certificates to each taxpayer who made a cash or noncash contribution to the school tuition organization. The tax credit certificate, which will be designed by the department, will contain the name, address and tax identification number of the taxpayer, the amount and date that the contribution was made, the amount of the credit, the tax year that the credit may be applied, the school tuition organization to which the contribution was made, and the tax credit certificate number.

For tax years beginning on or after July 1, 2009, a tax credit certificate may be issued to corporation income taxpayers. For tax years beginning on or after January 1, 2013, a tax credit certificate may be issued to a partnership, limited liability company, S corporation, estate or trust. The amount of credit claimed by an individual shall be based on the pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, estate or trust.

42.32(6) Claiming the tax credit. The taxpayer must include the tax credit certificate with the tax return for which the credit is claimed. Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier.

a. The taxpayer may not claim an itemized deduction for charitable contributions for Iowa income tax purposes for the amount of the contribution made to the school tuition organization.

b. Married taxpayers who file separate returns or file separately on a combined return must allocate the school tuition organization tax credit to each spouse in the proportion that each spouse's respective net income bears to the total combined net income. Nonresidents or part-year residents of Iowa must determine the school tuition organization tax credit in the ratio of their Iowa source net income to their total source net income. In addition, if nonresidents or part-year residents of Iowa are married and elect to file separate returns or to file separately on a combined return, the school tuition organization tax credit must be allocated between the spouses in the ratio of each spouse's Iowa source net income to the combined Iowa source net income.

42.32(7) Reporting requirements. Each school tuition organization that issues tax credit certificates must report to the department, postmarked by January 12 of each tax year, the following information:

a. The names and addresses of all the members of the board of directors of the school tuition organization, along with the name of the chairperson of the board.

b. The total number and dollar value of contributions received by the school tuition organization for the previous tax year.

c. The total number and dollar value of tax credit certificates issued by the school tuition organization for the previous tax year.

d. A list of each taxpayer who received a tax credit certificate for the previous tax year, including the amount of the contribution and the amount of tax credit issued to each taxpayer for the previous tax year. This list should also include the tax identification number of the taxpayer and the tax credit certificate number for each certificate.

e. The total number of children utilizing tuition grants for the school year in progress as of January 12, along with the total dollar value of the tuition grants.

f. The name and address of each qualified school represented by the school tuition organization at which tuition grants are being utilized for the school year in progress.

g. The number of tuition grant students and the total dollar value of tuition grants being utilized for the school year in progress at each qualified school served by the school tuition organization.

This rule is intended to implement Iowa Code section 422.11S as amended by 2013 Iowa Acts, House File 625.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9876B, IAB 11/30/11, effective 1/4/12; ARC 1102C, IAB 10/16/13, effective 11/20/13; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—42.33(422) E-85 gasoline promotion tax credit. Effective for tax years beginning on or after January 1, 2006, a retail dealer of gasoline may claim an E-85 gasoline promotion tax credit. "E-85 gasoline" means ethanol blended gasoline formulated with a minimum percentage of between 70 percent and 85 percent of volume of ethanol, if the formulation meets the standards provided in Iowa Code section 214A.2. For purposes of this rule, tank wagon sales are considered retail sales. The credit is calculated on Form IA 135. The credit is calculated by multiplying the total number of E-85 gallons sold by the retail dealer during the tax year by the following designated rates:

Calendar years 2006, 2007 and 2008	25 cents
Calendar years 2009 and 2010	20 cents
Calendar year 2011	10 cents
Calendar years 2012 through 2017	16 cents

A taxpayer may claim the E-85 gasoline promotion tax credit even if the taxpayer also claims the ethanol blended gasoline tax credit provided in rule 701—42.20(422) for gallons sold prior to January 1, 2009, or the ethanol promotion tax credit provided in rule 701—42.39(422) for gallons sold on or after January 1, 2009, for the same tax year for the same ethanol gallons.

Any credit in excess of the taxpayer's tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

EXAMPLE: A taxpayer operated one retail motor fuel site in 2008 and sold 200,000 gallons of gasoline, of which 160,000 gallons was ethanol blended gasoline. Of these 160,000 gallons, 1,000 gallons was E-85 gasoline. Taxpayer may claim the E-85 gasoline promotion tax credit on the 1,000 gallons of E-85 gasoline sold during 2008. Taxpayer is also entitled to claim the ethanol blended gasoline tax credit of two and one-half cents multiplied by 40,000 gallons, since this constitutes the gallons in excess of 60 percent of the total gasoline gallons sold for the 2008 tax year.

42.33(1) Fiscal year filers. For taxpayers whose tax year is not on a calendar-year basis, the taxpayer may compute the tax credit on the gallons of E-85 gasoline sold during the year using the designated rates as shown above. Because the tax credit is repealed on January 1, 2018, a taxpayer whose tax year ends prior to December 31, 2017, may continue to claim the tax credit in the following tax year for any E-85 gallons sold through December 31, 2017. For a retail dealer whose tax year is not on a calendar-year basis and who did not claim the E-85 credit on the previous return, the dealer may claim the credit for the current tax year for the period beginning on January 1 of the previous tax year until the last day of the previous tax year.

See 701—subrule 52.30(1) for examples illustrating how this subrule is applied.

42.33(2) Allocation of credit to owners of a business entity. If a taxpayer claiming the E-85 ethanol promotion tax credit is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement Iowa Code section 422.110 as amended by 2011 Iowa Acts, Senate File 531.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9821B, IAB 11/2/11, effective 12/7/11]

701—42.34(422) Biodiesel blended fuel tax credit. Effective for tax years beginning on or after January 1, 2006, a retail dealer of biodiesel blended fuel may claim a biodiesel blended fuel tax credit. "Biodiesel blended fuel" means a blend of biodiesel with petroleum-based diesel fuel which meets the standards provided in Iowa Code section 214A.2. The biodiesel blended fuel must be formulated with a minimum percentage of 2 percent by volume of biodiesel, if the formulation meets the standards provided by Iowa Code section 214A.2, to qualify for the tax credit for gallons sold on or after January 1, 2006, but before January 1, 2013. For gallons sold on or after January 1, 2013, but before January 1, 2018, the biodiesel blended fuel must be formulated with a minimum percentage of 5 percent by volume of biodiesel, if the formulation meets the standards provided by Iowa Code section 214A.2, to qualify for the tax credit. In addition, of the total gallons of diesel fuel sold by the retail dealer, 50 percent or more must be biodiesel blended fuel to be eligible for the tax credit for tax years beginning prior to January 1, 2009. For tax years beginning on or after January 1, 2009, but before January 1, 2012, the biodiesel blended fuel tax credit is calculated separately for each retail motor fuel site for which 50 percent or more of the total gallons of diesel fuel sold at the motor fuel site was biodiesel blended fuel. For tax years beginning on or after January 1, 2012, the requirement that 50 percent of all diesel fuel gallons sold be biodiesel gallons to be eligible for the tax credit is eliminated.

The tax credit equals three cents multiplied by the qualifying number of biodiesel blended fuel gallons sold by the taxpayer during the tax year for gallons sold through December 31, 2011. For gallons sold during the 2012 calendar year, the tax credit equals the sum of two cents multiplied by the qualifying number of biodiesel blended fuel gallons that have a minimum percentage of 2 percent by volume of biodiesel but less than 5 percent by volume of biodiesel and four and one-half cents multiplied by the qualifying number of biodiesel blended fuel gallons that have a minimum percentage of 5 percent by volume of biodiesel. For gallons sold during the 2013 to 2017 calendar years, the tax credit equals four and one-half cents multiplied by the qualifying number of biodiesel blended fuel gallons that have a minimum percentage of 5 percent by volume of biodiesel. In determining the minimum percentage by volume of biodiesel, the department will take into account reasonable variances due to testing and other limitations. For purposes of this rule, tank wagon sales are considered retail sales. The credit is calculated on Form IA 8864.

Any credit in excess of the taxpayer's tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

EXAMPLE: A taxpayer operated four retail motor fuel sites during 2008 and sold a combined total at all four sites of 100,000 gallons of diesel fuel, of which 55,000 gallons was biodiesel blended fuel containing a minimum percentage of 2 percent by volume of biodiesel. Because 50 percent or more of the diesel fuel sold was biodiesel blended fuel, the taxpayer may claim the biodiesel blended fuel tax credit totaling \$1,650, which is 55,000 gallons multiplied by three cents.

EXAMPLE: A taxpayer operated two retail motor fuel sites during 2008, and each site sold 40,000 gallons of diesel fuel. One site sold 25,000 gallons of biodiesel blended fuel, and the other site sold 10,000 gallons of biodiesel blended fuel. The taxpayer would not be eligible for the biodiesel blended fuel tax credit because only 35,000 gallons of the total 80,000 gallons, or 43.75 percent of the total diesel fuel gallons sold, was biodiesel blended fuel. The 50 percent requirement is based on the aggregate number of diesel fuel gallons sold by the taxpayer, and the fact that one retail motor fuel site met the 50 percent requirement does not allow the taxpayer to claim the biodiesel blended fuel tax credit for the 2008 tax year. If the facts in this example had occurred during the 2009 tax year, the taxpayer could claim a biodiesel blended fuel tax credit totaling \$750, which is 25,000 gallons multiplied by three cents, since one of the retail motor fuel sites met the 50 percent biodiesel blended fuel requirement.

42.34(1) Fiscal year filers. Taxpayers whose tax year is not on a calendar-year basis and whose tax year ends before December 31, 2006, may compute the tax credit on the gallons of biodiesel blended fuel sold during the period from January 1, 2006, through the end of the tax year, provided that 50 percent of all diesel fuel sold during that period was biodiesel blended fuel. Because the tax credit is repealed on January 1, 2018, a taxpayer whose tax year ends prior to December 31, 2017, may continue to claim the tax credit in the following tax year for any biodiesel blended fuel sold through December 31, 2017.

See 701—subrule 52.31(1) for examples illustrating how this subrule is applied.

42.34(2) Allocation of credit to owners of a business entity. If a taxpayer claiming the biodiesel blended fuel tax credit is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement Iowa Code section 422.11P as amended by 2011 Iowa Acts, Senate Files 531 and 533.

[**ARC 8702B**, IAB 4/21/10, effective 5/26/10; **ARC 9821B**, IAB 11/2/11, effective 12/7/11]

701—42.35(422) Soy-based transformer fluid tax credit. Effective for tax periods ending after June 30, 2006, and beginning before January 1, 2009, an electric utility may claim a soy-based transformer fluid tax credit. An electric utility, which is a public utility, city utility, or electric cooperative which furnishes electricity, may claim a credit equal to the costs incurred during the tax year for the purchase and replacement costs relating to the transition from using nonsoy-based transformer fluid to using soy-based transformer fluid.

42.35(1) Eligibility requirements for the tax credit. All of the following conditions must be met for the electric utility to qualify for the soy-based transformer fluid tax credit.

- a. The costs must be incurred after June 30, 2006, and before January 1, 2009.
- b. The costs must be incurred in the first 18 months of the transition from using nonsoy-based transformer fluid to using soy-based transformer fluid.
- c. The soy-based transformer fluid must be dielectric fluid that contains at least 98 percent soy-based products.
- d. The costs of the purchase and replacement must not exceed \$2 per gallon of soy-based transformer fluid used in the transition.
- e. The number of gallons used in the transition must not exceed 20,000 gallons per electric utility, and the total number of gallons eligible for the credit must not exceed 60,000 gallons in the aggregate.
- f. The electric utility shall not deduct for Iowa income tax purposes the costs incurred in the transition to using soy-based transformer fluid which are deductible for federal income tax purposes.

42.35(2) Applying for the tax credit. An electric utility must apply to the department for the soy-based transformer fluid tax credit. The application for the tax credit must be filed no later than 30 days after the close of the tax year for which the credit is claimed. The application must include the following information:

- a. A copy of the signed purchase agreement or other agreement to purchase soy-based transformer fluid.
- b. The number of gallons of soy-based transformer fluid purchased during the tax year, along with the cost per gallon of each purchase made during the tax year.
- c. The name, address, and tax identification number of the electric utility.
- d. The type of tax for which the credit will be claimed, and the first year in which the credit will be claimed.
- e. If the application is filed by a partnership, limited liability company, S corporation, or estate or trust requesting a credit for individual or corporation income tax, a list of the partners, members, shareholders or beneficiaries of the entity. This list shall include the name, address, tax identification number and pro rata share of earnings from the entity for each of the partners, members, shareholders or beneficiaries.

42.35(3) Claiming the tax credit. After the application is reviewed, the department will issue a tax credit certificate to the electric utility. The tax credit certificate will include the taxpayer's name, address and federal identification number, the tax type for which the credit will be claimed, the amount of the credit and the tax year for which the credit may be claimed. Once the tax credit certificate is issued, the credit may be claimed only against the type of tax reflected on the certificate. If the department refuses to issue the tax credit certificate, the taxpayer shall be notified in writing; and the taxpayer will have 60 days from the date of denial to file a protest in accordance with rule 701—7.8(17A).

If the taxpayer is a partnership, limited liability company, S corporation, or estate or trust requesting a credit for individual or corporation income tax, the tax credit certificate will be issued to the partners, members, shareholders or beneficiaries based on the partner's, member's, shareholder's or beneficiary's pro rata share of earnings of the partnership, limited liability company, S corporation, or estate or trust.

Any credit in excess of the taxpayer's tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

This rule is intended to implement Iowa Code section 422.11R.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—42.36(16,422) Agricultural assets transfer tax credit and custom farming contract tax credit.

42.36(1) Agricultural assets transfer tax credit. For tax years beginning on or after January 1, 2007, but before January 1, 2013, an owner of agricultural assets that rents assets to qualified beginning farmers may claim an agricultural assets transfer tax credit for Iowa individual income tax equal to 5 percent of the rental income received by the owner for cash rental agreements and 15 percent of the rental income received by the owner for commodity share agreements. Effective for tax years beginning on or after January 1, 2013, an owner of agricultural assets that rents assets to qualified beginning farmers may claim

an agricultural assets transfer tax credit for Iowa individual income tax equal to 7 percent of the rental income received by the owner for cash rental agreements and 17 percent of the rental income received by the owner for commodity share agreements.

Also effective for tax years beginning on or after January 1, 2013, if the beginning farmer is a veteran, the credit is equal to 8 percent of the rental income received by the owner for cash rental agreements, and the credit is equal to 18 percent of the rental income received by the owner for commodity share agreements for the first year that the credit is allowed. However, the taxpayer may only claim 7 percent of the rental income for cash rental agreements and 17 percent of the rental income for commodity share agreements in subsequent years if the agreement is renewed or a new agreement is executed by the same parties. The administrative rules for the agricultural assets transfer tax credit for the Iowa finance authority may be found under 265—Chapter 44.

To qualify for the tax credit, an owner of agricultural assets must enter into a lease or rental agreement with a beginning farmer for a term of at least two years, but not more than five years. Both the owner of agricultural assets and the beginning farmer must meet certain qualifications set forth by the Iowa finance authority, and the beginning farmer must be eligible to receive financial assistance under Iowa Code section 16.75.

The Iowa finance authority will issue a tax credit certificate to the owner of agricultural assets which will include the name, address and tax identification number of the owner, the amount of the credit, and the tax period for which the credit may be applied. To claim the tax credit, the owner must include the tax credit certificate with the tax return for the tax period set forth on the certificate. The tax credit certificates will be issued on a first-come, first-served basis. For fiscal years beginning on or after July 1, 2009, but before July 1, 2013, the amount of tax credit certificates issued by the Iowa agricultural development authority for the agricultural assets transfer tax credit program cannot exceed \$6 million. For fiscal years beginning on or after July 1, 2013, the amount of the tax credit certificates issued by the Iowa finance authority for the agricultural assets transfer tax credit program cannot exceed \$8 million and the amount of the credit issued to an individual taxpayer cannot exceed \$50,000. However, effective December 31, 2017, the amount of tax credits issued by the Iowa finance authority for the agricultural assets transfer tax credit shall revert back to \$6 million.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier. However, for any agricultural assets transfer tax credits originally issued for tax years beginning on or after January 1, 2008, any credit in excess of the tax liability may be credited to the tax liability for the following ten years. The tax credit shall not be carried back to a tax year prior to the year in which the owner redeems the credit. The credit is not transferable to any other person other than the taxpayer's estate or trust upon the death of the taxpayer.

If an owner of agricultural assets is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

The lease or rental agreement may be terminated by either the owner or the beginning farmer. If the Iowa finance authority determines that the owner is not at fault for the termination, the authority will not issue a tax credit certificate for subsequent years, but any prior tax credit certificates issued will be allowed. If the Iowa finance authority determines that the owner is at fault for the termination, any prior tax credit certificates will be disallowed. The amount of tax credits previously allowed will be recaptured, and the owner will be required to repay the entire amount of tax credits previously claimed on Iowa returns.

42.36(2) Custom farming contract tax credit. Effective for tax years beginning on or after January 1, 2013, a landowner that hires a beginning farmer to custom farm agricultural land in this state may claim a custom farming contract tax credit for Iowa individual income tax. The credit is equal to 7 percent of the value of the contract. If the beginning farmer is a veteran, the credit is equal to 8 percent of the value of the contract for the first year. However, the taxpayer may only claim 7 percent of the value of the contract in subsequent years if the agreement is renewed or a new agreement is executed by the

same parties. The administrative rules for the custom farming contract tax credit for the Iowa finance authority may be found under 265—Chapter 44.

To qualify for the tax credit, the taxpayer must enter into a lease or rental agreement with a beginning farmer for a term of at least two years but not more than five years. Both the taxpayer and the beginning farmer must meet certain qualifications set forth by the Iowa finance authority, and the beginning farmer must be eligible to receive financial assistance under Iowa Code section 16.75.

The Iowa finance authority will issue a tax credit certificate to the taxpayer which will include the name, address and tax identification number of the owner, the amount of the credit, and the tax period for which the credit may be applied. To claim the tax credit, the owner must include the tax credit certificate with the tax return for the tax period set forth on the certificate. For fiscal years beginning on or after July 1, 2013, the amount of tax credit certificates issued by the Iowa finance authority for the custom farming contract tax credit program cannot exceed \$4 million, and the credit certificates will be issued on a first-come, first-served basis. The amount of the credit issued to an individual taxpayer cannot exceed \$50,000. However, effective December 31, 2017, the Iowa finance authority will no longer issue custom farming contract tax credits.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following ten years or until used, whichever is the earlier. The tax credit shall not be carried back to a tax year prior to the year in which the owner redeems the credit. The credit is not transferable to any other person other than the taxpayer's estate or trust upon the death of the taxpayer.

If the party entering into the custom farming contract with the beginning farmer is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

The custom farming contract may be terminated by either the taxpayer or the beginning farmer. If the Iowa finance authority determines that the taxpayer is not at fault for the termination, the authority will not issue a tax credit certificate for subsequent years, but any prior tax credit certificates issued will be allowed. If the Iowa finance authority determines that the taxpayer is at fault for the termination, any prior tax credit certificates will be disallowed. The amount of tax credits previously allowed will be recaptured, and the taxpayer will be required to repay the entire amount of tax credits previously claimed on Iowa returns.

This rule is intended to implement Iowa Code section 422.11M; 2014 Iowa Acts, Senate File 2328, sections 60 and 61, as amended by 2014 Iowa Acts, House File 2454; and 2014 Iowa Acts, Senate File 2328, sections 120 and 122.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 1138C, IAB 10/30/13, effective 12/4/13; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—42.37(15,422) Film qualified expenditure tax credit. Effective for tax years beginning on or after January 1, 2007, a film qualified expenditure tax credit is available for individual income tax. The tax credit cannot exceed 25 percent of the taxpayer's qualified expenditures in a film, television, or video project registered with the film office of the Iowa department of economic development (IDED). The film office may negotiate the amount of the tax credit. The administrative rules for the film qualified expenditure tax credit for IDED may be found at 261—Chapter 36.

42.37(1) Qualified expenditures. A qualified expenditure is a payment to an Iowa resident or an Iowa-based business for the sale, rental or furnishing of tangible personal property or services directly related to the registered project. The qualified expenditures include, but are not limited to, the following:

1. Aircraft.
2. Vehicles.
3. Equipment.
4. Materials.
5. Supplies.
6. Accounting services.

7. Animals and animal care services.
8. Artistic and design services.
9. Graphics.
10. Construction.
11. Data and information services.
12. Delivery and pickup services.
13. Labor and personnel. For limitations on the amount of labor and personnel expenditures, see Iowa department of economic development 261—paragraph 36.7(2)“b.”
14. Lighting services.
15. Makeup and hairdressing services.
16. Film.
17. Music.
18. Photography.
19. Sound.
20. Video and related services.
21. Printing.
22. Research.
23. Site fees and rental.
24. Travel related to Iowa distant locations.
25. Trash removal and cleanup.
26. Wardrobe.

A detailed list of all qualified expenditures for each of these categories is available from the film office of IDEED.

42.37(2) *Claiming the tax credit.* Upon completion of the registered project in Iowa, the taxpayer must submit, in a format approved by IDEED prior to production, a listing of the qualified expenditures. Upon verification of the qualified expenditures, IDEED will issue a tax credit certificate to the taxpayer. The certificate will list the taxpayer’s name, address, and tax identification number; the date of project completion; the amount of the credit; the tax period for which the credit may be applied; and the type of tax for which the credit will be applied.

If the taxpayer is a partnership, limited liability company, S corporation, or estate or trust requesting a credit for individual or corporation income tax, the tax credit certificate will be issued to the partners, members, shareholders or beneficiaries based on each partner’s, member’s, shareholder’s or beneficiary’s pro rata share of earnings of the partnership, limited liability company, S corporation, or estate or trust.

To claim the tax credit, the taxpayer must include the tax credit certificate with the tax return for the tax period set forth on the certificate. Any tax credit in excess of the tax liability may be carried forward for five years or until the tax credit is used, whichever is the earlier. The tax credit cannot be carried back to a tax year prior to the year in which the taxpayer claimed the tax credit.

42.37(3) *Transfer of the film qualified expenditure tax credit.* The film qualified expenditure tax credit may be transferred no more than two times to any person or entity.

Within 90 days of transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department of revenue, along with a statement which contains the transferee’s name, address and tax identification number and the amount of the tax credit being transferred. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee, the department of revenue will issue a replacement tax credit certificate to the transferee. If the transferee is a partnership, limited liability company, S corporation, or estate or trust claiming the credit for individual or corporation income tax, the transferee shall provide a list of the partners, members, shareholders or beneficiaries and information on how the film qualified expenditure tax credit should be divided among the partners, members, shareholders or beneficiaries. The transferee shall also provide the tax identification numbers and addresses of the partners, members, shareholders or beneficiaries. The replacement tax credit certificate must contain the same information as that on the original tax credit certificate and must have the same effective taxable year as the original tax credit certificate. The replacement tax credit certificate may reflect a different tax type than the original tax credit certificate.

The transferee may use the amount of the tax credit for any tax year for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit certificate shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit certificate shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

42.37(4) *Repeal of film qualified expenditure tax credit.* The film qualified expenditure tax credit is repealed for tax years beginning on or after January 1, 2012. However, the credit is still available for tax years beginning prior to January 1, 2012, if the contract or agreement related to a film project was entered into on or before May 25, 2012.

This rule is intended to implement 2012 Iowa Acts, House File 2337, sections 38 to 40.
[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 0398C, IAB 10/17/12, effective 11/21/12; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—42.38(15,422) Film investment tax credit. Effective for tax years beginning on or after January 1, 2007, a film investment tax credit is available for individual income tax. The tax credit cannot exceed 25 percent of the taxpayer's investment in a film, television, or video project registered with the film office of the Iowa department of economic development (IDED). The film office may negotiate the amount of the tax credit. The administrative rules for the film investment tax credit for IDED may be found at 261—Chapter 36.

42.38(1) *Claiming the tax credit.* Upon completion of the project in Iowa and verification of the investment in the project, IDED will issue a tax credit certificate to the taxpayer. The certificate will list the taxpayer's name, address, and tax identification number; the date of project completion; the amount of the credit; the tax period for which the credit may be applied; and the type of tax for which the credit will be applied.

If the taxpayer is a partnership, limited liability company, S corporation, or estate or trust requesting a credit for individual or corporation income tax, the tax credit certificate will be issued to the partners, members, shareholders or beneficiaries based on each partner's, member's, shareholder's or beneficiary's pro rata share of earnings of the partnership, limited liability company, S corporation, or estate or trust.

To claim the tax credit, the taxpayer must include the tax credit certificate with the tax return for the tax period set forth on the certificate. Any tax credit in excess of the tax liability may be carried forward for five years or until the tax credit is used, whichever is the earlier. The tax credit cannot be carried back to a tax year prior to the year in which the taxpayer claimed the tax credit. In addition, a taxpayer cannot claim the film investment tax credit for qualified expenditures for which the film expenditure tax credit set forth in rule 701—42.37(15,422) is claimed.

The total of all film investment tax credits for a particular project cannot exceed 25 percent of the qualified expenditures as set forth in subrule 42.37(1) for the particular project. If the amount of investment exceeds the qualified expenditures, the tax credit will be allocated proportionately. For example, if three investors each invested \$100,000 in a project but the qualified expenditures in Iowa only totaled \$270,000, each investor would receive a tax credit based on a \$90,000 investment amount.

42.38(2) *Transfer of the film investment tax credit.* The film investment tax credit may be transferred no more than two times to any person or entity.

Within 90 days of transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department of revenue, along with a statement which contains the transferee's name, address and tax identification number and the amount of the tax credit being transferred. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee, the department of revenue will issue a replacement tax credit certificate to the transferee. If the transferee is a partnership, limited liability company, S corporation, or estate or trust claiming the credit for individual or corporation income tax, the transferee shall provide a list of the partners, members, shareholders or beneficiaries and information on how the film investment tax credit should be divided among the partners, members, shareholders or beneficiaries. The transferee shall also provide the tax identification numbers and addresses of the partners, members, shareholders or beneficiaries. The replacement tax credit certificate must contain the same information as that on the original tax credit certificate and must

have the same effective taxable year as the original tax credit certificate. The replacement tax credit certificate may reflect a different tax type than the original tax credit certificate.

The transferee may use the amount of the tax credit for any tax year for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit certificate shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit certificate shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

42.38(3) *Repeal of film investment tax credit.* The film investment tax credit is repealed for tax years beginning on or after January 1, 2012. However, the credit is still available for tax years beginning prior to January 1, 2012, if the contract or agreement related to a film project was entered into on or before May 25, 2012.

This rule is intended to implement 2012 Iowa Acts, House File 2337, sections 38 to 40. [ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 0398C, IAB 10/17/12, effective 11/21/12; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—42.39(422) Ethanol promotion tax credit. Effective for tax years beginning on or after January 1, 2009, a retail dealer of gasoline may claim an ethanol promotion tax credit. For purposes of this rule, tank wagon sales are considered retail sales. The ethanol promotion tax credit is computed on Form IA 137.

42.39(1) *Definitions.* The following definitions are applicable to this rule:

“Biodiesel gallonage” means the total number of gallons of biodiesel which the retail dealer sells from motor fuel pumps during a determination period. For example, 5,000 gallons of biodiesel blended fuel with a 2 percent by volume of biodiesel sold during a determination period results in a biodiesel gallonage of 100 (5,000 times 2%).

“Biofuel distribution percentage” means the sum of the retail dealer’s total ethanol gallonage plus the retail dealer’s total biodiesel gallonage expressed as a percentage of the retail dealer’s total gasoline gallonage.

“Biofuel threshold percentage” is dependent on the aggregate number of gallons of motor fuel sold by a retail dealer during a determination period, as set forth below:

Determination Period	More than 200,000 Gallons Sold by Retail Dealer	200,000 Gallons or Less Sold by Retail Dealer
2009	10%	6%
2010	11%	6%
2011	12%	10%
2012	13%	11%
2013	14%	12%
2014	15%	13%
2015	17%	14%
2016	19%	15%
2017	21%	17%
2018	23%	19%
2019	25%	21%
2020	25%	25%

“Biofuel threshold percentage disparity” means the positive percentage difference between the retail dealer’s biofuel threshold percentage and the retail dealer’s biofuel distribution percentage. For example, if a retail dealer that sells more than 200,000 gallons of motor fuel in 2009 has a biofuel distribution percentage of 8 percent, the biofuel threshold percentage disparity equals 2 percent (10% minus 2%).

“Determination period” means any 12-month period beginning on January 1 and ending on December 31.

“*Ethanol gallonage*” means the total number of gallons of ethanol which the retail dealer sells from motor fuel pumps during a determination period. For example, 10,000 gallons of ethanol blended gasoline formulated with a 10 percent by volume of ethanol sold during a determination period results in an ethanol gallonage of 1,000 (10,000 gallons times 10%).

“*Gasoline gallonage*” means the total number of gallons of gasoline sold by the retail dealer during a determination period.

42.39(2) Calculation of tax credit.

a. The tax credit is calculated by multiplying the retail dealer’s total ethanol gallonage by the tax credit rate, which is adjusted based upon the retail dealer’s biofuel threshold percentage disparity. The tax credit rate is set forth below:

Biofuel Threshold Percentage Disparity	Tax Credit Rate per Gallon 2009-2010	Tax Credit Rate per Gallon 2011	Tax Credit Rate per Gallon 2012-2020
0%	6.5 cents	8 cents	8 cents
0.01% to 2.00%	4.5 cents	6 cents	6 cents
2.01% to 4.00%	2.5 cents	2.5 cents	4 cents
4.01% or more	0 cents	0 cents	0 cents

b. For use in calculating a retail dealer’s total ethanol gallonage, the department is required to establish a schedule regarding the average amount of ethanol contained in E-85 gasoline.

c. A taxpayer may claim the ethanol promotion tax credit even if the taxpayer also claims the E-85 gasoline promotion tax credit provided in rule 701—42.33(422) or the E-15 plus gasoline promotion tax credit provided in rule 701—42.46(422) for the same tax year for the same ethanol gallons.

d. The tax credit must be calculated separately for each retail motor fuel site operated by the taxpayer for tax years beginning prior to January 1, 2011. The biofuel threshold percentage disparity of the taxpayer is computed on a statewide basis based on the total ethanol gallonage sold in Iowa. The taxpayer must determine the ethanol gallonage sold at each retail motor fuel site and multiply this ethanol gallonage by the applicable tax credit rate based on the biofuel threshold percentage disparity to calculate the ethanol promotion tax credit.

e. For tax years beginning on or after January 1, 2011, the taxpayer may elect to compute the biofuel threshold percentage disparity and the tax credit on either a site-by-site basis or on a companywide basis. The election made on the first return beginning on or after January 1, 2011, for either the site-by-site method or the companywide method is binding on the taxpayer for subsequent tax years unless the taxpayer petitions the department for a change in the method. Any petition for a change in the method should be made within a reasonable period of time prior to the due date of the return for which the change is requested. For example, if a change is requested for the tax return beginning January 1, 2012, the petition should be made by January 31, 2013, which is 90 days prior to the due date of the return.

The mere fact that a change in the method will result in a larger tax credit for subsequent years is not, of itself, sufficient grounds for changing the method for computing the credit. An example of a case for which the department may grant a change in the method is if the taxpayer has a significant change in the type of fuel sold at the taxpayer’s retail sites in Iowa. For example, if a retail dealer opted to start selling E-85 gasoline at all the taxpayer’s retail sites in Iowa for a subsequent tax year, the department may grant a change in the method.

If a taxpayer chooses the site-by-site method to compute the biofuel threshold percentage disparity, the gallons sold at all sites in Iowa must be considered in determining if the biofuel threshold percentage as defined in subrule 42.39(1) is based on more than 200,000 gallons or on 200,000 gallons or less. For example, if a taxpayer operates three motor fuel sites in Iowa and each site sells 80,000 gallons of motor fuel during 2011, the biofuel threshold percentage of 12 percent must be used for each retail site if the tax credit is computed on a site-by-site basis, even though each retail site sold less than 200,000 gallons of motor fuel.

f. Any tax credit in excess of the taxpayer's tax liability is refundable. In lieu of claiming a refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

42.39(3) Fiscal year filers. For taxpayers whose tax year is not on a calendar-year basis, the taxpayer may compute the ethanol promotion tax credit on the total ethanol gallonage sold during the year using the designated tax credit rates as shown in subrule 42.39(2), paragraph "a." Because the tax credit is repealed on January 1, 2021, a taxpayer whose tax year ends prior to December 31, 2020, may continue to claim the tax credit in the following tax year for the total ethanol gallonage sold through December 31, 2020. A taxpayer whose tax year is not on a calendar-year basis and that did not claim the ethanol promotion tax credit on the previous return may claim the tax credit for the current tax year for the period beginning on January 1 of the previous tax year until the last day of the previous tax year.

42.39(4) Allocation of tax credit to owners of a business entity. If a taxpayer claiming the ethanol promotion tax credit is a partnership, limited liability company, S corporation, estate, or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by the individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, estate, or trust.

42.39(5) Examples. The following noninclusive examples illustrate how this rule applies:

EXAMPLE 1. A taxpayer that is a retail dealer of gasoline operates only one motor fuel site in Iowa. The number of gallons of gasoline sold at this site in 2009 equals 100,000 gallons. This consisted of 5,000 gallons of E-85 gasoline, 80,000 gallons of E-10 (10% ethanol blended gasoline) and 15,000 gallons not containing ethanol. The average ethanol content of E-85 gasoline is assumed to be 79%. The taxpayer also sold at this site during 2009 15,000 gallons of diesel fuel, of which 5,000 gallons was B-2 (2% biodiesel). The ethanol gallonage is 11,950 (5,000 E-85 gallons times 79% equals 3,950; 80,000 E-10 gallons times 10% equals 8,000; and thus 3,950 plus 8,000 equals 11,950). The biodiesel gallonage sold is 100, or 5,000 times 2%. The sum of 11,950 and 100, or 12,050, is divided by the total gasoline gallonage of 100,000 to arrive at a biofuel distribution percentage of 12.05%. Since this percentage exceeds the biofuel threshold percentage of 6% for a retail dealer selling 200,000 gallons or less, the biofuel threshold disparity percentage is 0%. This calculation results in an ethanol promotion tax credit of 6.5 cents times 11,950, or \$776.75.

In addition, the taxpayer is entitled to claim the E-85 gasoline promotion tax credit equal to 20 cents multiplied by 5,000 gallons, or \$1,000.

EXAMPLE 2. A taxpayer that is a retail dealer of gasoline operates only one motor fuel site in Iowa. The number of gallons of gasoline sold at this site in 2010 equals 300,000 gallons which consisted of 10,000 gallons of E-85 gasoline, 230,000 gallons of E-10 (10% ethanol blended gasoline) and 60,000 gallons not containing ethanol. The average ethanol content of E-85 gasoline is assumed to be 79%. The taxpayer also sold 60,000 gallons of diesel fuel at this site during 2010, of which 25,000 gallons was B-2 (2% biodiesel). The ethanol gallonage is 30,900 (10,000 E-85 gallons times 79% equals 7,900; 230,000 E-10 gallons times 10% equals 23,000; and thus 7,900 plus 23,000 equals 30,900). The biodiesel gallonage sold is 500, or 25,000 times 2%. The sum of 30,900 and 500, or 31,400, is divided by the total gasoline gallonage of 300,000 to arrive at a biofuel distribution percentage of 10.47%. Since this is less than the biofuel threshold percentage of 11% for a retail dealer selling more than 200,000 gallons, the biofuel threshold disparity percentage is .53%. This calculation results in an ethanol promotion tax credit of 4.5 cents times 30,900, or \$1,390.50.

In addition, the taxpayer is entitled to claim the E-85 gasoline promotion tax credit equal to 20 cents multiplied by 10,000 gallons, or \$2,000.

EXAMPLE 3. A taxpayer that is a retail dealer of gasoline operates three motor fuel sites in Iowa during 2009, and each site sold 80,000 gallons of gasoline. Sites A and B each sold 70,000 gallons of E-10 (10% ethanol blended gasoline) and 10,000 gallons not containing ethanol. Site C sold 60,000 gallons of E-10, 10,000 gallons of E-85, and 10,000 gallons not containing ethanol. The average ethanol content of E-85 gasoline is assumed to be 79%. The retail dealer did not sell any diesel fuel at any of the motor fuel sites. The ethanol gallonage is 27,900, as shown below:

Site A – 70,000 times 10% equals	7,000
Site B – 70,000 times 10% equals	7,000
Site C – 60,000 times 10% equals	6,000
Site C – 10,000 times 79% equals	7,900
Total	<u>27,900</u>

The ethanol gallonage of 27,900 is divided by the gasoline gallonage of 240,000 to arrive at a biofuel distribution percentage of 11.63%. Since this exceeds the biofuel threshold percentage of 10% for a retail dealer selling more than 200,000 gallons, the biofuel threshold disparity percentage is 0%. The credit is computed separately for each motor fuel site, and the ethanol promotion credit equals \$1,813.50, as shown below:

Site A – 7,000 times 6.5 cents equals	\$455.00
Site B – 7,000 times 6.5 cents equals	\$455.00
Site C – 13,900 times 6.5 cents equals	\$903.50
Total	<u>\$1,813.50</u>

Since the biofuel distribution percentage and the biofuel threshold percentage disparity are computed on a statewide basis for all gallons sold in Iowa, the 6.5 cent tax credit rate is applied to the total ethanol gallonage, even if Sites A and B did not meet the biofuel threshold percentage of 10% for 2009.

In addition, the taxpayer is entitled to claim the E-85 gasoline promotion tax credit equal to 20 cents multiplied by 10,000 gallons, or \$2,000.

EXAMPLE 4. A taxpayer that is a retail dealer of gasoline has a fiscal year ending March 31, 2011, and operates one motor fuel site in Iowa. The taxpayer sold more than 200,000 gallons of gasoline during the 2010 calendar year and expects to sell more than 200,000 gallons of gasoline during the 2011 calendar year. The ethanol gallonage is 30,000 for the period from April 1, 2010, through December 31, 2010, and the ethanol gallonage is 8,000 for the period from January 1, 2011, through March 31, 2011. The biofuel distribution percentage is 11.5% for the period from April 1, 2010, through December 31, 2010, and the biofuel distribution percentage is 11.8% for the period from January 1, 2011, through March 31, 2011. This results in a biofuel threshold percentage disparity of 0% (11.0 minus 11.5) for the period from April 1, 2010, through December 31, 2010, and a biofuel threshold percentage disparity of .2% (12.0 minus 11.8) for the period from January 1, 2011, through March 31, 2011. The taxpayer is entitled to an ethanol promotion tax credit of \$2,310 for the fiscal year ending March 31, 2011, as shown below:

30,000 times 6.5 cents equals	\$1,950
8,000 times 4.5 cents equals	360
Total	<u>\$2,310</u>

EXAMPLE 5. A taxpayer that is a retail dealer of gasoline has a fiscal year ending April 30, 2009, and operates one motor fuel site in Iowa. The taxpayer expects to sell more than 200,000 gallons of gasoline during the 2009 calendar year. The ethanol gallonage is 50,000 gallons for the period from January 1, 2009, through April 30, 2009. The biofuel distribution percentage is 7.7% for the period from January 1, 2009, through April 30, 2009, which results in a biofuel threshold percentage disparity of 2.3% (10.0 minus 7.7). The taxpayer is entitled to claim an ethanol promotion tax credit of \$1,250 (50,000 gallons times 2.5 cents) on the taxpayer's Iowa income tax return for the period ending April 30, 2009.

In lieu of claiming the credit on the return for the period ending April 30, 2009, the taxpayer may claim the ethanol promotion tax credit on the tax return for the period ending April 30, 2010, including the ethanol gallonage for the period from January 1, 2009, through April 30, 2010. In this case, the taxpayer will compute the biofuel distribution percentage for the period from January 1, 2009, through December 31, 2009, to determine the proper tax credit rate to be applied to the ethanol gallonage for the period from January 1, 2009, through December 31, 2009.

EXAMPLE 6. Assume the same facts as Example 3, except that the gallons were sold in 2011. The taxpayer chose the companywide method to compute the biofuel threshold percentage disparity and the tax credit. The biofuel distribution percentage is 11.63%, and since the biofuel threshold percentage is 12% for retailers selling more than 200,000 gallons of motor fuel, the biofuel threshold percentage disparity is 0.37%. This results in an ethanol promotion tax credit on a companywide basis of 6 cents multiplied by the ethanol gallonage of 27,900 or \$1,674.

EXAMPLE 7. Assume the same facts as Example 3, except that the gallons were sold in 2011. The taxpayer chose the site-by-site method to compute the biofuel threshold percentage disparity and the tax credit. The biofuel threshold percentage is still 12% since the retailer sold more than 200,000 gallons of motor fuel at all sites in Iowa. The biofuel distribution percentage for Site A and Site B is 7,000 divided by 80,000, or 8.75%. The biofuel threshold percentage disparity for Site A and Site B is 3.25%, or 12% less than 8.75%. The biofuel distribution percentage for Site C is 13,900 divided by 80,000, or 17.38%. The biofuel threshold percentage disparity for Site C is 0% since the biofuel distribution percentage exceeds the biofuel threshold percentage. This results in an ethanol promotion tax credit on a site-by-site basis of \$1,462, as shown below:

Site A – 7,000 times 2.5 cents equals	\$175
Site B – 7,000 times 2.5 cents equals	\$175
Site C – 13,900 times 8 cents equals	\$1,112
Total	\$1,462

This rule is intended to implement Iowa Code section 422.11N as amended by 2011 Iowa Acts, Senate File 531.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9821B, IAB 11/2/11, effective 12/7/11]

701—42.40(422) Charitable conservation contribution tax credit. Effective for tax years beginning on or after January 1, 2008, a charitable conservation contribution tax credit is available for individual income tax which is equal to 50 percent of the fair market value of a qualified real property interest located in Iowa that is conveyed as an unconditional charitable donation in perpetuity by a taxpayer to a qualified organization exclusively for conservation purposes.

42.40(1) Definitions. The following definitions are applicable to this rule:

“*Conservation purpose*” means the same as defined in Section 170(h)(4) of the Internal Revenue Code, with the exception that a conveyance of land for open space for the purpose of fulfilling density requirements to obtain subdivision or building permits is not considered a conveyance for a conservation purpose.

“*Qualified organization*” means the same as defined in Section 170(h)(3) of the Internal Revenue Code.

“*Qualified real property interest*” means the same as defined in Section 170(h)(2) of the Internal Revenue Code. Conservation easements and bargain sales are examples of a qualified real property interest.

42.40(2) Computation of the credit. The credit equals 50 percent of the fair market value of the qualified real property interest. There are numerous federal revenue regulations, rulings, court cases and other provisions relating to the determination of the value of a qualified real property interest, and these are equally applicable in determining the amount of the charitable conservation contribution tax credit.

The maximum amount of the tax credit is \$100,000. The amount of the contribution for which the tax credit is claimed shall not be claimed as an itemized deduction for charitable contributions for Iowa income tax purposes.

42.40(3) Claiming the tax credit. The tax credit is claimed on Form IA 148, Tax Credits Schedule. The taxpayer must include a copy of federal Form 8283, Noncash Charitable Contributions, which reflects the calculation of the fair market value of the real property interest, with the Iowa return for the year in which the contribution is made. If a qualified appraisal of the property or other relevant

information is required to be included with federal Form 8283 for federal tax purposes, the appraisal and other relevant information must also be included with the Iowa return.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following 20 years or until used, whichever is the earlier.

If the taxpayer claiming the credit is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

42.40(4) Examples. The following noninclusive examples illustrate how this rule applies:

EXAMPLE 1: A taxpayer conveys a real property interest with a fair market value of \$150,000 to a qualified organization during 2008. The tax credit is equal to \$75,000, or 50 percent of the \$150,000 fair market value of the real property. The taxpayer cannot claim the \$150,000 as an itemized deduction for charitable contributions on the Iowa individual income tax return for 2008.

EXAMPLE 2: A taxpayer conveys a real property interest with a fair market value of \$500,000 to a qualified organization during 2009. The tax credit is limited to \$100,000, which equates to \$200,000 of the contribution being eligible for the tax credit. The remaining amount of \$300,000 (\$500,000 less \$200,000) can be claimed as an itemized deduction for charitable contributions on the Iowa individual income tax return for 2009.

This rule is intended to implement Iowa Code section 422.11W.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—42.41(15,422) Redevelopment tax credit. The economic development authority is authorized by the general assembly and the governor to oversee the implementation and administration of the redevelopment tax credit program. Effective for tax years beginning on or after July 1, 2009, a taxpayer whose project has been approved by the Iowa brownfield redevelopment advisory council and the economic development authority may claim a redevelopment tax credit once the taxpayer has been issued a tax credit certificate for the project by the economic development authority. The credit is based on the taxpayer's qualifying investment in a brownfield or grayfield site. The administrative rules for the economic development authority's administration of this program, including definitions of brownfield and grayfield sites, may be found in rules 261—65.11(15) and 261—65.12(15).

42.41(1) Eligibility for the credit. The economic development authority is responsible for developing a system for registration and authorization of projects receiving redevelopment tax credits. For more information, see Iowa Administrative Code 261—Chapter 65.

42.41(2) Amount of the credit.

a. Maximum credit total. For the fiscal year beginning July 1, 2009, the maximum amount of tax credits allowed is \$1 million, and the amount of credit authorized for any one redevelopment project cannot exceed \$100,000. For the fiscal year beginning July 1, 2011, the maximum amount of tax credit allowed cannot exceed \$5 million, and the amount of credit authorized for any one redevelopment project cannot exceed \$500,000. For the fiscal year beginning July 1, 2012, the maximum amount of tax credits allowed cannot exceed \$10 million, and the amount of credit authorized for any one redevelopment project cannot exceed \$1 million. For the fiscal year beginning July 1, 2013, and for each subsequent fiscal year, the maximum amount of tax credits issued by the authority shall be an amount determined by the economic development authority board but not in excess of the amount established pursuant to Iowa Code section 15.119.

b. Maximum credit per project. The maximum amount of a tax credit for a qualifying investment in any one qualifying redevelopment project shall not exceed 10 percent of the maximum amount of tax credits available in any one fiscal year pursuant to paragraph 42.41(2) "a."

c. Percentage computation. The amount of the tax credit shall equal one of the following:

- (1) Twelve percent of the taxpayer's qualifying investment in a grayfield site.
- (2) Fifteen percent of the taxpayer's qualifying investment in a grayfield site if the qualifying redevelopment project meets the requirements of green development as defined in rule 261—65.2(15).
- (3) Twenty-four percent of the taxpayer's qualifying investment in a brownfield site.

(4) Thirty percent of the taxpayer's qualifying investment in a brownfield site if the qualifying redevelopment project meets the requirements of green development as defined in rule 261—65.2(15).

42.41(3) Claiming the credit.

a. Certificate issuance. Upon completion of the project, the economic development authority will issue a tax credit certificate to the taxpayer. The tax credit certificate will include the taxpayer's name, address and federal identification number, the tax type for which the credit will be claimed, the amount of the credit, the tax year for which the credit may be claimed and the tax credit certificate number. In addition, the tax credit certificate will include a place for the name and tax identification number of a transferee and the amount of the tax credit being transferred, as provided in subrule 42.41(4). To claim the tax credit, the taxpayer must include the tax credit certificate with the tax return for the tax period set forth on the certificate.

b. Pro rata share. If a taxpayer claiming the tax credit is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

c. Carryforward. Except as provided in paragraph 42.41(3)“d,” any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier. The tax credit shall not be carried back to a tax year prior to the year in which the taxpayer redeems the credit.

d. Refundability. A tax credit in excess of the taxpayer's liability for the tax year is refundable if all of the conditions of economic development authority 261—paragraph 65.11(4)“b” are met.

42.41(4) Transfer of the credit. The redevelopment tax credit can be transferred to any person or entity. However, a certificate indicating that the credit is refundable is only transferrable to the extent permitted by economic development authority 261—paragraph 65.11(4)“b.”

a. Submission of transferred tax credit certificate to the department—information required. Within 90 days of transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department of revenue, along with a statement which contains the transferee's name, address and tax identification number and the amount of the tax credit being transferred, the amount of all consideration provided in exchange for the tax credit, and the names of recipients of any consideration provided in exchange for the tax credit. If a payment of money was any part of the consideration provided in exchange for the tax credit, the transferee shall list the amount of the payment of money in its statement to the department of revenue. If any part of the consideration provided in exchange for the tax credit included nonmonetary consideration, including but not limited to any promise, representation, performance, discharge of debt or nonmonetary rights or property, the transferee shall describe the nature of nonmonetary consideration and disclose any value the transferor and transferee assigned to the nonmonetary consideration. The transferee must indicate on its statement to the department of revenue if no consideration was provided in exchange for the tax credit. If the transferee is a partnership, limited liability company, S corporation, or estate or trust claiming the credit for individual or corporation income tax, the transferee shall provide a list of the partners, members, shareholders or beneficiaries and information on how the redevelopment tax credit should be divided among the partners, members, shareholders or beneficiaries. The transferee shall also provide the tax identification numbers and addresses of the partners, members, shareholders or beneficiaries.

b. Issuance of replacement certificate by the department. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee, the department of revenue will issue a replacement tax credit certificate to the transferee.

c. Claiming the transferred tax credit. The replacement tax credit certificate must contain the same information as that on the original tax credit certificate and must have the same effective taxable year as the original tax credit certificate. The replacement tax credit certificate may reflect a different tax type than the original tax credit certificate. The transferee may use the amount of the tax credit for any tax year for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit certificate shall not be included in Iowa taxable income for individual

income tax, corporation income tax, or franchise tax purposes. Any consideration paid for the transfer of the tax credit certificate shall not be deducted from Iowa taxable income for individual income tax, corporation income tax, or franchise tax purposes.

42.41(5) Basis reduction of the redevelopment property. The increase in the basis of the redevelopment property that would otherwise result from the qualified redevelopment costs shall be reduced by the amount of the redevelopment tax credit. For example, if a qualifying investment in a grayfield site totaled \$100,000 for which a \$12,000 redevelopment tax credit was issued, the increase in the basis of the property would total \$88,000 for Iowa tax purposes (\$100,000 less \$12,000).

This rule is intended to implement Iowa Code sections 15.293A, 422.11V and 15.119.
[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9876B, IAB 11/30/11, effective 1/4/12; ARC 1102C, IAB 10/16/13, effective 11/20/13; ARC 1949C, IAB 4/1/15, effective 5/6/15]

701—42.42(15) High quality jobs program. Effective for tax periods beginning on or after July 1, 2009, a business which qualifies under the high quality jobs program is eligible to receive tax credits. The high quality jobs program replaces the high quality job creation program. An eligible business under the high quality jobs program must be approved by the Iowa department of economic development and meet the qualifications of Iowa Code section 15.329. The tax credits available under the high quality jobs program are based upon the number of jobs created or retained that pay a qualifying wage threshold and the amount of qualifying investment. The administrative rules for the high quality jobs program for the Iowa department of economic development may be found at 261—Chapter 68.

42.42(1) Research activities credit. An eligible business approved under the high quality jobs program is eligible for an additional research activities credit as described in 701—subrule 52.7(4) for awards issued by the Iowa department of economic development prior to July 1, 2010. The eligible business is eligible for the research activities credit as described in 701—subrule 52.7(6) for awards issued by the Iowa department of economic development on or after July 1, 2010.

Research activities allowable for the Iowa research activities credit include expenses related to the development and deployment of innovative renewable energy generation components manufactured or assembled in Iowa; such expenses related to the development and deployment of innovative renewable energy generation components are not eligible for the federal credit for increasing research activities. For purposes of this subrule, innovative renewable energy generation components do not include components with more than 200 megawatts in installed effective nameplate generating capacity. The research activities credit related to renewable energy generation components under the high quality jobs program and the enterprise zone program shall not exceed \$2 million for the fiscal year ending June 30, 2010, and \$1 million for the fiscal year ending June 30, 2011.

These expenses related to the development and deployment of innovative renewable energy generation components are applicable only to the additional research activities credit set forth in this subrule and in 701—subrule 52.7(5) for businesses in enterprise zones, and are not applicable to the research activities credit set forth in subrule 42.11(3), paragraphs “a” and “b.”

42.42(2) Investment tax credit. An eligible business can claim an investment tax credit equal to a percentage of the new investment directly related to new jobs created or retained by the location or expansion of an eligible business. The percentage is equal to the amount provided in Iowa department of economic development 261—subrule 68.4(7).

The determination of the new investment eligible for the investment tax credit, the eligibility of a refundable investment tax credit for value-added agricultural product or biotechnology-related projects and the repayment of investment tax credits for the high quality jobs program is the same as set forth in subrule 42.29(2) for the high quality job creation program.

42.42(3) Repayment of benefits. If an eligible business fails to maintain the requirements of the high quality jobs program, the taxpayer may be required to repay all or a portion of the tax incentives taken on Iowa returns. Irrespective of the fact that the statute of limitations to assess the taxpayer for repayment of the tax credits may have expired, the department may proceed to collect the tax incentives forfeited by failure of the eligible business to maintain the requirements of the high quality jobs program because the repayment is a recovery of an incentive, rather than an adjustment to the taxpayer’s tax liability.

Details on the calculation of the repayment can be found in 261—subrule 187.5(4) of the administrative rules of the economic development authority. If the business is a partnership, limited liability company, S corporation, estate or trust where the income of the taxpayer is taxed to the individual owner(s) of the business, the department may proceed to collect the tax incentives against the partners, members, shareholders or beneficiaries to whom the tax incentives were passed through. See Decision of the Administrative Law Judge in *Damien & Colette Trebilcock, et al.*, Docket No. 11DORF 042-044, June 11, 2012.

This rule is intended to implement Iowa Code chapter 15.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—42.43(16,422) Disaster recovery housing project tax credit. For tax years beginning on or after January 1, 2011, but before January 1, 2015, a disaster recovery housing project tax credit is available for individual income tax. The credit is equal to 75 percent of the taxpayer's qualifying investment in a disaster recovery housing project, and is administered by the Iowa finance authority. Qualifying investments are costs incurred on or after May 12, 2009, and prior to July 1, 2010, related to a disaster recovery housing project. Eligible properties must have applied for and received an allocation of federal low-income housing tax credits under Section 42 of the Internal Revenue Code to be eligible for the tax credit. The tax credit is repealed effective January 1, 2015.

42.43(1) Issuance of tax credit certificates. Upon completion of the project and verification of the amount of investment made in the disaster recovery housing project, the Iowa finance authority will issue a tax credit certificate to the taxpayer. The tax credit certificate shall include the taxpayer's name, address, tax identification number, amount of credit, and the tax year for which the credit may be claimed. The tax credit certificates will be issued on a first-come, first-served basis. The tax credit cannot be transferred to any person or entity.

42.43(2) Limitation of tax credits. The tax credit shall not exceed 75 percent of the taxpayer's qualifying investment in a disaster recovery housing project. The maximum amount of tax credits issued by the Iowa finance authority shall not exceed \$3 million in each of the five consecutive years beginning in the 2011 calendar year. A tax credit certificate shall be issued by the Iowa finance authority for each year that the credit can be claimed.

42.43(3) Claiming the tax credit. The amount of the tax credit earned by the taxpayer will be divided by five and an amount equal thereto will be claimed on the Iowa individual income tax return commencing with the tax year beginning on or after January 1, 2011. A taxpayer is not entitled to a refund of the excess tax for any tax credit in excess of the tax liability, and also is not entitled to carry forward any excess credit to a subsequent tax year.

If the taxpayer is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

The increase in the basis of the property that would otherwise result from the disaster recovery housing investment shall be reduced by the amount of the tax credit allowed.

EXAMPLE: An individual whose tax year ends on December 31 incurs \$100,000 of costs related to an eligible disaster recovery housing project. The taxpayer receives a tax credit of \$75,000, and \$15,000 of credit can be claimed on each Iowa individual income tax return for the periods ending December 31, 2011, through December 31, 2015. If the tax liability for the individual for the period ending December 31, 2011, is \$10,000, the credit is limited to \$10,000, and the remaining \$5,000 credit cannot be used. If the tax liability for the individual for the period ending December 31, 2012, is \$25,000, the credit is limited to \$15,000, and the remaining \$5,000 credit from 2011 cannot be used to reduce the tax for 2012.

42.43(4) Potential recapture of tax credits. If the taxpayer fails to comply with the eligibility requirements of the project or violates local zoning and construction ordinances, the Iowa finance

authority can void the tax credit and the department of revenue shall seek recovery of the value of any tax credit claimed on an individual income tax return.

This rule is intended to implement Iowa Code sections 16.211, 16.212 and 422.11X as amended by 2014 Iowa Acts, Senate File 2328.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—42.44(422) Deduction of credits. The credits against computed tax set forth in Iowa Code sections 422.5, 422.8, 422.10 through 422.12C, and 422.110 shall be claimed in the following sequence:

1. Personal exemption credit.
2. Tuition and textbook credit.
3. Volunteer fire fighter, volunteer emergency medical services personnel and reserve peace officer tax credit.
4. Nonresident and part-year resident credit.
5. Franchise tax credit.
6. S corporation apportionment credit.
7. School tuition organization tax credit.
8. Venture capital tax credits (excluding redeemed Iowa fund of funds tax credit).
9. Endow Iowa tax credit.
10. Film qualified expenditure tax credit.
11. Film investment tax credit.
12. Redevelopment tax credit.
13. From farm to food donation tax credit.
14. Workforce housing tax credit.
15. Investment tax credit.
16. Wind energy production tax credit.
17. Renewable energy tax credit.
18. Redeemed Iowa fund of funds tax credit.
19. New jobs tax credit.
20. Economic development region revolving fund tax credit.
21. Agricultural assets transfer tax credit.
22. Custom farming contract tax credit.
23. Geothermal heat pump tax credit.
24. Solar energy system tax credit.
25. Charitable conservation contribution tax credit.
26. Alternative minimum tax credit.
27. Historic preservation and cultural and entertainment district tax credit.
28. Ethanol promotion tax credit.
29. Research activities credit.
30. Out-of-state tax credit.
31. Child and dependent care tax credit or early childhood development tax credit.
32. Motor fuel tax credit.
33. Claim of right credit (if elected in accordance with rule 701—38.18(422)).
34. Wage-benefits tax credit.
35. Adoption tax credit.
36. E-85 gasoline promotion tax credit.
37. Biodiesel blended fuel tax credit.
38. E-15 plus gasoline promotion tax credit.
39. Earned income tax credit.
40. Iowa taxpayers trust fund tax credit.
41. Estimated payments, payment with vouchers, and withholding tax.

This rule is intended to implement Iowa Code sections 422.5, 422.8, 422.10, 422.11, 422.11A, 422.11B, 422.11D, 422.11E, 422.11F, 422.11H, 422.11I, 422.11J, 422.11L, 422.11M, 422.11N, 422.11O,

422.11P, 422.11Q, 422.11R, 422.11S, 422.11V, 422.11W, 422.11Y, 422.11Z, 422.12, 422.12B, 422.12C and 422.110 and 2014 Iowa Acts, House Files 2448 and 2468.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9876B, IAB 11/30/11, effective 1/4/12; ARC 0398C, IAB 10/17/12, effective 11/21/12; ARC 1303C, IAB 2/5/14, effective 3/12/14; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—42.45(15) Aggregate tax credit limit for certain economic development programs. Effective for the fiscal year beginning July 1, 2009, awards made under certain economic development programs cannot exceed \$185 million during a fiscal year. Effective for fiscal years beginning on or after July 1, 2010, but beginning before July 1, 2012, awards made under these economic development programs cannot exceed \$120 million during a fiscal year. Effective for fiscal years beginning on or after July 1, 2012, awards made under these economic development programs cannot exceed \$170 million. For fiscal years beginning on or after July 1, 2010, but beginning before July 1, 2014, these programs include the assistive device tax credit program, the enterprise zone program, the housing enterprise zone program, the high quality jobs program, the redevelopment tax credit program, tax credits for investments in qualifying businesses and community-based seed capital funds, and the innovation fund tax credit program. For fiscal years beginning on or after July 1, 2014, these programs include the assistive device tax credit program, the workforce housing tax incentives program, the high quality jobs program, the redevelopment tax credit program, tax credits for investments in qualifying businesses and community-based seed capital funds, and the innovation fund tax credit program. The administrative rules for the aggregate tax credit limit for the economic development authority may be found at 261—Chapter 76.

This rule is intended to implement Iowa Code section 15.119 as amended by 2014 Iowa Acts, House File 2448.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 1102C, IAB 10/16/13, effective 11/20/13; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—42.46(422) E-15 plus gasoline promotion tax credit. Effective for eligible gallons sold on or after July 1, 2011, a retail dealer of gasoline may claim an E-15 plus gasoline promotion tax credit. “E-15 plus gasoline” means ethanol blended gasoline formulated with a minimum percentage of between 15 percent and 69 percent of volume of ethanol, if the formulation meets the standards provided in Iowa Code section 214A.2. For purposes of this rule, tank wagon sales are considered retail sales. The credit is calculated on Form IA138. The tax credit is calculated by multiplying the total number of E-15 plus gallons sold by the retail dealer during the tax year by the following designated rates:

Gallons sold from July 1, 2011, through December 31, 2013	3 cents
Gallons sold from January 1 through May 31 and from September 16 through December 31 for the 2014-2017 calendar years	3 cents
Gallons sold from June 1 through September 15 for the 2014-2017 calendar years	10 cents

A taxpayer may claim the E-15 plus gasoline promotion tax credit even if the taxpayer also claims the ethanol promotion tax credit provided in rule 701—42.39(422) for gallons sold for the same tax year for the same ethanol gallons.

Any credit in excess of the taxpayer’s tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

42.46(1) Fiscal year filers. For taxpayers whose tax year is not on a calendar-year basis, the taxpayer may compute the tax credit on the gallons of E-15 plus gasoline sold during the year using the designated rates as shown above. Because the tax credit is repealed on January 1, 2018, a taxpayer whose tax year ends prior to December 31, 2017, may continue to claim the tax credit in the following tax year for any E-15 plus gallons sold through December 31, 2017. For a retail dealer whose tax year is not on a calendar-year basis and who did not claim the E-15 plus credit on the previous return, the dealer may claim the credit for the current tax year for gallons sold for the period beginning on July 1 of the previous tax year until the last day of the previous tax year. However, for taxpayers whose fiscal year ends before

December 31, 2011, the dealer must claim the credit for the current tax year for gallons sold for the period beginning on July 1 of the previous tax year until the last day of the previous tax year.

EXAMPLE 1: A taxpayer who is a retail dealer of gasoline has a fiscal year ending October 31, 2011. The taxpayer sold 2,000 gallons of E-15 plus gasoline for the period from July 1, 2011, through October 31, 2011, and sold 7,000 gallons of E-15 plus gasoline for the period from November 1, 2011, through October 31, 2012. The taxpayer is entitled to a total E-15 plus gasoline promotion tax credit of \$270 for the fiscal year ending October 31, 2012, which consists of a \$60 credit (2,000 gallons multiplied by 3 cents) for the period from July 1, 2011, through October 31, 2011, and a credit of \$210 (7,000 gallons multiplied by 3 cents) for the period from November 1, 2011, through October 31, 2012.

EXAMPLE 2: A taxpayer who is a retail dealer of gasoline has a fiscal year ending April 30, 2012. The taxpayer sold 4,000 gallons of E-15 plus gasoline between July 1, 2011, and April 30, 2012. The taxpayer sold 9,000 gallons of E-15 plus gasoline between May 1, 2012, and April 30, 2013. The taxpayer is entitled to claim an E-15 plus gasoline promotion tax credit of \$120 (4,000 gallons times 3 cents) for the fiscal year ending April 30, 2012. In lieu of claiming the credit on the return for the period ending April 30, 2012, the taxpayer can claim the E-15 plus gasoline promotion tax credit on the tax return for the period ending April 30, 2013, for all E-15 plus gasoline gallons sold for the period from July 1, 2011, through April 30, 2013.

EXAMPLE 3: A taxpayer who is a retail dealer of gasoline has a fiscal year ending February 28, 2018. The taxpayer sold 20,000 gallons of E-15 plus gasoline for the period from March 1, 2017, through February 28, 2018, of which 16,000 gallons were sold between March 1, 2017, and December 31, 2017. Six thousand of these 16,000 gallons were sold between June 1, 2017, and September 15, 2017. The taxpayer is entitled to claim an E-15 plus gasoline promotion tax credit of \$900 (10,000 gallons times 3 cents plus 6,000 gallons times 10 cents) on the taxpayer's Iowa income tax return for the period ending February 28, 2018.

42.46(2) Allocation of credit to owners of a business entity. If a taxpayer claiming the E-15 plus gasoline promotion tax credit is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement Iowa Code section 422.11Y as amended by 2014 Iowa Acts, Senate File 2344.

[**ARC 9821B**, IAB 11/2/11, effective 12/7/11; **ARC 1665C**, IAB 10/15/14, effective 11/19/14]

701—42.47(422) Geothermal heat pump tax credit. For tax years beginning on or after January 1, 2012, a geothermal heat pump tax credit is available for residential property located in Iowa.

42.47(1) Calculation of credit. The credit is equal to 20 percent of the federal residential energy efficient tax credit allowed for geothermal heat pumps provided in Section 25D(a)(5) of the Internal Revenue Code. The federal residential energy efficient tax credit for geothermal heat pumps is currently allowed for installations that are completed on or before December 31, 2016. Therefore, the Iowa tax credit will be available for the 2012 to 2016 tax years. The geothermal heat pump must be installed on or after January 1, 2012, to qualify for the Iowa credit. If the taxpayer installed a geothermal heat pump and initially reported the federal tax credit for a tax year beginning prior to January 1, 2012, no Iowa credit will be allowed.

EXAMPLE: A taxpayer reported a \$6,000 geothermal tax credit on the 2011 federal return due to an installation that was completed in 2011. The taxpayer applied \$2,000 of the credit on the taxpayer's 2011 federal return since the federal tax liability was \$2,000. The remaining \$4,000 of federal credit was applied on the 2012 federal return. No credit will be allowed on the 2012 Iowa return since the installation was completed before January 1, 2012.

42.47(2) Claiming the tax credit. The geothermal heat pump tax credit will be claimed on Form IA 148, Tax Credit Schedule. The taxpayer must include federal Form 5695, Residential Energy Credits, with any Iowa tax return claiming the geothermal heat pump credit. Any tax credit in excess of the tax

liability for the tax year may be credited to the tax liability for the following ten years or until used, whichever is the earlier.

This rule is intended to implement 2012 Iowa Acts, Senate File 2342, section 1.
[ARC 0361C, IAB 10/3/12, effective 11/7/12; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—42.48(422) Solar energy system tax credit. For tax years beginning on or after January 1, 2012, a solar energy system tax credit is available for both residential property and business property located in Iowa.

42.48(1) Property eligible for the tax credit. The following property located in Iowa is eligible for the tax credit:

- a. Qualified solar water heating property described in Section 25D(d)(1) of the Internal Revenue Code.
- b. Qualified solar energy electric property described in Section 25D(d)(2) of the Internal Revenue Code.
- c. Equipment which uses solar energy to generate electricity, to heat or cool (or to provide hot water for use in) a structure, or to provide solar process heat (excepting property used to generate energy for the purposes of heating a swimming pool) and which is eligible for the federal energy credit as described in Section 48(a)(3)(A)(i) of the Internal Revenue Code.
- d. Equipment which uses solar energy to illuminate the inside of a structure using fiber-optic distributed sunlight and which is eligible for the federal energy credit as described in Section 48(a)(3)(A)(ii) of the Internal Revenue Code.

42.48(2) Calculation of credit for systems installed during tax years beginning on or after January 1, 2012, but before January 1, 2014. The credit is equal to the sum of the following federal tax credits:

- a. Fifty percent of the federal residential energy property credit provided in Section 25D(a)(1) of the Internal Revenue Code.
- b. Fifty percent of the federal residential energy property credit provided in Section 25D(a)(2) of the Internal Revenue Code.
- c. Fifty percent of the federal energy credit provided in Section 48(a)(2)(A)(i)(II) of the Internal Revenue Code.
- d. Fifty percent of the federal energy credit provided in Section 48(a)(2)(A)(i)(III) of the Internal Revenue Code.

The amount of tax credit claimed by a taxpayer related to paragraphs 42.48(2)“a” and “b” cannot exceed \$3,000 for a tax year. The amount of tax credit claimed by a taxpayer related to paragraphs 42.48(2)“c” and “d” cannot exceed \$15,000 for a tax year.

The federal residential energy efficient tax credits are allowed for installations that are completed and the federal energy tax credits for solar energy systems are allowed for installations that are placed in service before January 1, 2014. The solar energy system must be installed on or after January 1, 2012, to qualify for the Iowa credit. If the taxpayer installed a solar energy system and initially reported the federal tax credit for a tax year beginning prior to January 1, 2012, no Iowa credit will be allowed.

EXAMPLE: A taxpayer reported a \$9,000 residential energy efficient tax credit on the 2011 federal return due to an installation of a solar energy system that was placed in service in 2011. The taxpayer applied \$4,000 of the credit on the taxpayer’s 2011 federal return since the federal tax liability was \$4,000. The remaining \$5,000 of federal credit was applied on the 2012 federal return. No credit will be allowed on the 2012 Iowa return since the installation was placed in service before January 1, 2012.

42.48(3) Calculation of credit for systems installed during tax years beginning on or after January 1, 2014, but before January 1, 2017. The credit is equal to the sum of the following federal tax credits:

- a. Sixty percent of the federal residential energy property credit provided in Section 25D(a)(1) of the Internal Revenue Code.
- b. Sixty percent of the federal residential energy property credit provided in Section 25D(a)(2) of the Internal Revenue Code.
- c. Sixty percent of the federal energy credit provided in Section 48(a)(2)(A)(i)(II) of the Internal Revenue Code.

d. Sixty percent of the federal energy credit provided in Section 48(a)(2)(A)(i)(III) of the Internal Revenue Code.

The amount of tax credit claimed by a taxpayer related to paragraphs 42.48(3)“*a*” and “*b*” cannot exceed \$5,000 for a tax year. The amount of tax credit claimed by a taxpayer related to paragraphs 42.48(3)“*c*” and “*d*” cannot exceed \$20,000 for a tax year.

The federal residential energy efficient tax credits are allowed for installations that are completed on or before December 31, 2016, and the federal energy tax credits for solar energy systems are allowed for installations that are placed in service on or before December 31, 2016. Therefore, the Iowa tax credit is available for installations that are either completed or placed in service before January 1, 2017. If the federal residential energy property tax credits or the federal energy credits are extended to installations completed or placed in service on or after January 1, 2017, the Iowa tax credit will also be extended.

42.48(4) Application for the tax credit. No more than \$1.5 million of tax credits for solar energy systems are allowed for tax years 2012 and 2013. The \$1.5 million cap also includes the solar energy system tax credits provided in rule 701—52.44(422) for corporation income tax. No more than \$4.5 million of tax credits for solar energy systems is allowed for each of the tax years 2014 to 2016. The \$4.5 million cap does not include any dollars allocated to a previous tax year that roll over to the 2015 and 2016 tax years. The \$4.5 million cap also includes the solar energy system tax credits provided in rule 701—52.44(422) for corporation income tax and in rule 701—58.22(422) for franchise tax. Awards of tax credits are made on a first-come, first-served basis. At least \$1 million of the \$4.5 million cap for the 2014 to 2016 tax years is reserved for residential installations. If the total amount of credits for residential installations for a tax year is less than \$1 million, the remaining amount below \$1 million will be allowed for nonresidential installations. If the \$4.5 million cap for the 2014 and 2015 tax years is not reached, the remaining amount below \$4.5 million will be allowed to be carried forward to the following tax year and shall not count toward the cap for that year.

a. A taxpayer may claim one tax credit for each separate and distinct solar installation. In order for an installation to be considered a separate and distinct solar installation, both of the following factors must be met:

(1) Each installation must be eligible for the federal residential energy property credit or the federal energy credit as provided in subrule 42.48(3).

(2) Each installation must have separate metering.

b. In order to request the tax credit, a taxpayer must complete an application for the solar energy tax credit for each separate and distinct installation. For installations completed on or after January 1, 2014, the application must be filed by May 1 following the year of installation of the solar energy system. The application must contain the following information:

(1) Name, address and federal identification number of the taxpayer.

(2) Date of installation of the solar energy system.

(3) The kilowatt capacity of the solar energy system.

(4) Copies of invoices or other documents showing the cost of the solar energy system.

(5) Amount of federal income tax credit for the solar energy system.

(6) Amount of Iowa tax credit requested.

(7) For nonresidential installations, a completion sheet from a local utility company verifying that the system has been placed in service. If a completion sheet is not available from the local utility company, a statement shall be provided that is similar to the one required to be attached to federal Form 3468 when claiming the federal energy credit and that specifies the date the system was placed in service.

c. If the application is approved, the department will send a letter to the taxpayer including the amount of the tax credit and providing a tax credit certificate number. The solar energy system tax credit will be claimed on Form IA 148, Tax Credits Schedule. Any tax credit in excess of the tax liability for the tax year may be credited to the tax liability for the following ten years or until used, whichever is the earlier. The taxpayer must include with any Iowa tax return claiming the solar energy system tax credit federal Form 5695, Residential Energy Credits, if claiming the residential energy credit or federal Form 3468, Investment Credit, if claiming the business energy credit.

If the department receives applications for tax credits in excess of the \$1.5 million available for 2012 and 2013 and the \$4.5 million available for 2014 to 2016, the applications will be prioritized by the date the department received the applications. If the number of applications exceeds the \$1.5 or \$4.5 million of tax credits available, the department shall establish a wait list for the next year's allocation of tax credits and the applications shall first be funded in the order listed on the wait list. However, if the \$4.5 million cap of tax credit is reached for 2016, no applications in excess of the \$4.5 million cap will be carried over to the next year, assuming there is no extension of the federal credit.

EXAMPLE: A taxpayer submitted an application for a \$2,500 tax credit on December 1, 2012, for an installation that occurred in 2012. The application was denied on December 15, 2012, because the \$1.5 million cap had already been reached for 2012. The taxpayer will be placed on a wait list and will receive priority for receiving the tax credit for the 2013 tax year. However, if the application was submitted on December 1, 2016, for an installation that occurred in 2016 and the \$4.5 million cap had already been reached for 2016, no tax credit will be allowed for the 2017 tax year, assuming there is no extension of the federal credit.

d. A taxpayer who is eligible to receive a renewable energy tax credit provided in rule 701—42.28(422,476C) is not eligible for the solar energy system tax credit.

42.48(5) Allocation of tax credit to owners of a business entity. If the taxpayer claiming the tax credit based on a percentage of the federal energy credit under Section 48 of the Internal Revenue Code is a partnership, limited liability company, S corporation, estate or trust electing to have income taxed directly to the individual, the individual may claim the tax credit. The amount claimed by the individual shall be based upon the pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, estate or trust. The maximum amount of credit available to a partnership, limited liability company, S corporation, estate or trust shall be limited to \$15,000 for installations placed in service in tax years 2012 and 2013 and \$20,000 for installations placed in service in tax years 2014 to 2016.

This rule is intended to implement Iowa Code section 422.11L as amended by 2014 Iowa Acts, Senate File 2340, and 2014 Iowa Acts, House File 2473, section 77.

[ARC 0361C, IAB 10/3/12, effective 11/7/12; ARC 1303C, IAB 2/5/14, effective 3/12/14; ARC 1666C, IAB 10/15/14, effective 11/19/14]

701—42.49(422) Volunteer fire fighter, volunteer emergency medical services personnel and reserve peace officer tax credit. Effective for tax years beginning on or after January 1, 2013, a tax credit is available for individual income tax for volunteer fire fighters and volunteer emergency medical services (EMS) personnel. Effective for tax years beginning on or after January 1, 2014, a tax credit is available for individual income tax for reserve peace officers.

42.49(1) Definitions. The following definitions are applicable to this rule:

“Emergency medical services personnel” or *“EMS personnel”* means an emergency medical care provider, as defined in Iowa Code section 147A.1, who is certified as a first responder in accordance with Iowa Code chapter 147A. For tax years beginning on or after January 1, 2014, “emergency medical services personnel” or “EMS personnel” also includes an individual who is a paid employee of an emergency medical services program and who is also a volunteer emergency medical services personnel in a city, county or area governed by an agreement pursuant to Iowa Code chapter 28E.

“Reserve peace officer” means a reserve peace officer as defined in Iowa Code section 80D.1A who has met the minimum state training standards established by the Iowa law enforcement academy in accordance with Iowa Code chapter 80D.

“Volunteer fire fighter” means a volunteer fire fighter, as defined in Iowa Code section 85.61, who has met the minimum training standards established by the fire service training bureau pursuant to Iowa Code chapter 100B. For tax years beginning on or after January 1, 2014, “volunteer fire fighter” means an individual who is an active member of an organized volunteer fire department in Iowa or is performing services as a volunteer fire fighter for a municipality, township or benefited fire district at the request of the chief or other person in command and who has met the minimum training standards established by the fire service training bureau pursuant to Iowa Code chapter 100B. For tax years beginning on or after January 1, 2014, a volunteer fire fighter also includes an individual who is a paid employee of a fire

department and who is also a volunteer fire fighter in a city, county or area governed by an agreement pursuant to Iowa Code chapter 28E.

42.49(2) Calculation of the credit.

a. The credit is equal to \$50 for the tax year beginning January 1, 2013, if the volunteer fire fighter or volunteer EMS personnel was a volunteer for the entire year. The credit is equal to \$100 for tax years beginning on or after January 1, 2014, if the volunteer fire fighter, volunteer EMS personnel or reserve peace officer was a volunteer for the entire year.

b. If the individual was not a volunteer fire fighter or volunteer EMS personnel for the entire 2013 calendar year, the \$50 credit is prorated based on the number of months the individual was a volunteer. Beginning in the 2014 calendar year, if the individual was not a volunteer fire fighter, volunteer EMS personnel or reserve peace officer for the entire year, the \$100 credit is prorated based on the number of months the individual was a volunteer. If the individual was a volunteer during any part of a month, the individual will be considered a volunteer for the entire month. The amount of credit will be rounded to the nearest dollar.

EXAMPLE: An individual became a volunteer fire fighter on April 15, 2013, and remained a volunteer for the rest of calendar year 2013. The individual is considered a volunteer for nine months of 2013. The tax credit for 2013 is equal to \$38 (\$50 multiplied by 9/12 equals \$37.50; rounding to the nearest dollar results in a \$38 credit).

c. If an individual is both a volunteer fire fighter and a volunteer EMS personnel during the same month, a credit can be claimed for only one volunteer position for that month. Therefore, if an individual was both a volunteer fire fighter and volunteer EMS personnel for all of 2013, the tax credit will equal \$50. In addition, beginning in calendar year 2014, if a reserve peace officer is also either a volunteer fire fighter or a volunteer EMS personnel, a credit can be claimed for only one volunteer position for that month.

42.49(3) Verification of eligibility for the tax credit. An individual is required to have a written statement from the fire chief or other appropriate supervisor verifying that the individual was a volunteer fire fighter or volunteer EMS personnel for the months for which the tax credit is being claimed. Beginning with the 2014 tax year, an individual who is a reserve peace officer must have a written statement from the chief of police, sheriff, commissioner of public safety, or other appropriate supervisor verifying that the individual was a reserve peace officer for the months for which the tax credit is being claimed. The written statement does not have to be attached to a tax return claiming the credit. However, the individual may be requested to provide the written statement upon request by the department.

This rule is intended to implement Iowa Code section 422.12 as amended by 2014 Iowa Acts, House File 2459.

[ARC 0398C, IAB 10/17/12, effective 11/21/12; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—42.50(422) Taxpayers trust fund tax credit. For tax years beginning on or after January 1, 2013, a taxpayers trust fund tax credit is available for Iowa individual income tax. The credit is available for all individual income tax filers, including residents, nonresidents and part-year residents of Iowa, and individuals who file as part of a composite return as described in rule 701—48.1(422), as long as the Iowa return is filed within the extended due date to file an Iowa return. Therefore, a fiscal-year filer whose tax year does not begin on January 1 is eligible to claim the taxpayers trust fund tax credit as long as the return is filed within the extended due date of the Iowa return.

42.50(1) Calculation of the amount of tax credit. The credit is calculated by taking the amount in the Iowa taxpayers trust fund and dividing it by the number of individual income taxpayers who filed Iowa returns by October 31 of the year preceding the year in which the credit is allowed.

EXAMPLE: There is \$120 million in the Iowa taxpayers trust fund at the end of the fiscal year ending June 30, 2013. There were 2,200,000 individuals who filed Iowa income tax returns by October 31, 2013, for tax years beginning on or after January 1, 2012, but beginning before January 1, 2013. This results in an Iowa taxpayers trust fund tax credit of \$54 for the tax year beginning on or after January 1, 2013, but beginning before January 1, 2014 (\$120,000,000 divided by 2,200,000 equals \$54.55, which

is rounded down to the nearest whole dollar). All taxpayers who file their Iowa individual income tax return by October 31, 2014, for the tax period beginning on or after January 1, 2013, but beginning before January 1, 2014, will be entitled to claim a \$54 Iowa taxpayers trust fund tax credit.

If the amount of Iowa taxpayers trust fund tax credits claimed on tax returns for a particular year is less than the amount authorized, the difference will be transferred to the Iowa taxpayers trust fund for the next year and will be available as an Iowa taxpayers trust fund tax credit for the next year. There must be a balance in the Iowa taxpayers trust fund of at least \$30 million in order for the Iowa taxpayers trust fund tax credit to be available.

EXAMPLE: There is \$120 million in the Iowa taxpayers trust fund at the end of the fiscal year ending June 30, 2013. The total amount of Iowa taxpayers trust fund tax credit claimed on Iowa tax returns for tax years beginning on or after January 1, 2013, but beginning before January 1, 2014, which were filed on or before October 31, 2014, is \$90 million. The difference of \$30 million will be transferred to the Iowa taxpayers trust fund for the fiscal year ending June 30, 2014. The legislature approves an additional \$60 million to be deposited in the Iowa taxpayers trust fund for the fiscal year ending June 30, 2014. This will result in \$90 million in the Iowa taxpayers trust fund for the fiscal year ending June 30, 2014. If 2,200,000 individuals file Iowa individual income tax returns for tax years beginning on or after January 1, 2013, but beginning before January 1, 2014, by October 31, 2014, this will result in a \$40 Iowa taxpayers trust fund tax credit for the tax year beginning on or after January 1, 2014, but beginning before January 1, 2015 (\$90,000,000 divided by 2,200,000 equals \$40.90, which is rounded down to the nearest whole dollar).

42.50(2) Claiming the credit on the tax return. The Iowa taxpayers trust fund is claimed on the amount of Iowa tax computed after all other nonrefundable credits allowed in division II of Iowa Code chapter 422 (excluding the Iowa taxpayers trust fund tax credit) are deducted, after the amount of school district surtax described in rule 701—42.1(257,422) and emergency medical services income surtax described in rule 701—42.2(422D) is added, and after all refundable credits (excluding estimated payments and tax withheld) allowed in division II of Iowa Code chapter 422 are deducted. Any Iowa taxpayers trust fund tax credit in excess of the tax liability is not refundable and shall not be carried back to the tax year prior to the tax year in which the credit is claimed and cannot be carried forward to a tax year for any following year.

EXAMPLE: A taxpayer reported a tax liability of \$100 on the taxpayer's 2013 Iowa income tax return. The taxpayer claimed a \$40 personal exemption credit and a \$25 franchise tax credit. This resulted in tax due of \$35 before applying the school district surtax. Taxpayer was subject to a \$2 school district surtax which resulted in total tax due of \$37. Taxpayer was entitled to claim a \$54 Iowa taxpayers trust fund tax credit, but only \$37 of credit could be applied on the 2013 Iowa return. The remaining \$17 of credit cannot be refunded, cannot be applied to a prior year tax liability, and cannot be carried forward to be applied to a subsequent year tax liability.

This rule is intended to implement Iowa Code section 422.11E.

[ARC 1102C, IAB 10/16/13, effective 11/20/13; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—42.51(422,85GA,SF452) From farm to food donation tax credit. Effective for tax years beginning on or after January 1, 2014, a taxpayer that donates a food commodity that the taxpayer produces may claim a tax credit for Iowa individual income tax. The credit is equal to 15 percent of the value of the commodities donated during the tax year for which the credit is claimed or \$5,000, whichever is less. The value of the commodities shall be determined in the same manner as a charitable contribution of food for federal tax purposes under Section 170(e)(3)(C) of the Internal Revenue Code.

To qualify for the tax credit, the taxpayer (1) must produce the donated food commodity; (2) must transfer title to the donated food commodity to an Iowa food bank or Iowa emergency feeding organization recognized by the department; and (3) shall not receive remuneration for the transfer. The donated food commodity cannot be damaged or out-of-condition and declared to be unfit for human consumption by a federal, state, or local health official. A food commodity that meets the requirements for donated foods pursuant to the federal Emergency Food Assistance Program satisfies this requirement.

To be recognized by the department, a food bank or emergency feeding organization must either be a recognized affiliate of one of the eight partner food banks with the Iowa Food Bank Association or must register with the department. To register with the department, the organization must meet the definition of “emergency feeding organization,” “food bank,” or “food pantry” as defined by the department of human services in 441—66.1(234). The department of revenue will make registration forms available on the department’s Web site. The department will maintain a list of recognized organizations on the department’s Web site.

Food banks and emergency feeding organizations that receive eligible donations shall be required to issue receipts in a format prescribed by the department for all donations received and must annually submit to the department a receipt log of all the receipts issued during the tax year. The receipt log must be submitted in the form of a spreadsheet with column specifications as provided by the department. Receipt logs showing the donations for the previous calendar year must be delivered electronically or mailed to the department postmarked by January 15 of each year. If a receipt for a taxpayer’s claim is not provided by the organization, the taxpayer’s claim will be denied.

To claim the credit, a taxpayer shall submit to the department the original receipts that were issued by the food bank or emergency feeding organization. The receipt must include quantity information completed by the food bank or emergency feeding organization, taxpayer information, and a donation valuation consistent with Section 170(e)(3)(C) of the Internal Revenue Code completed by the taxpayer. Claims must be postmarked on or before January 15 of the year following the tax year for which the claim is requested. Once the department verifies the amount of the tax credit, a letter will be sent to the taxpayer providing the amount of the tax credit and a tax credit certificate number.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is earlier. The tax credit shall not be carried back to a tax year prior to the year in which the owner redeems the credit. The credit is not transferable to any other person other than the taxpayer’s estate or trust upon the death of the taxpayer.

If the producer is a partnership, limited liability company, S corporation, estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual’s pro rata share of the individual’s earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement 2013 Iowa Acts, Senate File 452, division XVIII.
[ARC 1138C, IAB 10/30/13, effective 12/4/13]

701—42.52(422) Adoption tax credit. Effective for tax years beginning on or after January 1, 2014, an adoption tax credit is available for individual income tax equal to the amount of qualified adoption expenses paid or incurred by a taxpayer related to the adoption of a child during the tax year, not to exceed \$2,500 per adoption.

42.52(1) Definitions. The following definitions are applicable to this rule:

“*Adoption*” means the permanent placement in Iowa of a child by the department of human services, by a licensed agency under Iowa Code chapter 238, by an agency that meets the provision of the interstate compact in Iowa Code section 232.158, or by a person making an independent placement according to the provisions of Iowa Code chapter 600.

“*Child*” means an individual who is under the age of 18 years.

“*Qualified adoption expenses*” means unreimbursed expenses paid or incurred in connection with the adoption of a child, including medical and hospital expenses of the biological mother which are incident to the child’s birth, welfare agency fees, legal fees, and all other fees and costs related to the adoption of a child. Expenses which are eligible for the federal adoption credit as provided in Section 23(d)(1) of the Internal Revenue Code will be considered qualified adoption expenses. Expenses paid or incurred in violation of state or federal law are not qualified adoption expenses.

42.52(2) Claiming the credit. The first \$2,500 of qualified adoption expenses is eligible for the credit. If the qualified adoption expenses are less than \$2,500, then the total amount of qualified expenses can be claimed as a credit. Any credit in excess of the taxpayer’s tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following

tax year. The amount of tax credit claimed cannot be used as an itemized deduction for adoption expenses provided in 701—subrule 41.5(3).

This rule is intended to implement 2014 Iowa Acts, House File 2468.
[ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—42.53(15) Workforce housing tax incentives program. Effective July 1, 2014, a business which qualifies under the workforce housing tax incentives program is eligible to receive tax incentives for individual income tax. The workforce housing tax incentives program replaces the eligible housing business enterprise zone program. An eligible business under the workforce housing tax incentives program must be approved by the economic development authority and must meet the requirements of 2014 Iowa Acts, House File 2448, section 15. The administrative rules for the workforce housing tax incentives program for the economic development authority may be found at 261—Chapter 48.

42.53(1) Definitions.

“*Costs directly related*” means expenditures that are incurred for construction of a housing project to the extent that they are attributable directly to the improvement of the property or its structures. “Costs directly related” includes expenditures for property acquisition, site preparation work, surveying, construction materials, construction labor, architectural services, engineering services, building permits, building inspection fees, and interest accrued on a construction loan during the time period allowed for project completion under an agreement entered into pursuant to the program. “Costs directly related” does not include expenditures for furnishings, appliances, accounting services, legal services, loan origination and other financing costs, syndication fees and related costs, developer fees, or the costs associated with selling or renting the dwelling units whether incurred before or after completion of the housing project.

“*Qualifying new investment*” means costs that are directly related to the acquisition, repair, rehabilitation, or redevelopment of a housing project in this state. For purposes of this rule, “costs directly related to acquisition” includes the costs associated with the purchase of real property or other structures. “Qualifying new investment” includes costs that are directly related to new construction of dwelling units if the new construction occurs in a distressed workforce housing community. The amount of costs that may be used to compute “qualifying new investment” shall not exceed the costs used for the first \$150,000 of value for each dwelling unit that is part of a housing project.

“Qualifying new investment” does not include the following:

1. The portion of the total cost of a housing project that is financed by federal, state, or local government tax credits, grants, forgivable loans, or other forms of financial assistance that do not require repayment, excluding the tax incentives provided under this program.
2. If a housing project includes the rehabilitation, repair, or redevelopment of an existing multi-use building, the portion of the total acquisition costs of the multi-use building, including a proportionate share of the total acquisition costs of the land upon which the multi-use building is situated, that are attributable to the street-level ground story that is used for a purpose that is other than residential.
3. Any costs, including acquisition costs, incurred before the housing project is approved by the economic development authority.

42.53(2) Workforce housing tax incentives. The economic development authority will allocate no more than \$20 million in tax incentives for this program for any fiscal year. A housing business that has entered into an agreement with the economic development authority is eligible to receive the tax incentives described in the following paragraphs:

a. Sales tax refund. A housing business may claim a refund of the sales and use tax described in rule 701—12.9(15).

b. Investment tax credit. A housing business may claim a tax credit in an amount not to exceed 10 percent of the qualifying new investment in a housing project. An individual may claim a tax credit if the housing business is a partnership, limited liability company, S corporation, estate, or trust electing to have income taxed directly to the individual. The amount claimed by the individual shall be based upon the pro rata share of the individual’s earnings from the partnership, limited liability company, S corporation, estate, or trust. Any tax credit in excess of the taxpayer’s liability for the tax year is not

refundable but may be credited to the tax liability for the following five years or until depleted, whichever is earlier.

42.53(3) *Claiming the tax credit.* The taxpayer must receive a tax credit certificate from the economic development authority to claim the eligible housing business tax credit. The tax credit certificate shall include the taxpayer's name, the taxpayer's address, the taxpayer's tax identification number, the date the project was completed, the amount of the eligible housing business tax credit and the tax year for which the credit may be claimed. In addition, the tax credit certificate shall include a place for the name and tax identification number of a transferee and the amount of the tax credit being transferred, as provided in subrule 42.53(5). The tax credit certificate must be included with the income tax return for the tax period in which the housing is ready for occupancy.

42.53(4) *Basis adjustment.* The increase in the basis of the property that would otherwise result from the qualifying new investment shall be reduced by the amount of the investment tax credit. For example, if a new housing project had qualifying new investment of \$1 million which resulted in a \$100,000 investment tax credit for Iowa tax purposes, the basis of the property for Iowa income tax purposes would be \$900,000.

42.53(5) *Transfer of the credit.* Tax credit certificates issued under an agreement entered into pursuant to subrule 42.53(3) may be transferred to any person. Within 90 days of transfer, the transferee shall submit the transferred tax credit certificate to the department of revenue along with a statement containing the transferee's name, tax identification number, and address, the denomination that each replacement tax credit certificate is to carry, and any other information required by the department of revenue. However, tax credit certificate amounts of less than the minimum amount established in rule by the economic development authority shall not be transferable. Within 30 days of receiving the transferred tax credit certificate and the transferee's statement, the department of revenue shall issue one or more replacement tax credit certificates to the transferee. Each replacement tax credit certificate must contain the information required for the original tax credit certificate and must have the same expiration date that appeared on the transferred tax credit certificate. A tax credit shall not be claimed by a transferee under this rule until a replacement tax credit certificate identifying the transferee as the proper holder has been issued. The transferee may use the amount of the tax credit transferred for any tax year the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit shall not be deducted from Iowa taxable income for individual income, corporation income, or franchise tax purposes.

42.53(6) *Repayment of benefits.* If the housing business fails to maintain the requirements of Iowa Code section 15.353, the taxpayer may be required to repay all or a portion of the tax incentives the taxpayer received. Irrespective of the fact that the statute of limitations to assess the taxpayer for repayment of the income tax credit may have expired, the department may proceed to collect the tax incentives forfeited by failure of the taxpayer to maintain the requirements of 2014 Iowa Acts, House File 2448, section 15. This repayment is required because it is a recovery of an incentive, rather than an adjustment to the taxpayer's tax liability. Details on the calculation of the repayment can be found in 261—subrule 187.5(4) of the administrative rules of the economic development authority. If the business is a partnership, limited liability company, S corporation, estate or trust where the income of the taxpayer is taxed to the individual owner(s) of the business, the department may proceed to collect the tax incentives against the partners, members, shareholders or beneficiaries to whom the tax incentives were passed through. See Decision of the Administrative Law Judge in *Damien & Colette Trebilcock, et al.*, Docket No. 11DORF 042-044, June 11, 2012.

This rule is intended to implement 2014 Iowa Acts, House File 2448.
[ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—42.54(404A,422) Historic preservation and cultural and entertainment district tax credit for projects with Part 2 applications approved on or after July 1, 2014, and agreements entered into on or after July 1, 2014. The department of cultural affairs is authorized by the general assembly to award tax credits for a percentage of the qualified rehabilitation expenditures on a qualified rehabilitation

project as described in the historic preservation and cultural and entertainment district tax credit program, Iowa Code chapter 404A. The program is administered by the department of cultural affairs with the assistance of the department of revenue. The general assembly has mandated that the department of cultural affairs and the department of revenue adopt rules to jointly administer Iowa Code chapter 404A. In general, the department of cultural affairs is responsible for evaluating whether projects comply with the prescribed standards for rehabilitation while the department of revenue is responsible for evaluating whether projects comply with the tax aspects of the program.

2014 Iowa Acts, House File 2453, amended the historic preservation and cultural and entertainment district tax credit program effective July 1, 2014. The department of revenue's provisions for projects with Part 2 applications approved and tax credits reserved prior to July 1, 2014, are found in rule 701—42.19(404A,422). The department of revenue's provisions for projects with Part 2 applications approved on or after July 1, 2014, and with agreements entered into on or after July 1, 2014, are found in this rule. The department of cultural affairs' rules related to this program may be found at 223—Chapter 48. Division I of 223—Chapter 48 applies to projects with tax credit reservations approved prior to July 1, 2014. Division II of 223—Chapter 48 applies to projects with Part 2 applications approved on or after July 1, 2014, and agreements entered into on or after July 1, 2014.

Notwithstanding anything contained herein to the contrary, the department of cultural affairs shall not reserve tax credits under 2013 Iowa Code chapter 404A as amended by 2013 Iowa Acts, chapter 112, section 1, for applicants that do not have an approved Part 2 application and a tax credit reservation on or before June 30, 2014. Projects with approved Part 2 applications and provisional tax credit reservations on or before June 30, 2014, shall be governed by 2013 Iowa Code chapter 404A as amended by 2013 Iowa Acts, chapter 112, section 1; by 223—Chapter 48, Division I; and by rule 701—42.19(404A,422). Projects for which Part 2 applications were approved and agreements entered into after June 30, 2014, shall be governed by 2014 Iowa Acts, House File 2453; by 223—Chapter 48, Division II; and by this rule.

42.54(1) *Application, registration, and agreement for the historic preservation and cultural and entertainment district tax credit.* Taxpayers that want to claim an income tax credit for completing a qualified rehabilitation project must submit an application for approval of the project. The application forms and instructions for the historic preservation and cultural and entertainment district tax credit are available on the department of cultural affairs' Web site. Once a project is registered, the taxpayer must enter into an agreement with the department of cultural affairs to be eligible for the credit.

42.54(2) *Computation of the amount of the historic preservation and cultural and entertainment district tax credit.* The amount of the historic preservation and cultural and entertainment district tax credit is a maximum of 25 percent of the qualified rehabilitation expenditures verified by the department of cultural affairs and the department of revenue following project completion, up to the amount specified in the agreement between the taxpayer and the department of cultural affairs.

42.54(3) *Qualified rehabilitation expenditures.* "Qualified rehabilitation expenditures" means the same as defined in rule 223—48.22(404A) of the historical division of the department of cultural affairs. In general, the department of cultural affairs evaluates whether expenditures comply with the prescribed standards for rehabilitation while the department of revenue evaluates whether expenditures comply with the tax requirements to be considered qualified rehabilitation expenditures, including whether the expenditures are in accordance with the requirements of Internal Revenue Code Section 47 and its related regulations.

a. Type of property and services eligible. In accordance with Iowa Code section 404A.1(6), the types of property and services claimed for the state tax credit must be "qualified rehabilitation expenditures" in accordance with Internal Revenue Code Section 47. Notwithstanding the foregoing sentence, expenditures incurred by an eligible taxpayer that is a nonprofit organization as defined in Iowa Code section 404A.1(4) shall be considered "qualified rehabilitation expenditures" if they are for "structural components," as that term is defined in Treasury Regulation § 1.48-1(e)(2), and for amounts incurred for architectural and engineering fees, site survey fees, legal expenses, insurance premiums, development fees and other construction-related costs.

b. Effect of financing sources on eligibility of expenditures. Qualified rehabilitation expenditures do not include expenditures financed by federal, state, or local government grants or forgivable loans unless otherwise allowed under Section 47 of the Internal Revenue Code. For an eligible taxpayer that is a nonprofit organization as defined in Iowa Code section 404A.1(4) that is not eligible for the federal rehabilitation credit, or another person that is not eligible for the federal rehabilitation credit, expenditures financed with federal, state, or local government grants or forgivable loans are not qualified rehabilitation expenditures.

42.54(4) *Completion of the qualified rehabilitation project and claiming the tax credit on the Iowa return.* After the taxpayer completes a qualified rehabilitation project, the taxpayer will be issued a certificate of completion of the project from the department of cultural affairs if the project complies with the federal standards, as defined in rule 223—48.22(404A). After the department of cultural affairs and the department of revenue verify the taxpayer's eligibility for the tax credit, the department of cultural affairs shall issue a tax credit certificate. For the taxpayer to claim the credit, the certificate must be included with the taxpayer's income tax return for the tax year in which the rehabilitation project is completed or the year in which the certificate is issued, whichever is later.

a. Information required. The tax credit certificate shall include the taxpayer's name, the taxpayer's address, the taxpayer's tax identification number, the address or location of the rehabilitation project, the date the project was completed and the amount of the historic preservation and cultural and entertainment district tax credit. In addition, the tax credit certificate shall include a place for the name and tax identification number of a transferee and the amount of the tax credit being transferred, as provided in subrule 42.54(5). In addition, if the taxpayer is a partnership, limited liability company, estate or trust, and the tax credit is allocated to the owners or beneficiaries of the entity, a list of the owners or beneficiaries and the amount of credit allocated to each owner or beneficiary shall be provided with the certificate. The tax credit certificate shall be included with the income tax return for the period in which the project was completed or in which the certificate is issued, whichever is later.

b. Refund or carryforward. Any historic preservation and cultural and entertainment district tax credit in excess of the taxpayer's tax liability is fully refundable with interest computed under Iowa Code section 422.25. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

c. Allocation of historic preservation and cultural and entertainment district tax credits to the individual owners of the entity. A partnership, limited liability company or S corporation may designate the amount of the tax credit to be allocated to each partner, member or shareholder. The credit does not have to be allocated based on the pro rata share of earnings of the partnership, limited liability company or S corporation.

42.54(5) *Transfer of the historic preservation and cultural and entertainment district tax credit.* The historic preservation and cultural and entertainment district tax credit certificates may be transferred to any person or entity. The transferee may use the amount of the tax credit transferred against the taxes imposed in Iowa Code chapter 422, divisions II, III, and V, and in Iowa Code chapter 432, for any tax year the original transferor could have claimed the tax credit. Any credit in excess of the transferee's tax liability is not refundable. A tax credit certificate of less than \$1,000 shall not be transferable.

a. Transfer process—information required. Within 90 days of transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department of revenue along with a statement that contains the transferee's name, address and tax identification number, the amount of the tax credit being transferred, the amount of all consideration provided in exchange for the tax credit and the names of recipients of any consideration provided in exchange for the tax credit. If a payment of money was any part of the consideration provided in exchange for the tax credit, the transferee shall list the amount of the payment of money in its statement to the department of revenue. If any part of the consideration provided in exchange for the tax credit included nonmonetary consideration, including but not limited to any promise, representation, performance, discharge of debt or nonmonetary rights or property, the tax credit transferee shall describe the nature of the nonmonetary consideration and disclose any value the transferor and transferee assigned to the nonmonetary consideration. The tax credit transferee must indicate on its statement to the department of revenue if no consideration was

provided in exchange for the tax credit. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee, the department of revenue will issue the replacement tax credit certificate to the transferee. If the transferee is a partnership, limited liability company or S corporation, the transferee shall provide a list of the partners, members or shareholders and information on how the historic preservation and cultural and entertainment district tax credit should be divided among the partners, members or shareholders. The transferee shall also provide the tax identification numbers and addresses of the partners, members or shareholders. The certificate must have the same information required for the original tax certificate and must have the same expiration date as the original tax credit certificate. The transferee may not claim a tax credit until a replacement certificate identifying the transferee as the proper holder has been issued.

b. Consideration. Any consideration received for the transfer of the tax credit shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

42.54(6) Appeals. Challenges to an action by the department of revenue related to tax credit transfers, the claiming of tax credits, tax credit revocation, or repayment or recovery of tax credits must be brought pursuant to 701—Chapter 7.

This rule is intended to implement Iowa Code chapter 404A as amended by 2014 Iowa Acts, House File 2453, and Iowa Code section 422.11D.

CHAPTER 43
ASSESSMENTS AND REFUNDS
[Prior to 12/17/86, Revenue Department[730]]

701—43.1(422) Notice of discrepancies.

43.1(1) *Notice of adjustments.* A department employee designated by the director to examine returns and make audits who discovers discrepancies in returns or learns that the income of the taxpayer may not have been listed, in whole or in part, or that no return was filed when one was due is authorized to notify the taxpayer of this discovery by ordinary mail. The notice shall not be termed an assessment, and it may inform the taxpayer what amount would be due if the information discovered is correct.

43.1(2) *Right of taxpayer upon receipt of notice of adjustment.* A taxpayer who has received notice of an adjustment in connection with a return may pay the additional amount stated to be due. If payment is made, and the taxpayer wishes to contest the matter, the taxpayer should then file a claim for refund. However, payment will not be required until assessment has been made (although interest will continue to accrue if payment is not made). If no payment is made, the taxpayer may discuss with the agent, auditor, clerk or employee who notified the taxpayer of the discrepancy, either in person or through correspondence, all matters of fact and law which the taxpayer considers relevant to the situation. Documents and records supporting the taxpayer's position may be required.

43.1(3) Rescinded, effective 7/24/85.

This rule is intended to implement Iowa Code sections 422.25 and 422.30.

701—43.2(422) Notice of assessment, supplemental assessments and refund adjustments. If after following the procedure outlined in 43.1(2) no agreement is reached, and the taxpayer does not pay the amount determined to be correct, a notice of assessment shall be sent to the taxpayer by mail. If the period in which the correct amount of tax can be determined is nearly at an end, either a notice of assessment without compliance with 43.1(2) or a jeopardy assessment may be issued. All notices of assessment shall bear the signature of the director.

The department may, at any time within the period prescribed for assessment or refund adjustment, make a supplemental assessment or refund adjustment whenever it is ascertained that any assessment or refund adjustment is imperfect or incomplete in any respect.

If an assessment or refund adjustment is appealed (protested under rule 701—7.8(17A)) and is resolved whether by informal proceedings or by adjudication, the department and the taxpayer are precluded from making a supplemental assessment or refund adjustment concerning the same issue involved in the appeal for the same tax period unless there is a showing of mathematical or clerical error or a showing of fraud or misrepresentation. Nothing in this rule shall prevent the making of an assessment or refund adjustment for the purpose of taking into account the impact upon Iowa net income of federal audit adjustments.

This rule is intended to implement Iowa Code sections 422.25 and 422.30.
[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—43.3(422) Overpayments of tax. The following are provisions for refunding or crediting to the taxpayer's deposits or payments for tax in excess of amounts legally due.

43.3(1) *Claims for refund.* A claim for refund is a formal request made by the taxpayer or the taxpayer's personal representative to the department of revenue for repayment of state income tax that was paid with the taxpayer's previously filed individual income tax return. In order for a claim for refund to be considered to be a valid document, the taxpayer or the taxpayer's personal representative must file the claim on an IA 1040X Amended Return Form or on an IA 1040 Income Tax Return Form for the appropriate tax year, with the notation "Amended for Refund" clearly shown on the face of the return form. The taxpayer or the taxpayer's personal representative must file the claim for refund with the department under separate cover so the claim is not filed with another tax return or with other documents or forms submitted to the department.

In addition, the claim for refund must be filed within one of the time periods specified in Iowa Code section 422.73(1) in order for the refund claim to be timely so that the claim may be considered on its merits by the department.

If the department determines that the taxpayer's claim is without merit and the claim for refund should be rejected, the department will notify the taxpayer or the taxpayer's personal representative by mail that the claim for refund has been rejected and of the reason for rejection. In addition, the rejection letter will advise the taxpayer that the taxpayer has 60 days from the date of the letter to file a protest of the department's rejection of the claim for refund. The taxpayer's appeal of the rejection of the claim for refund must be filed in accordance with rule 701—7.8(17A).

43.3(2) *Offsetting refunds.* A taxpayer shall not offset a refund or overpayment of tax for one year as a prior payment of tax of a subsequent year on the return of a subsequent year without authorization in writing by the department. The department, may, however, apply an overpayment, or a refund otherwise due the taxpayer, to any tax due or to become due from the taxpayer.

43.3(3) *Setoffs of qualifying debts administered by the department of administrative services.* Before any refund or rebate from a taxpayer's individual income tax return is considered for purposes of setoff, the refund or rebate must be applied first to any outstanding tax liability of that taxpayer with the department of revenue. After all outstanding tax liabilities are satisfied, any remaining balance of refund or rebate will be set off against any debt of the taxpayer, setoff of which is overseen by the department of administrative services pursuant to 2003 Iowa Acts, House File 534, section 86.

43.3(4) *College loan setoff.* Rescinded IAB 11/12/03, effective 12/17/03.

43.3(5) *District court debts setoff.* Rescinded IAB 11/12/03, effective 12/17/03.

43.3(6) *Overpayment credited to estimated tax.* Any remaining balance of overpayment, at the election of the taxpayer, will be refunded to the taxpayer or credited as a first payment of the taxpayer's estimated tax for the following year. However, a taxpayer may elect to credit an overpayment from a return to the estimated tax for the following tax year only in cases when the return is filed in the same calendar year that the return is due. For example, a taxpayer's 1994 return is due on April 30, 1995. If the taxpayer files that return on or before December 31, 1995, the taxpayer can elect to credit an overpayment on that return to estimated tax for 1995, and this election will be honored by the department. See also rule 701—49.7(422).

If an overpayment of income tax is shown as a credit to estimated tax for the succeeding taxable year, the amount shall be considered as a payment of the income tax for the succeeding taxable year and no claim for credit or refund of the overpayment shall be allowed on the return where the overpayment arose.

When a taxpayer elects to have an overpayment credited to estimated tax for the succeeding year, interest may properly be assessed on a deficiency of income tax for the year in which the overpayment arose. If a taxpayer elects to have all or part of an overpayment shown on the return applied to the estimated income tax for the succeeding taxable year, the election is binding to the taxpayer.

An overpayment of tax may be used to offset any outstanding tax liability owed by the taxpayer, but once an elected amount is credited as a payment of estimated tax for the succeeding year, it loses its character as an overpayment for the year in which it arose and thereafter cannot offset any subsequently determined tax liability.

43.3(7) *Refunds—statute of limitations for years ending before January 1, 1979.* Rescinded IAB 10/12/94, effective 11/16/94.

43.3(8) *Refunds—statute of limitations for tax years ending on or after January 1, 1979.* The statute of limitations with respect to which refunds or credit may be claimed are:

a. The later of

- (1) Three years after due date of payment upon which refund or credit is claimed; or
- (2) One year after which such payment was actually made.

b. Six months from the date of final disposition of any federal income tax matter with respect to the particular tax year. The taxpayer, however, must have notified the department of the matter within six months after the specified three-year period, contained in paragraph "a," subparagraph (1), above. The term "matter" includes, but is not limited to, the execution of waivers and commencement of audits.

The refund is limited to those matters between the taxpayer and the Internal Revenue Service which affect Iowa taxable income. *Kelly-Springfield Tire Co. v. Iowa State Board of Tax Review*, 414 N.W.2d 113 (Iowa 1987).

c. For federal audits finalized on or after July 1, 1991, the taxpayer must claim a refund or credit within six months of final disposition of any federal income tax matter with respect to the particular tax year regardless when the tax year ended. It is not necessary for the taxpayer to have previously notified the department within the period of limitations specified in 43.3(8)“a”(1) above of a matter between the taxpayer and the Internal Revenue Service in order to receive a refund or credit. The term “matter” includes, but is not limited to, the execution of waivers and commencement of audits. The refund or credit is limited to those matters between the taxpayer and the Internal Revenue Service which affect Iowa taxable income. *Kelly-Springfield Tire Co. v. Iowa State Board of Tax Review*, 414 N.W. 2d 113 (Iowa 1987).

d. Three years after the date of the return for the year in which a net operating loss or capital loss occurs, which if carried back results in a reduction of tax in a prior period and an overpayment results.

43.3(9) Refunds—statute of limitations for individuals who died as a result of hostile action. Rescinded IAB 10/12/94, effective 11/16/94.

43.3(10) Refunds—statute of limitations for MIAs and spouses of MIAs. Rescinded IAB 10/12/94, effective 11/16/94.

43.3(11) Refunds—statute of limitations for insolvent farmers who received capital gains from farmland sold in 1982 and 1983. Rescinded IAB 10/12/94, effective 11/16/94.

43.3(12) Refunds—statute of limitations for individuals with certain charitable contributions. Rescinded IAB 10/12/94, effective 11/16/94.

43.3(13) Refunds—statute of limitations for taxpayers who paid state income tax on 1988 returns on certain supplemental assistance payments. Rescinded IAB 11/24/04, effective 12/29/04.

43.3(14) Refunds—statute of limitations for taxpayers who paid state income tax on returns for tax years where federal income tax was refunded due to a provision of the Taxpayer Relief Act of 1997. Rescinded IAB 9/19/12, effective 10/24/12.

43.3(15) Refunds—statute of limitations for taxpayers who paid 90 percent of the tax by the due date and filed the original return in the six-month extended period. If a taxpayer has paid 90 percent of the income tax required to be shown due by the original due date of the return and has filed the original income tax return sometime in the six-month extended period after the original due date, the taxpayer may file an amended return by October 31 of the third year following the year the original return was due and shall be within the statute of limitations for refund. This position is supported by the Iowa Supreme Court in *Conoco, Inc. v. Iowa Department of Revenue and Finance*, 477 N.W.2d 377 (Iowa 1991). See also 701—subrule 39.2(4) which pertains to the extended period for filing the Iowa income tax return when 90 percent of the tax is paid by the original due date of the Iowa income tax return.

EXAMPLE 1. Joe Barnes had paid at least 90 percent of the tax shown due on his 1999 Iowa income tax return by the April 30 original due date and filed his original 1999 Iowa return on May 15, 2000. Mr. Barnes determined that he had failed to claim several deductions on the original 1999 Iowa return, so he filed an amended 1999 return on October 31, 2003. The amended return was filed within the three-year statute of limitations for refund since it was filed within three years of the extended due date of the return, October 31, 2000. The six-month extended due date applied in this case because the original return was filed within the six-month extended period.

EXAMPLE 2. Fred Jones paid 90 percent of the tax shown due on his 1999 return by the April 30 original due date and filed the original return on or before the April 30, 2000, original due date for this return. Mr. Jones determined that when he filed the original 1999 Iowa return, he failed to claim the Iowa income tax withheld from a part-time job he held in 1999. Mr. Jones filed an amended 1999 Iowa return on May 15, 2003, to claim the Iowa tax withheld that he had failed to claim on the original return. This amended return was rejected by the department because it was not filed within three years of the

due date of the return. Although Mr. Jones had paid 90 percent of the tax by the due date, the due date was not extended because the original return had been filed by the due date of April 30, 2000.

This rule is intended to implement Iowa Code sections 421.17, 422.2 and 422.16 and section 422.73 as amended by 2012 Iowa Acts, Senate File 2328.

[ARC 0251C, IAB 8/8/12, effective 9/12/12; ARC 0337C, IAB 9/19/12, effective 10/24/12; ARC 1303C, IAB 2/5/14, effective 3/12/14]

701—43.4(68A,422,456A) Optional designations of funds by taxpayer.

43.4(1) *Iowa fish and game protection fund.* The taxpayer may designate an amount to be donated to the Iowa fish and game protection fund. The donation must be \$1 or more, and the designation must be made on the original return for the current year. The donation is allowed only after obligations of the taxpayer to the department of revenue, the child support recovery unit of the department of human services, the foster care recovery unit of the department of human services, the college student aid commission, the office of investigations of the department of human services, the district courts, other state agencies, and the Iowa election campaign checkoff have been satisfied. The designation to the fund is irrevocable and cannot be made on an amended return. If the amount of refund claimed on the original return or the payment remitted with the return is adjusted by the department, the amount of the designation to the fund may be adjusted accordingly.

EXAMPLE A: Overpayment as shown on the original return is \$50. \$25 is designated to the fund. Due to an error on the return, only \$20 is an overpayment. The taxpayer would not receive any refund and all \$20 of the overpayment would be credited to the fund.

EXAMPLE B: Overpayment as shown on the original return is \$50. \$25 is designated to the fund. Due to an error on the return, no overpayment occurred, but instead the taxpayer owes \$20. No money would be credited to the fund in this instance.

EXAMPLE C: Amount shown due on return is \$30. \$20 is designated to the fund. A \$50 payment was made with the return. Due to an error on the return, the taxpayer owes \$40. Only \$10 would be credited to the fund in this situation.

43.4(2) *Iowa election campaign fund.* A person with a tax liability of \$1.50 or more on the Iowa individual income tax return may direct or designate that a \$1.50 contribution be made to a specific political party or that the contribution be made to the Iowa election campaign fund to be shared by all political parties as clarified further in this paragraph. In the case of married taxpayers filing a joint Iowa individual return with a tax liability of \$3.00 or more, each spouse may direct or designate that a \$1.50 contribution be made to a specific political party or that a \$1.50 contribution be made to the Iowa election campaign fund as a contribution to be shared by all political parties. The designation or direction of a contribution to a political party or to the election campaign fund is irrevocable and cannot be changed on an amended return. The designation to a political party or the election campaign fund is allowed only after obligations of the taxpayer to the department of revenue, the child support recovery unit of the department of human services, the foster care recovery unit of the department of human services, the college student aid commission, the office of investigations of the department of human services, the district courts and other state agencies are satisfied. Note that for purposes of this subrule, “political party” means a party as defined in Iowa Code section 43.2.

In a tax year when there are two political parties for purposes of the Iowa election campaign fund, all undesignated contributions to the fund made on individual income tax returns for that tax year are to be divided equally between the two parties. In a tax year where there are more than two political parties for purposes of the Iowa election campaign fund, all undesignated contributions to the fund made on income tax returns for that tax year are to be divided among the political parties on the basis of the number of registered voters for a particular political party on December 31 of that tax year to the total number of registered voters on December 31 of that tax year that have declared an affiliation with any of the recognized political parties.

Thus, if there were 400,000 registered voters for “x” political party, 500,000 registered voters for “y” political party, and 100,000 registered voters for “z” political party on December 31 of a tax year where there were three recognized political parties, 40 percent of the undesignated political contributions

on 1997 returns would be paid to “x” political party since 40 percent of the registered voters with an affiliation to a political party on December 31 had an affiliation with party “x” on that day.

43.4(3) Domestic abuse services checkoff. Rescinded IAB 11/30/11, effective 1/4/12.

43.4(4) State fair foundation fund checkoff. For tax years beginning on or after January 1, 1993, a taxpayer filing a state individual income tax return can designate a checkoff of \$1 or more to the foundation fund of the Iowa state fair foundation. If the overpayment on the return or the payment made with the filing of the return is not sufficient to cover the amount designated to the foundation fund checkoff, the amount credited to the foundation fund checkoff will be reduced accordingly. The designation to the foundation fund checkoff is irrevocable.

A designation to the foundation fund checkoff may be allowed only after obligations of the taxpayer to the department of revenue, the child support recovery unit of the department of human services, the foster care recovery unit of the department of human services, the college student aid commission, the office of investigations of the department of human services, the district courts, other state agencies, the Iowa election campaign checkoff, and the Iowa fish and game protection fund checkoff are satisfied.

On or before January 31 of the year following the year in which returns with the foundation fund checkoff are due, the department of revenue shall transfer the total amount designated to the foundation fund.

43.4(5) Limitation of checkoffs on the individual income tax return. For tax years beginning on or after January 1, 1995, but before January 1, 2004, no more than three checkoffs are allowed on the individual income tax return. The election campaign fund checkoff is not considered for purposes of limiting the number of checkoffs on the income tax return. When the same three checkoffs have been provided on the income tax return for three consecutive years, the checkoff for which the least amount has been contributed in the aggregate for the first two years and through March 15 of the third tax year will be repealed.

For example, the 1999 Iowa individual income tax return due in 2000 includes checkoffs A, B and C which also were shown on the Iowa returns for 1997, 1998 and 1999. Through March 15, 2000, \$90,000 was contributed on the 1997, 1998 and 1999 returns for checkoff A, \$60,000 was contributed for checkoff B and \$120,000 for checkoff C. Since the least amount contributed in the aggregate was for checkoff B, that checkoff is repealed and will not appear on the 2000 Iowa income tax return to be filed in 2001.

For tax years beginning on or after January 1, 2004, no more than four checkoffs are allowed on the individual income tax return. The election campaign fund checkoff is not considered for purposes of limiting the number of checkoffs on the income tax return. When the same four checkoffs have been provided on the income tax return for two consecutive years, the two checkoffs for which the least amount has been contributed in the aggregate for the first year and through March 15 of the second tax year will be repealed.

If more checkoffs are enacted in the same session of the general assembly than there is space for inclusion on the individual income tax return form, the earliest enacted checkoffs for which there is space will be included on the income tax return form, and all other checkoffs enacted during that session of the general assembly are repealed. If the same session of the general assembly enacts more checkoffs on the same day than there is space for inclusion on the individual income tax form, the director of revenue shall determine which checkoffs shall be included on the individual income tax form.

43.4(6) Keep Iowa beautiful fund checkoff. For tax years beginning on or after January 1, 2001, but before January 1, 2006, a taxpayer filing an individual income tax return can designate a checkoff of \$1 or more to the keep Iowa beautiful fund. If the refund due on the return or the payment remitted with the return is insufficient to pay the additional amount designated by the taxpayer to the keep Iowa beautiful fund, the amount credited to the keep Iowa beautiful fund will be reduced accordingly. Once the taxpayer has designated a contribution to the keep Iowa beautiful fund on an individual income tax return filed with the department of revenue, the taxpayer cannot amend the designation.

A designation to the keep Iowa beautiful checkoff may be allowed only after obligations of the taxpayer to the department of revenue, the child support recovery unit of the department of human services, the foster care recovery unit of the department of human services, the college student aid

commission, the office of investigations of the department of human services, the district courts, other state agencies, the Iowa election campaign checkoff, the Iowa fish and game protection fund checkoff and the state fair foundation checkoff are satisfied.

On or before January 31 of the year following the year in which Iowa income tax returns with contributions to the keep Iowa beautiful fund are due, the department of revenue shall transfer the total amount designated to the keep Iowa beautiful fund.

43.4(7) *Volunteer fire fighter preparedness fund checkoff.* For tax years beginning on or after January 1, 2004, but before January 1, 2006, a taxpayer filing an individual income tax return can designate a checkoff of \$1 or more to the volunteer fire fighter preparedness fund. If the refund due on the return or the payment remitted with the return is insufficient to pay the additional amount designated by the taxpayer to the volunteer fire fighter preparedness fund, the amount credited to the volunteer fire fighter preparedness fund will be reduced accordingly. Once the taxpayer has designated a contribution to the volunteer fire fighter preparedness fund on an individual income tax return filed with the department of revenue, the taxpayer cannot amend that designation.

A designation to the volunteer fire fighter preparedness fund checkoff may be allowed only after obligations of the taxpayer to the department of revenue, the child support recovery unit of the department of human services, the foster care recovery unit of the department of human services, the college student aid commission, the office of investigations of the department of human services, the district courts, other state agencies, the Iowa election campaign checkoff, the Iowa fish and game protection fund checkoff, the state fair foundation checkoff and the keep Iowa beautiful fund checkoff are satisfied.

On or before January 31 of the year following the year in which Iowa income tax returns with contributions to the volunteer fire fighter preparedness fund are due, the department of revenue is to certify to the state treasurer the amount designated to the volunteer fire fighter preparedness fund on those returns.

43.4(8) *Veterans trust fund checkoff.* For tax years beginning on or after January 1, 2006, but before January 1, 2008, a taxpayer filing an individual income tax return can designate a checkoff of \$1 or more to the veterans trust fund. If the refund due on the return or the payment remitted with the return is insufficient to pay the additional amount designated by the taxpayer to the veterans trust fund, the amount credited to the veterans trust fund will be reduced accordingly. Once the taxpayer has designated a contribution to the veterans trust fund on an individual income tax return filed with the department of revenue, the taxpayer cannot amend that designation.

A designation to the veterans trust fund checkoff may be allowed only after obligations of the taxpayer to the department of revenue, the child support recovery unit of the department of human services, the foster care recovery unit of the department of human services, the college student aid commission, the office of investigations of the department of human services, the district courts, other state agencies, the Iowa election campaign checkoff, the Iowa fish and game protection fund checkoff and the state fair foundation checkoff are satisfied.

On or before January 31 of the year following the year in which Iowa income tax returns with contributions to the veterans trust fund are due, the department of revenue shall transfer the total amount designated to the veterans trust fund.

43.4(9) *Joint keep Iowa beautiful fund and volunteer fire fighter preparedness fund checkoff.* For tax years beginning on or after January 1, 2006, but before January 1, 2008, a taxpayer filing an individual income tax return can designate a checkoff of \$1 or more to the joint keep Iowa beautiful fund and volunteer fire fighter preparedness fund. If the refund due on the return or the payment remitted with the return is insufficient to pay the additional amount designated by the taxpayer to the joint keep Iowa beautiful fund and volunteer fire fighter preparedness fund, the amount credited to the joint keep Iowa beautiful fund and volunteer fire fighter preparedness fund will be reduced accordingly. Once the taxpayer has designated a contribution to the joint keep Iowa beautiful fund and volunteer fire fighter preparedness fund on an individual income tax return filed with the department of revenue, the taxpayer cannot amend that designation.

A designation to the joint keep Iowa beautiful fund and volunteer fire fighter preparedness fund checkoff may be allowed only after obligations of the taxpayer to the department of revenue, the child

support recovery unit of the department of human services, the foster care recovery unit of the department of human services, the college student aid commission, the office of investigations of the department of human services, the district courts, other state agencies, the Iowa election campaign checkoff, the Iowa fish and game protection fund checkoff, the state fair foundation checkoff and the veterans trust fund checkoff are satisfied.

On or before January 31 of the year following the year in which Iowa income tax returns with contributions to the joint keep Iowa beautiful fund and volunteer fire fighter preparedness fund are due, the department of revenue shall transfer one-half of the total amount designated to the keep Iowa beautiful fund, and the remaining one-half will be transferred to the volunteer fire fighter preparedness fund.

43.4(10) *Child abuse prevention program fund checkoff.* For tax years beginning on or after January 1, 2008, a taxpayer filing an individual income tax return can designate a checkoff of \$1 or more to the child abuse prevention program fund. If the refund due on the return or the payment remitted with the return is insufficient to pay the additional amount designated by the taxpayer to the child abuse prevention program fund, the amount credited to the child abuse prevention program fund will be reduced accordingly. Once the taxpayer has designated a contribution to the child abuse prevention program fund on an individual income tax return filed with the department of revenue, the taxpayer cannot amend that designation.

A designation to the child abuse prevention program fund checkoff may be allowed only after obligations of the taxpayer to the department of revenue, the child support recovery unit of the department of human services, the foster care recovery unit of the department of human services, the college student aid commission, the office of investigations of the department of human services, the district courts, other state agencies, the Iowa election campaign checkoff, the Iowa fish and game protection fund checkoff and the state fair foundation fund checkoff are satisfied.

On or before January 31 of the year following the year in which Iowa income tax returns with contributions to the child abuse prevention program fund are due, the department of revenue shall transfer the total amount designated to the child abuse prevention program fund.

43.4(11) *Joint veterans trust fund and volunteer fire fighter preparedness fund checkoff.* For tax years beginning on or after January 1, 2008, a taxpayer filing an individual income tax return can designate a checkoff of \$1 or more to the joint veterans trust fund and volunteer fire fighter preparedness fund. If the refund due on the return or the payment remitted with the return is insufficient to pay the additional amount designated by the taxpayer to the joint veterans trust fund and volunteer fire fighter preparedness fund, the amount credited to the joint veterans trust fund and volunteer fire fighter preparedness fund will be reduced accordingly. Once the taxpayer has designated a contribution to the joint veterans trust fund and volunteer fire fighter preparedness fund on an individual income tax return filed with the department of revenue, the taxpayer cannot amend that designation.

A designation to the joint veterans trust fund and volunteer fire fighter preparedness fund checkoff may be allowed only after obligations of the taxpayer to the department of revenue, the child support recovery unit of the department of human services, the foster care recovery unit of the department of human services, the college student aid commission, the office of investigations of the department of human services, the district courts, other state agencies, the Iowa election campaign checkoff, the Iowa fish and game protection fund checkoff, the state fair foundation fund checkoff and the child abuse prevention program fund checkoff are satisfied.

On or before January 31 of the year following the year in which Iowa income tax returns with contributions to the joint veterans trust fund and volunteer fire fighter preparedness fund are due, the department of revenue shall transfer one-half of the total amount designated to the veterans trust fund, and the remaining one-half will be transferred to the volunteer fire fighter preparedness fund.

This rule is intended to implement Iowa Code sections 422.12D, 422.12E, 422.12H, 422.12K and 422.12L and 2014 Iowa Acts, House File 2473.

[ARC 9103B, IAB 9/22/10, effective 10/27/10; ARC 9876B, IAB 11/30/11, effective 1/4/12; ARC 0337C, IAB 9/19/12, effective 10/24/12; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—43.5(422) Abatement of tax. For notices of assessment issued on or after January 1, 1995, if the statutory period for appeal has expired, the director may abate any portion of unpaid tax, penalties or interest which the director determines to be erroneous, illegal, or excessive. See rule 701—7.31(421) for procedures on requesting abatement of tax.

This rule is intended to implement Iowa Code section 421.60.

701—43.6(422) 1978 Income tax rebate. Rescinded IAB 11/24/04, effective 12/29/04.

701—43.7(422) Special refund for taxpayers with net long-term capital gains in the tax year. Rescinded IAB 11/24/04, effective 12/29/04.

701—43.8(422) Livestock production credit refunds for corporate taxpayers and individual taxpayers. For tax years beginning on or after January 1, 1996, corporate and individual taxpayers who own certain livestock, who have livestock production operations in Iowa in the tax year, and who meet certain qualifications are eligible for a livestock production credit refund. The amount of a livestock production credit refund is determined by adding together for each head of livestock in the taxpayer's operation the product of 10 cents for each corn equivalent deemed to have been consumed by that animal in the taxpayer's operation in the tax year. For tax years beginning on or after January 1, 1998, only qualified taxpayers that have cow-calf livestock operations described in paragraph "o" of subrule 43.8(2) will be eligible for the livestock production refunds, notwithstanding the other types of livestock operations mentioned in this rule. Note that the livestock production credit refund is also available to taxpayers who meet the qualifications described in subrule 43.8(1) and operate certain types of poultry operations in this state and own the poultry in the operations. The amounts of the livestock production credit refunds for these taxpayers are determined on the basis of 10 cents for each corn equivalent deemed to have been consumed by the chickens or the turkeys in the taxpayers' poultry operations in the tax year. However, the amount of livestock production credit refund may not exceed \$3,000 per livestock or poultry operation for a tax year. In addition, the amount of livestock production credit refund per taxpayer for a tax year may not exceed \$3,000. Therefore, if a particular taxpayer is involved in a cow-calf beef operation, a sheep-ewe flock operation, and a farrow-to-finish hog operation, the maximum livestock production credit refund for this taxpayer may not exceed \$3,000.

General references in this rule to livestock, livestock production, and livestock production operations also apply to poultry, poultry production, and poultry production operations.

In the case of married taxpayers, each of the spouses may be eligible for a livestock production refund of up to \$3,000 if each of the spouses was involved in a livestock production operation independently from the other spouse and independently from other taxpayers in the tax year. If both spouses are involved in the same livestock operation, the maximum refund from that operation is \$3,000 which may be allocated between the individuals in the ratio of each spouse's ownership interest in the operation. If a livestock production operation is conducted by a partnership, limited liability company, subchapter S corporation, estate, or a trust, the livestock production credit refund from the entity is to be allocated to the owners of the entity in the same ratio as earnings are allocated to the owners. In situations where a livestock production operation is conducted partly within and partly without Iowa, only the livestock production activity in Iowa during the tax year will be considered for purposes of the livestock credit refund. The livestock production refund amounts for these taxpayers is to be allocated on the basis of sales of Iowa livestock which qualify taxpayers for the livestock production refund to total sales of livestock which qualify taxpayers for the refund. However, the refunds from any operations may not exceed \$3,000. The following subrules outline how the livestock production credit refund program is to be administered by the department of revenue:

43.8(1) *Qualifications for the livestock production credit refunds.* For tax years beginning on or after January 1, 1997, individual and corporate taxpayers will be eligible for the livestock production credit refund if the taxpayer's federal taxable income is \$99,600 or less. In the case of married taxpayers, their combined federal taxable income must be considered to determine if they are eligible for the credit.

For each tax year beginning after 1997, the federal taxable income specified previously in this subrule shall be multiplied by the cumulative index factor for that tax year to calculate the federal taxable income that will be used to determine whether a taxpayer is eligible for the livestock production refund that is authorized for that tax year. "Cumulative index factor" means the product of the annual index factor for the 1997 calendar year and all annual index factors for subsequent calendar years. The annual index factor equals the annual inflation factor for that calendar year as computed in Iowa Code section 422.4 for purposes of indexation of the tax rates for individual income tax.

43.8(2) *Definitions related to the livestock production credit refunds.* The following definitions explain livestock and poultry for purposes of this rule. The definitions also describe the various types of livestock operations of taxpayers which may qualify the taxpayers for the livestock production credit refunds and specify how the refunds are to be computed for the various types of livestock operations:

a. For the purposes of this rule, the term "livestock" means domestic bovine animals which will be referred to as bulls, heifers, cattle, calves, or cows in this rule, domestic ovine animals which will be referred to as sheep, lambs, rams, or ewes, or domestic swine which will be referred to as hogs or pigs. That is, for purposes of this rule, "livestock" includes only those farm animals which may qualify their owners for the livestock production credit refund. "Livestock" does not include horses, goats, donkeys, mules, oxen, furbearing mammals, other mammals, or other classes of animals, although some of these animals or species may be considered to be "livestock" in other contexts or situations.

b. For purposes of this rule the term "poultry" means only domestic chickens and domestic turkeys as only these types of birds may qualify their owners for the livestock production credit refunds. "Poultry" does not include ducks, geese, wild turkeys, emus, ostriches, or other fowl or birds, although some of these species may be considered to be poultry in other contexts or situations.

c. For purposes of this rule, the term "farrow-to-finish" hog operations comprises those hog production operations where the majority of the hogs sold from the operation are from animals farrowed and raised in the operation which are sold at a prime market weight of 200 pounds or more.

In order to compute the livestock production credit refund amounts for the "farrow-to-finish" hog production operations, the corn equivalent factor of 13 per animal sold, or \$1.30, is multiplied by the number of hogs sold at prime market weight in the tax year which were farrowed and raised in the operation. No corn equivalent credits are given for hogs sold at the prime market weight which have been in the operation less than three months on the date of sale. In the "farrow-to-finish" operations, hogs sold at a weight that is less than the prime market weight also are considered for purposes of computing the livestock production credit refund for the operation, but only at the corn equivalent factor of 2.6 or \$.26 per pig sold.

In "farrow-to-finish" hog operations, if any pigs are purchased at the feeder pig weight of less than 60 pounds and are sold at prime market weight (200 pounds or more), see paragraph "e" in this subrule for the corn equivalent factor which applies to these transactions.

d. For purposes of this rule, the term "farrow-to-feeder-pig" hog operations includes those operations where essentially all the pigs farrowed in the operation are sold at an average weight of less than 60 pounds per pig, or at "feeder pig" weight.

The potential livestock production credit refunds for these operations are computed by multiplying the corn equivalent factor of 2.6 or \$.26 times the number of pigs sold at the "feeder pig" weight from these operations in the tax year. However, the corn equivalent factor of 13 or \$1.30 per animal sold can be used for hogs sold at the prime market weight (200 pounds or more) from these operations for those animals where there is documentation that the hogs were born and raised in the operation or that the hogs were in the operation for a minimum of three months at the time the hogs were sold.

e. The term "finishing feeder pigs" hog operations comprises those operations where the majority of the hogs in this operation are purchased when these animals weighed less than 60 pounds or at the "feeder pig" weight and the animals are sold at the time the animals are at the prime market weight of 200 pounds or more per hog. The potential livestock production credit refunds for these operations are computed by multiplying the corn equivalent factor of 10.4 or \$1.04 times the number of animals sold in the year at the prime market weight. However, only those animals that were in the operation for a minimum of three months at the time the hogs were sold at prime market weight can be considered

for purposes of the livestock production credit refund. Corn equivalent factor credits of 2.6 or \$.26 are given for animals which are purchased at the “feeder pig” weight of less than 60 pounds and were in the operation for a minimum of three months when the hogs were sold at a weight which is less than the prime market weight of 200 pounds or more per hog.

f. For purposes of this rule, the term “layer poultry operations” includes operations where the eggs produced by the chickens in the operation are sold for human consumption. The livestock production credit refunds for these operations are computed on the basis of the average number of chickens in the operation in the tax year multiplied by the corn equivalent factor of .88 or \$.088. The average number of chickens in the operation in the tax year is the aggregate of the number of chickens in the operation on the first day in the tax year that the operation was in production and the number of chickens in the operation on the last day of the tax year in which the operation was in production divided by 2.

However, in a situation where the operation was started or was shut down sometime during the tax year, the livestock refund amount otherwise computed must be reduced by 8.33 percent for each month in the tax year in which the operation was not in production. Thus, in the case where the computed livestock refund amount was \$2,000 and the operation was in production for only nine months of the tax year, the adjusted refund amount would be \$1,500 ($\$2,000 \times .0833 \times (3) = \500). ($\$2,000 - 500 = \$1,500$)

g. For purposes of this rule, the term “turkey production operations” means operations involved in raising domestic turkeys for sale for human consumption and where the turkeys are sold at a prime market weight. The prime market weight for male or tom turkeys is between 30 and 35 pounds. The prime market weight for hen turkeys is between 22 and 25 pounds. The livestock production credit refund for this type of operation is computed by multiplying the number of turkeys sold in the tax year at the prime market weight times the corn equivalent factor of 1.5 or \$.15. However, only those turkeys that were in the operation for a minimum of three months on the date the turkeys were sold may be considered for purposes of computing the livestock production credit for the turkey operation.

h. For purposes of this rule, the term “broiler poultry operations” means poultry production operations whereby the chickens raised in the operations are sold for human consumption at a prime market weight or broiler weight between 3 pounds and 6 pounds depending on the breed or breeds of chickens. The livestock production credit refund for this type of operation is computed by multiplying the number of chickens sold in the tax year at broiler weight by the corn equivalent factor of .15 or \$.015. However, only chickens that are in the broiler operation for a minimum of six weeks before the chickens are sold at broiler weight may be considered for purposes of computing the livestock production credit for these operations.

i. Rescinded IAB 5/6/09, effective 6/10/09.

j. For purposes of this rule, “stocker cattle operations” are beef cattle operations where essentially all cattle in the operations are purchased as calves, raised in the operation at least two months, and the cattle are sold in a range from 700 to 900 pounds per head which is deemed to be the “stocker weight.” Cattle in the operation that were sold at a weight of less than 700 pounds may not be counted for purposes of computing the livestock production credit refund for the operation. The livestock production credit refunds for these operations is computed on the basis of the number of cattle sold in the year at the stocker weight times the corn equivalent factor of 41.5 or \$4.15 per head. Cattle sold in the tax year must be reported on a first-in, first-out basis unless records of the taxpayer can support a different order of sale of the animals. If this operation includes calves that were raised on the farm where they were born, these calves qualify for the corn equivalent factor of 41.5 or \$4.15 per head if the calves were unsold at the end of the tax year and the calves were in the operation for a minimum of two months after the calves were weaned.

k. For purposes of this rule, “beef feedlot operations” include those beef cattle operations whereby the cattle are purchased as calves approximately 60 days from the time the calves were weaned or at a “stocker weight” and are sold at a feedlot weight of 900 pounds or more after a three-month period when the animals were on a high concentrate diet. Note that any animals which are purchased for the operation and are maintained in the herd for less than four months at the time of sale do not qualify the taxpayer for the livestock production credit refund of \$7.50 per head of cattle sold. The livestock production

credit refund for these operations is computed by multiplying the number of cattle sold in the year at the feedlot weight times the corn equivalent amount of 75 or \$7.50 per animal. However, if any cattle in the operation are sold at the “stocker” weight of at least 700 pounds but less than 900 pounds, these animals may be counted for the livestock production credit refund at a corn equivalent amount of 41.5 or \$4.15 per head of cattle sold to the extent the cattle were in the operation for two months or more at the time of sale. If any cattle in the operation in the tax year were sold at a weight of less than 700 pounds, the sales of these cattle may not be counted for the livestock production credit refund. Cattle sold in the tax year must be reported on a first-in, first-out basis unless records of the taxpayer can support a different order of sale of the cattle.

l. For purposes of this rule, “dairy cattle operations” includes those cattle operations where the primary purpose of the operations is the production of milk and milk products for human consumption. The livestock production credit refund is computed by multiplying the aggregate of the number of milking cows in lactation on December 31 of the tax year and the number of cows bred to calve within 60 days of December 31 and the number of breeding bulls in inventory on December 31 times the corn equivalent number of 350 or \$35 per cow. However, cattle that were purchased in the period between July 1 and December 31 of the calendar year may not be considered for purposes of computation of the livestock production credit for the dairy operation. In the case of a “dairy cattle operation” which started or ceased production in the tax year, the livestock production credit refund otherwise computed must be reduced by 8.33 percent for each month in the tax year in which the livestock operation was not in production. Heifers in the operation are not counted for purposes of the credit until the animals are bred to calve.

m. For purposes of this rule, “ewe flock sheep operations” are sheep operations whereby the majority of the sheep and lambs sold from the operation were born and raised in the operation. The livestock production credit refunds for these operations are computed by multiplying the number of ewes and rams in inventory on December 31 of the tax year times the corn equivalent factor of 20.5 or \$2.05 per ewe or ram. Any ewes or rams purchased within three months before December 31 of the tax year may not be considered for purposes of computing the livestock production credit for the operation. In addition, lambs sold in the tax year from the operation may be counted for the production credit refund at 4.1 corn equivalents or \$.41 for each lamb sold to the extent the lambs were in the operation for a minimum of three months prior to the date of sale.

n. For purposes of this rule, “sheep feedlot operations” are sheep production operations where lambs born and raised in the operation are sold after the lambs have been in the operation for a minimum of three months prior to the date of sale. The livestock production credit refunds are computed by multiplying the number of lambs sold in the tax year times the corn equivalent factor of 4.1 or \$.41.

o. For the purposes of this rule and for tax years beginning on or after January 1, 1998, “cow-calf operations” means those livestock cattle production operations that include bred cows, bred heifers, and breeding bulls. The livestock production credit refunds for cow-calf operations are determined only on the number of bred cows, bred heifers, and breeding bulls in inventory of the operations on December 31 of the tax year times the corn equivalent factor of 111.5 or \$11.15. However, only those bred cows, bred heifers, and breeding bulls in inventory on December 31 which were also in inventory on July 1 of the same calendar year may be counted for purposes of computing the livestock production refunds.

43.8(3) Filing claims for the livestock production credit refunds. Taxpayers who are eligible for the livestock production credit refunds must file refund requests on claim forms provided by the department that must be attached to their income tax returns for the tax year in which the livestock production occurred. The claim forms must be filed with the income tax returns within ten months after the end of the tax year of the return in order for the refund claims to be timely. Thus, in the case of a taxpayer filing a livestock production refund claim form with the 1996 Iowa income tax return for calendar year 1996, the claim forms must be filed by October 31, 1997, in order for the claims to be timely. Taxpayers may not request extensions for filing claims for the livestock production refunds.

The department will determine by February 28 of the year after the year in which the livestock production credit refund claims are to be filed if the total amount requested on the refund claims exceeds the amount appropriated for the refunds for that tax year. If a taxpayer’s refund claim is not payable on

February 28 because the taxpayer is a fiscal year filer, that taxpayer's claim will be considered to be a claim for the following tax year. However, in order for this claim to be considered to be a valid refund claim for the following tax year, the refund claim must have been filed within ten months after the end of the fiscal year of the taxpayer. However, in the case of livestock production credit refund claims for fiscal year periods beginning in 1996 which are not received soon enough to be considered for the refunds to be issued in February 1998, only claims for cow-calf livestock production operations will be considered with the livestock production refund claims for the 1997 tax year.

If a taxpayer files a fraudulent claim for a livestock production credit refund for a tax year, the taxpayer will be considered to have forfeited any right or interest to a livestock production refund for any subsequent tax year after the year of the fraudulent claim.

43.8(4) *Records needed to establish livestock production credit refunds.* The burden is on the taxpayer to maintain those records and documents which support the livestock production credit refund that was claimed by the taxpayer. Necessary records and documents must include, but are not limited to, the ones mentioned in this subrule. Some of the necessary records are inventory schedules showing the number of livestock or poultry in the livestock operation on certain dates in the tax year. Sales of livestock or poultry in the tax year must be supported by scale tickets, packing house invoices, sales receipts, sales barn invoices, and similar documents. Dairy herd improvement association records and similar inventory forms can be used to establish the number of animals or the number of birds on hand in the operation on a certain day in the tax year. These documents are not to be submitted with the taxpayer's income tax return with the livestock production credit refund claim form. Instead, the documents are to be retained with other tax records for at least three years in case of possible audit by the department of revenue.

43.8(5) *Repeal of the livestock production credit refund.* The livestock production credit was repealed on November 1, 2008, for refund claims filed on or after that date. Any livestock production credit refunds requested on Iowa tax returns filed on or after November 1, 2008, will not be issued.

This rule is intended to implement Iowa Code sections 422.120, 422.121, and 422.122 as amended by 2009 Iowa Acts, Senate File 478, section 152.

CHAPTER 44
PENALTY AND INTEREST
[Prior to 12/17/86, Revenue Department[730]]

701—44.1(422) Penalty. See rule 701—10.6(421) for penalty for tax periods beginning on or after January 1, 1991. See rule 701—10.8(421) for statutory exemptions to penalty for tax periods beginning on or after January 1, 1991.

This rule is intended to implement Iowa Code sections 421.27 and 422.25.

701—44.2(422) Computation of interest on unpaid tax. Interest shall accrue on tax due from the original due date of the return. Interest on refunds of any portion of the tax imposed by statute which has been erroneously refunded and which is recoverable by the department shall bear interest as provided by law from the date of payment of the refund, with each fraction of a month considered to be an entire month. See rule 701—10.2(421) for the statutory interest rate.

All payments shall be first applied to the penalty and then to the interest, and the balance, if any, to the amount of tax due.

This rule is intended to implement Iowa Code sections 421.7 and 422.25.

701—44.3(422) Computation of interest on refunds resulting from net operating losses. If the amount of tax is reduced as a result of a net operating loss or net capital loss, interest shall accrue on the refund resulting from the loss carryback beginning on the date a claim for refund or amended return carrying back the net operating loss or net capital loss is filed with the department or on the first day of the second calendar month following the date of the actual payment, whichever is later.

This rule is intended to implement Iowa Code section 422.25.

701—44.4(422) Computation of interest on overpayments. If the amount of tax determined to be due by the department is less than the amount paid, the excess to be refunded will accrue interest from the first day of the second calendar month following the date of payment or the date the return was due to be filed or was filed, whichever is the later.

This rule is intended to implement Iowa Code section 422.25.

701—44.5(422) Waiver of penalty and interest related to certain casualty losses. Rescinded IAB 11/2/11, effective 12/7/11.

CHAPTER 45
PARTNERSHIPS

[Prior to 12/17/86, Revenue Department [730]]

701—45.1(422) General rule. An Iowa partnership, limited partnership, or limited liability company required to file a return under the provisions of Iowa Code subsection 422.15(2) shall be a partnership, limited partnership, or limited liability company required to file a partnership return for purposes of federal income tax. A partnership or limited liability company engaged in carrying on business in this state is an Iowa partnership or an Iowa limited liability company. For tax years beginning on or after January 1, 2013, a partnership, limited partnership or limited liability company doing business in Iowa or deriving income from real, tangible or intangible property located or having a situs in Iowa must file an Iowa partnership return. For specific criteria related to doing business in Iowa or deriving income from real, tangible or intangible property located or having a situs in Iowa, see rule 701—52.1(422). Iowa follows the Treasury check-the-box regulation, 301.7701-3, for determination of the tax status of partnerships or limited liability companies including single-member limited liability companies.

This rule is intended to implement Iowa Code section 422.15 as amended by 2013 Iowa Acts, Senate File 452.

[ARC 1101C, IAB 10/16/13, effective 11/20/13]

701—45.2(422) Partnership returns. Every partnership deriving income (1) from property owned within this state or (2) from a business, trade, profession or occupation carried on within the state must make a return of income regardless of the amount of income or loss and regardless of the residence of the partners. For tax years beginning on or after January 1, 2013, every partnership doing business in Iowa or deriving income from real, tangible or intangible property located or having a situs in Iowa must make a return of income regardless of the amount of income or loss and regardless of the residence of the partners. The return shall be made on the proper form and signed by one of the partners. The return shall be made on the same period basis, calendar or fiscal, as the partnership accounts are kept, irrespective of the fact the partners are reporting their incomes on a different period basis. The return shall be filed with the department on or before the last day of the fourth month after the expiration of the tax year.

This rule is intended to implement Iowa Code section 422.15 as amended by 2013 Iowa Acts, Senate File 452, and section 422.21.

[ARC 1101C, IAB 10/16/13, effective 11/20/13]

701—45.3(422) Contents of partnership return. The return of a resident partnership or of a partnership with one or more nonresident members, but whose income is derived entirely or partially from sources within this state, shall state specifically (1) the net income, and the capital gains or losses reported on the federal partnership return, (2) the names and addresses of the partners, and (3) their respective shares in said amounts.

This rule is intended to implement Iowa Code section 422.15.

701—45.4(422) Distribution and taxation of partnership income. A partnership as such is not taxable but the members of a partnership (including limited partnerships organized under Iowa Code chapter 488) are taxable (except as otherwise provided in 701—subrule 40.16(5) respecting nonresident members) upon their distributable shares of the net income of the partnership whether distributed to the partners or not. If the result of the partnership operation is a net loss (i.e., excess of allowable deductions from gross income) the loss may be deducted by the partners (except as otherwise provided respecting nonresident members) in the same proportion that net income would have been taxable to the partners. If the partner reports income on the same taxable year basis as that of the partnership, the distributable share of the net income (or loss) of the partnership for the taxable year must be included in or deducted from gross income on the individual return for that year. If, however, the taxable year of the partner is different from that of the partnership, distributable shares must be included in or the proportion of the loss deducted from gross income for the year in which the taxable year of the partnership ends.

Residents of Iowa must report in total their distributable share of partnership income or loss on their Iowa income tax return. Nonresidents must report, for income tax purposes, their share of distributable partnership income or loss as determined under 701—subrule 40.16(6).

This rule is intended to implement Iowa Code sections 422.7 and 422.15.

CHAPTER 46
WITHHOLDING

[Prior to 12/17/86, Revenue Department[730]]

701—46.1(422) Who must withhold.

46.1(1) Requirement of withholding.

a. General rule. Every employer maintaining an office or transacting business within this state and required under provisions of Sections 3401 to 3404 of the Internal Revenue Code to withhold and pay federal income tax on compensation paid for services performed in this state to an individual is required to deduct and withhold from such compensation for each payroll period (as defined in Section 3401(b) of the Internal Revenue Code) an amount computed in accordance with subrules 46.2(1) and 46.2(2). Iowa income tax is not required to be withheld on any compensation paid in this state of a character which is not subject to federal income tax withholding (whether or not such compensation is subject to withholding for federal taxes other than income tax, e.g., FICA taxes), except as provided in rule 701—46.4(422).

b. Examples. Paragraph “a” above may be illustrated by the following examples:

(1) Temporary help. A is a typist in the offices of B corporation, where she has worked regularly for two months. A is, however, supplied to B corporation by C, a temporary help agency located in Iowa. C renders a weekly bill to B corporation for A’s services, and C then pays A. B corporation is not A’s “employer” within Section 3401(d) of the Internal Revenue Code, and B corporation is therefore not required by the Internal Revenue Code to withhold a tax on A’s compensation. Since B corporation is not required to withhold a tax for federal purposes on A’s compensation, B is not required to do so for Iowa purposes. C, the temporary help agency, however, is required to withhold from A’s compensation for federal purposes and must also do so for Iowa purposes.

(2) Domestic help. A is employed as a cook by Mr. and Mrs. B. The B’s are required to withhold FICA (i.e., Social Security) tax from compensation paid to A, but are not required to withhold income tax from such compensation under the Internal Revenue Code, because under Section 3401(a)(3), A’s compensation does not constitute “wages”. Since the B’s are not required to withhold income tax for federal purposes, they are not required to do so for Iowa purposes.

(3) Executives. A is a corporate executive. On January 1, 1998, A entered into an agreement with B corporation under which he was to be employed by B in an executive capacity for a period of five years. Under the contract, A is entitled to a stated annual salary and to additional compensation of \$10,000 for each year. The additional compensation is to be credited to a bookkeeping reserve account and deferred, accumulated and paid in annual installments of \$5,000 on A’s retirement beginning January 1, 2003. In the event of A’s death prior to exhaustion of the account, the balance is to be paid to A’s personal representative. A is not required to render any service to B after December 31, 2002. During 2003, A is paid \$5,000 while a resident of Iowa. The \$5,000 is not excluded from “wages” under Section 3401(a) of the Internal Revenue Code; therefore, B is required to withhold federal income tax, and, since it is compensation paid in this state, B must withhold Iowa income tax on A’s deferred compensation.

(4) Agricultural labor. Wages paid for agricultural labor are subject to withholding for state income tax purposes to the same extent that the wages are subject to withholding for federal income tax purposes.

c. Exemption from withholding. An employer may be relieved of the responsibility to withhold Iowa income tax on an employee who does not anticipate an Iowa income tax liability for the current tax year.

An employee who anticipates no Iowa income tax liability for the current tax year shall file with the employer a withholding allowance certificate claiming exemption from withholding. An employee who meets this criterion may claim an exemption from withholding at any time; however, this exemption from withholding must be renewed by February 15 of each tax year that the criterion is met. If the employee wishes to discontinue or is required to revoke the exemption from withholding, the employee must file a new withholding allowance certificate within ten days from the date the employee anticipates a tax liability or on or before December 31 if a tax liability is anticipated for the next tax year. See subrule 46.3(2).

d. Withholding from lottery winnings. Every person, including employees and agents of the Iowa lottery authority, making any payment of “winnings subject to withholding” shall deduct and withhold a tax in an amount equal to 5 percent of the winnings. The tax shall be deducted and withheld upon payment of the winnings to a payee by the person or payer making this payment. Any person or payee receiving a payment of winnings subject to withholding must furnish the payer with a statement as is required under Treasury Regulation §31.3402(q)-1, paragraph “e,” with the information required by that paragraph. Payers of winnings subject to withholding must file Form W-2G with the Internal Revenue Service, the department of revenue, and the payee of the lottery winnings by the dates specified in the Internal Revenue Code and in Iowa Code section 422.16. The W-2G form shall include the information described in Treasury Regulation §31.3402(q)-1, paragraph “f.”

“Winnings subject to withholding” means any payment where the proceeds from a wager exceed \$600. The rules for determining the amount of proceeds from a wager under Treasury Regulation Section 31.3402(q)-1, paragraph “c,” shall apply when determining whether the proceeds from Iowa lottery winnings are great enough so that withholding is required. This rule shall apply to winnings from tickets purchased from the Powerball and Hot Lotto games or any other similar games to the extent the tickets were purchased within the state of Iowa.

e. Withholding from prizes from games of skill, games of chance, or raffles. Every person making any payment of a “prize subject to withholding” must deduct and withhold a tax in an amount equal to 5 percent of the prize from a game of skill, a game of chance, or a raffle. The tax must be deducted and withheld upon payment of the winnings to a payee by the person making this payment. Any person or payee receiving a payment of winnings subject to withholding must furnish the payer with a statement as is required under Treasury Regulation Section 31.3402(q)-1, paragraph “e,” with the information required by that paragraph. Payers of prizes subject to withholding must file Form W-2G with the Internal Revenue Service, the department of revenue, and the payee of the prize by the dates specified in the Internal Revenue Code and in Iowa Code section 422.16. The W-2G form must include the information described in Treasury Regulation Section 31.3402(q)-1, paragraph “f.”

“Prizes subject to withholding” means any payment of a prize where the amount won exceeds \$600.

f. Withholding from winnings from pari-mutuel wagers. Every person making any payment of “winnings subject to withholding” must deduct and withhold a tax in an amount equal to 5 percent of the winnings from pari-mutuel wagers. The tax must be deducted and withheld upon payment of the winnings to a payee by the person making this payment. Any person or payee receiving a payment of winnings subject to withholding must furnish the payer with a statement as is required under Treasury Regulation Section 31.3402(q)-1, paragraph “e,” with the information required by that paragraph. Payers of winnings subject to withholding must file Form W-2G with the Internal Revenue Service, the department of revenue, and the payee of the winnings by the dates specified in the Internal Revenue Code and in Iowa Code section 422.16. The W-2G form must include the information described in Treasury Regulation Section 31.3402(q)-1, paragraph “f.”

“Winnings subject to withholding” are winnings in excess of \$1,000.

g. Withholding from winnings from slot machines on riverboat gambling vessels and from winnings from slot machines at racetracks. Withholding of state income tax is required if the winnings from slot machines on riverboat gambling vessels or from slot machines at racetracks exceed \$1,200.

46.1(2) *Withholding on pensions, annuities and other nonwage payments to Iowa residents.* State income tax is required to be withheld from payments of pensions, annuities, supplemental unemployment benefits and sick pay benefits and other nonwage income payments made to Iowa residents in those circumstances mentioned in the following paragraphs. This subrule covers those nonwage payments described in Sections 3402(o), 3402(p), 3402(s), 3405(a), 3405(b), and 3405(c) of the Internal Revenue Code. This includes, but is not limited to, payments from profit-sharing plans, stock bonus plans, deferred compensation plans, individual retirement accounts, lump-sum distributions from qualified retirement plans, other retirement plans, and annuities, endowments and life insurance contracts issued by life insurance companies. These payments are subject to Iowa withholding tax if they are also subject to federal withholding tax. However, no state income tax withholding is required from nonwage payments to residents to the extent those payments are not subject to state income tax. See paragraph 46.1(2) “h” for

threshold amounts for withholding from payments of pensions, annuities, individual retirement accounts, deferred compensation plans, and other retirement incomes which are made on or after January 1, 2001. In the case of some nonwage payments to residents, such as payments of pensions and annuities, no state income tax is required to be withheld if no federal income tax is being withheld from the payments of the pensions and annuities. The rate of withholding on the nonwage payments described in this subrule is 5 percent of the payment amounts or 5 percent of the taxable amounts unless specified otherwise.

For purposes of this subrule, an individual receiving nonwage payments will be considered to be an Iowa resident and subject to this subrule if the individual's permanent residence is in Iowa. The fact that a nonwage payment is deposited in a recipient's account in a financial institution located outside Iowa does not mean that the recipient's permanent residence is established in the place where the financial institution is situated.

Payers of pension and annuity benefits and other nonwage payments have the option of either withholding Iowa income tax from these payments on the basis of tables and formulas included in the Iowa withholding tax guide of the department of revenue or withholding Iowa income tax from these payments at the rate of 5 percent. State income tax is required to be withheld by payers in situations when federal income tax is being withheld from the nonwage payments.

a. Withholding from pension and annuity payments to residents. Withholding of state income tax is required from payments of pensions and annuities to Iowa residents to the extent that the recipients of the payments have not filed with the payers of the benefits election forms which specify that no federal income tax is to be withheld. Therefore, state income tax is to be withheld when federal income tax is being withheld from the pensions or annuities. See paragraph 46.1(2)“h” for threshold amounts for withholding from payments of pensions, annuities, and other retirement incomes which are made on or after January 1, 2001.

However, although Iowa income tax is ordinarily required to be withheld from pension and annuity payments made to Iowa residents if federal income tax is being withheld from the payments, no state income tax is required to be withheld if pension and annuity payments are not subject to Iowa income tax, as in the case of railroad retirement benefits which are exempt from Iowa income tax by a provision of federal law.

b. Withholding from payments to residents from profit-sharing plans, stock bonus plans, deferred compensation plans, individual retirement accounts and from annuities, endowments and life insurance contracts issued by life insurance companies. Payments to Iowa residents from profit-sharing plans, stock bonus plans, deferred compensation plans, individual retirement accounts and payments from life insurance companies for contracts for annuities, endowments or life insurance benefits are subject to withholding of state income tax if federal income tax is withheld from the benefits. However, no state income tax is to be withheld from the income tax payments described above to the extent those income tax payments are exempt from Iowa income tax. See paragraph 46.1(2)“h” for thresholds for withholding from payments of pensions, annuities, individual retirement accounts, deferred compensation plans, and other retirement incomes which are made on or after January 1, 2001.

In cases where the recipients elect withholding of state income tax from the income payments, the payers are to withhold from the payments at a rate of 5 percent on the taxable portion of the payment, if that can be determined by the payer or on the entire income payment if the payer does not know how much of the payment is taxable. Once a recipient makes an election for state income tax withholding, that election will remain in effect until a later election is made.

c. Withholding from payments to residents for supplemental unemployment compensation benefits and sick pay benefits. Income payments made for supplemental unemployment compensation benefits described in Section 3402(o)(2)(a) of the Internal Revenue Code and for sick pay benefits are subject to withholding of state income tax. In the case of supplemental unemployment compensation benefits, those benefits are treated as wages for purposes of state income tax withholding. Therefore, state income tax should be withheld from these payments when federal income tax is withheld. The amount of state income tax withholding should be determined by the withholding tables provided in the Iowa employers' “Withholding Tax Guide.”

In the case of state income tax withholding for sick pay benefits paid by third-party payers in accordance with Section 3402(o)(1) of the Internal Revenue Code, state income tax is to be withheld from the benefits by the payer only if state income tax withholding is requested by the payee of the benefits. However, payees of sick pay benefits should probably not request withholding from the benefits if the payees are eligible for the disability income exclusion authorized in Iowa Code section 422.7 and described in rule 701—40.22(422). If withholding is requested by the payee, the withholding should be done at a 5 percent rate on the sick pay benefits. Once withholding is started, it should continue until such time as the payee requests that no state income tax be withheld. For sick pay benefits not paid by third-party payers, state income tax is required to be withheld since federal income tax is required to be withheld.

d. Voluntary state income tax withholding from unemployment benefit payments. Recipients of unemployment benefit payments described in Section 3402(p)(2) of the Internal Revenue Code may elect to have state income tax withheld from the benefit payments at a rate of 5 percent. An individual's election to have state income tax withheld from unemployment benefits is separate from any election to have federal income tax withheld from the benefits.

e. Withholding on lump-sum distributions from qualified retirement plans. For lump-sum distribution payments from qualified retirement plans made to Iowa residents, state income tax is required to be withheld under the conditions described in this paragraph. No state income tax is required to be withheld from a lump-sum distribution payment to an Iowa resident in a situation where the payment is not subject to Iowa income tax. See paragraph 46.1(2) "h" for thresholds for withholding on lump-sum distributions issued on or after January 1, 2001. Iowa income tax is to be withheld from a lump-sum distribution made to an Iowa resident to the extent that federal income tax is being withheld from the distribution. The rate of withholding of state income tax from the lump-sum distribution is 5 percent from the total distribution or 5 percent from the taxable amount if that amount is known by the payer. Note that in the case of a lump-sum distribution, the Iowa income tax imposed on the taxable amount of the distribution is 25 percent of the federal income tax on the distribution.

f. Withholding of state income tax from nonwage payments to residents on the basis of tax tables and tax formulas. State income tax from the nonwage payments made to Iowa residents may be withheld on the basis of formulas and tables included in the Iowa withholding tax guide of the department of revenue. See paragraph 46.1(2) "h" for threshold amounts for withholding from payments of pensions, annuities, individual retirement accounts, deferred compensation plans, and other retirement incomes which are made on or after January 1, 2001. When state income tax is being withheld based upon the formulas or tables in the withholding guide, the amounts of the nonwage payments are treated as wage payments for purposes of the tables or the formulas.

The frequency of the nonwage payments determines which of the withholding tables to use or the number of pay periods in the calendar year to use in the formula. For example, if the nonwage payment is made on a monthly basis, the monthly wage bracket withholding table should be utilized for withholding or 12 should be utilized in the formula to indicate that there will be 12 nonwage payments in the year.

The payers of nonwage payments should withhold state income tax from the nonwage payments to Iowa residents when federal income tax is being withheld from the nonwage payments. The payers should withhold from the nonwage payments to Iowa residents from tables or the formulas in the Iowa withholding guide on the basis of the number of withholding exemptions claimed on Form IA W-4 which has been completed by the payees of the payments. However, if a payee of a nonwage payment has not completed an IA W-4 form (Iowa employee's withholding allowance certificate) by the time a nonwage payment is to be made by the payer of the nonwage payment, the payer is to withhold state income tax on the basis that the payee has claimed one withholding allowance or exemption.

In a situation when a payee of a nonwage payment completes Form IA W-4 and claims exemption from state income tax withholding when federal income tax is being withheld from the nonwage payment, the payer of the nonwage payment should withhold state income tax using one withholding allowance or exemption unless the payee has verified exemption from state income tax.

g. Withholding on distributions from qualified retirement plans that are not directly rolled over. State income tax is to be withheld at a rate of 5 percent from the gross amount or taxable amount

if known by the payer of the distribution made to Iowa residents if the distributions are not transferred directly to an IRA, Section 403(a) annuity or another qualified retirement plan. The distributions that are subject to state income tax withholding are those distributions that are subject to 20 percent withholding for federal income tax purposes. See paragraph 46.1(2) “h” for thresholds for withholding from payments of pensions, annuities, individual retirement accounts, deferred compensation plans, and other retirement plans which are made on or after January 1, 2001.

h. Withholding from distributions made on or after January 1, 2001, from pensions, annuities, individual retirement accounts, deferred compensation plans, and other retirement plans. Effective for distributions made on or after January 1, 2001, from pension plans, annuities, individual retirement accounts, deferred compensation plans, and other retirement plans, state income tax is generally required to be withheld from the distributions when federal income tax is being withheld from the distributions, unless one of the exceptions for withholding in this paragraph applies. For purposes of this paragraph, the term “pensions and other retirement plans” includes all distributions of retirement benefits covered by the partial exemption described in rule 701—40.47(422).

State income tax is not required to be withheld from a distribution from a pension or other retirement plan if the distribution is an income which is not subject to Iowa income tax, such as a distribution of railroad retirement benefits. State income tax is also not required to be withheld from a pension plan or other retirement plan if the amount of the distribution is \$500 per month or less or if the taxable amount is \$500 or less and the person receiving the distribution is eligible for the partial exemption of retirement benefits described in rule 701—40.47(422), if the state taxable amount can be determined by the payee of the distribution. There is also no requirement for withholding state income tax from a pension or other retirement plan if the distribution is \$1,000 per month or less or if the taxable amount is \$1,000 or less and the person receiving the distribution is eligible for the partial exemption of retirement benefits described in rule 701—40.47(422) and that person has indicated an intention to file a joint state income tax return for the year in which the distribution is made. In instances where the distribution amount or the taxable amount is more than \$500 per month but less than \$6,000 for the year, no state income tax will be required to be withheld, if the person receiving the distribution is eligible for the partial exemption of retirement benefits.

Finally, there is no requirement for withholding from a lump-sum payment from a qualified retirement plan if the lump-sum payment is \$6,000 or less, the recipient is eligible for the partial exemption of distributions from pensions and other retirement plans, and the lump-sum payment is the only distribution from the retirement plan in the year.

46.1(3) *Voluntary state income tax withholding from unemployment benefit payments.* Rescinded IAB 3/2/05, effective 4/6/05.

This rule is intended to implement Iowa Code sections 96.3, 99B.21, 99D.16, 99E.19, 99F.18, 422.5, 422.7, and 422.16.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 1303C, IAB 2/5/14, effective 3/12/14]

701—46.2(422) Computation of amount withheld.

46.2(1) Amount withheld.

a. General rules. Every employer required to deduct and withhold a tax on compensation paid in Iowa to an individual shall deduct and withhold for each payroll period an amount the total of which will approximate the employee’s annual tax liability. “Payroll period” for Iowa withholding purposes shall have the same definition as in Section 3401 of the Internal Revenue Code and shall include “miscellaneous payroll period” as that term is defined and used in that section and the associated regulations.

b. Methods of computations. Employers required to withhold Iowa income tax on compensation paid in this state shall compute the amount of tax to be withheld for each payroll period pursuant to the methods and rules provided herein.

(1) Tables. An employer may elect to use the withholding tables provided in the Iowa employers’ withholding tax guide and withholding tables, which are available from the department of revenue.

(2) **Formulas.** Formulas that are provided in the Iowa employers' withholding tax guide and tax tables are available for employers who have a computerized payroll system.

(3) **Other methods.** An employer may request and be granted the use of an alternate method for computing the amount of Iowa tax to be deducted and withheld for each payroll period so long as the alternate proposal approximates the employee's annual Iowa tax liability. When submitting an alternate formula, the withholding agent should explain the formula and show examples comparing the amount of withholding under the proposed formula with the department's tables or computer formula at various income levels and by using various numbers of personal exemptions. Any alternate formula must be approved by the department prior to its use.

c. Supplemental wage payments. A supplemental wage payment is the payment of a bonus, commission, overtime pay, or other special payment that is made in addition to the employee's regular wage payment in a payroll period. When such supplemental wages are paid, the amount of tax required to be withheld shall be determined by using the current withholding tables or formulas. If supplemental wages are paid at the same time as regular wages, the regular tables or formulas are used in determining the amount of tax to be withheld as if the total of the supplemental and regular wages were a single wage payment for the regular payroll period. If supplemental wages are paid at any other time, the regular tables or formulas are used in determining the amount of tax to be withheld as if the supplemental wage were a single wage payment for the regular payroll period. When a withholding agent makes a payment of supplemental wages to an employee and the employer withholds federal income tax on a flat-rate basis, pursuant to Treasury Regulation §31.3402(g)-1, state income tax shall be withheld from the supplemental wages at a rate of 6 percent without consideration for any withholding allowances or exemptions.

d. Vacation pay. Amounts of so-called "vacation allowances" shall be subject to withholding as though they were regular wage payments made for the period covered by the vacation. If the vacation allowance is paid in addition to the regular wage payment for such period, the allowance shall be treated as supplemental wage payments.

46.2(2) Correction of underwithholding or overwithholding.

a. Underwithholding. If an employer erroneously underwithholds an amount of Iowa income tax required to be deducted and withheld from compensation paid to an employee within a payroll period, the employer should correct the error within the same calendar year by deducting the difference between the amount withheld and the amount required to be withheld from any compensation still owed the employee, even though such compensation may not be subject to withholding. If the error is discovered in a subsequent calendar year, no correction shall be made by the employer.

b. Overwithholding. If an employer erroneously overwithholds an amount of tax required to be deducted and withheld from compensation paid to an employee, repayment of such overwithheld amount shall be made in the same calendar year. Repayment may be made in either of two ways: (1) the amount of overwithholding may be repaid directly to the employee, in which case the employer must obtain written receipt showing the date and amount of the repayment, or (2) the employer may reimburse the employee by applying the overcollection against the tax required to be deducted and withheld on compensation to be paid in the same calendar year in which the overcollection occurred. If the error is discovered in a subsequent calendar year, no repayment shall be made.

c. Cross-reference. Rescinded IAB 3/2/05, effective 4/6/05.

46.2(3) Withholding on supplemental wage payments. Rescinded IAB 3/2/05, effective 4/6/05.

This rule is intended to implement Iowa Code section 422.16.

701—46.3(422) Forms, returns and reports.

46.3(1) Employer registration. Every employer or payer required to deduct and withhold Iowa income tax must register with the department of revenue by filing an "Iowa Business Tax Registration Form." The form shall indicate the employer's or payer's federal identification number. If an employer or payer has not received a federal employer's identification number, the department will issue a temporary identification number. The employer or payer must notify the department when the federal employer identification number is assigned.

When initial payment of wages subject to Iowa withholding tax occurs late in the calendar quarter, or before the employer's or payer's federal employer's identification number is assigned by the Internal Revenue Service, the Iowa business tax registration form shall be forwarded along with the first quarterly withholding return. The responsible party(ies) shall be listed on the form.

If an employer deducts and withholds Iowa income tax but does not file the Iowa business tax registration form, the department may register the employer using the best information available. If an employer uses a service provider to report and remit Iowa withholding tax on behalf of the employer, the department may use information obtained from the service provider to register the employer if an Iowa business tax registration form is not filed. This information would include, but is not limited to, the name, address, federal employer's identification number, filing frequency, withholding agent and responsible party(ies) of the employer.

46.3(2) Allowance certificate.

a. General rules. On or before the date on which an individual commences employment with an employer, the individual shall furnish the employer with a signed Iowa employee's withholding allowance certificate (IA W-4) indicating the number of withholding allowances which the individual claims, which in no event shall exceed the number to which the individual is entitled. The employer is required to request a withholding allowance certificate from each employee. If the employee fails to furnish a certificate, the employee shall be considered as claiming no withholding allowances. See subrule 46.3(4) for information on Form IA W-4P which is to be used by payers of pensions, annuities, deferred compensation, individual retirement accounts and other retirement incomes.

The employer must submit to the department of revenue a copy of a withholding allowance certificate received from an employee if:

- (1) The employee claimed more than a total of 22 withholding allowances, or
- (2) The employee is claiming an exemption from withholding and it is expected that the employee's wages from that employer will normally exceed \$200 per week.

Employers required to submit withholding certificates should use the following address:

Iowa Department of Revenue
Compliance Division
Examination Section
Hoover State Office Building
P.O. Box 10456
Des Moines, Iowa 50306

The department will notify the employer whether to honor the withholding certificate or to withhold as though the employee is claiming no withholding allowances.

b. Form and content. The "Iowa Employee's Withholding Allowance Certificate" (IA W-4) must be used to determine the number of allowances that may be claimed by an employee for Iowa income tax withholding purposes. Generally, the greater number of allowances an employee is entitled to claim, the lower the amount of Iowa income tax to be withheld for the employee. The following withholding allowances may be claimed on the IA W-4 form:

(1) Personal allowances. An employee can claim one personal allowance or two if the individual is eligible to claim head of household status. The employee can claim an additional allowance if the employee is 65 years of age or older and another additional allowance if the employee is blind.

If the employee is married and the spouse either does not work or is not claiming an allowance on a separate W-4 form, the employee can claim an allowance for the spouse. The employee may also claim an additional allowance if the spouse is 65 years of age or older and still another allowance if the spouse is blind.

(2) Dependent allowances. The employee can claim an allowance for each dependent that the employee will be able to claim on the employee's Iowa return.

(3) Allowances for itemized deductions. The employee can claim allowances for itemized deductions to the extent the total amount of estimated itemized deductions for the tax year for the employee exceeds the applicable standard deduction amount by \$200. In instances where an employee is married and the employee's spouse is a wage-earner, the total allowances for itemized deductions for

the employee and spouse should not exceed the aggregate amount itemized deduction allowances to which both taxpayers are entitled.

(4) Allowances for the child/dependent care credit. Employees who expect to be eligible for the child/dependent care credit for the tax year can claim withholding allowances for the credit. The allowances are determined from a chart included on the IA W-4 form on the basis of net income shown on the Iowa return for the employee. If the employee is married and has filed a joint federal return with a spouse who earns Iowa wages subject to withholding, the withholding allowances claimed by both spouses for the child/dependent care credit should not exceed the aggregate number of allowances to which both taxpayers are entitled. Taxpayers that expect to have a net income of \$45,000 or more for a tax year beginning on or after January 1, 2006, should not claim withholding allowances for the child and dependent care credit, since these taxpayers are not eligible for the credit.

(5) Allowances for adjustments to income. For tax years beginning on or after January 1, 2008, employees can claim allowances for adjustments to income which are set forth in Treasury Regulation §31.3402(m)-1, paragraph "b." This includes adjustments to income such as alimony, deductible IRA contributions, student loan interest and moving expenses which are allowed as deductions in computing income subject to Iowa income tax. In instances where an employee is married and the employee's spouse is a wage earner, the withholding allowances claimed by both spouses for adjustments to income for the employee and spouse should not exceed the aggregate number of allowances to which both taxpayers are entitled.

c. Change in allowances which affect the current calendar year.

(1) Decrease. If, on any day during the calendar year, the number of withholding allowances to which an employee is entitled is less than the number of withholding allowances claimed by the individual on a withholding certificate then in effect, the employee must furnish the employer with a new Iowa withholding allowance certificate relating to the number of withholding allowances which the employee then claims, which must in no event exceed the number to which the employee is entitled on such day.

(2) Increase. If, on any day during the calendar year, the number of withholding allowances to which an employee is entitled is more than the number of withholding allowances claimed by the employee on the withholding allowance certificate then in effect, the employee may furnish the employer with a new Iowa withholding allowance certificate on which the employee must in no event claim more than the number of withholding allowances to which the employee is entitled on such day.

d. Change in allowances which affect the next calendar year. If, on any day during the calendar year, the number of withholding allowances to which the employee will be, or may reasonably be expected to be, entitled to for the employee's taxable year which begins in, or with, the next calendar year is different from the number to which the employee is entitled on such day, the following rules shall apply:

(1) If such number is less than the number of withholding allowances claimed by an employee on an Iowa withholding allowance certificate in effect on such day, the employee must within a reasonable time furnish the employee's employer with a new withholding allowance certificate reflecting the decrease.

(2) If such number is greater than the number of withholding allowances claimed by the employee on an Iowa withholding allowance certificate in effect on such day, the employee may furnish the employee's employer with a new withholding allowance certificate reflecting the increase.

e. Duration of allowance certificate. An Iowa withholding allowance certificate which is in effect pursuant to these regulations shall continue in effect until another withholding allowance certificate takes effect. Employers should retain copies of the IA W-4 forms for at least four years.

46.3(3) Reports and payments of income tax withheld.

a. Returns of income tax withheld from wages.

(1) Quarterly returns. Every withholding agent required to withhold tax on compensation paid for personal services in Iowa shall make a return for the first calendar quarter in which tax is withheld and for each subsequent calendar quarter, whether or not compensation is paid therein, until a final return is filed. The withholding agent's "Quarterly Withholding Return is the form prescribed for making the return required under this paragraph. Monthly tax deposits or semimonthly tax deposits may be

required in addition to quarterly returns. See subparagraphs (2) and (3) of paragraph 46.3(3)“a.” In some circumstances, only an annual return and payment of withheld taxes will be required; see paragraph 46.3(3)“c.”

Payments shall be based upon the tax required to be withheld and must be remitted in full.

A withholding agent is not required to list the name(s) of the agent’s employee(s) when filing quarterly returns, nor is the withholding agent required to show on the employee’s paycheck or voucher the amount of Iowa income tax withheld.

If a withholding agent’s payroll is not constant, and the agent finds that no wages or other compensation was paid during the current quarter, the agent shall enter the numeral “zero” on the return and submit the return as usual.

(2) Monthly deposits. Every withholding agent required to file a quarterly withholding return shall also file a monthly deposit if the amount of tax withheld during any calendar month exceeds \$500, but is less than \$10,000. A withholding agent needs to file a monthly deposit even if no payment is due. No monthly deposit is required for the third month in any calendar quarter. The information otherwise required to be reported on the monthly deposit for the third month in a calendar quarter shall be reported on the quarterly return filed for that quarter, and no monthly deposit need be filed for such month.

(3) Semimonthly deposits. Every withholding agent who withholds more than \$5,000 in a semimonthly period must file a semimonthly tax deposit. A semimonthly period is defined as the period from the first day of a calendar month through the fifteenth day of a calendar month, or the period from the sixteenth day of a calendar month through the last day of a calendar month. When semimonthly deposits are required, a withholding agent must still file a quarterly return.

(4) Final returns. A withholding agent who in any return period permanently ceases doing business shall file the returns required by subparagraphs (1), (2) and (3) of paragraph 46.3(3)“a” as final returns for such period. The withholding agent shall cancel the withholding tax registration by notifying the department.

b. Time for filing returns.

(1) Quarterly returns. Each return required by subparagraph 46.3(3)“a”(1) shall be filed on or before the last day of the first calendar month following the calendar quarter for which such return is made.

(2) Monthly tax deposits. Monthly deposits required by subparagraph 46.3(3)“a”(2) shall be filed on or before the fifteenth day of the second and third months of each calendar quarter for the first and second months of each calendar quarter, respectively.

(3) Semimonthly tax deposits. Semimonthly deposits required by subparagraph 46.3(3)“a”(3) for the semimonthly period from the first day of the month through the fifteenth day of the month shall be filed with payment of the tax on or before the twenty-fifth day of the same month. The semimonthly deposits required by subparagraph 46.3(3)“a”(3) for the semimonthly period from the sixteenth day of the month through the last day of the month shall be filed with payment of the tax on or before the tenth day of the month following the month in which the tax is withheld.

For withholding that occurs on or after January 1, 2005, quarterly returns, amended returns, monthly deposits and semimonthly deposits shall be made electronically in a format and by means specified by the department of revenue. Tax payments are considered to have been made on the date that the tax is transmitted and released by the vendor to the department.

(4) Determination of filing status. Effective July 1, 2002, the department and the department of management have the authority to change filing thresholds by department rule. This paragraph sets forth the filing thresholds for each filer based on the amount withheld for withholding that occurs on or after January 1, 2003.

The following criteria will be used by the department to determine if a change in filing status is warranted.

<u>Filing Status</u>	<u>Threshold</u>	<u>Test Criteria</u>
Semimonthly	Greater than \$120,000 in annual withholding taxes (more than \$5,000 in a semimonthly period).	Tax remitted in 3 of most recent 4 quarters examined exceeds \$30,000.
Monthly	Between \$6,000 and \$120,000 in annual withholding taxes (more than \$500 in a monthly period).	Tax remitted in 3 of most recent 4 quarters examined exceeds \$1,500 per quarter.
Quarterly	Less than \$6,000 in annual withholding taxes.	Tax remitted in 3 of most recent 4 quarters examined is less than \$1,500 per quarter.
Annual	Less than 3 employees.	

When it is determined that a withholding agent's filing status is to be changed, the withholding agent shall be notified in writing. A withholding agent has the option of requesting, within 30 days of the department's notice of a change in filing frequency, that the withholding agent file more or less frequently than required by the department. To request filing on a less frequent basis than assigned by the department, the request must be in writing and submitted to the department. A withholding agent's written request to be allowed to file less frequently than the filing status assigned by the department will be reviewed by the department, and a written determination will be issued to the withholding agent who made the request.

A change in assigned filing status to file on a less frequent basis will be granted in only two instances:

- Incorrect historical data is used in the conversion. A business may meet the criteria based on the original filing data, but, upon investigation, the filing history may prove that the business does not meet the dollar criteria because of adjustments, amended returns, or requests for refunds.
- Data available may have been distorted by the fact that the data reflected an unusual pattern in tax collection. The factors causing such a distortion must be documented and approved by the department.

A withholding agent may also request to file more frequently than assigned by the department. This request may be made orally, in writing, in person, or by telephone.

The department and the department of management may perform review of filing thresholds every five years or as needed based on department discretion. Factors the departments will consider in determining if the filing thresholds need to be changed include, but are not limited to: tax rate changes, inflation, the need to maintain consistency with required multistate compacts, changes in law, and migration between filing brackets.

c. Reporting annual withholding.

(1) Any withholding agent who does not have employee withholding but who is required to withhold state income tax from other distributions is exempted from the provisions of subparagraphs (2) and (3) of paragraph 46.3(3) "a," if these distributions are made annually in one calendar quarter. These withholding agents need only comply with the reporting requirements of the one calendar quarter in which the tax is withheld, and make the required year-end reports.

(2) Every withholding agent employing not more than two individuals and who expects to employ either or both for the full calendar year may pay with the withholding tax return due for the first calendar quarter of the year the full amount of income taxes which would be required to be withheld from the wages for the full calendar year. The withholding agent shall advise the department of revenue that annual reporting is contemplated and shall also state the number of persons employed. The withholding agent shall compute the annual withholding from wages by determining the normal withholding for one pay period and multiply this amount by the total number of pay periods within the calendar year. The withholding agent shall be entitled to recover from the employee(s) any part of such lump-sum payment that represents an advance to the employee(s). If a withholding agent pays a lump sum with the first quarterly return, the agent shall be excused from filing further quarterly returns for the calendar year

involved unless the agent hires other or additional employees. The "Verified Summary of Payments Report" shall be filed at the end of the tax year.

d. Reports for employee.

(1) General rule. Every employer required to deduct and withhold tax from compensation of an employee must furnish to each employee with respect to the compensation paid in Iowa by such employer during the calendar year, a statement containing the following information: the name, address, and federal employer identification number of the employer; the name, address, and social security number of the employee; the total amount of compensation paid in Iowa; the total amount deducted and withheld as tax under subrule 46.1(1).

(2) Form of statement. The information required to be furnished an employee under the preceding paragraph shall be furnished on an Internal Revenue Service combined Wage and Tax Statement, Form W-2, hereinafter referred to as "combined W-2." Any reproduction, modification or substitution for a combined W-2 by the employer must be approved by the department. Employers should keep copies of the combined W-2 for four years from the end of the year for which the combined W-2 applies.

(3) Time for furnishing statement. Each statement required by paragraph "d" to be furnished for a calendar year and each corrected statement required for any prior year shall be furnished to the employee on or before January 31 of the year succeeding such calendar year, or if an employee's employment is terminated before the close of a calendar year without expectation that it will resume during the same calendar year, within 30 days from the day on which the last payment of compensation is made, if requested by such employee. See paragraph 46.3(3) "e" for provisions relating to the filing of copies of the combined W-2 with the department of revenue.

(4) Corrections. An employer must furnish a corrected combined W-2 to an employee if, after the original statement has been furnished, an error is discovered in either the amount of compensation shown to have been paid in Iowa for the prior year or the amount of tax shown to have been deducted and withheld in the prior year. Such statement shall be marked "corrected by the employer." See paragraph 46.3(3) "e" for provisions relating to the filing of a corrected combined W-2 with the department.

(5) Undelivered combined W-2. Any employee's copy of the combined W-2 which, after reasonable effort, cannot be delivered to an employee shall be transmitted to the department with a letter of explanation.

(6) Lost or destroyed. If the combined W-2 is lost or destroyed, the employer shall furnish a substitute copy to the employee. The copy shall be clearly marked "Reissued by Employer."

e. Annual verified summary of payments reports.

(1) Every withholding agent required to withhold Iowa income tax under subrules 46.1(1), 46.1(2), 46.1(3), and 46.4(1) is to furnish to the department of revenue on or before the last day of February following the tax year an annual "Verified Summary of Payments Report" (VSP).

The withholding agent completing the VSP form must enter the total Iowa income tax withheld that is shown on the W-2 forms and 1099 forms for the year, the new jobs credits, supplemental jobs credits, accelerated career education credits and housing assistance credits claimed on withholding returns for the year. In addition, the withholding agent must enter on the VSP the withholding payments made for the year. If the amount of Iowa income tax withholding remitted to the department of revenue for the year is less than the withholding tax and withholding credits claimed, the withholding agent is to report the additional withholding tax due on an amended return and submit payment to the department.

If the Iowa income tax shown as withheld on the W-2s and 1099s issued for the tax year is less than the amount of withholding tax remitted to the department of revenue by the withholding agent, the agent should file an amended return with the department reflecting the excess tax paid.

(2) For Verified Summary of Payments Report forms filed with the department of revenue for the year 2000 and subsequent years, the withholding agents are not to submit W-2 forms and 1099 forms with the reports. However, the withholding agents should supply W-2 forms or 1099 forms as requested by personnel of the department of revenue if the request for the forms is made within three years from the end of the year for which the W-2 forms or 1099 forms apply. Therefore, if a request is made to a withholding agent for a W-2 form or a 1099 form for the year 2000, the request is valid if the request is postmarked, faxed or made on or before December 31, 2003.

f. Withholding deemed to be held in trust. Funds withheld from wages for Iowa income tax purposes are deemed to be held in trust for payment to the department of revenue. The state and the department shall have a lien upon all the assets of the employer and all the property used in the conduct of the employer's business to secure the payment of the tax as withheld under the provisions of this rule. An owner, conditional vendor, or mortgagee of property subject to such lien may exempt the property from the lien granted to Iowa by requiring the employer to obtain a certificate from the department, certifying that such employer has posted with the department security for the payment of the amounts withheld under this rule.

g. Payment of tax deducted and withheld. The amount of tax shown to be due on each deposit or return required to be filed under subrule 46.3(3) shall be due on or before the date on which such deposit or return is required to be filed.

h. Correction of underpayment or overpayment of taxes withheld.

(1) Underpayment. If a return is filed for a return period under rule 701—46.3(422) and less than the correct amount of tax is reported on the return and paid to the department, the employer shall report and pay the additional amount due by filing an amended withholding tax return.

(2) Overpayment. If an employer remits more than the correct amount of tax for a return period, the employer must file an amended withholding tax return and request a refund of the withholding tax paid which was not due.

46.3(4) Iowa W-4P—withholding certificate for pension or annuity payments. For payments made from pension plans, annuity plans, individual retirement accounts, or deferred compensation plans to residents of Iowa, payers of these retirement benefits are to use Form IA W-4P for withholding of state income tax from the benefits. Generally, state income tax is required to be withheld from payments of distributions from the retirement incomes described above when federal income tax is being withheld from the payments. However, no state income tax is required to be withheld to the extent the monthly payment amount is \$500 or less or the taxable amount per month is \$500 or less if the payee is eligible for the retirement benefits exclusion described in rule 701—40.47(422). In addition, no state income tax is required to be withheld to the extent the monthly payment amount is \$1,000 or less or the taxable amount per month is \$1,000 or less if the payee is married and eligible for the retirement benefits exclusion described in rule 701—40.47(422).

Form IA W-4P is available from the department for payers of retirement benefits that intend to withhold at a rate of 5 percent from the payment amount or taxable payment amount after the \$6,000 to \$12,000 exclusion is considered. Note that the \$6,000 to \$12,000 exclusion is to be allocated to all retirement benefit payments made in the year and not just the first \$6,000 to \$12,000 in payments made in the year to an individual. If an individual receives retirement benefits and has not completed Form IA W-4P, the payer is directed to withhold Iowa income tax from the retirement benefit payment after a \$6,000 exclusion is allowed on an annual basis.

Payers of retirement benefits that want to use withholding formulas or tables to withhold state income tax instead of at the 5 percent rate may design their own IA W-4P withholding certificate form without approval of the department.

The payers are not responsible for improper choices made by a payee in completion of the IA W-4P. However, payers cannot accept a request for exemption from the withholding of state income tax made by a payee if federal income tax is being withheld unless the payee is eligible for exemption from withholding.

This rule is intended to implement Iowa Code sections 422.7 and 422.12C, and section 422.16 as amended by 2007 Iowa Acts, House File 904, section 3.
[ARC 8589B, IAB 3/10/10, effective 4/14/10]

701—46.4(422) Withholding on nonresidents.

46.4(1) General rules. Payers of Iowa income to nonresidents are required to withhold Iowa income tax and to remit the tax to the department on all payments of Iowa income to nonresidents except payments of wages to nonresidents engaged in film production or television production described in subrule 46.4(5); income payments for agricultural commodities or products described in subrule

46.4(6); deferred compensation payments, pension, and annuity payments attributable to personal services in Iowa by nonresidents described in subrule 46.4(7); and partnership distributions from certain publicly traded partnerships described in subrule 46.4(8). Withholding agents should use the following methods and rates in withholding for nonresidents:

a. Wages or salaries. Use the same withholding procedures, tables, formulas, and rates as are used for residents. See rule 701—46.2(422). Subrule 46.4(5) is an exception to the general rule. In addition, in accordance with the reciprocal tax agreement between Iowa and Illinois described in 701—subrule 38.13(1), Iowa withholding tax is not withheld on wages of Illinois residents who perform personal services in Iowa.

b. Payments other than wages, salaries, and other compensation for personal services. In lieu of using withholding tables or computer formulas to determine the amount of Iowa income tax to be withheld from payments made to nonresidents other than for salaries, wages, or other compensation for personal services, or income payments to nonresidents for agricultural commodities or products, Iowa income tax should be withheld at a rate of 5 percent of the amount of the payment. Subrule 46.4(6) describes the optional exemption from withholding of income payments made to nonresidents for the sale of agricultural commodities or products.

Nonresidents who prefer to make Iowa estimate payments instead of having Iowa income tax withheld from income payments from Iowa sources should refer to subrule 46.4(3) and rule 701—49.3(422).

46.4(2) Income of nonresidents subject to withholding. Listed below are various types of income paid to nonresidents which are subject to withholding tax. The list is for illustrative purposes only and is not deemed to be all-inclusive.

1. Personal service, including salaries, wages, commissions and fees for personal service wholly performed within this state and such portions of similar income of nonresident traveling salespersons or agents as may be derived from services rendered in this state.

2. Rents and royalties from real or personal property located within this state.

3. Interest or dividends derived from securities or investments within this state, when such interests or dividends constitute income of any business, trade, profession or occupation carried on within this state and subject to taxation.

4. Income derived from any business of a temporary nature carried on within this state by a nonresident, such as contracts for construction and similar contracts.

5. The distributive share of a nonresident beneficiary of an estate or trust, limited, however, to the portion thereof subject to Iowa income tax in the hands of the nonresident.

6. Income derived from sources within this state by attorneys, physicians, engineers, accountants, and similar sources as compensation for services rendered to clients in this state.

7. Compensation received by nonresident actors, singers, performers, entertainers, and wrestlers for performances in this state. See subrule 46.4(5) for an exception to this rule.

8. Income received by a nonresident partner or shareholder of a partnership or S corporation doing business in Iowa. See subrule 46.4(8) for the exemption from withholding for partnership distributions from certain publicly traded partnerships.

9. The Iowa gross income of a nonresident who is employed and receiving compensation for services shall include compensation for personal services which are rendered within this state. Compensation for personal services rendered by a nonresident wholly without the state is excluded from gross income of the nonresident even though the payment of such compensation may be made by a resident individual, partnership or corporation.

10. The gross income from commissions earned by a nonresident traveling salesperson, agent or other employee for services performed or sales made whose compensation depends directly on volume of business transacted by the nonresident, includes that proportion of the total compensation received which the volume of business or sales by the employee within this state bears to the total volume of business or sales within and without the state.

11. Payments made to landlords by agents, including elevator operators, for grain or other commodities which have been received by the landlord as rent constitute taxable income of the landlord

when sold by the landlord. See subrule 46.4(6) for the exemption from withholding on incomes paid to nonresidents for the sale of agricultural commodities or products.

12. Wages paid to nonresidents of Iowa who earn the compensation from regularly assigned duties in Iowa and one or more other states for a railway company or for a motor carrier are not taxable to Iowa. Pursuant to the Amtrak Reauthorization and Improvement Act of 1990, the nonresidents in this situation are subject only to the income tax laws of their states of residence. Thus, when an Iowa resident performs regularly assigned duties in two or more states for a railroad or a motor carrier, the only state income tax that should be withheld from the wages paid for these duties is Iowa income tax.

13. Wages paid to nonresidents of Iowa who earn compensation from regularly assigned duties in Iowa and one or more states for an airline company. In accordance with Public Law 103-272 enacted by Congress, airline employees who are nonresidents of Iowa are subject only to the income tax laws of their states of residence or the state in which they perform 50 percent or more of their duties.

14. Wages paid to nonresidents of Iowa who earn compensation from regularly assigned duties in Iowa for a merchant marine company. In accordance with Public Law 106-489 enacted by Congress, interstate waterway workers who are nonresidents of Iowa are subject only to the income tax laws of their states of residence.

46.4(3) *Nonresident certificate of release.* Where a nonresident payee makes the option to pay estimated Iowa income tax, a certificate of release from withholding will be issued by the Iowa department of revenue to the designated payers. The certificate of release will be forwarded to the specified withholding agent(s) and payer(s), and will state the amount of income covered by the estimated tax payment. Any income paid in excess of the amount so stated will be subject to withholding tax at the current rate. See 701—Chapter 49 for information on making estimate payments.

46.4(4) *Recovering excess tax withheld.* A nonresident payee may recover any excess Iowa income tax withheld from income of the payee by filing an Iowa income tax return after the close of the tax year and reporting income from Iowa sources in accordance with the income tax return instructions.

46.4(5) *Exemption from withholding of nonresidents engaged in film production or television production in this state.* Nonresidents engaged in film production or television production in this state are not subject to state withholding on wages earned from this activity if the nonresidents' employer has applied to the department for exemption from withholding of state income tax and the employer's application includes the following information about the nonresident employees:

- a. The employees' names.
- b. The employees' permanent mailing addresses.
- c. The employees' social security numbers.
- d. The estimated amounts the employees are to be paid for services provided by the employees in this state.

The employer's application for exemption from withholding for the nonresident employees will not be approved by the department if the employer fails to provide all the required information.

Only those nonresident employees described in the application for exemption from withholding will be covered when the application is approved by the department. If additional nonresident employees are hired after the initial application for exemption is filed, those employees should be described in an amendment to the application for exemption which must be filed with the department of revenue.

Applications for exemption from withholding for nonresident employees engaged in film production or television production should be directed to the Iowa Department of Revenue, Compliance Division, Examination Section, Hoover State Office Building, P.O. Box 10456, Des Moines, Iowa 50306.

46.4(6) *Exemption from withholding for the sale of agricultural commodities or products.* Withholding agents are not required to withhold state income tax from income payments made to nonresidents or representatives of the nonresidents for the sales of agricultural commodities or products, if the withholding agents provide certain information to the department of revenue about the sales. The following paragraphs describe the agricultural commodities and products that are included in the exemption from withholding, specify the information needed on the sales and clarify other issues related to the exemption from withholding. 701—subrule 49.3(4) describes an election for

withholding agents to make estimate payments on behalf of nonresident taxpayers for net incomes of the nonresidents from agricultural commodities or products.

a. Agricultural commodities or products included in the exemption from withholding. Withholding agents are not required to withhold state income tax from income payments they make to nonresidents or representatives of the nonresidents for the sale of commodity credit certificates, grain (corn, soybeans, wheat, oats, etc.), livestock (cattle, hogs, sheep, horses, etc.), domestic fowl (chickens, ducks, turkeys, geese, etc.), or any other agricultural commodities or products, if the withholding agents provide the department of revenue with the information specified in paragraph “*b*” of this subrule.

b. Information to be provided to the department by withholding agents claiming exemption from withholding on income payments made to nonresidents for the sales of agricultural items. The following information is to be provided on a listing to the department of revenue by withholding agents electing exemption from withholding of state income tax on income payments made in the calendar year to nonresidents or representatives of the nonresidents on the sales of agricultural commodities or products made in the year:

- (1) Name of the nonresident (last name, first name and middle initial).
- (2) Home address of the nonresident.
- (3) Social security number of the nonresident.
- (4) Aggregate payments made in the calendar year for the nonresident (includes payments made to a representative of the nonresident on behalf of the nonresident).
- (5) Two-digit Iowa county code number of the first one of the following that applies to the nonresident:
 1. County in which the nonresident owns real property or personal property.
 2. County in which the nonresident leases real property or personal property.
 3. County in which the nonresident has agricultural products stored or in which livestock is located.
 4. County where the nonresident has performed custom farming activities in the year.
 5. County where the nonresident has other business activities in Iowa other than merely sales activities.

If a nonresident does not own or lease property in Iowa or have other connection with Iowa as described in subparagraph 46.4(6)“*b*”(5), items “3,” “4,” and “5,” the nonresident is not subject to Iowa income tax on the income payments for agricultural commodities or products and the nonresident’s income payments should not be included on the listing.

In a situation where a withholding agent is unable to get all the information that is to be provided to the department on income payments on sales of agricultural items, the agent is relieved of the requirement to withhold if the agent can provide written evidence showing an attempt was made to acquire all the information.

The listing of aggregate income payments to nonresidents with an Iowa connection for sales of agricultural commodities and products in the calendar year should be sent to the department by the withholding agent on or before April 1 of the year following the year in which the income payments were made. In lieu of the listing, the withholding agent may compile the information on aggregate income payments to nonresidents on a magnetic tape, diskette or other electronic reporting, provided the submission meets departmental guidelines described in 701—paragraph 8.3(1)“*e*.”

The listing, magnetic tape or other electronic submission should be sent to the following address: Iowa Department of Revenue, Compliance Division, Examination Section, Hoover State Office Building, P.O. Box 10456, Des Moines, Iowa 50306; idr@iowa.gov.

A withholding agent is not exempt from withholding of state income tax on income payments to nonresidents on sales of agricultural commodities or products if the withholding agent does not provide the department of revenue with information on income payments made during the year by April 1 of the subsequent year.

c. Rescinded IAB 3/2/05, effective 4/6/05.

46.4(7) *Exemption from withholding of payments made to nonresidents for deferred compensation, pensions, and annuities.* Iowa income tax withholding is not required from payments of deferred

compensation, pensions, and annuities made to nonresidents which are attributable to personal services of the nonresidents in Iowa since these payments are not subject to Iowa income tax. See rule 701—40.45(422) for the exclusion from Iowa income tax for these payments received by nonresidents.

46.4(8) Exemption from withholding of partnership distributions made to nonresidents of certain publicly traded partnerships. For tax years beginning on or after January 1, 2008, a nonresident who is a partner in a publicly traded partnership as defined in Section 7704(b) of the Internal Revenue Code is not subject to state withholding tax on the partner's pro rata share, provided that the publicly traded partnership submits the following information to the department for each partner whose Iowa income from the partnership exceeded \$500:

- a. Partner's name.
- b. Partner's address.
- c. Partner's taxpayer identification number.
- d. Partner's pro rata share of Iowa income from the partnership for the tax year.

A partnership is a publicly traded partnership if the interests in the partnership are traded on an established securities market or the interests in the partnership are readily traded on a secondary market or its substantial equivalent.

This rule is intended to implement Iowa Code section 422.15, Iowa Code section 422.16 as amended by 2007 Iowa Acts, House File 923, section 3, and Iowa Code sections 422.17 and 422.73.
[ARC 7761B, IAB 5/6/09, effective 6/10/09]

701—46.5(422) Penalty and interest.

46.5(1) Penalty. See rule 701—10.6(421) for penalty for tax periods beginning on or after January 1, 1991. See rule 701—10.8(421) for statutory exemptions to penalty for tax periods beginning on or after January 1, 1991.

46.5(2) Computation of interest on unpaid tax. Interest shall accrue on tax due from the original due date of the return. Interest on refunds of any portion of the tax imposed by statute which has been erroneously refunded and which is recoverable by the department shall bear interest as provided by law from the date of payment of the refund, with each fraction of a month considered to be an entire month. See rule 701—10.2(421) for the statutory interest rate.

All payments shall be first applied to the penalty and then to the interest, and the balance, if any, to the amount of tax due.

46.5(3) Computation of interest on overpayments. If the amount of tax determined to be due by the department is less than the amount paid, the excess to be refunded will accrue interest from the first day of the second calendar month following the date of payment or the date the return was due to be filed or was filed, whichever is the later.

This rule is intended to implement Iowa Code sections 421.27, 422.16 and 422.25.

701—46.6(422) Withholding tax credit to workforce development fund. Upon payment in full of a certificate of participation or other obligation issued to fund a job training program under Iowa Code chapter 260E, the community college which provided the training is to notify the economic development authority of the amount paid by the employer or business to the community college during the previous 12 months. The economic development authority is to notify the department of revenue of this amount. The department is to credit 25 percent of this amount to the workforce development fund in each quarter for the next ten years from the withholding tax paid by the employer or business. If the withholding tax paid by the employer or business for a quarter is not sufficient to cover the sum to be credited to the workforce development fund, the sum to be credited is to be reduced accordingly. The aggregate amount from all employers to be transferred to the workforce development fund in a year is not to exceed \$4 million for fiscal years beginning on or after July 1, 2001, but before July 1, 2014. The aggregate amount is not to exceed \$5,750,000 for the fiscal year beginning July 1, 2014, and the aggregate amount is not to exceed \$6,000,000 for fiscal years beginning on or after July 1, 2015.

This rule is intended to implement Iowa Code section 422.16A as amended by 2014 Iowa Acts, House File 2460.

[ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—46.7(422) ACE training program credits from withholding. The accelerated career education (ACE) program is a training program administered by the Iowa department of economic development to provide technical training in state community colleges for employees in highly skilled jobs in the state to the extent that the training is authorized in an agreement between an employer or group of employers and a community college for the training of certain employees of the employer or group of employers. If a community college and an employer or group of employers enter into a program agreement for ACE training, a copy of the agreement is to be sent to the department of revenue. No costs incurred prior to the date of the signing between a community college and an employer or group of employers may be reimbursed or are eligible for program job credits, including job credits from withholding unless the costs are incurred on or after July 1, 2000.

46.7(1) The costs of the ACE training program may be paid from the following sources:

- a. Program job credits which the employer receives on the basis of the number of program job positions agreed to by the employer for the training program;
- b. Cash or in-kind contributions by the employer toward the costs of the program which must be at least 20 percent of the total cost of the program;
- c. Tuition, student fees, or special charges fixed by the board of directors of the community college to defray costs of the program;
- d. Guarantee by the employer of payments to be received under paragraphs “a” and “b” of this subrule.

This rule pertains only to the program job credits from withholding described in paragraph “a.”

46.7(2) ACE training programs financed by job credits from withholding. In situations when an employer or group of employers and a community college have entered into an agreement for training under the ACE program and the agreement provides that the training will be financed by credits from withholding, the amount of funding will be determined by the program job credits identified in the agreement. Eligibility for the program job credits is based on certification of program job positions and program job wages by the employer at the time established in the agreement with the community college. An amount of up to 10 percent of the gross program job wage as certified by the employer in the agreement shall be credited from the total amount of Iowa income tax withheld by the employer. For example, if there were 20 employees designated to be trained in the agreement and their gross wages were \$600,000, the gross program job wage would be \$600,000. Therefore, 10 percent of the gross program job wage in this case would be \$60,000, and this amount would be credited against Iowa income tax which would ordinarily be withheld from the wages of all employees of the employer and remitted to the department of revenue on a quarterly basis. The amount credited against the withholding tax liability of the employer would be paid to the community college training the employer’s employees under the ACE program. The employer may take the credits against withholding tax on returns filed with the department of revenue until such time as the program costs of the ACE program are considered to be satisfied.

This rule is intended to implement Iowa Code sections 260G.4A and 422.16.

701—46.8(260E) New job tax credit from withholding. The Iowa industrial new jobs training program is a program administered by the economic development authority for projects established by a community college for the creation of jobs by providing education and training of workers for new jobs for new or expanding industries. For employers that have entered into an agreement with a community college under Iowa Code chapter 260E, a credit equal to 1.5 percent of the wages paid by the employer to each employee covered by the agreement can be taken on the Iowa withholding tax return. If the amount of withholding by the employer is less than 1.5 percent of the wages paid to the employees covered by the agreement, the employer can take the remaining credit against Iowa tax withheld for other employees. An employee does not include a resident of Illinois who earns wages in Iowa since these employees are not subject to Iowa withholding tax in accordance with the Iowa-Illinois reciprocal tax agreement discussed in 701—subrule 38.13(1). The administrative rules for the Iowa industrial

new jobs training program administered by the economic development authority may be found in 261—Chapter 5.

This rule is intended to implement Iowa Code section 260E.2 as amended by 2012 Iowa Acts, Senate File 2212, and section 260E.5.

[ARC 0337C, IAB 9/19/12, effective 10/24/12]

701—46.9(15) Supplemental new jobs credit from withholding and alternative credit for housing assistance programs.

46.9(1) *Supplemental new jobs credit from withholding.* For eligible businesses approved by the economic development authority under Iowa Code section 15A.7, a credit equal to an additional 1.5 percent of the wages paid to employees in new jobs for these eligible businesses can be taken on the Iowa withholding tax return. This supplemental new jobs credit is in addition to the credit described in rule 701—46.8(260E). The administrative rules for the supplemental new jobs credit from withholding may be found in 261—paragraph 59.6(3)“a.”

46.9(2) *Alternative credit for housing assistance programs.* As an alternative to the credit described in subrule 46.9(1) for eligible businesses in an enterprise zone, a business may provide a housing assistance program in the form of down payment assistance or rental assistance for employees in new jobs. A credit equal to 1.5 percent of the wages paid to employees participating in a housing assistance program may be claimed on the Iowa withholding tax return for wages paid prior to July 1, 2009. Effective July 1, 2009, the alternative credit for housing assistance programs was repealed. The administrative rules for the enterprise zone program administered by the Iowa department of economic development may be found in 261—Chapter 59.

This rule is intended to implement Iowa Code section 15A.7 and 2014 Iowa Code sections 15E.196 and 15E.197.

[ARC 8605B, IAB 3/10/10, effective 4/14/10; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—46.10(403) Targeted jobs withholding tax credit. For employers that enter into a withholding agreement with pilot project cities approved by the economic development authority and create or retain targeted jobs in a pilot project city, a credit equal to 3 percent of the gross wages paid to employees under the withholding agreement can be taken on the Iowa withholding tax return. The employer shall remit the amount of the credit to the pilot project city. The administrative rules for the targeted jobs withholding tax credit program administered by the economic development authority may be found in 261—Chapter 71.

If the amount of withholding by the employer is less than 3 percent of the wages paid to the employees covered under the withholding agreement, the employer can take the remaining credit against Iowa tax withheld for other employees or may carry the credit forward for up to ten years or until depleted, whichever is the earlier.

If an employer also has a new job credit from withholding provided in rule 701—46.8(260E) or the supplemental new jobs credit from withholding provided in subrule 46.9(1), these credits shall be collected and disbursed prior to the collection and disbursement of the targeted jobs withholding tax credit.

The following nonexclusive examples illustrate how this rule applies:

EXAMPLE 1: Company A does not have a withholding credit under Iowa Code chapter 260E or a supplemental new jobs credit under Iowa Code chapter 15E. Company A enters into a withholding agreement, and the withholding rate for employees covered under the agreement is 4 percent of the wages paid. Company A will be allowed a credit on the Iowa withholding return equal to 3 percent of the wages paid to each employee covered under the withholding agreement, since the targeted jobs withholding tax credit cannot exceed 3 percent.

EXAMPLE 2: Company B does not have a withholding credit under Iowa Code chapter 260E or a supplemental new jobs credit under Iowa Code chapter 15E. Company B enters into a withholding agreement, and the withholding rate for employees covered under the agreement is 2.5 percent of the wages paid. Company B will be allowed a credit on the Iowa withholding return equal to 3 percent of the wages paid to each employee covered under the withholding agreement. The extra withholding credit

equal to 0.5 percent may be used to offset withholding tax for Company B's employees not covered under the withholding agreement.

EXAMPLE 3: Company C has a withholding credit under Iowa Code chapter 260E of 1.5 percent of the wages paid to new employees and a supplemental new jobs credit under Iowa Code chapter 15E of 1.5 percent of the wages paid to new employees. Company C also enters into a withholding agreement for the same employees covered under the 260E agreement and supplemental new jobs credit agreement, and the withholding rate for employees covered under these agreements is 5 percent of the wages paid. Company C will be allowed a credit on the Iowa withholding return equal to 5 percent of the wages paid to each employee covered under these agreements. Since the community college receives disbursement of the credit before the pilot project city, the community college will receive 3 percent of the wages paid to each employee covered under the agreements, and the pilot project city will receive the remaining 2 percent of the wages paid to each employee covered under the agreements.

EXAMPLE 4: Company D has a withholding credit under Iowa Code chapter 260E of 1.5 percent of the wages paid to new employees and a supplemental new jobs credit under Iowa Code chapter 15E of 1.5 percent of the wages paid to new employees. Company D also enters into a withholding agreement for the same employees covered under the 260E agreement and supplemental new jobs credit agreement, and the withholding rate for employees covered under the agreement is 2.5 percent of the wages paid. Company D will be allowed a credit on the Iowa withholding tax return equal to 6 percent of the wages paid to each employee covered under these agreements. The extra withholding credit equal to 3.5 percent may be used to offset withholding tax for Company D's employees not covered under these agreements.

46.10(1) Notification by the employer. Once a withholding agreement is entered into with a pilot project city, the employer shall notify the department of revenue that an agreement has been executed. With this notification, the employer must also provide its address, tax identification number and the number of new jobs created under the agreement. In addition, for each year that the withholding agreement is in place, the employer must notify the department of revenue by January 31 of the number of new jobs created as of December 31 of the preceding year.

46.10(2) Notification by the pilot project city. The pilot project city must notify the department of revenue on a quarterly basis of the amount of the targeted jobs withholding credit that each employer covered by a withholding agreement remitted to the city. This notification must occur within 45 days after the end of each calendar quarter. In addition, the pilot project city must notify the department of revenue immediately when a withholding agreement with an employer is terminated.

This rule is intended to implement Iowa Code section 403.19A as amended by 2013 Iowa Acts, Senate File 433.

CHAPTER 47
DECLARATION OF ESTIMATED INCOME TAX BY INDIVIDUALS
[Prior to 12/17/86, Revenue Department[730]]
Rescinded IAB 11/24/04, effective 12/29/04

CHAPTER 48
COMPOSITE RETURNS

701—48.1(422) Composite returns. For tax years of nonresident partners, members, shareholders, or beneficiaries which begin on or after January 1, 1987, a partnership, limited liability company, S corporation, or trust may be allowed or be required to file a composite return and pay the tax due on behalf of the nonresident partners, members, shareholders, or beneficiaries. For tax years of nonresident partners, members, shareholders, or beneficiaries which begin on or after January 1, 1999, a partnership, limited liability company, S corporation, or trust may elect or may be required to file a composite return and pay the tax due on behalf of the nonresident partners, members, shareholders, or beneficiaries. For tax years beginning on or after January 1, 1995, professional athletic teams may be allowed or be required to file a composite return and pay the tax due on behalf of nonresident team members. For tax years beginning on or after January 1, 2008, nonresident trusts or estates which are partners, members, shareholders or beneficiaries in partnerships, limited liability companies, S corporations or estates or trusts may elect or may be required to file a composite return and pay the tax due on behalf of the nonresident trusts or estates.

This rule is intended to implement Iowa Code section 422.13 as amended by 2007 Iowa Acts, House File 923, section 15.

701—48.2(422) Definitions. For the purposes of this chapter:

“*Employee*” means a nonresident member of a professional athletic team as defined in subrule 701—40.46(1).

“*Partner*” includes a member of a limited liability company which is treated as a partnership for tax purposes.

“*Taxpayer*” means a partnership, limited liability company, S corporation, professional athletic team, or trust which files a return and pays the tax on behalf of the nonresident partners, members, shareholders, employees, beneficiaries, estates or trusts.

“*Tax year*” means the tax year of the partners, shareholders, employees, beneficiaries, estates or trusts included in the composite return.

This rule is intended to implement Iowa Code section 422.13.

701—48.3(422) Filing requirements. A composite return may be allowed or required to be filed based upon the following:

1. The composite return must include all nonresident partners, shareholders, employees, or beneficiaries unless the taxpayer can demonstrate which nonresident partners, shareholders, employees, or beneficiaries are filing separate income tax returns because the partner, shareholder, employee or beneficiary has Iowa source income other than that which may be reported on a separate composite return, or has elected to file an Iowa individual income tax return. Nonresident partners, shareholders, employees, or beneficiaries shall not be included in a composite return if the nonresident has less than the minimum statutory filing amount. For example, for 2006 the minimum income from Iowa sources before a nonresident is required to file an Iowa individual income tax return is \$1,000 of income attributed to Iowa sources as determined by applying the allocation and apportionment provisions of 701—Chapter 54 to the nonresident’s prorated share of the entity’s income. In addition, nonresident partners, shareholders, employees, or beneficiaries shall not be included in a composite return if the nonresident does not have more income from Iowa sources than the amount of one standard deduction for a single taxpayer plus an amount of income necessary to create a tax liability at the effective tax rate on the composite return sufficient to offset one personal exemption. For example, for 2006 a standard deduction for a single individual is \$1,650 and at the maximum tax rate of 8.98 percent, \$445 of taxable income is required to offset the \$40 personal exemption. This equates to \$2,095 (\$445 plus \$1,650) of income attributable to Iowa sources that would be required to be included in a composite return. The taxpayer must include a list of all nonresident partners, shareholders, employees, or beneficiaries who are filing separate income tax returns. The list must also include the address and social security number

or federal identification number of the nonresident partners, shareholders, employees, or beneficiaries. Filing a composite return is an election which may not be withdrawn after the due date of the return (considering any extension of time to file), but the nonresidents may, as an individual or as a group, withdraw their election at any time prior to the due date (considering any extension of time to file).

2. Income of partners, shareholders, employees, or beneficiaries whose state of residence is not known by the taxpayer must be included in the composite return.

3. Income of partners in publicly traded limited partnerships held in street names by brokers must be included in the composite return unless the taxpayer can demonstrate that the partner is an Iowa resident.

4. A taxpayer who elects to file a composite return shall continue to file composite returns unless the taxpayer notifies the department in writing that the taxpayer wishes to discontinue filing composite returns. The notice shall be filed with the Iowa Department of Revenue, Examination Section, Compliance Division, P.O. Box 10456, Des Moines, Iowa 50306, before the due date of the return for the tax year for which the change in filing is to be made.

A taxpayer who was required to file a composite return for the immediately preceding taxable year is required to file a composite return unless permission is given to discontinue filing a composite return.

5. Each nonresident partner, shareholder, employee, or beneficiary whose income is included in the composite return must have the same tax year, which must be the tax year of the majority of the nonresident partners, shareholders, employees, or beneficiaries. Those nonresident partners, shareholders, employees, or beneficiaries who are not included in the composite return must file separate individual income tax returns.

This rule is intended to implement Iowa Code section 422.13.

701—48.4(422) When the application for permission to file a composite return must be filed. Rescinded IAB 11/7/07, effective 12/12/07.

701—48.5(422) Composite return required by director. The director may in accordance with rule 701—48.3(422) require the filing of a composite return under the following conditions.

48.5(1) The director may require the filing of a composite return if the nonresident partners, shareholders, or beneficiaries do not file individual income tax returns and pay the tax due.

48.5(2) Where some of the nonresident partners, shareholders, or beneficiaries file individual income tax returns and pay the tax due, but other nonresident partners, shareholders, or beneficiaries do not file individual returns, the director may require a composite return which includes the Iowa taxable income of those nonresident partners, shareholders, or beneficiaries who did not file individual returns.

48.5(3) For tax years beginning on or after January 1, 2010, if it is determined that it is necessary for the efficient administration of Iowa individual income tax, the director may require the filing of a composite return for nonresidents other than nonresident partners, members, beneficiaries or shareholders in partnerships, limited liability companies, trusts or S corporations.

For example, the director may require a composite return in situations where nonresident real estate brokers or nonresident insurance agents who are independent contractors earn commission income from the sale of real estate in Iowa or from insurance policies sold to Iowa residents.

This rule is intended to implement Iowa Code section 422.13 as amended by 2009 Iowa Acts, Senate File 478, section 132.

[ARC 8589B, IAB 3/10/10, effective 4/14/10]

701—48.6(422) Determination of composite Iowa income. Because a composite return is filed on behalf of the nonresident partners, shareholders, employees, or beneficiaries, it must be based upon the tax year of the majority of its partners, shareholders, employees, or beneficiaries. The composite return must be filed on Form IA 1040C, “Composite Iowa Individual Income Tax Return.” Attach schedules as necessary to explain the return. For the purposes of this rule, federal income means federal ordinary income (loss) from trade or business activities plus those items of income which flow through separately

less expense items which flow through separately to the partners, shareholders, or beneficiaries joining in the filing of a composite return.

1. Adjustments to federal income. For partnerships and trusts, make those adjustments to federal income set forth in Iowa Code section 422.7. For S corporations, make those adjustments to federal income set forth in Iowa Code section 422.35.

2. Apply the allocation and apportionment provisions of 701—Chapter 54 or rule 701—40.46(422) for allocation of compensation paid to nonresident employees of professional athletic teams.

3. Deduct one standard deduction equal to the amount allowed a single taxpayer, not to exceed the amount of income attributable to Iowa, for each nonresident partner, shareholder, employee, or beneficiary included in the composite return.

4. For tax years beginning on or after January 1, 1989, deduct an amount in lieu of a federal tax deduction based upon the following schedule.

0 — \$ 49,999	No deduction
\$ 50,000 — \$ 99,999	5% of net income attributable to Iowa
\$100,000 — \$199,999	10% of net income attributable to Iowa
\$200,000 and over	15% of net income attributable to Iowa

5. A net operating loss carryback or carryforward is allowed. See 701—subrule 40.18(3). In lieu of a net operating loss carryback, the taxpayer may elect to carry the loss forward.

This rule is intended to implement Iowa Code section 422.13.

701—48.7(422) Determination of composite Iowa tax.

48.7(1) The tax will be computed in accordance with Iowa Code section 422.5, including the alternative minimum tax as though a resident.

48.7(2) Deduct from the computed tax one personal exemption credit of \$20 (\$40 for tax years beginning on or after January 1, 1998) for each nonresident partner, shareholder, employee, or beneficiary included in the composite return.

EXAMPLE: For tax year 1991, X corporation is an S corporation, all of whose shareholders but one are nonresidents who have elected to join in the filing of a composite return. The three electing shareholders' share of income or loss is 87 percent of the corporation's total income. The S corporation's net income is \$800,000, and income items totaling \$6,000 and expenses of \$500,000 flow directly to the shareholders. The corporation has 25 percent of its sales with an Iowa destination. The corporation has tax preferences and adjustments of \$475,000. The composite tax liability would be computed as follows:

Net income attributable to electing shareholders \$800,000 × 87%	\$696,000
Add: electing shareholders' share of income items which flow separately to shareholders \$6,000 × 87%	5,220
Less: electing shareholders' share of expenses which flow separately to shareholders \$500,000 × 87%	<u><435,000></u>
Income attributable to electing shareholders	\$266,220
Times the Iowa business activity ratio	<u>25%</u>
Net income attributable to Iowa	\$ 66,555

Less: one standard deduction per shareholder $3 \times \$1,280$	< 3,840>
Federal tax deduction $\$66,555 \times 5\%$	<u>< 3,328></u>
Iowa taxable income	\$ 59,387
Computed tax	\$ 4,515
Less: one personal exemption credit per shareholder $3 \times \$20$	<u>< 60></u>
Iowa tax	<u>\$ 4,455</u>

The alternative minimum tax would be computed as follows:

Iowa taxable income	\$ 59,387
Add: tax preferences and adjustments attributable to electing shareholders times Iowa activity ratio $\$475,000 \times 87\% \times 25\%$	<u>103,313</u>
	\$162,700
Less: exemption	<u>35,000</u>
Minimum taxable income	\$127,700
times minimum tax rate 7.5%	<u>$\times .075$</u>
Computed minimum tax	\$ 9,578
Less regular tax	<u>< 4,455></u>
Minimum tax liability	<u>\$ 5,123</u>

This rule is intended to implement Iowa Code section 422.13.
[ARC 1303C, IAB 2/5/14, effective 3/12/14]

701—48.8(422) Estimated tax. Taxpayers filing composite returns are not required to make payments of estimated tax. However, if taxpayers desire to make estimated payments, the estimated payments should be made on Form IA 1040ES using the partnership's, S corporation's, or trust's identification number assigned by the department in lieu of the social security number.

This rule is intended to implement Iowa Code section 422.13.

701—48.9(422) Time and place for filing.

48.9(1) A composite return of income must be filed on or before the due date. The due date is the last day of the fourth month following the close of the tax year of the partners, shareholders, employees, beneficiaries, estates or trusts included in the composite return, or the last day of the period covered by an extension of time granted by the department. When the due date falls on a Saturday, Sunday, or legal holiday, the composite return is due the first business day following the Saturday, Sunday, or legal

holiday. If a return is placed in the mail, properly addressed, postage paid, and postmarked on or before the due date for filing, no penalty will attach should the return not be received until after that date. Mailed returns should be addressed to Composite Return Processing, Department of Revenue, P.O. Box 10469, Des Moines, Iowa 50306.

48.9(2) Extension of time for filing composite returns. If at least 90 percent of the tax required to be shown due has been paid by the due date and no return was filed by the due date, the director will consider that the taxpayer has requested an extension of time to file the return and will automatically grant an extension of up to six months to file the return. The taxpayer does not have to file an application for extension form with the department to get the automatic extension to file the return within the six-month period after the due date and not be subject to penalty. However, if the taxpayer wants to make a tax payment to ensure that at least 90 percent of the tax has been paid on or before the due date, the payment should be made with the Iowa Tax Voucher form. This form can be requested from the Taxpayer Services Section, P.O. Box 10457, Des Moines, Iowa 50306, or by telephone at (515)281-3114.

To determine whether or not at least 90 percent of the tax was “paid” on or before the due date, the aggregate amount of tax credits applicable on the return, plus the tax payments made on or before the due date, are divided by the tax required to be shown due on the return. The tax required to be shown on the return is the sum of the income tax and minimum tax. The tax credits applicable are the credits set out in Iowa Code chapter 422, division II, and section 422.111.

If the aggregate of the tax credits and the tax payments are equal to or greater than 90 percent of the tax required to be shown due, the taxpayer will have met the “90 percent” test and no penalty will be assessed. However, the taxpayer will still be subject to statutory interest on any tax due when the return is filed.

Any tax elections, such as the election to carry forward a net operating loss occurring in the tax year, will be considered to be valid in instances when the return is filed within the six-month extended period after the due date. The fact that the taxpayer has paid less than 90 percent of the tax required to be shown due will not invalidate any tax elections made on the return, if the return is filed within the six-month extended period.

48.9(3) Rescinded IAB 2/1/95, effective 3/8/95.

This rule is intended to implement Iowa Code section 422.13.

CHAPTER 49
ESTIMATED INCOME TAX FOR INDIVIDUALS
[Prior to 12/17/86, Revenue Department [730]]

701—49.1(422) Who must pay estimated income tax.

49.1(1) General rule. For tax years beginning on or after January 1, 1990, estimated payments are required if the taxpayer's income tax liability attributable to incomes not subject to withholding is expected to be \$200 or more. The amount of estimated tax paid must be used as a credit on the taxpayer's individual income tax return.

49.1(2) Joint estimate payments by married taxpayers. A husband and wife may make a joint estimate tax payment on one form as if they were one taxpayer. If a joint estimate payment is made, but the husband and wife elect to file separate returns or separately on the combined return form, the estimate tax paid for the tax year by the husband and wife shall be allocated between the spouses on their returns in the proportion that each spouse's net income not subject to withholding tax relates to the combined net income of both spouses not subject to withholding tax.

49.1(3) Separate estimate tax payments by married taxpayers. A husband and wife may each make separate estimate payments. If separate estimate payments are made by married taxpayers, each spouse is to claim only the estimate payments made by that spouse.

49.1(4) Examples of types of taxpayers who may be required to make estimate payments. Listed below are examples of various types of taxpayers who may be required to make estimated tax payments. The list is for illustrative purposes and is not deemed to be all-inclusive.

1. *Self-employed.* An individual having taxable income from a trade or business where the individual has control of the work, the services rendered, and the fees and charges for services rendered or merchandise sold.

2. *Retiree.* An individual receiving pensions, annuities, and social security benefits or other incomes not subject to withholding after the taxpayer has withdrawn from active employment.

3. *Farmers and fishers.* Individuals deriving at least two-thirds of yearly income from farming or fishing activities.

4. *Nonresident.* Any individual who resides out of state and receives taxable income from an Iowa source which is not subject to withholding.

5. *Beneficiaries of estates and trusts.* Any resident or nonresident individual who is the recipient of income from an estate or trust from an Iowa source.

6. *Taxpayers with income in addition to wages.* An individual drawing salary or wages subject to withholding tax, having additional taxable income from an Iowa source which is not subject to withholding, such as interest, dividends, capital gains, rents, royalties, business income, or farm income.

7. *Agricultural worker.* Any worker receiving a wage or salary for agricultural labor which is excluded by law for withholding tax purposes.

This rule is intended to implement Iowa Code section 422.16.
[ARC 0337C, IAB 9/19/12, effective 10/24/12]

701—49.2(422) Time for filing and payment of tax.

49.2(1) Time for filing.

a. *General rule.* The date for filing the first estimate tax payment is on or before the last day of the fourth month of the tax year. The estimate tax form is to be sent to: Estimate Processing, Iowa Department of Revenue, P.O. Box 10466, Des Moines, Iowa 50306.

b. *Special rule for farmers and fishers.* If the estimated gross income of a taxpayer from farming or fishing is at least two-thirds of the estimated gross income from all sources for the taxable year, one of the following three methods is available to the taxpayer for satisfying the requirement to make estimate tax payments.

(1) Make the first estimate payment on April 30 and make the other three payments by the dates specified under subrule 49.2(2).

(2) Make the entire estimate payment for the tax year by January 15 of the subsequent tax year and file the individual income tax return by April 30 of the subsequent tax year.

(3) File the individual income tax return and pay the tax in full on or before March 1 of the subsequent tax year.

c. Amended estimate payments.

(1) *General rule.* Whenever a taxpayer who is required to make estimate payments has reason to believe that the anticipated income tax liability on which the estimate payments are based has increased or decreased, any subsequent estimate payments should be amended or adjusted accordingly.

(2) *Example.* A married couple is making joint estimate tax payments on a calendar year basis, anticipating taxable income of \$8,500, with an estimated tax liability of \$300. The taxpayers paid the first quarter installment of \$75 by the due date of April 30 of the current year and the second installment of \$75 on June 30. On July 15, real estate owned jointly by the taxpayers is sold, creating additional taxable income for the year of \$7,500. The new tax liability for the tax year is \$900 less the estimate payments of \$150 already paid for the first and second quarters. There is a balance of \$750 to be paid in two equal installments of \$375 each by September 30 of the current year and by January 31 of the succeeding year.

49.2(2) Payment of estimated tax.

a. General rule. Estimated tax due for the tax year may be paid in full on the date on which the first payment is due or in four equal installments. The taxpayer may elect to pay any installment prior to the date when the installment is due.

b. Calendar-year installments. The first estimate tax payment is due by April 30. The other installments shall be paid on or before June 30 and September 30 of the current year, and on or before January 31 of the succeeding year.

c. Fiscal-year installments. The installment dates for a taxpayer filing estimate tax payments on a fiscal-year basis are:

Installment No. 1. The last day of the fourth month of the fiscal year.

Installment No. 2. The last day of the sixth month of the fiscal year.

Installment No. 3. The last day of the ninth month of the fiscal year.

Installment No. 4. The last day of the first month of the next fiscal year.

This rule is intended to implement Iowa Code section 422.16.

701—49.3(422) Estimated tax for nonresidents.

49.3(1) General rule. Except as noted in 49.3(2), payers of Iowa income to nonresidents of Iowa are required to withhold Iowa income tax and to remit the tax to the department. See rule 701—46.4(422) for withholding on payments to nonresidents.

49.3(2) Estimate payments in lieu of withholding. Nonresidents who prefer to pay estimated tax in lieu of having state income tax withheld by a state withholding agent must obtain a certificate or release from withholding. The nonresident estimated tax form must be accompanied by full payment and must include a list of the name(s) and address(es) of any tenant or farm manager, or cooperative elevator, or other Iowa agent or payer from which the taxpayer anticipates receiving income. The total gross income anticipated for the year must also be shown on the nonresident estimated tax form.

After the department's receipt of and approval of the completed nonresident estimate tax form with the full payment of the tax shown due on the form, the certificate of release from withholding will be forwarded to the withholding agent or payer designated on the form. Since the nonresident estimate form is filed for the purpose of obtaining a release from withholding, the form must be filed prior to the time of the transactions which would subject the taxpayer to the state withholding tax requirements. The nonresident estimate tax form and payment should be mailed to Estimate Processing, Iowa Department of Revenue, P.O. Box 10466, Des Moines, Iowa 50306.

49.3(3) Example. Nonresident estimated tax payments may be illustrated with the following example:

A nonresident individual owns a farm in Iowa which is operated by a farm manager. For tax purposes the farm manager is considered to be the Iowa withholding agent when distributing proceeds from the farm to the nonresident. A crop is sold through the local farm cooperative elevator and a check is issued to the farm manager, who then sends the check to the nonresident. Before doing so, Iowa income taxes

must be withheld from the gross proceeds and remitted to the Iowa department of revenue for deposit and credit to the income tax liability of the nonresident, unless the farm manager has possession of a certificate of release from withholding issued by the department of revenue. In the event that the farm cooperative elevator sends the check for payment of the crops directly to the nonresident, the cooperative becomes the withholding agent.

49.3(4) Election by withholding agents to make estimated payments on behalf of nonresident taxpayers with net incomes from agricultural commodities or products. Effective for tax years beginning on or after January 1, 1989, withholding agents such as farm management companies can elect to make estimate tax payments on behalf of nonresidents for net incomes that the nonresidents will have for the tax year from sales of agricultural commodities or products. If the withholding agent elects to make the estimate tax payments for the nonresident taxpayers, the estimate tax payments should be submitted to the department of revenue on or before the last day of the first month after the end of the tax year of the nonresidents. The estimate payments should be sent with Form IA 1040ES (45-002) and mailed to: Estimate Processing, Iowa Department of Revenue, P.O. Box 10466, Des Moines, Iowa 50306. Net income from agricultural commodities or products means net incomes from those agricultural commodities or products described in paragraph “a” of 701—subrule 46.4(6). If the estimate tax payments made on behalf of the nonresident taxpayers by the withholding agents are not sufficient to pay the Iowa income taxes on the net incomes of the nonresidents from the agricultural commodities or products, the nonresidents may be subject to penalties for underpayment of estimated taxes.

This rule is intended to implement Iowa Code sections 422.16 and 422.17.

701—49.4(422) Special estimated tax periods.

49.4(1) Short taxable year. A taxpayer having a taxable year of less than 12 months must make estimated tax payments if anticipating an Iowa tax liability of \$50 or more for that short tax year if that tax year began prior to January 1, 1990. In the case of short tax years beginning on or after January 1, 1990, taxpayers would be required to make estimated payments if their anticipated Iowa tax liabilities were \$200 or more from incomes not subject to withholding.

49.4(2) Part-year resident.

a. General rule. Part-year residents moving into or out of the state must determine their Iowa estimated tax on the ratio of income from Iowa sources not subject to withholding tax to incomes from all sources.

b. Example. An individual moving into the state on April 15, having taxable income from an Iowa source which is not subject to withholding and an expected tax liability of \$150, must make the first estimate payment of \$50 by June 30 and pay the remaining balance of \$100 in two equal installments of \$50 each by September 30 and by January 31 of the succeeding year if the tax year for which the estimate payments were made began prior to January 1, 1990. A similar procedure for making estimate payments would be followed for tax years beginning on or after January 1, 1990, when no estimate payments would be required unless the anticipated state income tax liability for the balance of the tax year would be \$200 or more.

This rule is intended to implement Iowa Code section 422.16.

701—49.5(422) Reporting forms.

49.5(1) Resident forms. Blank estimate tax forms are available from the department for resident taxpayers making state estimate payments.

49.5(2) Nonresident forms. A special nonresident estimate tax form with instructions is available from the department for any nonresident wishing to make estimate tax payments in lieu of having Iowa income tax withheld by an Iowa withholding agent. The estimated payment should be submitted with the certificate or the release from withholding described in subrule 49.3(2).

This rule is intended to implement Iowa Code section 422.16.

[ARC 1883C, IAB 2/18/15, effective 3/25/15]

701—49.6(422) Penalty—underpayment of estimated tax. The civil penalty provided by the Internal Revenue Code for underpayment of federal estimated tax also applies to persons required to make payments of estimated tax under provisions of the Iowa Code. The Iowa penalty for underpayment of estimated tax is computed on Form IA 2210 for individual taxpayers other than farmers and fishers and Form IA 2210F for individuals who have two-thirds of their gross annual incomes from farming or fishing activities.

49.6(1) *Exceptions which may avoid the underpayment penalty.* The following are the two exceptions under which taxpayers may avoid the penalty for underpayment of estimated tax:

a. Current year payments equal or exceed prior year's liability. Taxpayers may avoid the penalty for underpayment of estimated tax if the estimated tax payments and other tax payments for the current tax year, such as withholding tax, are equal to or exceed the tax liability for the prior tax year. The prior tax year must cover a 12-month period and there must have been a tax liability on the return for the prior year. For tax years beginning on or after January 1, 1987, the requirement that the return for the prior tax year must have had a tax liability is eliminated although the return must have covered a 12-month period.

b. Current year payments equal or exceed 80 percent, or 90 percent for tax years beginning on or after January 1, 1987, of the tax on the taxpayer's annualized income. Taxpayers may also avoid the penalty for underpayment of estimated tax, if their tax payments for the tax year are equal to or exceed 80 percent of the tax on the taxpayer's annualized income for periods from the first of the tax year to the end of the month preceding the month in which an installment of estimated tax is due. For tax years beginning on or after January 1, 1987, taxpayers may avoid the penalty for underpayment of estimated tax if their tax payments for the tax year are equal to or exceed 90 percent of the tax on the taxpayer's annualized income.

49.6(2) *Waiver of penalty for underpayment of estimated tax.* The following are two situations under which the penalty for underpayment of estimated tax may be waived for tax years beginning on or after January 1, 1986:

a. The underpayment was due to casualty, disaster, or other unusual circumstances and imposition of the penalty would be against equity and good conscience.

b. The underpayment was made by an individual who retired after having attained age 62, or who became disabled in the tax year for which the estimated payment was due or in the preceding tax year, and the underpayment was due to reasonable cause and not due to willful neglect.

49.6(3) *Special provision for penalty for underpayment of estimated tax for tax years beginning on or after January 1, 1987, but before January 1, 1988.* Rescinded IAB 11/24/04, effective 12/29/04.

This rule is intended to implement Iowa Code section 422.16.

701—49.7(422) Estimated tax carryforwards and how the carryforward amounts are affected under different circumstances. For tax years beginning on or after January 1, 1994, taxpayers that timely file their Iowa returns and have overpayments shown on their returns may elect to have the overpayments credited to their estimated tax payments for the following tax year.

For purposes of this rule, filing a return for a calendar-year period on or before the last day of the year in which the return is due will constitute timely filing of that return for purposes of being eligible to have an overpayment from that return applied to the estimated tax payments for the next tax year. The 1994 Iowa return is due on May 1, 1995, because the regular due date of April 30 falls on Sunday. Therefore, if a taxpayer files the 1994 return on or before December 31, 1995, showing an overpayment on the return, the taxpayer can elect to have the overpayment credited to the taxpayer's estimated tax for the 1995 calendar year.

However, if a taxpayer files the 1994 return anytime after the end of the 1995 calendar year with an overpayment shown on the return, the overpayment will be refunded to the taxpayer notwithstanding that the taxpayer has shown that the overpayment is to be credited to estimated tax for 1995.

EXAMPLE 1. Mark Jones filed his 1994 return on October 31, 1995, showing an overpayment of \$400, and a credit to 1995 estimated tax for \$400. Because the 1994 return was filed on or before December 31, 1995, Mr. Jones' election to credit the \$400 overpayment to 1995 estimated tax was honored.

EXAMPLE 2. Fred Mack filed his 1994 and 1995 Iowa returns in March 1996. The 1994 return showed an overpayment of \$300 and credit to 1995 estimated tax of \$300. The 1995 return showed an overpayment of \$200 which was determined from estimated payments of \$800, including the \$300 credit from the 1994 return. The overpayment from the 1994 return was to be refunded because the taxpayer had filed that return after the deadline for crediting overpayments to estimated payments for 1994 returns. Because the \$300 credit to 1995 estimated tax was not allowed, there was tax due of \$100 on the 1995 return. The tax due for 1995 was satisfied with part of the refund from the 1994 return.

The following subrules show how the amounts of tax carryforwards from overpayments shown on state returns are affected by certain circumstances:

49.7(1) *Estimated tax carryforward and how amount of carryover credit is affected by error on return.* If a state return is filed timely with an overpayment shown on the return and the overpayment is to be credited to the taxpayer's estimated payments for the following year, the amount credited to estimated payments will be affected by an error on the return. Thus, if the error on the return is corrected and results in a smaller overpayment than was shown when the return was filed, the credit to estimated tax from the return will be reduced accordingly.

EXAMPLE. Mike Green filed his 1994 return on March 20, 1995, showing an overpayment of \$400 and a credit to 1995 estimated tax of \$400. During processing of the return, it was determined that the federal income tax refund received was subtracted from net income instead of being added to net income. Correction of this error resulted in an overpayment of \$200 instead of \$400. Thus, the amount credited to the taxpayer's estimated payments for 1995 was \$200 instead of the \$400 shown on the return form. The department notified Mr. Green of the error and advised him that only \$200 was being credited to the taxpayer's estimated tax for 1995 instead of the \$400 shown on the return.

49.7(2) *Estimated tax credit carryover, carryforward amount affected by amended return.* A taxpayer files an original return timely with an overpayment and with the overpayment credited to the following year's estimated tax payments. If the taxpayer files an amended return correcting an error on the original return and with a different amount credited to estimated tax than on the original return, the credit amount from the amended return will be credited to estimated tax, if the amended return is filed on or before the end of the year in which the return is due. Thus, if an amended 1994 return is filed by December 31, 1995, the amount shown as a credit to estimated tax from that amended return will be the amount credited to the taxpayer's 1995 estimated tax, instead of the amount credited from the original 1994 return.

EXAMPLE. Velma Fox filed her original 1994 return on April 15, 1995, with an overpayment of \$500 and all of that overpayment credited to her estimated tax for 1995. Later, in 1995, Ms. Fox determined that she had failed to claim a deduction on the return for depreciation on some business equipment she acquired in 1994. Therefore, she filed an amended 1994 Iowa return on October 31, 1995, showing an overpayment of \$700 and a credit to 1995 estimated tax of the same amount. Ms. Fox's amended return was filed on or before December 31, 1995, so the \$700 credit to Ms. Fox's 1995 estimated tax from the amended return was allowed.

Note that if the amended return had not been filed until sometime in January 1996, the credit from Ms. Fox's original return would have been applied to Ms. Fox's estimated payments for 1995. Since the amended return would have been filed too late for purposes of crediting the overpayment to the taxpayer's estimated tax for the next year, the department would issue Ms. Fox a refund of \$200 which is the portion of the overpayment from the amended return that had not been credited to estimated tax from the original return for 1994.

49.7(3) *Estimated tax carryforward and how amount of carryover credit is affected by state tax liability or other state liability of the taxpayer.* A taxpayer who files an Iowa return with an overpayment shown on the return and elects to have the overpayment credited to the taxpayer's estimated tax for the next tax year will not have the overpayment credited to estimated tax if the taxpayer has tax liabilities or other liabilities with the state that are subject to setoff. Other liabilities with the state that are subject to setoff are those liabilities described in Iowa Code section 8A.504. These liabilities are for debts owed the state for public assistance overpayments, defaults on guaranteed student or parental college

loans, district court debts, delinquent child support, and any other debts of the taxpayer with a board, commission, department, or other administrative office or unit of the state of Iowa.

EXAMPLE 1. Rose Peters filed her 1994 Iowa return in April 1995 showing an overpayment of \$400 and a credit to 1995 estimated tax of \$400. During processing of Rose's 1994 return it was determined that she had a liability of \$150 from her 1993 Iowa return. Thus, \$150 of the 1994 overpayment was offset against the tax liability from the 1993 return. The remaining portion of the 1994 overpayment of \$250 was credited to Ms. Peters' estimated tax for 1995.

EXAMPLE 2. Mike Moore filed his 1994 Iowa return in May 1995 with an overpayment of \$500, a credit to 1995 estimated tax of \$300 and a refund of \$200. Mr. Moore is a "self-employed individual" as that phrase is to be understood for the purposes of Iowa Code section 252B.5, subsection 8, as amended by 2003 Iowa Acts, House File 534, section 220. During processing it was determined that Mr. Moore had a liability for unpaid child support of \$1,000. After Mr. Moore was notified by the child support recovery unit of the department of human services that the overpayment from the 1994 return was going to be applied to the child support liability, the entire overpayment of \$500 was set off against Mr. Moore's liability for unpaid child support. Thus, since the \$300 credit to estimated tax was set off against the delinquent child support, there was no credit to estimated tax for 1995. Responsibility for offsetting this type of obligation remains, as of July 1, 2003, with the department of revenue and has not been transferred to the department of administrative services.

49.7(4) *Accrual of interest on an assessment of additional tax.* If the taxpayer has not elected to have an overpayment credited to an installment other than the first installment, interest shall accrue on an assessment of additional tax as follows: If the overpayment was credited to the first installment, interest on an assessment of additional tax shall accrue from the due date of the return. If the overpayment was credited to an installment due after the overpayment arose, interest shall accrue from the date the return was filed. Interest on that portion of an assessment greater than the overpayment shall accrue from the due date of the return.

If the taxpayer has elected to have an overpayment of estimated tax credited to an installment other than the first installment, interest shall accrue on any assessment of additional tax up to the amount of the overpayment from the date the return was filed with the department. Interest on any assessment of additional tax greater than the amount of the overpayment shall accrue from the due date of the return, *Avon Products, Inc. v. United States*, 588 F.2d 342 (2nd Cir. 1978), Revenue Ruling 84-58.

This rule is intended to implement Iowa Code section 422.16.

CHAPTER 50
APPORTIONMENT OF INCOME FOR RESIDENT
SHAREHOLDERS OF S CORPORATIONS

701—50.1(422) Apportionment of income for resident shareholders of S corporations. For tax years beginning on or after January 1, 1998, resident shareholders of all S corporations which carry on business within and without Iowa may, at their election, determine the S corporation income allocable to sources within Iowa by allocation and apportionment of the S corporation income. For tax years beginning on or after January 1, 2013, estates and trusts with a situs in Iowa which are shareholders in S corporations which carry on business within and without Iowa can take advantage of these apportionment provisions. The criteria to determine whether the S corporation is carrying on business within and without Iowa is set forth in 701—subrule 54.1(4).

For tax years beginning on or after January 1, 1997, a shareholder in an S corporation which carries on business within and without Iowa which has elected to apportion income and then elects not to apportion income shall not reelect to apportion income for three tax years immediately following the first tax year in which the shareholder elected not to apportion income, unless the director of revenue consents to the election.

This rule is intended to implement Iowa Code section 422.5, subsection 1, paragraph “j,” as amended by 2013 Iowa Acts, Senate File 452.

[ARC 7761B, IAB 5/6/09, effective 6/10/09; ARC 1102C, IAB 10/16/13, effective 11/20/13]

701—50.2(422) Definitions. Rescinded ARC 1102C, IAB 10/16/13, effective 11/20/13.

701—50.3(422) Distributions. Distributions from income not previously taxed by Iowa include the amount of all cash distributions and the fair market value of all property distributions made during the year, except as follows:

1. Distributions from income not subject to Iowa tax due to exclusion under Iowa Code section 422.7 (i.e., interest from federal securities or certain securities issued by Iowa). For purposes hereof, all distributions for a year shall be deemed to be made proportionally from income subject to Iowa tax and from income not subject to Iowa tax. Distributions from income apportioned outside of Iowa shall not be deemed to be made from income not subject to Iowa tax.

2. Distributions from income previously taxed by Iowa for a year in which the S corporation was a C corporation and which is taxed as a dividend or capital gain for federal income tax purposes.

3. Distributions from income previously taxed by Iowa for a year prior to the first tax year the resident shareholder elected to apportion income within and without Iowa.

4. Distributions treated as a return of capital for federal income tax purposes for tax years beginning prior to January 1, 2004.

5. For tax years beginning on or after January 1, 2004, any distributions paid from income for which the taxpayer can prove that Iowa tax has been previously paid. Any distributions paid from income apportioned outside of Iowa for tax years in which the resident shareholder elected to apportion income within and without Iowa will be considered distributions for which Iowa tax has not been previously paid, and cannot be excluded for purposes of this rule.

For purposes of this rule, a distribution is taken into account on the date the corporation makes the distribution, regardless of when the distribution is treated as received by the shareholder. Distributions shall first be deemed made from current year income of the S corporation to the extent thereof. If distributions during a year exceed the current income of the S corporation, any excess distributions shall be considered made first from the immediately preceding year income of the S corporation, and then to each preceding year income of the S corporation in reverse chronological order, and then in accordance with the ordering rules set forth in Section 1368 of the Internal Revenue Code and the regulations thereunder.

EXAMPLE: An S corporation earned income of \$20,000 in 2002, income of \$30,000 in 2003 and income of \$40,000 in 2004. The S corporation made no distributions during 2002 and 2003 and made

distributions of \$75,000 during 2004. The distributions will come first from the \$40,000 income earned in 2004. The excess distributions of \$35,000 will come first from the \$30,000 income earned during 2003, and the remaining \$5,000 will come from the income earned during 2002.

This rule is intended to implement Iowa Code section 422.8, subsection 2.

701—50.4(422) Computation of net S corporation income. After making the adjustments in Iowa Code section 422.35, net S corporation income is computed by adding to or subtracting from the S corporation's ordinary income (loss) from a trade or business those items of income, losses, and expenses that flow directly to the shareholder whose separate treatment could affect the tax liability of the shareholder. In computing the amounts of income, losses, and expenses that flow directly to the shareholder, these items of income, losses, and expenses, except for interest exempt from federal income tax and itemized deductions for high-income individuals, must be reduced proportionately to the amount that the sum of all like amounts of income, losses, and expenses are reduced for federal income tax computations.

This rule is intended to implement Iowa Code section 422.8, subsection 2, as amended by 1996 Iowa Acts, chapter 1197.

701—50.5(422) Computation of federal tax on S corporation income. The amount of federal income tax related to the items of income, losses, and expenses from an S corporation is to be computed by dividing the sum of the items of income, losses, and expenses by federal adjusted gross income, and the result multiplied by the sum of the federal income tax and the federal alternative minimum tax. This resulting tax figure is to be reduced by the nonrefundable federal tax credits relating to the S corporation income which are a reduction in tax rather than a payment of tax. Credits that are deemed to be a payment of tax include, but are not limited to, backup withholding on interest, dividends and other types of income, and credit for motor vehicle fuel taxes.

For tax periods beginning prior to January 1, 2002, the distribution received from the S corporation is reduced by 50 percent of the federal tax paid by the shareholder on the S corporation income. For tax periods beginning on or after January 1, 2002, the distribution received from the S corporation is reduced by 100 percent of the federal tax paid by the shareholder on the S corporation income.

This rule is intended to implement Iowa Code section 422.8, subsection 2, as amended by 2002 Iowa Acts, House File 2078.

701—50.6(422) Income allocable to Iowa. In order to determine the amount of income allocable to Iowa from an electing S corporation, apply the allocation and apportionment rules in 701—Chapter 54.

This rule is intended to implement Iowa Code section 422.8, subsection 2, as amended by 1996 Iowa Acts, chapter 1197.

701—50.7(422) Credit for taxes paid to another state. If a taxpayer elects to take advantage of the apportionment provisions for a resident shareholder of an S corporation, then the taxpayer may not take a credit against Iowa income tax for income taxes or taxes measured by income paid to another state or foreign country on the S corporation income. A taxpayer may claim a credit against Iowa income tax for income taxes or taxes measured by income paid to another state or foreign country on income other than S corporation income that may be earned in the tax year.

This rule is intended to implement Iowa Code section 422.8.
[ARC 8605B, IAB 3/10/10, effective 4/14/10]

701—50.8(422) Refunds. Rescinded IAB 5/6/09, effective 6/10/09.

701—50.9(422) Examples for tax periods beginning prior to January 1, 2002. Rescinded ARC 1102C, IAB 10/16/13, effective 11/20/13.

701—50.10(422) Example for tax periods beginning on or after January 1, 2002.

EXAMPLE. The following example is based on the following facts. The taxpayers are a husband and wife who have two dependent children. Their income consists of husband's wages of \$50,000; rental loss (\$5,000); wife's S corporation income of \$500,000; joint interest income of \$35,000. They have Iowa itemized deductions of \$20,000, and an out-of-state tax credit of \$1,150 on the S corporation income. The actual cash distribution from the S corporation was \$289,840, none of which has been previously taxed by Iowa. Federal income tax paid during the year totals \$191,214. The S corporation is a value-added corporation which carries on business within and without Iowa with 10 percent of its sales in Iowa.

a. Computation of tax on a joint return basis.

Wages	\$50,000
S corporation income	500,000
Interest	35,000
Rent	<u>(5,000)</u>
Total income	\$580,000
Less federal tax deduction	<u>(191,214)</u>
Subtotal	\$388,786
Less itemized deductions	<u>(20,000)</u>
Taxable income	\$368,786
Tax	\$31,696
Less personal credits husband & wife & two dependents	<u>(160)</u>
Subtotal	\$31,536
Less out-of-state tax credit	<u>(1,150)</u>
Iowa individual tax	\$30,386
<hr/> Computation of credit	
Total income	\$580,000
Less S corporation income	<u>(500,000)</u>
Subtotal	\$80,000
Add the greater of cash distributions not previously taxed, \$289,840 less 100% of federal taxes on S corporation income of \$164,840 = \$125,000, or income attributable to Iowa sources \$50,000	<u>125,000</u>
Income attributable to Iowa sources	\$205,000
Total income	\$580,000
Taxable percentage	35.3449%
Iowa individual tax before credit	\$31,696
Credit percentage	<u>64.6551%</u>
Subtotal	\$20,493
Less out-of-state tax credit	<u>(1,150)</u>
S corporation tax credit	\$19,343

Computation of 100 percent of federal income tax attributable to S corporation income: $\$191,214 \times \$500,000 / \$580,000 = \$164,840$.

Computation of percent of income attributable to Iowa sources: $100 \times \$205,000 / \$580,000 = 35.3449\%$.

Computation of percent of income attributable to non-Iowa sources: $100 - 35.3449\% = 64.6551\%$.

b. Computation on a separate filing on a combined return basis.

	Spouse	Taxpayer
Wages	\$50,000	-0-
S corporation income	-0-	\$500,000
Interest	17,500	17,500
Rent	<u>(5,000)</u>	<u>-0-</u>
Total income	\$62,500	\$517,500
Less federal tax deduction	<u>(20,613)</u>	<u>(170,601)</u>
Subtotal	\$41,887	\$346,899
Less itemized deductions	<u>(2,156)</u>	<u>(17,844)</u>
Taxable income	\$39,731	\$329,055
Tax	\$2,293	\$28,128
Less personal credits taxpayer & spouse & two dependents	<u>(120)</u>	<u>(40)</u>
Subtotal	\$2,173	\$28,088
Less out-of-state tax credit	<u>(-0-)</u>	<u>(1,150)</u>
Iowa individual tax	\$2,173	\$26,938
<hr/> Computation of credit <hr/>		
Total income	\$517,500	
Less S corporation income	<u>(500,000)</u>	
Subtotal	\$17,500	
Add the greater of cash distributions not previously taxed, \$289,840 less 100% of federal taxes on S corporation income of \$164,840 = \$125,000, or income attributable to Iowa sources \$50,000	<u>125,000</u>	
Income attributable to Iowa sources	\$142,500	
Total income	\$517,500	
Taxable percentage	27.5362%	
Iowa individual tax before credit	\$28,128	
Credit percentage	<u>72.4638%</u>	
Subtotal	\$20,383	
Less out-of-state tax credit	<u>(1,150)</u>	
S corporation tax credit	\$19,233	

Taxpayer's computation of 100 percent of federal income tax attributable to S corporation income:
 $\$170,601 \times \$500,000 / \$517,500 = \$164,832$.

Taxpayer's computation of percent of income attributable to Iowa sources: $100 \times \$142,500 / \$517,500 = 27.5362\%$.

Taxpayer's computation of percent of income attributable to non-Iowa sources: $100 - 27.5362\% = 72.4638\%$.

This rule is intended to implement Iowa Code section 422.8, subsection 2, paragraph "b."

TITLE VI
CORPORATION
CHAPTER 51
ADMINISTRATION

[Prior to 12/17/86, Revenue Department[730]]

701—51.1(422) Definitions.

51.1(1) When the word “department” appears herein, it refers to and is synonymous with the “Iowa Department of Revenue”; the word “director” is the “Director of Revenue” or the director’s authorized assistants and employees; the word “tax” is the “corporation income tax”; and the word “return” is the “corporation income tax return.”

The administration of the corporation income tax is a responsibility of the department. The department is charged with the administration of the corporation income tax, subject always to the rules, regulations and direction of the director.

51.1(2) The term “corporation” as used in divisions II and III of Iowa Code chapter 422 and in these rules includes not only corporations which have been created or organized under the laws of Iowa, but also those which are qualified to do, or are doing business in Iowa, in a corporate or organized capacity, by virtue of creation or organization under the laws of the United States or some state, territory or district or of a foreign country. The term “corporation” is not limited to the artificial entity usually known as a corporation, but includes also an association, a trust classed as an association because of its nature or its activities, a joint stock company, and certain kinds of partnerships. Any association or organization which is required to report as a corporation, for federal income tax purposes under the Internal Revenue Code, as amended, shall be considered to be a corporation for the purposes of Iowa income tax on corporations. For tax years beginning on or after January 1, 1987, the term “corporation” includes publicly traded partnerships which are taxed as corporations under the Internal Revenue Code. For tax years beginning on or after July 1, 1994, the term corporation includes limited liability companies taxed as corporations under the Internal Revenue Code. For tax years beginning on or after January 1, 1997, the term “corporation” includes partnerships taxed as corporations under the Internal Revenue Code.

51.1(3) The term “association” is not used in the law in any narrow or technical sense. It includes any organization created for the transaction of designated affairs, or the attainment of some object, which like a corporation continues notwithstanding that its members or participants change, and the affairs of which, like corporate affairs, are conducted by a single individual, a committee, a board, or some other group, acting in a representative capacity. It is immaterial whether such organization is created by an agreement, a declaration of trust, a statute, or otherwise. It includes a voluntary association, a joint stock association or company, a business trust, a Massachusetts trust, a common law trust, a partnership association, and any other type of organization, by whatever name known, which is not, within the meaning of the law, a trust or an estate, or a partnership. An investment trust of the type commonly known as a management trust is an association, and a trust of the type commonly known as a fixed investment trust, is an association if there is power under the trust agreement to vary the investment of the certificate holders. If the conduct of the affairs of a corporation continues after the expiration of its charter, or the termination of its existence, it becomes an association.

51.1(4) The term “Internal Revenue Code” means the Internal Revenue Code of 1954 prior to the date of its redesignation as the Internal Revenue Code of 1986 or the Internal Revenue Code of 1986, whichever is applicable.

51.1(5) The terms “consolidation” and “corporate merger” have the following meaning in regard to corporate reorganizations. A “consolidation” is unification of two or more constituent corporations into a single newly existing corporation in which the new corporation takes over assets and assumes liabilities of constituent corporations which pass out of existence; a “corporate merger” is distinguished

by continuing existence of one of the constituent corporations into which other corporations are merged. *Handley v. Wyandotte Chemicals Corp.*, 352 N.W.2d 447, 450, 118 Mich. App. 423.

This rule is intended to implement Iowa Code section 422.32 as amended by 1997 Iowa Acts, House File 266.

701—51.2(422) Statutes of limitation.

51.2(1) Periods of audit.

a. The department has three years after a return has been filed or three years after the return became due, including any extensions of time for filing, whichever time is the later, to determine whether any additional tax other than that shown on the return is due and owing. This three-year statute of limitations does not apply in the instances specified in paragraphs “b,” “c,” “d,” “e,” “f” and “g.”

b. If a taxpayer fails to include in the return such items of gross income as defined in the Internal Revenue Code, as amended, as will under that Code extend the statute of limitations for federal tax purposes to six years, the correct amount of tax due may be determined by the department within six years from the time the return is filed, or within six years after the return became due, including any extensions of time for filing, whichever time is the later.

c. If a taxpayer files a false or fraudulent return with intent to evade tax, the correct amount of tax due may be determined by the department at any time after the return has been filed.

d. If a taxpayer fails to file a return, the periods of limitation so specified in Iowa Code section 422.25 do not begin to run until the return is filed with the department.

e. While the burden of proof of additional tax owing under the six-year period or the unlimited periods is upon the department, a prima facie case of omission of income, or of making a false or fraudulent return, shall be made upon a showing of a federal audit of the same income, a determination by federal authorities that the taxpayer omitted items of gross income or made a false or fraudulent return, and the payment by the taxpayer of the amount claimed by the federal government to be the correct tax or the admission by the taxpayer to the federal government of liability for that amount.

f. In addition to the periods of limitation set forth in paragraph “a,” “b,” “c,” “d,” or “e,” the department has six months after notification by the taxpayer of the final disposition of any matter between the taxpayer and the Internal Revenue Service with respect to any particular tax year to make an examination and determination. Final disposition of any matter between the taxpayer and the Internal Revenue Service triggers the extension of the statute of limitations for the department to make an examination and determination, and the extension runs until six months after the department receives notification and a copy of the federal document showing the final disposition or final federal adjustments from the taxpayer. *Van Dyke v. Iowa Department of Revenue and Finance*, 547 N.W.2d 1. This examination and determination is limited to those matters between the taxpayer and the Internal Revenue Service which affect Iowa taxable income. *Kelly-Springfield Tire Co. v. Iowa State Board of Tax Review*, 414 N.W.2d 113 (Iowa 1987). The notification shall be in writing in any form sufficient to inform the department of final disposition, and attached to the notification shall be a photo reproduction or carbon copy of the federal document which shows the final disposition and any schedules necessary to explain the federal adjustments. The notification and copy of the federal document shall be mailed, under separate cover, to the Examination Section, Compliance Division, Iowa Department of Revenue, P.O. Box 10456, Des Moines, Iowa 50306. Any notification and copy of the federal document which is included in, made a part of, or mailed with a current year Iowa corporation income tax return will not be considered as proper notification for the purposes of beginning the running of the six-month period.

When a taxpayer’s income or loss is included in a consolidated federal corporation income tax return, notification shall include a schedule of adjustments to the taxpayer’s income, a copy of the revenue agent’s tax computation, a schedule of revised foreign tax credit on a separate company basis if applicable, and a schedule of consolidating income statements after federal adjustments.

g. In lieu of the above periods of limitation for any prior year for which an overpayment of tax or an elimination or reduction of an underpayment of tax due for that prior year results from the carryback to such prior year of a net operating loss or net capital loss, the period shall be the period of limitations for the taxable year of the net operating loss or net capital loss which results in such carryback.

h. The department may, at any time within the period prescribed for assessment or refund adjustment, make a supplemental assessment or refund adjustment whenever it is ascertained that any assessment or refund adjustment is imperfect or incomplete in any respect.

If an assessment or refund adjustment is appealed (protested under rule 701—7.8(17A)) and is resolved whether by informal proceedings or by adjudication, the department and the taxpayer are precluded from making a supplemental assessment or refund adjustment concerning the same issue involved in such appeal for the same tax period unless there is a showing of mathematical or clerical error or a showing of fraud or misrepresentation. Nothing in this rule shall prevent the making of an assessment or refund adjustment for the purpose of taking into account the impact upon Iowa net income of federal audit adjustments.

51.2(2) *Waiver of statute of limitations.* Rescinded IAB 11/24/04, effective 12/29/04.

51.2(3) *Waiver of statute of limitations.* Waivers entered into on or after July 1, 1989. When the department and the taxpayer enter into an agreement to extend the period of limitation, interest continues to accrue on an assessed deficiency or overpayment during the period of the waiver. The taxpayer may claim a refund during the period of the waiver.

51.2(4) *Amended returns filed within 60 days of the expiration of the statute of limitations for assessment.* If a taxpayer files an amended return on or after April 1, 1995, within 60 days prior to the expiration of the statute of limitations for assessment, the department has 60 days from the date the amended return is received to issue an assessment for applicable tax, interest, or penalty.

This rule is intended to implement Iowa Code sections 422.25, 422.30, and 422.35.
[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—51.3(422) Retention of records.

51.3(1) Every corporation subject to the tax imposed by Iowa Code section 422.33 (whether or not the corporation incurs liability for the tax) shall retain its books and records as required by Section 6001 of the Internal Revenue Code and Treasury Regulation Section 1.6001-1(e) including the federal schedules required by 701—subrule 52.3(3). For taxpayers using an electronic data interchange process or technology also see 701—subrule 11.4(4).

51.3(2) In addition, records relating to the computation of the Iowa apportionment factor, allocable income, other deductions or additions to federal taxable income and Iowa tax credits shall be retained so long as the contents may be material in the administration of the Iowa Code under the statutes of limitation for audit specified in Iowa Code section 422.25.

This rule is intended to implement Iowa Code sections 422.25 and 422.70.
[ARC 9104B, IAB 9/22/10, effective 10/27/10]

701—51.4(422) Cancellation of authority to do business. If a corporation required by Iowa Code section 422.40 to file any report or return (including returns of information at source) or to pay any tax or fee, fails to do so within 90 days after the time prescribed for making such returns or payment, the director may certify such fact to the secretary of state, who shall thereupon cancel the articles of incorporation or certificate of authority (as the case may be) of such corporation, and the rights to such corporation to carry on business in the state of Iowa as a corporation shall thereupon cease. The statute provides for a penalty of not less than \$100 nor more than \$1,000 for any person or persons who continue to exercise or attempt to exercise any powers, privileges, or franchises granted under articles of incorporation or certificate of authority after cancellation of the same.

This rule is intended to implement Iowa Code section 422.40.

701—51.5(422) Authority for deductions. Whether and to what extent deductions shall be allowed depends upon specific legislative acts, and only where there is a clear provision can any particular deduction be allowed. Therefore, a deduction will be allowed only if the taxpayer can establish to the satisfaction of the department the validity and correctness of such deduction. 71 Am. Jur. 2d State and Local Taxation, Subsection 518 (1973).

This rule is intended to implement Iowa Code section 422.35.

701—51.6(422) Jeopardy assessments.

51.6(1) A jeopardy assessment may be made where a return has been filed and the director believes for any reason that collection of the tax will be jeopardized by delay, or where a taxpayer fails to file a return, whether or not formally called upon to file a return. The department is authorized to estimate the income of the taxpayer upon the basis of available information, add penalty and interest, and demand immediate payment.

51.6(2) A jeopardy assessment is due and payable when the notice of the assessment is served upon the taxpayer. Proceedings to enforce the payment of the assessment by seizure or sale of any property of the taxpayer may be instituted immediately.

This rule is intended to implement Iowa Code section 422.30.

701—51.7(422) Information confidential. Iowa Code sections 422.20 and 422.72 apply generally to the director, deputies, auditors, examiners, agents, present or former officers and employees of the department. Disclosure of information from a taxpayer's filed return or report or other confidential state information by department of revenue personnel to a third person is prohibited under the above sections. Other persons having acquired information disclosed in a taxpayer's filed return or report or other confidential state information will be bound by the same rules of secrecy under these sections as any member of the department and will be subject to the same penalties for violations as provided by law. See rule 701—6.3(17A).

This rule is intended to implement Iowa Code sections 422.20, 422.38, and 422.72.

701—51.8(422) Power of attorney. For information regarding power of attorney, see rule 701—7.34(421).

[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—51.9(422) Delegation of authority to audit and examine. Pursuant to statutory authority the director delegates to the authorized assistants and employees the power to examine returns and make audits; and to determine the correct amount of tax due, subject to review by or appeal to the director.

This rule is intended to implement Iowa Code section 422.71.

CHAPTER 52
FILING RETURNS, PAYMENT OF TAX,
PENALTY AND INTEREST, AND TAX CREDITS
[Prior to 12/17/86, Revenue Department[730]]

701—52.1(422) Who must file. Every corporation, organized under the laws of Iowa or qualified to do business within this state or doing business within Iowa, regardless of net income, shall file a true and accurate return of its income or loss for the taxable period. The return shall be signed by the president or other duly authorized officer. If the corporation was inactive or not doing business within Iowa, although qualified to do so, during the taxable year, the return must contain a statement to that effect.

For tax years beginning on or after January 1, 1989, every corporation organized under the laws of Iowa, doing business within Iowa, or deriving income from sources consisting of real or tangible property located or having a situs within Iowa, shall file a true and accurate return of its income or loss for the taxable period. The return shall be signed by the president or other duly authorized officer.

For tax years beginning on or after January 1, 1995, every corporation organized under the laws of Iowa, doing business within Iowa, or deriving income from sources consisting of real, tangible, or intangible property located or having a situs within Iowa, shall file a true and accurate return of its income or loss for the taxable period. The return shall be signed by the president or other duly authorized officer. For tax years beginning on or after January 1, 1999, every corporation doing business within Iowa, or deriving income from sources consisting of real, tangible, or intangible property located or having a situs within Iowa, shall file a true and accurate return of its income or loss for the taxable period. The return shall be signed by the president or other duly authorized officer.

Political organizations described in Internal Revenue Code Section 527 which are domiciled in this state and are required to file federal Form 1120POL and pay federal corporation income tax are subject to Iowa corporation income tax to the same extent as they are subject to federal corporation income tax.

Homeowners associations described in Internal Revenue Code Section 528 which are domiciled in this state and are required to file federal Form 1120H and pay federal corporation income tax are subject to Iowa corporation income tax to the same extent as they are subject to federal corporation income tax.

52.1(1) Definitions.

a. Doing business. The term “doing business” is used in a comprehensive sense and includes all activities or any transactions for the purpose of financial or pecuniary gain or profit. Irrespective of the nature of its activities, every corporation organized for profit and carrying out any of the purposes of its organization shall be deemed to be “doing business.” In determining whether a corporation is doing business, it is immaterial whether its activities actually result in a profit or loss.

b. Representative. A person may be considered a representative even though that person may not be considered an employee for other purposes such as withholding of income tax from commissions.

c. Tangible property having a situs within this state. The term “tangible property having a situs within this state” means that tangible property owned or used by a foreign corporation is habitually present in Iowa or it maintains a fixed and regular route through Iowa sufficient so that Iowa could constitutionally under the 14th Amendment and Commerce Clause of the United States Constitution impose an apportioned ad valorem tax on the property. *Central R. Co. v. Pennsylvania*, 370 U.S. 607, 82 S.Ct. 1297, 8 L.Ed.2d (1962); *New York Central & H. Railroad Co. v. Miller*, 202 U.S. 584, 26 S.Ct. 714, 50 L.Ed. 1155 (1906); *American Refrigerator Transit Company v. State Tax Commission*, 395 P.2d 127 (Or. 1964); *Upper Missouri River Corporation v. Board of Review*, Woodbury County, 210 N.W.2d 828.

d. Intangible property located or having a situs within Iowa. Intangible property does not have a situs in the physical sense in any particular place. *Wheeling Steel Corporation v. Fox*, 298 U.S. 193, 80 L.Ed. 1143, 56 S.Ct. 773 (1936); *McNamara v. George Engine Company, Inc.*, 519 So.2d 217 (La. App. 1988). The term “intangible property located or having a situs within Iowa” means generally that the intangible property belongs to a corporation with its commercial domicile in Iowa or, regardless of where the corporation which owns the intangible property has its commercial domicile, the intangible property has become an integral part of some business activity occurring regularly in Iowa. *Beidler v. South Carolina Tax Commission*, 282 U.S. 1, 75 L.Ed. 131, 51 S.Ct. 54 (1930); *Geoffrey, Inc. v. South*

Carolina Tax Commission, 437 S.E.2d 13 (S.C. 1993), cert. denied, 114 S.Ct. 550 (1993); *Kmart Properties, Inc. v. Taxation & Revenue Department of New Mexico*, 131 P. 3d 27 (N.M. Ct. App. 2001), rev'd on other issues, 131 P. 3d 22 (N.M. 2005); *Secretary, Department of Revenue v. Gap (Apparel), Inc.*, 886 So. 2d 459 (La.Ct.App. 2004); *A & F Trademark v. Tolson*, 605 S.E. 2d 187 (N.C.App. 2004), cert. denied 126 S.Ct. 353 (2005); *Lanco, Inc. v. Director, Division of Taxation*, 879 A.2d 1234 (N.J.Super.A.D. 2005), aff'd, 908 A.2d 176 (N.J. 2006) (per curiam), cert. denied 127 S.Ct. 2974 (June 18, 2007); *Geoffrey, Inc. v. Oklahoma Tax Commission*, 132 P. 3d 632 (Okla. Ct. Civ. App. 2005), cert. denied (Mar. 20, 2006), as corrected (Apr. 12, 2006); *FIA Card Services, Inc. v. Tax Comm'r*, 640 S.E.2d 226 (W. Va. 2006), cert. denied, 127 S.Ct. 2997 (June 18, 2007); *Capital One Bank v. Commissioner of Revenue*, 899 N.E.2d 76 (Mass. 2009); *Geoffrey, Inc. v. Commissioner of Revenue*, 899 N.E.2d 87 (Mass. 2009); *KFC Corporation v. Iowa Department of Revenue*, 792 N.W. 2d 308 (Iowa 2010), cert. denied 132 S. Ct. 97 (October 3, 2011). The following is a noninclusive list of types of intangible property: copyrights, patents, processes, trademarks, trade names, franchises, contracts, bank deposits including certificates of deposit, repurchase agreements, mortgage loans, consumer loans, business loans, shares of stocks, bonds, licenses, partnership interests including limited partnership interests, leaseholds, money, evidences of an interest in property, evidences of debts such as credit card debt, leases, an undivided interest in a loan, rights-of-way, and interests in trusts.

The term also includes every foreign corporation which has acquired a commercial domicile in Iowa and whose property has not acquired a constitutional tax situs outside of Iowa.

52.1(2) Corporate activities not creating taxability. Public Law 86-272, 15 U.S.C.A., Sections 381-385, in general prohibits any state from imposing an income tax on income derived within the state from interstate commerce if the only business activity within the state consists of the solicitation of orders of tangible personal property by or on behalf of a corporation by its employees or representatives. Such orders must be sent outside the state for approval or rejection and, if approved, must be filled by shipment or delivery from a point outside the state to be within the purview of Public Law 86-272. Public Law 86-272 does not extend to those corporations which sell services, real estate, or intangibles in more than one state or to domestic corporations. For example, Public Law 86-272 does not extend to brokers or manufacturers' representatives or other persons or entities selling products for another person or entity.

a. If the only activities in Iowa of a foreign corporation selling tangible personal property are those of the type described in the noninclusive listing below, the corporation is protected from the Iowa corporation income tax law by Public Law 86-272.

(1) The free distribution by salespersons of product samples, brochures, and catalogues which explain the use of or laud the product, or both.

(2) The lease or ownership of motor vehicles for use by salespersons in soliciting orders.

(3) Salespersons' negotiation of a price for a product, subject to approval or rejection outside the taxing state of such negotiated price and solicited order.

(4) Demonstration by salesperson, prior to the sale, of how the corporation's product works.

(5) The placement of advertising in newspapers, radio, and television.

(6) Delivery of goods to customers by foreign corporation in its own or leased vehicles from a point outside the taxing state. Delivery does not include nonimmune activities, such as picking up damaged goods.

(7) Collection of state or local-option sales taxes or state use taxes from customers.

(8) Audit of inventory levels by salespersons to determine if corporation's customer needs more inventory.

(9) Recruitment, training, evaluation, and management of salespersons pertaining to solicitation of orders.

(10) Salespersons' intervention/mediation in credit disputes between customers and non-Iowa located corporate departments.

(11) Use of hotel rooms and homes for sales-related meetings pertaining to solicitation of orders.

(12) Salespersons' assistance to wholesalers in obtaining suitable displays for products at retail stores.

- (13) Salespersons' furnishing of display racks to retailers.
- (14) Salespersons' advice to retailers on the art of displaying goods to the public.
- (15) Rental of hotel rooms for short-term display of products.
- (16) Mere forwarding of customer questions, concerns, or problems by salespersons to non-Iowa locations.

b. For tax years beginning on or after January 1, 1996, a foreign corporation will not be considered doing business in this state or deriving income from sources within this state if its only activities within this state are one or more of the following activities:

- (1) Holding meetings of the board of directors or shareholders, or holiday parties, or employee appreciation dinners.
- (2) Maintaining bank accounts.
- (3) Borrowing money, with or without security.
- (4) Utilizing Iowa courts for litigation.
- (5) Owning and controlling a subsidiary corporation which is incorporated in or which is transacting business within this state where the holding or parent company has no physical presence in the state as that presence relates to the ownership or control of the subsidiary.
- (6) Recruiting personnel where hiring occurs outside the state.

c. For tax years beginning on or after January 1, 1997, a foreign corporation will not be considered doing business in this state or deriving income from sources within this state if its only activities within this state, in addition to the activities listed in paragraph "b" above, are training its employees or educating its employees, or using facilities in this state for this purpose.

d. For tax years beginning on or after January 1, 2006, a foreign corporation will not be considered to be doing business in Iowa or deriving income from sources within Iowa if its only activities within Iowa, in addition to the activities listed in paragraphs "b" and "c" of this subrule, are utilizing a distribution facility in Iowa, owning or leasing property at a distribution facility in Iowa, or selling property shipped or distributed from a distribution facility in Iowa.

A distribution facility is an establishment at which shipments of tangible personal property are processed for delivery to customers. A distribution facility does not include an establishment at which retail sales of tangible personal property or returns of such property are undertaken with respect to retail customers more than 12 days in a year. However, an exception to the 12-day requirement is allowed for distribution facilities that process customer orders by mail, telephone, or electronic means, if the distribution facility also processes shipments of tangible personal property to customers, as long as no more than 10 percent of the goods are delivered or shipped to a purchaser in Iowa.

The following nonexclusive examples illustrate how this subrule applies:

EXAMPLE 1: A, a foreign corporation, stores its inventory of books at a facility in Iowa. The facility processes orders for these books solely by mail, telephone and the Internet on behalf of A, and customers are not allowed to purchase books at the facility's site in Iowa. The facility processes shipments of these books, and 5 percent of the books at this facility are delivered to purchasers located in Iowa. A does not conduct any other business activities in Iowa. A is not considered to be doing business in Iowa because less than 10 percent of the books at the facility are delivered to an Iowa customer.

EXAMPLE 2: B, a foreign corporation, stores its inventory of compact disks at a facility in Iowa. The facility processes orders for these compact disks solely by mail, telephone and the Internet on behalf of B, and customers are not allowed to purchase compact disks at the facility's site in Iowa. The facility processes shipments of these compact disks, and 15 percent of the compact disks at the facility are delivered to purchasers located in Iowa. B does not conduct any other business activities in Iowa. B is considered to be doing business in Iowa because more than 10 percent of the compact disks at the facility are delivered to an Iowa customer.

EXAMPLE 3: C, a foreign corporation, stores its inventory of doors and windows at a facility in Iowa. The facility processes orders for these windows and doors solely by mail, telephone and the Internet, and customers are not allowed to purchase these windows and doors at the facility's site in Iowa. The facility processes shipments of these windows and doors, and 7 percent of the windows and doors are delivered to purchasers located in Iowa. C will also install these windows and doors in Iowa upon customer request.

C is considered to be doing business in Iowa even though less than 10 percent of the windows and doors are delivered to Iowa customers because C is also conducting installation activities in Iowa which are not protected under Public Law 86-272.

EXAMPLE 4: D, a foreign corporation, stores its inventory of home decorating and craft kits at a facility in Iowa. The facility does not process any customer orders by mail, telephone or the Internet, and does not process any shipments of these kits directly to customers. D allows customers to come to the facility 14 days each year to directly purchase these kits, and customers must arrange for their own delivery of the kits. D is considered to be doing business in Iowa because sales to retail customers are conducted more than 12 days in a year, and the facility does not process customer orders or shipments to customers.

52.1(3) Corporate activities creating taxability. “Solicitation of orders” within Public Law 86-272 is limited to those activities which explicitly or implicitly propose a sale or which are entirely ancillary to requests for purchases. Activities that are entirely ancillary to requests for purchases are ones that serve no independent business function apart from their connection to the soliciting of orders. An activity that is not ancillary to requests for purchases is one that a corporation (taxpayer) has a reason to do anyway whether or not it chooses to allocate it to its sales force operating in Iowa (such as repair, installation, service-type activities, or collection on accounts). Activities that take place after a sale ordinarily will not be entirely ancillary to a request for purchases and, therefore, ordinarily will not be considered in “solicitation of orders.” *Wisconsin Department of Revenue v. William Wrigley, Jr. Company*, 505 U.S. 214, 120 L.Ed.2d 174, 112 S.Ct. 2447 (1992).

De minimis activities which are not “solicitation of orders” are protected under Public Law 86-272. Whether in-state nonsolicitation activities are sufficiently de minimis to avoid loss of tax immunity depends upon whether those activities establish only a trivial additional connection with the taxing state. Whether a corporation’s nonsolicitation in-state activities are de minimis should not be decided solely by the quantity of one type of such activity but, rather, all types of nonsolicitation activities of the taxpayer should be considered in their totality. *Wisconsin v. Wrigley*, 505 U.S. 214, 120 L.Ed.2d 174, 112 S.Ct. 2447 (1992). Frequency of the activity may be relevant, but an isolated activity is not invariably trivial. The mere fact that an activity involves small amounts of money or property does not invariably mean it is trivial.

If a foreign corporation has greater than a de minimis amount of Iowa nonsolicitation activity which includes activity of the types described in the noninclusive listing below, whether done by the salesperson, other employee, or other representative, it is not immunized from the Iowa corporation income tax by Public Law 86-272.

- a. Installation or assembly of the corporate product.
- b. Ownership or lease of real estate by corporation.
- c. Solicitation of orders for, or sale of, services or real estate.
- d. Sale of tangible personal property (as opposed to solicitation of orders) or performance of services within Iowa.
- e. Maintenance of a stock of inventory.
- f. Existence of an office or other business location.
- g. Managerial activities pertaining to nonsolicitation activities.
- h. Collections on regular or delinquent accounts.
- i. Technical assistance and training given after the sale to purchaser and user of corporate products.
- j. The repair or replacement of faulty or damaged goods.
- k. The pickup of damaged, obsolete, or returned merchandise from purchaser or user.
- l. Rectification of or assistance in rectifying any product complaints, shipping complaints, etc., if more is involved than relaying complaints to a non-Iowa location.
- m. Delivery of corporate merchandise inventory to corporation’s distributors or dealers on consignment.
- n. Maintenance of personal property which is not related to solicitation of orders.

- o. Participation in recruitment, training, monitoring, or approval of servicing distributors, dealers, or others where purchasers of corporation's products can have such products serviced or repaired.
- p. Inspection or verification of faulty or damaged goods.
- q. Inspection of the customer's installation of the corporate product.
- r. Research.
- s. Salespersons' use of part of their homes or other places as an office if the corporation pays for such use.
- t. The use of samples for replacement or sale; storage of such samples at home or in rented space.
- u. Removal of old or defective products.
- v. Verification of the destruction of damaged merchandise.
- w. Independent contractors, agents, brokers, representatives and other individuals or entities who act on behalf of or at the direction of the corporation (taxpayer) and who do non-de minimis amounts of nonsolicitation activities remove the corporation from the protection of Public Law 86-272. However, the maintenance of an office in Iowa or the making of sales in Iowa by independent contractors does not remove the corporation from the protection of Public Law 86-272. The term "independent contractors" means commission agents, brokers, or other independent contractors who are engaged in selling or soliciting orders for the sale of tangible personal property or perform other services for more than one principal and who hold themselves out as such in the regular course of their business activities. If a person is subject to the direct control of the foreign corporation that person may not qualify as an independent contractor.

52.1(4) *Taxation of corporations having only intangible property located or having a situs in Iowa.* For tax years beginning on or after January 1, 1995, corporations whose only connection with Iowa is their ownership of intangible property located or having a situs in Iowa are subject to Iowa income tax and must file an Iowa income tax return. Intangible property is located or has a situs in Iowa if the corporation's commercial domicile is in Iowa and the intangible property has not become an integral part of some business activity occurring regularly within or without Iowa. Regardless whether the corporation's commercial domicile is in or out of Iowa, intangible property is located or has a situs in Iowa if the intangible property has become an integral part of some business activity occurring regularly in Iowa. *Geoffrey, Inc. v. South Carolina Tax Commission*, 437 S.E.2d 13 (S.C. 1993), cert. denied, 114 S.Ct. 550 (1993); *Arizona Tractor Company v. Arizona State Tax Commission*, 115 Ariz. 602, 566 P.2d 1348 (Ariz. App. 1977); *KFC Corporation v. Iowa Department of Revenue*, 792 N.W. 2d 308 (Iowa 2010), cert. denied 132 S.Ct. 97 (October 3, 2011). In the event that the intangible property interest is a general or limited partnership interest, the location or situs of that partnership interest is the place(s) where the partnership conducts business. *Arizona Tractor Company v. Arizona State Tax Commission*, supra.

The following nonexclusive examples illustrate how this subrule applies:

EXAMPLE 1: A, a corporation with a commercial domicile in State X, has a limited partnership interest in a partnership which does a regular business in Iowa. A has no physical presence in Iowa and has no other contact with Iowa. A's interest in the limited partnership is intangible personal property. A is required to file an Iowa income tax return because A's intangible personal property limited partnership interest has a business situs in Iowa. *Arizona Tractor Company v. Arizona State Tax Commission*, supra.

EXAMPLE 2: B, a corporation with a commercial domicile in State X, owns stock in a subsidiary corporation doing business regularly in Iowa. B has no physical presence in Iowa and has no other contact with Iowa. B controls the subsidiary and has a unitary relationship with it. B pledged the subsidiary stock to secure a line of credit from a bank and used the loaned funds in B's business. Under these circumstances, the subsidiary stock is not an integral part of the subsidiary's business and, therefore, the stock does not have a location or situs in Iowa. Accordingly, B is not required to file an Iowa income tax return as a result of any dividends received by B or capital gains received by B from the sale of the stock. *McNamara v. George Engine Company, Inc.*, 519 So.2d 217 (La. App. 1988).

EXAMPLE 3: C, a corporation with a commercial domicile in State X, owns trademarks and trade names which it, by license agreements, allows other corporations to use. Some of those other corporations do business in Iowa. The trademarks and trade names are used by these other corporations

at their Iowa stores in connection with their business activities at those stores. C has no physical presence in Iowa and has no other contact with Iowa. C is paid royalties of 1 percent of net sales of the licensed products or services. C is required to file an Iowa income tax return because C's intangible property interests in the trademarks and trade names have situs in Iowa. *Geoffrey, Inc. v. South Carolina Tax Commission*, 437 S.E.2d 13 (S.C. 1993), cert. denied, 114 S.Ct. 550 (1993).

EXAMPLE 4: D, a corporation with a commercial domicile in Iowa, is a holding company which does not sell any tangible personal property or sell any business service but which does own the stock of five subsidiaries, all of which do business outside of Iowa. D has no physical presence outside of Iowa and has no other contact outside of Iowa. D has a unitary relationship with each subsidiary. Under these circumstances, the stock is not an integral part of each subsidiary's business so the stock does not have a location or situs outside of Iowa. The location or situs of the stock is in Iowa because D's commercial domicile is in Iowa. Accordingly, all of the dividends from the stock paid to D and any capital gains incurred as a result of D's sale of the stock are wholly taxed by Iowa.

EXAMPLE 5: E, a corporation with a commercial domicile in Iowa, owns trademarks and trade names which it, by license agreements, allows other corporations, located outside of Iowa, to use. The trademarks and trade names are used by these other corporations at their non-Iowa stores in connection with their business activities at those stores. E has no physical presence outside of Iowa and has no other contact outside of Iowa. E has business activities in Iowa. The fees and royalties paid to E are part of E's unitary business income. Under these circumstances, E is entitled to apportion its net income within and without Iowa because E's intangible property interests in the trademarks and trade names have situs outside of Iowa and E has business activities in Iowa.

EXAMPLE 6: F, a corporation with a commercial domicile in State X, owns all of the stock of a subsidiary corporation doing business in Iowa. F has no physical presence in Iowa and no other contact with Iowa. F loans funds to the subsidiary which the subsidiary uses in its Iowa business. Under these circumstances, the interest-bearing asset is not an integral part of the subsidiary's business and, therefore, that intangible asset does not have a location or situs in Iowa. Accordingly, F is not required to file an Iowa income tax return. *Beidler v. South Carolina Tax Commission*, 282 U.S. 1, 75 L.Ed.131, 51 S.Ct. 54 (1930).

EXAMPLE 7: G, a corporation with a commercial domicile in State X, earns fees from the licensing of custom computer software. G has no physical presence in Iowa and no other contact with Iowa. G licenses the software to other corporations which do business in Iowa and which use the software in that business in Iowa. Under these circumstances, regardless whether the fees constitute royalties or something else, the license fees are earned from intangible personal property with a location or situs in Iowa. Accordingly, G is required to file an Iowa income tax return.

EXAMPLE 8: H, a corporation with a commercial domicile in State X, has no physical presence in Iowa. H has entered into a contract with an independent contractor to solicit sales of H's magazines in Iowa. The independent contractor does business in Iowa and receives payment for the magazines and deposits the funds in an Iowa bank for H's account. H earns interest on this account. Under these circumstances which are H's only contact with Iowa, H's interest-bearing account is an integral part of business activity in Iowa. Accordingly, H is required to file an Iowa income tax return and include the interest income in the numerator of the business activity formula.

EXAMPLE 9: J, a corporation with a commercial domicile in State X, earns income from mortgages that the corporation has purchased. J has no physical presence in Iowa and no other contact with Iowa. J earns interest income from the mortgages on property located in Iowa. Under these circumstances, the interest income is an integral part of business activity in Iowa. Accordingly, J is required to file an Iowa income tax return and include the interest income from the mortgages related to Iowa property in the numerator of the apportionment factor.

52.1(5) *Taxation of "S" corporations, domestic international sales corporations and real estate investment trusts.* Certain corporations and other types of entities, which are taxable as corporations for federal purposes, may by federal election and qualification have a portion or all of their income taxable to the shareholders or the beneficiaries. Generally, the state of Iowa follows the federal provisions (with adjustments provided by Iowa law) for determining the amount and to whom the income is taxable.

Examples of entities which may avail themselves of pass-through provisions for taxation of at least part of their net income are real estate investment trusts, small business corporations electing to file under Sections 1371-1378 of the Internal Revenue Code, domestic international sales corporations as authorized under Sections 991-997 of the Internal Revenue Code, and certain types of cooperatives and regulated investment companies. The entity's portion of the net income which is taxable as corporation net income for federal purposes is generally also taxable as Iowa corporation income (with adjustments as provided by Iowa law) and the shareholders or beneficiaries will report on their Iowa returns their share of the organization's income reportable for federal purposes as shareholder income (with adjustments provided by Iowa law). Nonresident shareholders or beneficiaries are required to report their distributive share of said income reasonably attributable to Iowa sources. Schedules shall be filed with the individual's return showing the computation of the income attributable to Iowa sources and the computation of the nonresident taxpayer's distributive share thereof. Entities with a nonresident beneficiary or shareholder shall include a schedule in the return computing the amount of income as determined under 701—Chapter 54. It will be the responsibility of the entity to make the apportionment of the income and supply the nonresident taxpayer with information regarding the nonresident taxpayer's Iowa taxable income.

For tax years beginning on or after January 1, 1995, S corporations which are subject to tax on built-in gains under Section 1374 of the Internal Revenue Code or passive investment income under Section 1375 of the Internal Revenue Code are subject to Iowa corporation income tax on this income to the extent received from business carried on in this state or from sources in this state.

a. The starting point for computing the Iowa tax on built-in gains is the amount of built-in gains subject to federal tax after considering the federal income limitation. The starting point for computing the capital gains subject to Iowa tax is the amount of capital gains subject to federal tax. The starting point for computing the passive investment income subject to Iowa income tax is the amount of passive investment income subject to federal tax. To the extent that any of the above three types of income exist for federal income tax purposes, they are combined for Iowa income tax purposes.

b. No adjustment is made to the above amounts for either 50 percent of federal income tax or Iowa corporation income tax deducted in computing the federal net income of the S corporation for tax years beginning prior to January 1, 2008, and for tax years beginning on or after January 1, 2014. The 50 percent of federal income tax and Iowa corporation income tax deducted in computing federal net income are adjustments to the Iowa net income which flows through to the shareholders for tax years beginning prior to January 1, 2008, and for tax years beginning on or after January 1, 2014. For tax years beginning on or after January 1, 2008, but before January 1, 2014, an adjustment is made to the above amounts for either 50 percent of federal income tax or Iowa corporation income tax deducted in computing the federal net income of the S corporation.

c. The allocation and apportionment rules of 701—Chapter 54 apply to nonresident shareholders if the S corporation is carrying on business within and without the state of Iowa.

d. Any net operating loss carryforward arising in a taxable year for which the corporation was a C corporation shall be allowed as a deduction against the net recognized built-in gain, capital gains, or passive investment income of the S corporation for the taxable year. For purposes of determining the amount of any such loss which may be carried to any of the 15 subsequent taxable years, after the year of the net operating loss, the amount of the net recognized built-in gain shall be treated as taxable income. For taxable years beginning after August 5, 1997, a net operating loss can be carried forward 20 taxable years.

e. Except for estimated and other advance tax payments and any credit carryforward under Iowa Code section 422.33 arising in a taxable year for which the corporation was a C corporation no credits shall be allowed against the built-in gains tax or the tax on capital gains or passive investment income.

For tax years beginning after 1996, Iowa recognizes the federal election to treat subsidiaries of a parent corporation that has elected S corporation status as "qualified subchapter S subsidiaries" (QSSSs). To the extent that, for federal income tax purposes, the incomes and expenses of the QSSSs are combined with the parent's income and expenses, they must be combined for Iowa tax purposes.

52.1(6) Exempt corporations and organizations filing requirements.

a. Exempt status. An organization that is exempt from federal income tax under Section 501 of the Internal Revenue Code, unless the exemption is denied under Section 501, 502, 503 or 504 of the Internal Revenue Code, is exempt from Iowa corporation income tax except as set forth in paragraph “e” of this subrule. The department may, if a question arises regarding the exempt status of an organization, request a copy of the federal determination letter.

b. Information returns. Every corporation shall file returns of information as provided by Iowa Code sections 422.15 and 422.16 and any regulations regarding information returns.

c. Annual return. An organization or association which is exempt from Iowa corporation income tax because it is exempt from federal income tax is not required to file an annual income tax return unless it is subject to the tax on unrelated business income. The organization shall inform the director in writing of any revocation of or change of exempt status by the Internal Revenue Service within 30 days after the federal determination.

d. Tax on unrelated business income for tax years beginning on or after January 1, 1988. A tax is imposed on the unrelated business income of corporations, associations, and organizations exempt from the general business tax on corporations by Iowa Code section 422.34, subsection 2, to the extent this income is subject to tax under the Internal Revenue Code. The exempt organization is also subject to the alternative minimum tax imposed by Iowa Code section 422.33(4).

The exempt corporation, association, or organization must file Form IA 1120, Iowa Corporation Income Tax Return, to report its income and complete Form IA 4626 if subject to the alternative minimum tax. The exempt organization must make estimated tax payments if its expected income tax liability for the year is \$1,000 or more.

The tax return is due the last day of the fourth month following the last day of the tax year and may be extended for six months by filing Form IA 7004 prior to the due date. For tax years beginning on or after January 1, 1991, the tax return is due on the fifteenth day of the fifth month following close of the tax year and may be extended six months if 90 percent of the tax is paid prior to the due date.

The starting point for computing Iowa taxable income is federal taxable income as properly computed before deduction for net operating losses. Federal taxable income shall be adjusted as required in Iowa Code section 422.35.

If the activities which generate the unrelated business income are carried on partly within and partly without the state, then the taxpayer should determine the portion of unrelated business income attributable to Iowa by the apportionment and allocation provisions of Iowa Code section 422.33.

The provisions of 701—Chapters 51, 52, 53, 54, 55 and 56 apply to the unrelated business income of organizations exempt from the general business tax on corporations.

e. Certain posts or organizations of past or present armed forces members may be tax-exempt corporations for tax years beginning after May 21, 2003. An organization that would have qualified as an organization exempt from federal income tax under Section 501(c)(19) of the Internal Revenue Code but for the fact that the requirement that 75 percent of the members need to be past or present armed forces members is not met because the membership includes ancestors or lineal descendants is considered to be an organization exempt from federal income tax.

This change is effective for tax years beginning after May 21, 2003.

52.1(7) Income tax of corporations in liquidation. When a corporation is in the process of liquidation, or in the hands of a receiver, the income tax returns must be made under oath or affirmation of the persons responsible for the conduct of the affairs of such corporations, and must be filed at the same time and in the same manner as required of other corporations.

52.1(8) Income tax returns for corporations dissolved. Corporations which have been dissolved during the income year must file income tax returns for the period prior to dissolution which has not already been covered by previous returns. Officers and directors are responsible for the filing of the returns and for the payment of taxes, if any, for the audit period provided by law.

Where a corporation dissolves and disposes of its assets without making provision for the payment of its accrued Iowa income tax, liability for the tax follows the assets so distributed and upon failure to secure the unpaid amount, suit to collect the tax may be instituted against the stockholders and other

persons receiving the property, to the extent of the property received, except bona fide purchasers or others as provided by law.

52.1(9) *Income tax returns for corporations storing goods in an Iowa warehouse.* For tax years beginning on or after January 1, 2001, foreign corporations are not required to file income tax returns if their only activities in Iowa are the storage of goods for a period of 60 consecutive days or less in a warehouse for hire located in Iowa, provided that the foreign corporation transports or causes a carrier to transport such goods to that warehouse and that none of these goods are delivered or shipped to a purchaser in Iowa.

The following nonexclusive examples illustrate how this subrule applies:

EXAMPLE 1: A, a foreign corporation, stores goods in a warehouse for hire in Iowa for a period of 45 consecutive days. The goods are then delivered to a purchaser outside Iowa. If this is A's only activity in Iowa, A is not required to file an Iowa income tax return.

EXAMPLE 2: B, a foreign corporation, stores goods in a warehouse for hire in Iowa for a period of 75 consecutive days. The goods are then delivered to a purchaser outside Iowa. B is required to file an Iowa income tax return because the goods were stored in Iowa for more than 60 consecutive days.

EXAMPLE 3: C, a foreign corporation, stores goods in a warehouse for hire in Iowa for a period of 30 consecutive days. One percent of these goods are shipped to a purchaser in Iowa, and the other 99 percent are shipped to a purchaser outside Iowa. C is required to file an Iowa income tax return because a portion of the goods were shipped to a purchaser in Iowa.

EXAMPLE 4: D, a foreign corporation, has retail stores in Iowa. D also stores goods in a warehouse for hire in Iowa for a period of 30 consecutive days. The goods are then delivered to a purchaser outside Iowa. D is required to file an Iowa income tax return because its Iowa activities are not limited to the storage of goods in a warehouse for hire in Iowa.

EXAMPLE 5: E, a foreign corporation, has goods delivered by a common carrier, F, into a warehouse for hire in Iowa. The goods are stored in the warehouse for a period of 40 consecutive days, and are then delivered to a purchaser outside Iowa. If this is E's only activity in Iowa, E is not required to file an Iowa income tax return. However, F is required to file an Iowa income tax return because it derives income from transportation operations in Iowa.

52.1(10) *Deferment of income for start-up companies.* For tax periods beginning on or after January 1, 2002, but before January 1, 2008, a business that qualifies as a "start-up" business can defer taxable income for the first three years that the business is in operation. The deferment of income for start-up companies is repealed effective for tax years beginning on or after January 1, 2008.

a. Definition of start-up business. A start-up business for purposes of this subrule does not include any of the following:

- (1) An existing business locating in Iowa from another state.
- (2) An existing business locating in Iowa from another location in Iowa.
- (3) A newly created business which is the result of the merger of two or more businesses.
- (4) A newly created subsidiary or new business of a corporation.
- (5) A previously existing business which has been dissolved and reincorporated.
- (6) An existing business operating under a different name and located in a different location.
- (7) A newly created partnership owned by two or more of the same partners as an existing business and engaging in similar business activity as the existing business.
- (8) A business entity that reorganizes or experiences a change in either the legal or trade name of the business.
- (9) A joint venture.

b. Criteria for deferment of taxable income. In order to qualify for the deferment of taxable income for a start-up business, each of the following criteria must be met:

- (1) The taxpayer is a business that is a wholly new start-up business beginning operations during the first tax year for which the deferment of taxable income is claimed.
- (2) The business has its commercial domicile, as defined by Iowa Code section 422.32, in Iowa.
- (3) The operations of the business are funded by at least 25 percent venture capital moneys. "Venture capital moneys" means an equity investment from an individual or a private seed and venture

capital fund whose only business is investing in seed and venture capital opportunities. “Venture capital moneys” does not mean a loan or other nonequity financing from a person, financial institution or other entity.

(4) The taxpayer does not have any delinquent taxes or other debt outstanding and owing to the state of Iowa.

c. Request for deferment of income. A taxpayer must submit a request to the department for the deferment of taxable income. The request must provide evidence that all of the criteria to qualify as a start-up business have been met. The request should be made as soon as possible after the close of the first tax year of the business. The request is to be filed with the Iowa Department of Revenue, Policy Section, Compliance Division, P.O. Box 10457, Des Moines, Iowa 50306-0457. Upon determination that the criteria have been met, the department will notify the taxpayer that the deferment of taxable income is approved. If the request for deferment of taxable income is denied, the taxpayer may file a protest within 60 days of the date of the letter denying the request for deferment of taxable income. The department’s determination letter shall set forth the taxpayer’s rights to protest the department’s determination.

d. Filing of tax returns. If the request for deferment of taxable income is approved, taxable income for the first three years that the business is in operation is deferred. The taxpayer shall pay taxes on the deferred taxable income in five equal annual installments during the five tax years following the three years of deferment. Tax returns must be filed for each tax year in which the deferment is approved. If the taxpayer has a net loss during any tax year during the three-year deferment period, the loss may be applied to any deferred taxable income during that period. For purposes of assessing penalty and interest, the tax on any deferred income is not due and payable until the tax years in which the five equal annual installments are due and payable.

The following nonexclusive examples illustrate how this subrule applies:

EXAMPLE 1: A qualifying start-up business reports Iowa taxable income of \$1,000 in year one, \$5,000 in year two and \$10,000 in year three. The total tax deferred is \$60 in year 1, \$300 in year two and \$600 in year three, or \$960. The taxpayer shall pay \$192 (\$960 divided by 5) in deferred tax for each of the next five tax returns. No penalty or interest is due on the deferred annual tax of \$192 if the returns for years four through eight are filed by the due date and the tax is timely paid. After the return for year three is filed, the department will issue a schedule to the qualifying business indicating that \$192 of additional tax is due annually for years four through eight, and when the additional payments of \$192 are due.

EXAMPLE 2: A qualifying start-up business reports an Iowa taxable loss of \$10,000 in year one, a loss of \$2,000 in year two and taxable income of \$22,000 in year three. The losses for year one and year two can be netted against the income in year three, resulting in deferred taxable income of \$10,000. The tax of \$600 computed on income of \$10,000 will be paid in five equal installments of \$120 for the next five tax returns. No penalty or interest is due on the deferred annual tax of \$120 if the returns for years four through eight are filed by the due date and the tax is timely paid. After the return for year three is filed, the department will issue a schedule to the qualifying business indicating that \$120 of additional tax is due annually for years four through eight and when the additional payments of \$120 are due.

This rule is intended to implement Iowa Code sections 422.21, 422.32, 422.33, 422.34, 422.34A, and 422.36 and Iowa Code section 422.24A as amended by 2008 Iowa Acts, Senate File 2400, section 66.

[ARC 7761B, IAB 5/6/09, effective 6/10/09; ARC 1303C, IAB 2/5/14, effective 3/12/14; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—52.2(422) Time and place for filing return.

52.2(1) Returns of corporations. A return of income for all corporations must be filed on or before the due date. The due date for all corporations excepting cooperative associations as defined in Section 6072(d) of the Internal Revenue Code is the last day of the fourth month following the close of the taxpayer’s taxable year, whether the return be made on the basis of the calendar year or the fiscal year; or the last day of the period covered by an extension of time granted by the director. When the due date falls on a Saturday, Sunday or a legal holiday, the return will be due the first business day following the

Saturday, Sunday or legal holiday. If a return is placed in the mails, properly addressed and postage paid in ample time to reach the department on or before the due date for filing, no penalty will attach should the return not be received until after that date. Mailed returns should be addressed to Corporate Income Tax Processing, Hoover State Office Building, Des Moines, Iowa 50319.

52.2(2) *Returns of cooperatives.* A return of income for cooperatives, defined in Section 6072(d) of the Internal Revenue Code, must be filed on or before the fifteenth day of the ninth month following the close of the taxpayer's taxable year.

52.2(3) *Short period returns.* Where under a provision of the Internal Revenue Code, a corporation is required to file a tax return for a period of less than 12 months, a short period Iowa return must be filed for the same period. The short period Iowa return is due 45 days after the federal due date, not considering any federal extension of time to file.

52.2(4) *Extension of time for filing returns for tax years beginning on or after January 1, 1991.* See 701—subrule 39.2(4).

This rule is intended to implement Iowa Code sections 422.21 and 422.24.

701—52.3(422) Form for filing.

52.3(1) *Use and completeness of prescribed forms.* Returns shall be made by corporations on forms supplied by the department. Taxpayers not supplied with the proper forms shall make application for same to the department in ample time to have their returns made, verified and filed on or before the due date. Each taxpayer shall carefully prepare the taxpayer's return so as to fully and clearly set forth the data required. For lack of a prescribed form, a statement made by a taxpayer disclosing the taxpayer's gross income and the deductions therefrom may be accepted as a tentative return, and if verified and filed within the prescribed time, will relieve the taxpayer from liability to penalties, provided that without unnecessary delay such a tentative return is replaced by a return made on the proper form. Each question shall be answered and each direction complied with in the same manner as if the forms and instructions were embodied in these rules.

Failure to receive the proper forms does not relieve the taxpayer from the obligation of making any return required by the statute.

Returns received which are not completed, but merely state "see schedule attached" are not considered to be a properly filed return and may be returned to the taxpayer for proper completion. This may result in the imposition of penalties and interest due to the return being filed after the due date.

52.3(2) *Form for filing—domestic corporations.* A domestic corporation, as defined by Iowa Code subsection 422.32(5), is required to file a complete Iowa return for each year of its existence regardless of whether the corporation has income, loss, or inactivity. For tax periods beginning on or after January 1, 1999, domestic corporations are required to file a complete Iowa return only if they are doing business in Iowa, or deriving income from sources within Iowa. For tax periods beginning on or after July 1, 2012, domestic corporations must also include a true and accurate copy of their federal corporation income tax return as filed with the Internal Revenue Service with the filing of their Iowa return. At a minimum this return includes the following federal schedules: income statement, balance sheet, reconciliation of income per books with income per return, analysis of unappropriated retained earnings per books, dividend income and special deductions, cost of goods sold, capital gains, tax computation and tax deposits, alternative minimum tax computation, and statements detailing other income and other deductions.

When a domestic corporation is included in the filing of a consolidated federal income tax return, the Iowa corporation income tax return shall include a schedule of the consolidating income statements as properly computed for federal income tax purposes showing the income and expenses of each member of the consolidated group, and a schedule of capital gains on a separate basis.

If a domestic corporation claims a foreign tax credit, research activities credit, alcohol fuel credit, employer social security credit, or work opportunity credit on its federal income tax return, a detailed computation of the credits claimed shall be included with the Iowa return upon filing. In those instances where the domestic corporation is involved in the filing of a consolidated federal income tax return, the credit computations shall be reported on a separate entity basis.

Similarly, where a domestic corporation is charged with a holding company tax or an alternative minimum tax, the details of the taxes levied shall be put forth in a schedule to be included with the Iowa return. Furthermore, these taxes shall be identified on a separate company basis where the domestic corporation files as a member of a consolidated group for federal purposes.

52.3(3) Form for filing—foreign corporations. Foreign corporations, as defined by Iowa Code subsection 422.32(6), must include a true and accurate copy of their federal corporation income tax return as filed with the Internal Revenue Service with the filing of their Iowa return. At a minimum this return includes the following federal schedules: income statement, balance sheet, reconciliation of income per books with income per return, analysis of unappropriated retained earnings per books, dividend income and special deductions, cost of goods sold, capital gains, tax computation and tax deposits, research activities credit computation, work opportunity credit computation, foreign tax credit computation, alcohol fuel credit computation, employer social security credit computation, alternative minimum tax computation, and statements detailing other income and other deductions.

When a foreign corporation whose income is included in a consolidated federal income tax return files an Iowa return, federal consolidating income statements as properly computed for federal income tax purposes showing the income and expenses of each member of the consolidated group shall be required together with the following additional schedules on a separate basis:

- a. Capital gains.
- b. Dividend income and special deductions.
- c. Research activities credit, alcohol fuel credit and employer social security credit computations.
- d. Work opportunity credit computation.
- e. Foreign tax credit computation.
- f. Holding company tax computation.
- g. Alternative minimum tax computation.
- h. Schedules detailing other income and other deductions.

52.3(4) Amended returns. If it becomes known to the taxpayer that the amount of income reported to be federal net income or Iowa taxable income was erroneously stated on the Iowa return, or changed by Internal Revenue Service audit, or otherwise, the taxpayer shall file an amended Iowa return along with supporting schedules, to include the amended federal return and a copy of the federal revenue agent's report if applicable. A copy of the federal revenue agent's report and notification of final federal adjustments provided by the taxpayer will be acceptable in lieu of an amended return. The assessment or refund of tax shall be dependent on the statute of limitations as set forth in 701—subrule 51.2(1) and rule 701—55.3(422).

This rule is intended to implement Iowa Code section 422.21 and section 422.36 as amended by 2012 Iowa Acts, Senate File 2328.

[ARC 0337C, IAB 9/19/12, effective 10/24/12]

701—52.4(422) Payment of tax.

52.4(1) Quarterly estimated payments. Effective for taxable years beginning on or after July 1, 1977, corporations are required to make quarterly payments of estimated income tax. Rules pertaining to the estimated tax are contained in 701—Chapter 56.

52.4(2) Full estimated payment on original due date. Rescinded IAB 3/15/95, effective 4/19/95.

52.4(3) Penalty and interest on unpaid tax. See rule 701—10.6(421) for penalty for tax periods beginning on or after January 1, 1991. See rule 701—10.8(421) for statutory exemptions to penalty for tax periods beginning on or after January 1, 1991.

Interest shall accrue on tax due from the original due date of the return. Interest on refunds of any portion of the tax imposed by statute which has been erroneously refunded and which is recoverable by the department shall bear interest as provided by law from the date of payment of the refund, considering each fraction of a month as an entire month. See rule 701—10.2(421) for the statutory interest rate.

All payments shall be first applied to the penalty and then to the interest, and the balance, if any, to the amount of tax due.

52.4(4) *Payment of tax by uncertified checks.* The department will accept uncertified checks in payment of income taxes, provided the checks are collectible for their full amount without any deduction for exchange or other charges unless requirements for electronic transmission of remittances and related information specify otherwise. The date on which the department receives the check will be considered the date of payment, so far as the taxpayer is concerned, unless the check is dishonored. If one check is remitted to cover two or more corporations' taxes, the remittance must be accompanied by a letter of transmittal stating: (a) the name of the drawer of the check; (b) the amount of the check; (c) the amount of any cash, money order or other instrument included in the same remittance; (d) the name of each corporation whose tax is to be paid by the remittance; and (e) the amount of payment on account of each corporation.

52.4(5) *Procedure with respect to dishonored checks.* If any check is returned unpaid, all expenses incidental to the collection thereof will be charged to the taxpayer. If any taxpayer whose check has been returned by the depository bank uncollected should fail at once to make the check good, the director will proceed to collect the tax as though no check had been given. A taxpayer who tenders a certified check in payment for taxes is not relieved from his obligation until the check has been paid.

52.4(6) *New jobs credit.* Transferred to 701—52.8(422) IAB 11/28/90, effective 1/2/91.

This rule is intended to implement Iowa Code sections 422.21, 422.24, 422.25, 422.33 and 422.86.

701—52.5(422) Minimum tax.

52.5(1) Rescinded IAB 11/24/04, effective 12/29/04.

52.5(2) For tax years beginning after 1997, a small business corporation or a new corporation for its first year of existence, which through the operation of Internal Revenue Code Section 55(e) is exempt from the federal alternative minimum tax, is not subject to Iowa alternative minimum tax. A small business corporation may apply any alternative minimum tax credit carryforward to the extent of its regular corporation income tax liability.

For tax years beginning on or after January 1, 1987, the minimum tax is imposed only to the extent that it exceeds the taxpayer's regular tax liability computed under Iowa Code subsection 422.33(1). The minimum tax rate is 60 percent of the maximum corporate tax rate rounded to the nearest one-tenth of 1 percent or 7.2 percent. Minimum taxable income is computed as follows:

State taxable income as adjusted by Iowa Code section 422.35

Plus:	Tax preference items, adjustments and losses added back
Less:	Allocable income including allocable preference items and adjustments under Section 56 of the Internal Revenue Code including adjusted current earnings related to allocable income including the allocable preference items
	Subtotal
Times:	Apportionment percentage
	Result
Plus:	Income allocable to Iowa including allocable preference items and adjustments under Section 56 of the Internal Revenue Code including adjusted current earnings related to allocable income including the allocable preference items
Less:	Iowa alternative tax net operating less deduction \$40,000 exemption amount
Equals:	Iowa alternative minimum taxable income

For tax years beginning on or after January 1, 1987, the items of tax preference are the same items of tax preference under Section 57 except for Subsections (a)(1) and (a)(5) of the Internal Revenue Code used to compute federal alternative minimum taxable income. The adjustments to state taxable income are those adjustments required by Section 56 except for Subsections (a)(4) and (d) of the Internal Revenue Code used to compute federal alternative minimum taxable income. In making the adjustment

under Section 56(c)(1) of the Internal Revenue Code, interest and dividends from federal securities net of amortization of any discount or premium shall be subtracted. For tax years beginning on or after January 1, 1988, in making the adjustment under Section 56(c)(1) of the Internal Revenue Code, interest and dividends from state and other political subdivisions and from regulated investment companies exempt from federal income tax under the Internal Revenue Code shall be subtracted net of amortization of any discount or premium. In making the adjustment for adjusted current earnings, subtract Foreign Sales Company (FSC) dividend income and Puerto Rican dividend income computed under Internal Revenue Code Section 936 to the extent they are included in the federal computation of adjusted current earnings. Losses to be added are those losses required to be added by Section 58 of the Internal Revenue Code in computing federal alternative minimum taxable income.

- a. Tax preference items are:
 1. Intangible drilling costs;
 2. Incentive stock options;
 3. Reserves for losses on bad debts of financial institutions;
 4. Appreciated property charitable deductions;
 5. Accelerated depreciation or amortization on certain property placed in service before January 1, 1987.
- b. Adjustments are:
 1. Depreciation;
 2. Mining exploration and development;
 3. Long-term contracts;
 4. Iowa alternative minimum net operating loss deduction;
 5. Book income or adjusted earnings and profits.
- c. Losses added back are:
 1. Farm losses;
 2. Passive activity losses.

Computation of Iowa alternative minimum tax net operating loss deduction.

Net operating losses computed under rule 701—53.2(422) carried forward from tax years which begin before January 1, 1987, are deductible without adjustment.

Net operating losses from tax years which begin after December 31, 1986, which are carried back or carried forward to the current tax year shall be reduced by the amount of tax preferences and adjustments taken into account in computing the net operating loss prior to applying rule 701—53.2(422). The deduction for a net operating loss from a tax year beginning after December 31, 1986, which is carried back or carried forward shall not exceed 90 percent of the alternative minimum taxable income computed without regard for the net operating loss deduction.

The exemption amount shall be reduced by 25 percent of the amount that the alternative minimum taxable income computed without regard to the \$40,000 exemption exceeds \$150,000. The exemption shall not be reduced below zero.

EXAMPLE: The following example shows the computation of the alternative minimum tax when there are net operating loss carryforwards and carrybacks including an alternative minimum tax net operating loss.

For tax year 1987, the following information is available:

Federal taxable income before NOL	\$182,000
Federal NOL carryforward	<97,000>
Federal income tax	19,750
Tax preferences and adjustments	48,000
Iowa income tax expensed on federal	2,570
Iowa NOL carryforward	147,000

For tax year 1988, the following information is available:

Federal taxable income before NOL	\$ <154,000 >
Federal income tax refund	15,460
Tax preferences and adjustments	78,000
Iowa income tax refund reported on federal	2,570

The alternative minimum tax for 1987 before the 1988 net operating loss carryback should be computed as follows:

Regular Iowa Tax	
Federal taxable income	\$182,000
less 50% federal tax	<9,875 >
add Iowa income tax expensed	2,570
Iowa taxable income before NOL carryforward	<u>\$174,695</u>
less NOL carryforward	<147,000 >
Iowa taxable income	\$ 27,695
Iowa income tax	\$ 1,716
Alternative Minimum Tax	
Iowa taxable income before NOL	\$174,695
add preferences and adjustments	48,000
Total	<u>\$222,695</u>
less NOL carryforward*	<147,000 >
Iowa alternative taxable income	\$ 75,695
less exemption amount	<40,000 >
Total	<u>\$ 35,695</u>
Times 7.2%	2,570
Less regular tax	<1,715 >
Alternative minimum tax	<u>\$ 855</u>

*Net operating loss carryforwards from tax years beginning before January 1, 1987, are deductible at 100 percent without reduction for items of tax preference or adjustments arising in the tax year.

The alternative minimum tax for 1987 after the 1988 net operating loss carryback should be computed as follows:

Regular Iowa Tax	
Federal taxable income	\$ 182,000
less 50% federal tax	<9,875 >
add Iowa income tax expensed	2,570
Iowa taxable income before NOL carryforward	<u>\$ 174,695</u>
less NOL carryforward	<147,000 >
	<u>\$ 27,695</u>
less NOL carryback from 1988 ¹	<148,840 >
NOL carryforward	<u>\$ <121,145 ></u>

Alternative Minimum Tax	
Iowa taxable income before NOL	\$ 174,695
add preferences and adjustments	48,000
Total	\$ 222,695
less NOL carryforward from pre-1987 tax year	<147,000>
Total	\$ 75,695
less alternative minimum tax NOL ²	<68,126>
Total	\$ 7,569
less exemption	<40,000>
Alternative minimum taxable income after NOL	\$ -0-

¹Computation of 1988 Iowa NOL

Federal NOL	\$<154,000>
add 50% of federal refund	7,730
less Iowa refund in federal income	<2,570>
Iowa NOL	\$<148,840>

²Computation of 1988 Alternative Minimum Tax NOL

Iowa NOL	\$<148,840>
add preferences and adjustments	78,000
Total	\$ <70,840>
NOL carryback limited to 90% of alternative minimum income before NOL and exemption*	\$ <68,126>
Alternative minimum tax NOL carryforward	\$ 2,705

*For purposes of the alternative minimum tax, net operating loss carryforward or carryback from tax years beginning after December 31, 1986, must be reduced by items of tax preference and adjustments, and are limited to 90 percent of alternative minimum taxable income before deduction of the post-1986 NOL and the \$40,000 exemption amount ($\$75,695 \times 90\% = \$68,126$).

52.5(3) Effective for tax years beginning on or after January 1, 1986, estimated payments are required for minimum tax.

52.5(4) Alternative minimum tax credit for minimum tax paid in a prior tax year. Minimum tax paid by a taxpayer in prior tax years commencing with tax years beginning on or after January 1, 1987, can be claimed as a tax credit against the taxpayer's regular income tax liability in a subsequent tax year. Therefore, 1988 is the first tax year that the minimum tax credit is available for use and the credit is based on the minimum tax paid by the taxpayer for 1987. The minimum tax credit may only be used against regular income tax for a tax year to the extent that the regular tax is greater than the minimum tax for the tax year. If the minimum tax credit is not used up against the regular tax for a tax year, the remaining credit is carried to the following tax year to be applied against the regular income tax liability for that period.

a. Computation of minimum tax credit on Schedule IA 8827. The minimum tax credit is computed on Schedule IA 8827 from information on Schedule IA 4626 for prior tax years, from Form IA 1120 and Schedule IA 4626 for the current year and from Schedule IA 8827 for prior tax years.

b. Examples of computation of the minimum tax credit and carryover of the credit.

EXAMPLE 1. Taxpayer reported \$5,000 of minimum tax for 2007. For 2008, taxpayer reported regular tax less credits of \$8,000 and the minimum tax liability is \$6,000. The minimum tax credit is \$2,000 for 2008 because, although the taxpayer had an \$8,000 regular tax liability, the credit is allowed

only to the extent that the regular tax exceeds the minimum tax. Since only \$2,000 of the carryover credit from 2007 was used, there is a \$2,000 minimum tax carryover credit to 2009.

EXAMPLE 2. Taxpayer reported \$2,500 of minimum tax for 2007. For 2008, taxpayer reported regular tax less credits of \$8,000 and the minimum tax liability is \$5,000. The minimum tax credit is \$2,500 for 2008 because, although the regular tax less credits exceeded the minimum tax by \$3,000, the credit is allowed only to the extent of minimum tax paid for prior tax years. There is no minimum tax carryover credit to 2009.

c. Computation of the minimum tax credit attributable to a member leaving an affiliated group filing a consolidated Iowa corporation income tax return. The amount of minimum tax credit available for carryforward attributable to a member of a consolidated Iowa income tax return shall be computed as follows: The consolidated minimum tax credit available for carryforward from each tax year is multiplied by a fraction, the numerator of which is the separate member's tax preferences and adjustments for the tax year and the denominator of which is the total tax preferences and adjustments of all members of the consolidated Iowa income tax return for the tax year.

d. Computation of the amount of minimum tax credit which may be used by a new member of a consolidated Iowa corporation income tax return. The amount of minimum tax credit carryforward which may be used by a new member of a consolidated Iowa income tax return is limited to the separate member's contribution to the amount by which the regular income tax less credits set forth in Iowa Code section 422.33 exceeds the tentative minimum tax.

The separate member's contribution to the amount by which the regular income tax less nonrefundable credits exceeds the tentative minimum tax shall be computed as follows:

$$\frac{\left[\frac{A}{B} \times C + D \right] \times F}{E} = \text{Separate member's contribution to the amount by which regular income tax less credits set forth in section 422.33 exceeds the tentative minimum tax.}$$

A = Separate corporation gross sales within Iowa after elimination of all intercompany transactions.

B = Consolidated gross sales within and without Iowa after elimination of all intercompany transactions.

C = Iowa consolidated income subject to apportionment.

D = Separate corporation income allocable to Iowa.

E = Iowa consolidated income subject to tax.

F = The amount by which the regular income tax less credits set forth in Iowa Code section 422.33 exceeds the tentative minimum tax.

e. Minimum tax credit after merger. When two or more corporations merge or consolidate into one corporation, the minimum tax credit of the merged or consolidated corporations is available for use by the survivor of the merger or consolidation.

This rule is intended to implement Iowa Code section 422.33.

[ARC 7761B, IAB 5/6/09, effective 6/10/09]

701—52.6(422) Motor fuel credit. A corporation may elect to receive an income tax credit in lieu of the motor fuel tax refund provided by Iowa Code chapter 452A. A corporation which holds a motor fuel tax refund permit when it makes this election must cancel the permit within 30 days after the first day of the tax year. However, if the refund permit is not canceled within this period, the permit becomes invalid at the time the election to receive an income tax credit is made. The election will continue for subsequent tax years unless a new motor fuel tax refund permit is obtained.

The amount of the income tax credit must be the amount of Iowa motor fuel tax paid on qualifying fuel purchases as determined by Iowa Code chapter 452A and Iowa Code section 422.110 less any state sales tax as determined by 701—subrule 231.2(2). The credit must be claimed on the tax return covering the tax year in which the motor fuel tax was paid. If the motor fuel credit results in an overpayment of income tax, the overpayment may be refunded or may be credited to income tax due in the subsequent tax year.

Shareholders of S corporations may claim an income tax credit on their individual income tax returns for their respective shares of the motor vehicle fuel taxes paid by the corporations. The credit for a shareholder is that person's pro rata share of the fuel tax paid by the corporation. A schedule must be attached to the individual's return showing the distribution of gallons and the amount of credit claimed by each shareholder.

The corporation must attach to its return a schedule showing the allocation to each shareholder of the motor fuel purchased by the corporation.

This rule is intended to implement Iowa Code section 422.33.

701—52.7(422) Research activities credit. Effective for tax years beginning on or after January 1, 1985, taxpayers are allowed a tax credit equal to 6.5 percent of the state's apportioned share of qualifying expenditures for increasing research activities. For purposes of this credit, "qualifying expenditures" means the qualifying expenditures for increasing research activities as defined for purposes of the federal credit for increasing research activities computed under Section 41 of the Internal Revenue Code. For tax years beginning on or after January 1, 1991, "qualifying expenditures" means the qualifying expenditures for increasing research activities as defined for purposes of the federal credit for increasing research activities computed under Section 41 of the Internal Revenue Code as in effect on January 1, 1998. The Iowa research activities credit is made permanent for tax years beginning on or after January 1, 1991, even though there may no longer be a research activities credit for federal income tax purposes. The "state's apportioned share of qualifying expenditures for increasing research activities" must be the ratio of the qualified expenditures in Iowa to total qualified expenditures times total qualifying expenditures for increasing research activities.

52.7(1) Qualified expenditures in Iowa are:

- a. Wages for qualified research services performed in Iowa.
- b. Cost of supplies used in conducting qualified research in Iowa.
- c. Rental or lease cost of personal property used in Iowa in conducting qualified research. Where personal property is used both within and without Iowa in conducting qualified research, the rental or lease cost must be prorated between Iowa and non-Iowa use by the ratio of days used in Iowa to total days used both within and without Iowa.
- d. Sixty-five percent of contract expenses paid by a corporation to a qualified organization for basic research performed in Iowa.

52.7(2) Total qualified expenditures are:

- a. Wages paid for qualified research services performed everywhere.
- b. Cost of supplies used in conducting qualified research everywhere.
- c. Rental or lease cost of personal property used in conducting qualified research everywhere.
- d. Sixty-five percent of contract expenses paid by a corporation to a qualified organization for basic research performed everywhere.

Qualifying expenditures for increasing research activities is the smallest of the amount by which the qualified research expenses for the taxable year exceed the base period research expenses or 50 percent of the qualified research expenses for the taxable year.

A shareholder in an S corporation may claim the pro rata share of the Iowa credit for increasing research expenditures on the shareholder's individual income tax return. The S corporation must provide each shareholder with a schedule showing the computation of the corporation's Iowa credit for increasing research expenditures and the shareholder's pro rata share. The shareholder's pro rata share of the Iowa credit for increasing research activities must be in the same ratio as the shareholder's pro rata share in the earnings of the S corporation.

Any research credit in excess of the corporation's tax liability less the credits authorized in Iowa Code sections 422.33, 422.91 and 422.111 may be refunded to the taxpayer or credited to the estimated tax of the taxpayer for the following year.

52.7(3) Research activities credit for tax years beginning in 2000. Effective for tax years beginning on or after January 1, 2000, the taxes imposed for corporate income tax purposes will be reduced by a tax credit for increasing research activities.

a. The credit equals the sum of the following:

(1) Six and one-half percent of the excess of qualified research expenses during the tax year over the base amount for the tax year based upon the state's apportioned share of the qualifying expenditures for increasing research activities.

(2) Six and one-half percent of the basic research payments determined under Section 41(e)(1)(A) of the Internal Revenue Code during the tax year based upon the state's apportioned share of the qualifying expenditures for increasing research activities.

The state's apportioned share of the qualifying expenditures for increasing research activities is a percent equal to the ratio of qualified research expenditures in this state to total qualified research expenditures.

b. In lieu of the credit computed under paragraph 52.7(3) "a," a taxpayer may elect to compute the credit amount for qualified research expenses incurred in this state in a manner consistent with the alternative incremental credit described in Section 41(c)(4) of the Internal Revenue Code for tax years beginning on or after January 1, 2000, but beginning before January 1, 2010. The taxpayer may make this election regardless of the method used by the taxpayer on the taxpayer's federal income tax return. The election made under this paragraph is for the tax year and the taxpayer may use another method or this same method for any subsequent tax year.

For purposes of this alternative incremental research credit computation, the credit percentages applicable to qualified research expenses described in clauses (i), (ii), and (iii) of Section 41(c)(4)(A) of the Internal Revenue Code are 1.65 percent, 2.20 percent, and 2.75 percent, respectively.

c. In lieu of the credit computed under paragraph 52.7(3) "a," a taxpayer may elect to compute the credit amount for qualified research expenses incurred in this state in a manner consistent with the alternative simplified credit described in Section 41(c)(5) of the Internal Revenue Code for tax years beginning on or after January 1, 2010. The taxpayer may make this election regardless of the method used by the taxpayer on the taxpayer's federal income tax return. The election made under this paragraph is for the tax year, and the taxpayer may use another method or this same method for any subsequent tax year.

For purposes of this alternative simplified research credit computation, the credit percentages applicable to qualified research expenses described in Section 41(c)(5)(A) and clause (ii) of Section 41(c)(5)(B) of the Internal Revenue Code are 4.55 percent and 1.95 percent, respectively.

d. For purposes of this subrule, the terms "base amount," "basic research payment," and "qualified research expense" mean the same as defined for the federal credit for increasing research activities under Section 41 of the Internal Revenue Code, except that, for purposes of the alternative incremental credit described in paragraph 52.7(3) "b" and the alternative simplified credit described in paragraph 52.7(3) "c," such amounts are limited to research activities conducted within this state. For purposes of this subrule, "Internal Revenue Code" means the Internal Revenue Code in effect on January 1, 2014.

e. A shareholder in an S corporation may claim the pro rata share of the Iowa credit for increasing research activities on the shareholder's individual return. The S corporation must provide each shareholder with a schedule showing the computation of the corporation's Iowa credit for increasing research activities and the shareholder's pro rata share. The shareholder's pro rata share of the Iowa credit for increasing research activities must be in the same ratio as the shareholder's pro rata share in the earnings of the S corporation.

Any research credit in excess of the corporation's tax liability less the credits authorized in Iowa Code sections 422.33, 422.91 and 422.111 may be refunded to the taxpayer or credited to the estimated tax of the corporation for the following year.

52.7(4) Research activities credit for an eligible business. Effective for tax years beginning on or after January 1, 2000, an eligible business may claim a tax credit for increasing research activities in this state during the period the eligible business is participating in the new jobs and income program with the Iowa department of economic development. An eligible business must meet all the conditions listed under Iowa Code section 15.329, which include requirements to make an investment of \$10 million as indexed for inflation and the creation of a minimum of 50 full-time positions. The research credit

authorized in this subrule is in addition to the research activities credit described in 701—subrule 42.11(3) or the research credit described in subrule 52.7(3).

a. The additional research activities credit for an eligible business is computed under the criteria for computing the research activities credit under 701—subrule 42.11(3) or under subrule 52.7(3), depending on which of those subrules the initial research credit was computed. The same qualified research expenses and basic research expenses apply in computation of the research credit for an eligible business as were applicable in computing the credit in 701—subrule 42.11(3) or 52.7(3). In addition, if the alternative incremental credit method was used to compute the initial research credit under 701—subrule 42.11(3) or 52.7(3), that method would be used to compute the research credit for an eligible business. Therefore, if a taxpayer that met the qualifications of an eligible business had a research activities credit of \$200,000 as computed under subrule 52.7(3), the research activities credit for the eligible business would result in an additional credit for the taxpayer of \$200,000.

b. If the eligible business is a partnership, S corporation, limited liability company, estate or trust where the income from the eligible business is taxed to the individual owners of the business, these individual owners may claim the additional research activities credit allowed to the eligible business. The research credit is allocated to each of the individual owners of the eligible business on the basis of the pro rata share of that individual's earnings from the eligible business.

52.7(5) Corporate tax research credit for increasing research activities within an enterprise zone. Effective for tax years beginning on or after January 1, 2000, for awards made by the Iowa department of economic development prior to July 1, 2010, the taxes imposed for corporate income tax purposes will be reduced by a tax credit for increasing research activities within an area designated as an enterprise zone. This credit for increasing research activities is in lieu of the research activities credit described in 701—subrule 42.11(3) or the research activities credit described in subrule 52.7(3). For the amount of the credit for increasing research activities within an enterprise zone for awards made by the economic development authority on or after July 1, 2010, see subrule 52.7(6).

a. The credit equals the sum of the following:

(1) Thirteen percent of the excess of qualified research expenses during the tax year over the base amount for the tax year based upon the state's apportioned share of the qualifying expenditures for research activities.

(2) Thirteen percent of the basic research payments determined under Section 41(e)(1)(A) of the Internal Revenue Code during the tax year based upon the state's apportioned share of the qualifying expenditures for increasing research activities. The state's apportioned share of the qualifying expenditures for increasing research activities is a percent equal to the ratio of qualified research expenditures in the enterprise zone to total qualified research expenditures.

b. In lieu of the credit computed under paragraph 52.7(5) "a," a taxpayer may elect to compute the credit amount for qualified research expenses incurred in the enterprise zone in a manner consistent with the alternative incremental credit described in Section 41(c)(4) of the Internal Revenue Code for tax years beginning prior to January 1, 2010. The taxpayer may make this election regardless of the method used by the taxpayer on the taxpayer's federal income tax return. The election made under this paragraph is for the tax year and the taxpayer may use another method or this same method for any subsequent tax year. For purposes of this alternative research credit computation, the credit percentages applicable to qualified research expenses described in clauses (i), (ii), and (iii) of Section 41(c)(4)(A) of the Internal Revenue Code are 3.30 percent, 4.40 percent, and 5.50 percent, respectively.

c. In lieu of the credit computed under paragraph 52.7(5) "a," a taxpayer may elect to compute the credit amount for qualified research expenses incurred in the enterprise zone in a manner consistent with the alternative simplified credit described in Section 41(c)(5) of the Internal Revenue Code for tax years beginning on or after January 1, 2010. The taxpayer may make this election regardless of the method used by the taxpayer on the taxpayer's federal income tax return. The election made under this paragraph is for the tax year and the taxpayer may use another method or this same method for any subsequent tax year. For purposes of this alternative research credit computation, the credit percentages applicable to qualified research expenses described in Section 41(c)(5)(A) and clause (ii) of Section 41(c)(5)(B) are 9.10 percent and 3.90 percent, respectively.

d. For purposes of this subrule, the terms “base amount,” “basic research payment,” and “qualified research expense” mean the same as defined for the federal credit for increasing research activities under Section 41 of the Internal Revenue Code, except that, for purposes of the alternative incremental credit described in paragraph 52.7(3) “*b*” and the alternative simplified credit described in paragraph 52.7(3) “*c*” of this rule, such amounts are limited to research activities conducted within the enterprise zone. For purposes of this rule, “Internal Revenue Code” means the Internal Revenue Code in effect on January 1, 2014.

e. Any research credit in excess of the corporation’s tax liability for the taxable year may be refunded to the taxpayer or credited to the corporation’s tax liability for the following year.

52.7(6) *Research activities credit for awards made by the economic development authority on or after July 1, 2010, but before July 1, 2014.* For eligible businesses approved under the enterprise zone program prior to July 1, 2014, by the economic development authority when an award is made on or after July 1, 2010, but before July 1, 2014, the taxes imposed for corporate income tax purposes will be reduced by a tax credit for increasing research activities within an area designated as an enterprise zone. The enterprise zone program was repealed on July 1, 2014. Any research activities credit earned by businesses approved under the enterprise zone program prior to July 1, 2014, remains valid and can be claimed on tax returns filed after July 1, 2014. This credit for increasing research activities is in lieu of the research activities credit described in 701—subrule 42.11(3) or the research activities credit described in subrule 52.7(3). The amount of the credit depends upon the gross revenues of the eligible business.

a. The credit equals the sum of the following for eligible businesses with gross revenues of less than \$20 million.

(1) Sixteen and one-half percent of the excess of qualified research expenses during the tax year over the base amount for the tax year based upon the state’s apportioned share of the qualifying expenditures for research activities.

(2) Sixteen and one-half percent of the basic research payments determined under Section 41(e)(1)(A) of the Internal Revenue Code during the tax year based upon the state’s apportioned share of the qualifying expenditures for increasing research activities. The state’s apportioned share of the qualifying expenditures for increasing research activities is a percentage equal to the ratio of qualified research expenditures in the enterprise zone to total qualified research expenditures.

b. The credit equals the sum of the following for eligible businesses with gross revenues of \$20 million or more.

(1) Nine and one-half percent of the excess of qualified research expenses during the tax year over the base amount for the tax year based upon the state’s apportioned share of the qualifying expenditures for research activities.

(2) Nine and one-half percent of the basic research payments determined under Section 41(e)(1)(A) of the Internal Revenue Code during the tax year based upon the state’s apportioned share of the qualifying expenditures for increasing research activities. The state’s apportioned share of the qualifying expenditures for increasing research activities is a percentage equal to the ratio of qualified research expenditures in the enterprise zone to total qualified research expenditures.

c. In lieu of the credit computed under paragraphs 52.7(6) “*a*” and “*b*,” a taxpayer may elect to compute the credit amount for qualified research expenses incurred in the enterprise zone in a manner consistent with the alternative simplified credit described in Section 41(c)(5) of the Internal Revenue Code. The taxpayer may make this election regardless of the method used by the taxpayer on the taxpayer’s federal income tax return. The election made under this paragraph is for the tax year and the taxpayer may use another method or this same method for any subsequent tax year. For purposes of this alternative research credit computation, the credit percentages applicable to qualified research expenses described in Section 41(c)(5)(A) and clause (ii) of Section 41(c)(5)(B) of the Internal Revenue Code depend upon the gross revenues of the eligible business.

(1) The percentages are 7 percent and 3 percent, respectively, for eligible businesses with gross revenues of less than \$20 million.

(2) The percentages are 2.1 percent and 0.9 percent, respectively, for eligible businesses with gross revenues of \$20 million or more.

d. For purposes of this subrule, the terms “base amount,” “basic research payment,” and “qualified research expense” mean the same as defined for the federal credit for increasing research activities under Section 41 of the Internal Revenue Code, except that, for purposes of the alternative simplified credit described in paragraph 52.7(3)“*c*” of this rule, such amounts are limited to research activities conducted within the enterprise zone. For purposes of this rule, “Internal Revenue Code” means the Internal Revenue Code in effect on January 1, 2014.

e. Any research credit in excess of the corporation’s tax liability for the taxable year may be refunded to the taxpayer or credited to the corporation’s tax liability for the following year.

52.7(7) Reporting of research activities credit claims. Beginning with research activities credit claims filed on or after July 1, 2009, the department shall issue an annual report to the general assembly of all research activities credit claims in excess of \$500,000. The report, which is due by February 15 of each year, will contain the name of each claimant and the amount of the research activities credit for all claims filed during the previous calendar year in excess of \$500,000.

This rule is intended to implement Iowa Code sections 15.335 and 422.33 as amended by 2014 Iowa Acts, House File 2435.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 9820B, IAB 11/2/11, effective 12/7/11; ARC 0337C, IAB 9/19/12, effective 10/24/12; ARC 1101C, IAB 10/16/13, effective 11/20/13; ARC 1545C, IAB 7/23/14, effective 8/27/14; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.8(422) New jobs credit. A tax credit is available to a corporation which has entered into an agreement under Iowa Code chapter 260E and has increased employment by at least 10 percent.

52.8(1) Definitions.

a. The term “*new jobs*” means those jobs directly resulting from a project covered by an agreement authorized by Iowa Code chapter 260E (Iowa Industrial New Jobs Training Act) but does not include jobs of recalled workers or replacement jobs or other jobs that formerly existed in the industry in the state.

b. The term “*jobs directly related to new jobs*” means those jobs which directly support the new jobs but does not include in-state employees transferred to a position which would be considered to be a job directly related to new jobs unless the transferred employee’s vacant position is filled by a new employee.

EXAMPLE A. A taxpayer who has entered into a chapter 260E agreement to train new employees for a new product line transfers an in-state employee to be supervisor of the new product line but does not fill the transferred employee’s position. The new supervisor’s position would not be considered a job directly related to new jobs even though it directly supports the new jobs because the transferred employee’s old position was not refilled.

EXAMPLE B. A taxpayer who has entered into a chapter 260E agreement to train new employees for a new product line transfers an in-state employee to be supervisor of the new product line and fills the transferred employee’s position with a new employee. The new supervisor’s position would be considered a job directly related to new jobs because it directly supports the new jobs and the transferred employee’s old position was filled by a new employee.

The burden of proof that a job is directly related to new jobs is on the taxpayer.

c. The term “*taxable wages*” means those wages upon which an employer is required to contribute to the state unemployment fund as defined in Iowa Code subsection 96.19(37) for the year in which the taxpayer elects to take the new jobs tax credit. For fiscal-year taxpayers, “taxable wages” shall not be greater than the maximum wage upon which an employer is required to contribute to the state unemployment fund for the calendar year in which the taxpayer’s fiscal year begins.

d. The term “*agreement*” means an agreement entered into under Iowa Code chapter 260E after July 1, 1985, an amendment to that agreement, or an amendment to an agreement entered into before July 1, 1985, if the amendment sets forth the base employment level as of the date of the amendment. The term “agreement” also includes a preliminary agreement entered into under Iowa Code chapter 260E

provided the preliminary agreement contains all the elements of a contract and includes the necessary elements and commitment relating to training programs and new jobs.

e. The term “*base employment level*” means the number of full-time jobs an industry employs at a plant site which is covered by an agreement under chapter 260E on the date of the agreement.

f. The term “*project*” means a training arrangement which is the subject of an agreement entered into under Iowa Code chapter 260E.

g. The term “*industry*” means a business engaged in interstate or intrastate commerce for the purpose of manufacturing, processing, or assembling products, conducting research and development, or providing services in interstate commerce, but excludes retail, health or professional services. Industry does not include a business which closes or substantially reduces its operations in one area of the state and relocates substantially the same operation in another area of the state. Industry is a business engaged in the above listed activities rather than the generic definition encompassing all businesses in the state engaged in the same activities. For example, in the meat-packing business, an industry is considered to be a single corporate entity or operating division, rather than the entire meat-packing business in the state.

h. The term “*new employees*” means the same as new jobs or jobs directly related to new jobs.

i. The term “*full-time job*” means any of the following:

- (1) An employment position requiring an average work week of 35 or more hours;
- (2) An employment position for which compensation is paid on a salaried full-time basis without regard to hours worked; or

(3) An aggregation of any number of part-time or job-sharing employment positions which equal one full-time employment position. For purposes of this subrule each part-time or job-sharing employment position shall be categorized with regard to the average number of hours worked each week as one-quarter, half, three-quarters, or full-time position, as set forth in the following table:

<u>Average Number of Weekly Hours</u>	<u>Category</u>
More than 0 but less than 15	¼
15 or more but less than 25	½
25 or more but less than 35	¾
35 or more	1 (full-time)

52.8(2) How to compute the credit. The credit is 6 percent of the taxable wages paid to employees in new jobs or jobs directly related to new jobs for the taxable year in which the taxpayer elects to take the credit.

EXAMPLE 1. A taxpayer enters into an agreement to increase employment by 20 new employees which is greater than 10 percent of the taxpayer’s base employment level of 100 employees. In year one of the agreement the taxpayer hires 20 new employees but elects not to take the credit in that year. In year two of the agreement only 18 of the new employees hired in year one are still employed and the taxpayer elects to take the credit. The credit would be 6 percent of the taxable wages of the 18 remaining new employees. In year three of the agreement the taxpayer hires two additional new employees under the agreement to replace the two employees which left in year two and elects to take the credit. The credit would be 6 percent of the taxable wages paid to the two replacement employees. In year four of the agreement three of the employees for which a credit had been taken left employment and three additional employees were hired. No credit is available for these employees. A credit can only be taken one time for each new job or job directly related to a new job.

EXAMPLE 2. A taxpayer operating two plants in Iowa enters into a chapter 260E agreement to train new employees for a new product line at one of the taxpayer’s plants. The base employment level on the date of the agreement at plant A is 300 and at plant B is 100. Under the agreement 20 new employees will be trained for plant B which is greater than a 10 percent increase of the base employment level for plant B. In the year in which the taxpayer elects to take the credit, the employment level at plant A is 290 and at plant B is 120. The credit would be 6 percent of the wages of 10 new employees at plant B as 10 new jobs were created by the industry in the state. A credit for the remaining 10 employees can be

taken if the employment level at plant A increases back to 300 during the period of time that the credit can be taken.

52.8(3) *When the credit can be taken.* The taxpayer may elect to take the credit in any tax year which either begins or ends during the period beginning with the date of the agreement and ending with the date by which the project is to be completed under the agreement. However, the taxpayer may not take the credit until the base employment level has been exceeded by at least 10 percent.

EXAMPLE: A taxpayer enters into an agreement to increase employment from a base employment level of 200 employees to 225 employees. In year one of the agreement the taxpayer hires 20 new employees which is a 10 percent increase over the base employment level but elects not to take the credit. In year two of the agreement 2 of the new employees leave employment. The taxpayer elects to take the credit which would be 6 percent of the taxable wages of the 18 employees currently employed. In year three the taxpayer hires 7 new employees and elects to take the credit. The credit would be 6 percent of the taxable wages of the seven new employees.

A shareholder in an S corporation may claim the pro rata share of the Iowa new jobs credit on the shareholder's individual tax return. The S corporation shall provide each shareholder with a schedule showing the computation of the corporation's Iowa new jobs credit and the shareholder's pro rata share. The shareholder's pro rata share of the Iowa new jobs credit shall be in the same ratio as the shareholder's pro rata share in the earnings of the S corporation. All shareholders of an S corporation shall elect to take the Iowa new jobs credit the same year.

Any new jobs credit in excess of the corporation's tax liability less the credits authorized in Iowa Code sections 422.33, 422.91, and 422.110 may be carried forward for ten years or until it is used, whichever is the earliest.

This rule is intended to implement Iowa Code section 422.33.

701—52.9(422) Seed capital income tax credit. Rescinded IAB 3/6/02, effective 4/10/02.

701—52.10(15) New jobs and income program tax credits. For tax years ending after May 1, 1994, for programs approved after May 1, 1994, but before July 1, 2005, an investment tax credit under Iowa Code section 15.333 and an additional research activities credit under Iowa Code section 15.335 are available to an eligible business. The new jobs and income program was repealed on July 1, 2005, and has been replaced with the high quality job creation program. See rule 701—52.28(15) for information on the investment tax credit and additional research activities credit under the high quality job creation program. Any investment tax credit and additional research activities credit earned by businesses approved under the new jobs and income program prior to July 1, 2005, remains valid, and can be claimed on tax returns filed after July 1, 2005.

52.10(1) Definitions:

- a. *"Eligible business"* means a business meeting the conditions of Iowa Code section 15.329.
- b. *"Improvements to real property"* includes the cost of utility lines, drilling wells, construction of sewage lagoons, parking lots and permanent structures. The term does not include temporary structures.
- c. *"Machinery and equipment"* means machinery used in manufacturing establishments and computers except point-of-sale equipment as defined in Iowa Code section 427A.1. The term does not include computer software.
- d. *"New investment directly related to new jobs created by the location or expansion of an eligible business under the program"* means the cost of machinery and equipment purchased for use in the operation of the eligible business which has been depreciated in accordance with generally accepted accounting principles and the cost of improvements to real property.

For the cost of improvements to real property to be eligible for an investment tax credit, the improvements to real property must have received an exemption from property taxes under Iowa Code section 15.332. Replacement machinery and equipment and additional improvements to real property placed in service during the period of property tax exemption by an eligible business qualify for an investment tax credit.

For tax years beginning on or after January 1, 2001, the requirement that the improvements to real property must have received an exemption from property taxes under Iowa Code section 15.332 has been eliminated.

52.10(2) Investment tax credit. An investment tax credit of up to 10 percent of the new investment which is directly related to new jobs created by the location or expansion of an eligible business is available. The credit is available for machinery and equipment or improvements to real property placed in service after May 1, 1994. The credit is to be taken in the year the qualifying asset is placed in service. For business applications received on or after July 1, 1999, for purposes of the investment tax credit claimed under Iowa Code section 15.333, the cost of land and any buildings and structures located on the land will be considered to be a new investment which is directly related to new jobs for purposes of determining the amount of new investment upon which an investment tax credit may be taken.

For eligible businesses approved by the Iowa department of economic development on or after March 17, 2004, certain lease payments made by eligible businesses to a third-party developer will be considered to be new investment for purposes of computing the investment tax credit. The eligible business shall enter into a lease agreement with the third-party developer for a minimum of ten years. The investment tax credit is based on the annual base rent paid to a third-party developer by the eligible business for a period not to exceed ten years. The total costs of the annual base rent payments for the ten-year period cannot exceed the cost of the land and the third-party developer's cost to build or renovate the building used by the eligible business. The annual base rent is defined as the total lease payment less taxes, insurance and operating and maintenance expenses.

If an eligible business fails to maintain the requirements of the new jobs and income program, the taxpayer may be required to repay all or a portion of the tax incentives taken on Iowa returns. Irrespective of the fact that the statute of limitations to assess the taxpayer for repayment of the tax credits may have expired, the department may proceed to collect the tax incentives forfeited by failure of the taxpayer to maintain the requirements of the new jobs and income program because this is a recovery of an incentive, rather than an adjustment to the taxpayer's tax liability. Details on the calculation of the repayment can be found in 261—subrule 187.5(4) of the administrative rules of the economic development authority. If the business is a partnership, limited liability company, S corporation, estate or trust where the income of the taxpayer is taxed to the individual owner(s) of the business, the department may proceed to collect the tax incentives against the partners, members, shareholders or beneficiaries to whom the tax incentives were passed through. See Decision of the Administrative Law Judge in *Damien & Colette Trebilcock, et al.*, Docket No. 11DORF 042-044, June 11, 2012.

If the eligible business, within five years of purchase, sells, disposes of, razes, or otherwise renders unusable all or a part of the land, buildings, or other existing structures for which tax credit was claimed under this subrule, the income tax liability of the eligible business for the year in which all or part of the property is sold, disposed of, razed, or otherwise rendered unusable shall be increased by one of the following amounts:

- a. One hundred percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within one full year after being placed in service.
- b. Eighty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within two full years after being placed in service.
- c. Sixty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within three full years after being placed in service.
- d. Forty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within four full years after being placed in service.
- e. Twenty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within five full years after being placed in service.

Any credit in excess of the tax liability for the tax year may be carried forward seven years or until used, whichever is the earlier.

If the business is a partnership, S corporation, limited liability company, or an estate or trust electing to have the income taxed directly to an individual, an individual may claim the credit. The amount

claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

52.10(3) *Research activities credit.* An additional research activities credit of 6½ percent of the state's apportioned share of "qualifying expenditures" is available to an eligible business. The credit is available for qualifying expenditures incurred after May 1, 1994. The additional research activities credit is in addition to the credit set forth in Iowa Code section 422.33(5).

See rule 701—52.7(422) for the computation of the research activities credit.

See also subrule 52.7(3) for the computation of the research activities credit for tax years beginning on or after January 1, 2000, and subrule 52.7(4) for the research activities credit for an eligible business for tax years beginning on or after January 1, 2000.

Any credit in excess of the tax liability for the tax year may be carried forward seven years or until used, whichever is the earlier. This is in contrast to the research activities credit in Iowa Code section 422.33(5) where any credit in excess of the tax liability for the tax year may be carried forward until used or refunded. For tax years ending on or after July 1, 1996, the additional research activities credit may at the option of the taxpayer be refunded.

If the business is a partnership, S corporation, limited liability company, or an estate or trust electing to have the income taxed directly to an individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

52.10(4) *Investment tax credit—value-added agricultural products.* For tax years beginning on or after July 1, 2001, an eligible business whose project primarily involves the production of value-added agricultural products may elect to receive a refund for all or a portion of an unused investment credit. For tax years beginning on or after July 1, 2001, but before July 1, 2003, an eligible business includes a cooperative described in Section 521 of the Internal Revenue Code which is not required to file an Iowa corporation tax return, and whose project primarily involves the production of ethanol. For tax years beginning on or after July 1, 2003, an eligible business includes a cooperative described in Section 521 of the Internal Revenue Code which is not required to file an Iowa corporation income tax return.

Eligible businesses that elect to receive a refund shall apply to the economic development authority for tax credit certificates between May 1 and May 15 of each fiscal year through the fiscal year ending June 30, 2009. The election to receive a refund of all or a portion of an unused investment tax credit is no longer available beginning with the fiscal year ending June 30, 2010. Only those businesses that have completed projects before the May 1 filing date may apply for a tax credit certificate. The economic development authority will not issue tax credit certificates for more than \$4 million during a fiscal year. If applications are received for more than \$4 million, the applicants shall receive certificates for a prorated amount.

The economic development authority will issue tax credit certificates within a reasonable period of time. Tax credit certificates are valid for the tax year following project completion. The tax credit certificate must be included with the tax return for the tax year during which the tax credit is claimed. The tax credit certificate shall not be transferred, except for a cooperative described in Section 521 of the Internal Revenue Code which is required to file an Iowa corporation income tax return and whose project primarily involves the production of ethanol for tax years beginning on or after January 1, 2002, or for a cooperative described in Section 521 of the Internal Revenue Code which is required to file an Iowa corporation income tax return for tax years beginning on or after July 1, 2003.

For value-added agricultural projects for cooperatives that are not required to file an Iowa income tax return because they are exempt from federal income tax, the cooperative must submit a list of its members and the share of each member's interest in the cooperative. The economic development authority will issue a tax credit certificate to each member on the list.

For tax years beginning on or after January 1, 2002, but before July 1, 2003, a cooperative described in Section 521 of the Internal Revenue Code which is required to file an Iowa corporation income tax return and whose project primarily involves the production of ethanol may elect to transfer all or a portion of its tax credit to its members. For tax years beginning on or after July 1, 2003, a cooperative described in Section 521 of the Internal Revenue Code which is required to file an Iowa corporation income tax

return may elect to transfer all or a portion of its tax credit to its members. The amount of tax credit transferred and claimed by a member shall be based upon the pro rata share of the member's earnings in the cooperative. The economic development authority will issue a tax credit certificate to each member of the cooperative to whom the credit was transferred provided that tax credit certificates which total no more than \$4 million are issued during a fiscal year.

The following nonexclusive examples illustrate how this subrule applies:

EXAMPLE 1. Corporation A completes a value-added agricultural project in October 2001 and has an investment tax credit of \$1 million. Corporation A is required to file an Iowa income tax return but expects no tax liability for the year ending December 31, 2001. Thus, Corporation A applies for a tax credit certificate for the entire unused credit of \$1 million in May 2002. The entire \$1 million is approved by the economic development authority, so the tax credit certificate is included with the tax return for the year ending December 31, 2002. Corporation A will request a refund of \$1 million on this tax return.

EXAMPLE 2. Corporation B completes a value-added agricultural project in October 2001 and has an investment tax credit of \$1 million. Corporation B is required to file an Iowa income tax return but expects no tax liability for the year ending December 31, 2001. Thus, Corporation B applies for a tax credit of \$1 million in May 2002. Due to the proration of available credits, Corporation B is awarded a tax credit certificate for \$400,000. The tax credit certificate is included with the tax return for the year ending December 31, 2002. Corporation B will request a refund of \$400,000 on this tax return. The remaining \$600,000 of unused credit can be carried forward for the following seven tax years or until the credit is depleted, whichever occurs first. If Corporation B expects no tax liability for the tax period ending December 31, 2002, Corporation B may apply for a tax credit certificate in May 2003 for this \$600,000 amount.

EXAMPLE 3. Corporation C completes a value-added agricultural project in March 2002 and has an investment tax credit of \$1 million. Corporation C is required to file an Iowa income tax return and expects a tax liability of \$200,000 for the tax period ending December 31, 2002. Thus, Corporation C applies for a tax credit certificate for the unused credit of \$800,000 in May 2002. A tax credit certificate is awarded for the entire \$800,000. The tax credit certificate for \$800,000 shall be included with the tax return for the period ending December 31, 2003, since the certificate is not valid until the year following the project's completion. The tax return for the period ending December 31, 2002, reports a tax liability of \$150,000. The investment credit is limited to \$150,000 for the period ending December 31, 2002, and the remaining \$50,000 can be carried forward for the following seven tax years.

EXAMPLE 4. Corporation D is a cooperative described in Section 521 of the Internal Revenue Code that completes a project involving ethanol in August 2002. Corporation D has an investment tax credit of \$500,000. Corporation D is not required to file an Iowa income tax return because Corporation D is exempt from federal income tax. When filing for the tax credit certificate in May 2003 for the \$500,000 unused credit, Corporation D must attach a list of its members and the share of each member's interest in the cooperative. The economic development authority will issue tax credit certificates to each member on the list based on each member's interest in the cooperative. The members can include the tax credit certificate with their Iowa income tax returns for the year ending December 31, 2003, since the certificate is not valid until the year following project completion.

EXAMPLE 5. Corporation E is a cooperative described in Section 521 of the Internal Revenue Code that completes a project involving ethanol in August 2002. Corporation E has an investment tax credit of \$500,000. Corporation E is required to file an Iowa income tax return because Corporation E is not exempt from federal income tax. Corporation E expects a tax liability of \$100,000 on its Iowa income tax return for the year ending December 31, 2002. Corporation E applies for a tax credit certificate for the unused credit of \$400,000 and elects to transfer the \$400,000 unused credit to its members. When applying for the tax credit certificate in May 2003, Corporation E must provide a list of its members and the pro rata share of each member's earnings in the cooperative. The economic development authority will issue tax credit certificates to each member of the cooperative. The members can include the tax credit certificate with their Iowa income tax returns for the year ending December 31, 2003, since the certificate is not valid until the year following project completion.

EXAMPLE 6. Corporation F is a cooperative described in Section 521 of the Internal Revenue Code that completes a project involving ethanol in August 2002. Corporation F is a limited liability company that files a partnership return for federal income tax purposes. Corporation F is required to file an Iowa partnership return because Corporation F is not exempt from federal income tax. Corporation F has an investment tax credit of \$500,000 which must be claimed by the individual partners of the partnership based on their pro rata share of individual earnings of the partnership. Corporation F expects a tax liability of \$200,000 for the individual partners. Corporation F may apply for a tax credit certificate in May 2003 for the unused credit of \$300,000. Corporation F must list the names of each partner and the ownership interest of each partner in order to allocate the investment credit for each partner. The tax credit certificate may be claimed on the partner's Iowa income tax return for the period ending December 31, 2003.

52.10(5) Corporate tax credit—certain sales taxes paid by developer. For eligible businesses approved by the Iowa department of economic development on or after March 17, 2004, the eligible business may claim a corporate tax credit for certain sales taxes paid by a third-party developer.

a. Sales taxes eligible for the credit. The sales taxes paid by the third-party developer which are eligible for this credit include the following:

(1) Iowa sales and use tax for gas, electricity, water, or sewer utility services, goods, wares, or merchandise, or on services rendered to, furnished to or performed for a contractor or subcontractor and used in the fulfillment of a written contract relating to the construction or equipping of a facility within the economic development area.

(2) Iowa sales and use tax paid for racks, shelving, and conveyor equipment to be used in a warehouse or distribution center within the economic development area.

Any Iowa sales and use tax paid relating to intangible property, furniture and other furnishings is not eligible for the corporate tax credit.

b. How to claim the credit. The third-party developer must provide to the economic development authority the amount of Iowa sales and use tax paid as described in paragraph "a." Beginning on July 1, 2009, this information must be provided to the Iowa department of revenue. The amount of Iowa sales and use tax attributable to racks, shelving, and conveyor equipment must be identified separately.

The economic development authority will issue a tax credit certificate to the eligible business equal to the Iowa sales and use tax paid by the third-party developer for gas, electricity, water, or sewer utility services, goods, wares, or merchandise, or on services rendered to, furnished to or performed for a contractor or subcontractor and used in the fulfillment of a written contract relating to the construction or equipping of a facility. In addition, the economic development authority will also issue a separate tax credit certificate to the eligible business equal to the Iowa sales and use tax paid by the third-party developer for racks, shelving, and conveyor equipment to be used in a warehouse or distribution center. Beginning on July 1, 2009, the Iowa department of revenue shall issue these tax credit certificates.

The tax credit certificate shall contain the name, address, and tax identification number of the eligible business, along with the amount of the tax credit and the year in which the tax credit can be claimed. The tax credit certificate must be included with the taxpayer's income tax return for the tax year for which the tax credit is claimed. Any tax credit in excess of the taxpayer's tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following seven years or until it is used, whichever is the earlier.

For the tax credit certificate relating to Iowa sales and use tax paid by the third-party developer for racks, shelving, and conveyor equipment, the aggregate amount of tax credit certificates and tax refunds for Iowa sales and use tax paid for racks, shelving, and conveyor equipment to eligible businesses under the new jobs and income program, high quality job creation program, enterprise zone program, new capital investment program and high quality jobs program cannot exceed \$500,000 in a fiscal year. The requests for tax credit certificates or refunds will be processed in the order they are received on a first-come, first-served basis until the amount of credits authorized for issuance has been exhausted. If

applications for tax credit certificates or refunds exceed the \$500,000 limitation for any fiscal year, the applications shall be considered in succeeding fiscal years.

This rule is intended to implement Iowa Code sections 15.331C, 15.333 as amended by 2010 Iowa Acts, Senate File 2380, and 15.335.

[**ARC 8605B**, IAB 3/10/10, effective 4/14/10; **ARC 9104B**, IAB 9/22/10, effective 10/27/10; **ARC 1744C**, IAB 11/26/14, effective 12/31/14]

701—52.11(422) Refunds and overpayments.

52.11(1) to 52.11(6) Reserved.

52.11(7) *Computation of interest on refunds resulting from net operating losses or net capital losses for tax years or periods beginning on or after January 1, 1974.* Rescinded IAB 11/24/04, effective 12/29/04.

52.11(8) *Computation of interest on refunds resulting from net operating losses or net capital losses for tax years or periods beginning on or after January 1, 1974, and ending on or after July 1, 1980.* Rescinded IAB 11/24/04, effective 12/29/04.

52.11(9) *Computation of interest on refunds resulting from net operating losses or net capital losses for tax years ending on or after April 30, 1981.* Rescinded IAB 11/24/04, effective 12/29/04.

52.11(10) *For refund claims received by the department after June 11, 1984.* If the amount of tax is reduced as a result of a net operating loss or net capital loss, interest shall accrue on the refund resulting from the loss carryback beginning on the date a claim for refund or amended return carrying back the net operating loss or net capital loss is filed with the department or the first day of the second calendar month following the actual payment date, whichever is later.

52.11(11) *Overpayment—interest accruing before July 1, 1980.* Rescinded IAB 11/24/04, effective 12/29/04.

52.11(12) *Interest commencing on or after January 1, 1982.* See rule 701—10.2(421) regarding the rate of interest charged by the department on delinquent taxes and the rate paid by the department on refunds commencing on or after January 1, 1982.

52.11(13) *Overpayment—interest accruing on or after July 1, 1980, and before April 30, 1981.* Rescinded IAB 11/24/04, effective 12/29/04.

52.11(14) *Overpayment—interest accruing on overpayments resulting from returns due on or after April 30, 1981.* If the amount of tax determined to be due by the department is less than the amount paid, the excess to be refunded will accrue interest from the first day of the second calendar month following the date of payment or the date the return was due to be filed or was filed, whichever is the later.

This rule is intended to implement Iowa Code section 422.25.

701—52.12(422) Deduction of credits. The credits against computed tax set forth in Iowa Code sections 422.33 and 422.110 shall be claimed in the following sequence.

1. Franchise tax credit.
2. School tuition organization tax credit.
3. Venture capital tax credit (excluding redeemed Iowa fund of funds tax credit).
4. Endow Iowa tax credit.
5. Film qualified expenditure tax credit.
6. Film investment tax credit.
7. Redevelopment tax credit.
8. From farm to food donation tax credit.
9. Workforce housing tax credit.
10. Investment tax credit.
11. Wind energy production tax credit.
12. Renewable energy tax credit.
13. Redeemed Iowa fund of funds tax credit.
14. New jobs tax credit.
15. Economic development region revolving fund tax credit.
16. Agricultural assets transfer tax credit.

17. Custom farming contract tax credit.
18. Solar energy system tax credit.
19. Charitable conservation contribution tax credit.
20. Alternative minimum tax credit.
21. Historic preservation and cultural and entertainment district tax credit.
22. Corporate tax credit for certain sales tax paid by developer.
23. Ethanol promotion tax credit.
24. Research activities credit.
25. Assistive device tax credit.
26. Motor fuel tax credit.
27. Wage-benefits tax credit.
28. E-85 gasoline promotion tax credit.
29. Biodiesel blended fuel tax credit.
30. E-15 plus gasoline promotion tax credit.
31. Estimated tax and payment with vouchers.

This rule is intended to implement Iowa Code sections 422.33, 422.91 and 422.110. [ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 9876B, IAB 11/30/11, effective 1/4/12; ARC 0398C, IAB 10/17/12, effective 11/21/12; ARC 1303C, IAB 2/5/14, effective 3/12/14; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.13(422) Livestock production credits. For rules relating to the livestock production income tax credit refunds see rule 701—43.8(422).

This rule is intended to implement 1996 Iowa Acts, chapter 1197, sections 19, 20, and 21.

701—52.14(15E) Enterprise zone tax credits. For tax years ending after July 1, 1997, for programs approved after July 1, 1997, but before July 1, 2014, a business which qualifies under the enterprise zone program is eligible to receive tax credits. The enterprise zone program was repealed on July 1, 2014. Any tax credits earned by businesses approved under the enterprise zone program prior to July 1, 2014, remain valid and can be claimed on tax returns filed after July 1, 2014. An eligible business under the enterprise zone program must be approved by the economic development authority and meet the requirements of 2014 Iowa Code section 15E.193. The administrative rules for the enterprise zone program for the economic development authority may be found at 261—Chapter 59.

52.14(1) Supplemental new jobs credit from withholding. An eligible business approved under the enterprise zone program is allowed the supplemental new jobs credit from withholding as provided in 701—subrule 46.9(1).

52.14(2) Investment tax credit. An eligible business approved under the enterprise zone program is allowed an investment tax credit of up to 10 percent of the new investment which is directly related to new jobs created by the location or expansion of the eligible business.

The provisions under the new jobs and income program for the investment tax credit described in rule 701—52.10(15) are applicable to the enterprise zone program with the following exceptions:

- a. The corporate tax credit for certain sales taxes paid by a developer described in subrule 52.10(5) does not apply for the enterprise zone program.
- b. For projects approved on or after July 1, 2005, under the enterprise zone program, the investment tax credit will be amortized over a five-year period, as described in subrule 52.28(2).
- c. For tax years ending on or after July 1, 2005, an eligible business approved under the enterprise zone program whose project primarily involves biotechnology-related processes may elect to receive a refund for all or a portion of an unused investment credit as described in subrule 52.10(4).

52.14(3) Research activities credit. An eligible business approved under the enterprise zone program is eligible for an additional research activities credit as described in subrules 52.7(5) and 52.7(6).

a. *Tax years ending on or after July 1, 2005, but before July 1, 2009.* For eligible businesses approved under the enterprise zone program, research activities allowable for the Iowa research activities credit include expenses related to the development and deployment of innovative renewable energy generation components manufactured or assembled in Iowa; such expenses related to the

development and deployment of innovative renewable energy generation components are not eligible for the federal credit for increasing research activities. For purposes of this subrule, innovative renewable energy generation components do not include components with more than 200 megawatts in installed effective nameplate capacity. The research activities credit related to renewable energy generation components under the enterprise zone program and the high quality job creation program described in subrule 52.28(1) shall not exceed \$1 million in the aggregate.

These expenses related to the development and deployment of innovative renewable energy generation components are applicable only to the additional research activities credit set forth in subrule 52.7(5) for businesses in enterprise zones and the additional research activities credit set forth in subrule 52.28(1) for businesses approved under the high quality job creation program, and are not applicable to the research activities credit set forth in subrule 52.7(3).

b. Tax years ending on or after July 1, 2009. For eligible businesses approved under the enterprise zone program, research activities allowable for the Iowa research activities credit include expenses related to the development and deployment of innovative renewable energy generation components manufactured or assembled in Iowa; such expenses related to the development and deployment of innovative renewable energy generation components are not eligible for the federal credit for increasing research activities.

(1) For purposes of this paragraph, innovative renewable energy generation components do not include components with more than 200 megawatts in installed effective nameplate capacity.

(2) The research activities credit related to renewable energy generation components under the enterprise zone program and the high quality jobs program described in subrule 52.28(1) shall not exceed \$2 million for the fiscal year ending June 30, 2010, and \$1 million for the fiscal year ending June 30, 2011.

(3) These expenses related to the development and deployment of innovative renewable energy generation components are applicable only to the additional research activities credit set forth in subrule 52.7(5) for businesses in enterprise zones and the additional research activities credit set forth in subrule 52.40(1) for businesses approved under the high quality jobs program, and are not applicable to the research activities credit set forth in subrule 52.7(3).

52.14(4) Repayment of incentives. Effective July 1, 2003, eligible businesses in an enterprise zone may be required to repay all or a portion of the tax incentives received on Iowa returns if the eligible business experiences a layoff of employees in Iowa or closes any of its facilities in Iowa. Irrespective of the fact that the statute of limitations to assess the taxpayer for repayment of the tax credits may have expired, the department may proceed to collect the tax incentives forfeited by failure to maintain the requirements of the enterprise zone program because this is a recovery of an incentive, rather than an adjustment to the taxpayer's tax liability. Details on the calculation of the repayment can be found in 261—subrule 187.5(4) of the administrative rules of the economic development authority. If the business is a partnership, limited liability company, S corporation, estate or trust where the income of the taxpayer is taxed to the individual owner(s) of the business, the department may proceed to collect the tax incentives against the partners, members, shareholders or beneficiaries to whom the tax incentives were passed through. See Decision of the Administrative Law Judge in *Damien & Colette Trebilcock, et al.*, Docket No. 11DORF 042-044, June 11, 2012.

This rule is intended to implement 2014 Iowa Code sections 15E.193 and 15E.196.
[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.15(15E) Eligible housing business tax credit. A corporation which qualifies as an eligible housing business may receive a tax credit of up to 10 percent of the new investment which is directly related to the building or rehabilitating of homes in an enterprise zone. The enterprise zone program was repealed on July 1, 2014, and the eligible housing business tax credit has been replaced with the workforce housing tax incentives program. See rule 701—52.46(15) for information on the tax incentives provided under the workforce housing tax incentives program. Any investment tax credit earned by businesses approved under the enterprise zone program prior to July 1, 2014, remains valid

and can be claimed on tax returns filed after July 1, 2014. The tax credit may be taken on the tax return for the tax year in which the home is ready for occupancy.

An eligible housing business is one which meets the criteria in 2014 Iowa Code section 15E.193B.

52.15(1) Computation of tax credit. New investment which is directly related to the building or rehabilitating of homes includes but is not limited to the following costs: land, surveying, architectural services, building permits, inspections, interest on a construction loan, building materials, roofing, plumbing materials, electrical materials, amounts paid to subcontractors for labor and materials provided, concrete, labor, landscaping, appliances normally provided with a new home, heating and cooling equipment, millwork, drywall and drywall materials, nails, bolts, screws, and floor coverings.

New investment does not include the machinery, equipment, hand or power tools necessary to build or rehabilitate homes.

A taxpayer may claim on the taxpayer's corporation income tax return the pro rata share of the Iowa eligible housing business tax credit from a partnership, limited liability company, estate, or trust. The portion of the credit claimed by the taxpayer shall be in the same ratio as the taxpayer's pro rata share of the earnings of the partnership, limited liability company, or estate or trust, except for projects beginning on or after July 1, 2005, which used low-income housing credits authorized under Section 42 of the Internal Revenue Code to assist in the financing of the housing development. For these projects, the partnership, limited liability company or S corporation may designate the amount of the tax credit to be allocated to each partner, member or shareholder.

Any Iowa eligible housing business tax credit in excess of the corporation's tax liability may be carried forward for seven years or until it is used, whichever is the earlier.

If the eligible housing business fails to maintain the requirements of Iowa Code section 15E.193B to be an eligible housing business, the taxpayer may be required to repay all or a part of the tax incentives the business received. Irrespective of the fact that the statute of limitations to assess the taxpayer for repayment of the income tax credit may have expired, the department may proceed to collect the tax incentives forfeited by failure to maintain the requirements of Iowa Code section 15E.193B. This is because it is a recovery of an incentive, rather than an adjustment to the taxpayer's tax liability. Details on the calculation of the repayment can be found in 261—subrule 187.5(4) of the administrative rules of the economic development authority. If the business is a partnership, limited liability company, S corporation, estate or trust where the income of the taxpayer is taxed to the individual owner(s) of the business, the department may proceed to collect the tax incentives against the partners, members, shareholders or beneficiaries to whom the tax incentives were passed through. See Decision of the Administrative Law Judge in *Damien & Colette Trebilcock, et al.*, Docket No. 11DORF 042-044, June 11, 2012.

Prior to January 1, 2001, the tax credit cannot exceed 10 percent of \$120,000 for each home or individual unit in a multiple dwelling unit building. Effective January 1, 2001, the tax credit cannot exceed 10 percent of \$140,000 for each home or individual unit in a multiple dwelling unit building.

Effective for tax periods beginning on or after January 1, 2003, the taxpayer must receive a tax credit certificate from the economic development authority to claim the eligible housing business tax credit. The tax credit certificate shall include the taxpayer's name, the taxpayer's address, the taxpayer's tax identification number, the date the project was completed, the amount of the eligible housing business tax credit and the tax year for which the credit may be claimed. In addition, the tax credit certificate shall include a place for the name and tax identification number of a transferee and the amount of the tax credit being transferred, as provided in subrule 52.15(2). The tax credit certificate must be included with the income tax return for the tax period in which the home is ready for occupancy. The administrative rules for the eligible housing business tax credit for the economic development authority may be found under 261—Chapter 59.

52.15(2) Transfer of the eligible housing business tax credit. For tax periods beginning on or after January 1, 2003, the eligible housing business tax credit certificates may be transferred to any person or entity if low-income housing tax credits authorized under Section 42 of the Internal Revenue Code are used to assist in the financing of the housing development. In addition, the eligible housing business tax credit certificates may be transferred to any person or entity for projects beginning on or after July 1,

2005, if the housing development is located in a brownfield site as defined in Iowa Code section 15.291, or if the housing development is located in a blighted area as defined in Iowa Code section 403.17. No more than \$3 million of tax credits for housing developments located in brownfield sites or blighted areas may be transferred in a calendar year, with no more than \$1.5 million being transferred for any one eligible housing business in a calendar year.

The excess of the \$3 million limitation of tax credits eligible for transfer in the 2013 and 2014 calendar years for housing developments located in brownfield sites or blighted areas cannot be claimed by a transferee prior to January 1, 2016. The eligible housing business must have notified the economic development authority in writing before July 1, 2014, of the business's intent to transfer any tax credits for housing developments located in brownfield sites or blighted areas. If a tax credit certificate is issued by the economic development authority for a housing development approved prior to July 1, 2014, that is located in a brownfield site or blighted area, the tax credit can still be claimed by the eligible business, but the tax credit cannot be transferred by the eligible business if the economic development authority was not notified prior to July 1, 2014.

EXAMPLE 1: A housing development located in a brownfield site was completed in December 2013 and was issued a tax credit certificate totaling \$250,000. The \$3 million calendar cap for transferred tax credits for brownfield sites and blighted areas has already been reached for the 2013 and 2014 tax years. The \$250,000 tax credit is going to be transferred to ABC Company, and the economic development authority was notified of the transfer prior to July 1, 2014. Once a replacement tax credit certificate has been issued, ABC Company cannot file an amended Iowa corporation income tax return for the 2013 tax year until January 1, 2016, to claim the \$250,000 tax credit.

EXAMPLE 2: A housing development located in a blighted area was completed in May 2014 and was issued a tax credit certificate totaling \$150,000. The \$3 million calendar cap for transferred tax credits for brownfield sites and blighted areas has already been reached for the 2014 tax year. The \$150,000 tax credit is going to be transferred to XYZ Company, and the economic development authority was notified of the transfer prior to July 1, 2014. Once a replacement tax credit certificate has been issued, XYZ Company cannot file an amended Iowa corporation income tax return for the 2014 tax year until January 1, 2016, to claim the \$150,000 tax credit.

Within 90 days of transfer of the tax credit certificate for transfers prior to July 1, 2006, the transferee must submit the transferred tax credit certificate to the economic development authority, along with a statement which contains the transferee's name, address and tax identification number and the amount of the tax credit being transferred. For transfers on or after July 1, 2006, the transferee must submit the transferred tax credit certificate to the department of revenue. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee for transfers prior to July 1, 2006, the economic development authority will issue a replacement tax credit certificate to the transferee. For transfers on or after July 1, 2006, the department of revenue will issue the replacement tax credit certificate to the transferee. If the transferee is a partnership, limited liability company or S corporation, the transferee shall provide a list of the partners, members or shareholders and information on how the housing business tax credit should be divided among the partners, members or shareholders. The transferee shall also provide the tax identification numbers and addresses of the partners, members or shareholders. The replacement tax credit certificate must contain the same information that was on the original certificate and must have the same expiration date as the original tax credit certificate.

The transferee may use the amount of the tax credit for any tax period for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

This rule is intended to implement 2014 Iowa Code section 15E.193B.
[ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.16(422) Franchise tax credit. For tax years beginning on or after January 1, 1998, a shareholder in a financial institution as defined in Section 581 of the Internal Revenue Code which

has elected to have its income taxed directly to the shareholders may take a tax credit equal to the shareholder's pro rata share of the Iowa franchise tax paid by the financial institution.

The credit must be computed by recomputing the amount of tax computed under Iowa Code section 422.33 by reducing the shareholder's taxable income by the shareholder's pro rata share of the items of income and expenses of the financial institution and deducting from the recomputed tax the credits allowed by Iowa Code section 422.33. The recomputed tax must be subtracted from the amount of tax computed under Iowa Code section 422.33 reduced by the credits allowed in Iowa Code section 422.33.

The resulting amount, not to exceed the shareholder's pro rata share of the franchise tax paid by the financial institution, is the amount of tax credit allowed the shareholder.

This rule is intended to implement Iowa Code section 422.33, as amended by 1999 Iowa Acts, chapter 95.

701—52.17(422) Assistive device tax credit. Effective for tax years beginning on or after January 1, 2000, a taxpayer who is a small business that purchases, rents, or modifies an assistive device or makes workplace modifications for an individual with a disability who is employed or will be employed by the taxpayer may qualify for an assistive device tax credit, subject to the availability of the credit. The assistive device credit is equal to 50 percent of the first \$5,000 paid during the tax year by the small business for the purchase, rental, or modification of an assistive device or for making workplace modifications. Any credit in excess of the tax liability may be refunded or applied to the taxpayer's tax liability for the following tax year. If the taxpayer elects to take the assistive device tax credit, the taxpayer is not to deduct for Iowa income tax purposes any amount of the cost of the assistive device or workplace modification that is deductible for federal income tax purposes. A small business will not be eligible for the assistive device credit if the device is provided for an owner of the small business unless the owner is a bona fide employee of the small business.

52.17(1) Submitting applications for the credit. A small business wanting to receive the assistive device tax credit must submit an application for the credit to the Iowa department of economic development and provide other information and documents requested by the Iowa department of economic development. If the taxpayer meets the criteria for qualification for the credit, the Iowa department of economic development will issue the taxpayer a certificate of entitlement for the credit. However, the aggregate amount of assistive device tax credits that may be granted by the Iowa department of economic development to all small businesses during a fiscal year cannot exceed \$500,000. The certificate for entitlement of the assistive device credit is to include the taxpayer's name, the taxpayer's address, the taxpayer's tax identification number, the estimated amount of the tax credit, the date on which the taxpayer's application was approved and the date when it is anticipated that the assistive device project will be completed and a space on the application where the taxpayer is to enter the date that the assistive device project was completed. The certificate for entitlement will not be considered to be valid for purposes of claiming the assistive device credit on the taxpayer's Iowa income tax return until the taxpayer has completed the assistive device project and has entered the completion date on the certificate of entitlement form. The tax year of the small business in which the assistive device project is completed is the tax year for which the assistive device credit may be claimed. For example, in a case where taxpayer A received a certificate of entitlement for an assistive device credit on September 15, 2000, and completed the assistive device workplace modification project on January 15, 2001, taxpayer A could claim the assistive device credit on taxpayer A's 2001 Iowa return assuming that taxpayer A is filing returns on a calendar-year basis.

The department of revenue will not allow the assistive device credit on a taxpayer's return if the certificate of entitlement or a legible copy of the certificate is not included with the taxpayer's income tax return. If the taxpayer has been granted a certificate of entitlement and the taxpayer is an S corporation, where the income of the taxpayer is taxed to the individual owner(s) of the business entity, the taxpayer must provide a copy of the certificate to each of the shareholders with a statement showing how the credit is to be allocated among the individual owners of the S corporation. An individual owner is to include a copy of the certificate of entitlement and the statement of allocation of the assistive device credit with the individual's state income tax return.

52.17(2) Definitions. The following definitions are applicable to this subrule:

“Assistive device” means any item, piece of equipment, or product system which is used to increase, maintain, or improve the functional capabilities of an individual with a disability in the workplace or on the job. “Assistive device” does not mean any medical device, surgical device, or organ implanted or transplanted into or attached directly to an individual. “Assistive device” does not include any device for which a certificate of title is issued by the state department of transportation, but does include any item, piece of equipment, or product system otherwise meeting the definition of “assistive device” that is incorporated, attached, or included as a modification in or to such a device issued a certificate of title.

“Business entity” means partnership, limited liability company, S corporation, estate or trust, where the income of the business is taxed to the individual owners of the business, whether the individual owner is a partner, member, shareholder, or beneficiary.

“Disability” means the same as defined in Iowa Code section 15.102. Therefore, “disability” means, with respect to an individual, a physical or mental impairment that substantially limits one or more of the major life activities of the individual, a record of physical or mental impairment that substantially limits one or more of the major life activities of the individual, or being regarded as an individual with a physical or mental impairment that substantially limits one or more of the major life activities of the individual. “Disability” does not include any of the following:

1. Homosexuality or bisexuality;
2. Transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders, or other sexual behavior disorders;
3. Compulsive gambling, kleptomania, or pyromania;
4. Psychoactive substance abuse disorders resulting from current illegal use of drugs;
5. Alcoholism.

“Employee” means an individual who is employed by the small business who meets the criteria in Treasury Regulation § 31.3401(c)-1(b), which is the definition of an employee for federal income tax withholding purposes. An individual who receives self-employment income from the small business is not to be considered to be an employee of the small business for purposes of this rule.

“Small business” means that the business either had gross receipts in the tax year before the current tax year of \$3 million or less or employed not more than 14 full-time employees during the tax year prior to the current tax year.

“Workplace modifications” means physical alterations to the office, factory, or other work environment where the disabled employee is working or is to work.

52.17(3) Allocation of credit to owners of a business entity. If the taxpayer that was entitled to an assistive device credit is a business entity, the business entity is to allocate the allowable credit to each of the individual owners of the entity on the basis of each owner’s pro rata share of the earnings of the entity to the total earnings of the entity. Therefore, if an S corporation has an assistive device credit for a tax year of \$2,500 and one shareholder of the S corporation receives 25 percent of the earnings of the corporation, that shareholder would receive an assistive device credit for the tax year of \$625 or 25 percent of the total assistive device credit of the S corporation.

This rule is intended to implement Iowa Code section 422.33.
[ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.18(404A,422) Historic preservation and cultural and entertainment district tax credit for projects with Part 2 applications approved and tax credits reserved prior to July 1, 2014. A historic preservation and cultural and entertainment district tax credit, subject to the availability of the credit, may be claimed against a taxpayer’s Iowa corporate income tax liability for 25 percent of the qualified costs of rehabilitation of property to the extent the costs were incurred on or after July 1, 2000, for the approved rehabilitation projects of eligible property in Iowa.

The general assembly has mandated that the department of cultural affairs and the department of revenue adopt rules to jointly administer Iowa Code chapter 404A. 2014 Iowa Acts, House File 2453, amended the historic preservation and cultural and entertainment district tax credit program effective July 1, 2014. The department of revenue’s provisions for projects with tax credits reserved prior to

July 1, 2014, are found in this rule. The department of revenue's provisions for projects with agreements entered into on or after July 1, 2014, are found in rule 701—52.47(404A,422). The department of cultural affairs' rules related to this program may be found at 223—Chapter 48. Division I of 223—Chapter 48 applies to projects with reservations approved prior to July 1, 2014. Division II of 223—Chapter 48 applies to projects with agreements entered into on or after July 1, 2014.

Notwithstanding anything contained herein to the contrary, the department of cultural affairs shall not reserve tax credits under 2013 Iowa Code chapter 404A as amended by 2013 Iowa Acts, chapter 112, section 1, for applicants that do not have an approved Part 2 application and a tax credit reservation on or before June 30, 2014. Projects with approved Part 2 applications and provisional tax credit reservations on or before June 30, 2014, shall be governed by 2013 Iowa Code chapter 404A as amended by 2013 Iowa Acts, chapter 112, section 1; by 223—Chapter 48, Division I; and by rule 701—52.18(404A,422). Projects for which Part 2 applications were approved and agreements entered into after June 30, 2014, shall be governed by 2014 Iowa Acts, House File 2453; by 223—Chapter 48, Division II; and by rule 701—52.47(404A,422).

52.18(1) *Eligible property for the historic preservation and cultural and entertainment district tax credit.* The following types of property are eligible for the historic preservation and cultural and entertainment district tax credit:

- a. Property verified as listed on the National Register of Historic Places or eligible for such listing.
- b. Property designated as of historic significance to a district listed in the National Register of Historic Places or eligible for such designation.
- c. Property or district designated a local landmark by a city or county ordinance.
- d. Any barn constructed prior to 1937.

52.18(2) *Application and review process for the historic preservation and cultural and entertainment district tax credit.*

a. Taxpayers who want to claim an income tax credit for completing a historic preservation and cultural and entertainment district project must submit an application for approval of the project. The application forms for the historic preservation and cultural and entertainment district tax credit may be requested from the State Tax Credit Program Manager, State Historic Preservation Office, Department of Cultural Affairs, 600 E. Locust, Des Moines, Iowa 50319-0290. The telephone number for this office is (515)281-4137. Applications for the credit will be accepted by the state historic preservation office on or after July 1, 2000, until such time as all the available credits allocated for each fiscal year are encumbered.

b. Applicants for the historic preservation and cultural and entertainment district tax credit must include all information and documentation requested on the application forms for the credit in order for the applications to be processed.

52.18(3) *Computation of the amount of the historic preservation and cultural and entertainment district tax credit.* The amount of the historic preservation and cultural and entertainment district tax credit is 25 percent of the qualified rehabilitation costs made to eligible property in a project. Qualified rehabilitation costs are those rehabilitation costs approved by the state historic preservation office for a project for a particular taxpayer to the extent those rehabilitation costs are actually expended by that taxpayer.

a. In the case of commercial property, qualified rehabilitation costs must equal at least \$50,000 or 50 percent of the assessed value of the property, excluding the value of the land, prior to rehabilitation, whichever is less. In the case of property other than commercial property, the qualified rehabilitation costs must equal at least \$25,000 or 25 percent of the assessed value, excluding the value of the land, prior to the rehabilitation, whichever amount is less.

b. In computing the tax credit, the only costs which may be included are the qualified rehabilitation costs incurred commencing from the date on which the first qualified rehabilitation cost is incurred and ending with the end of the taxable year in which the property is placed in service. The rehabilitation period may include dates that precede approval of a project, provided that any qualified rehabilitation costs incurred prior to the date of approval of the project must be qualified rehabilitation costs.

c. For purposes of the historic preservation and cultural and entertainment district tax credit, qualified rehabilitation costs include those costs properly included in the basis of the eligible property for income tax purposes. Costs treated as expenses and deducted in the year paid or incurred and amounts that are otherwise not added to the basis of the property for income tax purposes are not qualified rehabilitation costs. Amounts incurred for architectural and engineering fees, site survey fees, legal expenses, insurance premiums, development fees, and other construction-related costs are qualified rehabilitation costs to the extent they are added to the basis of the eligible property for tax purposes. Costs of sidewalks, parking lots, and landscaping do not constitute qualified rehabilitation costs. Any rehabilitation costs used in the computation of the historic preservation and cultural and entertainment district tax credit are not added to the basis of the property for Iowa income tax purposes if the rehabilitation costs were incurred in a tax year beginning on or after January 1, 2000, but prior to January 1, 2001. Any rehabilitation costs incurred in a tax year beginning on or after January 1, 2001, are added to the basis of the rehabilitated property for income tax purposes except those rehabilitation costs that are equal to the amount of the computed historic preservation and cultural and entertainment district tax credit for the tax year.

EXAMPLE: The basis of a commercial building in a historic district was \$500,000, excluding the value of the land, before the rehabilitation project. During a project to rehabilitate this building, \$600,000 in rehabilitation costs were expended to complete the project and \$500,000 of those rehabilitation costs were qualified rehabilitation costs which were eligible for the historic preservation and cultural and entertainment district tax credit of \$125,000. Therefore, the basis of the building for Iowa income tax purposes was \$975,000, since the qualified rehabilitation costs of \$125,000, which are equal to the amount of the historic preservation and cultural and entertainment district tax credit for the tax year, are not added to the basis of the rehabilitated property. The basis of the building for federal income tax purposes was \$1,100,000. It should be noted that this example does not consider any possible reduced basis for the building for federal income tax purposes due to the rehabilitation investment credit provided in Section 47 of the Internal Revenue Code.

52.18(4) *Completion of the historic preservation and cultural and entertainment district project and claiming the historic preservation and cultural and entertainment district tax credit on the Iowa return.* After the taxpayer completes an authorized rehabilitation project, the taxpayer must get a certificate of completion of the project from the state historic preservation office of the department of cultural affairs. After verifying the taxpayer's eligibility for the historic preservation and cultural and entertainment district tax credit, the state historic preservation office shall issue a historic preservation and cultural and entertainment district tax credit certificate, which shall be included with the taxpayer's income tax return for the tax year in which the rehabilitation project is completed or the year the credit was reserved, whichever is later. For example, if a project was completed in 2008 and the credit was reserved for the state fiscal year ending June 30, 2010, the credit can be claimed on the 2009 calendar year return that is due on April 30, 2010. The tax credit certificate is to include the taxpayer's name, the taxpayer's address, the taxpayer's tax identification number, the address or location of the rehabilitation project, the date the project was completed, the year the tax credit was reserved, and the amount of the historic preservation and cultural and entertainment district tax credit. In addition, the tax credit certificate shall include a place for the name and tax identification number of a transferee and the amount of the tax credit being transferred, and any consideration received in exchange for the tax credit, as provided in subrule 52.18(6). In addition, if the taxpayer is a partnership, limited liability company, estate or trust, where the tax credit is allocated to the owners or beneficiaries of the entity, a list of the owners or beneficiaries and the amount of credit allocated to each owner or beneficiary should be provided with the certificate. The tax credit certificate should be included with the income tax return for the period in which the project was completed.

For tax years ending on or after July 1, 2007, any historic preservation and cultural and entertainment district tax credit in excess of the taxpayer's tax liability is fully refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

52.18(5) *Allocation of historic preservation and cultural and entertainment district tax credits to individual owners of the entity for tax credits reserved for fiscal years beginning on or after July 1, 2012.* For tax credits reserved for fiscal years beginning on or after July 1, 2012, the partnership, limited liability company or S corporation may designate the amount of the tax credit to be allocated to each partner, member or shareholder. The credit does not have to be allocated based on the pro rata share of earnings of the partnership, limited liability company or S corporation.

52.18(6) *Transfer of the historic preservation and cultural and entertainment district tax credit.* For tax periods beginning on or after January 1, 2003, the historic preservation and cultural and entertainment district tax credit certificates may be transferred to any person or entity. A tax credit certificate of less than \$1,000 shall not be transferable.

a. For transfers on or after July 1, 2006, the department of revenue will issue the replacement tax credit certificate to the transferee. Within 90 days of the transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department of revenue along with a statement containing the transferee's name, tax identification number and address, the denomination that each replacement tax credit certificate is to carry, the amount of all consideration provided in exchange for the tax credit and the names of recipients of any consideration provided in exchange for the tax credit. If a payment of money was any part of the consideration provided in exchange for the tax credit, the transferee shall list the amount of the payment of money in its statement to the department of revenue. If any part of the consideration provided in exchange for the tax credit included nonmonetary consideration, including but not limited to any promise, representation, performance, discharge of debt or nonmonetary rights or property, the tax credit transferee shall describe the nature of nonmonetary consideration and disclose any value the transferor and transferee assigned to the nonmonetary consideration. The tax credit transferee must indicate on its statement to the department of revenue if no consideration was provided in exchange for the tax credit. If the transferee is a partnership, limited liability company or S corporation, the transferee shall provide a list of the partners, members or shareholders and information on how the historic preservation and cultural and entertainment district tax credit should be divided among the partners, members or shareholders. The transferee shall also provide the tax identification numbers and addresses of the partners, members or shareholders. The replacement tax credit certificate must contain the same information that was on the original certificate and must have the same expiration date as the original tax credit certificate.

b. The transferee may use the amount of the tax credit for any tax period for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

c. If the historic preservation and cultural and entertainment district tax credit of the transferee exceeds the tax liability shown on the transferee's return, the tax credit shall be fully refundable.

This rule is intended to implement Iowa Code chapter 404A as amended by 2013 Iowa Acts, Senate File 436, and Iowa Code section 422.33.

[**ARC 7761B**, IAB 5/6/09, effective 6/10/09; **ARC 8589B**, IAB 3/10/10, effective 4/14/10; **ARC 9104B**, IAB 9/22/10, effective 10/27/10; **ARC 9876B**, IAB 11/30/11, effective 1/4/12; **ARC 0398C**, IAB 10/17/12, effective 11/21/12; **ARC 1138C**, IAB 10/30/13, effective 12/4/13; **ARC 1968C**, IAB 4/15/15, effective 5/20/15]

701—52.19(422) Ethanol blended gasoline tax credit. Effective for tax years beginning on or after January 1, 2002, an ethanol blended gasoline tax credit may be claimed against a taxpayer's corporation income tax liability for retail dealers of gasoline. The taxpayer must operate at least one retail motor fuel site at which more than 60 percent of the total gallons of gasoline sold and dispensed through one or more motor fuel pumps by the taxpayer in the tax year is ethanol blended gasoline. The tax credit shall be calculated separately for each retail motor fuel site operated by the taxpayer. The amount of the credit for each eligible retail motor fuel site is two and one-half cents multiplied by the total number of gallons of ethanol blended gasoline sold and dispensed through all motor fuel pumps located at that retail motor fuel site during the tax year in excess of 60 percent of all gasoline sold and dispensed through motor fuel pumps at that retail motor fuel site during the tax year.

For fiscal years ending in 2002, the tax credit is available for each eligible retail motor fuel site based on the total number of gallons of ethanol blended gasoline sold and dispensed through all motor fuel pumps located at the taxpayer's retail motor fuel site from January 1, 2002, until the end of the taxpayer's fiscal year. Assuming a tax period that began on July 1, 2001, and ended on June 30, 2002, the taxpayer would be eligible for the tax credit based on the gallons of ethanol blended gasoline sold from January 1, 2002, through June 30, 2002. For taxpayers having a fiscal year ending in 2002, a claim for refund to claim the ethanol blended gasoline tax credit must be filed before October 1, 2003, even though the statute of limitations for refund set forth in 701—subrule 55.3(5) has not yet expired.

EXAMPLE: A taxpayer sold 100,000 gallons of gasoline at the taxpayer's retail motor fuel site during the tax year, 70,000 gallons of which was ethanol blended gasoline. The taxpayer is eligible for the credit since more than 60 percent of the total gallons sold was ethanol blended gasoline. The number of gallons in excess of 60 percent of all gasoline sold is 70,000 less 60,000, or 10,000 gallons. Two and one-half cents multiplied by 10,000 equals a \$250 credit available.

The credit may be calculated on Form IA 6478. The credit must be calculated separately for each retail motor fuel site operated by the taxpayer. Therefore, if the taxpayer operates more than one retail motor fuel site, it is possible that one retail motor fuel site may be eligible for the credit while another retail motor fuel site may not. The credit can be taken only for those retail motor fuel sites for which more than 60 percent of gasoline sales involve ethanol blended gasoline.

Any credit in excess of the taxpayer's tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

Starting with the 2006 calendar tax year, a taxpayer may claim the ethanol blended gasoline tax credit even if the taxpayer also claims the E-85 gasoline promotion tax credit provided in rule 701—52.30(422) for the same tax year for the same ethanol gallons.

EXAMPLE: A taxpayer sold 200,000 gallons of gasoline at a retail motor fuel site in 2006, of which 160,000 gallons was ethanol blended gasoline. Of these 160,000 gallons, 1,000 gallons was E-85 gasoline. Taxpayer is entitled to claim the ethanol blended gasoline tax credit of two and one-half cents multiplied by 40,000 gallons, since this constitutes the gallons in excess of 60 percent of the total gasoline gallons sold. Taxpayer may also claim the E-85 gasoline promotion tax credit on the 1,000 gallons of E-85 gasoline sold.

52.19(1) Definitions. The following definitions are applicable to this rule:

"Ethanol blended gasoline" means the same as defined in Iowa Code section 214A.1 as amended by 2006 Iowa Acts, House File 2754, section 3.

"Gasoline" means any liquid product prepared, advertised, offered for sale or sold for use as, or commonly and commercially used as, motor fuel for use in a spark-ignition, internal combustion engine, and which meets the specifications provided in Iowa Code section 214A.2.

"Motor fuel pump" means a pump, meter, or similar commercial weighing and measuring device used to measure and dispense motor fuel for sale on a retail basis.

"Retail dealer" means a person engaged in the business of storing and dispensing motor fuel from a motor fuel pump for sale on a retail basis, regardless of whether the motor fuel pump is located at a retail motor fuel site including a permanent or mobile location.

"Retail motor fuel site" means a geographic location in this state where a retail dealer sells and dispenses motor fuel on a retail basis. For example, tank wagons are considered retail motor fuel sites.

"Sell" means to sell on a retail basis.

52.19(2) Allocation of credit to owners of a business entity. If the taxpayer that was entitled to the ethanol blended gasoline tax credit is a partnership, limited liability company, S corporation, estate, or trust, the business entity shall allocate the allowable credit to each of the individual owners of the entity on the basis of each owner's pro rata share of the earnings of the entity to the total earnings of the entity. Therefore, if a partnership has an ethanol blended gasoline tax credit of \$3,000 and one partner of the partnership receives 25 percent of the earnings of the partnership, that partner would receive an ethanol blended gasoline tax credit for the tax year of \$750 or 25 percent of the total ethanol blended gasoline tax credit of the partnership.

52.19(3) *Repeal of ethanol blended gasoline tax credit.* The ethanol blended gasoline tax credit is repealed on January 1, 2009. However, the tax credit is available for taxpayers whose fiscal year ends after December 31, 2008, for those ethanol gallons sold beginning on the first day of the taxpayer's fiscal year until December 31, 2008. The ethanol promotion tax credit described in rule 701—52.36(422) is available beginning January 1, 2009, for retail dealers of gasoline.

EXAMPLE: A taxpayer who is a retail dealer of gasoline has a fiscal year end of April 30, 2009. The taxpayer sold 150,000 gallons of gasoline from May 1, 2008, through December 31, 2008, at the taxpayer's retail motor fuel site, of which 110,000 gallons was ethanol blended gasoline. The number of gallons in excess of 60 percent of all gasoline sold is 110,000 less 90,000, or 20,000 gallons. The taxpayer may claim the ethanol blended gasoline tax credit for the fiscal year ending April 30, 2009, in the amount of \$500, or 20,000 gallons times two and one-half cents.

This rule is intended to implement Iowa Code section 422.33 as amended by 2006 Iowa Acts, House File 2754.

701—52.20(15E) Eligible development business investment tax credit. Effective for tax years beginning on or after January 1, 2001, a business which qualifies as an eligible development business may receive a tax credit of up to 10 percent of the new investment which is directly related to the construction, expansion or rehabilitation of building space to be used for manufacturing, processing, cold storage, distribution, or office facilities.

An eligible development business must be approved by the Iowa department of economic development prior to March 17, 2004, and meet the qualifications of Iowa Code section 15E.193C. Effective March 17, 2004, the eligible development business program is repealed.

New investment includes the purchase price of land and the cost of improvements made to real property. The tax credit may be claimed by an eligible development business in the tax year in which the construction, expansion or rehabilitation is completed.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following seven years or until used, whichever is the earlier.

If the business is a partnership, S corporation, limited liability company, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

If the eligible development business fails to meet and maintain any one of the requirements to be an eligible business, the business shall be subject to repayment of all or a portion of the amount of tax incentives received. For example, if within five years of project completion the development business sells or leases any space to any retail business, the development business shall proportionally repay the value of the investment credit. The proportion of the investment credit that would be due for repayment by an eligible development business for selling or leasing space to a retail business would be determined by dividing the square footage of building space occupied by the retail business by the square footage of the total building space.

An eligible business, which is not a development business, which operates in an enterprise zone cannot claim an investment tax credit if the property is owned, or was previously owned, by an approved development business that has already received an investment tax credit. An eligible business, which is not a development business, can claim an investment tax credit only on additional, new improvements made to real property that was not included in the development business's approved application for the investment tax credit.

This rule is intended to implement Iowa Code section 15E.193C.

701—52.21(15E,422) Venture capital credits.

52.21(1) *Investment tax credit for an equity investment in a community-based seed capital fund or qualifying business.* See rule 123—2.1(15E) for the discussion of the investment tax credit for an equity investment in a community-based seed capital fund or an equity investment made on or after January 1, 2004, in a qualifying business, along with the issuance of tax credit certificates by the Iowa capital

investment board, for equity investments made before January 1, 2011. For equity investments made on or after January 1, 2011, see 261—Chapter 115 for information regarding eligibility for qualifying businesses and community-based seed capital funds, applications for the investment tax credit for equity investments in a qualifying business or community-based seed capital fund, and the issuance of tax credit certificates by the economic development authority.

The department of revenue will be notified by the Iowa capital investment board or the economic development authority when the tax credit certificates are issued. The credit is equal to 20 percent of the taxpayer's equity investment in a qualifying business or community-based seed capital fund. An investment shall be deemed to have been made on the same date as the date of acquisition of the equity interest as determined by the Internal Revenue Code. For investments made prior to January 1, 2014, a taxpayer shall not claim the tax credit prior to the third tax year following the tax year in which the investment is made. For investments made in qualifying businesses on or after January 1, 2014, the credit can be claimed in the year of the investment, but these investments cannot be redeemed prior to January 1, 2016. For example, if a corporation taxpayer whose tax year ends on December 31, 2012, makes an equity investment during the 2012 calendar year, the corporation taxpayer cannot claim the tax credit until the tax year ending December 31, 2015. For fiscal years beginning July 1, 2011, the amount of tax credits authorized cannot exceed \$2 million. The tax credit certificate must be included with the taxpayer's return for the tax year in which the credit may be redeemed as stated on the tax credit certificate.

If a tax credit is carried over and issued for the tax year immediately following the year in which the investment was made because the \$2 million cap has been reached, the tax credit may be claimed by the taxpayer for the third tax year following the tax year for which the credit is issued. For example, if a corporation taxpayer whose tax year ends on December 31, 2012, makes an equity investment in December 2012 and the \$2 million cap for the fiscal year ending June 30, 2013, had already been reached, the tax credit will be issued for the tax year ending December 31, 2013, and cannot be redeemed until the tax year ending December 31, 2016.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier. The tax credit cannot be carried back to a tax year prior to the tax year in which the taxpayer claims the tax credit. The tax credit is not transferable to any other taxpayer.

For equity investments made in a community-based seed capital fund and equity investments made on or after January 1, 2004, in a qualifying business, an individual may claim the credit if the investment was made by a partnership, S corporation, limited liability company, or an estate or trust electing to have the income directly taxed to the individual. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

52.21(2) *Investment tax credit for an equity investment in a venture capital fund.* See rule 123—3.1(15E) for the discussion of the investment tax credit for an equity investment in a venture capital fund, along with the issuance of tax credit certificates by the Iowa capital investment board. This credit is repealed for investments in venture capital funds made after July 1, 2010.

The department of revenue will be notified by the Iowa capital investment board when the tax credit certificates are issued. The tax credit certificate must be attached to the taxpayer's return for the tax year in which the credit may be redeemed as stated on the tax credit certificate.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier.

For equity investments made in a venture capital fund, an individual may claim the credit if the investment was made by a partnership, S corporation, limited liability company, or an estate or trust electing to have the income directly taxed to the individual. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

52.21(3) *Contingent tax credit for investments in Iowa fund of funds.* See rule 123—4.1(15E) for the discussion of the contingent tax credit available for investments made in the Iowa fund of funds

organized by the Iowa capital investment corporation. Tax credit certificates related to the contingent tax credits will be issued by the Iowa capital investment board.

The department of revenue will be notified by the Iowa capital investment board when these tax credit certificates are issued and, if applicable, when they are redeemed. If the tax credit certificate is redeemed, the certificate must be attached to the taxpayer's return for the tax year in which the credit may be redeemed as stated on the tax credit certificate.

If the tax credit certificate is redeemed, any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following seven years or until used, whichever is the earlier.

If the tax credit certificate is redeemed, an individual may claim the credit if the investment was made by a partnership, S corporation, limited liability company, or an estate or trust electing to have the income directly taxed to the individual. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

52.21(4) Innovation fund investment tax credit. See 261—Chapter 116 for information regarding eligibility for an innovation fund, applications for the investment tax credit for investments in an innovation fund, and the issuance of tax credit certificates by the economic development authority.

The department of revenue will be notified by the economic development authority when the tax credit certificates are issued. The credit is equal to 20 percent of the taxpayer's equity investment in the form of cash in an innovation fund for tax years beginning and investments made on or after January 1, 2011, and before January 1, 2013. For tax years beginning and investments made on or after January 1, 2013, the taxpayer may claim a tax credit equal to 25 percent of the taxpayer's equity investment in the form of cash in an innovation fund. An investment shall be deemed to have been made on the same date as the date of acquisition of the equity interest as determined by the Internal Revenue Code. A taxpayer shall claim the tax credit for the tax year in which the investment is made. For fiscal years beginning July 1, 2011, the amount of tax credits authorized cannot exceed \$8 million. No tax credit certificates will be issued prior to September 1, 2014. The tax credit certificate must be attached to the taxpayer's return for the tax year in which the investment was made as stated on the tax credit certificate.

If a tax credit is carried over and issued for the tax year immediately following the year in which the investment was made because the \$8 million cap has been reached, the tax credit may be claimed by the taxpayer for the tax year following the tax year for which the credit is issued. For example, if a corporation taxpayer whose tax year ending on December 31, 2013, makes an equity investment in December 2013 and the \$8 million cap for the fiscal year ending June 30, 2014, had already been reached, the tax credit will be issued for the tax year ending December 31, 2014, and can be redeemed for the tax year ending December 31, 2014.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until depleted, whichever is the earlier. The tax credit cannot be carried back to a tax year prior to the tax year in which the taxpayer claims the tax credit.

The innovation fund tax credit certificate may be transferred once to any person or entity.

Within 90 days of transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department, along with a statement which contains the transferee's name, address and tax identification number and the amount of the tax credit being transferred. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee, the department will issue a replacement tax credit certificate to the transferee. If the transferee is a partnership, limited liability company, S corporation, or estate or trust claiming the credit for individual or corporation income tax, the transferee shall provide a list of the partners, members, shareholders or beneficiaries and information on how the innovation fund tax credit should be divided among the partners, members, shareholders or beneficiaries. The transferee shall also provide the tax identification numbers and addresses of the partners, members, shareholders or beneficiaries. The replacement tax credit certificate must contain the same information as that on the original tax credit certificate and must have the same effective taxable year and the same expiration date as the original tax credit certificate. The replacement tax credit certificate may reflect a different tax type than the original tax credit certificate.

The transferee may use the amount of the tax credit for any tax year for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit certificate shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit certificate shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

For equity investments made in an innovation fund, an individual may claim the credit if the investment was made by a partnership, S corporation, limited liability company, or an estate or trust electing to have the income directly taxed to the individual. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

This rule is intended to implement Iowa Code sections 15E.42, 15E.52, 15E.66 and 422.33 and section 15E.43 as amended by 2014 Iowa Acts, Senate File 2359.

[ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 9966B, IAB 1/11/12, effective 2/15/12; ARC 1102C, IAB 10/16/13, effective 11/20/13; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—52.22(15) New capital investment program tax credits. Effective for tax periods beginning on or after January 1, 2003, a business which qualifies under the new capital investment program is eligible to receive tax credits. An eligible business under the new capital investment program must be approved by the Iowa department of economic development and meet the qualifications of 2003 Iowa Acts, chapter 125, section 4. The new capital investment program was repealed on July 1, 2005, and has been replaced with the high quality job creation program. See rule 701—52.28(15) for information on the tax credits available under the high quality job creation program. Any tax credits earned by businesses approved under the new capital investment program prior to July 1, 2005, remain valid, and can be claimed on tax returns filed after July 1, 2005.

52.22(1) Research activities credit. A business approved under the new capital investment program is eligible for an additional research activities credit as described in subrule 52.7(5). This credit for increasing research activities is in lieu of the research activities credit described in subrule 52.7(3).

52.22(2) Investment tax credit.

a. General rule. An eligible business can claim an investment tax credit equal to a percentage of the new investment directly related to new jobs created by the location or expansion of an eligible business. The percentage is equal to the amount provided in paragraph "b." New investment directly related to new jobs created by the location or expansion of an eligible business includes the following:

(1) The cost of machinery and equipment, as defined in Iowa Code section 427A.1(1), paragraphs "e" and "j," purchased for use in the operation of the eligible business. The purchase price shall be depreciated in accordance with generally accepted accounting principles.

(2) The purchase price of real property and any buildings and structures located on the real property.

(3) The cost of improvements made to real property which is used in the operation of the eligible business.

For eligible businesses approved by the Iowa department of economic development on or after March 17, 2004, certain lease payments made by eligible businesses to a third-party developer will be considered to be new investment for purposes of computing the investment tax credit. The eligible business shall enter into a lease agreement with the third-party developer for a minimum of five years. The investment tax credit is based on the annual base rent paid to a third-party developer by the eligible business for a period not to exceed ten years. The total costs of the annual base rent payments for the ten-year period cannot exceed the cost of the land and the third-party developer's cost to build or renovate the building used by the eligible business. The annual base rent is defined as the total lease payment less taxes, insurance and operating and maintenance expenses.

Any credit in excess of the tax liability for the tax period may be carried forward seven years or until used, whichever is the earlier.

If the business is a partnership, S corporation, limited liability company, cooperative organized under Iowa Code chapter 501 and filing as a partnership for federal tax purposes, or estate or trust electing to have the income taxed directly to an individual, an individual may claim the credit. The amount of

the credit claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, cooperative organized under Iowa Code chapter 501 and filing as a partnership for federal tax purposes, or estate or trust.

b. Tax credit percentage. The amount of tax credit claimed shall be based on the number of high-quality jobs created as determined by the Iowa department of economic development:

(1) If no high-quality jobs are created but economic activity within Iowa is advanced, the eligible business may claim a tax credit of up to 1 percent of the new investment.

(2) If 1 to 5 high-quality jobs are created, the eligible business may claim a tax credit of up to 2 percent of the new investment.

(3) If 6 to 10 high-quality jobs are created, the eligible business may claim a tax credit of up to 3 percent of the new investment.

(4) If 11 to 15 high-quality jobs are created, the eligible business may claim a tax credit of up to 4 percent of the new investment.

(5) If 16 or more high-quality jobs are created, the eligible business may claim a tax credit of up to 5 percent of the new investment.

c. Investment tax credit—value-added agricultural products or biotechnology-related processes. An eligible business whose project primarily involves the production of value-added agricultural products or uses biotechnology-related processes may elect to receive a refund for all or a portion of an unused investment tax credit. An eligible business includes a cooperative described in Section 521 of the Internal Revenue Code whose project primarily involves the production of ethanol.

Eligible businesses that elect to receive a refund shall apply to the Iowa department of economic development for tax credit certificates between May 1 and May 15 of each fiscal year through the fiscal year ending June 30, 2009. The election to receive a refund of all or a portion of an unused investment tax credit is no longer available beginning with the fiscal year ending June 30, 2010. Only those businesses that have completed projects before the May 1 filing date may apply for a tax credit certificate. The Iowa department of economic development shall not issue tax credit certificates for more than \$4 million during a fiscal year to eligible businesses for this program and eligible businesses described in subrule 52.10(4). If applications are received for more than \$4 million, the applicants shall receive certificates for a prorated amount.

The economic development authority shall issue tax credit certificates within a reasonable period of time. Tax credit certificates are valid for the tax year following project completion. The tax credit certificate must be included with the tax return for the tax year during which the tax credit is claimed. The tax credit certificate shall not be transferred, except for a cooperative described in Section 521 of the Internal Revenue Code whose project primarily involves the production of ethanol, as provided in subrule 52.10(4). For value-added agricultural projects involving ethanol, the cooperative must submit a list of its members and the share of each member's interest in the cooperative. The economic development authority shall issue a tax credit certificate to each member on the list.

d. Repayment of benefits. If an eligible business fails to maintain the requirements of the new capital investment program, the taxpayer may be required to repay all or a portion of the tax incentives taken on Iowa returns. Irrespective of the fact that the statute of limitations to assess the taxpayer for repayment of the tax credits may have expired, the department may proceed to collect the tax incentives forfeited by failure of the taxpayer to maintain the requirements of the new capital investment program. This is because it is a recovery of an incentive, rather than an adjustment to the taxpayer's tax liability. Details on the calculation of the repayment can be found in 261—subrule 187.5(4) of the administrative rules of the economic development authority. If the business is a partnership, limited liability company, S corporation, estate or trust where the income of the taxpayer is taxed to the individual owner(s) of the business, the department may proceed to collect the tax incentives against the partners, members, shareholders or beneficiaries to whom the tax incentives were passed through. See Decision of the Administrative Law Judge in *Damien & Colette Trebilcock, et al.*, Docket No. 11DORF 042-044, June 11, 2012.

An eligible business in the new capital investment program may also be required to repay all or a portion of the tax incentives received on Iowa returns if the eligible business experiences a layoff of employees in Iowa or closes any of its facilities in Iowa.

If, within five years of purchase, the eligible business sells, disposes of, razes, or otherwise renders unusable all or a part of the land, buildings, or other existing structures for which a tax credit was claimed under this subrule, the income tax liability of the eligible business shall be increased by one of the following amounts:

(1) One hundred percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within one full year after being placed in service.

(2) Eighty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within two full years after being placed in service.

(3) Sixty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within three full years after being placed in service.

(4) Forty percent of the tax credit claimed if the property ceases to be eligible for the tax credit within four full years after being placed in service.

(5) Twenty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within five full years after being placed in service.

52.22(3) Corporate tax credit—certain sales taxes paid by developer. For eligible businesses approved by the Iowa department of economic development on or after March 17, 2004, the eligible business may claim a corporate tax credit for certain sales taxes paid by a third-party developer.

a. Sales taxes eligible for the credit. The sales taxes paid by the third-party developer which are eligible for this credit include the following:

(1) Iowa sales and use tax for gas, electricity, water, or sewer utility services, goods, wares, or merchandise, or on services rendered to, furnished to or performed for a contractor or subcontractor and used in the fulfillment of a written contract relating to the construction or equipping of a facility within the economic development area.

(2) Iowa sales and use tax paid for racks, shelving, and conveyor equipment to be used in a warehouse or distribution center within the economic development area.

Any Iowa sales and use tax paid relating to intangible property, furniture and other furnishings is not eligible for the corporate tax credit.

b. How to claim the credit. The third-party developer must provide to the Iowa department of economic development the amount of Iowa sales and use tax paid as described in paragraph “a.” The amount of Iowa sales and use tax attributable to racks, shelving, and conveyor equipment must be identified separately.

The Iowa department of economic development will issue a tax credit certificate to the eligible business equal to the Iowa sales and use tax paid by the third-party developer for gas, electricity, water, or sewer utility services, goods, wares, or merchandise, or on services rendered to, furnished to or performed for a contractor or subcontractor and used in the fulfillment of a written contract relating to the construction or equipping of a facility. In addition, the Iowa department of economic development will also issue a separate tax credit certificate to the eligible business equal to the Iowa sales and use tax paid by the third-party developer for racks, shelving, and conveyor equipment to be used in a warehouse or distribution center.

The tax credit certificate shall contain the name, address, and tax identification number of the eligible business, along with the amount of the tax credit and the year in which the tax credit can be claimed. The tax credit certificate must be attached to the taxpayer’s income tax return for the tax year for which the tax credit is claimed. Any tax credit in excess of the taxpayer’s tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following seven years or until it is used, whichever is the earlier.

For the tax credit certificate relating to Iowa sales and use tax paid by the third-party developer for racks, shelving, and conveyor equipment, the aggregate amount of tax credit certificates and tax refunds for Iowa sales and use tax paid for racks, shelving, and conveyor equipment to eligible businesses under the new jobs and income program, enterprise zone program and new capital investment program cannot

exceed \$500,000 in a fiscal year. The requests for tax credit certificates or refunds will be processed in the order they are received on a first-come, first-served basis until the amount of credits authorized for issuance has been exhausted. If applications for tax credit certificates or refunds exceed the \$500,000 limitation for any fiscal year, the applications shall be considered in succeeding fiscal years.

This rule is intended to implement Iowa Code sections 15.331C, 15.333 as amended by 2010 Iowa Acts, Senate File 2380, and 15.381 to 15.387.

[ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.23(15E,422) Endow Iowa tax credit. Effective for tax years beginning on or after January 1, 2003, a taxpayer who makes an endowment gift to an endow Iowa qualified community foundation may qualify for an endow Iowa tax credit, subject to the availability of the credit. For tax years beginning on or after January 1, 2003, but before January 1, 2010, the credit is equal to 20 percent of a taxpayer's endowment gift to an endow Iowa qualified community foundation approved by the Iowa department of economic development. For tax years beginning on or after January 1, 2010, the credit is equal to 25 percent of a taxpayer's endowment gift to an endow Iowa qualified community foundation approved by the Iowa department of economic development. For tax years beginning on or after January 1, 2010, a taxpayer cannot claim a deduction for charitable contributions under Section 170 of the Internal Revenue Code for the amount of the contribution for which the tax credit is claimed for Iowa tax purposes. The administrative rules for the endow Iowa tax credit for the Iowa department of economic development may be found under 261—Chapter 47.

The total amount of endow Iowa tax credits available is \$2 million in the aggregate for the 2003 and 2004 calendar years. The total amount of endow Iowa tax credits is \$2 million annually for the 2005-2007 calendar years, and \$200,000 of these tax credits on an annual basis is reserved for endowment gifts of \$30,000 or less. The maximum amount of tax credit granted to a single taxpayer shall not exceed \$100,000 for the 2003-2007 calendar years. The total amount of endow Iowa tax credits annually for the 2008 and 2009 calendar years is \$2 million plus a percentage of the tax imposed on the adjusted gross receipts from gambling games in accordance with Iowa Code section 99F.11(3). The total amount of endow Iowa tax credits annually for 2010 is \$2.7 million plus a percentage of the tax imposed on the adjusted gross receipts from gambling games in accordance with Iowa Code section 99F.11(3). The total amount of endow Iowa tax credits annually for 2011 is \$3.5 million plus a percentage of the tax imposed on the adjusted gross receipts from gambling games in accordance with Iowa Code section 99F.11(3). The maximum amount of tax credit granted to a single taxpayer shall not exceed 5 percent of the total endow Iowa tax credit amount authorized for 2008 and subsequent years. For calendar year 2012 and subsequent calendar years, the total amount of endow Iowa tax credits is \$6 million; the maximum amount of tax credit authorized to a single taxpayer is \$300,000 (\$6 million multiplied by 5 percent). The endow Iowa tax credit cannot be transferred to any other taxpayer.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier.

If a taxpayer is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement Iowa Code section 15E.305 as amended by 2013 Iowa Acts, House File 620, and Iowa Code section 422.33.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 9876B, IAB 11/30/11, effective 1/4/12; ARC 0398C, IAB 10/17/12, effective 11/21/12; ARC 1138C, IAB 10/30/13, effective 12/4/13]

701—52.24(422) Soy-based cutting tool oil tax credit. Effective for tax periods ending after June 30, 2005, and beginning before January 1, 2007, a manufacturer may claim a soy-based cutting tool oil tax credit. A manufacturer, as defined in Iowa Code section 428.20, may claim the credit equal to the costs incurred during the tax year for the purchase and replacement costs relating to the transition from using nonsoy-based cutting tool oil to using soy-based cutting tool oil.

All of the following conditions must be met to qualify for the tax credit.

1. The costs must be incurred after June 30, 2005, and before January 1, 2007.
2. The costs must be incurred in the first 12 months of the transition from using nonsoy-based cutting tool oil to using soy-based cutting tool oil.
3. The soy-based cutting tool oil must contain at least 51 percent soy-based products.
4. The costs of the purchase and replacement must not exceed \$2 per gallon of soy-based cutting tool oil used in the transition.
5. The number of gallons used in the transition cannot exceed 2,000 gallons.
6. The manufacturer shall not deduct for Iowa income tax purposes the costs incurred in the transition to using soy-based cutting tool oil which are deductible for federal tax purposes.

Any credit in excess of the taxpayer's tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

If a taxpayer is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to an individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement Iowa Code section 422.33 as amended by 2005 Iowa Acts, Senate File 389.

701—52.25(15I,422) Wage-benefits tax credit. Effective for tax years ending on or after June 9, 2006, a wage-benefits tax credit equal to a percentage of the annual wages and benefits paid for a qualified new job created by the location or expansion of the business in Iowa is available for qualified businesses.

52.25(1) Definitions. The following definitions are applicable to this rule:

"Average county wage" means the annualized average hourly wage calculated by the Iowa department of economic development using the most current four quarters of wage and employment information as provided in the Quarterly Covered Wage and Employment Data report provided by the department of workforce development. Agricultural/mining and governmental employment categories are deleted in compiling the wage information.

"Benefits" means all of the following:

1. Medical and dental insurance plans.
2. Pension and profit-sharing plans.
3. Child care services.
4. Life insurance coverage.
5. Vision insurance plan.
6. Disability coverage.

"Department" means the Iowa department of revenue.

"Full-time" means the equivalent of employment of one person:

1. For 8 hours per day for a 5-day, 40-hour workweek for 52 weeks per year, including paid holidays, vacations, and other paid leave, or
2. The number of hours or days per week, including paid holidays, vacations, and other paid leave, currently established by schedule, custom or otherwise, as constituting a week of full-time work for the kind of service an individual performs for an employing unit.

"Grow Iowa values fund" means the grow Iowa values fund created in Iowa Code Supplement section 15G.108.

"Nonqualified new job" means any one of the following:

1. A job previously filled by the same employee in Iowa.
2. A job that was relocated from another location in Iowa.
3. A job that is created as a result of a consolidation, merger, or restructuring of a business entity if the job does not represent a new job in Iowa.

"Qualified new job" or *"job creation"* means a job that meets all of the following criteria:

1. Is a new full-time job that has not existed in the business within the previous 12 months in Iowa.
2. Is filled by a new employee for at least 12 months.
3. Is filled by a resident of the state of Iowa.

4. Is not created as a result of a change in ownership.
5. Was created on or after June 9, 2005.

“Retail business” means a business which sells its product directly to a consumer.

“Retained qualified new job” or “job retention” means the continued employment, after the first 12 months of employment, of the same employee in a qualified new job for another 12 months.

“Service business” means a business which is not engaged in the sale of tangible personal property, and which provides services to a local consumer market and does not have a significant proportion of its sales coming from outside the state.

52.25(2) Calculation of credit. A business which is not a retail or service business may claim the wage-benefits tax credit which is determined as follows:

- a. If the annual wages and benefits for the qualified new job equal less than 130 percent of the average county wage, the credit is 0 percent of the annual wage and benefits paid.
- b. If the annual wages and benefits for the qualified new job equal at least 130 percent but less than 160 percent of the average county wage, the credit is 5 percent of the annual wage and benefits paid for each qualified new job.
- c. If the annual wages and benefits for the qualified new job equal at least 160 percent of the average county wage, the credit is 10 percent of the annual wage and benefits paid for each qualified new job.

If the business is a partnership, S corporation, limited liability company, or estate or trust electing to have the income taxed directly to the individual, an individual may claim the tax credit. The amount claimed by the individual shall be based upon the pro rata share of the individual’s earnings of the partnership, S corporation, limited liability company, or estate or trust.

Any credit in excess of the taxpayer’s tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

52.25(3) Application for the tax credit, tax credit certificate and amount of tax credit available.

a. In order to claim the wage-benefits tax credit, the business must submit an application to the department along with information on the qualified new job or retained qualified new job. The application cannot be submitted until the end of the twelfth month after the qualified job was filled. For example, if the new job was created on June 9, 2005, the application cannot be submitted until June 9, 2006. The following information must be submitted in the application:

- (1) Name, address and federal identification number of the business.
- (2) A description of the activities of the business. If applicable, the proportion of the sales of the business which come from outside Iowa should be included.
- (3) The amount of wages and benefits paid to each employee for each new job for the previous 12 months.
- (4) A computation of the amount of credit being requested.
- (5) The address and state of residence of each new employee.
- (6) The date that the qualified new job was filled.
- (7) An indication of whether the job is a qualified new job or a retained qualified new job for which an application was filed for a previous year.
- (8) The type of tax for which the credit will be applied.
- (9) If the business is a partnership, S corporation, limited liability company, or estate or trust, a schedule of the partners, shareholders, members or beneficiaries. This schedule shall include the names, addresses and federal identification number of the partners, shareholders, members or beneficiaries, along with their percentage of the pro rata share of earnings of the partnership, S corporation, limited liability company, or estate or trust.

b. Upon receipt of the application, the department has 45 days either to approve or disapprove the application. If the department does not act on the application within 45 days, the application is deemed to be approved. If the department disapproves the application, the business may appeal the decision to the Iowa economic development board within 30 days of the notice of disapproval.

c. If the application is approved, or if the Iowa economic development board approves the application that was previously denied by the department, a tax credit certificate will be issued by the

department to the business, subject to the availability of the amount of credits that may be issued. The tax credit certificate will contain the name, address and tax identification number of the business (or individual, estate or trust, if applicable), the date of the qualified new job(s), the wage and benefits paid for each job(s) for the 12-month period, the amount of the credit, the tax period for which the credit may be applied, and the type of tax for which the credit will be applied.

d. The tax credit certificates that are issued in a fiscal year cannot exceed \$10 million for the fiscal year ending June 30, 2007, and shall not exceed \$4 million for the fiscal years ending June 30, 2008, through June 30, 2011. The tax credit certificates are issued on a first-come, first-served basis. Therefore, if tax credit certificates have already been issued for the \$10 million limit for the fiscal year ending June 30, 2007, any applications for tax credit certificates received after the \$10 million limit has been reached will be denied. Similarly, if tax credit certificates have already been issued for the \$4 million limit for the fiscal years ending June 30, 2008, through June 30, 2011, any applications for tax credit certificates received after the \$4 million limit has been reached will be denied. If a business failed to receive all or a part of the tax credit due to the \$10 million or \$4 million limitation, the business may reapply for the tax credit for the retained new job for a subsequent tax period.

e. A business which qualifies for the tax credit for the fiscal year ending June 30, 2007, is eligible to receive the tax credit certificate for each of the fiscal years ending June 30, 2008, through June 30, 2011, subject to the \$4 million limit for tax credits for the fiscal years ending June 30, 2008, through June 30, 2011, if the business retains the qualified new job during each of the fiscal years ending June 30, 2008, through June 30, 2011. The business must reapply by June 30 of each fiscal year for the tax credit, and the percentage of the wages and benefits allowed for the credit set forth in subrule 52.25(2) for the first year is applicable for each subsequent period. Preference will be given in issuing tax credit certificates for those businesses that retain qualified new jobs, and preference will be given in the order in which applications were filed for the fiscal year ending June 30, 2007. Therefore, those businesses which received the first \$4 million of tax credits for the year ending June 30, 2007, in which the qualified jobs were created will automatically receive a tax credit for the fiscal years ending June 30, 2008, through June 30, 2011, as long as the qualified jobs are retained and an application is completed.

f. For the fiscal years ending June 30, 2008, through June 30, 2011, if credits become available because the jobs were not retained by businesses which received the first \$4 million of credits for the year ending June 30, 2007, an application which was originally denied will be considered in the order in which the application was received for the fiscal year ending June 30, 2007.

EXAMPLE: Wage-benefits tax credits of \$4 million were issued for the fiscal year ending June 30, 2007, relating to applications filed between July 1, 2006, and March 31, 2007. For the next fiscal year ending June 30, 2008, the same businesses that received the \$4 million in wage-benefits tax credits filed applications totaling \$3 million for the retained jobs for which the application for the prior year was filed on or before March 31, 2007. The first \$3 million of the available \$4 million will be allowed to these same businesses. The remaining \$1 million that is still available for the year ending June 30, 2008, will be allowed for those retained jobs for which applications for the prior year were filed starting on April 1, 2007, until the remaining \$1 million in tax credits is issued.

g. A business may apply in writing to the Iowa economic development board for a waiver of the average wage and benefit requirement. See 261—subrule 68.3(2) for more detail on the procedures to apply for a waiver of the wage and benefit requirement. If a waiver is granted, the business must provide the department with the waiver and it must be attached to the application.

h. A business may receive other federal, state, and local incentives and tax credits in addition to the wage-benefits tax credit. However, a business that receives a wage-benefits tax credit cannot receive tax incentives under the high quality job creation program set forth in Iowa Code chapter 15 as amended by 2005 Iowa Acts, chapter 150, or moneys from the grow Iowa values fund.

52.25(4) Examples. The following noninclusive examples illustrate how this rule applies:

EXAMPLE 1: Business A operates a grocery store and hires five new employees, each of whom will earn wages and benefits in excess of 130 percent of the average county wage. Business A would not qualify for the wage-benefits tax credit because Business A is a retail business.

EXAMPLE 2: Business B operates an accounting firm and hires two new accountants, each of whom will earn wages and benefits in excess of 160 percent of the average county wage. The accounting firm provides services to clients wholly within Iowa. Business B would not qualify for the wage-benefits tax credit because it is a service business. The majority of its sales are generated from within the state of Iowa and thus Business B, because it is a service business, is not eligible for the credit.

EXAMPLE 3: Business C operates a software development business and hires two new programmers, each of whom will earn wages and benefits in excess of 160 percent of the average county wage. Over 50 percent of the customers of Business C are located outside Iowa. Business C would qualify for the wage-benefits tax credit because a majority of its sales are coming from outside the state, even though Business C is engaged in the performance of services.

EXAMPLE 4: Business D is a manufacturer that hires a new employee in Clayton County, Iowa, on July 8, 2005. The average county wage for Clayton County for the third quarter of 2005 is \$11.86 per hour. If the average county wage per hour for Clayton County is \$11.95 for the fourth quarter of 2005, \$12.05 for the first quarter of 2006, and \$12.14 for the second quarter of 2006, the annualized average county wage for this 12-month period is \$12.00 per hour. This wage equates to an average annual wage of \$24,960 ($\$12.00 \times 40 \text{ hours} \times 52 \text{ weeks}$). In order to qualify for the 5 percent wage-benefits tax credit, the new employee must receive wages and benefits totaling \$32,448 (130 percent of \$24,960) for the 12-month period from July 8, 2005, through July 7, 2006. In order to qualify for the 10 percent wage-benefits tax credit, the new employee must receive wages and benefits totaling \$39,936 (160 percent of \$24,960) for the 12-month period from July 8, 2005, through July 7, 2006.

EXAMPLE 5: Business E is a manufacturer that hires three new employees in Grundy County, Iowa, on July 1, 2005. If the average county wage for the 12-month period from July 1, 2005, through June 30, 2006, is \$13.75 per hour in Grundy County, this wage equates to an average county wage of \$28,600. The wages and benefits for each of these three new employees is \$40,000 for the period from July 1, 2005, through June 30, 2006, which is 140 percent of the average county wage. Business E is entitled to a wage-benefits tax credit of \$2,000 for each employee ($\$40,000 \times 5 \text{ percent}$), for a total wage-benefits tax credit of \$6,000. If Business E files on a calendar-year basis, the \$6,000 wage-benefits tax credit can be claimed on the tax return for the period ending December 31, 2006.

EXAMPLE 6: Business F is a manufacturer that hires ten new employees on July 1, 2005, and qualifies for the wage-benefits tax credit because the wages and benefits paid exceed 130 percent of the average county wage. Business F receives a wage-benefits tax credit in July 2006 for these ten employees, which can be used on the tax return for the period ending December 31, 2006. On August 31, 2006, two of the employees leave the business and are replaced by two new employees. Business F is entitled to a wage-benefits tax credit for only eight employees in July 2007 because only eight employees continued employment for the subsequent 12 months, which meets the definition of a retained qualified new job. Business F cannot request a wage-benefits tax credit for the two employees hired on August 31, 2006. Business F cannot request the wage-benefits tax credit because these two full-time jobs existed in the business within the previous 12 months in Iowa, and these jobs do not meet the definition of a qualified new job or retained qualified new job.

EXAMPLE 7: Business G is a manufacturer that hires ten new employees on July 1, 2005, and qualifies for the wage-benefits tax credit because the wages and benefits paid exceed 130 percent of the average county wage. Business G receives a wage-benefits tax credit in July 2006 for these ten employees equal to 5 percent of the wages and benefits paid. On October 1, 2006, Business G hires an additional five employees, each of whom receives wages and benefits in excess of 130 percent of the average county wage. Business G can apply for the wage-benefits tax credit on October 1, 2007, for these five employees, since these employees have now been employed for 12 months. However, the credit may not be allowed if more than \$4 million of retained job applications is received for the fiscal year ending June 30, 2008.

EXAMPLE 8: Assume the same facts as Example 6, except that the \$10 million limit of tax credits has already been met for the fiscal year ending June 30, 2007, and Business F hired five new employees on August 31, 2006. Business F can apply for the wage-benefits tax credit for the three employees on August 31, 2007, a number which is above the ten full-time jobs originally created, but Business F may

not receive the tax credit if more than \$4 million of retained job applications is received for the fiscal year ending June 30, 2008.

EXAMPLE 9: Assume the same facts as Example 7, except that the ten employees hired on July 1, 2005, by Business G received wages and benefits equal to 155 percent of the average county wage, and the five employees hired on October 1, 2006, by Business G received wages equal to 161 percent of the average county wage. Business G can apply for the tax credit on October 1, 2007, equal to 10 percent of the wages and benefits paid for the employees hired on October 1, 2006. On July 1, 2007, Business G can reapply for the tax credit equal to 5 percent of the wages and benefits paid only for the ten employees originally hired on July 1, 2005, even if the wages and benefits for these ten employees exceed 160 percent of the average county wage for the period from July 1, 2006, through June 30, 2007.

52.25(5) *Repeal of the wage-benefits tax credit.* The wage-benefits tax credit is repealed effective July 1, 2008. However, the wage-benefits tax credit is still available through the fiscal year ending June 30, 2011, as provided in subrule 52.25(3), paragraphs “d,” “e,” and “f.” A business is not entitled to a wage-benefits tax credit for a qualified new job created on or after July 1, 2008.

This rule is intended to implement Iowa Code chapter 15I as amended by 2008 Iowa Acts, House File 2700, section 167, and Iowa Code section 422.33(18).

701—52.26(422,476B) Wind energy production tax credit. Effective for tax years beginning on or after July 1, 2006, an owner of a qualified wind energy production facility that has been approved by the Iowa utilities board may claim a wind energy production tax credit for qualified electricity sold by the owner or used for on-site consumption against a taxpayer’s Iowa corporation income tax liability. The administrative rules for the certification of eligibility for the wind energy production tax credit for the Iowa utilities board may be found in rule 199—15.18(476B).

52.26(1) *Application and review process for the wind energy production tax credit.* An owner of a wind energy production facility must be approved by the Iowa utilities board in order to qualify for the wind energy production tax credit. The facility must be an electrical production facility that produces electricity from wind, is located in Iowa, and must be placed in service on or after July 1, 2005, but before July 1, 2012. For applications filed on or after March 1, 2008, a facility must consist of one or more wind turbines which have a combined nameplate generating capacity of at least 2 megawatts and no more than 30 megawatts. For applications filed on or after July 1, 2009, by a private college or university, community college, institution under the control of the state board of regents, public or accredited nonpublic elementary and secondary school, or public hospital as defined in Iowa Code section 249J.3, the facility must have a combined nameplate capacity of no less than $\frac{3}{4}$ of a megawatt.

The maximum amount of nameplate generating capacity for all qualified wind energy production facilities cannot exceed 50 megawatts of nameplate generating capacity. An owner shall not own more than two qualified facilities. A facility that is not operational within 18 months after issuance of the approval from the Iowa utilities board will no longer be considered a qualified facility. However, a facility that is not operational within 18 months due to the unavailability of necessary equipment shall be granted an additional 12 months to become operational.

An owner of the qualified facility must apply to the Iowa utilities board for the wind energy production tax credit. The application for the tax credit must be filed no later than 30 days after the close of the tax year for which the credit is applied. The information to be included in the application is set forth in 199—subrule 15.20(1).

52.26(2) *Computation of the credit.* The wind energy production credit equals one cent multiplied by the number of kilowatt-hours of qualified electricity sold or used for on-site consumption by the owner during the tax year. For the first tax year in which the credit is applied, the kilowatt-hours of qualified electricity sold may exceed 12 months.

EXAMPLE: A qualified facility was placed in service on April 1, 2006, and the taxpayer files on a calendar-year basis. The first year for which the credit can be claimed is the period ending December 31, 2007, since that is the first tax year that began on or after July 1, 2006. The credit for the 2007 tax year can include electricity sold between April 1, 2006, and December 31, 2007.

The credit is not allowed for any kilowatt-hours of electricity sold to a related person. The definition of “related person” uses the same criteria set forth in Section 45(e)(4) of the Internal Revenue Code relating to the federal renewable electricity production credit. Persons shall be treated as related to each other if such persons are treated as a single employer under Treasury Regulation §1.52-1. In the case of a corporation that is a member of an affiliated group of corporations filing a federal consolidated return, such corporation shall be treated as selling electricity to an unrelated person if such electricity is sold to the person by another member of the affiliated group.

The utilities board will notify the department of the number of kilowatt-hours of electricity sold by the qualified facility or generated and used on site by the qualified facility during the tax year. The department will calculate the credit and issue a tax credit certificate to the owner. The tax credit certificate will include the taxpayer’s name, address and federal identification number, the tax type for which the credit will be claimed, the amount of the credit and the tax year for which the credit may be claimed. In addition, the tax credit certificate will include a place for the name and tax identification number of a transferee and the amount of the tax credit certificate, as provided in subrule 52.26(3). If the department refuses to issue the tax credit certificate, the taxpayer shall be notified in writing and the taxpayer will have 60 days from the date of denial to file a protest in accordance with rule 701—7.8(17A). The department will not issue a tax credit certificate if the facility is not operational within 18 months after approval was given by the utilities board, unless a 12-month extension is granted by the utilities board as provided in subrule 52.26(1).

If the taxpayer is a partnership, limited liability company, S corporation, or estate or trust requesting a credit for individual or corporation income tax, the tax credit certificate will be issued to the partners, members, shareholders or beneficiaries based on the partner’s, member’s, shareholder’s or beneficiary’s pro rata share of earnings of the partnership, limited liability company, S corporation, or estate or trust, except when the taxpayer is eligible to receive renewable electricity production tax credits authorized under Section 45 of the Internal Revenue Code. In cases where the taxpayer is eligible to receive renewable electricity production tax credits under Section 45 of the Internal Revenue Code, the partnership, limited liability company or S corporation may designate the amount of the tax credit to be allocated to each partner, member or shareholder. In addition, if a taxpayer is a partnership, limited liability company, S corporation, or estate or trust that is eligible to receive renewable electricity production tax credits under Section 45 of the Internal Revenue Code, the taxpayer may distribute the tax credit to an equity holder or beneficiary as a liquidating distribution or portion thereof, of an equity holder’s interest in the partnership, limited liability company or S corporation, or the beneficiary’s interest in the estate or trust.

The credit can be allowed for a ten-year period beginning on the date the qualified facility was originally placed in service. For example, if a facility was placed in service on April 1, 2006, the credit can be claimed for kilowatt-hours of electricity sold between April 1, 2006, and March 31, 2016.

To claim the tax credit, the taxpayer must include the tax credit certificate with the tax return for the tax year set forth on the certificate. Any tax credit in excess of the tax liability may be carried forward for seven years or until it is used, whichever is the earlier.

52.26(3) *Transfer of the wind energy production tax credit certificate.* The wind energy production tax credit certificate may be transferred to any person or entity.

Within 30 days of transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department, along with a statement which contains the transferee’s name, address and tax identification number and the amount of the tax credit being transferred. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee, the department will issue a replacement tax credit certificate to the transferee. If the transferee is a partnership, limited liability company, S corporation, or estate or trust claiming the credit for individual or corporation income tax, the transferee shall provide a list of the partners, members, shareholders or beneficiaries and information on how the wind energy production tax credit should be divided among the partners, members, shareholders or beneficiaries. The transferee shall also provide the tax identification numbers and addresses of the partners, members, shareholders or beneficiaries. The replacement tax credit certificate must contain the same information as that on the original tax credit certificate and must have

the same effective taxable year and the same expiration date as the original tax credit certificate. The replacement tax credit certificate may reflect a different tax type than the original tax credit certificate.

The transferee may use the amount of the tax credit for any tax year for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit certificate shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit certificate shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

This rule is intended to implement Iowa Code section 422.33 and chapter 476B as amended by 2011 Iowa Acts, House File 672.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 9876B, IAB 11/30/11, effective 1/4/12; ARC 0251C, IAB 8/8/12, effective 9/12/12; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.27(422,476C) Renewable energy tax credit. Effective for tax years beginning on or after July 1, 2006, a purchaser or producer of renewable energy whose facility has been approved by the Iowa utilities board may claim a renewable energy tax credit for qualified renewable energy against a taxpayer's Iowa corporation income tax liability. The administrative rules for the certification of eligibility for the renewable energy tax credit for the Iowa utilities board may be found in rule 199—15.19(476C).

52.27(1) Application and review process for the renewable energy tax credit. A producer or purchaser of a renewable energy facility must be approved by the Iowa utilities board in order to qualify for the renewable energy credit. The eligible renewable energy facility can be a wind energy conversion facility, biogas recovery facility, biomass conversion facility, methane gas recovery facility, solar energy conversion facility or refuse conversion facility. The facility must be located in Iowa and placed in service on or after July 1, 2005, and before January 1, 2017.

The maximum amount of nameplate generating capacity of all wind energy conversion facilities cannot exceed 363 megawatts of nameplate generating capacity. The maximum amount of energy production capacity for biogas recovery facilities, biomass conversion facilities, methane gas recovery facilities, solar energy conversion facilities and refuse conversion facilities cannot exceed a combined output of 53 megawatts of nameplate generating capacity and 167 billion British thermal units of heat for a commercial purpose. A facility that is not operational within 30 months after issuance of approval from the utilities board will no longer be considered a qualified facility. However, if the facility is a wind energy conversion property and is not operational within 18 months due to the unavailability of necessary equipment, the facility may apply for a 12-month extension of the 30-month limit. Extensions can be renewed for succeeding 12-month periods if the facility applies for the extension prior to expiration of the current extension period. A producer of renewable energy, which is the person who owns the renewable energy facility, cannot own more than two eligible renewable energy facilities. A person that has an equity interest equal to or greater than 51 percent in an eligible renewable energy facility cannot have an equity interest greater than 10 percent in any other renewable energy facility.

A producer or purchaser of a renewable energy facility must apply to the utilities board for the renewable energy tax credit. The application for the tax credit must be filed no later than 30 days after the close of the tax year for which the credit is applied. The information to be included in the application is set forth in 199—subrule 15.21(1).

52.27(2) Computation of the credit. The renewable energy tax credit equals 1½ cents per kilowatt-hour of electricity, or 44 cents per 1000 standard cubic feet of hydrogen fuel, or \$4.50 per 1 million British thermal units of methane gas or other biogas used to generate electricity, or \$4.50 per 1 million British thermal units of heat for a commercial purpose generated by and purchased from an eligible renewable energy facility or used for on-site consumption by the producer during the tax year. For the first tax year in which the credit is applied, the kilowatt-hours, standard cubic feet or British thermal units generated by and purchased from the facility or used for on-site consumption by the producer may exceed 12 months if the facility was operational for fewer than 12 months in its initial year of operation.

EXAMPLE: A qualified wind energy production facility was placed in service on April 1, 2006, and the taxpayer files on a calendar-year basis. The first year for which the credit can be claimed is the year ending December 31, 2007, since that is the first tax year that began on or after July 1, 2006. The credit for the 2007 tax year can include electricity generated and purchased or used for on-site consumption by the producer between April 1, 2006, and December 31, 2007.

The credit is not allowed for any kilowatt-hours, standard cubic feet or British thermal units that are purchased from an eligible facility by a related person. Persons shall be treated as related to each other if either person owns an 80 percent or more equity interest in the other person.

The utilities board will notify the department of the number of kilowatt-hours, standard cubic feet or British thermal units that are generated and purchased from an eligible facility or used for on-site consumption by the producer during the tax year. The department will calculate the credit and issue a tax credit certificate to the purchaser or producer. The tax credit certificate will include the taxpayer's name, address and federal identification number, the tax type for which the credit will be claimed, the amount of the credit and the tax year for which the credit may be claimed. In addition, the tax credit certificate will include a place for the name and tax identification number of a transferee and the amount of the tax credit certificate, as provided in subrule 52.27(3). If the department refuses to issue the tax credit certificate, the taxpayer shall be notified in writing and the taxpayer will have 60 days from the date of denial to file a protest in accordance with rule 701—7.8(17A). The department will not issue a tax credit certificate if the facility is not operational within 30 months after approval was given by the utilities board, unless a 12-month extension is granted by the utilities board as provided in subrule 52.27(1). In addition, the department will not issue a tax credit certificate to any person who received a wind energy production tax credit in accordance with Iowa Code chapter 476B.

If the taxpayer is a partnership, limited liability company, S corporation, or estate or trust requesting a credit for individual or corporation income tax, the tax credit certificate will be issued to the partners, members, shareholders or beneficiaries based on the partner's, member's, shareholder's or beneficiary's pro rata share of earnings of the partnership, limited liability company, S corporation, or estate or trust, except when the taxpayer is eligible to receive renewable electricity production tax credits authorized under Section 45 of the Internal Revenue Code. In cases where the taxpayer is eligible to receive renewable electricity production tax credits under Section 45 of the Internal Revenue Code, the partnership, limited liability company or S corporation may designate the amount of the tax credit to be allocated to each partner, member or shareholder. In addition, if a taxpayer is a partnership, limited liability company, S corporation, or estate or trust that is eligible to receive renewable electricity production tax credits under Section 45 of the Internal Revenue Code, the taxpayer may distribute the tax credit to an equity holder or beneficiary as a liquidating distribution or portion thereof, of an equity holder's interest in the partnership, limited liability company or S corporation, or the beneficiary's interest in the estate or trust.

The credit can be allowed for a ten-year period beginning on the date the qualified facility was originally placed in service. For example, if a renewable energy facility was placed in service on April 1, 2006, the credit can be claimed for kilowatt-hours, standard cubic feet or British thermal units generated and purchased or used for on-site consumption by the producer between April 1, 2006, and March 31, 2016. Tax credit certificates cannot be issued for renewable energy purchased or produced for on-site consumption after December 31, 2024.

To claim the tax credit, the taxpayer must include the tax credit certificate with the tax return for the tax period set forth on the certificate. Any tax credit in excess of the tax liability may be carried forward for seven years or until it is used, whichever is the earlier.

52.27(3) *Transfer of the renewable energy tax credit certificate.* The renewable energy tax credit certificate may be transferred once to any person or entity. A decision between a producer and purchaser of renewable energy regarding who may claim the tax credit is not considered a transfer.

Within 30 days of transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department, along with a statement which contains the transferee's name, address and tax identification number and the amount of the tax credit being transferred. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee, the department

will issue a replacement tax credit certificate to the transferee. If the transferee is a partnership, limited liability company, S corporation, or estate or trust claiming the credit for individual or corporation income tax, the transferee shall provide a list of the partners, members, shareholders or beneficiaries and information on how the renewable energy tax credit should be divided among the partners, members, shareholders or beneficiaries. The transferee shall also provide the tax identification numbers and addresses of the partners, members, shareholders or beneficiaries. The replacement tax credit certificate must contain the same information as that on the original tax credit certificate and must have the same effective taxable year and the same expiration date as the original tax credit certificate. The replacement tax credit certificate may reflect a different tax type than the original tax credit certificate.

The transferee may use the amount of the tax credit for any tax year for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit certificate shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit certificate shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

52.27(4) *Small wind innovation zones.* Effective for tax years beginning on or after January 1, 2009, an owner of a small wind energy system operating within a small wind innovation zone which has been approved by the Iowa utilities board is eligible for the renewable energy tax credit. The administrative rules of the Iowa utilities board for the certification of eligibility for owners of small wind energy systems operating within a small wind innovation zone may be found in rule 199—15.22(476).

This rule is intended to implement Iowa Code section 422.33 and chapter 476C as amended by 2014 Iowa Acts, Senate File 2343.

[**ARC 8589B**, IAB 3/10/10, effective 4/14/10; **ARC 8605B**, IAB 3/10/10, effective 4/14/10; **ARC 9876B**, IAB 11/30/11, effective 1/4/12; **ARC 0251C**, IAB 8/8/12, effective 9/12/12; **ARC 1665C**, IAB 10/15/14, effective 11/19/14]

701—52.28(15) High quality job creation program. Effective for tax periods ending on or after July 1, 2005, for programs approved on or after July 1, 2005, but before July 1, 2009, a business which qualifies under the high quality job creation program is eligible to receive tax credits. The high quality job creation program replaces the new jobs and income program and the new capital investment program. An eligible business under the high quality job creation program must be approved by the Iowa department of economic development and meet the qualifications of Iowa Code section 15.329. The administrative rules for the high quality job creation program for the Iowa department of economic development may be found at 261—Chapter 68.

The high quality job creation program was repealed on July 1, 2009, and has been replaced with the high quality jobs program. See rule 701—52.40(15) for information on the investment tax credit and additional research activities credit under the high quality jobs program. Any investment tax credit and additional research activities credit earned by businesses approved under the high quality job creation program prior to July 1, 2009, remains valid and can be claimed on tax returns filed after July 1, 2009.

52.28(1) *Research activities credit.* An eligible business approved under the high quality job creation program is eligible for an additional research activities credit as subrule described in 52.7(4).

Research activities allowable for the Iowa research activities credit include expenses related to the development and deployment of innovative renewable energy generation components manufactured or assembled in Iowa; such expenses related to the development and deployment of innovative renewable energy generation components are not eligible for the federal credit for increasing research activities. For purposes of this subrule, innovative renewable energy generation components do not include components with more than 200 megawatts in installed effective nameplate capacity. The research activities credit related to renewable energy generation components under the high quality job creation program and the enterprise zone program shall not exceed \$1 million in the aggregate.

These expenses related to the development and deployment of innovative renewable energy generation components are applicable only to the additional research activities credit set forth in this subrule and are not applicable to the research activities credit set forth in subrule 52.7(3). The research activities credit is subject to the threshold amounts of qualifying investment set forth in Iowa department of economic development 261—subrule 68.4(7).

52.28(2) Investment tax credit.

a. General rule. An eligible business can claim an investment tax credit equal to a percentage of the new investment directly related to new jobs created by the location or expansion of an eligible business. The percentage is equal to the amount provided in Iowa department of economic development 261—subrule 68.4(7). New investment directly related to new jobs created by the location or expansion of an eligible business includes the following:

(1) The cost of machinery and equipment, as defined in Iowa Code section 427A.1(1), paragraphs “e” and “j,” purchased for use in the operation of the eligible business. The purchase price shall be depreciated in accordance with generally accepted accounting principles.

(2) The purchase price of real property and any buildings and structures located on the real property.

(3) The cost of improvements made to real property which is used in the operation of the eligible business.

In addition, certain lease payments made by eligible businesses to a third-party developer will be considered to be new investment for purposes of computing the investment tax credit. The eligible business shall enter into a lease agreement with the third-party developer for a minimum of five years. The investment tax credit is based on the annual base rent paid to a third-party developer by the eligible business for a period not to exceed ten years. The total costs of the annual base rent payments for the ten-year period cannot exceed the cost of the land and the third-party developer’s cost to build or renovate the building used by the eligible business. The annual base rent is defined as the total lease payment less taxes, insurance and operating and maintenance expenses.

The investment tax credit can be claimed in the tax year in which the qualifying assets are placed in service. The investment tax credit will be amortized over a five-year period. Any credit in excess of the tax liability for the tax period may be carried forward seven years or until used, whichever is the earlier.

EXAMPLE: An eligible business which files tax returns on a calendar-year basis earned \$100,000 of investment tax credits for new investment made in 2006. The business can claim \$20,000 of investment tax credits for each of the years from 2006 through 2010. The \$20,000 of investment tax credit that can be claimed in 2006 can be carried forward to the 2007-2013 tax years if the entire credit cannot be claimed on the 2006 return. Similarly, the \$20,000 investment tax credit that can be claimed in 2007 can be carried forward to the 2008-2014 tax years if the entire credit cannot be claimed on the 2007 return.

If the business is a partnership, S corporation, limited liability company, cooperative organized under Iowa Code chapter 501 and filing as a partnership for federal tax purposes, or estate or trust electing to have the income taxed directly to an individual, an individual may claim the credit. The amount of the credit claimed by an individual must be based on the individual’s pro rata share of the individual’s earnings of the partnership, S corporation, limited liability company, cooperative organized under Iowa Code chapter 501 and filing as a partnership for federal tax purposes, or estate or trust electing to have the income taxed directly to an individual.

EXAMPLE: An eligible business which files tax returns on a calendar-year basis was awarded \$500,000 in investment tax credits in December 2008. The credits were amortized over a five-year period, with \$100,000 of investment tax credits being available for the fiscal years ending June 30, 2009, through June 30, 2013. This equates to the investment tax credit being available for the 2008-2012 calendar year returns since the due date of these returns range from April 30, 2009, through April 30, 2013, which falls within the fiscal years ending June 30, 2009, through June 30, 2013. The eligible business placed the qualifying assets in service during the 2010 calendar year. The eligible business can claim \$300,000 of investment tax credit for 2010, \$100,000 of investment tax credit for 2011 and \$100,000 of investment tax credit for 2012. Of the \$300,000 claimed for the 2010 tax year, \$100,000 can be carried forward until the 2015 tax year, \$100,000 can be carried forward to the 2016 tax year, and \$100,000 can be carried forward to the 2017 tax year. The seven-year carryforward period is determined by the amortization schedule, not the initial year in which the investment tax credit can be claimed on an Iowa tax return.

b. Investment tax credit—value-added agricultural products or biotechnology-related processes. An eligible business whose project primarily involves the production of value-added agricultural products or uses biotechnology-related processes may elect to receive a refund for all or a

portion of an unused investment tax credit. An eligible business includes a cooperative described in Section 521 of the Internal Revenue Code whose project primarily involves the production of ethanol.

Eligible businesses that elect to receive a refund shall apply to the Iowa department of economic development for tax credit certificates between May 1 and May 15 of each fiscal year through the fiscal year ending June 30, 2009. The election to receive a refund of all or a portion of an unused investment tax credit is no longer available beginning with the fiscal year ending June 30, 2010. Only those businesses that have completed projects before the May 1 filing date may apply for a tax credit certificate. The Iowa department of economic development shall not issue tax credit certificates for more than \$4 million during a fiscal year to eligible businesses for this program and the enterprise zone program described in subrule 52.14(2). If applications are received for more than \$4 million, the applicants shall receive certificates for a prorated amount.

The economic development authority shall issue tax credit certificates within a reasonable period of time. Tax credit certificates are valid for the tax year following project completion. The tax credit certificate must be included with the tax return for the tax year during which the tax credit is claimed. The tax credit certificate shall not be transferred, except for a cooperative described in Section 521 of the Internal Revenue Code whose project primarily involves the production of ethanol, as provided in subrule 52.10(4). For value-added agricultural projects involving ethanol, the cooperative must submit a list of its members and the share of each member's interest in the cooperative. The economic development authority shall issue a tax credit certificate to each member on the list.

c. Repayment of benefits. If an eligible business fails to maintain the requirements of the high quality job creation program, the taxpayer may be required to repay all or a portion of the tax incentives taken on Iowa returns. Irrespective of the fact that the statute of limitations to assess the taxpayer for repayment of the tax credits may have expired, the department may proceed to collect the tax incentives forfeited by failure of the eligible business to maintain the requirements of the high quality job creation program because it is a recovery of an incentive, rather than an adjustment to the taxpayer's tax liability. Details on the calculation of the repayment can be found in 261—subrule 187.5(4) of the administrative rules of the economic development authority. If the business is a partnership, limited liability company, S corporation, estate or trust where the income of the taxpayer is taxed to the individual owner(s) of the business, the department may proceed to collect the tax incentives against the partners, members, shareholders or beneficiaries to whom the tax incentives were passed through. See Decision of the Administrative Law Judge in *Damien & Colette Trebilcock, et al.*, Docket No. 11DORF 042-044, June 11, 2012.

An eligible business in the high quality job creation program may also be required to repay all or a portion of the tax incentives received on Iowa returns if the eligible business experiences a layoff of employees in Iowa or closes any of its facilities in Iowa.

If, within five years of purchase, the eligible business sells, disposes of, razes, or otherwise renders unusable all or a part of the land, buildings, or other existing structures for which a tax credit was claimed under this subrule, the income tax liability of the eligible business shall be increased by one of the following amounts:

- (1) One hundred percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within one full year after being placed in service.
- (2) Eighty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within two full years after being placed in service.
- (3) Sixty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within three full years after being placed in service.
- (4) Forty percent of the tax credit claimed if the property ceases to be eligible for the tax credit within four full years after being placed in service.
- (5) Twenty percent of the investment tax credit claimed if the property ceases to be eligible for the tax credit within five full years after being placed in service.

52.28(3) Determination of tax credit amounts. The amount of tax credit claimed under the high quality job creation program shall be based on the number of high quality jobs created and the amount of qualifying investment made as determined by the Iowa department of economic development.

a. If the high quality jobs have a starting wage, including benefits, equal to or greater than 130 percent of the average county wage but less than 160 percent of the average county wage, see Iowa department of economic development 261—paragraph 68.4(7) “*a*” for the amount of tax credits that may be claimed.

b. If the high quality jobs have a starting wage, including benefits, equal to or greater than 160 percent of the average county wage, see Iowa department of economic development 261—paragraph 68.4(7) “*b*” for the amount of tax credits that may be claimed.

c. An eligible business approved under the high quality job creation program is not eligible for the wage-benefits tax credit set forth in rule 701—52.25(15H).

This rule is intended to implement Iowa Code Supplement chapter 15.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 0398C, IAB 10/17/12, effective 11/21/12; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.29(15E,422) Economic development region revolving fund tax credit. Effective for tax years ending on or after July 1, 2005, but beginning before January 1, 2010, a taxpayer who makes a contribution to an economic development region revolving fund may claim a tax credit, subject to the availability of the credit. The credit is equal to 20 percent of a taxpayer’s contribution to the economic development region revolving fund approved by the Iowa department of economic development. The administrative rules for the economic development region revolving fund tax credit for the Iowa department of economic development may be found at 261—Chapter 32. The tax credit is repealed for tax years beginning on or after January 1, 2010.

The total amount of economic development region revolving fund tax credits available shall not exceed \$2 million per fiscal year. The tax credit shall not be carried back to a tax year prior to the year in which the taxpayer redeems the credit. The economic development region revolving fund tax credit is not transferable to any other taxpayer.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following ten years or until used, whichever is the earlier.

If a taxpayer is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual’s pro rata share of the individual’s earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement Iowa Code sections 15E.232 and 422.33 as amended by 2010 Iowa Acts, Senate File 2380.

[ARC 9104B, IAB 9/22/10, effective 10/27/10]

701—52.30(422) E-85 gasoline promotion tax credit. Effective for tax years beginning on or after January 1, 2006, a retail dealer of gasoline may claim an E-85 gasoline promotion tax credit. “E-85 gasoline” means ethanol blended gasoline formulated with a minimum percentage of between 70 percent and 85 percent of volume of ethanol, if the formulation meets the standards provided in Iowa Code section 214A.2. For purposes of this rule, tank wagon sales are considered retail sales. The credit is calculated on Form IA 135. The credit is calculated by multiplying the total number of E-85 gallons sold by the retail dealer during the tax year by the following designated rates:

Calendar years 2006, 2007 and 2008	25 cents
Calendar years 2009 and 2010	20 cents
Calendar year 2011	10 cents
Calendar years 2012 through 2017	16 cents

A taxpayer may claim the E-85 gasoline promotion tax credit even if the taxpayer also claims the ethanol blended gasoline tax credit provided in rule 701—52.19(422) for gallons sold prior to January 1, 2009, or the ethanol promotion tax credit provided in rule 701—52.36(422) for gallons sold on or after January 1, 2009, for the same tax year for the same ethanol gallons.

Any credit in excess of the taxpayer's tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

EXAMPLE: A taxpayer operated one retail motor fuel site in 2006 and sold 200,000 gallons of gasoline, of which 160,000 gallons was ethanol blended gasoline. Of these 160,000 gallons, 1,000 gallons was E-85 gasoline. Taxpayer may claim the E-85 gasoline promotion tax credit on the 1,000 gallons of E-85 gasoline sold during 2006. Taxpayer is also entitled to claim the ethanol blended gasoline tax credit of two and one-half cents multiplied by 40,000 gallons, since this constitutes the gallons in excess of 60 percent of the total gasoline gallons sold for the 2006 tax year.

52.30(1) Fiscal year filers. For taxpayers whose tax year is not on a calendar-year basis, the taxpayer may compute the tax credit on the gallons of E-85 gasoline sold during the year using the designated rates as shown above. Because the tax credit is repealed on January 1, 2018, a taxpayer whose tax year ends prior to December 31, 2017, can continue to claim the tax credit in the following tax year for any E-85 gallons sold through December 31, 2017. For a retail dealer whose tax year is not on a calendar-year basis and who did not claim the E-85 credit on the previous return, the dealer may claim the credit for the current tax year for the period beginning on January 1 of the previous tax year until the last day of the previous tax year.

EXAMPLE: A taxpayer who is a retail dealer of gasoline has a fiscal year ending March 31, 2009. The taxpayer sold 2,000 gallons of E-85 gasoline for the period from April 1, 2008, through December 31, 2008, and sold 500 gallons of E-85 gasoline for the period from January 1, 2009, through March 31, 2009. The taxpayer is entitled to a total E-85 gasoline promotion tax credit of \$600 for the fiscal year ending March 31, 2009, which consists of a \$500 credit (2,000 gallons multiplied by 25 cents) for the period from April 1, 2008, through December 31, 2008, and a credit of \$100 (500 gallons multiplied by 20 cents) for the period from January 1, 2009, through March 31, 2009.

EXAMPLE: A taxpayer who is a retail dealer of gasoline has a fiscal year ending April 30, 2006. The taxpayer sold 800 gallons of E-85 gasoline for the period from January 1, 2006, through April 30, 2006. The taxpayer is entitled to claim an E-85 gasoline promotion tax credit of \$200 (800 gallons times 25 cents) on the taxpayer's Iowa income tax return for the period ending April 30, 2006. In lieu of claiming the credit on the return for the period ending April 30, 2006, the taxpayer can claim the E-85 gasoline promotion tax credit on the tax return for the period ending April 30, 2007, including all E-85 gallons sold for the period from January 1, 2006, through April 30, 2007.

52.30(2) Allocation of credit to owners of a business entity. If a taxpayer claiming the E-85 gasoline promotion tax credit is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement Iowa Code section 422.33 as amended by 2011 Iowa Acts, Senate File 531.

[ARC 9821B, IAB 11/2/11, effective 12/7/11]

701—52.31(422) Biodiesel blended fuel tax credit. Effective for tax years beginning on or after January 1, 2006, a retail dealer of biodiesel blended fuel may claim a biodiesel blended fuel tax credit. "Biodiesel blended fuel" means a blend of biodiesel with petroleum-based diesel fuel which meets the standards provided in Iowa Code section 214A.2. The biodiesel blended fuel must be formulated with a minimum percentage of 2 percent by volume of biodiesel, if the formulation meets the standards provided by Iowa Code section 214A.2, to qualify for the tax credit for gallons sold on or after January 1, 2006, but before January 1, 2013. For gallons sold on or after January 1, 2013, but before January 1, 2018, the biodiesel blended fuel must be formulated with a minimum percentage of 5 percent by volume of biodiesel, if the formulation meets the standards provided by Iowa Code section 214A.2, to qualify for the tax credit. In addition, of the total gallons of diesel fuel sold by the retail dealer, 50 percent or more must be biodiesel blended fuel to be eligible for the tax credit for tax years beginning prior to January 1, 2009. For tax years beginning on or after January 1, 2009, but before January 1, 2012, the biodiesel blended fuel tax credit is calculated separately for each retail motor fuel site for which 50 percent or more of the total

gallons of diesel fuel sold at the motor fuel site was biodiesel blended fuel. For tax years beginning on or after January 1, 2012, the requirement that 50 percent of all diesel fuel gallons sold be biodiesel gallons to be eligible for the tax credit is eliminated.

The tax credit equals three cents multiplied by the qualifying number of biodiesel blended fuel gallons sold by the taxpayer during the tax year for gallons sold through December 31, 2011. For gallons sold during the 2012 calendar year, the tax credit equals the sum of two cents multiplied by the qualifying number of biodiesel blended fuel gallons that have a minimum percentage of 2 percent by volume of biodiesel but less than 5 percent by volume of biodiesel and four and one-half cents multiplied by the qualifying number of biodiesel blended fuel gallons that have a minimum percentage of 5 percent by volume of biodiesel. For gallons sold during the 2013 to 2017 calendar years, the tax credit equals four and one-half cents multiplied by the qualifying number of biodiesel blended fuel gallons that have a minimum percentage of 5 percent by volume of biodiesel. In determining the minimum percentage by volume of biodiesel, the department will taken into account reasonable variances due to testing and other limitations. For purposes of this rule, tank wagon sales are considered retail sales. The credit is calculated on Form IA 8864.

Any credit in excess of the taxpayer's tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

EXAMPLE: A taxpayer operated four retail motor fuel sites during 2006 and sold a combined total at all four sites of 100,000 gallons of diesel fuel, of which 55,000 gallons was biodiesel blended fuel containing a minimum percentage of 2 percent by volume of biodiesel. Because 50 percent or more of the diesel fuel sold was biodiesel blended fuel, the taxpayer may claim the biodiesel blended fuel tax credit totaling \$1,650, which is 55,000 gallons multiplied by three cents.

EXAMPLE: A taxpayer operated two retail motor fuel sites during 2006, and each site sold 40,000 gallons of diesel fuel. One site sold 25,000 gallons of biodiesel blended fuel, and the other site sold 10,000 gallons of biodiesel blended fuel. The taxpayer would not be eligible for the biodiesel blended fuel tax credit because only 35,000 gallons of the total 80,000 gallons, or 43.75 percent of the total diesel fuel gallons sold, was biodiesel blended fuel. The 50 percent requirement is based on the aggregate number of diesel fuel gallons sold by the taxpayer, and the fact that one retail motor fuel site met the 50 percent requirement does not allow the taxpayer to claim the biodiesel blended fuel tax credit for the 2006 tax year. If the facts in this example had occurred during the 2009 tax year, the taxpayer could claim a biodiesel blended fuel tax credit totaling \$750, which is 25,000 gallons multiplied by three cents, since one of the retail motor fuel sites met the 50 percent biodiesel blended fuel requirement.

52.31(1) Fiscal year filers. For taxpayers whose tax year is not on a calendar-year basis and whose tax year ends before December 31, 2006, the taxpayer may compute the tax credit on the gallons of biodiesel blended fuel sold during the period from January 1, 2006, through the end of the tax year, provided that 50 percent of all diesel fuel sold during that period was biodiesel blended fuel. Because the tax credit is repealed on January 1, 2018, a taxpayer whose tax year ends prior to December 31, 2017, may continue to claim the tax credit in the following tax year for any biodiesel blended fuel sold through December 31, 2017.

EXAMPLE: A taxpayer who operates one retail motor fuel site has a fiscal year ending April 30, 2006. The taxpayer sold 60,000 gallons of diesel fuel for the period from May 1, 2005, through April 30, 2006, of which 28,000 gallons was biodiesel blended fuel. However, for the period from January 1, 2006, through April 30, 2006, the taxpayer sold 20,000 gallons of diesel fuel, of which 12,000 gallons was biodiesel blended fuel. The taxpayer is entitled to claim the biodiesel blended fuel tax credit of \$360 (12,000 gallons times 3 cents) on the taxpayer's Iowa income tax return for the period ending April 30, 2006, since more than 50 percent of all diesel fuel sold during the period from January 1, 2006, through April 30, 2006, was biodiesel blended fuel.

EXAMPLE: A taxpayer who operates one retail motor fuel site has a fiscal year ending June 30, 2006. The taxpayer sold 80,000 gallons of diesel fuel for the period from July 1, 2005, through June 30, 2006, of which 42,000 gallons was biodiesel blended fuel. However, for the period from January 1, 2006, through June 30, 2006, the taxpayer sold 40,000 gallons of diesel fuel, of which 19,000 gallons was biodiesel blended fuel. The taxpayer is not entitled to claim the biodiesel blended fuel tax credit on the

taxpayer's Iowa income tax return for the period ending June 30, 2006, since less than 50 percent of all diesel fuel sold during the period from January 1, 2006, through June 30, 2006, was biodiesel blended fuel, even though more than 50 percent of all diesel fuel sold during the period from July 1, 2005, through June 30, 2006, was biodiesel blended fuel.

EXAMPLE: A taxpayer who operates one retail motor fuel site has a fiscal year ending February 28, 2012. The taxpayer sold 100,000 gallons of diesel fuel for the period from March 1, 2011, through February 28, 2012, of which 60,000 gallons was biodiesel blended fuel. For the period from March 1, 2011, through December 31, 2011, the taxpayer sold 85,000 gallons of diesel fuel, of which 50,000 gallons was biodiesel fuel. The taxpayer is entitled to claim the biodiesel blended fuel tax credit of \$1,500 (50,000 gallons times 3 cents) on the taxpayer's Iowa income tax return for the period ending February 12, 2012, since the credit is computed only on gallons sold through December 31, 2011.

52.31(2) Allocation of credit to owners of a business entity. If a taxpayer claiming the biodiesel blended fuel tax credit is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement Iowa Code section 422.33 as amended by 2011 Iowa Acts, Senate File 531.

[ARC 9821B, IAB 11/2/11, effective 12/7/11]

701—52.32(422) Soy-based transformer fluid tax credit. Effective for tax periods ending after June 30, 2006, and beginning before January 1, 2009, an electric utility may claim a soy-based transformer fluid tax credit. An electric utility, which is a public utility, city utility, or electric cooperative which furnishes electricity, may claim a credit equal to the costs incurred during the tax year for the purchase and replacement costs relating to the transition from using nonsoy-based transformer fluid to using soy-based transformer fluid.

52.32(1) Eligibility requirements for the tax credit. All of the following conditions must be met for the electric utility to qualify for the soy-based transformer fluid tax credit.

- a. The costs must be incurred after June 30, 2006, and before January 1, 2009.
- b. The costs must be incurred in the first 18 months of the transition from using nonsoy-based transformer fluid to using soy-based transformer fluid.
- c. The soy-based transformer fluid must be dielectric fluid that contains at least 98 percent soy-based products.
- d. The costs of the purchase and replacement must not exceed \$2 per gallon of soy-based transformer fluid used in the transition.
- e. The number of gallons used in the transition must not exceed 20,000 gallons per electric utility, and the total number of gallons eligible for the credit must not exceed 60,000 gallons in the aggregate.
- f. The electric utility shall not deduct for Iowa income tax purposes the costs incurred in the transition to using soy-based transformer fluid which are deductible for federal income tax purposes.

52.32(2) Applying for the tax credit. An electric utility must apply to the department for the soy-based transformer fluid tax credit. The application for the tax credit must be filed no later than 30 days after the close of the tax year for which the credit is claimed. The application must include the following information:

- a. A copy of the signed purchase agreement or other agreement to purchase soy-based transformer fluid.
- b. The number of gallons of soy-based transformer fluid purchased during the tax year, along with the cost per gallon of each purchase made during the tax year.
- c. The name, address, and tax identification number of the electric utility.
- d. The type of tax for which the credit will be claimed, and the first year in which the credits will be claimed.
- e. If the application is filed by a partnership, limited liability company, S corporation, or estate or trust requesting a credit for individual or corporation income tax, a list of the partners, members,

shareholders or beneficiaries of the entity. This list shall include the name, address, tax identification number and pro rata share of earnings from the entity for each of the partners, members, shareholders or beneficiaries.

52.32(3) *Claiming the tax credit.* After the application is reviewed, the department will issue a tax credit certificate to the electric utility. The tax credit certificate will include the taxpayer's name, address and federal identification number, the tax type for which the credit will be claimed, the amount of the credit and the tax year for which the credit may be claimed. Once the tax credit certificate is issued, the credit may be claimed only against the type of tax reflected on the certificate. If the department refuses to issue the tax credit certificate, the taxpayer shall be notified in writing; and the taxpayer will have 60 days from the date of denial to file a protest in accordance with rule 701—7.8(17A).

If the taxpayer is a partnership, limited liability company, S corporation, or estate or trust requesting a credit for individual or corporation income tax, the tax credit certificate will be issued to the partners, members, shareholders or beneficiaries based on the partner's, member's, shareholder's or beneficiary's pro rata share of earnings of the partnership, limited liability company, S corporation, or estate or trust.

Any credit in excess of the taxpayer's tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

This rule is intended to implement Iowa Code Supplement section 422.33 as amended by 2008 Iowa Acts, Senate File 572.

[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—52.33(16,422) Agricultural assets transfer tax credit and custom farming contract tax credit.

52.33(1) *Agricultural assets transfer tax credit.* For tax years beginning on or after January 1, 2007, but before January 1, 2013, an owner of agricultural assets that rents assets to qualified beginning farmers may claim an agricultural assets transfer tax credit for Iowa corporation income tax equal to 5 percent of the rental income received by the owner for cash rental agreements and 15 percent of the rental income received by the owner for commodity share agreements. Effective for tax years beginning on or after January 1, 2013, an owner of agricultural assets that rents assets to qualified beginning farmers may claim an agricultural assets transfer tax credit for Iowa corporation income tax equal to 7 percent of the rental income received by the owner for cash rental agreements and 17 percent of the rental income received by the owner for commodity share agreements.

Also effective for tax years beginning on or after January 1, 2013, if the beginning farmer is a veteran, the credit is equal to 8 percent of the rental income received by the owner for cash rental agreements, and the credit is equal to 18 percent of the rental income received by the owner for commodity share agreements for the first year that the credit is allowed. However, the taxpayer may only claim 7 percent of the rental income for cash rental agreements and 17 percent of the rental income for commodity share agreements in subsequent years if the agreement is renewed or a new agreement is executed by the same parties. The administrative rules for the agricultural assets transfer tax credit for the Iowa finance authority may be found under 265—Chapter 44.

To qualify for the tax credit, an owner of agricultural assets must enter into a lease or rental agreement with a beginning farmer for a term of at least two years but not more than five years. Both the owner of agricultural assets and the beginning farmer must meet certain qualifications set forth by the Iowa finance authority, and the beginning farmer must be eligible to receive financial assistance under Iowa Code section 16.75.

The Iowa finance authority will issue a tax credit certificate to the owner of agricultural assets which will include the name, address and tax identification number of the owner, the amount of the credit, and the tax period for which the credit may be applied. To claim the tax credit, the owner must include the tax credit certificate with the tax return for the tax period set forth on the certificate. The tax credit certificates will be issued on a first-come, first-served basis. For fiscal years beginning on or after July 1, 2009, but before July 1, 2013, the amount of tax credit certificates issued by the Iowa agricultural development authority for the agricultural assets transfer tax credit program cannot exceed \$6 million. For fiscal years beginning on or after July 1, 2013, the amount of tax credit certificates issued by the Iowa finance authority for the agricultural assets transfer tax credit program cannot exceed \$8 million.

and the amount of the credit issued to an individual taxpayer cannot exceed \$50,000. However, effective December 31, 2017, the amount of tax credits issued by the Iowa finance authority for the agricultural assets transfer tax credit shall revert back to \$6 million.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier. However, for any agricultural assets transfer credits originally issued for tax years beginning on or after January 1, 2008, any credit in excess of the tax liability may be credited to the tax liability for the following ten years. The tax credit shall not be carried back to a tax year prior to the year in which the owner redeems the credit. The credit is not transferable to any other person other than the taxpayer's estate or trust upon the death of the taxpayer.

If an owner of agricultural assets is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

The lease or rental agreement may be terminated by either the owner or the beginning farmer. If the Iowa finance authority determines that the owner is not at fault for the termination, the authority will not issue a tax credit certificate for subsequent years, but any prior tax credit certificates issued will be allowed. If the Iowa finance authority determines that the owner is at fault for the termination, any prior tax credit certificates will be disallowed. The amount of tax credits previously allowed will be recaptured, and the owner will be required to repay the entire amount of tax credits previously claimed on Iowa returns.

52.33(2) Custom farming contract tax credit. Effective for tax years beginning on or after January 1, 2013, a landowner that hires a beginning farmer to custom farm agricultural land in this state may claim a custom farming contract tax credit for Iowa corporation income tax. The credit is equal to 7 percent of the value of the contract. If the beginning farmer is a veteran, the credit is equal to 8 percent of the value of the contract for the first year. However, the taxpayer may only claim 7 percent of the value of the contract in subsequent years if the agreement is renewed or a new agreement is executed by the same parties. The administrative rules for the custom farming contract tax credit for the Iowa finance authority may be found under 265—Chapter 44.

To qualify for the tax credit, the taxpayer must enter into a lease or rental agreement with a beginning farmer for a term of at least two years but not more than five years. Both the taxpayer and the beginning farmer must meet certain qualifications set forth by the Iowa finance authority, and the beginning farmer must be eligible to receive financial assistance under Iowa Code section 16.75.

The Iowa finance authority will issue a tax credit certificate to the taxpayer which will include the name, address and tax identification number of the owner, the amount of the credit, and the tax period for which the credit may be applied. To claim the tax credit, the owner must include the tax credit certificate with the tax return for the tax period set forth on the certificate. For fiscal years beginning on or after July 1, 2013, the amount of tax credit certificates issued by the Iowa finance authority for the custom farming contract tax credit program cannot exceed \$4 million, and the credit certificates will be issued on a first-come, first-served basis. The amount of the credit issued to an individual taxpayer cannot exceed \$50,000. However, effective December 31, 2017, the Iowa finance authority will no longer issue custom farming contract tax credits.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following ten years or until used, whichever is the earlier. The tax credit shall not be carried back to a tax year prior to the year in which the owner redeems the credit. The credit is not transferable to any other person other than the taxpayer's estate or trust upon the death of the taxpayer.

If the party entering into the custom farming contract with the beginning farmer is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

The custom farming contract may be terminated by either the taxpayer or the beginning farmer. If the Iowa finance authority determines that the taxpayer is not at fault for the termination, the authority

will not issue a tax credit certificate for subsequent years, but any prior tax credit certificates issued will be allowed. If the Iowa finance authority determines that the taxpayer is at fault for the termination, any prior tax credit certificates will be disallowed. The amount of tax credits previously allowed will be recaptured, and the taxpayer will be required to repay the entire amount of tax credits previously claimed on Iowa returns.

This rule is intended to implement Iowa Code section 422.33; 2014 Iowa Acts, Senate File 2328, sections 60 and 61, as amended by 2014 Iowa Acts, House File 2454; and 2014 Iowa Acts, Senate File 2328, sections 120 and 122.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 1138C, IAB 10/30/13, effective 12/4/13; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—52.34(15,422) Film qualified expenditure tax credit. Effective for tax years beginning on or after January 1, 2007, a film qualified expenditure tax credit is available for corporation income tax. The tax credit cannot exceed 25 percent of the taxpayer's qualified expenditures in a film, television, or video project registered with the film office of the Iowa department of economic development (IDED). The film office may negotiate the amount of the tax credit. The administrative rules for the film qualified expenditure tax credit for IDED may be found at 261—Chapter 36.

52.34(1) Qualified expenditures. A qualified expenditure is a payment to an Iowa resident or an Iowa-based business for the sale, rental or furnishing of tangible personal property or services directly related to the registered project. The qualified expenditures include, but are not limited to, the following:

1. Aircraft.
2. Vehicles.
3. Equipment.
4. Materials.
5. Supplies.
6. Accounting services.
7. Animals and animal care services.
8. Artistic and design services.
9. Graphics.
10. Construction.
11. Data and information services.
12. Delivery and pickup services.
13. Labor and personnel. For limitations on the amount of labor and personnel expenditures, see Iowa department of economic development 261—paragraph 36.7(2)“b.”
14. Lighting services.
15. Makeup and hairdressing services.
16. Film.
17. Music.
18. Photography.
19. Sound.
20. Video and related services.
21. Printing.
22. Research.
23. Site fees and rental.
24. Travel related to Iowa distant locations.
25. Trash removal and cleanup.
26. Wardrobe.

A detailed list of all qualified expenditures for each of these categories is available from the film office of IDED.

52.34(2) Claiming the tax credit. Upon completion of the registered project in Iowa, the taxpayer must submit, in a format approved by IDED prior to production, a listing of the qualified expenditures. Upon verification of the qualified expenditures, IDED will issue a tax credit certificate to the taxpayer.

The certificate will list the taxpayer's name, address, and tax identification number; the date of project completion; the amount of the credit; the tax period for which the credit may be applied; and the type of tax for which the credit will be applied.

If the taxpayer is a partnership, limited liability company, S corporation, or estate or trust requesting a credit for individual or corporation income tax, the tax credit certificate will be issued to the partners, members, shareholders or beneficiaries based on each partner's, member's, shareholder's or beneficiary's pro rata share of earnings of the partnership, limited liability company, S corporation, or estate or trust.

To claim the tax credit, the taxpayer must include the tax credit certificate with the tax return for the tax period set forth on the certificate. Any tax credit in excess of the tax liability may be carried forward for five years or until the tax credit is used, whichever is the earlier. The tax credit cannot be carried back to a tax year prior to the year in which the taxpayer claimed the tax credit.

52.34(3) *Transfer of the film qualified expenditure tax credit.* The film qualified expenditure tax credit may be transferred no more than two times to any person or entity.

Within 90 days of transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department of revenue, along with a statement which contains the transferee's name, address and tax identification number and the amount of the tax credit being transferred. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee, the department of revenue will issue a replacement tax credit certificate to the transferee. If the transferee is a partnership, limited liability company, S corporation, or estate or trust claiming the credit for individual or corporation income tax, the transferee shall provide a list of the partners, members, shareholders or beneficiaries and information on how the film qualified expenditure tax credit should be divided among the partners, members, shareholders or beneficiaries. The transferee shall also provide the tax identification numbers and addresses of the partners, members, shareholders or beneficiaries. The replacement tax credit certificate must contain the same information as that on the original tax credit certificate and must have the same effective taxable year as the original tax credit certificate. The replacement tax credit certificate may reflect a different tax type than the original tax credit certificate.

The transferee may use the amount of the tax credit for any tax year for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit certificate shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit certificate shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

52.34(4) *Repeal of film qualified expenditure tax credit.* The film qualified expenditure tax credit is repealed for tax years beginning on or after January 1, 2012. However, the credit is still available for tax years beginning prior to January 1, 2012, if the contract or agreement related to a film project was entered into on or before May 25, 2012.

This rule is intended to implement 2012 Iowa Acts, House File 2337, sections 38 to 40, and Iowa Code section 422.33 as amended by 2012 Iowa Acts, House File 2337, section 34.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 0398C, IAB 10/17/12, effective 11/21/12; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.35(15,422) Film investment tax credit. Effective for tax years beginning on or after January 1, 2007, a film investment tax credit is available for corporation income tax. The tax credit cannot exceed 25 percent of the taxpayer's investment in a film, television, or video project registered with the film office of the Iowa department of economic development (IDED). The film office may negotiate the amount of the tax credit. The administrative rules for the film investment tax credit for IDED may be found at 261—Chapter 36.

52.35(1) *Claiming the tax credit.* Upon completion of the project in Iowa and verification of the investment in the project, IDED will issue a tax credit certificate to the taxpayer. The certificate will list the taxpayer's name, address, and tax identification number; the date of project completion; the amount of the credit; the tax period for which the credit may be applied; and the type of tax for which the credit will be applied.

If the taxpayer is a partnership, limited liability company, S corporation, or estate or trust requesting a credit for individual or corporation income tax, the tax credit certificate will be issued to the partners, members, shareholders or beneficiaries based on each partner's, member's, shareholder's or beneficiary's pro rata share of earnings of the partnership, limited liability company, S corporation, or estate or trust.

To claim the tax credit, the taxpayer must include the tax credit certificate with the tax return for the tax period set forth on the certificate. Any tax credit in excess of the tax liability may be carried forward for five years or until the tax credit is used, whichever is the earlier. The tax credit cannot be carried back to a tax year prior to the year in which the taxpayer claimed the tax credit. In addition, a taxpayer cannot claim the film investment tax credit for qualified expenditures for which the film expenditure tax credit set forth in rule 701—52.34(15,422) is claimed.

The total of all film investment tax credits for a particular project cannot exceed 25 percent of the qualified expenditures as set forth in subrule 52.34(1) for the particular project. If the amount of investment exceeds the qualified expenditures, the tax credit will be allocated proportionately. For example, if three investors each invested \$100,000 in a project but the qualified expenditures in Iowa only totaled \$270,000, each investor would receive a tax credit based on a \$90,000 investment amount.

52.35(2) *Transfer of the film investment tax credit.* The film investment tax credit may be transferred no more than two times to any person or entity.

Within 90 days of transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department of revenue, along with a statement which contains the transferee's name, address and tax identification number and the amount of the tax credit being transferred. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee, the department of revenue will issue a replacement tax credit certificate to the transferee. If the transferee is a partnership, limited liability company, S corporation, or estate or trust claiming the credit for individual or corporation income tax, the transferee shall provide a list of the partners, members, shareholders or beneficiaries and information on how the film investment tax credit should be divided among the partners, members, shareholders or beneficiaries. The transferee shall also provide the tax identification numbers and addresses of the partners, members, shareholders or beneficiaries. The replacement tax credit certificate must contain the same information as that on the original tax credit certificate and must have the same effective taxable year as the original tax credit certificate. The replacement tax credit certificate may reflect a different tax type than the original tax credit certificate.

The transferee may use the amount of the tax credit for any tax year for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit certificate shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit certificate shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

52.35(3) *Repeal of film investment tax credit.* The film investment tax credit is repealed for tax years beginning on or after January 1, 2012. However, the credit is still available for tax years beginning prior to January 1, 2012, if the contract or agreement related to a film project was entered into on or before May 25, 2012.

This rule is intended to implement 2012 Iowa Acts, House File 2337, sections 38 to 40, and Iowa Code section 422.33 as amended by 2012 Iowa Acts, House File 2337, section 34.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 0398C, IAB 10/17/12, effective 11/21/12; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.36(422) Ethanol promotion tax credit. Effective for tax years beginning on or after January 1, 2009, a retail dealer of gasoline may claim an ethanol promotion tax credit. For purposes of this rule, tank wagon sales are considered retail sales. The ethanol promotion tax credit is computed on Form IA 137.

52.36(1) *Definitions.* The following definitions are applicable to this rule:

“Biodiesel gallonage” means the total number of gallons of biodiesel which the retail dealer sells from motor fuel pumps during a determination period. For example, 5,000 gallons of biodiesel blended

fuel with a 2 percent by volume of biodiesel sold during a determination period results in a biodiesel gallonage of 100 (5,000 times 2%).

“*Biofuel distribution percentage*” means the sum of the retail dealer’s total ethanol gallonage plus the retail dealer’s total biodiesel gallonage expressed as a percentage of the retail dealer’s total gasoline gallonage.

“*Biofuel threshold percentage*” is dependent on the aggregate number of gallons of motor fuel sold by a retail dealer during a determination period, as set forth below:

Determination Period	More than 200,000 Gallons Sold by Retail Dealer	200,000 Gallons or Less Sold by Retail Dealer
2009	10%	6%
2010	11%	6%
2011	12%	10%
2012	13%	11%
2013	14%	12%
2014	15%	13%
2015	17%	14%
2016	19%	15%
2017	21%	17%
2018	23%	19%
2019	25%	21%
2020	25%	25%

“*Biofuel threshold percentage disparity*” means the positive percentage difference between the retail dealer’s biofuel threshold percentage and the retail dealer’s biofuel distribution percentage. For example, if a retail dealer that sells more than 200,000 gallons of motor fuel in 2009 has a biofuel distribution percentage of 8 percent, the biofuel threshold percentage disparity equals 2 percent (10% minus 2%).

“*Determination period*” means any 12-month period beginning on January 1 and ending on December 31.

“*Ethanol gallonage*” means the total number of gallons of ethanol which the retail dealer sells from motor fuel pumps during a determination period. For example, 10,000 gallons of ethanol blended gasoline formulated with a 10 percent by volume of ethanol sold during a determination period results in an ethanol gallonage of 1,000 (10,000 gallons times 10%).

“*Gasoline gallonage*” means the total number of gallons of gasoline sold by the retail dealer during a determination period.

52.36(2) Calculation of tax credit.

a. The tax credit is calculated by multiplying the retail dealer’s total ethanol gallonage by the tax credit rate, which is adjusted based upon the retail dealer’s biofuel threshold percentage disparity. The tax credit rate is set forth below:

Biofuel Threshold Percentage Disparity	Tax Credit Rate per Gallon 2009-2010	Tax Credit Rate per Gallon 2011	Tax Credit Rate per Gallon 2012-2020
0%	6.5 cents	8 cents	8 cents
0.01% to 2.00%	4.5 cents	6 cents	6 cents
2.01% to 4.00%	2.5 cents	2.5 cents	4 cents
4.01% or more	0 cents	0 cents	0 cents

b. For use in calculating a retail dealer’s total ethanol gallonage, the department is required to establish a schedule regarding the average amount of ethanol contained in E-85 gasoline.

c. A taxpayer may claim the ethanol promotion tax credit even if the taxpayer also claims the E-85 gasoline promotion tax credit provided in rule 701—52.30(422) or the E-15 plus gasoline promotion tax credit provided in rule 701—52.43(422) for the same tax year for the same ethanol gallons.

d. The tax credit must be calculated separately for each retail motor fuel site operated by the taxpayer for tax years beginning prior to January 1, 2011. The biofuel threshold percentage disparity of the taxpayer is computed on a statewide basis based on the total ethanol gallonage sold in Iowa. The taxpayer must determine the ethanol gallonage sold at each retail motor fuel site and multiply this ethanol gallonage by the applicable tax credit rate based on the biofuel threshold percentage disparity to calculate the ethanol promotion tax credit.

e. For tax years beginning on or after January 1, 2011, the taxpayer may elect to compute the biofuel threshold percentage disparity and the tax credit on either a site-by-site basis or on a companywide basis. The election made on the first return beginning on or after January 1, 2011, for either the site-by-site method or the companywide method is binding on the taxpayer for subsequent tax years unless the taxpayer petitions the department for a change in the method. Any petition for a change in the method should be made within a reasonable period of time prior to the due date of the return for which the change is requested. For example, if a change is requested for the tax return beginning January 1, 2012, the petition should be made by January 31, 2013, which is 90 days prior to the due date of the return.

The mere fact that a change in the method will result in a larger tax credit for subsequent years is not, of itself, sufficient grounds for changing the method for computing the credit. An example of a case for which the department may grant a change in the method is if the taxpayer has a significant change in the type of fuel sold at the taxpayer's retail sites in Iowa. For example, if a retail dealer opted to start selling E-85 gasoline at all the taxpayer's retail sites in Iowa for a subsequent tax year, the department may grant a change in the method.

If a taxpayer chooses the site-by-site method to compute the biofuel threshold percentage disparity, the gallons sold at all sites in Iowa must be considered in determining if the biofuel threshold percentage as defined in subrule 52.36(1) is based on more than 200,000 gallons, or 200,000 gallons or less. For example, if a taxpayer operates three motor fuel sites in Iowa and each site sells 80,000 gallons of motor fuel during 2011, the biofuel threshold percentage of 12 percent must be used for each retail site if the tax credit is computed on a site-by-site basis, even though each retail site sold less than 200,000 gallons of motor fuel.

f. Any tax credit in excess of the taxpayer's tax liability is refundable. In lieu of claiming a refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

52.36(3) Fiscal year filers. or taxpayers whose tax year is not on a calendar year basis, the taxpayer may compute the ethanol promotion tax credit on the total ethanol gallonage sold during the year using the designated tax credit rates as shown in subrule 52.36(2), paragraph "a." Because the tax credit is repealed on January 1, 2021, a taxpayer whose tax year ends prior to December 31, 2020, may continue to claim the tax credit in the following tax year for the total ethanol gallonage sold through December 31, 2020. For a taxpayer whose tax year is not on a calendar year basis and that did not claim the ethanol promotion tax credit on the previous return, the taxpayer may claim the tax credit for the current tax year for the period beginning on January 1 of the previous tax year until the last day of the previous tax year.

52.36(4) Allocation of tax credit to owners of a business entity. If a taxpayer claiming the ethanol promotion tax credit is a partnership, limited liability company, S corporation, estate, or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by the individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, estate, or trust.

52.36(5) Examples. The following noninclusive examples illustrate how this rule applies:

EXAMPLE 1. A taxpayer that is a retail dealer of gasoline operates only one motor fuel site in Iowa. The number of gallons of gasoline sold at this site in 2009 equals 100,000 gallons. This consisted of 5,000 gallons of E-85 gasoline, 80,000 gallons of E-10 (10% ethanol blended gasoline) and 15,000 gallons not containing ethanol. The average ethanol content of E-85 gasoline is assumed to be 79%. The taxpayer also sold at this site during 2009 15,000 gallons of diesel fuel, of which 5,000 gallons

was B-2 (2% biodiesel). The ethanol gallonage is 11,950 (5,000 E-85 gallons times 79% equals 3,950; 80,000 E-10 gallons times 10% equals 8,000; and thus 3,950 plus 8,000 equals 11,950). The biodiesel gallonage sold is 100, or 5,000 times 2%. The sum of 11,950 and 100, or 12,050, is divided by the total gasoline gallonage of 100,000 to arrive at a biofuel distribution percentage of 12.05%. Since this exceeds the biofuel threshold percentage of 6% for a retail dealer selling 200,000 gallons or less, the biofuel threshold disparity percentage is 0%. This results in an ethanol promotion tax credit of 6.5 cents times 11,950, or \$776.75.

In addition, the taxpayer is entitled to claim the E-85 gasoline promotion tax credit equal to 20 cents multiplied by 5,000 gallons, or \$1,000.

EXAMPLE 2. A taxpayer that is a retail dealer of gasoline operates only one motor fuel site in Iowa. The number of gallons of gasoline sold at this site in 2010 equals 300,000 gallons. This consisted of 10,000 gallons of E-85 gasoline, 230,000 gallons of E-10 (10% ethanol blended gasoline) and 60,000 gallons not containing ethanol. The average ethanol content of E-85 gasoline is assumed to be 79%. The taxpayer also sold at this site during 2010 60,000 gallons of diesel fuel, of which 25,000 gallons was B-2 (2% biodiesel). The ethanol gallonage is 30,900 (10,000 E-85 gallons times 79% equals 7,900; 230,000 E-10 gallons times 10% equals 23,000; and thus 7,900 plus 23,000 equals 30,900). The biodiesel gallonage sold is 500, or 25,000 times 2%. The sum of 30,900 and 500, or 31,400, is divided by the total gasoline gallonage of 300,000 to arrive at a biofuel distribution percentage of 10.47%. Since this is less than the biofuel threshold percentage of 11% for a retail dealer selling more than 200,000 gallons, the biofuel threshold disparity percentage is .53%. This results in an ethanol promotion tax credit of 4.5 cents times 30,900, or \$1,390.50.

In addition, the taxpayer is entitled to claim the E-85 gasoline promotion tax credit equal to 20 cents multiplied by 10,000 gallons, or \$2,000.

EXAMPLE 3. A taxpayer that is a retail dealer of gasoline operates three motor fuel sites in Iowa during 2009, and each site sold 80,000 gallons of gasoline. Sites A and B each sold 70,000 gallons of E-10 (10% ethanol blended gasoline) and 10,000 gallons not containing ethanol. Site C sold 60,000 gallons of E-10, 10,000 gallons of E-85, and 10,000 gallons not containing ethanol. The average ethanol content of E-85 gasoline is assumed to be 79%. The retail dealer did not sell any diesel fuel at any of the motor fuel sites. The ethanol gallonage is 27,900, as shown below:

Site A – 70,000 times 10% equals	7,000
Site B – 70,000 times 10% equals	7,000
Site C – 60,000 times 10% equals	6,000
Site C – 10,000 times 79% equals	7,900
Total	27,900

The ethanol gallonage of 27,900 is divided by the gasoline gallonage of 240,000 to arrive at a biofuel distribution percentage of 11.63%. Since this exceeds the biofuel threshold percentage of 10% for a retail dealer selling more than 200,000 gallons, the biofuel threshold disparity percentage is 0%. The credit is computed separately for each motor fuel site, and the ethanol promotion credit equals \$1,813.50, as shown below:

Site A – 7,000 times 6.5 cents equals	\$455.00
Site B – 7,000 times 6.5 cents equals	\$455.00
Site C – 13,900 times 6.5 cents equals	\$903.50
Total	\$1,813.50

Since the biofuel distribution percentage and the biofuel threshold percentage disparity are computed on a statewide basis for all gallons sold in Iowa, the 6.5 cent tax credit rate is applied to the total ethanol gallonage, even if Sites A and B did not meet the biofuel threshold percentage of 10% for 2009.

In addition, the taxpayer is entitled to claim the E-85 gasoline promotion tax credit equal to 20 cents multiplied by 10,000 gallons, or \$2,000.

EXAMPLE 4. A taxpayer that is a retail dealer of gasoline has a fiscal year ending March 31, 2011, and operates one motor fuel site in Iowa. The taxpayer sold more than 200,000 gallons of gasoline during the 2010 calendar year and expects to sell more than 200,000 gallons of gasoline during the 2011 calendar year. The ethanol gallonage is 30,000 for the period from April 1, 2010, through December 31, 2010, and the ethanol gallonage is 8,000 for the period from January 1, 2011, through March 31, 2011. The biofuel distribution percentage is 11.5% for the period from April 1, 2010, through December 31, 2010, and the biofuel distribution percentage is 11.8% for the period from January 1, 2011, through March 31, 2011. This results in a biofuel threshold percentage disparity of 0% (11.0 minus 11.5) for the period from April 1, 2010, through December 31, 2010, and a biofuel threshold percentage disparity of .2% (12.0 minus 11.8) for the period from January 1, 2011, through March 31, 2011. The taxpayer is entitled to an ethanol promotion tax credit of \$2,310 for the fiscal year ending March 31, 2011, as shown below:

30,000 times 6.5 cents equals	\$1,950
8,000 times 4.5 cents equals	360
Total	<u>\$2,310</u>

EXAMPLE 5. A taxpayer that is a retail dealer of gasoline has a fiscal year ending April 30, 2009, and operates one motor fuel site in Iowa. The taxpayer expects to sell more than 200,000 gallons of gasoline during the 2009 calendar year. The ethanol gallonage is 50,000 gallons for the period from January 1, 2009, through April 30, 2009. The biofuel distribution percentage is 7.7% for the period from January 1, 2009, through April 30, 2009, which results in a biofuel threshold percentage disparity of 2.3% (10.0 minus 7.7). The taxpayer is entitled to claim an ethanol promotion tax credit of \$1,250 (50,000 gallons times 2.5 cents) on the taxpayer's Iowa income tax return for the period ending April 30, 2009.

In lieu of claiming the credit on the return for the period ending April 30, 2009, the taxpayer may claim the ethanol promotion tax credit on the tax return for the period ending April 30, 2010, including the ethanol gallonage for the period from January 1, 2009, through April 30, 2010. In this case, the taxpayer will compute the biofuel distribution percentage for the period from January 1, 2009, through December 31, 2009, to determine the proper tax credit rate to be applied to the ethanol gallonage for the period from January 1, 2009, through December 31, 2009.

EXAMPLE 6. Assume the same facts as Example 3, except that the gallons were sold in 2011. The taxpayer chose the companywide method to compute the biofuel threshold percentage disparity and the tax credit. The biofuel distribution percentage is 11.63%, and since the biofuel threshold percentage is 12% for retailers selling more than 200,000 gallons of motor fuel, the biofuel threshold percentage disparity is 0.37%. This results in an ethanol promotion tax credit on a companywide basis of 6 cents multiplied by the ethanol gallonage of 27,900 or \$1,674.

EXAMPLE 7. Assume the same facts as Example 3, except that the gallons were sold in 2011. The taxpayer chose the site-by-site method to compute the biofuel threshold percentage disparity and the tax credit. The biofuel threshold percentage is still 12% since the retailer sold more than 200,000 gallons of motor fuel at all sites in Iowa. The biofuel distribution percentage for Site A and Site B is 7,000 divided by 80,000, or 8.75%. The biofuel threshold percentage disparity for Site A and Site B is 3.25%, or 12% less 8.75%. The biofuel distribution percentage for Site C is 13,900 divided by 80,000, or 17.38%. The biofuel threshold percentage disparity for Site C is 0% since the biofuel distribution percentage exceeds the biofuel threshold percentage. This results in an ethanol promotion tax credit on a site-by-site basis of \$1,462, as shown below:

Site A – 7,000 times 2.5 cents equals	\$175
Site B – 7,000 times 2.5 cents equals	\$175
Site C – 13,900 times 8 cents equals	\$1,112
Total	\$1,462

This rule is intended to implement Iowa Code section 422.33 as amended by 2011 Iowa Acts, Senate File 531.

[ARC 9821B, IAB 11/2/11, effective 12/7/11]

701—52.37(422) Charitable conservation contribution tax credit. Effective for tax years beginning on or after January 1, 2008, a charitable conservation contribution tax credit is available for corporation income tax which is equal to 50 percent of the fair market value of a qualified real property interest located in Iowa that is conveyed as an unconditional charitable donation in perpetuity by a taxpayer to a qualified organization exclusively for conservation purposes.

52.37(1) Definitions. The following definitions are applicable to this rule:

“*Conservation purpose*” means the same as defined in Section 170(h)(4) of the Internal Revenue Code, with the exception that a conveyance of land for open space for the purpose of fulfilling density requirements to obtain subdivision or building permits is not considered a conveyance for a conservation purpose.

“*Qualified organization*” means the same as defined in Section 170(h)(3) of the Internal Revenue Code.

“*Qualified real property interest*” means the same as defined in Section 170(h)(2) of the Internal Revenue Code. Conservation easements and bargain sales are examples of a qualified real property interest.

52.37(2) Computation of the credit. The credit equals 50 percent of the fair market value of the qualified real property interest. There are numerous federal revenue regulations, rulings, court cases and other provisions relating to the determination of the value of a qualified real property interest, and these are equally applicable in determining the amount of the charitable conservation contribution tax credit.

The maximum amount of the tax credit is \$100,000. The amount of the contribution for which the tax credit is claimed shall not be claimed as a deduction for charitable contributions for Iowa income tax purposes.

52.37(3) Claiming the tax credit. The tax credit is claimed on Form IA 148, Tax Credits Schedule. The taxpayer must include a copy of federal Form 8283, Noncash Charitable Contributions, which reflects the calculation of the fair market value of the real property interest, with the Iowa return for the year in which the contribution is made. If a qualified appraisal of the property or other relevant information is required to be included with federal Form 8283 for federal tax purposes, the appraisal and other relevant information must also be included with the Iowa return.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following 20 years or until used, whichever is the earlier.

If the taxpayer claiming the credit is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual’s pro rata share of the individual’s earnings of the partnership, limited liability company, S corporation, or estate or trust.

52.37(4) Examples. The following noninclusive examples illustrate how this rule applies:

EXAMPLE 1: A taxpayer conveys a real property interest with a fair market value of \$150,000 to a qualified organization during 2008. The tax credit is equal to \$75,000, or 50 percent of the \$150,000 fair market value of the real property. The taxpayer cannot claim the \$150,000 as a deduction for charitable contributions on the Iowa corporation income tax return for 2008.

EXAMPLE 2: A taxpayer conveys a real property interest with a fair market value of \$500,000 to a qualified organization during 2009. The tax credit is limited to \$100,000, which equates to \$200,000 of the contribution being eligible for the tax credit. The remaining amount of \$300,000 (\$500,000 less

\$200,000) can be claimed as a deduction for charitable contributions on the Iowa corporation income tax return for 2009.

This rule is intended to implement Iowa Code Supplement section 422.33 as amended by 2008 Iowa Acts, House File 2700, section 63.

[ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.38(422) School tuition organization tax credit. Effective for tax years beginning on or after July 1, 2009, a school tuition organization tax credit is available which is equal to 65 percent of the amount of the voluntary cash or noncash contribution made by a corporation taxpayer to a school tuition organization. For tax years beginning on or after January 1, 2013, the credit is available for S corporations, partnerships, limited liability companies, estates and trusts where the income is taxed directly to the individual shareholders, partners, members or beneficiaries. The amount of credit claimed by an individual shall be based on the pro rata share of the individual's earnings of the corporation, partnership, limited liability company, estate or trust. For information on the initial registration, participation forms and reporting requirements for school tuition organizations, see rule 701—42.32(422).

52.38(1) Amount of tax credit authorized. Of the \$7.5 million of school tuition organization tax credits authorized for the 2009 through 2011 calendar years, no more than 25 percent, or \$1,875,000, can be authorized for corporation income tax taxpayers. Of the \$8.75 million of school tuition organization tax credits authorized for 2012 and 2013, no more than 25 percent, or \$2,187,500, can be authorized for corporation income tax taxpayers. Of the \$12 million of school tuition organization tax credits authorized for 2014 and subsequent calendar years, no more than 25 percent, or \$3 million, can be authorized for corporation income tax taxpayers.

52.38(2) Issuance of tax credit certificates. The school tuition organization shall issue tax credit certificates to each taxpayer who made a cash or noncash contribution to the school tuition organization. The tax credit certificate will contain the name, address and tax identification number of the taxpayer, the amount and date that the contribution was made, the amount of the credit, the tax year that the credit may be applied, the school tuition organization to which the contribution was made, and the tax credit certificate number.

52.38(3) Claiming the tax credit. The taxpayer must include the tax credit certificate with the tax return for which the credit is claimed. Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier. The taxpayer may not claim a deduction for charitable contributions for Iowa corporation income tax purposes for the amount of the contribution made to the school tuition organization.

This rule is intended to implement Iowa Code section 422.33.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 9876B, IAB 11/30/11, effective 1/4/12; ARC 1102C, IAB 10/16/13, effective 11/20/13; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.39(15,422) Redevelopment tax credit. The economic development authority is authorized by the general assembly and the governor to oversee the implementation and administration of the redevelopment tax credit program. Effective for tax years beginning on or after July 1, 2009, a taxpayer whose project has been approved by the Iowa brownfield redevelopment advisory council and the economic development authority may claim a redevelopment tax credit once the taxpayer has been issued a tax credit certificate for the project by the economic development authority. The credit is based on the taxpayer's qualifying investment in a brownfield or grayfield site. The administrative rules for the economic development authority's administration of this program, including definitions of brownfield and grayfield sites, may be found in rules 261—65.11(15) and 261—65.12(15).

52.39(1) Eligibility for the credit. The economic development authority is responsible for developing a system for registration and authorization of projects receiving redevelopment tax credits. For more information, see Iowa Administrative Code 261—Chapter 65.

52.39(2) Amount of the credit.

a. Maximum credit total. For the fiscal year beginning July 1, 2009, the maximum amount of tax credits allowed is \$1 million, and the amount of credit authorized for any one redevelopment project

cannot exceed \$100,000. For the fiscal year beginning July 1, 2011, the maximum amount of tax credits allowed cannot exceed \$5 million, and the amount of credit authorized for any one redevelopment project cannot exceed \$500,000. For the fiscal year beginning July 1, 2012, the maximum amount of tax credits allowed cannot exceed \$10 million, and the amount of credit authorized for any one redevelopment project cannot exceed \$1 million. For the fiscal year beginning July 1, 2013, and for each subsequent fiscal year, the maximum amount of tax credits issued by the authority shall be an amount determined by the economic development authority board but not in excess of the amount established pursuant to Iowa Code section 15.119.

b. Maximum credit per project. The maximum amount of a tax credit for a qualifying investment in any one qualifying redevelopment project shall not exceed 10 percent of the maximum amount of tax credits available in any one fiscal year pursuant to paragraph 52.39(2)“a.”

c. Percentage computation. The amount of the tax credit shall equal one of the following:

- (1) Twelve percent of the taxpayer’s qualifying investment in a grayfield site.
- (2) Fifteen percent of the taxpayer’s qualifying investment in a grayfield site if the qualifying redevelopment project meets the requirements of green development as defined in rule 261—65.2(15).
- (3) Twenty-four percent of the taxpayer’s qualifying investment in a brownfield site.
- (4) Thirty percent of the taxpayer’s qualifying investment in a brownfield site if the qualifying redevelopment project meets the requirements of green development as defined in rule 261—65.2(15).

52.39(3) Claiming the credit.

a. Certificate issuance. Upon completion of the project, the economic development authority will issue a tax credit certificate to the taxpayer. The tax credit certificate shall include the taxpayer’s name, address and federal identification number, the tax type for which the credit will be claimed, the amount of the credit, the tax year for which the credit may be claimed and the tax credit certificate number. In addition, the tax credit certificate will include a place for the name and tax identification number of a transferee and the amount of the tax credit being transferred, as provided in subrule 52.39(4). To claim the tax credit, the taxpayer must include the tax credit certificate with the tax return for the tax period set forth on the certificate.

b. Pro rata share. If a taxpayer claiming the tax credit is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual’s pro rata share of the individual’s earnings of the partnership, limited liability company, S corporation, or estate or trust.

c. Carryforward. Except as provided in paragraph 52.39(3)“d,” any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier. The tax credit shall not be carried back to a tax year prior to the year in which the taxpayer redeems the credit.

d. Refundability. A tax credit in excess of the taxpayer’s liability for the tax year is refundable if all of the conditions of economic development authority 261—paragraph 65.11(4)“b” are met.

52.39(4) Transfer of the credit. The redevelopment tax credit can be transferred to any person or entity. However, a certificate indicating that the credit is refundable is only transferrable to the extent permitted by economic development authority 261—paragraph 65.11(4)“b.”

a. Submission of transferred tax credit certificate to the department—information required. Within 90 days of transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department of revenue, along with a statement which contains the transferee’s name, address and tax identification number and the amount of the tax credit being transferred, the amount of all consideration provided in exchange for the tax credit, and the names of recipients of any consideration provided in exchange for the tax credit. If a payment of money was any part of the consideration provided in exchange for the tax credit, the transferee shall list the amount of the payment of money in its statement to the department of revenue. If any part of the consideration provided in exchange for the tax credit included nonmonetary consideration, including but not limited to any promise, representation, performance, discharge of debt or nonmonetary rights or property, the transferee shall describe the nature of nonmonetary consideration and disclose any value the transferor

and transferee assigned to the nonmonetary consideration. The transferee must indicate on its statement to the department of revenue if no consideration was provided in exchange for the tax credit. If the transferee is a partnership, limited liability company, S corporation, or estate or trust claiming the credit for individual or corporation income tax, the transferee shall provide a list of the partners, members, shareholders or beneficiaries and information on how the redevelopment tax credit should be divided among the partners, members, shareholders or beneficiaries. The transferee shall also provide the tax identification numbers and addresses of the partners, members, shareholders or beneficiaries.

b. Issuance of replacement certificate by the department. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee, the department of revenue will issue a replacement tax credit certificate to the transferee.

c. Claiming the transferred tax credit. The replacement tax credit certificate must contain the same information as that on the original tax credit certificate and must have the same effective taxable year as the original tax credit certificate. The replacement tax credit certificate may reflect a different tax type than the original tax credit certificate. The transferee may use the amount of the tax credit for any tax year for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit certificate shall not be included in Iowa taxable income for individual income tax, corporation income tax, or franchise tax purposes. Any consideration paid for the transfer of the tax credit certificate shall not be deducted from Iowa taxable income for individual income tax, corporation income tax, or franchise tax purposes.

52.39(5) Basis reduction of the redevelopment property. The increase in the basis of the redevelopment property that would otherwise result from the qualified redevelopment costs shall be reduced by the amount of the redevelopment tax credit. For example, if a qualifying investment in a grayfield site totaled \$100,000 for which a \$12,000 redevelopment tax credit was issued, the increase in the basis of the property would total \$88,000 for Iowa tax purposes (\$100,000 less \$12,000).

This rule is intended to implement Iowa Code sections 15.293A, 422.33 and 15.119.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 9876B, IAB 11/30/11, effective 1/4/12; ARC 1102C, IAB 10/16/13, effective 11/20/13; ARC 1949C, IAB 4/1/15, effective 5/6/15]

701—52.40(15) High quality jobs program. Effective for tax periods beginning on or after July 1, 2009, a business which qualifies under the high quality jobs program is eligible to receive tax credits. The high quality jobs program replaces the high quality job creation program. An eligible business under the high quality jobs program must be approved by the Iowa department of economic development and meet the qualifications of Iowa Code section 15.329. The tax credits available under the high quality jobs program are based upon the number of jobs created or retained that pay a qualifying wage threshold and the amount of qualifying investment. The administrative rules for the high quality jobs program for the Iowa department of economic development may be found at 261—Chapter 68.

52.40(1) Research activities credit. An eligible business approved under the high quality jobs program is eligible for an additional research activities credit as described in subrule 52.7(4) for awards issued by the Iowa department of economic development prior to July 1, 2010. The eligible business is eligible for the research activities credit as described in subrule 52.7(6) for awards issued by the Iowa department of economic development on or after July 1, 2010.

Research activities allowable for the Iowa research activities credit include expenses related to the development and deployment of innovative renewable energy generation components manufactured or assembled in Iowa; such expenses related to the development and deployment of innovative renewable energy generation components are not eligible for the federal credit for increasing research activities. For purposes of this subrule, innovative renewable energy generation components do not include components with more than 200 megawatts in installed effective nameplate capacity. The research activities credit related to renewable energy generation components under the high quality jobs program and the enterprise zone program shall not exceed \$2 million for the fiscal year ending June 30, 2010, and \$1 million for the fiscal year ending June 30, 2011.

These expenses related to the development and deployment of innovative renewable energy generation components are applicable only to the additional research activities credit set forth in this

subrule and in subrule 52.7(5) for businesses in enterprise zones, and are not applicable to the research activities credit set forth in subrule 52.7(3).

52.40(2) Investment tax credit. An eligible business can claim an investment tax credit equal to a percentage of the new investment directly related to new jobs created or retained by the location or expansion of an eligible business. The percentage is equal to the amount provided in Iowa department of economic development 261—subrule 68.4(7).

The determination of the new investment eligible for the investment tax credit, the eligibility of a refundable investment tax credit for value-added agricultural product or biotechnology-related projects and the repayment of investment tax credits for the high quality jobs program is the same as set forth in subrule 52.28(2) for the high quality job creation program.

52.40(3) Repayment of benefits. If an eligible business fails to maintain the requirements of the high quality jobs program, the taxpayer may be required to repay all or a portion of the tax incentives taken on Iowa returns. Irrespective of the fact that the statute of limitations to assess the taxpayer for repayment of the tax credits may have expired, the department may proceed to collect the tax incentives forfeited by failure of the eligible business to maintain the requirements of the high quality jobs program because the repayment is a recovery of an incentive, rather than an adjustment to the taxpayer's tax liability. Details on the calculation of the repayment can be found in 261—subrule 187.5(4) of the administrative rules of the economic development authority. If the business is a partnership, limited liability company, S corporation, estate or trust where the income of the taxpayer is taxed to the individual owner(s) of the business, the department may proceed to collect the tax incentives against the partners, members, shareholders or beneficiaries to whom the tax incentives were passed through. See Decision of the Administrative Law Judge in *Damien & Colette Trebilcock, et al.*, Docket No. 11DORF 042-044, June 11, 2012.

This rule is intended to implement Iowa Code chapter 15.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.41(15) Aggregate tax credit limit for certain economic development programs. Effective for the fiscal year beginning July 1, 2009, awards made under certain economic development programs cannot exceed \$185 million during a fiscal year. Effective for fiscal years beginning on or after July 1, 2010, but beginning before July 1, 2012, awards made under these economic development programs cannot exceed \$120 million during a fiscal year. Effective for fiscal years beginning on or after July 1, 2012, awards made under these economic development programs cannot exceed \$170 million. For fiscal years beginning on or after July 1, 2010, but beginning before July 1, 2014, these programs include the assistive device tax credit program, the enterprise zone program, the housing enterprise zone program, the high quality jobs program, the redevelopment tax credit program, tax credits for investments in qualifying businesses and community-based seed capital funds, and the innovation fund tax credit program. For fiscal years beginning on or after July 1, 2014, these programs include the assistive device tax credit program, the workforce housing tax incentives program, the high quality jobs program, the redevelopment tax credit program, tax credits for investments in qualifying businesses and community-based seed capital funds, and the innovation fund tax credit program. The administrative rules for the aggregate tax credit limit for the economic development authority may be found at 261—Chapter 76.

This rule is intended to implement Iowa Code section 15.119 as amended by 2014 Iowa Acts, House File 2448.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 1102C, IAB 10/16/13, effective 11/20/13; ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.42(16,422) Disaster recovery housing project tax credit. For tax years beginning on or after January 1, 2011, but before January 1, 2015, a disaster recovery housing project tax credit is available for corporation income tax. The credit is equal to 75 percent of the taxpayer's qualifying investment in a disaster recovery housing project and is administered by the Iowa finance authority. Qualifying investments are costs incurred on or after May 12, 2009, and prior to July 1, 2010, related to a disaster

recovery housing project. Eligible properties must have applied for and received an allocation of federal low-income housing tax credits under Section 42 of the Internal Revenue Code to be eligible for the tax credit. The administrative rules of the Iowa finance authority for the disaster recovery housing project tax credit may be found at 265—Chapter 34. The tax credit is repealed effective January 1, 2015.

52.42(1) Issuance of tax credit certificates. Upon completion of the project and verification of the amount of investment made in the disaster recovery housing project, the Iowa finance authority will issue a tax credit certificate to the taxpayer. The tax credit certificate shall include the taxpayer's name, address, tax identification number, amount of credit, and the tax year for which the credit may be claimed. The tax credit certificates will be issued on a first-come, first-served basis. The tax credit cannot be transferred to any other person or entity.

52.42(2) Limitation of tax credits. The tax credit shall not exceed 75 percent of the taxpayer's qualifying investment in a disaster recovery housing project. The maximum amount of tax credits issued by the Iowa finance authority shall not exceed \$3 million in each of the five consecutive years beginning in the 2011 calendar year. A tax credit certificate shall be issued by the Iowa finance authority for each year that the credit can be claimed.

52.42(3) Claiming the tax credit. The amount of the tax credit earned by the taxpayer will be divided by five and an amount equal thereto will be claimed on the Iowa corporation income tax return commencing with the tax year beginning on or after January 1, 2011. A taxpayer is not entitled to a refund of the excess tax for any tax credit in excess of the tax liability, and also is not entitled to carry forward any excess credit to a subsequent tax year.

If the taxpayer is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

The increase in the basis of the property that would otherwise result from the disaster recovery housing investment shall be reduced by the amount of the tax credit allowed.

EXAMPLE: A corporation whose tax year ends on December 31 incurs \$100,000 of costs related to an eligible disaster recovery housing project. The taxpayer receives a tax credit of \$75,000, and \$15,000 of credit can be claimed on each Iowa corporation income tax return for the periods ending December 31, 2011, through December 31, 2015. If the tax liability for the corporation for the period ending December 31, 2011, is \$10,000, the credit is limited to \$10,000, and the remaining \$5,000 credit cannot be used. If the tax liability for the corporation for the period ending December 31, 2012, is \$25,000, the credit is limited to \$15,000, and the remaining \$5,000 credit from 2011 cannot be used to reduce the tax for 2012.

52.42(4) Potential recapture of tax credits. If the taxpayer fails to comply with the eligibility requirements of the project or violates local zoning and construction ordinances, the Iowa finance authority can void the tax credit and the department of revenue shall seek recovery of the value of any tax credit claimed on a corporation income tax return.

This rule is intended to implement Iowa Code sections 16.211, 16.212 and 422.33 as amended by 2014 Iowa Acts, Senate File 2328.

[ARC 8605B, IAB 3/10/10, effective 4/14/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—52.43(422) E-15 plus gasoline promotion tax credit. Effective for eligible gallons sold on or after July 1, 2011, a retail dealer of gasoline may claim an E-15 plus gasoline promotion tax credit. "E-15 plus gasoline" means ethanol blended gasoline formulated with a minimum percentage of between 15 percent and 69 percent of volume of ethanol, if the formulation meets the standards provided in Iowa Code section 214A.2. For purposes of this rule, tank wagon sales are considered retail sales. The credit is calculated on Form IA138. The tax credit is calculated by multiplying the total number of E-15 plus gallons sold by the retail dealer during the tax year by the following designated rates:

Gallons sold from July 1, 2011, through December 31, 2013	3 cents
Gallons sold from January 1 through May 31 and from September 16 through December 31 for the 2014-2017 calendar years	3 cents
Gallons sold from June 1 through September 15 for the 2014-2017 calendar years	10 cents

A taxpayer may claim the E-15 plus gasoline promotion tax credit even if the taxpayer also claims the ethanol promotion tax credit provided in rule 701—52.36(422) for gallons sold for the same tax year for the same ethanol gallons.

Any credit in excess of the taxpayer's tax liability is refundable. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

52.43(1) Fiscal year filers. For taxpayers whose tax year is not on a calendar-year basis, the taxpayer may compute the tax credit on the gallons of E-15 plus gasoline sold during the year using the designated rates as shown above. Because the tax credit is repealed on January 1, 2018, a taxpayer whose tax year ends prior to December 31, 2017, may continue to claim the tax credit in the following tax year for any E-15 plus gallons sold through December 31, 2017. For a retail dealer whose tax year is not on a calendar-year basis and who did not claim the E-15 plus credit on the previous return, the dealer may claim the credit for the current tax year for gallons sold for the period beginning on July 1 of the previous tax year until the last day of the previous tax year. However, for taxpayers whose fiscal year ends before December 31, 2011, the dealer must claim the credit for the current tax year for gallons sold for the period beginning on July 1 of the previous tax year until the last day of the previous tax year.

EXAMPLE 1: A taxpayer who is a retail dealer of gasoline has a fiscal year ending October 31, 2011. The taxpayer sold 2,000 gallons of E-15 plus gasoline for the period from July 1, 2011, through October 31, 2011, and sold 7,000 gallons of E-15 plus gasoline for the period from November 1, 2011, through October 31, 2012. The taxpayer is entitled to a total E-15 plus gasoline promotion tax credit of \$270 for the fiscal year ending October 31, 2012, which consists of a \$60 credit (2,000 gallons multiplied by 3 cents) for the period from July 1, 2011, through October 31, 2011, and a credit of \$210 (7,000 gallons multiplied by 3 cents) for the period from November 1, 2011, through October 31, 2012.

EXAMPLE 2: A taxpayer who is a retail dealer of gasoline has a fiscal year ending April 30, 2012. The taxpayer sold 4,000 gallons of E-15 plus gasoline between July 1, 2011, and April 30, 2012. The taxpayer sold 9,000 gallons of E-15 plus gasoline between May 1, 2012, and April 30, 2013. The taxpayer is entitled to claim an E-15 plus gasoline promotion tax credit of \$120 (4,000 gallons times 3 cents) for the fiscal year ending April 30, 2012. In lieu of claiming the credit on the return for the period ending April 30, 2012, the taxpayer can claim the E-15 plus gasoline promotion tax credit on the tax return for the period ending April 30, 2013, for all E-15 plus gasoline gallons sold for the period from July 1, 2011, through April 30, 2013.

EXAMPLE 3: A taxpayer who is a retail dealer of gasoline has a fiscal year ending February 28, 2018. The taxpayer sold 20,000 gallons of E-15 plus gasoline for the period from March 1, 2017, through February 28, 2018, of which 16,000 gallons were sold between March 1, 2017, and December 31, 2017. Six thousand of these 16,000 gallons were sold between June 1, 2017, and September 15, 2017. The taxpayer is entitled to claim an E-15 plus gasoline promotion tax credit of \$900 (10,000 gallons times 3 cents plus 6,000 gallons times 10 cents) on the taxpayer's Iowa income tax return for the period ending February 28, 2018.

52.43(2) Allocation of credit to owners of a business entity. If a taxpayer claiming the E-15 plus gasoline promotion tax credit is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement Iowa Code section 422.33 and 2014 Iowa Acts, Senate File 2344. [ARC 9821B, IAB 11/2/11, effective 12/7/11; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—52.44(422) Solar energy system tax credit. For tax years beginning on or after January 1, 2012, a solar energy system tax credit is available for business property located in Iowa.

52.44(1) Property eligible for the tax credit. The following property located in Iowa is eligible for the tax credit:

a. Equipment which uses solar energy to generate electricity, to heat or cool (or to provide hot water for use in) a structure, or to provide solar process heat (excepting property used to generate energy for the purposes of heating a swimming pool) and which is eligible for the federal energy credit as described in Section 48(a)(3)(A)(i) of the Internal Revenue Code.

b. Equipment which uses solar energy to illuminate the inside of a structure using fiber-optic distributed sunlight and which is eligible for the federal energy credit as described in Section 48(a)(3)(A)(ii) of the Internal Revenue Code.

52.44(2) Calculation of credit for systems installed during tax years beginning on or after January 1, 2012, but before January 1, 2014. The credit is equal to the sum of the following federal tax credits:

a. Fifty percent of the federal energy credit provided in Section 48(a)(2)(A)(i)(II) of the Internal Revenue Code.

b. Fifty percent of the federal energy credit provided in Section 48(a)(2)(A)(i)(III) of the Internal Revenue Code.

The amount of tax credit claimed by a taxpayer related to paragraphs 52.44(2)“*a*” and “*b*” cannot exceed \$15,000 for a tax year.

The federal energy tax credits for solar energy systems are allowed for installations that are placed in service before January 1, 2014. The solar energy system must be placed in service on or after January 1, 2012, to qualify for the Iowa credit. If the taxpayer installed a solar energy system and initially reported the federal tax credit for a tax year beginning prior to January 1, 2012, no Iowa credit will be allowed.

EXAMPLE: A taxpayer reported a \$9,000 energy credit on the 2011 federal return due to an installation of a solar energy system that was placed in service in 2011. The taxpayer applied \$4,000 of the credit on the taxpayer’s 2011 federal return since the federal tax liability was \$4,000. The remaining \$5,000 of federal credit was applied on the 2012 federal return. No credit will be allowed on the 2012 Iowa return since the installation was placed in service before January 1, 2012.

52.44(3) Calculation of credit for systems installed during tax years beginning on or after January 1, 2014, but before January 1, 2017. The credit is equal to the sum of the following federal tax credits:

a. Sixty percent of the federal energy credit provided in Section 48(a)(2)(A)(i)(II) of the Internal Revenue Code.

b. Sixty percent of the federal energy credit provided in Section 48(a)(2)(A)(i)(III) of the Internal Revenue Code.

The amount of tax credit claimed by a taxpayer related to paragraphs 52.44(3)“*a*” and “*b*” cannot exceed \$20,000 for a tax year.

The federal energy tax credit for solar energy systems is allowed for installations that are placed in service on or before December 31, 2016. Therefore, the Iowa tax credit is available for installations placed in service before January 1, 2017. If the federal energy tax credit is extended to installations placed in service on or after January 1, 2017, the Iowa credit will also be extended.

52.44(4) Application for the tax credit. No more than \$1.5 million of tax credits for solar energy systems are allowed for tax years 2012 and 2013. The \$1.5 million cap also includes the solar energy system tax credits provided in rule 701—42.48(422) for individual income tax. No more than \$4.5 million of tax credits for solar energy systems is allowed for each of the tax years 2014 to 2016. The \$4.5 million cap does not include any dollars allocated to a previous tax year that roll over to the 2015 and 2016 tax years. The \$4.5 million cap also includes the solar energy system tax credits provided in rule 701—42.48(422) for individual income tax and in rule 701—58.22(422) for franchise tax. Awards are made on a first-come, first-served basis. At least \$1 million of the \$4.5 million cap for the 2014 to 2016 tax years is reserved for residential installations. If the total amount of credits for residential installations for a tax year is less than \$1 million, the remaining amount below \$1 million will be allowed for nonresidential installations. If the \$4.5 million cap for the 2014 and 2015 tax years is not reached,

the remaining amount below \$4.5 million will be allowed to be carried forward to the following tax year and shall not count toward the cap for that tax year.

a. A taxpayer may claim one tax credit for each separate and distinct solar installation. In order for an installation to be considered a separate and distinct solar installation, both of the following factors must be met:

- (1) Each installation must be eligible for the federal energy credit as provided in subrule 52.44(3).
- (2) Each installation must have separate metering.

b. In order to request the tax credit, a taxpayer must complete an application for the solar energy tax credit for each separate and distinct installation. For installations completed on or after January 1, 2014, the application must be filed by May 1 following the year of installation of the solar energy system. The application must contain the following information:

- (1) Name, address and federal identification number of the taxpayer.
- (2) Date of installation of the solar energy system.
- (3) The kilowatt capacity of the solar energy system.
- (4) Copies of invoices or other documents showing the cost of the solar energy system.
- (5) Amount of federal income tax credit for the solar energy system.
- (6) Amount of Iowa tax credit requested.
- (7) A completion sheet from a local utility company verifying that the system has been placed in service. If a completion sheet is not available from the local utility company, a statement shall be provided that is similar to the one required to be attached to federal Form 3468 when claiming the federal energy credit and that specifies the date the system was placed in service.

c. If the application is approved, the department will send a letter to the taxpayer including the amount of the tax credit and providing a tax credit certificate number. The solar energy system tax credit will be claimed on Form IA 148, Tax Credits Schedule. Any tax credit in excess of the tax liability for the tax year may be credited to the tax liability for the following ten years or until used, whichever is the earlier. The taxpayer must include federal Form 3468, Investment Credit, with any Iowa tax return claiming the solar energy system tax credit.

If the department receives applications for tax credits in excess of the \$1.5 million available for 2012 and 2013 and the \$4.5 million available for 2014 to 2016, the applications will be prioritized by the date the department received the applications. If the number of applications exceeds the \$1.5 or \$4.5 million of tax credits available, the department shall establish a wait list for the next year's allocation of tax credits and the applications shall first be funded in the order listed on the wait list. However, if the \$4.5 million cap of tax credit is reached for 2016, no applications in excess of the \$4.5 million cap will be carried over to the next year, assuming there is no extension of the federal credit.

EXAMPLE: A taxpayer submitted an application for a \$2,500 tax credit on December 1, 2012, for an installation that occurred in 2012. The application was denied on December 15, 2012, because the \$1.5 million cap had already been reached for 2012. The taxpayer will be placed on a wait list and will receive priority for receiving the tax credit for the 2013 tax year. However, if the application was submitted on December 1, 2016, for an installation that occurred in 2016 and the \$4.5 million cap had already been reached for 2016, no tax credit will be allowed for the 2017 tax year, assuming there is no extension of the federal credit.

d. A taxpayer who is eligible to receive a renewable energy tax credit provided in rule 701—52.27(422,476C) is not eligible for the solar energy system tax credit.

52.44(5) *Allocation of tax credit to owners of a business entity.* If the taxpayer claiming the tax credit based on a percentage of the federal energy credit under Section 48 of the Internal Revenue Code is a partnership, limited liability company, S corporation, estate or trust electing to have income taxed directly to the individual, the individual may claim the tax credit. The amount claimed by the individual shall be based upon the pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, estate or trust. The maximum amount of credit available to a partnership, limited liability

company, S corporation, estate or trust shall be limited to \$15,000 for installations placed in service in tax years 2012 and 2013 and \$20,000 for installations placed in service in tax years 2014 to 2016.

This rule is intended to implement Iowa Code section 422.33 as amended by 2014 Iowa Acts, House File 2473, section 76.

[ARC 0361C, IAB 10/3/12, effective 11/7/12; ARC 1303C, IAB 2/5/14, effective 3/12/14; ARC 1666C, IAB 10/15/14, effective 11/19/14]

701—52.45(422,85GA,SF452) From farm to food donation tax credit. Effective for tax years beginning on or after January 1, 2014, a taxpayer that donates a food commodity that the taxpayer produces may claim a tax credit for Iowa corporation income tax. The credit is equal to 15 percent of the value of the commodities donated during the tax year for which the credit is claimed or \$5,000, whichever is less. The value of the commodities shall be determined in the same manner as a charitable contribution of food for federal tax purposes under Section 170(e)(3)(C) of the Internal Revenue Code.

To qualify for the tax credit, the taxpayer (1) must produce the donated food commodity; (2) must transfer title to the donated food commodity to an Iowa food bank or Iowa emergency feeding organization recognized by the department; and (3) shall not receive remuneration for the transfer. The donated food commodity cannot be damaged or out-of-condition and declared to be unfit for human consumption by a federal, state, or local health official. A food commodity that meets the requirements for donated foods pursuant to the federal Emergency Food Assistance Program satisfies this requirement.

To be recognized by the department, a food bank or emergency feeding organization must either be a recognized affiliate of one of the eight partner food banks with the Iowa Food Bank Association or must register with the department. To register with the department, the organization must meet the definition of “emergency feeding organization,” “food bank,” or “food pantry” as defined by the department of human services in 441—66.1(234). The department of revenue will make registration forms available on the department’s Web site. The department will maintain a list of recognized organizations on the department’s Web site.

Food banks and emergency feeding organizations that receive eligible donations shall be required to issue receipts in a format prescribed by the department for all donations received and must annually submit to the department a receipt log of all the receipts issued during the tax year. The receipt log must be submitted in the form of a spreadsheet with column specifications as provided by the department. Receipt logs showing the donations for the previous calendar year must be delivered electronically or mailed to the department postmarked by January 15 of each year. If a receipt for a taxpayer’s claim is not provided by the organization, the taxpayer’s claim will be denied.

To claim the credit, a taxpayer shall submit to the department the original receipts that were issued by the food bank or emergency feeding organization. The receipt must include quantity information completed by the food bank or emergency feeding organization, taxpayer information, and a donation valuation consistent with Section 170(e)(3)(C) of the Internal Revenue Code completed by the taxpayer. Claims must be postmarked on or before January 15 of the year following the tax year for which the claim is requested. Once the department verifies the amount of the tax credit, a letter will be sent to the taxpayer providing the amount of the tax credit and a tax credit certificate number.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is earlier. The tax credit shall not be carried back to a tax year prior to the year in which the owner redeems the credit.

If the producer is a partnership, limited liability company, S corporation, estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual’s pro rata share of the individual’s earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement 2013 Iowa Acts, Senate File 452, division XVIII.
[ARC 1138C, IAB 10/30/13, effective 12/4/13]

701—52.46(15) Workforce housing tax incentives program. Effective July 1, 2014, a business which qualifies under the workforce housing tax incentives program is eligible to receive tax incentives for

corporation income tax. The workforce housing tax incentives program replaces the eligible housing enterprise zone program. An eligible business under the workforce housing tax incentives program must be approved by the economic development authority and must meet the requirements of 2014 Iowa Acts, House File 2448, section 15. The administrative rules for the workforce housing tax incentives program for the economic development authority may be found at 261—Chapter 48.

52.46(1) Definitions.

“*Costs directly related*” means expenditures that are incurred for construction of a housing project to the extent that they are attributable directly to the improvement of the property or its structures. “Costs directly related” includes expenditures for property acquisition, site preparation work, surveying, construction materials, construction labor, architectural services, engineering services, building permits, building inspection fees, and interest accrued on a construction loan during the time period allowed for project completion under an agreement entered into pursuant to the program. “Costs directly related” does not include expenditures for furnishings, appliances, accounting services, legal services, loan origination and other financing costs, syndication fees and related costs, developer fees, or the costs associated with selling or renting the dwelling units whether incurred before or after completion of the housing project.

“*Qualifying new investment*” means costs that are directly related to the acquisition, repair, rehabilitation, or redevelopment of a housing project in this state. For purposes of this rule, “costs directly related to acquisition” includes the costs associated with the purchase of real property or other structures. “Qualifying new investment” includes costs that are directly related to new construction of dwelling units if the new construction occurs in a distressed workforce housing community. The amount of costs that may be used to compute “qualifying new investment” shall not exceed the costs used for the first \$150,000 of value for each dwelling unit that is part of a housing project.

“Qualifying new investment” does not include the following:

1. The portion of the total cost of a housing project that is financed by federal, state, or local government tax credits, grants, forgivable loans, or other forms of financial assistance that do not require repayment, excluding the tax incentives provided under this program.
2. If a housing project includes the rehabilitation, repair, or redevelopment of an existing multi-use building, the portion of the total acquisition costs of the multi-use building, including a proportionate share of the total acquisition costs of the land upon which the multi-use building is situated, that are attributable to the street-level ground story that is used for a purpose that is other than residential.
3. Any costs, including acquisition costs, incurred before the housing project is approved by the economic development authority.

52.46(2) Workforce housing tax incentives. The economic development authority will allocate no more than \$20 million in tax incentives for this program for any fiscal year. A housing business that has entered into an agreement with the economic development authority is eligible to receive the tax incentives described in the following paragraphs:

a. Sales tax refund. A housing business may claim a refund of the sales and use tax described in rule 701—12.9(15).

b. Investment tax credit. A housing business may claim a tax credit in an amount not to exceed 10 percent of the qualifying new investment in a housing project. An individual may claim a tax credit if the housing business is a partnership, limited liability company, S corporation, estate, or trust electing to have income taxed directly to the individual. The amount claimed by the individual shall be based upon the pro rata share of the individual’s earnings from the partnership, limited liability company, S corporation, estate, or trust. Any tax credit in excess of the taxpayer’s liability for the tax year is not refundable but may be credited to the tax liability for the following five years or until depleted, whichever is earlier.

52.46(3) Claiming the tax credit. The taxpayer must receive a tax credit certificate from the economic development authority to claim the eligible housing business tax credit. The tax credit certificate shall include the taxpayer’s name, the taxpayer’s address, the taxpayer’s tax identification number, the date the project was completed, the amount of the eligible housing business tax credit and the tax year for which the credit may be claimed. In addition, the tax credit certificate shall include a

place for the name and tax identification number of a transferee and the amount of the tax credit being transferred, as provided in subrule 52.46(5). The tax credit certificate must be included with the income tax return for the tax period in which the housing is ready for occupancy.

52.46(4) Basis adjustment. The increase in the basis of the property that would otherwise result from the qualifying new investment shall be reduced by the amount of the investment tax credit. For example, if a new housing project had qualifying new investment of \$1 million which resulted in a \$100,000 investment tax credit for Iowa tax purposes, the basis of the property for Iowa income tax purposes would be \$900,000.

52.46(5) Transfer of the credit. Tax credit certificates issued under an agreement entered into pursuant to subrule 52.46(3) may be transferred to any person. Within 90 days of transfer, the transferee shall submit the transferred tax credit certificate to the department of revenue along with a statement containing the transferee's name, tax identification number, and address, the denomination that each replacement tax credit certificate is to carry, and any other information required by the department of revenue. However, tax credit certificate amounts of less than the minimum amount established in rule by the economic development authority shall not be transferable. Within 30 days of receiving the transferred tax credit certificate and the transferee's statement, the department of revenue shall issue one or more replacement tax credit certificates to the transferee. Each replacement tax credit certificate must contain the information required for the original tax credit certificate and must have the same expiration date that appeared on the transferred tax credit certificate. A tax credit shall not be claimed by a transferee under this rule until a replacement tax credit certificate identifying the transferee as the proper holder has been issued. The transferee may use the amount of the tax credit transferred for any tax year the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit shall not be deducted from Iowa taxable income for individual income, corporation income, or franchise tax purposes.

52.46(6) Repayment of benefits. If the housing business fails to maintain the requirements of Iowa Code section 15.353, the taxpayer may be required to repay all or a portion of the tax incentives the taxpayer received. Irrespective of the fact that the statute of limitations to assess the taxpayer for repayment of the income tax credit may have expired, the department may proceed to collect the tax incentives forfeited by failure of the taxpayer to maintain the requirements of Iowa Code section 15.353. This repayment is required because it is a recovery of an incentive, rather than an adjustment to the taxpayer's tax liability. Details on the calculation of the repayment can be found in subrule 261—187.5(4) of the administrative rules of the economic development authority. If the business is a partnership, limited liability company, S corporation, estate or trust where the income of the taxpayer is taxed to the individual owner(s) of the business, the department may proceed to collect the tax incentives against the partners, members, shareholders or beneficiaries to whom the tax incentives were passed through. See Decision of the Administrative Law Judge in *Damien & Colette Trebilcock, et al.*, Docket No. 11DORF 042-044, June 11, 2012.

This rule is intended to implement 2014 Iowa Acts, House File 2448.
[ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—52.47(404A,422) Historic preservation and cultural and entertainment district tax credit for projects with Part 2 applications approved on or after July 1, 2014, and agreements entered into on or after July 1, 2014. The department of cultural affairs is authorized by the general assembly to award tax credits for a percentage of the qualified rehabilitation expenditures on a qualified rehabilitation project as described in the historic preservation and cultural and entertainment district tax credit program, Iowa Code chapter 404A. The program is administered by the department of cultural affairs with the assistance of the department of revenue. The general assembly has mandated that the department of cultural affairs and the department of revenue adopt rules to jointly administer Iowa Code chapter 404A. In general, the department of cultural affairs is responsible for evaluating whether projects comply with the prescribed standards for rehabilitation while the department of revenue is responsible for evaluating whether projects comply with the tax aspects of the program.

2014 Iowa Acts, House File 2453, amended the historic preservation and cultural and entertainment district tax credit program effective July 1, 2014. The department of revenue's provisions for projects with Part 2 applications approved and tax credits reserved prior to July 1, 2014, are found in rule 701—52.18(404A,422). The department of revenue's provisions for projects with Part 2 applications approved on or after July 1, 2014, and with agreements entered into on or after July 1, 2014, are found in this rule. The department of cultural affairs' rules related to this program may be found at 223—Chapter 48. Division I of 223—Chapter 48 applies to projects with reservations approved prior to July 1, 2014. Division II of 223—Chapter 48 applies to projects with Part 2 applications approved on or after July 1, 2014, and agreements entered into on or after July 1, 2014.

Notwithstanding anything contained herein to the contrary, the department of cultural affairs shall not reserve tax credits under 2013 Iowa Code chapter 404A as amended by 2013 Iowa Acts, chapter 112, section 1, for applicants that do not have an approved Part 2 application and a tax credit reservation on or before June 30, 2014. Projects with approved Part 2 applications and provisional tax credit reservations on or before June 30, 2014, shall be governed by 2013 Iowa Code chapter 404A as amended by 2013 Iowa Acts, chapter 112, section 1; by 223—Chapter 48, Division I; and by rule 701—52.18(404A,422). Projects for which Part 2 applications were approved and agreements entered into after June 30, 2014, shall be governed by 2014 Iowa Acts, House File 2453; by 223—Chapter 48, Division II; and by this rule.

52.47(1) *Application, registration, and agreement for the historic preservation and cultural and entertainment district tax credit.* Taxpayers that want to claim a corporation income tax credit for completing a qualified rehabilitation project must submit an application for approval of the project. The application forms and instructions for the historic preservation and cultural and entertainment district tax credit are available on the department of cultural affairs' Web site. Once a project is registered, the taxpayer must enter into an agreement with the department of cultural affairs to be eligible for the credit.

52.47(2) *Computation of the amount of the historic preservation and cultural and entertainment district tax credit.* The amount of the historic preservation and cultural and entertainment district tax credit is a maximum of 25 percent of the qualified rehabilitation expenditures verified by the department of cultural affairs and the department of revenue following project completion, up to the amount specified in the agreement between the taxpayer and the department of cultural affairs.

52.47(3) *Qualified rehabilitation expenditures.* "Qualified rehabilitation expenditures" means the same as defined in rule 223—48.22(404A) of the historical division of the department of cultural affairs. In general, the department of cultural affairs evaluates whether expenditures comply with the prescribed standards for rehabilitation while the department of revenue evaluates whether expenditures comply with the tax requirements to be considered qualified rehabilitation expenditures, including whether the expenditures are in accordance with the requirements of Internal Revenue Code Section 47 and its related regulations.

a. Type of property and services eligible. In accordance with Iowa Code section 404A.1(6), the types of property and services claimed for the state tax credit must be "qualified rehabilitation expenditures" in accordance with Internal Revenue Code Section 47. Notwithstanding the foregoing sentence, expenditures incurred by an eligible taxpayer that is a nonprofit organization as defined in Iowa Code section 404A.1(4) shall be considered "qualified rehabilitation expenditures" if they are for "structural components," as that term is defined in Treasury Regulation § 1.48-1(e)(2), and for amounts incurred for architectural and engineering fees, site survey fees, legal expenses, insurance premiums, development fees and other construction-related costs.

b. Effect of financing sources on eligibility of expenditures. Qualified rehabilitation expenditures do not include expenditures financed by federal, state, or local government grants or forgivable loans unless otherwise allowed under Section 47 of the Internal Revenue Code. For an eligible taxpayer that is a nonprofit organization as defined in Iowa Code section 404A.1(4) that is not eligible for the federal rehabilitation credit, or another person that is not eligible for the federal rehabilitation credit, expenditures financed with federal, state, or local government grants or forgivable loans are not qualified rehabilitation expenditures.

52.47(4) *Completion of the qualified rehabilitation project and claiming the tax credit on the Iowa return.* After the taxpayer completes a qualified rehabilitation project, the taxpayer will be issued a certificate of completion of the project from the department of cultural affairs if the project complies with the federal standards, as defined in rule 223—48.22(404A). After the department of cultural affairs and the department of revenue verify the taxpayer's eligibility for the tax credit, the department of cultural affairs shall issue a tax credit certificate. For the taxpayer to claim the credit, the certificate must be included with the taxpayer's corporation income tax return for the tax year in which the rehabilitation project is completed or the year in which the certificate is issued, whichever is later.

a. Information required. The tax credit certificate shall include the taxpayer's name, the taxpayer's address, the taxpayer's tax identification number, the address or location of the rehabilitation project, the date the project was completed and the amount of the historic preservation and cultural and entertainment district tax credit. In addition, the tax credit certificate shall include a place for the name and tax identification number of a transferee and the amount of the tax credit being transferred, as provided in subrule 52.47(5). In addition, if the taxpayer is a partnership, limited liability company, estate or trust, and the tax credit is allocated to the owners or beneficiaries of the entity, a list of the owners or beneficiaries and the amount of credit allocated to each owner or beneficiary shall be provided with the certificate. The tax credit certificate shall be included with the income tax return for the period in which the project was completed or in which the certificate is issued, whichever is later.

b. Refund or carryforward. Any historic preservation and cultural and entertainment district tax credit in excess of the taxpayer's tax liability is fully refundable with interest computed under Iowa Code section 422.25. In lieu of claiming the refund, the taxpayer may elect to have the overpayment credited to the tax liability for the following tax year.

c. Allocation of historic preservation and cultural and entertainment district tax credits to the individual owners of the entity. A partnership, limited liability company or S corporation may designate the amount of the tax credit to be allocated to each partner, member or shareholder. The credit does not have to be allocated based on the pro rata share of earnings of the partnership, limited liability company or S corporation.

52.47(5) *Transfer of the historic preservation and cultural and entertainment district tax credit.* The historic preservation and cultural and entertainment district tax credit certificates may be transferred to any person or entity. The transferee may use the amount of the tax credit transferred against the taxes imposed in Iowa Code chapter 422, divisions II, III, and V, and in Iowa Code chapter 432, for any tax year the original transferor could have claimed the tax credit. Any credit in excess of the transferee's tax liability is not refundable. A tax credit certificate of less than \$1,000 shall not be transferable.

a. Transfer process—information required. Within 90 days of transfer of the tax credit certificate, the transferee must submit the transferred tax credit certificate to the department of revenue along with a statement that contains the transferee's name, address and tax identification number, the amount of the tax credit being transferred, the amount of all consideration provided in exchange for the tax credit and the names of recipients of any consideration provided in exchange for the tax credit. If a payment of money was any part of the consideration provided in exchange for the tax credit, the transferee shall list the amount of the payment of money in its statement to the department of revenue. If any part of the consideration provided in exchange for the tax credit included nonmonetary consideration, including but not limited to any promise, representation, performance, discharge of debt or nonmonetary rights or property, the tax credit transferee shall describe the nature of the nonmonetary consideration and disclose any value the transferor and transferee assigned to the nonmonetary consideration. The tax credit transferee must indicate on its statement to the department of revenue if no consideration was provided in exchange for the tax credit. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee, the department of revenue will issue the replacement tax credit certificate to the transferee. If the transferee is a partnership, limited liability company or S corporation, the transferee shall provide a list of the partners, members or shareholders and information on how the historic preservation and cultural and entertainment district tax credit should be divided among the partners, members or shareholders. The transferee shall also provide the tax identification numbers and addresses of the partners, members or shareholders. The certificate must have the same information

required for the original tax certificate and must have the same expiration date as the original tax credit certificate. The transferee may not claim a tax credit until a replacement certificate identifying the transferee as the proper holder has been issued.

b. Consideration. Any consideration received for the transfer of the tax credit shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

52.47(6) Appeals. Challenges to an action by the department of revenue related to tax credit transfers, claiming tax credits, tax credit revocation, or repayment or recovery of tax credits must be brought pursuant to 701—Chapter 7.

This rule is intended to implement Iowa Code chapter 404A as amended by 2014 Iowa Acts, House File 2453, and Iowa Code section 422.11D.

CHAPTER 53
DETERMINATION OF NET INCOME
[Prior to 12/17/86, Revenue Department[730]]

701—53.1(422) Computation of net income for corporations. Net income for state purposes shall mean federal taxable income, before deduction for net operating losses, as properly computed under the Internal Revenue Code, and shall include the adjustments in 701—53.2(422) to 701—53.13(422) and 701—53.17(422) to 701—53.26(422). The remaining provisions of this rule and 701—53.14(422) to 701—53.16(422) shall also be applicable in determining net income.

In the case of a corporation which is a member of an affiliated group of corporations filing a consolidated income tax return for the taxable year for federal income tax purposes, but files a separate return for state purposes, taxable income as properly computed for federal purposes is determined as if the corporation had filed a separate return for federal income tax purposes for the taxable year and each preceding taxable year for which it was a member of an affiliated group. For purposes of this paragraph, the taxpayer's separate taxable income shall be determined as if the election provided by Section 243(b)(2) of the Internal Revenue Code had been in effect for all those years.

When a federal short period return is filed and the federal taxable income is required to be adjusted to an annual basis, the Iowa taxable income shall also be adjusted to an annual basis. The tax liability for a short period is computed by multiplying the taxable income for the short period by 12 and dividing the result by the number of months in the short period. The tax is determined on the resulting total as if it were the taxable income, and the tax computed is divided by 12 and multiplied by the number of months in the short period. This adjustment shall apply only to income attributable to business carried on within the state of Iowa.

This rule is intended to implement Iowa Code section 422.35.
[ARC 9820B, IAB 11/2/11, effective 12/7/11]

701—53.2(422) Net operating loss carrybacks and carryovers. In years beginning after December 31, 1954, net operating losses shall be allowed or allowable for Iowa corporation income tax purposes to the same extent they are allowed or allowable for federal corporation income tax purposes for the same period, provided the following adjustments are made:

53.2(1) Additions to income.

a. Refunds of federal income taxes due to net operating loss and credit carrybacks shall be reflected in the following manner:

(1) Accrual basis taxpayers shall accrue refunds of federal income taxes to the year in which the net operating loss or excess credit occurs. The federal refund shall still accrue for tax periods beginning on or after January 1, 2009, even though the Iowa net operating loss carryback is not allowed.

(2) Cash basis taxpayers shall reflect refunds of federal income taxes in the return for the year in which the refunds are received. The federal refund due to any net operating loss carryback for federal income tax purposes for tax years beginning on or after January 1, 2009, must still be reflected even though the Iowa net operating loss carryback is not allowed.

b. Iowa income tax deducted on the federal return for the loss year shall be reflected as an addition to income in the year of the loss.

c. Interest and dividends received in the year of the loss on federally tax-exempt securities shall be reflected as additions to income in the year of the loss.

53.2(2) Reductions of income.

a. Federal income tax paid or accrued during the year of the net operating loss shall be reflected to the extent allowed by law as an additional deduction in the year of the loss.

b. Iowa income tax refunds reported as income for federal return purposes in the loss year shall be reflected as reductions of income in the year of the loss.

c. Interest and dividends received from federal securities during the loss year shall be reflected in the year of the loss as a reduction of income.

53.2(3) If a corporation does business both within and without Iowa, it shall make adjustments reflecting the apportionment and allocation of its operating loss on the basis of business done within and without the state of Iowa after completing the provisions of subrules 53.2(1) and 53.2(2).

a. After making the adjustments to federal taxable income as provided in 53.2(1) and 53.2(2), the total net allocable income or loss shall be added to or deducted from, as the case may be, the net federal income or loss as adjusted for Iowa tax purposes. The resulting income or loss so determined shall be subject to apportionment as provided in rules 701—54.5(422), 54.6(422) and 54.7(422). The apportioned income or loss shall be added or deducted, as the case may be, to the amount of net allocable income or loss properly attributable to Iowa. This amount is the taxable income or net operating loss attributable to Iowa for that year.

b. The net operating loss attributable to Iowa, as determined in rule 701—53.2(422), shall be subject to a 3-year carryback and a 15-year carryover provision for tax years beginning prior to August 6, 1997. This loss shall be carried back or over to the applicable year as a reduction or part of a reduction of the net income attributable to Iowa for that year. However, an Iowa net operating loss shall not be carried back to a year in which the taxpayer was not doing business in Iowa. If the election under Section 172(b)(3) of the Internal Revenue Code is made, the Iowa net operating loss shall be carried forward 15 taxable years. A copy of the federal election made under Section 172(b)(3) of the Internal Revenue Code must be attached to the Iowa corporation income tax return filed with the department.

c. For tax years beginning after August 5, 1997, but before January 1, 2009, a net operating loss attributable to Iowa, as determined in rule 701—53.2(422), incurred in a presidentially declared disaster area by a corporation engaged in a small business or in the trade or business of farming must be carried back 3 taxable years and carried forward 20 taxable years. All other net operating losses attributable to Iowa must be carried back 2 taxable years and carried forward 20 taxable years. This loss shall be carried back or over to the applicable year as a reduction or part of a reduction of the net income attributable to Iowa for that year. However, an Iowa net operating loss shall not be carried back to a year in which the taxpayer was not doing business in Iowa. If the election under Section 172(b)(3) of the Internal Revenue Code is made, the Iowa net operating loss shall be carried forward 20 taxable years. A copy of the federal election made under Section 172(b)(3) of the Internal Revenue Code must be attached to the Iowa corporation income tax return filed with the department.

d. For tax years beginning on or after January 1, 1998, but before January 1, 2009, for a taxpayer who is engaged in the trade or business of farming as defined in Section 263A(e)(4) of the Internal Revenue Code and has a loss from farming as defined in Section 172(b)(1)(F) of the Internal Revenue Code including modifications prescribed by rule by the director, the Iowa loss from the trade or business of farming is a net operating loss which may be carried back five taxable years prior to the taxable year of the loss. However, if a taxpayer has a net operating loss from the trade or business of farming for a taxable year beginning in 1998 or for a taxable year after 1998 and makes a valid election for federal income tax purposes to carry back the net operating loss two years, or three years if the loss was in a presidentially declared disaster area or related to a casualty or theft loss, the net operating loss must be carried back two years or three years for Iowa income tax purposes. A copy of the federal election made under Section 172(i)(3) of the Internal Revenue Code for the two-year or three-year carryback in lieu of the five-year carryback must be attached to the Iowa return or the Form IA 1139 Application for Refund Due to the Carryback of Corporate Farming Losses, to show why the carryback was two years or three years instead of five years. However, an Iowa net operating loss shall not be carried back to a year in which the taxpayer was not doing business in Iowa.

When the taxpayer carries on more than one trade or business within a corporate shell or files a consolidated Iowa corporation income tax return, the income or loss from each trade or business must be combined to determine the amount of net operating loss that exists and whether it is a net operating loss from the trade or business of farming.

EXAMPLE 1. The taxpayer carries on the trade or business of farming and also the trade or business of trucking for entities outside the corporate shell. For the tax year, the taxpayer had a net operating loss from farming of \$25,000 and net income from trucking of \$10,000 for a net operating loss for the year of

\$15,000 which is a net operating loss from the trade or business of farming which may be carried back 5 tax years and forward 20 tax years.

EXAMPLE 2. The taxpayer carries on the trade or business of farming and the trade or business of construction. For the tax year, the taxpayer had income from farming of \$12,000 and a net operating loss from construction of \$45,000 for a net operating loss for the year of \$33,000 which is a net operating loss from the trade or business of construction which may be carried back 2 tax years and forward 20 tax years.

EXAMPLE 3. The taxpayer carries on the trade or business of farming and the trade or business of construction. During the tax year, the taxpayer had a net operating loss of \$18,000 from farming and a net operating loss of \$9,000 from construction for a total net operating loss of \$27,000. Of this net operating loss, \$18,000 is from farming and may be carried back 5 years and forward 20 years and \$9,000 is from construction and may be carried back 2 years and forward 20 years.

e. For tax years beginning on or after January 1, 2009, a net operating loss attributable to Iowa, as determined in rule 701—53.2(422), shall be carried forward 20 taxable years. The net operating loss cannot be carried back to a previous tax year. The federal refund due to any carryback of a federal net operating loss must still be included in income as provided in subrule 53.2(1), paragraph “a.”

53.2(4) No part of a net operating loss for a year which the corporation was not subject to the imposition of Iowa corporation income tax shall be included in the Iowa net operating loss deduction applicable to any year prior to or subsequent to the year of the loss. To be deductible, a net operating loss must be sustained from that portion of the corporation’s trade or business carried on in Iowa.

53.2(5) No part of a net operating loss may be carried back or carried forward if the carryback or carryforward would be disallowed for federal income tax purposes under Sections 172(b)(1)(E) and 172(h) of the Internal Revenue Code. This provision is effective for tax years beginning on or after January 1, 1989.

53.2(6) The carryover of Iowa net operating losses after reorganizations or mergers is limited to the same extent as the carryover of a net operating loss is limited under the provisions of Sections 381 through 386 of the Internal Revenue Code and regulations thereunder or any other section of the Internal Revenue Code or regulations thereunder. Where the taxpayer files as a part of a consolidated income tax return for federal income tax purposes, but a separate return for Iowa income tax purposes, the limitation on an Iowa net operating loss carryover must be determined as though a separate income tax return was filed for federal income tax purposes.

This rule is intended to implement Iowa Code section 422.35 as amended by 2009 Iowa Acts, Senate File 483.

[ARC 8589B, IAB 3/10/10, effective 4/14/10]

701—53.3(422) Capital loss carryback.

53.3(1) Capital losses shall be allowed or allowable for Iowa corporation income tax purposes to the same extent they are allowed or allowable for federal corporation income tax purposes. Capital loss carrybacks shall be treated as an adjustment to federal taxable income to arrive at net allocable and apportionable income.

a. For accrual-basis taxpayers the federal income tax refund shall not be accrued to the loss year but rather treated as a reduction in federal income tax paid in the carryback year.

b. Cash-basis taxpayers shall include the federal income tax refund in Iowa taxable income in the year received.

c. Where the taxpayer files a separate Iowa corporation income tax return but files as part of a federal consolidated income tax return, the portion of the federal refund due to a capital loss carryback attributable to the taxpayer shall be calculated by computing the federal tax deduction in the carryback year as follows:

Separate Company Income - Separate Company Capital Loss Carryback	×	Consolidated Federal Tax	×	50%
<hr/>				
Sum of the Incomes of Profit Companies - Sum of Separate Company Capital Loss Carrybacks to Profit Companies		after Capital Loss Carryback		

53.3(2) When the carryback year has both allocable and apportionable capital gains, the capital loss carryback shall be applied pro rata on a percentage basis of the specific gain to the total gains.

EXAMPLE: Assume a taxpayer has a 1973 capital loss carryback available of \$2000. The loss would be applied in the following manner:

1970	1970	1970
<u>Total Capital Gain</u>	<u>Allocable Gain</u>	<u>Apportionable Gain</u>
\$16,000	\$4,000	\$12,000
Allocable gain	-\$4,000	
Total capital gain	-\$16,000	= ¼ or 25% of carryback to allocable gain
1970 allocable capital gain after application of loss carryback: \$4,000 less (\$2,000 × 25%) = \$3,500 net allocable capital gain.		

This rule is intended to implement Iowa Code sections 422.35 and 422.37.

701—53.4(422) Net operating and capital loss carrybacks and carryovers. If the taxpayer, for tax periods beginning prior to January 1, 2009, has both a net operating loss and a capital loss carryback to a prior tax year, the capital loss shall be carried back first and then the new operating loss offset against any remaining income.

This rule is intended to implement Iowa Code section 422.35 as amended by 2009 Iowa Acts, Senate File 483.

[ARC 8589B, IAB 3/10/10, effective 4/14/10]

701—53.5(422) Interest and dividends from federal securities. See rule 701—40.2(422) for a discussion of the exempt status of interest and dividends from federal securities.

This rule is intended to implement Iowa Code section 422.35.

701—53.6(422) Interest and dividends from foreign securities, and securities of state and their political subdivisions. Interest and dividends from foreign securities and from securities of state and their political subdivisions are to be included in Iowa taxable income. Certain types of interest and dividends, because of specific exemption, are not includable in income for federal tax purposes. To the extent such income has been excluded for federal income tax purposes, unless the item of income is specifically exempted from state taxation by the laws or constitution of Iowa or of the United States, it must be added to Iowa taxable income. See rule 701—40.3(422) for a listing of obligations of the state of Iowa and its political subdivisions, the interest from which is exempt from Iowa corporation income tax. For the tax treatment of interest or dividends from regulated investment companies (mutual funds) that invest in obligations of the type discussed in rule 701—40.3(422), see rule 701—40.52(422).

For tax years beginning on or after January 1, 1987, add dividends received from regulated investment companies exempt from federal tax under Section 852(b)(5) of the Internal Revenue Code and subtract the loss on the sale or exchange of a share of a regulated investment company held for six

months or less to the extent the loss was disallowed under Section 852(b)(4)(B) of the Internal Revenue Code.

For tax years beginning on or after January 1, 2001, add, to the extent not already included, income from the sale of obligations of the state of Iowa and its political subdivisions. Gains or losses from the sale or other disposition of bonds issued by the state of Iowa or its political subdivisions shall be included in Iowa taxable income unless the law authorizing these obligations specifically exempts the income from the sale or other disposition from Iowa corporation income tax.

This rule is intended to implement Iowa Code section 422.35 as amended by 2001 Iowa Acts, House File 715.

701—53.7(422) Safe harbor leases. For tax years ending after January 1, 1981, deductions in determining federal taxable income for sale-leaseback agreements taken as a result of the application of Section 168(f)(8) of the Internal Revenue Code shall be added in determining Iowa taxable income to the extent such deductions cannot be taken under provisions of Sections 162, 163 and 167 of the Internal Revenue Code. The lessor shall add depreciation and interest expense, and the lessee shall add rental expense. When the deduction for depreciation is not allowed under a previous provision of this rule, the lessee shall be allowed a deduction for depreciation on any property involved in a sale-leaseback agreement. This depreciation shall be computed in accordance with Section 168(a) of the Internal Revenue Code. Income received as a result of a sale-leaseback agreement shall be deducted in determining Iowa taxable income. The lessee shall deduct interest income and the lessor shall deduct rent income. Each lessor and lessee corporation shall include a copy of federal Form 6793 in its Iowa corporation income tax return for the year in which a safe harbor lease is entered into.

This rule is intended to implement Iowa Code section 422.35.

701—53.8(422) Additions to federal taxable income.

53.8(1) Disallowance of private club expenses. Rescinded IAB 11/24/04, effective 12/29/04.

53.8(2) Percentage depletion. For tax years beginning on or after January 1, 1986, add the amount that percentage depletion of an oil, gas, or geothermal well computed under Section 613 of the Internal Revenue Code is in excess of cost depletion computed under Section 611 of the Internal Revenue Code.

53.8(3) Charitable contributions relating to the charitable conservation contribution tax credit. For tax years beginning on or after January 1, 2008, a taxpayer who claims a charitable conservation contribution tax credit in accordance with rule 701—52.37(422) cannot claim a deduction for charitable contributions under Section 170 of the Internal Revenue Code for the amount of the contribution for which the tax credit is claimed for Iowa tax purposes.

53.8(4) Charitable contributions relating to school tuition organizations. For tax years beginning on or after July 1, 2009, a taxpayer who claims a school tuition organization tax credit in accordance with rule 701—52.38(422) cannot claim a deduction for charitable contributions under Section 170 of the Internal Revenue Code for the amount of the contribution to the school tuition organization for which the tax credit is claimed for Iowa tax purposes.

53.8(5) Charitable contributions relating to the endow Iowa tax credit. For tax years beginning on or after January 1, 2010, a taxpayer who claims an endow Iowa tax credit in accordance with rule 701—52.23(15E,422) cannot claim a deduction for charitable contributions under Section 170 of the Internal Revenue Code for the amount of the contribution for which the tax credit is claimed for Iowa tax purposes.

53.8(6) Charitable contributions related to the from farm to food donation tax credit. For tax years beginning on or after January 1, 2014, a taxpayer who claims a from farm to food donation tax credit in accordance with rule 701—52.45(422,85GA,SF452) cannot claim a deduction for charitable contributions under Section 170 of the Internal Revenue Code for the amount of the contribution for which the tax credit is claimed for Iowa tax purposes.

This rule is intended to implement Iowa Code section 422.35 and 2013 Iowa Acts, Senate File 452. [ARC 1303C, IAB 2/5/14, effective 3/12/14]

701—53.9(422) Gains and losses on property acquired before January 1, 1934. Where property was acquired prior to January 1, 1934, the basis as of January 1, 1934, for determining capital or other gains or losses is the higher of cost, adjusted for depreciation allowed or allowable to January 1, 1934, or fair market value as of that date. *City National Bank of Clinton v. Iowa State Tax Commission*, 251 Iowa 603, 102 N.W.2d 381 (1960).

If as a result of this provision a basis is to be used for purposes of Iowa corporation income tax which is different from the basis used for purposes of federal income tax, appropriate adjustment must be made and detailed schedules supplied in the computation of Iowa taxable income.

This rule is intended to implement Iowa Code section 422.35.

701—53.10(422) Work opportunity tax credit and alcohol and cellulosic biofuel fuels credit. Where provided for in the Internal Revenue Code, as detailed below, a deduction shall be allowed for the amount of credit to the extent that the credit increased federal taxable income.

53.10(1) For tax years beginning on or after January 1, 1977, the amount of credit allowable for federal work opportunity tax credit as provided for in Section 51 of the Internal Revenue Code shall be a deduction from Iowa taxable income to the extent the credit increased income.

53.10(2) For tax periods beginning on or after January 1, 1980, the amount of credit allowable for the federal alcohol and cellulosic biofuel fuels credit as provided for in Section 40 of the Internal Revenue Code shall be a deduction from Iowa taxable income to the extent the credit increased income.

This rule is intended to implement 2011 Iowa Code Supplement section 422.35 as amended by 2012 Iowa Acts, Senate File 2328.

[ARC 0337C, IAB 9/19/12, effective 10/24/12]

701—53.11(422) Additional deduction for wages paid or accrued for work done in Iowa by certain individuals. For tax years beginning on or after January 1, 1984, a taxpayer which is considered to be a small business corporation, as defined by subrule 53.11(2), is allowed a deduction for 50 percent of the first 12 months of wages paid or accrued during the tax years for work done in Iowa for employees first hired on or after January 1, 1984.

A handicapped individual domiciled in this state at the time of hiring.

An individual domiciled in this state at the time of hiring who meets any of the following conditions:

1. Has been convicted of a felony in this or any other state or the District of Columbia.
2. Is on parole pursuant to Iowa Code chapter 906.
3. Is on probation pursuant to Iowa Code chapter 907 for an offense other than a simple misdemeanor.
4. Is in a work release program pursuant to Iowa Code chapter 904.

An individual, whether or not domiciled in this state at the time of the hiring, who is on parole or probation and to whom the interstate probation and parole compact under Iowa Code chapter 913 applies.

For tax years beginning on or after January 1, 1989, a taxpayer which is considered to be a small business corporation, as defined by subrule 53.11(2) is allowed a deduction for 65 percent not to exceed \$20,000 of the first 12 months of wages paid or accrued during the tax year for work done in Iowa for employees first hired after January 1, 1989, who meet the above criteria.

53.11(1) The additional deduction shall not be allowed for wages paid to an individual who was hired to replace an individual whose employment was terminated within the 12-month period preceding the date of first employment. However, if the individual being replaced left employment voluntarily without good cause attributable to the employer or if the individual was discharged for misconduct in connection with the individual's employment as determined by the Iowa division of job service of the department of employment services, the additional deduction shall be allowed.

The determination of whether an individual left employment voluntarily without good cause attributable to the employer or if the individual was discharged for misconduct is a factual determination which must be made on a case-by-case basis.

53.11(2) The term “small business corporation” includes the operation of a farm but does not include the practice of a profession. The following conditions apply for the purpose of determining what constitutes a small business corporation.

a. A small business corporation shall not have had more than 20 full-time equivalent positions during each of the 26 consecutive weeks within the 52-week period immediately preceding the date on which the individual for whom an additional deduction for wages is taken was hired. Full-time equivalent position means any of the following:

1. An employment position requiring an average work week of 40 or more hours;
2. An employment position for which compensation is paid on a salaried full-time basis without regard to hours worked; or
3. An aggregation of any number of part-time positions which equal one full-time position. For purposes of this subrule each part-time position shall be categorized with regard to the average number of hours worked each week as a one-quarter, half, three-quarter, or full-time position, as set forth in the following table:

<u>Average Number of Weekly Hours</u>	<u>Category</u>
More than 0 but less than 15	¼
15 or more but less than 25	½
25 or more but less than 35	¾
35 or more	1 (full-time)

b. A small business corporation shall not have more than \$1 million in annual gross revenues or after July 1, 1984, \$3 million in annual gross revenues or as the average of the three preceding tax years. “Annual gross revenues” means total sales, before deducting returns and allowances but after deducting corrections and trade discounts, sales taxes and excise taxes based on sales, as determined in accordance with generally accepted accounting principles.

c. A small business corporation shall not be an affiliate or subsidiary of a business which is dominant in its field of operation. “Dominant in its field of operation” means having more than 20 full-time equivalent employees and more than \$1 million of annual gross revenues or after July 1, 1984, \$3 million of annual gross revenues or as the average of the three preceding tax years. “Affiliate or subsidiary of a business dominant in its field of operations” means a business which is at least 20 percent owned by a business dominant in its field of operation, or by partners, officers, directors, majority stockholders, or their equivalent, of a business dominant in that field of operation.

d. “Operation of a farm” means the cultivation of land for the production of agricultural crops, the raising of poultry, the production of eggs, the production of milk, the production of fruit or other horticultural crops, grazing or the production of livestock. Operation of a farm shall not include the production of timber, forest products, nursery products, or sod and operation of a farm shall not include a contract where a processor or distributor of farm products or supplies provides spraying, harvesting or other farm services.

e. “The practice of a profession” means a vocation requiring specialized knowledge and preparation including but not limited to the following: medicine and surgery, podiatry, osteopathy, osteopathic medicine and surgery, psychology, psychiatry, chiropractic, nursing, dentistry, dental hygiene, optometry, speech pathology, audiology, pharmacy, physical therapy, occupational therapy, mortuary science, law, architecture, engineering and surveying, and accounting.

53.11(3) Definitions.

a. The term “*handicapped person*” means any person who has a physical or mental impairment which substantially limits one or more major life activities, has a record of such impairment, or is regarded as having such an impairment.

The term handicapped does not include any person who is an alcoholic or drug abuser whose current use of alcohol or drugs prevents the person from performing the duties of employment or whose employment, by reason of current use of alcohol or drugs, would constitute a direct threat to the property or the safety of others.

b. The term “*physical or mental impairment*” means any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive; digestive; genitourinary; hemic and lymphatic; skin and endocrine; or any mental or psychological disorder, such as intellectual disability, organic brain syndrome, emotional or mental illness, and specific learning disabilities.

c. The term “*major life activities*” means functions such as caring for one’s self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

d. The term “*has a record of such impairment*” means has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activities.

e. The term “*is regarded as having such an impairment*” means:

1. Has a physical or mental impairment that does not substantially limit major life activities but that is perceived as constituting such a limitation;

2. Has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairment; or

3. Has none of the impairments defined as physical or mental impairments, but is perceived as having such an impairment.

f. The term “*successfully completing a probationary period*” includes those instances where the employee quits without good cause attributable to the employer during the probationary period or was discharged for misconduct during the probationary period.

g. The term “*probationary period*” means the period of probation for newly hired employees, if the employer has a written probationary policy. If the employer has no written probationary policy for newly hired employees, the probationary period shall be considered to be six months from the date of hire.

53.11(4) If a newly hired employee has been certified as either a vocational rehabilitation referral or an economically disadvantaged ex-convict for purposes of qualification for the work opportunity tax credit under Section 51 of the Internal Revenue Code, that employee shall be considered to have met the qualifications for the additional wage deduction.

A vocational rehabilitation referral is any individual certified by a state employment agency as having a physical or mental disability which, for the individual, constitutes or results in a substantial handicap to employment. In addition, the individual must have been referred to the employer after completion or while receiving rehabilitation services pursuant to either a state or federal approved vocational rehabilitation program.

For all other newly hired employees, the employer has the burden of proof to show that the employees meet the qualifications for the additional wage deduction.

53.11(5) The taxpayer shall include a schedule with the filing of its tax return showing the name, address, social security number, date of hiring and wages paid of each employee for which the taxpayer claims the additional deduction for wages.

53.11(6) If the employee for which an additional deduction for wages was allowed fails to successfully complete a probationary period and the taxpayer has already filed an Iowa corporation income tax return taking the additional deduction for wages, the taxpayer shall file an amended return adding back the additional deduction for wages. The amended return shall state the name and social security number of the employee who failed to successfully complete a probationary period.

53.11(7) For tax years ending after July 1, 1990, a taxpayer who did not qualify for the additional deduction for wages paid or accrued for work done in Iowa by certain individuals set forth above is allowed an additional deduction of 65 percent not to exceed \$20,000 of the first 12 months of wages paid or accrued for work done in Iowa for employees first hired on or after July 1, 1990, if the new employee is:

a. An individual domiciled in this state at the time of the hiring who meets any of the following conditions:

- (1) Has been convicted of a felony in this or any other state or the District of Columbia.
- (2) Is on parole pursuant to Iowa Code chapter 906.

(3) Is on probation pursuant to Iowa Code chapter 907, for an offense other than a simple misdemeanor.

(4) Is in a work release program pursuant to Iowa Code chapter 904, division IX.

b. An individual, whether or not domiciled in this state at the time of the hiring, who is on parole or probation and to whom the interstate probation and parole compact under Iowa Code section 907A.1 applies.

The additional deduction is not allowed for wages paid to an individual who was hired to replace an individual whose employment was terminated within the 12-month period preceding the date of first employment. However, if the individual being replaced left employment voluntarily without good cause attributable to the employer or if the individual was discharged for misconduct in connection with the individual's employment as determined by the Iowa division of job service of the department of employment services, the additional deduction is allowed.

The determination of whether an individual left employment voluntarily without good cause attributable to the employer or if the individual was discharged for misconduct is a factual determination which must be made on a case-by-case basis.

The taxpayer must include a schedule with the filing of its tax return showing the name, address, social security number, date of hiring, and wages paid of each employee for whom the taxpayer claims the additional deduction for wages.

If the employee for whom an additional deduction for wages was allowed fails to successfully complete a probationary period and the taxpayer has already filed an Iowa corporation income tax return taking the additional deduction for wages, the taxpayer must file an amended return adding back the additional deduction for wages. The amended return must state the name and social security number of the employee who failed to successfully complete a probationary period.

53.11(8) The additional deduction applies to any individual hired on or after July 1, 2001, whether or not domiciled in Iowa at the time of hiring, who is on parole or probation and to whom either the interstate probation and parole compact under Iowa Code section 907A.1 or the compact for adult offenders under Iowa Code chapter 907B applies. The amount of additional deduction for hiring this individual is equal to 65 percent of the wages paid, but the additional deduction is not to exceed \$20,000 for the first 12 months of wages paid for work done in Iowa. The conditions set out in the unnumbered paragraphs under paragraph "b" of subrule 53.11(7) also apply to the deduction for the hiring of certain individuals in this subrule.

This rule is intended to implement 2011 Iowa Code Supplement section 422.35 as amended by 2012 Iowa Acts, Senate File 2247.

[ARC 0337C, IAB 9/19/12, effective 10/24/12]

701—53.12(422) Federal income tax deduction. "Federal income taxes" shall mean those income taxes paid or payable to the United States Government and shall not include taxes paid or payable or taxes deemed to have been paid to a foreign country. *Construction Products, Inc. v. Briggs, State Board of Tax Review*, Case No. 25, February 1, 1972. "Federal income taxes" includes the federal alternative minimum tax. For tax years beginning on or after January 1, 1990, and before January 1, 1996, "federal income taxes" includes the federal environmental tax. Because the federal environmental tax is deducted in computing federal taxable income and Iowa Code subsection 422.35(4) only allows a deduction for 50 percent of the federal income tax paid or accrued, the federal environmental tax deducted in computing federal taxable income must be added to federal taxable income.

53.12(1) Cash basis taxpayer.

a. When a taxpayer is reporting on the cash basis, 50 percent of the amount of federal income taxes actually paid during the taxable period is allowable as a deduction, whether or not such taxes represent the preceding year's tax or additional taxes for prior years. Fifty percent of a federal tax refund shall be reported as income in the year received.

b. A corporation reporting on the cash basis may deduct 50 percent of the federal income tax on the accrual basis if an election is made upon filing the first return. If the corporation claims an accrual deduction on the first return, it shall be considered as an election. Once the election is made,

the corporation may change the basis of federal income tax deduction only with the permission of the director. If a change in accounting method is approved or required by the Internal Revenue Service, the director is deemed to have approved the change in the basis of the federal tax deduction.

c. The federal income tax deduction during the transitional period following a change in accounting method from cash to accrual is the accrual deduction in the year of change, plus any cash payment of federal income tax paid in the year of the change for the tax year prior to the change in accounting method, reduced by a refund of federal income tax paid for the tax year prior to the year of the change in accounting method received in the year of the change. For the year of change and years subsequent to the year of the change, the deduction shall be the accrual deduction plus any federal income tax paid for a tax year prior to the year of change as a result of an amended federal return or federal audit, reduced by any refund of federal income tax paid for a tax year prior to the year of the change in accounting method.

d. The federal income tax deduction during the transitional period following a change in accounting method from accrual to cash is the cash deduction in the year of change, plus any cash payment of federal estimated income tax paid in the year prior to the year of the change for the year of the change. Any refund of federal income tax from a tax year prior to the year of the change received in the year of the change or in a subsequent year is properly accrued to the prior tax year. Any payment of federal income tax due to an amended return or federal audit for a tax year prior to the year of the change made in the year of the change or a subsequent year is accrued to that prior tax year. (For information on amended returns, see 701—subrule 52.3(4).)

53.12(2) Accrual basis taxpayer.

a. The amount of federal income tax to be allowed as a deduction for an accrual basis taxpayer is limited to 50 percent of the actual federal income tax liability for that year.

b. Additional federal income taxes and refunds of federal income taxes (except for 53.12(2)“c”) shall be a part of the tax liability accrued for such prior years.

c. Refunds resulting from net operating loss carrybacks, investment credit carrybacks, unused excess profits tax credits, and similar items shall be included in income for Iowa corporation income tax purposes in the year in which such refunds are legally accrued.

53.12(3) Rescinded, effective February 2, 1977.

53.12(4) Consolidated federal income tax allocation.

a. When a corporation joins with at least one other corporation in the filing of a consolidated federal income tax return, the allowable deduction shall be 50 percent of the consolidated federal income tax liability allocable to that corporation. The allocation of the consolidated federal income tax shall be determined as follows: The net consolidated federal income tax liability is multiplied by a fraction, the numerator of which is the taxpayer’s federal taxable income as computed on a separate basis, and the denominator of which is the total federal taxable incomes of each corporation included in the consolidated return. If the computation of the taxable income of a member results in an excess of deductions over gross income such member’s taxable income shall be zero. *Sibley State Bank v. Bair, State Board of Tax Review*, Docket No. 182, May 26, 1978. *Internorth, Inc., and Northern Propane Gas Company v. Iowa State Board of Tax Review, Iowa Department of Revenue and Gerald D. Bair, Director of Revenue*, 333 N.W.2d 471 (Iowa 1983).

b. If a corporation joins with at least one other corporation in the filing of a consolidated federal income tax return, the federal income tax deduction allowed the Iowa taxpayer shall not exceed 50 percent of the consolidated federal income tax liability.

This rule is intended to implement Iowa Code section 422.35.

701—53.13(422) Iowa income taxes and Iowa tax refund. Iowa corporation income taxes paid or accrued during the tax year as may be applicable under the method of filing are permissible deductions for federal corporation income tax purposes, but are not permissible deductions for purposes of determining Iowa net taxable income. To the extent taxes were deducted in the determination of federal taxable income, they shall be added to federal taxable income for Iowa corporation income tax purposes. Refunds of Iowa income tax to the extent that the refunds were included in the determination of federal taxable

income shall be subtracted from federal taxable income, only to the extent that a deduction for Iowa income taxes was disallowed on a prior Iowa return. Iowa income tax refunds resulting from Iowa refundable tax credits are not allowed as a deduction for Iowa corporation income tax purposes.

EXAMPLE: Corporation A reports income on a cash basis and made Iowa estimated payments of \$2,000 during the 2003 tax year. The \$2,000 of estimated payments was claimed as a deduction for federal income tax purposes, but was not allowed as a deduction for Iowa tax purposes. The 2003 Iowa return reported a tax liability of \$1,600. Corporation A had \$2,000 of Iowa estimated payments and a \$500 ethanol blended gasoline tax credit, and received a \$900 Iowa tax refund in 2004. Of the \$900 refund reported as income on the federal return, Corporation A will be allowed a \$400 (\$2,000 - \$1,600) reduction on the Iowa return for 2004.

This rule is intended to implement Iowa Code section 422.35.

701—53.14(422) Method of accounting, accounting period. The return shall be computed on the same basis and for the same accounting period as the taxpayer's return for federal corporation income tax purposes. Permission to change accounting methods or accounting periods for corporation tax purposes is not required provided the taxpayer furnishes the department with a copy of the federal consent.

This rule is intended to implement Iowa Code section 422.35.

701—53.15(422) Consolidated returns.

53.15(1) Definition. The term "common parent" as used in these rules shall have the same general meaning as when used in the federal income tax regulation. However, where the common parent is not subject to the Iowa income tax because of the provisions of 701—subrule 52.1(1) or because of specific exemption under Iowa Code section 422.34, the common parent shall designate as the agent for the affiliated group, one of its subsidiaries subject to the Iowa income tax and shall notify the director of the same in writing. Where the common parent has designated one of its subsidiaries to act as agent for the affiliated group, reference in this rule to "common parent" shall mean the designated agent.

Unless otherwise distinctly expressed, the terms used in this rule shall have the same meaning as when used in a comparable context in the federal income tax regulations for consolidated returns except for determining whether an affiliated group had exercised its privilege of filing a consolidated return. All references to the "commissioner" or "district director" in the federal regulations shall be construed to mean the director for purposes of the Iowa rules.

a. An affiliated group of corporations which did not file a consolidated return for the immediately preceding taxable year may file a consolidated return in lieu of separate returns for the taxable year. Each corporation which is subject to the Iowa corporation income tax and has been a member during any part of the taxable year for which the consolidated return is to be filed must consent (as provided in paragraph 53.15(1) "d") to the filing of the consolidated return.

b. If a group wishes to exercise its privilege of filing a consolidated return, the consolidated return must be filed not later than the date prescribed by Iowa Code section 422.21 (including extensions of time) for the filing of the common parent's return. The consolidated return may not be withdrawn after the last day for filing (including extensions of time) but the group may change the basis of its return at any time prior to the last day.

c. The consolidated return shall be made on Form IA-1120 for the group by the common parent corporation. The common parent corporation of the group must attach a copy of the federal Form 851 (Affiliations Schedule) to the consolidated return.

d. If a group wishes to exercise its privilege of filing a consolidated return, each subsidiary must consent to the filing of the consolidated return for the year. The subsidiaries must consent to the filing of an Iowa consolidated return by joining in the filing of an Iowa consolidated return on or before the due date (including any extensions of time). If both separate and consolidated returns are filed on or before the due date (including any extensions of time), the latest returns filed will be considered as the taxpayers' election in regards to the filing of separate or consolidated returns.

e. The common parent, for all purposes other than the making of the consent required by subrule 53.15(1) "a," shall be the sole agent for each subsidiary in the group, duly authorized to act in its own

name in all matters relating to the tax liability for the consolidated return year. No subsidiary shall have authority to act for or to represent itself in any matter. The provisions of this paragraph shall apply whether or not a consolidated return is made for any subsequent year and whether or not one or more subsidiaries have become or have ceased to be members of the group at any time. If a subsidiary has ceased to be a member of the group and if the subsidiary files written notice of the cessation with the director, then upon request of the subsidiary, the director will furnish it with a copy of any notice of deficiency in respect of the tax for a consolidated return year for which it was a member. The filing of the written notification and request by a corporation shall not have the effect of limiting the scope of the agency of the common parent.

f. Unless the director agrees to the contrary, an agreement entered into by the common parent extending the time within which a notice of deficiency may be issued, or a levy or a proceeding in court begun in respect of the tax for a consolidated return year shall be applicable to each corporation which was a member of the group during any part of the taxable year and to each corporation, the income of which was included in the consolidated return for the taxable year, notwithstanding that the liability of the corporation is subsequently computed on the basis of a separate return under these rules.

g. If the common parent corporation contemplates dissolution, or is about to be dissolved, or if for any other reason its existence is about to terminate, it shall forthwith notify the director of that fact and designate another member to act as its agent in its place to the same extent and subject to the same conditions and limitations as are applicable to the common parent. If this notice is not given by the common parent, the remaining members may, subject to the approval of the director, designate another member to act as agent, and notice of the designation shall be given to the director. Until a notice in writing designating a new agent has been approved by the director, any notice of deficiency or other communications mailed to the common parent shall be considered as having been properly mailed to the agent of the group. If the director has reasons to believe that the existence of the common parent has terminated, the director may, if deemed advisable, deal directly with any member in respect of its liability.

53.15(2) *When director may require consolidated return.* In accordance with the provisions of rule 701—53.15(422), the director may require a consolidated return for those members of an affiliated group of corporations which would be eligible to elect to consolidate their incomes under Iowa Code section 422.37 if the filing of separate returns for such corporations would improperly reflect the taxable incomes of said corporations or of said group.

53.15(3) *Discontinuance of filing consolidated returns.*

a. An affiliated group which filed (or was required to file) a consolidated return for the immediately preceding taxable year is required to file a consolidated return for the taxable year unless it is allowed to discontinue filing consolidated returns, or unless a federal consolidated return is not filed by the group.

b. In the event that a consolidated filing for Iowa tax purposes is discontinued for any reason, the common parent shall so notify the department by letter. The mere filing of separate returns does not, in itself, constitute sufficient notice.

c. The following constitute factors for determining when consolidated filing for Iowa tax purposes can be discontinued:

(1) If the filing of separate returns will more clearly disclose the taxable income of each member of the affiliated group. Corporations should note that such determination is vested in the director. Therefore, corporations should make application to the director within a reasonable time prior to the due date of the return (including extensions of time). Normally, this would be not later than 90 days prior to said due date. The application should set forth in detail the taxable income on both a consolidated and separate basis together with the reasons why separate returns would more clearly disclose Iowa taxable income. The mere fact that the consolidated tax liability is greater or less than the combined separate liabilities is not, of itself, a ground for discontinuance of consolidated filing.

(2) If one or more of the members of the affiliated group cease to be subject to Iowa corporate income tax, consolidation may be discontinued in whole or in part.

(3) If one or more of the members of the affiliated group change in character so that they are no longer taxable under the Iowa corporate income tax law.

EXAMPLE: Common parent A is a manufacturer. Subsidiary B is a company engaged in small loans. A and B file consolidated Iowa returns. In a subsequent taxable year, B changes its business by surrendering its small loan company license and obtains a state bank charter. Even though A and B continue to file federal consolidated returns, B is now a corporation exempt from tax under Iowa Code section 422.34. Therefore A and B should discontinue filing Iowa consolidated returns.

(4) If the affiliated group is purchased by another corporation or affiliated group so that after the purchase the stockholders own less than 50 percent of the fair market value of all classes of outstanding stock of the new corporation or affiliated group then the old group must discontinue filing Iowa consolidated returns. The new group may exercise its privilege of filing a consolidated return.

d. If a group is allowed to discontinue filing consolidated returns for any taxable year, then each member of the affiliated group subject to Iowa tax must file a separate return for such year on or before the last day prescribed by law (including extensions of time) for the filing of the consolidated return for such year.

e. A group shall be considered as remaining in existence, for the purposes of the Code, in accordance with the rules prescribed in Treasury Regulation Section 1.1502-75(d).

f. If a consolidated return erroneously includes the income of one or more corporations which were not members of the group at any time during the consolidated return year, the tax liability of such corporations will be determined upon the basis of separate returns (or a consolidated return of another group, if paragraph 53.15(1)“*c*” or 53.15(3)“*a*” applies) and the consolidated return will be considered as including only the income of the corporations which were members of the group during that taxable year.

g. In any case in which amounts have been assessed and paid upon the basis of a consolidated return, and where the tax liability of one or more of the corporations included in the consolidated return is to be computed in the manner described in paragraph 53.15(3)“*f*,” the amounts so paid shall be allocated between the group composed of the corporations properly included in the consolidated return and each of the corporations, whose tax liability is to be computed on a separate basis (or on the basis of a consolidated return of another group) in such manner as the corporations which were included in the consolidated return, and where the tax liability of one or more of the corporations included absence of an agreement, the tax liability of the group shall be allocated under subrule 53.12(4).

h. The taxable year of members of the group, including rules for changing the parent’s taxable year, income to be included in the separate returns, and the time for making separate returns for periods not included in a consolidated return for the purposes of the Iowa Code, shall be in accordance with the rules prescribed in Treasury Regulation Section 1.1502-76(a)-(c).

53.15(4) Determination of consolidated Iowa income.

a. Unless otherwise provided by these rules or manifestly inconsistent with the provisions of the Iowa Code, the consolidated taxable income for a consolidated return year under the Iowa Code shall be determined in the same manner and under the same procedures, including intercompany adjustments and eliminations, as are required by the federal income tax regulations in the case of a federal consolidated return.

b. If the Iowa affiliated group differs in its members from the federal affiliated group, such nonqualifying member(s) shall not be considered includable corporations and all computations hereunder shall be made as if such member(s) were not members of the affiliated group. The consolidated federal income tax liability shall be allocated between includable corporations and nonincludable corporations by subrule 53.12(4).

c. The apportionment provisions of Iowa Code section 422.33 shall be taken into account by an affiliated group doing business within and without Iowa. All members of an affiliated group which join in the filing of an Iowa consolidated return shall determine the portion of the consolidated net income earned within and without Iowa by the same method. All intercompany transactions shall be eliminated in the determination of the apportionment factors.

The gross receipts of each corporation which joins in the filing of an Iowa consolidated corporation income tax return shall be included in the computation of the business activity ratio. The gross receipts of each corporation shall be included in the numerator of the business activity ratio to the extent that it has

nexus in Iowa and its gross receipts are not eliminated by intercompany adjustments and are considered Iowa gross receipts by rules 701—54.2(422) to 701—54.8(422). The gross receipts of each corporation shall be included in the denominator of the business activity ratio to the extent its gross receipts are not eliminated by intercompany adjustments.

53.15(5) Schedules. Supporting schedules shall be filed with the consolidated return. The statement of gross income and deductions and other schedules required for each corporation shall be prepared and filed in columnar form so that the details of the items of gross income, deductions, and credits for each member may be readily ascertained. A column shall also be provided giving effect to any eliminations and adjustments. The items included in the column for eliminations and adjustments should be symbolized to identify contra items affected, and suitable explanations appended, if necessary. Similar schedules shall contain in columnar form a reconciliation of retained earnings for each corporation, together with a reconciliation of consolidated retained earnings. Consolidated balance sheets at the beginning and close of the taxable year of the group shall accompany the consolidated return prepared in a form similar to that required for other schedules. Transactions with a subsidiary which is not included as part of the Iowa consolidated return shall not be considered as intercompany transactions for elimination purposes in computing the consolidated Iowa taxable income for the return period.

53.15(6) Liability for tax.

a. Except as provided in paragraph 53.15(6)“*b*,” the common parent corporation and each subsidiary subject to the Iowa corporation income tax which was a member of the affiliated group during any part of the consolidated return year shall be severally liable for the tax for the year computed in accordance with Iowa Code chapter 422, on or before the due date (not including extensions of time) for the filing of the consolidated return for that year.

b. If a subsidiary has ceased to be a member of the group and if the cessation resulted from a bona fide sale or exchange of its stock for fair value and occurred prior to the date upon which any deficiency is assessed, the director may make an assessment and collection of the deficiency from the former subsidiary in an amount not exceeding the portion of the deficiency which the director may determine to be allocable to it. If the director makes assessment and collection of any part of a deficiency from the former subsidiary, then for purposes of any credit or refund of the amount collected from the former subsidiary the agency of the common parent under the provisions of paragraph 53.15(1)“*e*” shall not apply.

c. No agreement entered into by one or more members of the affiliated group with any other member of the group shall in any case have the effect of reducing the liability prescribed under this subrule.

53.15(7) Computation of contribution. Computation of a separate corporation’s contribution to consolidated income or net operating loss subject to Iowa tax for purposes of net operating loss carryover and carryback limitations shall be as follows:

$$\frac{A}{B} \times C \times \frac{D}{A} + E = \begin{array}{l} \text{separate corporation contribution to} \\ \text{consolidated income subject to Iowa tax.} \end{array}$$

A = Separate corporation gross sales within and without Iowa after elimination of all intercompany transactions.

B = Consolidated gross sales within and without Iowa after elimination of all intercompany transactions.

C = Iowa consolidated net income subject to apportionment.

D = Separate corporation gross sales within Iowa after elimination of all intercompany transactions.

E = Separate corporation income allocable to Iowa.

53.15(8) Limitations on net operating loss carryover and carryback.

a. Definitions.

(1) The term “separate return year” means a year in which a corporation filed a separate return and also a year for which it joined (or was required to join) in the filing of an Iowa consolidated return by another affiliated group.

(2) The term “separate return limitation year” means any separate return year of a member of the group or of a predecessor of the member.

b. Limitation on net operating loss carryover. A net operating loss from a separate return limitation year of a member of the group may be carried over only to the extent that the member contributed to the Iowa consolidated taxable income as computed under subrule 53.15(7). A net operating loss carryover from a separate return limitation year cannot create or increase a consolidated net operating loss which is carried back for tax years beginning prior to January 1, 2009.

A consolidated net operating loss may be carried over to a consolidated return year without limitation even though in the carryover year the affiliated group contains members which were not members of the group in the loss year.

If a member of the affiliated group in the loss year leaves the group through the sale of its stock or because it is now a corporation exempt from tax under Iowa Code section 422.34, its share, as determined by subrule 53.15(7), of the unabsorbed consolidated net operating loss at the end of the consolidated return year during which the member left the group or became exempt from tax may not be carried forward to a subsequent consolidated return.

c. Limitation on net operating loss carryback for tax periods beginning prior to January 1, 2009. A member’s share of an Iowa consolidated net operating loss as computed under subrule 53.15(7) must be carried back to a separate return year, unless the affiliated group elected to carry the net operating loss forward. However, if the member was not in existence in the carryback year but had been a member of the group for every tax year of its existence, its share of the Iowa consolidated loss may be carried back to a separate return year of the common parent.

If a consolidated net operating loss is carried back to a consolidated return year and all members of the affiliated group are the same in the carryback year as in the loss year, the consolidated net operating loss may be carried back without limitation. If there are members of the affiliated group in the loss year which were not members in the carryback year, then the formula in subrule 53.15(7) must be used to determine the portion of the consolidated net operating loss attributable to the members in existence in the carryback year and which may be carried back. Any member of the affiliated group which was a member of the loss-year affiliated group which has been a member of the group since its formation will be regarded as having been a member of the group in the carryback year even though it was not then in existence. A merger or liquidation of members within the affiliated group will be disregarded in determining whether there has been a change in the group between the loss year and the carryback year.

The amount of net operating loss that may be carried back from a separate return year to a consolidated return year is limited to the extent that the former member contributed to the Iowa consolidated taxable income as computed under subrule 53.15(7).

This rule is intended to implement Iowa Code section 422.35 as amended by 2009 Iowa Acts, Senate File 483, and section 422.37.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 9103B, IAB 9/22/10, effective 10/27/10]

701—53.16(422) Federal rulings and regulations. In determining whether “taxable income,” “net operating loss deduction” or any other deductions are computed for federal tax purposes under, or have the same meaning as provided by, the Internal Revenue Code, the department will use applicable rulings and regulations that have been duly promulgated by the Commissioner of Internal Revenue, unless the director has created rules and regulations or has exercised discretionary powers as prescribed by statute which call for an alternative method for determining “taxable income,” “net operating loss deduction,” or any other deductions, or unless the department finds that an applicable Internal Revenue ruling or regulation is unauthorized according to the Iowa Code.

This rule is intended to implement Iowa Code section 422.35.

701—53.17(422) Depreciation of speculative shell buildings.

53.17(1) For tax years beginning on or after July 1, 1992, speculative shell buildings constructed or reconstructed after that date may be depreciated as 15-year property under the accelerated cost recovery system of the Internal Revenue Code. If the taxpayer has deducted depreciation on the speculative shell

building on the taxpayer's federal income tax return, that amount of depreciation must be added to the federal taxable income in order to deduct depreciation under this rule.

53.17(2) On sale or other disposition of the speculative shell building, the taxpayer must report on the taxpayer's Iowa corporation income tax return the same gain or loss reported on the taxpayer's federal corporation income tax return. If, while owned by the taxpayer, the building is converted from a speculative shell building to another use, the taxpayer must deduct the same amount of depreciation on the taxpayer's Iowa tax return as is deducted on the taxpayer's federal tax return.

53.17(3) For the purposes of this rule, the term "speculative shell building" means a building as defined in Iowa Code section 427.1, subsection (27) "c."

This rule is intended to implement Iowa Code section 422.35.

701—53.18(422) Deduction of multipurpose vehicle registration fee. For tax years beginning on or after January 1, 1992, and before January 1, 2005, corporations may claim a deduction for 60 percent of the amount of the registration fee paid for a multipurpose vehicle under Iowa Code section 321.124, subsection 3, paragraph "h." In order to qualify for this deduction, no part of the multipurpose vehicle registration fee may have been deducted as an ordinary and necessary business expense.

For tax years beginning on or after January 1, 2005, the deduction for Iowa corporation income tax for multipurpose vehicle registration fees is the same as allowed under Section 164 of the Internal Revenue Code for federal tax purposes.

This rule is intended to implement Iowa Code section 422.35.

701—53.19(422) Deduction of foreign dividends. For tax years beginning on or after January 1, 1992, corporations may claim a deduction based on percentage of ownership as set forth in Section 243 of the Internal Revenue Code for foreign dividends including Subpart F income as defined in Section 952 of the Internal Revenue Code. See *Kraft General Foods, Inc. v. Iowa Department of Revenue and Finance*, 505 U.S. 71, 120 L.Ed 59, 112 S.Ct. 2365 (1992).

This rule is intended to implement Iowa Code section 422.35.

701—53.20(422) Employer social security credit for tips. Employers in the food and beverage industry are allowed a credit under Section 45B of the Internal Revenue Code for a portion of the social security taxes paid or incurred after 1993 on employee tips. The credit is equal to the employer's FICA obligation attributable to tips received which exceed tips treated as wages for purposes of satisfying minimum wage standards of the Fair Labor Standards Act. The credit is allowed only for tips received by an employee in the course of employment from customers on the premises of a business for which the tipping of employees serving food or beverages is customary. To the extent that an employer takes the credit for a portion of the social security taxes paid or incurred, the employer's deduction for the social security tax is reduced accordingly. For Iowa income tax purposes, the full deduction for the social security tax paid or incurred is allowed for tax years beginning on or after January 1, 1994. No social security tax credit is allowed on the Iowa corporation income tax return.

This rule is intended to implement Iowa Code section 422.35 as amended by 1995 Iowa Acts, chapter 152.

701—53.21(422) Deduction for contributions made to the endowment fund of the Iowa educational savings plan trust. To the extent that the contribution was not deductible for federal income tax purposes, any gift, grant, or donation to the endowment fund of the Iowa educational savings plan trust may be deducted for Iowa income tax purposes. The contribution must be made on or after July 1, 1998, but before April 15, 2004. Effective April 15, 2004, the deduction for contributions made to the endowment fund is repealed.

This rule is intended to implement Iowa Code section 422.35 as amended by 1998 Iowa Acts, House File 2119.

701—53.22(422) Additional first-year depreciation allowance.

53.22(1) *Assets acquired after September 10, 2001, but before May 6, 2003.* For tax periods ending after September 10, 2001, but beginning before May 6, 2003, the additional first-year depreciation allowance (“bonus depreciation”) of 30 percent authorized in Section 168(k) of the Internal Revenue Code, as enacted by Public Law No. 107-147, Section 101, does not apply for Iowa corporation income tax. Taxpayers who claim the bonus depreciation on their federal income tax return must add the total amount of depreciation claimed on assets acquired after September 10, 2001, but before May 6, 2003, and subtract the amount of depreciation taken on such property using the modified accelerated cost recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(k).

If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets.

The adjustment for both depreciation and the gain or loss on the sale of qualifying assets acquired after September 10, 2001, but before May 6, 2003, can be calculated on Form IA 4562A.

The following nonexclusive examples illustrate how this subrule applies:

EXAMPLE 1: Taxpayer acquired a \$100,000 qualifying asset on January 1, 2002, which has a five-year life for depreciation purposes. Using the bonus depreciation provision in Section 168(k) of the Internal Revenue Code, taxpayer was entitled to a \$44,000 depreciation deduction on the federal return for 2002. For Iowa purposes, taxpayer must use the MACRS depreciation method which results in a \$20,000 depreciation deduction on the Iowa return for 2002. Therefore, a \$24,000 (\$44,000 – \$20,000) increase to net income relating to this depreciation adjustment must be made on the Iowa return for 2002.

EXAMPLE 2: Taxpayer acquired a \$1,000,000 qualifying asset on January 1, 2002, which has a ten-year life for depreciation purposes. This asset was sold on December 31, 2005, for \$500,000. Using the bonus depreciation provision, taxpayer claimed \$677,440 of depreciation deductions on the federal returns for 2002-2005. This results in a basis for this asset of \$322,560 (\$1,000,000 – \$677,440), and a gain of \$177,440 (\$500,000 – \$322,560) on the federal return for 2005 on the sale of the asset.

Using the MACRS depreciation method, taxpayer claimed \$539,200 of depreciation deductions on the Iowa returns for 2002-2005. This results in a basis for this asset of \$460,800 (\$1,000,000 – \$539,200), and a gain of \$39,200 (\$500,000 – \$460,800) on the Iowa return for 2005 on the sale of the asset. Therefore, a decrease to net income of \$138,240 (\$177,440 – \$39,200) relating to this gain adjustment must be made on the Iowa return for 2005.

53.22(2) *Assets acquired after May 5, 2003, but before January 1, 2005.* For tax periods beginning after May 5, 2003, but beginning before January 1, 2005, the bonus depreciation of 50 percent authorized in Section 168(k) of the Internal Revenue Code, as amended by Public Law No. 108-27, Section 201, may be taken for Iowa corporation income tax. If the taxpayer elects to take the 50 percent bonus depreciation, the depreciation deduction allowed on the Iowa corporation income tax return is the same as the depreciation deduction allowed on the federal income tax return for assets acquired after May 5, 2003, but before January 1, 2005.

a. If the taxpayer elects to take the 50 percent bonus depreciation and had filed an Iowa return prior to February 24, 2005, which reflected the disallowance of 50 percent bonus depreciation, the taxpayer may choose between two options to reflect this change. Taxpayer may either file an amended return for the applicable tax year to reflect the 50 percent bonus depreciation provision, or taxpayer may reflect the change for 50 percent bonus depreciation on the next Iowa return filed subsequent to February 23, 2005. Taxpayer must choose only one of these two options. Regardless of the option chosen, taxpayer must complete and attach a revised Form IA 4562A to either the amended return or the return filed subsequent to February 23, 2005.

See 701—subrule 40.60(2), paragraph “a,” for examples illustrating how this subrule is applied.

b. If the taxpayer elects not to take the 50 percent bonus depreciation, taxpayer must add the total amount of depreciation claimed on assets acquired after May 5, 2003, but before January 1, 2005, and subtract the amount of depreciation taken on such property using the modified accelerated cost

recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(k). If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets. The adjustment for both depreciation and the gain or loss on the sale of qualifying assets acquired after May 5, 2003, but before January 1, 2005, can be calculated on Form IA 4562A.

53.22(3) *Assets acquired after December 31, 2007, but before January 1, 2010.* For tax periods beginning after December 31, 2007, but beginning before January 1, 2010, the bonus depreciation of 50 percent authorized in Section 168(k) of the Internal Revenue Code, as amended by Public Law No. 110-185, Section 103, and Public Law 111-5, Section 1201, does not apply for Iowa corporation income tax. Taxpayers who claim the bonus depreciation on their federal income tax return must add the total amount of depreciation claimed on assets acquired after December 31, 2007, but before January 1, 2010, and subtract the amount of depreciation taken on such property using the modified accelerated cost recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(k).

If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets.

The adjustment for both depreciation and the gain or loss on the sale of qualifying assets acquired after December 31, 2007, but before January 1, 2010, can be calculated on Form IA 4562A.

The following nonexclusive examples illustrate how this subrule applies:

EXAMPLE 1: Taxpayer acquired a \$100,000 qualifying asset on January 10, 2008, which has a five-year life for depreciation purposes. Using the bonus depreciation provision in Section 168(k) of the Internal Revenue Code, taxpayer was entitled to a \$44,000 depreciation deduction on the federal return for 2008. For Iowa purposes, taxpayer must use the MACRS depreciation method which results in a \$20,000 depreciation deduction on the Iowa return for 2008. Therefore, a \$24,000 (\$44,000 – \$20,000) increase to net income relating to this depreciation adjustment must be made on the Iowa return for 2008.

EXAMPLE 2: Taxpayer acquired a \$1,000,000 qualifying asset on January 10, 2008, which has a ten-year life for depreciation purposes. This asset was sold on December 31, 2011, for \$500,000. Using the bonus depreciation provision, taxpayer claimed \$677,440 of depreciation deductions on the federal returns for 2008-2011. This results in a basis for this asset of \$322,560 (\$1,000,000 – \$677,440), and a gain of \$177,440 (\$500,000 – \$322,560) on the federal return for 2011 on the sale of the asset.

Using the MACRS depreciation method, taxpayer claimed \$539,200 of depreciation deductions on the Iowa returns for 2008-2011. This results in a basis for this asset of \$460,800 (\$1,000,000 – \$539,200), and a gain of \$39,200 (\$500,000 – \$460,800) on the Iowa return for 2011 on the sale of the asset. Therefore, a decrease to net income of \$138,240 (\$177,440 – \$39,200) relating to this gain adjustment must be made on the Iowa return for 2011.

53.22(4) *Qualified disaster assistance property.* For property placed in service after December 31, 2007, with respect to federal declared disasters occurring before January 1, 2010, the bonus depreciation of 50 percent authorized in Section 168(n) of the Internal Revenue Code for qualified disaster assistance property, as amended by Public Law 110-343, Section 710, does not apply for Iowa corporation income tax. Taxpayers who claim the bonus depreciation on their federal income tax return must add the total amount of depreciation claimed on qualified disaster assistance property and subtract the amount of depreciation taken on such property using the modified accelerated cost recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(n).

If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of this property for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of such property.

The adjustment for both depreciation and the gain or loss on the sale of qualifying disaster assistance property can be calculated on Form IA 4562A.

53.22(5) *Assets acquired after December 31, 2009, but before January 1, 2014.* For tax periods beginning after December 31, 2009, but beginning before January 1, 2014, the bonus depreciation authorized in Section 168(k) of the Internal Revenue Code, as amended by Public Law No. 111-240, Section 2022, Public Law No. 111-312, Section 401, and Public Law No. 112-240, Section 331, does not apply for Iowa corporation income tax. Taxpayers who claim the bonus depreciation on their federal income tax return must add the total amount of depreciation claimed on assets acquired after December 31, 2009, but before January 1, 2014, and subtract the amount of depreciation taken on such property using the modified accelerated cost recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(k).

If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets.

The adjustment for both depreciation and the gain or loss on the sale of qualifying assets acquired after December 31, 2009, but before January 1, 2014, can be calculated on Form IA 4562A.

See subrule 53.22(3) for examples illustrating how this subrule is applied.

This rule is intended to implement Iowa Code section 422.35 as amended by 2013 Iowa Acts, Senate File 106.

[**ARC 8589B**, IAB 3/10/10, effective 4/14/10; **ARC 9820B**, IAB 11/2/11, effective 12/7/11; **ARC 1101C**, IAB 10/16/13, effective 11/20/13]

701—53.23(422) Section 179 expensing. For tax periods beginning on or after January 1, 2003, but beginning before January 1, 2006, the increase in the expensing allowance for qualifying property authorized in Section 179(b) of the Internal Revenue Code, as enacted by Public Law No. 108-27, Section 202, may be taken for Iowa corporation income tax. If the taxpayer elects to take the increased Section 179 expensing, the Section 179 expensing allowance on the Iowa corporation income tax return is the same as the Section 179 expensing allowance on the federal income tax return for tax years beginning on or after January 1, 2003, but beginning before January 1, 2006. In addition, for tax periods beginning on or after January 1, 2008, but beginning before January 1, 2009, the increase in the expensing allowance for qualifying property authorized in Section 179(b) of the Internal Revenue Code, as enacted by Public Law No. 110-185, Section 102, may be taken for Iowa corporation income tax. For tax periods beginning on or after January 1, 2009, but beginning before January 1, 2010, the increase in the expensing allowance for qualifying property authorized in Section 179(b) of the Internal Revenue Code, as enacted by Public Law No. 111-5, Section 1202, cannot be taken for Iowa corporation income tax purposes. The maximum amount of Section 179 expensing allowed for tax periods beginning on or after January 1, 2009, but beginning before January 1, 2010, is \$133,000 for Iowa corporation income tax purposes. For tax years beginning on or after January 1, 2010, the increase in the expensing allowance for qualifying property authorized in Section 179(b) of the Internal Revenue Code, as enacted by Public Law No. 111-240, Section 2021, Public Law No. 111-312, Section 402, and Public Law No. 112-240, Section 315, may be taken for Iowa corporation income tax.

53.23(1) If the taxpayer elects to take the increased Section 179 expensing and had filed an Iowa return prior to February 24, 2005, which reflected the disallowance of increased Section 179 expensing, the taxpayer may choose between two options to reflect this change. Taxpayer may either file an amended return for the applicable tax year to reflect the increased Section 179 expensing, or taxpayer may reflect the change for increased Section 179 expensing on the next Iowa return filed subsequent to February 23, 2005. Taxpayer must choose only one of these two options. Regardless of the option chosen, taxpayer must complete and attach a revised Form IA 4562A to either the amended return or the return filed subsequent to February 23, 2005.

See 701—subrule 40.65(1) for examples illustrating how this subrule is applied.

53.23(2) If the taxpayer elects not to take the increased Section 179 expensing, the expensing allowance is limited to \$25,000 for Iowa tax purposes. The difference between the federal Section 179 expensing allowance on such property, if in excess of \$25,000, and the Iowa expensing allowance of \$25,000 can be depreciated using the modified accelerated cost recovery system (MACRS) applicable under Section 168 of the Internal Revenue Code without regard to the bonus depreciation provision in Section 168(k).

If any such property was sold or disposed of during the tax year, the applicable Section 179 and related depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets.

The adjustment for both the Section 179 expensing allowance and related depreciation, along with the gain or loss on the sale of qualifying assets for tax years beginning on or after January 1, 2003, but beginning before January 1, 2006, can be calculated on Form IA 4562A.

The following nonexclusive examples illustrate how this subrule applies:

EXAMPLE 1: Taxpayer acquired a \$110,000 qualifying asset on January 1, 2003, which has a five-year life for depreciation purposes. Taxpayer was entitled to a \$100,000 Section 179 expensing allowance, a \$5,000 bonus depreciation deduction under Section 168(k) of the Internal Revenue Code, and an additional depreciation deduction under Section 168 of the Internal Revenue Code for a total deduction of \$106,000 for federal tax purposes. For Iowa purposes, taxpayer filed a return showing a \$25,000 Section 179 expensing allowance and a \$17,000 depreciation deduction using MACRS, for a total Iowa deduction of \$42,000. Therefore, since taxpayer elected not to take the increased Section 179 expensing for Iowa tax purposes, a \$64,000 ($\$106,000 - \$42,000$) adjustment to net income relating to this Section 179 and depreciation adjustment would be made on the Iowa return for 2003. Similar adjustments would be made on the 2004 and 2005 Iowa returns if taxpayer elected not to take the increased Section 179 expensing for Iowa tax purposes.

EXAMPLE 2: Assume the same facts as given in Example 1, and the qualifying asset was sold on December 31, 2005, for \$50,000. Taxpayer elected not to take the increased Section 179 expensing for Iowa tax purposes. Taxpayer would have claimed \$108,560 of Section 179 and depreciation deductions on the federal returns for 2003-2005. This results in a basis for this asset of \$1,440 ($\$110,000 - \$108,560$), and a gain of \$48,560 ($\$50,000 - \$1,440$) on the federal return for 2005 on the sale of the asset.

Taxpayer would have claimed \$85,520 of Section 179 and depreciation deductions using the Section 179 limit of \$25,000 and the MACRS depreciation method on the Iowa returns for 2003-2005. This results in a basis for this asset of \$24,480 ($\$110,000 - \$85,520$), and a gain of \$25,520 ($\$50,000 - \$24,480$) on the Iowa return for 2005 on the sale of the assets. Therefore, an adjustment to net income of \$23,040 ($\$48,560 - \$25,520$) relating to this gain adjustment would be made on the Iowa return for 2005.

53.23(3) Special filing provision for 2010 change. Taxpayers who did not claim the increased Section 179 expensing on their tax return for the period beginning on or after January 1, 2010, but before January 1, 2011, as originally filed have two options to reflect this adjustment. Taxpayer may either file an amended return for the applicable tax year to reflect this adjustment or taxpayer may reflect this adjustment on the next tax return. If the taxpayer elects to reflect this adjustment on the next tax return, the limitation based on income provisions and regulations of Section 179(b)(3) of the Internal Revenue Code is suspended related to the claiming of the adjustment for the next tax year.

EXAMPLE: Taxpayer claimed a \$150,000 Section 179 expense on the federal return for the period ending December 31, 2010. Taxpayer only claimed a \$134,000 Section 179 expense on the Iowa return as originally filed for the period ending December 31, 2010. Taxpayer elects not to file an amended return for the period ending December 31, 2010, but to make the adjustment on the Iowa return for the period ending December 31, 2011. Taxpayer reported a loss on the federal return for the period ending December 31, 2011; therefore, no Section 179 expense can be claimed on the federal return for the period ending December 31, 2011, in accordance with Section 179(b)(3) of the Internal Revenue Code. Taxpayer can claim the \$16,000 ($\$150,000$ less $\$134,000$) difference as a deduction on the Iowa return

for the period ending December 31, 2011, since the income provision of Section 179(b)(3) is suspended for Iowa tax purposes.

This rule is intended to implement Iowa Code section 422.35 as amended by 2013 Iowa Acts, Senate File 106.

[ARC 9103B, IAB 9/22/10, effective 10/27/10; ARC 9820B, IAB 11/2/11, effective 12/7/11; ARC 1101C, IAB 10/16/13, effective 11/20/13]

701—53.24(422) Exclusion of ordinary or capital gain income realized as a result of involuntary conversion of property due to eminent domain. For tax years beginning on or after January 1, 2006, a taxpayer may exclude the amount of ordinary or capital gain income realized as a result of the involuntary conversion of property due to eminent domain for Iowa corporation income tax. Eminent domain refers to the authority of government agencies or instrumentalities of government to requisition or condemn private property for any public improvement, public purpose or public use. The exclusion for Iowa purposes can only be claimed in the year in which the ordinary or capital gain income was reported on the federal income tax return.

In order for an involuntary conversion to qualify for this exclusion, the sale must occur due to the requisition or condemnation, or its threat or imminence, if it takes place in the presence of, or under the threat or imminence of, legal coercion relating to a requisition or condemnation. There are numerous federal revenue rulings, court cases and other provisions relating to the definitions of the terms “threat” and “imminence,” and these are equally applicable to the exclusion of ordinary or capital gains realized for tax years beginning on or after January 1, 2006.

53.24(1) Reporting requirements. In order to claim an exclusion of ordinary or capital gain income realized as a result of involuntary conversion of property due to eminent domain, the taxpayer must attach a statement to the Iowa corporation income tax return in the year in which the exclusion is claimed. The statement should state the date and details of the involuntary conversion, including the amount of the gain being excluded and the reasons why the gain meets the qualifications of an involuntary conversion relating to eminent domain. In addition, if the gain results from the sale of replacement property as outlined in subrule 53.24(2), information must be provided in the statement on that portion of the gain that qualified for the involuntary conversion.

53.24(2) Claiming the exclusion when gain is not recognized for federal tax purposes. For federal tax purposes, an ordinary or capital gain is not recognized when the converted property is replaced with property that is similar to, or related in use to, the converted property. In those cases, the basis of the old property is simply transferred to the new property, and no gain is recognized. In addition, when property is involuntarily converted into money or other unlike property, any gain is not recognized when replacement property is purchased within a specified period for federal tax purposes.

For Iowa corporation tax purposes, no exclusion will be allowed for ordinary or capital gain income when there is no gain recognized for federal tax purposes. The exclusion will only be allowed in the year in which ordinary or capital gain income is realized due to the disposition of the replacement property for federal tax purposes, and the exclusion is limited to the amount of the ordinary or capital gain income relating to the involuntary conversion. The basis of the property for Iowa corporation income tax purposes will remain the same as the basis for federal tax purposes and will not be altered because of the exclusion allowed for Iowa corporation income tax.

EXAMPLE: In 2007, taxpayer sold some farmland as a result of an involuntary conversion relating to eminent domain and realized a gain of \$50,000. However, the taxpayer purchased similar farmland immediately after the sale, and no gain was recognized for federal tax purposes. Therefore, no exclusion is allowed on the 2007 Iowa corporation income tax return. In 2009, taxpayer sold the replacement farmland that was not subject to an involuntary conversion and realized a total gain of \$70,000, which was reported on the 2009 federal income tax return. The taxpayer can claim a deduction of \$50,000 on the 2009 Iowa corporation income tax return relating to the gain that resulted from the involuntary conversion.

This rule is intended to implement Iowa Code section 422.35.

701—53.25(422) Exclusion of income from sale, rental or furnishing of tangible personal property or services directly related to production of film, television, or video projects.

53.25(1) *Projects registered on or after January 1, 2007, but before July 1, 2009.* For tax years beginning on or after January 1, 2007, a taxpayer that is an Iowa-based business may exclude, to the extent included in federal taxable income, income received from the sale, rental or furnishing of tangible personal property or services directly related to the production of film, television, or video projects that are registered with the film office of the Iowa department of economic development.

Income which can be excluded on the Iowa return must meet the criteria of a qualified expenditure for purposes of the film qualified expenditure tax credit as set forth in rule 701—52.34(15,422). An Iowa-based business is a business whose commercial domicile as defined in Iowa Code section 422.32(3) is in Iowa.

However, if a taxpayer claims this income tax exclusion, the same taxpayer cannot also claim the film qualified expenditure tax credit as described in rule 701—52.34(15,422). In addition, any taxpayer who claims this income tax exclusion cannot have an equity interest in a business which received a film qualified expenditure tax credit. Finally, any taxpayer who claims this income tax exclusion cannot participate in the management of the business which received the film qualified expenditure tax credit.

EXAMPLE: A production company which registers with the film office for a project is a corporation which is domiciled in Iowa. If this same corporation receives income that is a qualified expenditure for purposes of the film qualified expenditure tax credit, the corporation cannot exclude this income on the Iowa corporation income tax return because the corporation has claimed the film qualified expenditure tax credit.

53.25(2) *Projects registered on or after July 1, 2009.* For tax years beginning on or after July 1, 2009, a taxpayer that is an Iowa-based business may exclude no more than 25 percent of the income received from the sale, rental or furnishing of tangible personal property or services directly related to the production of film, television, or video projects that are registered with the film office of the Iowa department of economic development in the year in which the qualified expenditure occurred. A reduction of 25 percent of the income is allowed to be excluded for the three subsequent tax years.

EXAMPLE: An Iowa taxpayer received \$10,000 in income in the 2010 tax year related to qualified film expenditures for a project registered on February 1, 2010. The \$10,000 was reported as income on taxpayer's 2010 federal tax return. Taxpayer may exclude \$2,500 of income on the Iowa corporation income tax return for each of the tax years 2010-2013.

53.25(3) *Repeal of exclusion.* The exclusion of income from the sale, rental or furnishing of tangible personal property or services directly related to production of film, television or video projects is repealed for tax years beginning on or after January 1, 2012. However, the exclusion is still available if the contract or agreement related to a film project was entered into on or before May 25, 2012. Assuming the same facts as those in the example in subrule 53.25(2), the taxpayer may continue to exclude \$2,500 of income on the Iowa corporation income tax return for the 2012 and 2013 tax years since the contract or agreement was entered into on or before May 25, 2012.

This rule is intended to implement 2012 Iowa Acts, House File 2337, sections 38 to 40, and Iowa Code section 422.35 as amended by 2012 Iowa Acts, House File 2337, section 35.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 0398C, IAB 10/17/12, effective 11/21/12]

701—53.26(422) Exclusion of biodiesel production refund. A taxpayer may exclude, to the extent included in federal taxable income, the amount of the biodiesel production refund described in rule 701—12.18(423).

This rule is intended to implement Iowa Code section 422.35 as amended by 2011 Iowa Acts, Senate File 531.

CHAPTER 54
ALLOCATION AND APPORTIONMENT
[Prior to 12/17/86, Revenue Department[730]]

701—54.1(422) Basis of corporate tax. Iowa Code section 422.33 imposes a tax on all corporations incorporated under the laws of Iowa and upon every foreign corporation doing business in Iowa. For tax years beginning on or after January 1, 1999, Iowa Code section 422.33 imposes a tax on all corporations doing business in Iowa. For corporations or other entities subject to the tax (as corporations), the tax is levied and collected only on such income as may accrue or be recognized to the corporation from business done or carried on in the state plus net income from certain sources without the state which by law follows the commercial domicile of the corporation.

If a corporation carries on its trade or business entirely within the state of Iowa, no allocation or apportionment of its income may be made. The corporation will be presumed to be carrying on its business entirely within the state of Iowa if its sales or other activities are carried on only in Iowa, even though it received income from sources outside the state in the form of interest, dividends, royalties and other sources of income from intangibles. For tax years beginning on or after January 1, 1995, an Iowa-domiciled corporation may apportion its income if it has income from intangibles that have acquired a business situs outside Iowa even if it has no other activities outside the state. For tax years beginning on or after January 1, 1999, an Iowa-domiciled corporation may apportion its income if the trade or business is carried on partly within and partly without the state or if income is derived from sources partly within and partly without the state, or if income is derived from trade or business and sources, all of which are not entirely in the state. (See 701—subrules 52.1(1) and 52.1(4).)

For tax years beginning on or after January 1, 1986, the income from the operation of a farm may be allocated and apportioned within and without the state if the business activities of the corporation are carried on partly within and partly without the state. For tax years beginning on or after January 1, 1995, an Iowa-domiciled corporation may apportion its income if it has income from intangibles that have acquired a business situs outside Iowa even if it has no other activities outside the state. For tax years beginning on or after January 1, 1999, an Iowa-domiciled corporation may apportion its income if the trade or business is carried on partly within and partly without the state or if income is derived from sources partly within and partly without the state, or if income is derived from trade or business and sources, all of which are not entirely in the state. (See 701—subrules 52.1(1) and 52.1(4).)

See subrule 54.1(4) for the definition of carrying on a trade or business partly within and partly without the state.

54.1(1) Definition—operation of a farm. A taxpayer is engaged in the operation of a farm if the taxpayer cultivates, operates, or manages a farm for gain or profit, either as owner or tenant. For the purpose of Iowa Code section 422.33(1), a taxpayer who receives a rental (either in cash or in kind) which is based upon farm production is engaged in the operation of a farm. However, a taxpayer who receives a fixed rental (without reference to production) is engaged in the operation of a farm only if the taxpayer participates to a material extent in the operation or management of the farm. A taxpayer engaged in forestry or the growing of timber is not thereby engaged in the operation of a farm. A taxpayer cultivating or operating a farm for recreation or pleasure rather than a profit is not engaged in the operation of a farm. For the purpose of this subrule, the term “farm” is used in its ordinary, accepted sense and includes stock, dairy, poultry, fruit, and truck farms, and also plantations, ranches, ranges, and orchards. A taxpayer is engaged in the operation of a farm if the taxpayer is a member of a partnership engaged in the operation of a farm. The operation of a farm includes the sale of products produced on the farm. The purchase of livestock for feeding purposes and subsequent resale is part of the operation of a farm.

54.1(2) Definition—property used in the operation of a farm. Property used in the operation of a farm means land and buildings which are used in the operation of a farm. The land must be used for the production of crops, fruits, or other agricultural products or for the sustenance of livestock. For the purposes of this subrule, the term livestock includes cattle, hogs, horses, mules, donkeys, sheep, goats, captive furbearing animals, chickens, turkeys, pigeons, and other poultry. It does not include fish, frogs,

reptiles, and the like. Land used for the sustenance of livestock includes land used for grazing such livestock.

Property used in the operation of a farm means property used in the unitary operations of a farm whether or not the acreage is contiguous.

54.1(3) Definition—unitary operations of a farm. Unitary operations of a farm means the operation of one or more tracts of land or the conducting of one or more types of farming operations where the operation of a farm within Iowa is integrated with, dependent upon or contributes to the operations of a farm outside the state.

54.1(4) Definition—carrying on a trade or business partly within and partly without the state. Carrying on a trade or business partly within and partly without the state means having business activities in at least one other state sufficient to meet the minimum constitutional standards for doing business in a state under the due process and commerce clauses of the United States Constitution. The determination of whether a corporation is carrying on a trade or business partly within and partly without the state must be made on a tax-year-by-tax-year basis. The activities of a past or future tax year have no bearing on the current year.

The following nonexclusive list of activities on a non-de minimus basis determined by aggregating all activities if physically carried on in a regular, systematic, and continuing basis by corporate officers or employees or representatives in at least one other state would constitute the minimum activities which would meet the constitutional standards for doing business in a state under the due process and commerce clauses of the United States Constitution:

The term “representative” means independent contractors, agents, brokers, and other individuals or entities who act on behalf of or at the direction of the corporation. A person may be considered a “representative” even though that person may not be considered an employee for other purposes such as withholding of income tax from commissions.

- a. The free distribution of product samples, brochures, and catalogues which explain the use of or laud the product, or both.
- b. Negotiation of a price for a product.
- c. Demonstration of how the corporation’s product works.
- d. Delivery of goods to customers by the corporation in its own or leased vehicles.
- e. Audit of inventory levels.
- f. Recruitment, training, evaluation, and management of employees, officers, or representatives.
- g. Intervention/mediation in credit disputes between customers and Iowa-located corporate departments.
- h. Use of hotel rooms and homes for business meetings.
- i. Assistance to wholesalers in obtaining suitable displays for products.
- j. Furnishing of display racks at no charge.
- k. Advice to sellers on the art of displaying goods to the public.
- l. Rental of hotel rooms for short-term display of products.
- m. Mere forwarding of customer questions, concerns, or problems.
- n. Installation or assembly of the corporate product.
- o. Ownership or lease of real estate by the corporation and used for a business purpose.
- p. Solicitation of orders for, or sale of, services or real estate.
- q. Solicitation of sales or sale of tangible personal property (as opposed to solicitation of orders).
- r. Maintenance of a stock of inventory.
- s. Existence of an office or other business location.
- t. Managerial activities.
- u. Collections on regular or delinquent accounts.
- v. Technical assistance and training given to purchaser and user of corporate products.
- w. The repair or replacement of faulty or damaged goods.
- x. The pickup of damaged, obsolete, or returned merchandise from purchaser or user.
- y. Rectification of or assistance in rectifying any product complaints or shipping complaints, for example.

- z. Delivery of corporate merchandise inventory to corporation's distributors or dealers on consignment.
 - aa. Maintenance of personal property.
 - ab. Participation in recruitment, training, monitoring, or approval of servicing distributors, dealers, or others where purchasers of corporation's products can have such products serviced or repaired.
 - ac. Inspection or verification of faulty or damaged goods.
 - ad. Inspection of the customer's installation of the corporate product.
 - ae. Research.
 - af. Employees' or officers' use of part of their homes or other places as an office if the corporation pays for such use.
 - ag. The use of samples for replacement or sale; storage of such samples at home or in rented space.
 - ah. Removal of old or defective products.
 - ai. Verification of the destruction of damaged merchandise.
 - aj. Repair or warranty work on company goods or products after sale.
 - ak. Any other activities carried on in advancement, promotion, or fulfillment of the business of the corporation.

Some of the above activities may not create a tax liability in another state because of the protections afforded by Public Law 86-272, 15 USCA Sections 381-385, which prohibit the taxation of a corporation if its only activities in the state are the solicitation of orders which are approved and filled by shipment or delivery from outside the state. Irrespective of whether the corporation is taxable in another state, it may apportion its income if it carries on one or a combination of the above activities in a regular and continuing basis by corporate officers or employees in at least one other state.

The mere shipment of goods via common carrier or the United States Postal Service to non-Iowa destinations does not constitute doing business partly within and partly without the state. *Irvine Co. v. McColgan*, 26 Cal.2d 160, 157 P.2d 847 (1945); *W.J. Dickey & Sons, Inc. v. State Tax Commission*, 212 Md. 607, 131 A.2d 277 (1957); *State of Georgia v. Coca-Cola Bottling Co.*, 214 Ga. 316, 104 S.E.2d 574 (1958); *E.F. Johnson Company v. Commissioner of Taxation*, 224 N.W.2d 150 (Minnesota 1975); 1980 O.A.G. 588, and *Kuehn to Bair #85-5-53(L)*.

For tax years beginning on or after January 1, 1989, a corporation domiciled in this state whose trade or business is carried on partly within and partly without the state or whose income is derived from sources partly within and partly without the state may allocate and apportion its income within and without the state. "Income from sources partly within and partly without the state" means income from real or tangible property located or having a situs within and without the state.

The term "tangible property having a situs without the state" means that a tangible property is habitually present in a state other than Iowa or it maintains a fixed and regular route through another state sufficient that the other state could constitutionally under the 14th Amendment and Commerce Clause of the United States Constitution impose an apportioned ad valorem tax on the property. *Central R. Co. v. Pennsylvania*, 370 U.S. 607, 82 S.Ct. 1297, 8 L.Ed.2d (1962); *New York Central & H. Railroad Co. v. Miller*, 202 U.S. 584, 26 S.Ct. 714, 50 L.Ed. 155 (1906); *American Refrigerator Transit Company v. State Tax Commission*, 395 P.2d 127 (Or. 1964); *Upper Missouri River Corporation v. Board of Review*, Woodbury County, 210 N.W.2d 828.

For tax years beginning on or after January 1, 1995, a corporation whose trade or business is carried on partly within and partly without the state of Iowa or whose income is derived from sources partly within and partly without the state may allocate and apportion its income within and without the state. "Income from sources partly within and partly without the state" means income from real, tangible, or intangible property located or having situses within and without the state.

This rule is intended to implement Iowa Code section 422.33(1) as amended by 1999 Iowa Acts, chapter 151.

701—54.2(422) Allocation or apportionment of investment income.

54.2(1) The classification of investment income by the labels customarily given them, such as interest, dividends, rents, and royalties, is of no aid in determining whether that income is business

or nonbusiness income. Interest, dividends, rents, and royalties shall be apportioned as business income to the extent the income was earned as a part of a corporation's unitary business, a portion of which is conducted in Iowa. *Mobil Oil Corp. v. Commissioner of Taxes*, 455 U.S. 425 (1980); *ASARCO, Inc. v. Idaho State Tax Commission*, 458 U.S. 307, 73 L.Ed.2d 787, 102 S.Ct. 3103 (1982); *F. W. Woolworth Co. v. Taxation and Revenue Dept.*, 458 U.S. 354, 73 L.Ed.2d 819, 102 S.Ct. 3128 (1982); *Container Corporation of America v. Franchise Tax Board*, 463 U.S. 159, 77 L.Ed.2d 545, 103 S.Ct. 2933 (1983). Whether investment income is part of a corporation's unitary business income depends upon the facts and circumstances in the particular situation. The burden of proof is upon the taxpayer to show that the treatment of investment income on the return as filed is proper. There is a rebuttable presumption that an affiliated group of corporations in the same line of business have a unitary relationship, although that is not the only element used in determining unitariness.

54.2(2) All business income, including capital gains or losses, may at the taxpayer's election be included in the computation of the denominator of the business activity formula provided, however, that a taxpayer cannot elect to exclude or include business investment income where the election would result in an understatement of net income reasonably attributable to Iowa.

For a tax year which begins on or after January 1, 1984, if the taxpayer has investment income which is deemed to be business income under the provisions of this rule, a written election shall be made. The election must state whether the taxpayer wishes to include or exclude investment income which is deemed to be business income under the provisions of this rule in the computation of the business activity formula. The election shall be signed by a duly authorized officer of the corporation. The election is binding on all future tax years unless the taxpayer is granted permission by the director to change the election. If the taxpayer fails to make a written election, the fact that investment income was or was not included in the computation of the business activity formula shall be deemed to be the taxpayer's election for all future tax years.

If the taxpayer makes an election to include investment income deemed to be business income in the computation of the denominator of the business activity ratio, the computation of the business activity ratio is as follows:

a. Interest income from accounts receivable. Accounts receivable interest income is included in the numerator of the business activity formula if the taxpayer receives accounts receivable interest income from customers located in Iowa. Accounts receivable interest income which cannot be segregated by geographical source shall be included in the numerator of the business activity ratio applying the same ratio as gross receipts within Iowa bear to total gross receipts.

EXAMPLE: The taxpayer operates a multistate chain of gasoline service stations, selling for cash and on credit. Interest is charged on credit sales, but the interest income cannot be segregated by geographical source. During the tax year, the taxpayer had gross receipts within Iowa of \$300,000, total gross receipts everywhere of \$1,000,000, and accounts receivable interest income everywhere of \$10,000. Ten thousand dollars would be included in the denominator of the business activity formula, and 30 percent of \$10,000, or \$3,000, would be included in the numerator of the business activity formula.

b. Interest income other than accounts receivable. All other interest income determined to be business income, except nontaxable interest income, shall be included in the numerator of the business activity formula if the taxpayer's commercial domicile is in Iowa.

c. Dividend income. All dividend income (net of special deductions) determined to be business income shall be included in the numerator of the business activity formula if the taxpayer's commercial domicile is in Iowa.

d. Rental income. All rental income determined to be business income shall be included in the numerator of the business activity formula to the extent that property is utilized in Iowa or in its entirety if the taxpayer's commercial domicile is in Iowa and the taxpayer is not taxable in the state in which the property is utilized. The extent of utilization of tangible personal property in a state is determined by multiplying the rent by a fraction, the numerator of which is the number of days of physical location of the property in the state during the rental period in the taxable year and the denominator of which is the number of days of physical location of the property everywhere during all rental periods in the taxable

year. If the physical location of the property during the rental period is unknown or not ascertainable by the taxpayer, tangible personal property is utilized in the state in which the property was located at the time the rental payer obtained possession.

e. Royalty income. All royalty income from intangible personal property determined to be business income shall be included in the numerator of the business activity formula if the taxpayer's commercial domicile is in Iowa. All royalty income from tangible personal property or real property determined to be business income shall be included in the numerator of the business activity formula if the situs of the tangible personal property or real property is within Iowa.

f. Gain or loss from the sale, exchange, or other disposition of real or tangible or intangible personal property, if the property while owned by the taxpayer was used in the taxpayer's trade or business, shall be apportioned by the business activity ratio applicable to the return for the year the gain or loss is included in taxable income and shall be included in the computation of the business activity ratio as follows:

(1) Gain or loss from the sale, exchange, or other disposition of real property shall be included in the numerator if the property is located in this state.

(2) Gain or loss from the sale, exchange, or other disposition of tangible personal property shall be included in the numerator if:

The property has a situs in this state at the time of sale; or

The taxpayer's commercial domicile is in this state and the taxpayer is not taxable in the state in which the property had a situs.

(3) Gains or loss from the sale, exchange, or other disposition of intangible personal property shall be included in the numerator if the taxpayer's commercial domicile is in this state.

(4) All gains or loss shall be included in the denominator of the activity ratio.

Noninclusive examples of gains or loss from the sale, exchange or other disposition of real or tangible or intangible property which may not be included in the computation of the business activity ratio because to do so would result in an understatement of net income reasonably attributable to Iowa are the gain recognized under an election pursuant to Section 338 of the Internal Revenue Code or gain recognized under Section 631(a) of the Internal Revenue Code.

g. Other miscellaneous income. All other miscellaneous income determined to be business income shall be included in the computation of the business activity formula to the extent such income items do not represent a recapture of expense.

h. Income which is not subject to Iowa tax shall not be included in the computation of the business activity ratio.

Subrules 54.2(1) and 54.2(2) are effective for tax years beginning on or after January 1, 1983.

54.2(3) For tax years beginning on or after January 1, 1995, all investment income that is business income, including capital gains or losses, shall be included in the computation of the denominator of the business activity formula if the investment income is derived from intangible property that has become an integral part of some business activity occurring regularly in or outside of Iowa. See subrule 52.1(4). All other investment business income, including capital gains or losses, may at the taxpayer's election be included in the computation of the denominator of the business activity formula provided, however, that a taxpayer cannot elect to exclude or include investment business income where the election could result in an understatement of net income reasonably attributable to Iowa. A taxpayer cannot elect to include some investment business income in and exclude other investment business income from the business activity formula. The election applies to all investment income of the taxpayer subject to the election.

For a tax year which begins on or after January 1, 1995, if the taxpayer has investment income subject to an election under the provisions of this rule, a written election shall be made. The election must state whether the taxpayer wishes to include or exclude investment income which is deemed to be business income subject to election under the provisions of this rule in the computation of the business activity formula. The election shall be signed by a duly authorized officer of the corporation. The election is binding on all future tax years unless the taxpayer is granted permission by the director to change the election. If the taxpayer fails to make a written election, the fact that investment income was or was

not included in the computation of the business activity formula shall be deemed to be the taxpayer's election for future years.

The computation of the business activity formula associated with investment income is as follows where the investment income is required to be included in the business activity formula or where an election for inclusion has been made:

a. Interest income from accounts receivable. If an inclusion election is made, accounts receivable interest income is included in the numerator of the business activity formula if the taxpayer receives accounts receivable interest income from customers located in Iowa. Accounts receivable interest income which cannot be segregated by geographical source shall be included in the numerator of the business activity ratio applying the same ratio as gross receipts within Iowa bear to total gross receipts.

EXAMPLE: The taxpayer operates a multistate chain of gasoline service stations, selling for cash and on credit. Interest is charged on credit sales, but the interest income cannot be segregated by geographical source. During the tax year, the taxpayer had gross receipts within Iowa of \$300,000, total gross receipts everywhere of \$1,000,000, and accounts receivable interest income everywhere of \$10,000. \$10,000 would be included in the denominator of the business activity formula, and 30 percent of \$10,000, or \$3,000, would be included in the numerator of the business activity formula.

b. Interest income other than accounts receivable. All other interest income determined to be business income, except nontaxable interest income, shall be included in the numerator of the business activity formula to the extent that the interest-bearing asset is an integral part of some business activity occurring regularly in Iowa. If the interest-bearing asset is not an integral part of some business activity occurring regularly in or outside of Iowa and if an election of inclusion is made, the interest therefrom (except nontaxable interest income) shall be included in the numerator of the business activity formula if the taxpayer's commercial domicile is in Iowa.

EXAMPLE: The taxpayer earns interest income from loans to affiliated corporations, commercial paper, bonds issued by multistate corporations, and federal income tax refunds. The interest income is business income. None of these interest-bearing assets are an integral part of some business activity occurring regularly within or without Iowa. Accordingly, the interest income produced by such assets is subject to an election of inclusion in or exclusion from the business activity formula.

c. Dividend income. All dividend income (net of special deductions) determined to be business income shall be included in the numerator of the business activity formula to the extent that the dividend asset is an integral part of some business activity occurring regularly in Iowa. If the dividend asset is not an integral part of some business activity occurring regularly in or outside of Iowa and if an election of inclusion is made, the dividends shall be included in the numerator of the business activity formula if the taxpayer's commercial domicile is in Iowa.

EXAMPLE: The taxpayer earns dividend income from dividends payable from a mutual fund. The dividend income is business income. The dividends are not an integral part of some business activity occurring regularly within or without Iowa. Assume that the taxpayer had also earned interest income which was business income and which was not an integral part of some business activity occurring regularly within or without Iowa and that the taxpayer had included that interest income in the business activity formula. Under these circumstances, the taxpayer must also include the dividend income in the business activity formula. If no inclusion of investment business income had been made in the business activity formula, the taxpayer would exclude the dividend income from the formula.

d. Rental income. If an inclusion election is made, all rental income determined to be business income shall be included in the numerator of the business activity formula to the extent that property is utilized in Iowa or in its entirety if the taxpayer's commercial domicile is in Iowa and the taxpayer is not taxable in the state in which the property is utilized. The extent of utilization of tangible personal property in a state is determined by multiplying the rent by a fraction, the numerator of which is the number of days of physical location of the property in the state during the rental period in the taxable year and the denominator of which is the number of days of physical location of the property everywhere during all rental periods in the taxable year. If the physical location of the property during the rental period is unknown or not ascertainable by the taxpayer, tangible personal property is utilized in the state in which the property was located at the time the rental payer obtained possession.

e. Royalty income and licensing fees. All royalty income and licensing fees from intangible personal property determined to be business income shall be included in the numerator of the business activity formula to the extent that the royalty or licensing asset is an integral part of some business activity occurring regularly in Iowa. If the royalty or licensing asset is not an integral part of some business activity occurring regularly in or outside of Iowa and if an election of inclusion is made, the royalties or licensing fees shall be included in the numerator of the business activity formula if the taxpayer's commercial domicile is in Iowa.

EXAMPLE: A, a corporation with a commercial domicile outside of Iowa, derives royalties from a trade name that is used by other corporations doing business in Iowa in their Iowa businesses. Since the royalty asset is an integral part of an Iowa business activity, A must include the royalties associated with Iowa business activity in the numerator of A's business activity formula.

EXAMPLE: The taxpayer, a corporation with a commercial domicile in Iowa, derives license fees from others who do business solely outside of Iowa. The license fees are business income. The license fees are an integral part of some business activity carried on regularly by the others outside of Iowa. The taxpayer must include the license fees in the business activity formula. If the taxpayer also had other license fees which were business income and which were not an integral part of some business activity occurring regularly within or without Iowa, these other license fees would be subject to an election of inclusion in or exclusion from the business activity formula.

If an inclusion election is made, all royalty income from tangible personal property or real property determined to be business income shall be included in the numerator of the business activity formula if the situs of the tangible personal property or real property is within Iowa.

f. Gains or losses. Gain or loss from the sale, exchange, or other disposition of real or tangible or intangible personal property, if the property while owned by the taxpayer was operationally related to the taxpayer's trade or business carried on in Iowa, shall be apportioned by the business activity ratio applicable to the return for the year the gain or loss is included in taxable income and shall be included in the computation of the business activity ratio as follows:

(1) Gain or loss from the sale, exchange, or other disposition of real property shall be included in the numerator if the property is located in this state and if an election of inclusion has been made.

(2) Gain or loss from the sale, exchange, or other disposition of tangible personal property shall be included in the numerator if an election of inclusion has been made and if the property has a situs in this state at the time of sale, or the taxpayer's commercial domicile is in this state and the taxpayer is not taxable in the state in which the property had a situs.

(3) Gain or loss from the sale, exchange, or other disposition of intangible personal property shall be included in the numerator of the business activity formula to the extent that the intangible personal property is an integral part of some business activity occurring regularly in Iowa in the tax year that gain or loss is recognized. If the intangible personal property is not an integral part of some business activity occurring regularly in or outside of Iowa in the tax year that gain or loss is recognized and if an election of inclusion has been made, the gain or loss shall be included in the numerator if the taxpayer's commercial domicile is in this state.

EXAMPLE: The taxpayer carries on its trade or business within and without Iowa. The taxpayer has patents which it licenses others to use in activities within and without Iowa. The patents are an integral part of business activity occurring regularly within and without Iowa. The taxpayer receives royalty income for the use of the patents. The taxpayer sells the patents and realizes a capital gain. The capital gain from the sale of the patents cannot be segregated by geographical source. Assume that the taxpayer is on a calendar tax year. Assume that the sale occurred on July 1. From January 1 to July 1, 5 percent of the royalties were attributable to some business activity regularly occurring in Iowa. The taxpayer should include 5 percent of the capital gain in the numerator of the business activity formula.

(4) All gain or loss shall be included in the denominator of the business activity ratio if an election of inclusion has been made or if the gain or loss is required to be included in the business activity ratio.

Noninclusive examples of gains or losses from the sale, exchange, or other disposition of real or tangible or intangible property may not be included in the computation of the business activity ratio, because to do so would result in an understatement of net income reasonably attributable to Iowa and

would include the gain recognized under an election pursuant to Section 338 of the Internal Revenue Code and the gain recognized under Section 631(a) of the Internal Revenue Code.

g. Other miscellaneous income. All other miscellaneous income determined to be business income which is not subject to an election or which is the subject of a proper election of inclusion shall be included in the computation of the business activity formula to the extent such income items do not represent a recapture of expense. The miscellaneous income shall be included in the numerator of the business activity formula if the income is from an Iowa source.

h. Other investment income. All other investment income shall be included in the numerator of the business activity formula to the extent that the intangible personal property which produced that income is an integral part of some business activity occurring regularly in Iowa. If the intangible personal property is not part of some business activity occurring regularly in or outside of Iowa and if an election of inclusion has been made, the other investment income shall be included in the numerator if the taxpayer's commercial domicile is in this state.

i. Activity ratio. Income which is not subject to Iowa tax shall not be included in the computation of the business activity ratio.

54.2(4) Grossed-up foreign income. For purposes of administration of the Iowa corporation income tax law, gross-up (Section 78 of the Internal Revenue Code) shall be considered to be nonbusiness income, irrespective of the fact that the income creating the gross-up may be business income, and shall be allocated to the situs of the income payor.

This rule is intended to implement Iowa Code Supplement sections 422.32(2) and 422.33(1).

701—54.3(422) Application of related expense to allocable interest, dividends, rents and royalties—tax periods beginning on or after January 1, 1978. Rule 54.2(422) deals with the separation of “net” income; therefore, determination and application of related expenses must be made, as hereinafter directed, before allocation and apportionment within and without Iowa. Related expenses shall mean those expenses directly related, including related federal income taxes. *Allphin v. Joseph E. Seagram & Sons*, 204 S.W. 2d 515 (Ky. 1956). For tax periods beginning on or after January 1, 2000, related expense includes both directly related expense and indirectly related interest expense. The portion of interest expense indirectly related to allocable interest, other than interest from securities of states and their political subdivisions, dividends, rents and royalties shall be determined by multiplying the net amount of interest expense, after deducting interest directly related to an item of income, by a ratio. The numerator of the ratio is the average value of investments which produce or are held for the production of allocable interest, other than interest from securities of states and their political subdivisions, dividends, rents and royalties. The denominator is the average value of all assets of the taxpayer, less securities of states and their political subdivisions. (*Hunt-Wesson, Inc. v. Franchise Tax Board of California*, No. 98-2043 (U.S. Sup. Ct., filed February 22, 2000)).

A “directly related expense” shall mean an expense which can be specifically attributed to an item of income. Interest expense shall be considered directly related to a specific property which generates, has generated, or could reasonably have been expected to generate gross income if the existence of all of the facts and circumstances described below is established. Such facts and circumstances are as follows: (1) the indebtedness on which the interest was paid was specifically incurred for the purpose of purchasing, maintaining, or improving the specific property; (2) the proceeds of the borrowing were actually applied to the specified purpose; (3) the creditor can look only to the specific property (or any lease or other interest therein) as security for the loan; (4) it may be reasonably assumed that the return on or from the property will be sufficient to fulfill the terms and conditions of the loan agreement with respect to the amount and timing of payment of principal and interest; and (5) there are restrictions in the loan agreement on the disposal or use of the property consistent with the assumptions described in (3) and (4) above.

A deduction for interest may not be considered definitely related solely to specific property, even though the above facts and circumstances are present in form, if any of such facts and circumstances are not present in substance. Any expense directly or indirectly attributable to allocable interest, dividends, rents and royalties shall be deducted from such income to arrive at net allocable income.

EXAMPLE (i): For purposes of this example, it is assumed that the taxpayer has nonbusiness rental income. The taxpayer invests in a 20-story office building. Under the terms of the lease agreements, the taxpayer provides heat, electricity, janitorial services and maintenance. The taxpayer also pays the property taxes. Construction of the building was funded through borrowings which meet the criteria of a direct expense under the provisions of this paragraph. The directly related expenses to the operation of the property are:

Interest expense	\$1,200,000
Property taxes	500,000
Depreciation	500,000
Electricity	300,000
Heat	200,000
Insurance	150,000
Janitorial services	100,000
Repairs	50,000
Total expense	<u>\$3,000,000</u>

The directly related expense of the allocable nonbusiness rental income is \$3,000,000.

EXAMPLE (ii): For purposes of this example, it is assumed that the taxpayer has nonbusiness income. The taxpayer is a multistate manufacturer of processed foods. It has a nonbusiness investment portfolio which is managed by an investment firm for a fee. The fee paid for the management of the portfolio is a directly related expense to the dividends and interest income received. The fee is attributed to the various types of income on the ratio that the various types of income bear to the total income produced.

EXAMPLE (iii): Same as example (ii), except that in addition to the investments described, the taxpayer also has investments in oil properties. The depletion expense is a directly related expense to the oil royalty income.

This rule is intended to implement Iowa Code section 422.33.

701—54.4(422) Net gains and losses from the sale of assets. For purposes of administration of this rule, a capital gain or loss shall mean the sale price or value at the time of disposal of an asset less the adjusted basis, whether reportable as short-term or long-term capital gain or ordinary income for federal income tax purposes.

Nonbusiness gain or loss from the sale, exchange or other disposition of property if the property while owned by the taxpayer was not operationally related to the taxpayer's trade or business carried on in Iowa shall be allocated as follows:

54.4(1) Gains or losses from the sale, exchange or other disposition of real property located in this state are allocable to this state.

54.4(2) Gains and losses from the sale, exchange or other disposition of tangible personal property are allocable to this state if:

a. The property had a situs in this state at the time of sale; or

b. The taxpayer's commercial domicile is in this state and the taxpayer is not taxable in the state in which the property had a situs.

54.4(3) Gains or losses from the sale, exchange or other disposition of intangible personal property are allocable to this state if the taxpayer's commercial domicile is in this state.

54.4(4) Gains or losses from the sale, exchange or other disposition of stock of another corporation, if the activities of the other corporation were not operationally related to the taxpayer's trade or business carried on in Iowa while the stock was owned by the taxpayer, are allocable to this state if the taxpayer's commercial domicile is in this state.

This rule is intended to implement Iowa Code Supplement section 422.33(1).

701—54.5(422) Where income is derived from the manufacture or sale of tangible personal property. The law specifically provides but one method for apportioning net income derived from the manufacture or sale of tangible personal property. The part of such income attributable to business within the state shall be that proportion which the gross sales made within the state bear to the total gross sales.

In determining the total net taxable income, the apportionable income attributable to this state, as determined by use of the apportionment fraction, shall be added to the nonapportionable income allocable to this state.

When a taxpayer is engaged in manufacturing and selling or purchasing and reselling goods or products “gross sales” includes all gross receipts from the sales of such goods or products (or other property of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the tax period) held by the taxpayer primarily for sale to customers in the ordinary course of its trade or business. “Gross receipts” for this purpose means gross sales, less returns and allowances. Federal and state excise taxes shall be included as part of such receipts if such taxes are passed on to the buyer or included as part of the selling price of the product.

54.5(1) Sales of tangible personal property are in this state if the property is delivered or shipped to a purchaser within this state regardless of the f.o.b. point or other conditions of the sales.

54.5(2) Property shall be deemed to be delivered or shipped to a purchaser within this state if the recipient is located in this state, even though the property is ordered from outside this state.

EXAMPLE: The taxpayer, with inventory in State A, sold \$100,000 of its products to a purchaser having branch stores in several states including this state. The order for the purchase was placed by the purchaser’s central purchasing department located in State B. Twenty-five thousand dollars of the purchase order was shipped directly to purchaser’s branch store in this state. The branch store in this state is the “purchaser within this state” with respect to \$25,000 of the taxpayer’s sales.

54.5(3) Property is delivered or shipped to a purchaser within this state if the shipment terminates in this state, even though the property is subsequently transferred by the purchaser to another state.

EXAMPLE: The taxpayer makes a sale to a purchaser who maintains a central warehouse in this state at which all merchandise purchases are received. The purchaser reships the goods to its branch stores in other states for sale. All of the taxpayer’s products shipped to a purchaser’s warehouse in this state are property “delivered or shipped to a purchaser within this state”.

54.5(4) The term “purchaser within this state” shall include the ultimate recipient of the property if the taxpayer in this state, at the designation of the purchaser, delivers to or has the property shipped to the ultimate recipient within this state.

EXAMPLE: A taxpayer in this state sold merchandise to a purchaser in State A. The taxpayer directed the manufacturer or supplier of the merchandise in State B to ship the merchandise to the purchaser’s customer in this state pursuant to purchaser’s instructions. The sale by the taxpayer is in this state.

54.5(5) When property being shipped by a seller from the state of origin to a consignee in another state is diverted while en route to a purchaser in this state, the sales are in this state.

EXAMPLE: The taxpayer, a produce grower in State A, begins shipment of perishable produce to the purchaser’s place of business in State B. While en route the produce is diverted to the purchaser’s place of business in this state. The sale by the taxpayer is attributed to this state.

54.5(6) Deliveries for transportation outside the state. The taxpayer sells merchandise to a purchaser outside this state, and the purchaser picks up the produce or makes arrangements to have the product picked up at the taxpayer’s place of business in this state to be taken outside the state. The sale by the taxpayer is a sale outside this state.

54.5(7) Dock or pickup sales. The taxpayer sells merchandise to a purchaser within this state, and the purchaser picks up the product at the taxpayer’s place of business outside of this state. The sale by the taxpayer is a sale in this state. *Pabst Brewing Co. v. Wis. Dept. of Revenue*, 387 N.W.2d 121 (Wis. App. 1986); *Strickland v. Patcraft Mills, Inc.*, 302 S.E.2d 544 (Ga. 1983); *Olympia Brewing Company v. Commissioner of Revenue*, 326 N.W.2d 642 (Minn. 1982); *Department of Revenue v. Parker Banana Company*, 391 So. 2d 762 (Fla. App. 1980); *Department of Revenue v. U.S. Sugar Corporation*,

388 So. 2d 596 (Fla. App. 1980). This subrule is effective for tax years beginning on or after January 1, 1989.

This rule is intended to implement Iowa Code section 422.33.

701—54.6(422) Apportionment of income derived from business other than the manufacture or sale of tangible personal property. Income derived from business other than the manufacture or sale of tangible personal property shall be attributed to Iowa in the proportion which the Iowa gross receipts bear to the total gross receipts. Gross receipts are includable in the numerator of the apportionment factor in the proportion which the recipient of the service receives benefit of the service in this state.

54.6(1) Services other than those set forth in subrules 54.6(3) to 54.6(5) and rule 701—54.7(422). With respect to a specific contract or item of income, all gross receipts from the performance of services are includable in the numerator of the apportionment factor if the recipient of the service receives all of the benefit of the service in Iowa. If the recipient of the service receives some of the benefit of the service in Iowa with respect to a specific contract or item of income, the gross receipts are includable in the numerator of the apportionment factor in proportion to the extent the recipient receives benefit of the service in Iowa.

The following are noninclusive examples of the application of this subrule.

a. A real estate development firm from State A is developing a tract of land in Iowa. The real estate development firm from State A engages a surveying company from State B to survey the tract of land in Iowa. The survey work is completed and the plats are drawn in Iowa. The gross receipts from this survey work are attributable to Iowa and included in the numerator of the apportionment factor because the recipient of the service received all of the benefits of the service in Iowa.

b. A corporation headquartered in State Y is building an office complex in Iowa. The corporation from State Y contracts with an engineering firm from State X to oversee construction of the buildings on the site. The engineering firm performs some of their service in Iowa at the building site and also some of their service in State X. The gross receipts from the engineering service are attributable to Iowa and included in the numerator of the apportionment factor because the recipient of the service received all of the benefit of the service in Iowa.

c. A corporation from State A contracts with a computer software company from State D to develop and install a custom software application in a business office in Iowa of the company from State A. The software firm does consulting work on the project in State A and in Iowa. The software development is done in State D and in Iowa. The software package is delivered to the corporation from State A in Iowa. The gross receipts from the software development are attributable to Iowa and included in the numerator of the apportionment factor because the recipient of the service received all of the benefit of the service in Iowa.

d. A corporation located in Iowa performs direct mail activities for a customer located in State X. The direct mail activities include the preparation and mailing of materials to households located throughout the United States. The corporation located in Iowa performed some activities related to the direct mail contract in State X. One percent of the direct mailings went to addresses within Iowa. One percent of the gross receipts related to this direct mail contract are attributable to Iowa and included in the numerator of the apportionment factor because the recipient of the service received the 1 percent of the benefit of the service in Iowa.

e. A corporation located in State A performs direct mail activities for a customer located in State X. The corporation has nexus with Iowa due to other activities of the unitary business. The direct mail activities include the preparation and mailing of materials to households throughout the United States. The corporation located in State A printed and mailed the direct mail materials to households on a mailing list prepared by the direct mailing company in State A. Five percent of the direct mailings went to addresses within Iowa. Five percent of the gross receipts related to this direct mail contract are attributable to Iowa and included in the numerator of the apportionment factor.

f. A company which owns apartments in Iowa and State A contracts with a pest control corporation for pest control activities. One contract is entered into which covers 100 apartment units in Iowa and 400 apartment units in State A. Twenty percent (100/500) of the gross receipts from the pest

control contract are attributable to Iowa and are included in the numerator of the apportionment factor as 20 percent of the apartment units are located in Iowa and in the absence of more accurate records, it is presumed that the number of apartment units is the best measure of the extent the recipient of the service received benefit of the service in Iowa.

If a taxpayer does not believe that the method of apportionment set forth in this subrule reasonably attributes income to business activities within Iowa, the taxpayer may request the use of an alternative method of apportionment. The request must be filed at least 60 days before the due date of the return, considering any extensions of time to file, in which the taxpayer wishes to use an alternative method of apportionment. The request should be filed with Taxpayer Services and Policy Division, P.O. Box 10457, Des Moines, Iowa 50306-0457. The taxpayer must set forth in detail the extent of the taxpayer's business operations within and without the state, along with the reasons why the apportionment method set forth in this subrule is inappropriate. In addition, the taxpayer must set forth a proposed method of apportionment and the reasons why the proposed method of apportionment more reasonably attributes income to business activities in Iowa.

If the department agrees that the proposed method of apportionment more reasonably attributes income to business activities in Iowa, the taxpayer may continue to use the proposed method of apportionment until the taxpayer's factual situation changes or the department prospectively informs the taxpayer that the method of apportionment may no longer be used.

If the taxpayer's factual situation changes and under the new factual situation the taxpayer still believes that the method of apportionment set forth in this subrule still is not appropriate, then the taxpayer must submit a new request for the use of an alternative method of apportionment.

If the taxpayer disagrees with the determination of the department, the taxpayer may file a protest within 60 days of the date of the letter setting forth the department's determination and the reasons therefor in accordance with rule 701—7.8(17A). The department's determination letter shall set forth the taxpayer's rights to protest the department's determination.

54.6(2) If the business activity consists of providing services, such as the operation of an advertising agency, or the performance of equipment service contracts, research and development contracts, "sales" includes the gross receipts from the performance of such services including fees, commission, and similar items.

In the case of cost plus fixed fee contracts, such as the operation of a government-owned plant for a fee, gross receipts include the entire reimbursed cost, plus the fee.

54.6(3) Business income of a financial organization, excepting a financial institution exempted from the corporation income tax under Iowa Code section 422.34(1) attributable to Iowa shall be:

a. In the case of taxable income of a taxpayer whose income-producing activities are confined solely to this state, the entire net income of such taxpayer.

b. In the case of taxable income of a taxpayer who conducts income-producing activities as a financial organization partially within and partially without this state, that portion of its net income as its gross business in this state is to its gross business everywhere during the period covered by its return, which portion shall be determined as the sum of:

(1) Fees, commission or other compensation for financial services rendered for a customer located in this state or an account maintained within this state;

(2) Gross profits from trading in stocks, bonds or other securities rendered for a customer located within this state;

(3) Interest income from a loan on real property located in this state. Interest and other receipts from assets in the nature of loans and installment obligations if the borrower is located within this state. Other fees and other miscellaneous earnings if connected with loans to borrowers within this state;

(4) Interest charged to customers within this state or to accounts maintained within this state for carrying debit balances of margin accounts, without deduction of any costs incurred in carrying such accounts;

(5) Interest, lease payments, or other receipts from financing leases, installment sales contracts, leases or other financing instruments received from customers within this state; and

(6) Any other gross income resulting from the operation as a financial organization within this state.

A “financial organization” means any finance company or investment company doing business in Iowa. A finance company includes any consumer finance company, sales finance company, or commercial finance company making loans to individuals and businesses. An investment company includes a company primarily engaged in the business of investing, reinvesting, owning, holding or trading in securities.

54.6(4) Net business income of construction contractors shall be attributed to Iowa in the proportion which Iowa gross receipts bear to total gross receipts. Iowa gross receipts are those gross receipts from contracts performed in Iowa.

54.6(5) A corporation’s distributive share of net income or loss from a joint venture, limited liability company, or partnership is subject to apportionment within and without the state. If the income of the partnership, limited liability company, or joint venture is received in connection with the taxpayer’s regular trade or business operations, the partnership, limited liability company, or joint venture income shall be apportioned within and without Iowa on the basis of the taxpayer’s business activity ratio. The corporation’s distributive share of the gross receipts of the partnership, limited liability company, or joint venture shall be included in the computation of the business activity ratio in accordance with the provisions of this chapter.

EXAMPLE 1: A, a corporation with a commercial domicile in State X, is engaged in business within and without Iowa whereby A sells tangible personal property. A also has an interest in a limited partnership whose business is conducted within and without Iowa. Five percent of the limited partnership’s gross receipts are derived from the sale of tangible personal property to Iowa purchasers and 95 percent are derived from sales and deliveries to purchasers outside of Iowa. A will include 5 percent of its distributive share of the gross receipts of the partnership in the numerator along with A’s destination Iowa sales in calculating its business activity ratio. A will include 100 percent of its distributive share of the gross receipts in the denominator along with A’s total sales in calculating its business activity ratio.

EXAMPLE 2: B, a corporation with a commercial domicile in State X, has no physical presence in the state of Iowa. B’s only contact with Iowa is B’s interest in a limited partnership whose business is conducted within and without Iowa. Ten percent of the limited partnership’s gross receipts are derived from the sale of tangible personal property to Iowa purchasers and 90 percent are derived from sales and deliveries to purchasers outside of Iowa. B will include 10 percent of its distributive share of the gross receipts of the partnership in the numerator in calculating its business activity ratio. B will include 100 percent of its distributive share of the gross receipts in the denominator along with B’s total sales in calculating its business activity ratio.

54.6(6) Gross receipts from rent or royalties or other fees received for the use of real property are attributable to this state if the real property is located in this state.

Gross receipts from rent, royalties, license fees, or other fees received for the use of tangible personal property are attributable to this state to the extent that the property is utilized in this state. The extent of utilization of tangible personal property in this state is determined by multiplying the rents, royalties, license fees or other fees by a fraction, the numerator of which is number of days or other measure of physical location of the property in the state during the rental period in the taxable year and the denominator of which is the number of days or other measure of physical location of the property everywhere during all rental periods in the taxable year. If the physical location of property during the rental period is unknown or not ascertainable by the taxpayer, tangible personal property is utilized in the state in which the property was located at the time the rental payer obtained possession.

An example of another measure of physical location of property is where a lessee of transportation equipment is required to report to the lessor miles traveled by state.

a. A lessee takes possession of a rental car in this state. Six days later after driving 1,500 miles, the rental car is returned to the lessor in this state. Absent evidence to the contrary, the rental receipts are attributable to this state.

b. A lessee takes possession of a rental car in this state. Six days later after driving 1,500 miles, the rental car is returned to the lessor in an adjacent state. Absent evidence to the contrary, it is assumed that 50 percent of the rental receipts are attributable to this state.

c. A lessee takes possession of a rental semi-truck in another state. The lessee is required to maintain mileage records by state for purposes of special fuel tax. The lessee provides copies of these records to the lessor. The lessor must use these records to determine the portion of the rental receipts that are attributable to this state.

This rule is intended to implement Iowa Code Supplement section 422.33(1).
[ARC 7761B, IAB 5/6/09, effective 6/10/09; ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—54.7(422) Apportionment of income of transportation, communications, and certain public utilities corporations. Net income of these corporations, other than interest, dividends, rents and royalties, which is not specifically allocated by 54.2(422) and 54.6(422) shall be apportioned as follows:

54.7(1) Railroads shall determine their Iowa proportion of gross receipts or gross revenue from railroad operations by the following methodology:

a. Freight revenue. Freight revenue within and without Iowa shall be determined for each individual freight movement by taking the proportion of car and locomotive miles traveled in Iowa to total car and locomotive miles traveled within and without Iowa for the individual freight movement and applying such individual percentage to the gross receipts derived from the individual freight movement. Empty mileage that does not produce gross receipts shall not be used.

b. Passenger revenue. Passenger revenue within and without Iowa shall be determined by use of the same principles applicable to freight revenue.

c. Switching revenue. Unless the switching revenue is accounted for in the freight revenue or passenger revenue categories, it shall be determined in accordance with subrule 54.6(1).

d. Miscellaneous revenue. Nonexclusive examples of miscellaneous revenues include demurrage revenue, station services revenue, storage revenue, railway property rental, joint facility revenue, and amounts received from government authorities. These revenues shall be attributed to the state in which they were earned.

e. All of the above classes of revenues shall be aggregated and combined with other gross receipts or gross revenues from sources within Iowa to compose the numerator. The denominator shall be computed in accordance with 701—subrule 54.2(2).

54.7(2) Airline, truck and bus line companies, water transportation companies, freight car and equipment companies shall determine their Iowa proportion of gross receipts or gross revenues derived from transportation operations by taking the proportion of mileage traveled in Iowa to the total mileage traveled within and without the state.

54.7(3) Oil, gasoline, gas and other pipeline companies shall determine the proportion of transportation revenue derived from interstate business that is attributable to Iowa by the proportion of Iowa traffic units to total traffic units. The “traffic unit” of an oil pipeline is defined as the transportation of one barrel of oil for a distance of one mile; the “traffic unit” of a gasoline pipeline is defined to be the transportation of one barrel of gasoline for a distance of one mile; and a “traffic unit” of a gas pipeline is defined to be the transportation of 1,000 cubic feet or one dekatherm of natural or casinghead gas for a distance of one mile. The taxpayer may use either 1,000 cubic feet or one dekatherm as a “traffic unit” as long as the numerator and denominator are computed on the same basis. Any other pipeline company will use the definition of the “traffic unit” which would most nearly describe the substance transported.

54.7(4) Telecommunications companies shall determine the Iowa proportion of gross receipts or gross revenues from telecommunication operations by the following methodology:

a. Gross receipts or gross revenues from local service in this state are attributable to this state.

b. Gross receipts or gross revenues from toll services originating and terminating in this state are attributable to this state.

c. Gross receipts or gross revenues from interstate toll services originating in this state and charged to an Iowa service address are attributable to this state.

d. Gross receipts or gross revenues from interstate toll services terminating in this state and charged to an Iowa service address are attributable to this state.

e. Gross receipts or gross revenues from the sale of phone cards in this state are attributable to this state.

f. Gross receipts or gross revenues from the sale of telecommunication services to resellers of telecommunication services for telecommunication services used for local service in this state are attributable to this state.

g. Gross receipts or gross revenues from the sale of telecommunication services to resellers of telecommunication services for telecommunication services used for toll services originating and terminating in this state are attributable to this state.

h. Gross receipts or gross revenues from the sale of telecommunication services to resellers of telecommunication services for telecommunication services used for interstate toll services originating in this state are attributable to this state.

i. Gross receipts or gross revenues from Internet access originating in this state and charged to an Iowa service address are attributable to this state.

j. Gross receipts or gross revenues from cellular phone services originating in this state and charged to an Iowa service address are attributable to this state.

k. Gross receipts or gross revenues from personal communication services originating in this state and charged to an Iowa service address are attributable to this state.

l. Gross receipts or gross revenues from paging services originating in this state and charged to an Iowa service address are attributable to this state.

m. Services originating in this state and charged to an Iowa service address are attributable to this state.

n. Gross receipts from cable television, satellite television, and community antenna television services, including gross receipts from providing Internet access, charged to an Iowa service address are attributable to this state.

o. Any other gross receipts or gross revenues from fees, access charges, toll services or other charges for communication services charged to an Iowa service address are attributable to this state. See *Goldberg v. Sweet*, 488 U.S. 252, 102 L.Ed. 2d 607, 109 S.Ct. 582 (1989).

p. All of the above classes of revenues shall be aggregated and combined with other gross receipts or gross revenues from sources within Iowa to compose the numerator. The denominator shall be computed in accordance with 701—subrule 54.2(2).

q. “Telecommunications” is an electronic mode of transmitting data, information, and audio and video signals and includes but is not limited to both one-way and two-way signals using land-line phones, cellular phones, paging devices, satellites, and microwave systems. Telecommunications is a medium or mode of delivery, not the actual content of the information transmitted over the medium. Telecommunications does not include broadcast radio and television. See subrule 54.7(5).

r. The term “telecommunication companies” includes but is not limited to: telephone companies; resellers of telephone services; cellular phone companies; personal communication service providers; paging service providers; radio communication providers; Internet access providers; cable television, satellite television, community antenna television companies; and other companies of a similar type.

If a taxpayer feels that the allocation and apportionment method as prescribed by Iowa Code subsection 422.33(2) and in this subrule, in the taxpayer’s case, results in an injustice, the taxpayer may petition the department for permission to determine the taxable net income, both allocable and apportionable, to this state on some other basis. See rule 701—54.9(422).

54.7(5) Radio and television companies doing business within and without Iowa shall determine their Iowa proportion of gross receipts or gross revenues derived from broadcasting operations by taking the proportion of the Iowa population served by broadcasting to the total population served by broadcasting. The population served by broadcasting shall be determined by a recognized market survey such as Arbitron. As used in this rule the term “population served by broadcasting” includes all of the residents of the broadcasting area, whether or not these residents individually elect to receive the broadcasts.

EXAMPLE: A television company has its studio and transmitter in state A. The activities of the employees and corporate officers of the television company in Iowa include solicitation of advertising, covering special news events and covering athletic events. The broadcast signal also reaches state B but the television company does not conduct any activities in state B. The population served by

broadcasting is as follows: 100,000 in Iowa, 100,000 in state A, and 50,000 in state B for a total population served by broadcasting of 250,000. The television company's apportionment factor would be computed as follows: The numerator would be the Iowa population served by broadcasting and the denominator would be the total population served by broadcasting ($100,000 \div 250,000 = 40\%$).

Subrule 54.7(5) is effective for tax years beginning on or after January 1, 1988.

54.7(6) Corporations in the business of publishing, selling, licensing, or distributing newspapers, magazines, periodicals, trade journals, or other printed material, or which publish, sell, license or distribute in a filmed or microfilmed image, or in an electronic media, an electronic virtual storage system or broadcasts any of the above items which have been traditionally disseminated in a printed format shall determine the Iowa portion of gross receipts by the following methodology:

a. Gross receipts from the sale of tangible personal property including printed materials, electronic storage media, fees for use of an electronic virtual storage system or fees to receive a broadcast delivered, shipped or broadcast to a purchaser or a subscriber in this state.

b. Gross receipts from advertising shall be attributed to Iowa as determined by the taxpayer's circulation factor during the tax period. The circulation factor shall be determined for each individual publication of the taxpayer containing advertising and shall be equal to the ratio that the taxpayer's Iowa circulation to purchasers and subscribers of its printed material, electronic storage media, electronic virtual storage system or broadcasts containing advertising bears to its total circulation to purchasers and subscribers everywhere.

The circulation factor for an individual publication shall be determined by reference to the rating statistics as reflected in such sources as the Audit Bureau of Circulations or other comparable sources, provided that the source selected is consistently used from year to year for such purpose. If none of the foregoing sources are available, or, if available, none is in a form or content sufficient for such purposes, then the circulation factor shall be determined from the taxpayer's books and records.

c. When specific items of advertisement can be shown, upon clear and convincing evidence, to have been distributed solely to a limited regional or local geographic area of which this state is a part, the taxpayer may petition, or the director may require, that all or a portion of such receipts be attributed to this state on the basis of a regional or local geographic area circulation factor and not upon the basis of the circulation factor provided by "b" above.

Such attribution shall be based on the ratio that the taxpayer's circulation to purchasers and subscribers located in this state bears to its total circulation to purchasers and subscribers located within such regional or local geographic area. This alternative attribution method shall be permitted only on the condition that such receipts are not double counted or otherwise included in the numerator of any other state.

54.7(7) Utility companies shall determine their Iowa gross receipts or gross revenues from transporting natural or casinghead gas for others that is attributable to Iowa by the proportion of Iowa traffic units to total traffic units. The "traffic unit" is defined to be the transportation of 1,000 cubic feet or one dekatherm of natural or casinghead gas for a distance of one mile. Where the transportation is less than one mile, the taxpayer must accumulate the fractions of one mile into one-mile increments for purposes of computing "traffic units." The taxpayer may use either 1,000 cubic feet or one dekatherm as a "traffic unit" as long as the numerator and denominator are computed on the same basis.

If a taxpayer feels that the allocation and apportionment method as prescribed by Iowa Code subsection 422.33(2) and in this subrule, in the taxpayer's case, results in an injustice, the taxpayer may petition the department for permission to determine the taxable net income, both allocable and apportionable, to this state on some other basis. See rule 701—54.9(422).

54.7(8) Utility companies shall determine their Iowa gross receipts or gross revenues from transporting electricity for others that is attributable to Iowa by the proportion of Iowa traffic units to total traffic units. The "traffic unit" is defined to be the transportation of 1,000 kilowatt-hours of electricity for a distance of one mile. Where the transportation is less than one mile, the taxpayer must accumulate the fractions of one mile into one-mile increments for purposes of computing "traffic units."

If a taxpayer feels that the allocation and apportionment method as prescribed by Iowa Code subsection 422.33(2) and in this subrule, in the taxpayer's case, results in an injustice, the taxpayer

may petition the department for permission to determine the taxable net income, both allocable and apportionable, to this state on some other basis. See rule 701—54.9(422).

This rule is intended to implement Iowa Code section 422.33.

701—54.8(422) Apportionment of income derived from more than one business activity carried on within a single corporate structure. Net income from corporations where more than one business activity is conducted within a single unitary corporate structure shall be apportioned by combining gross receipts or gross revenues of each business activity in the business activity ratio. Where necessary, formulas authorized by the department's rules or statute shall be used to ascertain the gross receipts from such business activities.

EXAMPLE: The taxpayer is engaged in the business of both manufacture of tangible personal property and trucking. During the tax year, the taxpayer received \$1,000,000 in gross receipts, \$400,000 of which was from its manufacturing operations and \$600,000 of which was from its trucking operations. In its trucking operations, the taxpayer traveled 100,000 miles in Iowa and 400,000 everywhere, and in its manufacturing operations, \$300,000 of sales were attributable to this state. The numerator of the business activity ratio would be \$450,000, which includes \$300,000 from manufacturing operations and \$150,000 ($100,000/400,000 \times 600,000 = 150,000$) from trucking operations. See subrule 54.7(2). The denominator of the business activity ratio would be \$1,000,000.

This rule is intended to implement Iowa Code section 422.33.

701—54.9(422) Allocation and apportionment of income in special cases. If a taxpayer feels that the allocation and apportionment method as prescribed by Iowa Code subsection 422.33(2), or 701—Chapter 54, in the taxpayer's case results in an injustice, the taxpayer may petition the department for permission to determine the taxable net income, both allocable and apportionable, to the state on some other basis.

The taxpayer must first file the return as prescribed by Iowa Code subsection 422.33(2), and pay the tax shown due thereon. If a change to some other method is desired, a statement of objections and schedules detailing such alternative method shall be submitted to the department. The department shall require detail and proof within such time as the department may reasonably prescribe. In addition, the alternative method of allocation and apportionment will not be allowed where the taxpayer fails to produce, upon request of the department, any information the department deems necessary to analyze the request for an alternative method of allocation and apportionment. Such petition must be in writing and shall set forth in detail the facts upon which the petition is based. The burden of proof will be on the taxpayer as to the validity of the method and its results. The mere fact that an alternative method of apportionment or allocation produces a lesser amount of income attributable to Iowa is, per se, insufficient proof that the statutory method of allocation and apportionment is invalid. *Moorman Manufacturing Company v. Bair*, 437 U.S. 267, 57 L.Ed.2d 197(1978). In essence, a comparison of the statutory method of apportionment with another formulary apportionment method is insufficient to prove that the taxpayer would be entitled to the alternative formulary apportionment method. *Moorman Manufacturing Company v. Bair*, supra.

One of the possible alternative methods of allocation and apportionment is separate accounting provided the taxpayer's activities in Iowa are not unitary with the taxpayer's activities outside Iowa. Any corporation deriving income from business operations partly within and partly without Iowa must determine that net business income attributable to this state by the prescribed formula for apportioning net income, unless the taxpayer proved by clear and cogent evidence that the statutory formula apportions income to Iowa out of all reasonable proportion to the business transacted within Iowa. *Moorman Manufacturing Company v. Bair*, supra.

The burden of proof that the statutory method of apportionment attributes to Iowa income out of all reasonable proportion to the business transacted within Iowa is on the taxpayer. In order to utilize separate accounting, the taxpayer's books and records must be kept in a manner that accurately depicts the exact geographical source of profits. In any petition to utilize separate accounting, the taxpayer must submit schedules which accurately depict net income by division or product line and the amount of income earned within Iowa.

Separate accounting is not allowable for a unitary business where the separate accounting method fails to consider factors of profitability resulting from functional integration, centralization of management, and economics of scale. *Shell Oil Company v. Iowa Department of Revenue*, 414 N.W.2d 113 (Iowa 1987).

There are alternative methods of separate accounting utilizing different accounting principles. A mere showing that one separate accounting method produces a result substantially different than the statutory method of apportionment is not sufficient to justify the granting of the separate accounting method shown. The taxpayer must not only show that the separate accounting method advocated by the taxpayer in comparison with the statutory method of apportionment produces a result which, if the statutory method of apportionment were used, would be out of all reasonable proportion to the business transacted within Iowa. The taxpayer must also show that all other conceivable reasonable separate accounting methods would show, when compared with the statutory method of apportionment, that the statutory method of apportionment substantially produces a distorted result.

As used in this rule “statutory method of apportionment” means the Iowa single sales factor formula set forth in Iowa Code section 422.33, subsection 2, paragraph “b,” and the apportionment methods set forth in 701—Chapter 54.

All requests to use an alternative method of allocation and apportionment submitted to the department will be considered by the compliance division if the request is the result of an audit or by the taxpayer services and policy division if the request is received prior to audit. If the department concludes that the statutory method of allocation and apportionment is, in fact, both inapplicable and inequitable, the department shall prescribe a special method. The special method of allocation and apportionment prescribed by the department may be that requested by the taxpayer or some other method of allocation and apportionment which the department deems to equitably attribute income to business activities carried on within Iowa.

If the taxpayer disagrees with the determination of the department, the taxpayer may file a protest within 60 days of the date of the letter setting forth the department’s determination and the reasons therefor in accordance with rule 701—7.8(17A). The department’s determination letter shall set forth the taxpayer’s rights to protest the department’s determination.

If no protest is filed within the 60-day period, then no hearing will be granted on the department’s determination under this rule. However, this does not preclude the taxpayer from subsequently raising this question in the event that the taxpayer protests an assessment or denial of a timely refund claim, but this issue will only be dealt with for the years involved in the assessment or timely refund claim.

The use of an alternative method of allocation and apportionment would only be applicable to the years under consideration at the time the special method of allocation and apportionment is prescribed. The taxpayer’s continued use of a prescribed method of allocation and apportionment will be subject to review and change within the statutory or legally extended period(s).

If there is a material change in the business operations or accounting procedures from those in existence at the time the taxpayer was permitted to determine the net income earned within Iowa by an alternative method of allocation and apportionment, the taxpayer shall apprise the department of such changes prior to filing its return for the current year. After reviewing the information submitted, along with any other information the department deems necessary, the department will notify the taxpayer if the alternative method of allocation and apportionment is deemed applicable.

This rule is intended to implement Iowa Code section 422.33.

CHAPTER 55
ASSESSMENTS, REFUNDS, APPEALS
[Prior to 12/17/86, Revenue Department[730]]

701—55.1(422) Notice of discrepancies.

55.1(1) *Notice of adjustment.* An employee of the department, designated by the director to examine returns and make audits, who discovers discrepancies in returns or learns that the income of the taxpayer may not have been listed, in whole or in part, or that no return was filed when one was due, is authorized to notify the taxpayer of the discovery by ordinary mail. The notice shall not be termed an assessment, and it may inform the taxpayer of the amount due if the information discovered is correct.

55.1(2) *Right of taxpayer upon receipt of notice of adjustment.* A taxpayer who has received notice of an adjustment in connection with a return may pay the additional amount stated to be due. If payment is made, and the taxpayer wishes to contest the matter, the taxpayer should then file claim for refund. However, payment will not be required until assessment has been made (although interest will continue to accrue if payment is not made). If no payment is made, the taxpayer may discuss with the employee who notified the taxpayer of the discrepancy, either in person or through correspondence, all matters of fact and law which the taxpayer considers relevant to the situation. Documents and records supporting the taxpayer's position may be required.

This rule is intended to implement Iowa Code section 422.25.

701—55.2(422) Notice of assessment. If after following the procedure outlined in 55.1(2) no agreement is reached, and the taxpayer does not pay the amount determined to be correct, a notice of assessment shall be sent to the taxpayer by mail. If the period in which the correct amount of tax can be determined is nearly at an end, either a notice of assessment, without compliance with 55.1(1) and 55.1(2), or a jeopardy assessment may be issued. All notices of assessment shall contain the signature of the director.

This rule is intended to implement Iowa Code sections 422.25 and 422.28.

701—55.3(422) Refund of overpaid tax. The following are provisions for refunding or crediting to the taxpayer deposits or payments for tax in excess of amounts legally due.

55.3(1) A claim for refund of corporation income tax may be made on a form obtainable from the department. Claims for refund should not be mailed in the same envelope or attached to the return. In the case of a claim filed by an agent of the taxpayer, a power of attorney must accompany the claim.

55.3(2) A corporate taxpayer shall not offset a refund or overpayment of tax for one year as a prior payment of tax of a subsequent year on the return of a subsequent year without authorization in writing by the department. The department may, however, apply an overpayment, or a refund otherwise due the taxpayer, to any tax due or to become due from the taxpayer.

55.3(3) When an overpayment of estimated tax is indicated on the face of the return, the overpayment will ordinarily be refunded to the taxpayer by the department without the filing of a formal claim for refund. If a refund of the indicated overpayment is not received within a reasonable period of time, a claim for refund may be filed by the taxpayer on an official form obtainable from the Taxpayer Services Section, Iowa Department of Revenue, P.O. Box 10457, Des Moines, Iowa 50306.

If an overpayment of income tax is claimed as a credit against estimated tax for the succeeding taxable year, such amount shall be considered as a payment of the income tax for the succeeding taxable year and no claim for credit or refund shall be allowed.

When a taxpayer elects to have an overpayment credited to estimated tax for the succeeding year, interest may be properly assessed on a deficiency of income tax for the year in which the overpayment arose. If a taxpayer elects to have all or part of an overpayment shown on the return applied to the estimated income tax for the succeeding taxable year or refunded, the election is binding to the taxpayer.

An overpayment of tax may be used to offset any outstanding tax liability owed by the taxpayer, but once an elected amount is credited as a payment of estimated tax for the succeeding year, it loses its character as an overpayment for the year in which it arose and thereafter cannot offset any subsequently determined tax liability.

55.3(4) Rescinded IAB 11/24/04, effective 12/29/04.

55.3(5) Refunds—statute of limitations for tax years ending after January 1, 1979. The statute of limitations with respect to which refunds or credits may be claimed are:

a. The later of

- (1) Three years after the due date of payment upon which refund or credit is claimed; or
- (2) One year after which such payment was actually made.

b. Six months from the date of final disposition of any federal income tax matter with respect to the particular tax year. The taxpayer, however, must have notified the department of the matter within six months after the specified three-year period. The term “matter” includes, but is not limited to the execution of waivers and commencement of audits. The refund is limited to those matters between the taxpayer and the Internal Revenue Service which affect Iowa taxable income. *Kelly-Springfield Tire Co. v. Iowa State Board of Tax Review*, 414 N.W.2d 113 (Iowa 1987).

c. For federal audits finalized on or after July 1, 1991, the taxpayer must claim a refund or credit within six months of final disposition of any federal income tax matter with respect to the particular tax year regardless when the tax year ended. It is not necessary for the taxpayer to have previously notified the department within the period of limitations specified in 55.3(5) “a”(1) of a matter between the taxpayer and the Internal Revenue Service in order to receive a refund or credit. The term “matter” includes, but is not limited to, the execution of waivers and commencement of audits. The refund or credit is limited to those matters between the taxpayer and the Internal Revenue Service which affect Iowa taxable income. *Kelly-Springfield Tire Co. v. Iowa State Board of Tax Review*, 414 N.W.2d 113 (Iowa 1987).

d. Three years after the due date of the return for the year in which a net operating loss or capital loss occurs, which if carried back results in a reduction of tax in a prior period and an overpayment results.

55.3(6) Rescinded IAB 9/19/12, effective 10/24/12.

55.3(7) Refunds—statute of limitations for taxpayers who paid 90 percent of the tax by the due date and filed the original return in the six-month extended period. If a taxpayer has paid 90 percent of the income tax required to be shown due by the original due date of the return and has filed the original income tax return sometime in the six-month extended period after the original due date, the taxpayer may file an amended return within three years of the extended due date of the return and shall be within the statute of limitations for refund. This position is supported by the Iowa Supreme Court in *Conoco, Inc. v. Iowa Department of Revenue and Finance*, 477 N.W.2d 377 (Iowa 1991). See also 701—subrule 39.2(4) which pertains to the extended period for filing the Iowa income tax return when 90 percent of the tax is paid by the original due date of the Iowa income tax return.

EXAMPLE 1. Corporation A had paid at least 90 percent of the tax shown due on its Iowa corporation income tax return for the year ending December 31, 1999, by the April 30 original due date and filed its original 1999 Iowa return on May 15, 2000. Corporation A determined that it was entitled to claim additional deductions on the original 1999 Iowa return, so Corporation A filed an amended 1999 return on October 31, 2003. The amended return was filed within the three-year statute of limitations for refund since it was filed within three years of the extended due date of the return, October 31, 2000. The six-month extended due date applied in this case because the original return was filed within the six-month extended period.

EXAMPLE 2. Corporation B paid 90 percent of the tax shown due on its return for the period ending June 30, 2000, by the October 31 original due date and filed the original return on or before the October 31, 2000, original due date for this return. Corporation B determined that when it filed the original Iowa return for the period ending June 30, 2000, Corporation B failed to claim an Iowa credit for increasing research activities. Corporation B filed an amended Iowa return on November 15, 2003, to claim the Iowa credit for increasing research activities. This amended return was rejected by the department because it was not filed within three years of the due date of the return. Although Corporation B had paid 90

percent of the tax by the due date, the due date was not extended because the original return had been filed by the due date of October 31, 2000.

This rule is intended to implement Iowa Code section 422.73 as amended by 2012 Iowa Acts, Senate File 2328.

[ARC 0337C, IAB 9/19/12, effective 10/24/12]

701—55.4(421) Abatement of tax. For notices of assessment issued on or after January 1, 1995, if the statutory period for appeal has expired, the director may abate any portion of unpaid tax, penalties or interest which the director determines to be erroneous, illegal, or excessive. See rule 701—7.31(421) for procedures on requesting abatement of tax.

This rule is intended to implement Iowa Code section 421.60.

701—55.5(422) Protests. A taxpayer may appeal to the director at any time within 60 days from the date of the notice of the assessment of tax, additional tax, interest or penalties. For assessments issued on or after January 1, 1995, if a taxpayer failed to timely appeal a notice of assessment, the taxpayer may pay the entire assessment and file a refund claim within the period provided by law for filing such claims. In addition, a taxpayer may appeal to the director at any time within 60 days from the date of notice from the department denying changes in filing methods, denying refund claims, or denying portions of refund claims.

This rule is intended to implement Iowa Code sections 421.10, 421.60 and 422.28.

CHAPTER 56
ESTIMATED TAX FOR CORPORATIONS
[Prior to 12/17/86, Revenue Department[730]]

701—56.1(422) Who must pay estimated tax.

56.1(1) General rule. Every corporate taxpayer, including both domiciliary and nondomiciliary corporations, shall pay estimated tax if the amount of tax payable, less credits, can reasonably be expected to be more than \$1,000 for the calendar or fiscal year. The amount of estimated tax paid shall be used as a credit on the Iowa corporate income tax return.

56.1(2) Definition. For purposes of this division, “estimated tax” means the amount which the taxpayer estimates to be the tax due and payable under division III of Iowa Code chapter 422.

This rule is intended to implement Iowa Code section 422.85.

701—56.2(422) Time for filing and payment of tax.**56.2(1) Time for filing.**

a. General rule. The date for filing the first estimated tax payment is on or before the last day of the fourth month of the tax year. The estimated tax form is to be filed with Corporate Estimate Processing, P.O. Box 10466, Des Moines, Iowa 50306.

b. Amended estimates. Generally, whenever a taxpayer who is required to make estimated tax payments has reason to believe that the taxpayer’s Iowa income tax may increase or decrease, an amended estimate shall be filed at such time to reflect the increase or decrease in estimated Iowa income tax. The amended estimate shall be made on or before the next installment date. The unpaid balance after amending the estimate should be paid in equal installments on the remaining payment dates.

56.2(2) Payment of estimated tax.

a. General rule. Estimates may be paid in full at the time of the first filing or in four equal installments. The taxpayer may also elect to pay any installment prior to the date prescribed.

b. Calendar year. The first installment for a corporation filing on a calendar-year basis is due by April 30. The other installments, if applicable, shall be paid on or before June 30, September 30, and December 31, of the current year.

c. Fiscal year. The installment dates for a corporation filing on a fiscal-year basis are:

Installment No. 1. The last day of the fourth month of the fiscal year.

Installment No. 2. The last day of the sixth month of the fiscal year.

Installment No. 3. The last day of the ninth month of the fiscal year.

Installment No. 4. The last day of the twelfth month of the fiscal year.

d. Electronic transfer payments. For installments due on or after April 1, 1990, for tax years beginning on or after January 1, 1990, installments shall be made electronically in a format and by means specified by the department of revenue when total corporate tax liability for the tax year prior to the tax year just completed exceeds \$80,000. Estimated tax declaration forms are not required to be filed when electronic transmission of installments is done in the prescribed format by specified means. Installments transmitted electronically are considered to have been made on the date that the deposit or remittance is added to the bank account designated by the treasurer of the state of Iowa.

This rule is intended to implement Iowa Code section 422.85.

701—56.3(422) Special estimate periods.

56.3(1) Short taxable year. A corporation having a taxable year of less than 12 months shall pay estimated tax if anticipating an Iowa tax liability of more than \$1,000 for that short taxable year.

a. Short taxable year where a new corporation first commences doing business. In filing the first estimated tax payment, the taxpayer shall state the tax period that the estimated tax payment covers.

(1) If the tax year is three months or less, no estimated tax payment need be made.

(2) If the tax year is greater than three months but not more than four months and the estimated tax payment is required to be made on the last day of the fourth month, the estimated tax shall be paid based upon the taxable income for the first three months.

(3) If the tax year is greater than four months but not more than six months and the first estimated tax payment is required to be made on the last day of the fourth month, the estimated tax shall be paid in two equal installments. The first installment shall be due the last day of the fourth month based on the first three months' taxable income annualized by multiplying the taxable income by the number of months in the tax year and dividing by three. The second installment shall be due the last day of the tax year.

If the first estimated tax payment is required to be made after the fourth month, the estimated tax payment shall be made on the last day of the tax year and the estimated tax shall be paid in one installment based upon the taxable income for the first four months if the tax year ends during the fifth month, or for the first five months if the tax year ends during the sixth month.

(4) If the tax year is greater than four months, but not more than nine months, and the first estimated tax payment is required to be made on the last day of the fourth month, the estimated tax shall be paid in three equal installments. The first installment shall be due the last day of the fourth month based on the first three months' taxable income annualized by multiplying the taxable income by the number of months in the tax year and dividing by three. The second installment shall be due the last day of the sixth month of the tax year. The third installment shall be due the last day of the tax year.

If the first estimated tax payment is required to be made on the last day of the sixth month of the tax year, the estimated tax shall be paid in two equal installments. The first installment shall be due on the last day of the sixth month based upon the first five months' taxable income annualized by multiplying the taxable income by the number of months in the tax year and dividing by five. The second installment shall be due on the last day of the tax year.

If the first estimated tax payment is required to be made after the last day of the sixth month of the tax year, the estimated tax payment shall be made on the last day of the tax year and the estimated tax shall be paid in one installment based on the taxable income for the first seven months if the tax year ends during the eighth month, or for the first eight months if the tax year ends during the ninth month.

(5) If the tax year is greater than four months, but not more than eleven months, and the first estimated tax payment is required to be made on the last day of the fourth month, the estimated tax shall be paid in four equal installments. The first installment shall be due the last day of the fourth month based upon the first three months' income annualized by multiplying the taxable income by the number of months in the tax year and dividing by three. The second installment shall be due on the last day of the sixth month of the tax year. The third installment shall be due on the last day of the ninth month of the tax year. The fourth installment shall be due the last day of the tax year.

If the first estimated tax payment is required to be made on the last day of the sixth month of the tax year, the estimated tax shall be paid in three equal installments. The first installment shall be due on the last day of the sixth month based upon the first five months' taxable income annualized by multiplying the taxable income by the number of months in the tax year and dividing by five. The second installment shall be due the last day of the ninth month of the tax year. The third installment shall be due on the last day of the tax year.

If the first estimated tax payment is required to be made on the last day of the ninth month of the tax year, the estimated tax shall be paid in two equal installments. The first installment shall be due on the last day of the ninth month, based upon the first eight months' taxable income annualized by multiplying the taxable income by the number of months in the tax year and dividing by eight. The second installment shall be due the last day of the tax year.

If the first estimated tax payment is required to be made after the last day of the ninth month of the tax year, the estimated tax payment shall be made on the last day of the tax year and the estimated tax shall be paid in one installment based upon the taxable income for the first nine months if the tax year ends during the tenth month or for the first ten months if the tax year ends during the eleventh month.

(6) If during the tax year, the taxpayer determines that its tax year will be different than the tax year specified in its original payment of estimated tax, the remaining estimated tax payments, if any, shall be based upon the above schedule.

b. Short taxable year where the taxpayer is liquidated during the tax year or where under any provision of the Internal Revenue Code the taxpayer is required to file a return for a period of less than 12 months.

(1) If the tax year is 3 months or less, no estimated tax payment need be made.

(2) If the tax year is greater than 3 months, an estimated tax payment shall be made the same as if the taxpayer's tax year is a full 12 months except that the final installment shall be due the last day of the tax year.

(3) Special exception to penalty. If the taxpayer uses the exception under Iowa Code subsection 422.89(1) to avoid the penalty for underpayment of estimated tax, no penalty will accrue if the following conditions are met: (a) The total amount of all payments of estimated tax made on or before the last date prescribed for the payment of estimated tax equals the prior year's tax multiplied by the number of months in the short tax year and divided by 12, and (b) a return for the preceding tax year of a full 12 months showing a tax liability was filed by the taxpayer.

56.3(2) *Doing business in Iowa less than a full year.*

a. *General rule.* A corporation which commences or ceases to do business in this state during any part of the year shall determine its Iowa estimated tax on that portion of income earned while doing business in this state.

b. *Example.* A corporation which first begins doing business in this state on April 15, under the provisions of Iowa Code section 422.33, and which expects a tax liability of \$1500, must make its first payment of estimated tax of \$500 by June 30, and pay the remaining balance of \$1000 in two equal installments of \$500 each by September 30 and December 31 of the tax year.

This rule is intended to implement Iowa Code section 422.92.

701—56.4(422) Reporting forms. Corporations which have paid estimated tax in the prior year will receive by mail a preaddressed reporting form unless requirements for electronic transmission of installments are met. Blank reporting forms are available from the department for those making an estimate for the first time, or when the preaddressed form is misplaced or lost.

This rule is intended to implement Iowa Code section 422.21.

701—56.5(422) Penalties. Failure to file and underpayment of estimated tax.

56.5(1) *Underpayment penalty.*

a. A penalty is imposed for underpayment of the estimated tax by the taxpayer. This underpayment penalty is imposed whether or not there was reasonable cause for the underpayment. The Iowa penalty for underpayment of estimated tax is computed on Form IA 2220.

b. The amount of the underpayment penalty is determined at the statutory rate upon the amount of underpayment of the estimated tax for the period from the date the amount is required to be paid until the last day of the fourth month following the close of the income year, or the date the underpayment is paid, whichever is earlier.

EXAMPLE. A calendar year corporation is required to make four equal estimated payments of \$2,500 in the current year to meet the exception to the underpayment of estimated tax penalty. The corporation does not make a first quarter estimated payment which was due on April 30, but makes an estimated payment of \$5,000 for the second quarter on June 30. The corporation is subject to the underpayment of estimated tax penalty for the period from April 30 to June 30, when the underpayment was paid.

56.5(2) *Exception to imposition of the underpayment penalty.*

a. *In general.* The underpayment penalty will not be imposed for any underpayment if, on or before the date prescribed for payment, the total amount of all payments made of the estimated tax equals or exceeds the amount which would have been required to be paid on or before such date if the estimated tax were the least of the following amounts:

(1) The tax shown on the return for the preceding taxable year, provided that the preceding taxable year was a taxable year of 12 months and a return showing a tax liability was filed for such year;

(2) An amount equal to a tax determined on the basis of the tax rates for the taxable year but otherwise on the basis of the facts shown on the return for the preceding taxable year if the taxable year

was a taxable year of 12 months or, if the preceding taxable year was a taxable year of less than 12 months, then by placing the income on an annual basis and the law applicable to the preceding year, in the case of a taxpayer required to file a return for the preceding taxable year; or

(3) For tax years beginning prior to January 1, 2012, an amount equal to 90 percent of the tax determined by placing on an annual basis the net income for the first 3, 5, 6, 8, 9, or 11 months of the taxable year, whichever is applicable. For tax years beginning on or after January 1, 2012, an amount equal to 100 percent of the tax determined by placing on an annual basis the net income for the first 3, 5, 6, 8, 9, or 11 months of the taxable year, whichever is applicable. The net income so determined shall be placed on an annual basis by multiplying it by 12, and dividing the resulting amount by the number of months in the taxable year for which the net income was so determined.

b. Statement of exception. If there has been an underpayment of the amount of the estimated tax, and the taxpayer believes that one or more of the exceptions to the penalty precludes the assertion of the underpayment penalty, the taxpayer should attach a statement showing the applicability of any exception upon which the taxpayer relies.

56.5(3) *Exception to imposition of the underpayment penalty for taxable years beginning on or after July 1, 1978, and on or before June 30, 1979.* Rescinded IAB 12/20/95, effective 1/24/96.

56.5(4) *Exception to imposition of the underpayment penalty for taxable years beginning on or after July 1, 1977, and on or before June 30, 1978.* Rescinded IAB 12/20/95, effective 1/24/96.

This rule is intended to implement Iowa Code section 422.88 and 2011 Iowa Code Supplement section 422.89 as amended by 2012 Iowa Acts, Senate File 2328.
[ARC 0337C, IAB 9/19/12, effective 10/24/12]

701—56.6(422) Overpayment of estimated tax.

56.6(1) *Refund of overpayment of estimated tax.* Any overpayment of estimated tax, at the taxpayer's election, of \$5 or more will be refunded with interest without a claim for refund being filed. If the overpayment is less than \$5, it will be refunded only if the taxpayer files a claim for refund within 12 months after the due date of the return.

56.6(2) *Interest on refunds of overpayments of estimated tax.* Interest begins to accrue on the first day of the second calendar month following the date of payment or the date the return was due to be filed, or was filed, whichever is the latest. The rate of interest shall be that set forth in rule 701—10.2(421).

56.6(3) *Credit to next year's tax.* In lieu of claiming a refund, the taxpayer may elect to have the overpayment credited to the next year's tax liability. The election may not be changed after the due date for filing the return considering any extension of time to file. If the taxpayer elects to have the overpayment credited to the next year's tax liability, the overpayment will be credited to the first installment if the overpayment arose on or before the due date of the return. If the overpayment arises after the due date of the return, the overpayment will be credited to the first installment due after the date of payment. The taxpayer may, by a written election included with the filing of the return, elect to have the overpayment credited to a different installment. Revenue Ruling 84-58.

This subrule is effective for tax years beginning on or after January 1, 1984.

56.6(4) *Estimated tax carryforwards and how the carryforward amounts are affected under different circumstances.*

a. Estimated tax carryforward and how the amount of carryover credit is affected by error on return. If a state return is timely filed with an overpayment shown on the return and the overpayment is to be credited to the taxpayer's estimated payments for the following year, the amount credited to estimated payments will be affected by an error on the return. Thus, if the error on the return is corrected and results in a smaller overpayment than was shown when the return was filed, the credit to estimated tax from the return will be reduced accordingly.

EXAMPLE: Corporation X filed its 1994 return on April 20, 1995, showing an overpayment of \$400 and a credit to 1995 estimated tax of \$400. During processing of the return, it was determined that 50 percent of the federal income tax refund received was subtracted from net income instead of being added to net income. Correction of this error resulted in an overpayment of \$200 instead of \$400. Thus, the amount credited to the taxpayer's estimated payments for 1995 was \$200 instead of the \$400 shown on

the return form. The department notified Corporation X of the error and advised that only \$200 was being credited to the taxpayer's estimated tax for 1995 instead of the \$400 shown on the return.

b. Estimated tax credit carryover, the carryforward amount affected by amended return. A taxpayer timely files an original return with an overpayment and with the overpayment credited to the following year's estimated tax payments. If the taxpayer files an amended return correcting an error on the original return and with a different amount credited to estimated tax than on the original return, the credit amount from the amended return will be credited to estimated tax, if the amended return is filed before the last day of the following tax year. Thus, if an amended return for tax year ending September 30, 1995, is filed by September 30, 1996, the amount shown as a credit to estimated tax from that amended return will be the amount credited to the taxpayer's September 30, 1996, estimated tax instead of the amount credited from the original September 30, 1995, return.

EXAMPLE: Corporation X filed its original September 30, 1995, return on January 15, 1996, with an overpayment of \$500 and all of the overpayment credited to its estimated tax for the tax year ending September 30, 1996. Later, in 1996, X determined that it had failed to claim a deduction on the return for depreciation on some business equipment it acquired in tax year ended September 30, 1995. Therefore, X filed an amended Iowa return for tax year ending September 30, 1995, on July 15, 1996, showing an overpayment of \$700 and a credit to estimated tax of the same amount. X's amended return was filed on or before September 30, 1996, so the \$700 credit to X's estimated tax for tax year ending September 30, 1996, from the amended return was allowed.

Note that if the amended return had not been filed until sometime in October 1996, the credit from X's original return would have been applied to X's estimated payments for tax year ending September 30, 1996. Since the amended return would have been filed too late for purposes of crediting the overpayment to the taxpayer's estimated tax for the next year, the department would issue X a refund of \$200 which is the portion of the overpayment from the amended return that had not been credited to estimated tax from the original return for tax year ending September 30, 1995.

c. Estimated tax carryforward and how the amount of carryover credit is affected by state tax liability or other state liability of the taxpayer. A taxpayer who files an Iowa return with an overpayment shown on the return and elects to have the overpayment credited to the taxpayer's estimated tax for the next tax year will not have the overpayment credited to estimated tax, if the taxpayer has tax liabilities or other liabilities with the state that are subject to setoff. Other liabilities with the state that are subject to setoff are those liabilities described in Iowa Code section 8A.504. These liabilities are for district court debts, and any other debts of the taxpayer with a board, commission, department, or other administrative office or unit of the state of Iowa.

EXAMPLE: Corporation Z filed its 1994 Iowa return in April 1995 showing an overpayment of \$400 and a credit to 1995 estimated tax of \$400. During processing of Corporation Z's 1994 return it was determined that Corporation Z had a liability of \$150 from its 1993 Iowa return. Thus, \$150 of the 1994 overpayment was offset against the tax liability from the 1993 return. The remaining portion of the 1994 overpayment of \$250 was credited to Corporation Z's estimated tax for 1995.

56.6(5) *Accrual of interest on an assessment of additional tax.* If the taxpayer has not elected to have an overpayment credited to an installment other than the first installment, interest shall accrue on an assessment of additional tax as follows. If the overpayment was credited to the first installment, interest on an assessment of additional tax shall accrue from the due date of the return. If the overpayment was credited to an installment due after the overpayment arose, interest shall accrue from the date the return was filed. Interest on that portion of an assessment greater than the overpayment shall accrue from the due date of the return.

If the taxpayer has elected to have an overpayment of estimated tax credited to an installment other than the first, interest shall accrue on any assessment of additional tax up to the amount of the overpayment from the date the return was filed with the department. Interest on any assessment of additional tax greater than the amount of the overpayment shall accrue from the due date of the return, *Avon Products, Inc. v. United States*, 588 F.2d 342 (2nd Cir. 1978), Revenue Ruling 84-58.

This subrule is effective for tax years beginning on or after January 1, 1984.

This rule is intended to implement Iowa Code section 422.91.

TITLE VII
FRANCHISECHAPTER 57
ADMINISTRATION

[Prior to 12/17/86, Revenue Department[730]]

701—57.1(422) Definitions.

57.1(1) When the word “*department*” appears herein, it refers to and is synonymous with the “Iowa Department of Revenue”; the word “*director*” is the “Director of Revenue” or the director’s authorized assistants and employees; the word “*tax*” is the “franchise tax on financial institutions”; and the word “*return*” is the “franchise tax return.”

The administration of the franchise tax is a responsibility of the department. The department is charged with the administration of the franchise tax, subject always to the rules, regulations and direction of the director.

57.1(2) Effective June 1, 1989, the term “financial institution” as used in division V of Iowa Code chapter 422 and in 701—Chapters 57 to 61 includes an Iowa chartered bank, a state bank chartered under the laws of any other state, a nationally chartered bank, a trust company, a federally chartered savings and loan association, a non-Iowa chartered savings bank, a financial institution chartered by the Federal Home Loan Bank Board, a non-Iowa chartered savings and loan association, an association incorporated or authorized to do business under Iowa Code chapter 534 or a production credit association.

Effective July 1, 2012, the term “financial institution” as used in division V of Iowa Code chapter 422 and in 701—Chapters 57 to 61 includes an Iowa chartered bank, a state bank chartered under the laws of any other state, a nationally chartered bank, a trust company, a federally chartered savings and loan association, a non-Iowa chartered savings bank, a financial institution chartered by the Federal Home Loan Bank Board, a non-Iowa chartered savings and loan association or a production credit association.

Unincorporated privately held financial institutions are exempt from the franchise tax filing requirements.

57.1(3) The term “*Internal Revenue Code*” means the Internal Revenue Code of 1954 prior to the date of its redesignation as the Internal Revenue Code of 1986 or the Internal Revenue Code of 1986, whichever is applicable.

This rule is intended to implement Iowa Code section 422.61 as amended by 2012 Iowa Acts, Senate File 2202.

[ARC 0337C, IAB 9/19/12, effective 10/24/12]

701—57.2(422) Statutes of limitation.**57.2(1) Periods of audit.**

a. The department has three years after a return has been filed or three years after the return became due, including any extensions of time for filing, whichever time is the later, to determine whether any additional tax other than that shown on the return is due and owing. This three-year statute of limitation does not apply in the instances specified below in paragraphs “*b*,” “*c*,” “*d*,” “*e*,” “*f*,” and “*g*.”

b. If a taxpayer fails to include in the taxpayer’s return such items of gross income as defined in the Internal Revenue Code, as amended, as will under that Code extend the statute of limitations for federal tax purposes to six years, the correct amount of tax due may be determined by the department within six years from the time the return is filed, or within six years after the return became due, including any extension of time for filing, whichever time is the later.

c. If the taxpayer files a false or fraudulent return with intent to evade tax, the correct amount of tax due may be determined by the department at any time after the return has been filed.

d. If a taxpayer fails to file a return, the statutes of limitation so specified in Iowa Code section 422.25 do not begin to run until the return is filed with the department.

e. While the burden of proof of additional tax owing under the six-year period or the unlimited period is upon the department, a prima facie case of omission of income, or of making a false or fraudulent return, shall be made upon a showing of a federal audit of the same income, a determination by federal authorities that the taxpayer omitted items of gross income or made a false or fraudulent return, and the

payment by the taxpayer of the amount claimed by the federal government to be the correct tax or the admission by the taxpayer to the federal government of liability for that amount.

f. In addition to the periods of limitation set forth in paragraph “a,” “b,” “c,” “d,” or “e,” the department has six months after notification by the taxpayer of the final disposition of any matter between the taxpayer and the Internal Revenue Service with respect to any particular tax year to make an examination and determination. Final disposition of any matter between the taxpayer and the Internal Revenue Service triggers the extension of the statute of limitations for the department to make an examination and determination and the extension runs until six months after the department receives notification and a copy of the federal document showing the final disposition or final federal adjustments from the taxpayer, *Van Dyke v. Iowa Department of Revenue and Finance*, 547 N.W.2d 1. This examination and determination is limited to those matters between the taxpayer and the Internal Revenue Service which affect Iowa taxable income. *Kelly-Springfield Tire Co. v. Iowa State Board of Tax Review*, 414 N.W.2d 113 (Iowa 1987). The notification shall be in writing in any form sufficient to inform the department of final disposition, and attached thereto shall be a photo reproduction or carbon copy of the federal document which shows the final disposition and any schedules necessary to explain the federal adjustments. The notification and copy of the federal document shall be mailed, under separate cover, to the Examination Section, Compliance Division, Iowa Department of Revenue, P.O. Box 10456, Des Moines, Iowa 50306. Any notification and copy of the federal document which is included in, made a part of, or mailed with a current year Iowa franchise tax return will not be considered as proper notification for the purposes of beginning the running of the six-month period.

When a taxpayer’s income or loss is included in a consolidated federal corporation income tax return, notification shall include a schedule of adjustments to the taxpayer’s income, a copy of the revenue agent’s tax computation, a schedule of revised foreign tax credit on a separate company basis if applicable, and a schedule of consolidating income statements after federal adjustments.

g. In lieu of the above periods of limitation for any prior year for which an overpayment of tax or an elimination or reduction of any underpayment of tax due for that prior year results from the carryback to such prior year of a net operating loss or net capital loss, the period shall be the period of limitations for the taxable year of the net operating loss or net capital loss which results in such carryback.

h. The department may, at any time within the period prescribed for assessment or refund adjustment, make a supplemental assessment or refund adjustment whenever it is ascertained that any assessment or refund adjustment is imperfect or incomplete in any respect.

If an assessment or refund adjustment is appealed (protested under rule 701—7.8(17A)) and is resolved whether by informal proceedings or by adjudication, the department and the taxpayer are precluded from making a supplemental assessment or refund adjustment concerning the same issue involved in such appeal for the same tax period unless there is a showing of mathematical or clerical error or a showing of fraud or misrepresentation. Nothing in this rule shall prevent the making of an assessment or refund adjustment for the purpose of taking into account the impact upon Iowa net income of federal audit adjustments.

57.2(2) *Waiver of statute of limitations.* Rescinded IAB 11/24/04, effective 12/29/04.

57.2(3) *Waiver of statute of limitations.* Waivers entered into on or after July 1, 1989. When the department and the taxpayer enter into an agreement to extend the period of limitation, interest continues to accrue on an assessed deficiency or overpayment during the period of the waiver. The taxpayer may claim a refund during the period of the waiver.

57.2(4) *Amended returns filed within 60 days of the expiration of the statute of limitations for assessment.* If a taxpayer files an amended return on or after April 1, 1995, within 60 days prior to the expiration of the statute of limitations for assessment, the department has 60 days from the date the amended return is received to issue an assessment for applicable tax, interest, or penalty.

This rule is intended to implement Iowa Code sections 422.25 and 422.66.

[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—57.3(422) Retention of records.

57.3(1) Every financial institution subject to the tax imposed by Iowa Code section 422.60 (whether or not the financial institution incurs liability for the tax) shall retain its books and records as required by Section 6001 of the Internal Revenue Code and federal income tax regulation 1.6001-1(e) including the federal schedules required by 701—subrule 58.3(2). For taxpayers using an electronic data interchange process or technology also see 701—subrule 11.4(4).

57.3(2) In addition, records relating to computation of the Iowa apportionment factor, allocable income, other deductions or additions to federal taxable income, and Iowa tax credits shall be retained so long as the contents may be material in the administration of the Iowa Code under the statutes of limitation for audit specified in Iowa Code section 422.25.

This rule is intended to implement Iowa Code sections 422.25 and 422.70.
[ARC 9104B, IAB 9/22/10, effective 10/27/10]

701—57.4(422) Authority for deductions. Whether and to what extent deductions shall be allowed depends upon specific legislative Acts, and only where there is a clear provision can any particular deduction be allowed. Therefore, a deduction will be allowed only if the taxpayer can establish the validity and correctness of such a deduction. *71 Am. Jur. 2d State and Local Taxation, subsection 518 (1973).*

This rule is intended to implement Iowa Code sections 422.35 and 422.61.

701—57.5(422) Jeopardy assessments.

57.5(1) A jeopardy assessment may be made where a return has been filed and the director believes for any reason that collection of the tax will be jeopardized by delay, or where a taxpayer fails to file a return, whether or not formally called upon to file a return. The department is authorized to estimate the income of the taxpayer upon the basis of available information, add penalty and interest, and demand immediate payment.

57.5(2) A jeopardy assessment is due and payable when the notice of the assessment is served upon the taxpayer. Proceedings to enforce the payment of the assessment by seizure or sale of any property of the taxpayer may be instituted immediately.

This rule is intended to implement Iowa Code sections 422.30 and 422.66.

701—57.6(422) Information deemed confidential. Iowa Code section 422.72 applies generally to the director, deputies, auditors, examiners, agents, present or former officers and employees of the department. Disclosure of information from a taxpayer's filed return or report or other confidential state information by department of revenue personnel to a third person is prohibited under Iowa Code section 422.72. See rule 701—6.3(17A).

This rule is intended to implement Iowa Code sections 422.66 and 422.72.

701—57.7(422) Power of attorney. For information regarding power of attorney, see rule 701—7.34(421).

701—57.8(422) Delegation to audit and examine. Pursuant to statutory authority the director delegates to the authorized assistants and employees the power to examine returns and make audits, and to determine the correct amount of tax due, subject to review by or appeal to the director.

This rule is intended to implement Iowa Code sections 422.66 and 422.70.

CHAPTER 58
FILING RETURNS, PAYMENT OF TAX, PENALTY AND INTEREST,
AND TAX CREDITS

[Prior to 12/17/86, Revenue Department[730]]

701—58.1(422) Who must file. Every financial institution as defined in 701—subrule 57.1(2), regardless of net income, shall file a true and accurate return of its income or loss for the taxable period. The return shall be signed by the president or other duly authorized officer. If the financial institution was inactive or not doing business within Iowa, although qualified to do so, during the taxable year, the return must contain a statement to that effect.

58.1(1) *Income tax of financial institutions in liquidation.* When a financial institution is in the process of liquidation, or in the hands of a receiver, the franchise tax returns must be made under oath or affirmation of the persons responsible for the conduct of the affairs of such financial institutions, and must be filed at the same time and in the same manner as required of other financial institutions.

58.1(2) *Franchise tax returns for financial institutions dissolved.* Financial institutions which have been dissolved during the income year must file franchise tax returns for the period prior to dissolution which has not already been covered by previous returns. Officers and directors are responsible for the filing of the returns and for the payment of taxes, if any, for the audit period provided by law.

Where a financial institution dissolves and disposes of its assets without making provision for the payment of its accrued Iowa franchise tax, liability for the tax follows the assets so distributed and upon failure to secure the unpaid amount, suit to collect the tax may be instituted against the stockholders and other persons receiving the property, to the extent of the property received, except bona fide purchasers or others as provided by law.

This rule is intended to implement Iowa Code sections 422.60 and 422.61.

701—58.2(422) Time and place for filing return.

58.2(1) *Returns of financial institutions.* A return of income for all financial institutions must be filed on or before the delinquency date. The delinquency date for all financial institutions is the day following the last day of the fourth month following the close of the taxpayer's taxable year, whether the return is made on the basis of the calendar year or the fiscal year; or the day following the last day of the period covered by an extension of time granted by the director. When the last day prior to the delinquency date falls on a Saturday, Sunday or a legal holiday, the return will be timely if it is filed on the first business day following the Saturday, Sunday or legal holiday. If a return is placed in the mails, properly addressed and postage paid in ample time to reach the department on or before the delinquency date for filing, no penalty will attach should the return not be received until after that date. Mailed returns should be addressed to Franchise Tax Processing, P.O. Box 10413, Des Moines, Iowa 50306.

58.2(2) *Short period returns.* Where under a provision of the Internal Revenue Code, a financial institution is required to file a tax return for a period of less than 12 months, a short period Iowa franchise tax return must be filed for the same period. The delinquency date for the short period return is 45 days after the federal due date not considering any federal extension of time to file.

58.2(3) *Extension of time for filing returns for tax years beginning on or after January 1, 1991.* See 701—subrule 39.2(4).

58.2(4) *Extension of time for filing returns for tax years beginning on or after January 1, 1986.* Rescinded IAB 3/15/95, effective 4/19/95.

This rule is intended to implement Iowa Code sections 422.24, 422.62, and 422.66.

701—58.3(422) Form for filing.

58.3(1) *Use and completeness of prescribed forms.* Returns shall be made by financial institutions on forms supplied by the department. Taxpayers not supplied with the proper forms shall make application for same to the department in ample time to have their returns made, verified and filed on or before the delinquency date. Taxpayers shall carefully prepare their returns so as to fully and clearly set forth the data required. For lack of a prescribed form, a statement made by a taxpayer disclosing the taxpayer's

gross income and the deductions therefrom may be accepted as a tentative return, and if verified and filed within the prescribed time, will relieve the taxpayer from liability to penalties, provided that without unnecessary delay such a tentative return is replaced by a return made on the proper form. Each question shall be answered and each direction complied with in the same manner as if the forms and instructions were embodied in these rules.

Failure to receive the proper forms does not relieve the taxpayer from the obligation of making any return required by the statute.

Returns received which are not completed, but merely state “see schedule attached” are not considered to be a properly filed return and may be returned to the taxpayer for proper completion. This may result in the imposition of penalties and interest due to the return being filed after the due date.

58.3(2) Form for filing—financial institutions. Financial institutions as defined by Iowa Code section 422.61(1) shall include a true and accurate copy of their federal corporation income tax return as filed with the Internal Revenue Service with the filing of their Iowa return. At a minimum this return includes the following federal schedules: income statement, balance sheet, reconciliation of income per books with income per return, analysis of unappropriated retained earnings per books, dividend income and special deductions, capital gains, tax computation and tax deposits, work opportunity credit computation, foreign tax credit computation, alternative minimum tax computation, and statements detailing other income and other deductions.

When a financial institution whose income is included in a consolidated federal income tax return files an Iowa return, federal consolidating income statements as properly computed for federal income tax purposes showing the income and expenses of each member of the consolidated group shall be required together with the following additional schedules on a separate basis:

- a. Capital gains.
- b. Dividend income and special deductions.
- c. Work opportunity credit computation.
- d. Foreign tax credit computation.
- e. Holding company tax computation.
- f. Alternative minimum tax computation.
- g. Schedules detailing other income and other deductions.

58.3(3) Amended returns. If it becomes known to the taxpayer that the amount of income reported to be federal net income or Iowa taxable income subject to franchise tax was erroneously stated on the Iowa return, or changed by Internal Revenue Service audit, or otherwise, the taxpayer shall file an amended Iowa return along with supporting schedules, to include the amended federal return and a copy of the federal revenue agent’s report if applicable. A copy of the federal revenue agent’s report and notification of final federal adjustments provided by the taxpayer will be acceptable in lieu of an amended return. The assessment or refund of tax shall be dependent on the statute of limitations as set forth in 701—subrule 57.2(1) and rule 701—60.3(422).

This rule is intended to implement Iowa Code sections 422.62, 422.66 and 422.73.

701—58.4(422) Payment of tax.

58.4(1) Quarterly estimated payments. Effective for taxable years beginning on or after July 1, 1977, financial institutions are required to make quarterly payments of estimated franchise tax. Rules pertaining to the estimated tax are contained in 701—Chapter 61.

58.4(2) Full estimated payment prior to original delinquency date. Rescinded IAB 3/15/95, effective 4/19/95.

58.4(3) Penalty and interest on unpaid tax. See rule 701—10.6(421) for penalty for tax periods beginning on or after January 1, 1991. See rule 701—10.8(421) for statutory exemptions to penalty for tax periods beginning on or after January 1, 1991.

Interest shall accrue on tax due from the original due date of the return. Interest on refunds of any portion of the tax imposed by statute which has been erroneously refunded and which is recoverable by the department shall bear interest as provided by law from the date of payment of the refund, with each

fraction of a month considered to be an entire month. See rule 701—10.2(421) for the statutory interest rate.

All payments shall be first applied to the penalty and then to the interest, and the balance, if any, to the amount of tax due.

58.4(4) *Payment of tax by uncertified checks.* The department will accept uncertified checks in payment of franchise taxes, provided such checks are collectible for their full amount without any deduction for exchange or other charges. The date on which the department receives the check will be considered the date of payment, so far as the taxpayer is concerned, unless the check is dishonored. If one check is remitted to cover two or more financial institutions' taxes, the remittance must be accompanied by a letter of transmittal stating:

- a. The name of the drawer of the check;
- b. The amount of the check;
- c. The amount of any cash, money order or other instrument included in the same remittance;
- d. The name of each financial institution whose tax is to be paid by the remittance; and
- e. The amount of payment on account of each financial institution.

58.4(5) *Procedure with respect to dishonored checks.* If any check is returned unpaid, all expenses incidental to the collection thereof will be charged to the taxpayer. If any taxpayer whose check has been returned by the depository bank uncollected should fail at once to make the check good, the director will proceed to collect the tax as though no check had been given. A taxpayer who tenders a certified check in payment for taxes is not relieved from the taxpayer's obligation until the check has been paid.

This rule is intended to implement Iowa Code chapter 422.

701—58.5(422) Minimum tax.

58.5(1) Rescinded IAB 11/24/04, effective 12/29/04.

58.5(2) For tax years beginning after 1997, a small business corporation or a new corporation, that is a financial institution, for its first year of existence, that through the operation of Internal Revenue Code Section 55(e) is exempt from the federal alternative minimum tax, is not subject to Iowa alternative minimum tax. A small business corporation that is a financial institution may apply any alternative minimum tax credit carryforward to the extent of its regular Iowa franchise tax liability.

For tax years beginning on or after January 1, 1987, the minimum tax is imposed only to the extent that it exceeds the taxpayer's regular tax liability computed under Iowa Code section 422.63. The minimum tax rate is 60 percent of the maximum franchise tax rate rounded to the nearest one-tenth of 1 percent or 3 percent. Minimum taxable income is computed as follows:

	State taxable income as adjusted by Iowa Code sections 422.35 and 422.61(4)
Plus:	Tax preference items, adjustments and losses added back
Less:	Allocable income including allocable preference items
	Subtotal
Times:	Apportionment percentage
	Result
Plus:	Income allocable to Iowa including allocable preference items
Less:	Iowa alternative tax net operating loss deduction \$40,000 exemption amount
Equals:	Iowa alternative minimum taxable income

For taxable years beginning on or after January 1, 1987, the items of tax preference are the same items of tax preference under Section 57 except for subsections (a)(1) and (a)(5) of the Internal Revenue Code used to compute federal alternative minimum taxable income. The adjustments to state taxable income are those adjustments required by Section 56 except for subsections (a)(4), (c)(1), (d), and (g) of the Internal Revenue Code used to compute federal alternative minimum taxable income computed without adjustments and the \$40,000 exemption. The state alternative tax net operating loss deduction shall be

substituted for the amounts in Section 56(g)(1)(B) of the Internal Revenue Code. For tax years beginning on or after January 1, 1988, in making the adjustment under Section 56(c)(1) of the Internal Revenue Code, interest and dividends from state and other political subdivisions and from regulated investment companies exempt from federal income tax under the Internal Revenue Code shall be subtracted net of amortization of any discount or premium. Losses to be added are those losses required to be added by Section 58 of the Internal Revenue Code in computing federal alternative minimum taxable income.

- a. Tax preference items are:
 1. Intangible drilling costs;
 2. Incentive stock options;
 3. Reserves for losses on bad debts of financial institutions;
 4. Appreciated property charitable deductions;
 5. Accelerated depreciation or amortization on certain property placed in service before January 1, 1987.
- b. Adjustments are:
 1. Depreciation;
 2. Mining exploration and development;
 3. Long-term contracts;
 4. Iowa alternative minimum net operating loss deduction;
 5. Book income or adjusted earnings and profits.
- c. Losses added back are:
 1. Farm losses;
 2. Passive activity losses.

Computation of Iowa alternative minimum tax net operating loss deduction.

Net operating losses computed under rule 701—59.2(422) carried forward from tax years beginning before January 1, 1987, are deductible without adjustment.

Net operating losses from tax years beginning after December 31, 1986, which are carried back or carried forward to the current tax year shall be reduced by the amount of tax preferences and adjustments taken into account in computing the net operating loss prior to applying allocation and apportionment. The deduction for a net operating loss from a tax year beginning after December 31, 1986, which is carried back or carried forward shall not exceed 90 percent of the alternative minimum taxable income computed without regard for the net operating loss deduction.

The exemption amount shall be reduced by 25 percent of the amount that the alternative minimum taxable income computed without regard to the \$40,000 exemption exceeds \$150,000. The exemption shall not be reduced below zero.

EXAMPLE: The following example shows the computation of the alternative minimum tax when there are net operating loss carryforwards and carrybacks including an alternative minimum tax net operating loss.

For tax year 1987, the following information is available:

Federal taxable income before NOL	\$ 35,000
Interest exempt from federal tax	5,000
Tax preferences and adjustments	53,400
Iowa income tax expensed on federal	878
Iowa NOL carryforward	<25,000>

For tax year 1988, the following information is available:

Federal taxable income before NOL	\$ <90,000>
Interest exempt from federal tax	4,000
Tax preferences and adjustments	20,000
Iowa franchise tax refund reported on federal	878

The alternative minimum tax for 1987 before the 1988 net operating loss carryback should be computed as follows:

Regular Iowa Tax	
Federal taxable income	\$ 35,000
Add interest exempt from federal tax	5,000
Add Iowa franchise tax expensed	878
Iowa taxable income before NOL carryforward	<u>\$ 40,878</u>
Less NOL carryforward	<u><25,000></u>
Iowa taxable income	\$ 15,878
Iowa income tax	\$ 794
Alternative Minimum Tax	
Iowa taxable income before NOL	\$ 40,878
Add preferences and adjustments	53,400
Total	<u>\$ 94,278</u>
Less NOL carryforward*	<u><25,000></u>
Iowa alternative taxable income	\$ 69,278
Less exemption amount	<u><40,000></u>
Total	\$ 29,278
Times 3%	878
Less regular tax	<u>794</u>
Alternative minimum tax	\$ 84

*Net operating loss carryforwards from tax years beginning before January 1, 1987, are deductible at 100 percent without reduction for items of tax preference or adjustments arising in the tax year.

The alternative minimum tax for 1987 after the 1988 net operating loss carryback should be computed as follows:

Regular Iowa Tax	
Federal taxable income	\$ 35,000
Add interest exempt from federal tax	5,000
Add Iowa franchise tax expensed	878
Iowa taxable income before NOL carryforward	<u>\$ 40,878</u>
Less NOL carryforward	<u><25,000></u>
	\$ 15,878
Less NOL carryback from 1988 ¹	<u><86,878></u>
NOL carryforward	\$ <71,000>
Alternative Minimum Tax	
Iowa taxable income before NOL	\$ 40,878
Add preferences and adjustments	53,400
Total	<u>\$ 94,278</u>
Less NOL carryforward from pre-1987 tax year	<u><25,000></u>
Total	\$ 69,278
Less alternative minimum tax NOL ²	<u><62,350></u>
Total	\$ 6,928
Less exemption	<u><40,000></u>
Alternative minimum taxable income after NOL	\$ -0-

¹Computation of 1988 Iowa NOL

Federal NOL	\$ <90,000>
Add interest exempt from federal tax	4,000
Less Iowa refund in federal income	<878>
Iowa NOL	\$ <86,878>

²Computation of 1988 Alternative Minimum Tax NOL

Iowa NOL	\$ <86,878>
Add preferences and adjustments	20,000
Total	\$ <66,878>
NOL carryback limited to 90% of alternative minimum income before NOL and exemption*	\$ <62,350>
Alternative minimum tax NOL carryforward	\$ 4,528

*For purposes of the alternative minimum tax, net operating loss carryforward or carryback from tax years beginning after December 31, 1986, must be reduced by items of tax preference and adjustments, and are limited to 90 percent of alternative minimum taxable income before deduction of the post-1986 NOL and the \$40,000 exemption amount ($\$69,278 \times 90\% = \$62,350$).

58.5(3) Effective for tax years beginning on or after January 1, 1986, estimated payments are required for minimum tax.

58.5(4) Alternative minimum tax credit for minimum tax paid in a prior tax year. Minimum tax paid in prior tax years commencing with tax years beginning on or after January 1, 1987, by a taxpayer can be claimed as a tax credit against the taxpayer's regular income tax liability in a subsequent tax year. Therefore, 1988 is the first tax year that the minimum tax credit is available for use and the credit is based on the minimum tax paid by the taxpayer for 1987. The minimum tax credit may only be used against regular income tax for a tax year to the extent that the regular tax is greater than the tentative minimum tax for the tax year. If the minimum tax credit is not used up against the regular tax for a tax year, the remaining credit is carried to the following tax year to be applied against the regular income tax liability for that period.

a. Computation of minimum tax credit on Schedule IA 8827F. The minimum tax credit is computed on Schedule IA 8827F from information on Schedule IA 4626F for prior tax years, Form IA 1120F and Schedule IA 4626F for the current year and from Schedule IA 8827F for prior tax years.

b. Examples of computation of the minimum tax credit and carryover of the credit.

EXAMPLE 1. Taxpayer reported \$5,000 of minimum tax for 2011. For 2012, taxpayer reported regular tax less credits of \$8,000, and the minimum tax liability is \$6,000. The minimum tax credit is \$2,000 for 2012 because, although the taxpayer had an \$8,000 regular tax liability, the credit is allowed only to the extent that the regular tax exceeds the minimum tax. Since only \$2,000 of the carryover credit from 2011 was used, there is a \$2,000 minimum tax carryover credit to 2013.

EXAMPLE 2. Taxpayer reported \$2,500 of minimum tax for 2011. For 2012, taxpayer reported regular tax less credits of \$8,000, and the minimum tax liability is \$5,000. The minimum tax credit is \$2,500 for 2012 because, although the regular tax less credits exceeded the minimum tax by \$3,000, the credit is allowed only to the extent of minimum tax paid for prior tax years. There is no minimum tax carryover credit to 2013.

c. Minimum tax credit after merger. When two or more financial institutions merge or consolidate into one financial organization, the minimum tax credit of the merged or consolidated operation is available for use by the survivor of the merger or consolidation.

This rule is intended to implement Iowa Code section 422.60.

[ARC 1303C, IAB 2/5/14, effective 3/12/14]

701—58.6(422) Refunds and overpayments.

58.6(1) to 58.6(6) Reserved.

58.6(7) *Computation of interest on refunds resulting from net operating losses or net capital losses for tax years or periods beginning on or after January 1, 1974, and ending after July 1, 1980.* Rescinded IAB 11/24/04, effective 12/29/04.

58.6(8) *Computation of interest on refunds resulting from net operating losses for tax years ending on or after April 30, 1981.* Rescinded IAB 11/24/04, effective 12/29/04.

58.6(9) *For refund claims received by the department after June 11, 1984.* If the amount of tax is reduced as a result of a net operating loss or net capital loss, interest shall accrue on the refund resulting from the loss carryback beginning on the date a claim for refund or amended return carrying back the net operating loss or net capital loss is filed with the department or the first day of the second calendar month following the actual payment date, whichever is later.

58.6(10) *Overpayment—interest accruing before July 1, 1980.* Rescinded IAB 11/24/04, effective 12/29/04.

58.6(11) *Interest commencing on or after January 1, 1982.* See rule 701—10.2(421) regarding the rate of interest charged by the department on delinquent taxes and the rate paid by the department on refunds commencing on or after January 1, 1982.

58.6(12) *Overpayment—interest accruing on or after July 1, 1980, and before April 30, 1981.* Rescinded IAB 11/24/04, effective 12/29/04.

58.6(13) *Overpayment—interest accruing on overpayments resulting from returns due on or after April 30, 1981.* If the amount of tax determined to be due by the department is less than the amount paid, the excess to be refunded will accrue interest from the first day of the second calendar month following the date of payment or the date the return was due to be filed or was filed, whichever is the later.

701—58.7(422) Allocation of franchise tax revenues. For fiscal years prior to July 1, 2004, each quarterly distribution shall be made up of the tax shown due on the franchise tax returns received during that quarter, net of all refunds of franchise tax established during that quarter. In determining the portion of franchise tax revenues to be distributed to cities and counties for fiscal years prior to July 1, 2004, each financial institution, as defined by Iowa Code section 422.61, is required to submit the appropriate allocation data with the filing of its Iowa franchise tax return. Each financial institution shall accumulate or maintain data to properly determine the business activity ratios as prescribed in subrules 58.7(1) and 58.7(2). The allocation shall be made on the basis of business activity for each office location. The word “office” shall mean a branch office, a drive-in bank depository or any other establishment whereby the business pertaining to the financial institution is carried on.

58.7(1) Business activity determination for a production credit association. A production credit association shall measure its business activity on the basis of loan volume. “Loan volume” shall mean total loans originated during the taxable period. The business activity for each office location shall be that percentage of loans originated by each office to total loans originated for all office locations during the taxable period.

58.7(2) Business activity determination for a financial institution other than a production credit association. A financial institution, other than a production credit association, shall measure its business activity on a basis of net deposits. The business activity of each office shall be that percentage of average “savings and demand deposits net of withdrawals” for each office location to the total average “savings and demand deposits net of withdrawals” for all office locations.

This rule is intended to implement Iowa Code section 422.61.

701—58.8(15E) Eligible housing business tax credit. For tax years beginning on or after January 1, 2000, a financial institution may claim on the franchise tax return the pro rata share of the Iowa eligible housing business tax credit from a partnership, limited liability company, estate or trust which has been approved as an eligible housing business by the economic development authority. The enterprise zone program was repealed on July 1, 2014, and the eligible housing business tax credit has been replaced with the workforce housing tax incentives program. See rule 701—58.22(15) for information on the tax incentives provided under the workforce housing tax incentives program. Any investment tax credit

earned by businesses approved under the enterprise zone program prior to July 1, 2014, remains valid and can be claimed on tax returns filed after July 1, 2014.

An eligible housing business may receive a tax credit of up to 10 percent of the new investment which is directly related to the building or rehabilitating of homes in an enterprise zone. The tax credit may be taken on the tax return for the tax year in which the home is ready for occupancy. The portion of the credit claimed by the taxpayer shall be in the same ratio as the taxpayer's pro-rata share of the earnings of the partnership, limited liability company, estate or trust, except for projects beginning on or after July 1, 2005, which used low-income housing tax credits authorized under Section 42 of the Internal Revenue Code to assist in the financing of the housing development. For these projects, the partnership, limited liability company or S corporation may designate the amount of the tax credit to be allocated to each partner, member or shareholder. Any eligible housing business tax credit in excess of the franchise tax liability must be carried forward for seven years or until it is used, whichever is the earlier.

Prior to January 1, 2001, the tax credit cannot exceed 10 percent of \$120,000 for each home or individual unit in a multiple dwelling unit building. Effective January 1, 2001, the tax credit cannot exceed 10 percent of \$140,000 for each home or individual unit in a multiple dwelling unit building.

58.8(1) Computation of credit. New investment which is directly related to the building or rehabilitating of homes includes but is not limited to the following costs: land, surveying, architectural services, building permits, inspections, interest on a construction loan, building materials, roofing, plumbing materials, electrical materials, amounts paid to subcontractors for labor and materials provided, concrete, labor, landscaping, appliances normally provided with a new home, heating and cooling equipment, millwork, drywall and drywall materials, nails, bolts, screws, and floor coverings.

New investment does not include the machinery, equipment, hand or power tools necessary to build or rehabilitate homes.

If the eligible housing business fails to maintain the requirements of 2014 Iowa Code section 15E.193B to be an eligible housing business, the taxpayer may be required to repay all or a part of the tax incentives the business received. Irrespective of the fact that the statute of limitations to assess the taxpayer for repayment of the income tax credit may have expired, the department may proceed to collect the tax incentives forfeited by failure to maintain the requirements of 2014 Iowa Code section 15E.193B. This is because it is a recovery of an incentive, rather than an adjustment to the taxpayer's tax liability. Details on the calculation of the repayment can be found in 261—subrule 187.5(4) of the administrative rules of the economic development authority. If the business is a partnership, limited liability company, S corporation, estate or trust where the income of the taxpayer is taxed to the individual owner(s) of the business, the department may proceed to collect the tax incentives against the partners, members, shareholders or beneficiaries to whom the tax incentives were passed through. See Decision of the Administrative Law Judge in *Damien & Colette Trebilcock, et al.*, Docket No. 11DORF 042-044, June 11, 2012.

Effective for tax periods beginning on or after January 1, 2003, the taxpayer must receive a tax credit certificate from the economic development authority to claim the eligible housing business tax credit. The tax credit certificate shall include the taxpayer's name, the taxpayer's address, the taxpayer's tax identification number, the date the project was completed, the amount of the eligible housing business tax credit, and the tax year for which the credit may be claimed. In addition, the tax credit certificate shall include a place for the name and tax identification number of a transferee and the amount of the tax credit being transferred, as provided in subrule 58.8(2). The tax credit certificate must be included with the income tax return for the tax period in which the home is ready for occupancy. The administrative rules for the eligible housing business tax credit for the economic development authority may be found under 261—Chapter 59.

58.8(2) Transfer of the eligible housing business tax credit. For tax periods beginning on or after January 1, 2003, the eligible housing business tax credit certificates may be transferred to any person or entity if low-income housing tax credits authorized under Section 42 of the Internal Revenue Code are used to assist in the financing of the housing development. In addition, the eligible housing business tax credit certificates may be transferred to any person or entity for projects beginning on or after July 1, 2005, if the housing development is located in a brownfield site as defined in Iowa Code section 15.291,

or if the housing development is located in a blighted area as defined in Iowa Code section 403.17. No more than \$3 million of tax credits for housing developments located in brownfield sites or blighted areas may be transferred in a calendar year, with no more than \$1.5 million being transferred for any one eligible housing business in a calendar year.

The excess of the \$3 million limitation of tax credits eligible for transfer in the 2013 and 2014 calendar years for housing developments located in brownfield sites or blighted areas cannot be claimed by a transferee prior to January 1, 2016. The eligible housing business must have notified the economic development authority in writing before July 1, 2014, of the business's intent to transfer any tax credits for housing developments located in brownfield sites or blighted areas. If a tax credit certificate is issued by the economic development authority for a housing development approved prior to July 1, 2014, that is located in a brownfield site or blighted area, the tax credit can still be claimed by the eligible business, but the tax credit cannot be transferred by the eligible business if the economic development authority was not notified prior to July 1, 2014.

EXAMPLE 1: A housing development located in a brownfield site was completed in December 2013 and was issued a tax credit certificate totaling \$250,000. The \$3 million calendar cap for transferred tax credits for brownfield sites and blighted areas has already been reached for the 2013 and 2014 tax years. The \$250,000 tax credit is going to be transferred to ABC Bank, and the economic development authority was notified of the transfer prior to July 1, 2014. Once a replacement tax credit certificate has been issued, ABC Bank cannot file an amended Iowa franchise tax return for the 2013 tax year until January 1, 2016, to claim the \$250,000 tax credit.

EXAMPLE 2: A housing development located in a blighted area was completed in May 2014 and was issued a tax credit certificate totaling \$150,000. The \$3 million calendar cap for transferred tax credits for brownfield sites and blighted areas has already been reached for the 2014 tax year. The \$150,000 tax credit is going to be transferred to XYZ Bank and the economic development authority was notified of the transfer prior to July 1, 2014. Once a replacement tax credit certificate has been issued, XYZ Bank cannot file an amended Iowa franchise tax return for the 2014 tax year until January 1, 2016, to claim the \$150,000 tax credit.

Within 90 days of transfer of the tax credit certificate for transfers prior to July 1, 2006, the transferee must submit the transferred tax credit certificate to the economic development authority, along with a statement which contains the transferee's name, address and tax identification number, and the amount of the tax credit being transferred. For transfers on or after July 1, 2006, the transferee must submit the transferred tax credit certificate to the department of revenue. Within 30 days of receiving the transferred tax credit certificate and the statement from the transferee for transfers prior to July 1, 2006, the economic development authority will issue a replacement tax credit certificate to the transferee. For transfers on or after July 1, 2006, the department of revenue will issue the replacement tax credit certificate to the transferee. If the transferee is a partnership, limited liability company or S corporation, the transferee shall provide a list of the partners, members or shareholders and information on how the housing business tax credit should be divided among the partners, members or shareholders. The transferee shall also provide the tax identification numbers and addresses of the partners, members or shareholders. The replacement tax credit certificate must contain the same information that was on the original certificate and must have the same expiration date as the original tax credit certificate.

The transferee may use the amount of the tax credit for any tax period for which the original transferor could have claimed the tax credit. Any consideration received for the transfer of the tax credit shall not be included in Iowa taxable income for individual income, corporation income or franchise tax purposes. Any consideration paid for the transfer of the tax credit shall not be deducted from Iowa taxable income for individual income, corporation income or franchise tax purposes.

This rule is intended to implement 2014 Iowa Code section 15E.193B.
[ARC 1744C, IAB 11/26/14, effective 12/31/14]

701—58.9(15E) Eligible development business investment tax credit. Effective for tax years beginning on or after January 1, 2001, a business which qualifies as an eligible development business may receive a tax credit of up to 10 percent of the new investment which is directly related to the

construction, expansion or rehabilitation of building space to be used for manufacturing, processing, cold storage, distribution, or office facilities.

An eligible development business must be approved by the Iowa department of economic development prior to March 17, 2004, and meet the qualifications of Iowa Code section 15E.193C. Effective March 17, 2004, the eligible development business program is repealed.

New investment includes the purchase price of land and the cost of improvements made to real property. The tax credit may be claimed by an eligible development business in the tax year in which the construction, expansion or rehabilitation is completed.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following seven years or until used, whichever is the earlier.

If the business is a partnership, S corporation, limited liability company, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

If the eligible development business fails to meet and maintain any one of the requirements to be an eligible business, the business shall be subject to repayment of all or a portion of the amount of tax incentives received. For example, if within five years of project completion the development business sells or leases any space to any retail business, the development business shall proportionally repay the value of the investment credit. The proportion of the investment credit that would be due for repayment by an eligible development business for selling or leasing space to a retail business would be determined by dividing the square footage of building space occupied by the retail business by the square footage of the total building space.

An eligible business, which is not a development business, which operates in an enterprise zone cannot claim an investment tax credit if the property is owned, or was previously owned, by an approved development business that has already received an investment tax credit. An eligible business, which is not a development business, can claim an investment tax credit only on additional, new improvements made to real property that was not included in the development business's approved application for the investment tax credit.

This rule is intended to implement Iowa Code section 15E.193C.

701—58.10(404A,422) Historic preservation and cultural and entertainment district tax credit. For tax years beginning on or after January 1, 2001, a historic preservation and cultural and entertainment district tax credit, subject to the availability of the credit, may be claimed against a taxpayer's Iowa franchise tax liability for 25 percent of the qualified rehabilitation costs to the extent the costs were incurred for the rehabilitation of eligible property in Iowa. For information related to projects with Part 2 applications approved and tax credits reserved prior to July 1, 2014, see rule 701—52.18(404A,422). For information related to projects with Part 2 applications approved on or after July 1, 2014, and agreements entered into on or after July 1, 2014, see rule 701—52.47(404A,422). See also the administrative rules for the historic preservation and cultural and entertainment district tax credit for the historical division of the department of cultural affairs under 223—Chapter 48. Division I of 223—Chapter 48 applies to projects with Part 2 applications approved and tax credits reserved prior to July 1, 2014. Division II of 223—Chapter 48 applies to projects with Part 2 applications approved on or after July 1, 2014, and agreements entered into on or after July 1, 2014.

This rule is intended to implement Iowa Code chapter 404A as amended by 2014 Iowa Acts, House File 2453, and Iowa Code section 422.60.

[ARC 1968C, IAB 4/15/15, effective 5/20/15]

701—58.11(15E,422) Venture capital credits.

58.11(1) *Investment tax credit for an equity investment in a community-based seed capital fund or qualifying business.* See rule 123—2.1(15E) for the discussion of the investment tax credit for an equity investment in a community-based seed capital fund or an equity investment made on or after January 1, 2004, in a qualifying business, along with the issuance of tax credit certificates by the Iowa capital

investment board, for equity investments made before January 1, 2011. For equity investments made on or after January 1, 2011, see 261—Chapter 115 for information regarding eligibility for qualifying businesses and community-based seed capital funds, applications for the investment tax credit for equity investments in a qualifying business or community-based seed capital fund, and the issuance of tax credit certificates by the economic development authority.

The department of revenue will be notified by the Iowa capital investment board or the economic development authority when the tax credit certificates are issued. The credit is equal to 20 percent of the taxpayer's equity investment in a qualifying business or community-based seed capital fund. An investment shall be deemed to have been made on the same date as the date of acquisition of the equity interest as determined by the Internal Revenue Code. For investments made prior to January 1, 2014, a taxpayer shall not claim the tax credit prior to the third tax year following the tax year in which the investment is made. For investments made in qualifying businesses on or after January 1, 2014, the credit can be claimed in the year of the investment, but these investments cannot be redeemed prior to January 1, 2016. For example, if a franchise taxpayer whose tax year ends on December 31, 2012, makes an equity investment during the 2012 calendar year, the franchise taxpayer cannot claim the tax credit until the tax year ending December 31, 2015. For fiscal years beginning July 1, 2011, the amount of tax credits authorized cannot exceed \$2 million. The tax credit certificate must be included with the taxpayer's return for the tax year in which the credit may be redeemed as stated on the tax credit certificate.

If a tax credit is carried over and issued for the tax year immediately following the year in which the investment was made because the \$2 million cap has been reached, the tax credit may be claimed by the taxpayer for the third tax year following the tax year for which the credit is issued. For example, if a franchise taxpayer whose tax year ends on December 31, 2012, makes an equity investment in December 2012 and the \$2 million cap for the fiscal year ending June 30, 2013, had already been reached, the tax credit will be issued for the tax year ending December 31, 2013, and cannot be redeemed until the tax year ending December 31, 2016.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier. The tax credit cannot be carried back to a tax year prior to the tax year in which the taxpayer claims the tax credit. The tax credit is not transferable to any other taxpayer.

For equity investments made in a community-based seed capital fund and equity investments made on or after January 1, 2004, in a qualifying business, an individual may claim the credit if the investment was made by a partnership, S corporation, limited liability company, or an estate or trust electing to have the income directly taxed to the individual. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

58.11(2) *Investment tax credit for an equity investment in a venture capital fund.* See rule 123—3.1(15E) for the discussion of the investment tax credit for an equity investment in a venture capital fund, along with the issuance of tax credit certificates by the Iowa capital investment board. This credit is repealed for investments in venture capital funds made after July 1, 2010.

The department of revenue will be notified by the Iowa capital investment board when the tax credit certificates are issued. The tax credit certificate must be attached to the taxpayer's return for the tax year in which the credit may be redeemed as stated on the tax credit certificate.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier.

For equity investments made in a venture capital fund, an individual may claim the credit if the investment was made by a partnership, S corporation, limited liability company, or an estate or trust electing to have the income directly taxed to the individual. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

58.11(3) *Contingent tax credit for investments in Iowa fund of funds.* See rule 123—4.1(15E) for the discussion of the contingent tax credit available for investments made in the Iowa fund of funds

organized by the Iowa capital investment corporation. Tax credit certificates related to the contingent tax credits will be issued by the Iowa capital investment board.

The department of revenue will be notified by the Iowa capital investment board when these tax credit certificates are issued and, if applicable, when they are redeemed. If the tax credit certificate is redeemed, the certificate must be attached to the taxpayer's return for the tax year in which the credit may be redeemed as stated on the tax credit certificate.

If the tax credit certificate is redeemed, any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following seven years or until used, whichever is the earlier.

If the tax credit certificate is redeemed, an individual may claim the credit if the investment was made by a partnership, S corporation, limited liability company, or an estate or trust electing to have the income directly taxed to the individual. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

58.11(4) Innovation fund investment tax credit. See 261—Chapter 116 for information regarding eligibility for an innovation fund, applications for the investment tax credit for investments in an innovation fund, and the issuance of tax credit certificates by the economic development authority.

The department of revenue will be notified by the economic development authority when the tax credit certificates are issued. The credit is equal to 20 percent of the taxpayer's equity investment in an innovation fund. An investment shall be deemed to have been made on the same date as the date of acquisition of the equity interest as determined by the Internal Revenue Code. A taxpayer shall not claim the tax credit prior to the third tax year following the tax year in which the investment is made. For example, if a franchise taxpayer whose tax year ends on December 31, 2012, makes an equity investment during the 2012 calendar year, the franchise taxpayer cannot claim the tax credit until the tax year ending December 31, 2015. For fiscal years beginning July 1, 2011, the amount of tax credits authorized cannot exceed \$8 million. The tax credit certificate must be attached to the taxpayer's return for the tax year in which the credit may be redeemed as stated on the tax credit certificate.

If a tax credit is carried over and issued for the tax year immediately following the year in which the investment was made because the \$8 million cap has been reached, the tax credit may be claimed by the taxpayer for the third tax year following the tax year for which the credit is issued. For example, if a franchise taxpayer whose tax year ends on December 31, 2012, makes an equity investment in December 2012 and the \$8 million cap for the fiscal year ending June 30, 2013, had already been reached, the tax credit will be issued for the tax year ending December 31, 2013, and cannot be redeemed until the tax year ending December 31, 2016.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until depleted, whichever is the earlier. The tax credit cannot be carried back to a tax year prior to the tax year in which the taxpayer claims the tax credit. The tax credit is not transferable to any other taxpayer.

For equity investments made in an innovation fund, an individual may claim the credit if the investment was made by a partnership, S corporation, limited liability company, or an estate or trust electing to have the income directly taxed to the individual. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, S corporation, limited liability company, or estate or trust.

This rule is intended to implement Iowa Code sections 15E.42, 15E.66 and 422.60 and section 15E.43 as amended by 2014 Iowa Acts, Senate File 2359.

[ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 9966B, IAB 1/11/12, effective 2/15/12; ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—58.12(15) New capital investment program tax credits. Effective for tax periods beginning on or after January 1, 2003, a business which qualifies under the new capital investment program is eligible to receive tax credits. An eligible business under the new capital investment program must be approved by the Iowa department of economic development and meet the qualifications of 2003 Iowa Acts, chapter 125, section 4. The new capital investment program was repealed on July 1, 2005, and has

been replaced with the high quality job creation program. See rules 701—52.28(15) and 701—58.17(15) for information on the tax credits available under the high quality job creation program. Any tax credits earned by businesses approved under the new capital investment program prior to July 1, 2005, remain valid, and can be claimed on tax returns filed after July 1, 2005.

This rule is intended to implement 2003 Iowa Acts, House File 677, sections 1 to 7, and Iowa Code section 15.333 as amended by 2003 Iowa Acts, House File 677, section 8.

701—58.13(15E,422) Endow Iowa tax credit. Effective for tax years beginning on or after January 1, 2003, a taxpayer who makes an endowment gift to an endow Iowa qualified community foundation may qualify for an endow Iowa tax credit, subject to the availability of the credit. For tax years beginning on or after January 1, 2003, but before January 1, 2010, the credit is equal to 20 percent of a taxpayer's endowment gift to an endow Iowa qualified community foundation approved by the Iowa department of economic development. For tax years beginning on or after January 1, 2010, the credit is equal to 25 percent of a taxpayer's endowment gift to an endow Iowa qualified community foundation approved by the Iowa department of economic development. For tax years beginning on or after January 1, 2010, a taxpayer cannot claim a deduction for charitable contributions under Section 170 of the Internal Revenue Code for the amount of the contribution for which the tax credit is claimed for Iowa tax purposes. The administrative rules for the endow Iowa tax credit for the Iowa department of economic development may be found under 261—Chapter 47.

The total amount of endow Iowa tax credits available is \$2 million in the aggregate for the 2003 and 2004 calendar years. The total amount of endow Iowa tax credits is \$2 million annually for the 2005-2007 calendar years, and \$200,000 of these tax credits on an annual basis is reserved for endowment gifts of \$30,000 or less. The maximum amount of tax credit granted to a single taxpayer shall not exceed \$100,000 for the 2003-2007 calendar years. The total amount of endow Iowa tax credits annually for the 2008 and 2009 calendar years is \$2 million plus a percentage of the tax imposed on the adjusted gross receipts from gambling games in accordance with Iowa Code section 99F.11(3). The total amount of endow Iowa tax credits annually for 2010 is \$2.7 million plus a percentage of the tax imposed on the adjusted gross receipts from gambling games in accordance with Iowa Code section 99F.11(3). The total amount of endow Iowa tax credits annually for 2011 is \$3.5 million plus a percentage of the tax imposed on the adjusted gross receipts from gambling games in accordance with Iowa Code section 99F.11(3). The maximum amount of tax credit granted to a single taxpayer shall not exceed 5 percent of the total endow Iowa tax credit amount authorized for 2008 and subsequent years. For calendar year 2012 and subsequent calendar years, the total amount of endow Iowa tax credits is \$6 million; the maximum amount of tax credit authorized to a single taxpayer is \$300,000 (\$6 million multiplied by 5 percent). The endow Iowa tax credit cannot be transferred to any other taxpayer.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following five years or until used, whichever is the earlier.

If a taxpayer is a partnership, limited liability company, S corporation, or an estate or trust electing to have the income taxed directly to the individual, an individual may claim the credit. The amount claimed by an individual must be based on the individual's pro rata share of the individual's earnings of the partnership, limited liability company, S corporation, or estate or trust.

This rule is intended to implement Iowa Code section 15E.305 as amended by 2013 Iowa Acts, House File 620, and section 422.60.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 9104B, IAB 9/22/10, effective 10/27/10; ARC 9876B, IAB 11/30/11, effective 1/4/12; ARC 0398C, IAB 10/17/12, effective 11/21/12; ARC 1138C, IAB 10/30/13, effective 12/4/13]

701—58.14(15I,422) Wage-benefits tax credit. Effective for tax years ending on or after June 9, 2006, a wage-benefits tax credit, subject to the availability of the credit, equal to a percentage of the annual wages and benefits paid for a qualified new job created by the location or expansion of the business in Iowa is available for eligible financial institutions. For information on the eligibility for the wage-benefits tax credit, how to file applications for the wage-benefits tax credit, how the wage-benefits tax credit is

computed, the repeal of the wage-benefits credit effective July 1, 2008, and other details about the credit, see rule 701—52.25(15I,422).

This rule is intended to implement Iowa Code chapter 15I as amended by 2008 Iowa Acts, House File 2700, section 167, and Iowa Code Supplement section 422.60(10) as amended by 2008 Iowa Acts, House File 2700, section 164.

701—58.15(422,476B) Wind energy production tax credit. Effective for tax years beginning on or after July 1, 2006, owners of qualified wind energy production facilities approved by the Iowa utilities board may claim a wind energy production tax credit for qualified electricity sold by the owner against a taxpayer's Iowa franchise tax liability. For information on the application and review process for the wind energy production tax credit, how the wind energy production tax credit is computed, how the wind energy production tax credit can be transferred and other details about the credit, see rule 701—52.26(422,476B). See also the administrative rules for the wind energy production tax credit for the Iowa utilities board in rules 199—15.18(476B) and 199—15.20(476B).

This rule is intended to implement Iowa Code section 422.60 and chapter 476B.

701—58.16(422,476C) Renewable energy tax credit. Effective for tax years beginning on or after July 1, 2006, a purchaser or producer of renewable energy whose facility has been approved by the Iowa utilities board may claim a renewable energy tax credit for qualified renewable energy against a taxpayer's Iowa franchise tax liability. For information on the application and review process for the renewable energy tax credit, how the renewable energy tax credit is computed, how the renewable energy tax credit can be transferred and other details about the credit, see rule 701—52.27(422,476C). See also the administrative rules for the renewable energy tax credit for the Iowa utilities board in rules 199—15.19(476C) and 199—15.21(476C).

This rule is intended to implement Iowa Code section 422.60 and chapter 476C.

701—58.17(15) High quality job creation program. Effective for tax periods ending on or after July 1, 2005, for programs approved on or after July 1, 2005, but before July 1, 2009, a business which qualifies under the high quality job creation program is eligible to receive tax credits. The high quality job creation program replaces the new jobs and income program and the new capital investment program. An eligible business under the high quality job creation program must be approved by the Iowa department of economic development and meet the qualifications of Iowa Code section 15.329.

The high quality job creation program was repealed on July 1, 2009, and has been replaced with the high quality jobs program. See rule 701—52.40(15) for information on the investment tax credit under the high quality jobs program. Any investment tax credit earned by businesses approved under the high quality job creation program prior to July 1, 2009, remains valid, and can be claimed on tax returns filed after July 1, 2009. The administrative rules for the high quality jobs program for the Iowa department of economic development may be found at 261—Chapter 68.

For information on what credits can be taken under this program, how the investment tax credit is computed and other details about this program, see rule 701—52.28(15). However, the research credit described in subrule 52.28(1) is not available for franchise tax filers.

This rule is intended to implement Iowa Code Supplement chapter 15.
[ARC 8589B, IAB 3/10/10, effective 4/14/10]

701—58.18(15E,422) Economic development region revolving fund tax credit. Effective for tax years ending on or after July 1, 2005, but beginning before January 1, 2010, a taxpayer who makes a contribution to an economic development region revolving fund may claim a tax credit, subject to the availability of the credit. The credit is equal to 20 percent of a taxpayer's contribution to the economic development region revolving fund approved by the Iowa department of economic development. The administrative rules for the economic development region revolving fund tax credit for the Iowa department of economic development may be found at 261—Chapter 32. The tax credit is repealed for tax years beginning on or after January 1, 2010.

The total amount of economic development region revolving fund tax credits available shall not exceed \$2 million per fiscal year. The tax credit shall not be carried back to a tax year prior to the year in which the taxpayer redeems the credit. The economic development region revolving fund tax credit is not transferable to any other taxpayer.

Any credit in excess of the tax liability for the tax year may be credited to the tax liability for the following ten years or until used, whichever is the earlier.

This rule is intended to implement Iowa Code sections 15E.232 and 422.60 as amended by 2010 Iowa Acts, Senate File 2380.

[ARC 9104B, IAB 9/22/10, effective 10/27/10]

701—58.19(15,422) Film qualified expenditure tax credit. Effective for tax years beginning on or after January 1, 2007, but beginning before January 1, 2012, a film qualified expenditure tax credit is available for franchise tax. The tax credit is equal to 25 percent of the taxpayer's qualified expenditures in a film, television, or video project registered with the film office of the Iowa economic development authority (the authority). For information on the qualified expenditures eligible for the credit, how the film qualified expenditure tax credit is claimed, how the film qualified expenditure tax credit can be transferred and other details about the credit, see rule 701—52.34(15,422). See also the authority's administrative rules for the film qualified expenditure tax credit at 261—Chapter 36.

This rule is intended to implement Iowa Code section 422.60 as amended by 2012 Iowa Acts, House File 2337, section 36.

[ARC 0398C, IAB 10/17/12, effective 11/21/12]

701—58.20(15,422) Film investment tax credit. Effective for tax years beginning on or after January 1, 2007, but beginning before January 1, 2012, a film investment tax credit is available for franchise tax. The tax credit is equal to 25 percent of the taxpayer's qualified expenditures in a film, television, or video project registered with the film office of the Iowa economic development authority (the authority). For information on how the film investment tax credit is claimed, how the film investment tax credit can be transferred and other details about the credit, see rule 701—52.35(15,422). See also the authority's administrative rules for the film investment tax credit at 261—Chapter 36.

This rule is intended to implement Iowa Code section 422.60 as amended by 2012 Iowa Acts, House File 2337, section 36.

[ARC 0398C, IAB 10/17/12, effective 11/21/12]

701—58.21(15) High quality jobs program. Effective for tax periods beginning on or after July 1, 2009, a business which qualifies under the high quality jobs program is eligible to receive tax credits. The high quality jobs program replaces the high quality job creation program. An eligible business under the high quality jobs program must be approved by the Iowa department of economic development and meet the qualifications of Iowa Code section 15.329. The tax credits available under the high quality jobs program are based upon the number of jobs created or retained that pay a qualifying wage threshold and the amount of qualifying investment. The administrative rules for the high quality jobs program for the Iowa department of economic development may be found at 261—Chapter 68.

For information on the credits that may be taken under this program, how the investment tax credit is computed and other details about the program, see rule 701—52.40(15). NOTE: The research credit described in 701—subrule 52.40(1) is not available for franchise tax filers.

This rule is intended to implement Iowa Code chapter 15.

[ARC 8589B, IAB 3/10/10, effective 4/14/10]

701—58.22(422) Solar energy system tax credit. Effective for installations placed in service during tax years beginning on or after January 1, 2014, a solar energy system tax credit for financial institutions is available for business property located in Iowa. For information on property eligible for the credit, the calculation of the credit and applying for the credit, see rule 701—52.44(422).

This rule is intended to implement Iowa Code section 422.60 as amended by 2014 Iowa Acts, House File 2438, section 27, and 2014 Iowa Acts, House File 2473, section 78.

[ARC 1666C, IAB 10/15/14, effective 11/19/14]

701—58.23(15) Workforce housing tax incentives program. Effective July 1, 2014, a business which qualifies under the workforce housing tax incentives program is eligible to receive tax incentives for franchise tax. The workforce housing tax incentives program replaces the eligible housing enterprise zone program. An eligible business under the workforce housing tax incentives program must be approved by the economic development authority and must meet the requirements of 2014 Iowa Acts, House File 2448, section 15. For information on how the workforce housing tax incentives can be claimed, how the investment tax credit can be transferred and other details about the workforce housing tax incentives, see rule 701—52.46(15). The administrative rules for the workforce housing tax incentives program for the economic development authority may be found at 261—Chapter 48.

This rule is intended to implement 2014 Iowa Acts, House File 2448.

CHAPTER 59
DETERMINATION OF NET INCOME
[Prior to 12/17/86, Revenue Department[730]]

701—59.1(422) Computation of net income for financial institutions. “Net income” for state purposes shall mean federal taxable income, before deduction for net operating losses, as properly computed under the Internal Revenue Code, and shall include the adjustments in rules 701—59.2(422) to 701—59.13(422). The remaining provisions of this rule and rules 701—59.14(422) to 701—59.24(422) shall also be applicable in determining net income.

In the case of a financial institution which is a member of an affiliated group of corporations filing a consolidated income tax return for the taxable year for federal income tax purposes, but files a separate return for state purposes, taxable income as properly computed for federal purposes is determined as if the financial institution had filed a separate return for federal income tax purposes for the taxable year and each preceding taxable year for which it was a member of an affiliated group. For purposes of this paragraph, the taxpayer’s separate taxable income shall be determined as if the election provided by Section 243(b)(2) of the Internal Revenue Code had been in effect for all those years.

When a federal short period return is filed and the federal taxable income is required to be adjusted to an annual basis, the Iowa taxable income shall also be adjusted to an annual basis. The tax liability for a short period is computed by multiplying the taxable income for the short period by 12 and dividing the result by the number of months in the short period. The tax is determined on the resulting total as if it were the taxable income, and the tax computed is divided by 12 and multiplied by the number of months in the short period. This adjustment shall apply only to income attributable to business carried on within the state of Iowa.

This rule is intended to implement Iowa Code section 422.35.

701—59.2(422) Net operating loss carrybacks and carryovers. Net operating losses shall be allowed or allowable for Iowa franchise tax purposes to the same extent they are allowed or allowable for federal corporation income tax purposes, provided the following adjustments are made:

59.2(1) Additions to income.

a. Refunds of federal income taxes due to net operating loss, capital loss and investment credit or other credit carrybacks shall not be added for tax years beginning on or after January 1, 1980.

b. Iowa franchise tax deducted on the federal return for the loss year shall be reflected as an addition to income in the year of the loss.

c. Interest and dividends received in the year of the loss on federally tax-exempt securities shall be reflected as additions to income in the year of the loss.

59.2(2) Reductions of income. Iowa franchise tax refunds reported as income for federal income tax purposes in the loss year shall be reflected as reductions of income in the year of the loss.

59.2(3) If a financial institution does business both within and without Iowa, it shall make adjustments reflecting the apportionment and allocation of its operating loss on the basis of business done within and without the state of Iowa after completing the provisions of subrules 59.2(1) and 59.2(2).

a. After making the adjustments to federal taxable income as provided in subrules 59.2(1) and 59.2(2), the total net allocable income or loss shall be added to or deducted from, as the case may be, the net federal income or loss as adjusted for Iowa tax purposes. The resulting income or loss so determined shall be subject to apportionment as provided in rules 701—59.25(422) to 701—59.29(422). The apportioned income or loss shall be added or deducted, as the case may be, to the amount of net allocable income or loss properly attributable to Iowa. This amount is the taxable income or net operating loss attributable to Iowa for that year.

b. The net operating loss attributable to Iowa, as determined in rule 701—59.2(422), shall be subject to a 3-year carryback and a 15-year carryover provision for tax years beginning before August 6, 1997. This loss shall be carried back or over to the applicable year as a reduction or part of a reduction of the net income attributable to Iowa for that year. However, an Iowa net operating loss shall not be

carried back to a year in which the taxpayer was not doing business in Iowa. If the election under Section 172(b)(3) of the Internal Revenue Code is made, the Iowa net operating loss shall be carried forward 15 taxable years. A copy of the federal election made under Section 172(b)(3) of the Internal Revenue Code must be attached to the Iowa corporation income tax return filed with the department.

c. For tax years beginning after August 5, 1997, but before January 1, 2009, a net operating loss attributable to Iowa, as determined in rule 701—59.2(422), incurred in a presidentially declared disaster area by a corporation engaged in a small business or in the trade or business of farming must be carried back 3 taxable years and carried forward 20 taxable years. All other net operating losses attributable to Iowa must be carried back 2 taxable years and carried forward 20 taxable years. This loss shall be carried back or over to the applicable year as a reduction or part of a reduction of the net income attributable to Iowa for that year. However, an Iowa net operating loss shall not be carried back to a year in which the taxpayer was not doing business in Iowa. If the election under Section 172(b)(3) of the Internal Revenue Code is made, the Iowa net operating loss shall be carried forward 20 taxable years. A copy of the federal election made under Section 172(b)(3) of the Internal Revenue Code must be attached to the Iowa franchise tax return filed with the department.

d. For tax years beginning on or after January 1, 2009, a net operating loss attributable to Iowa, as determined in rule 701—59.2(422), shall be carried forward 20 taxable years. The net operating loss cannot be carried back to a previous tax year.

59.2(4) No part of a net loss for a year for which the financial institution was not subject to the imposition of Iowa franchise tax shall be included in the Iowa net operating loss deduction applicable to any year prior to or subsequent to the year of the loss.

59.2(5) No part of a net operating loss may be carried back or carried forward if the carryback or carryforward would be disallowed for federal income tax purposes under Sections 172(b)(1)(E) and 172(h) of the Internal Revenue Code. This provision is effective for tax years beginning on or after January 1, 1989.

59.2(6) The carryover of Iowa net operating losses after reorganizations or mergers is limited to the same extent as the carryover of a net operating loss is limited under the provisions of Sections 381 through 386 of the Internal Revenue Code and regulations thereunder or any other section of the Internal Revenue Code or regulations thereunder. Where the taxpayer files as a member of a consolidated income tax return for federal income tax purposes, but is required to file a separate franchise tax return, the limitation on an Iowa net operating loss carryover must be determined as though a separate income tax return was filed for federal income tax purposes.

This rule is intended to implement Iowa Code section 422.35 as amended by 2009 Iowa Acts, Senate File 483, and sections 422.61 and 422.63.

[ARC 8589B, IAB 3/10/10, effective 4/14/10]

701—59.3(422) Capital loss carryback. Capital losses shall be allowed or allowable for Iowa franchise tax purposes to the same extent they are allowed or allowable for federal corporation income tax purposes. Capital loss carrybacks shall be treated as an adjustment to federal taxable income to arrive at net income. For capital losses occurring in tax years beginning on or after January 1, 1980, refunds of federal corporation income taxes shall not be an adjustment in computing income subject to the franchise tax.

This rule is intended to implement Iowa Code sections 422.35 and 422.61.

701—59.4(422) Net operating and capital loss carrybacks and carryovers. If the taxpayer, for tax periods beginning before January 1, 2009, has both a net operating loss and a capital loss carryback to a prior tax year, the capital loss shall be carried back first and then the net operating loss offset against any remaining income.

This rule is intended to implement Iowa Code section 422.35 as amended by 2009 Iowa Acts, Senate File 483, and section 422.61.

[ARC 8589B, IAB 3/10/10, effective 4/14/10]

701—59.5(422) Interest and dividends from federal securities. For franchise tax purposes, dividends received from corporations owned or sponsored by the federal government, or interest derived from obligations of the United States and its possessions, agencies and instrumentalities become a part of the taxable income. Examples of these types of obligations are bonds issued by the governments of Puerto Rico, Washington D.C., Guam and the Virgin Islands. Notwithstanding the above, only interest received after July 1, 1991, from bonds purchased after January 1, 1991, issued by the governments of Puerto Rico, Guam and the Virgin Islands is subject to tax.

Gains or losses from the sale or other disposition of any bonds shall be taxable for state franchise tax purposes.

Interest received on federal tax refunds is taxable for Iowa franchise tax purposes.

This rule is intended to implement Iowa Code section 422.61.

701—59.6(422) Interest and dividends from foreign securities and securities of states and other political subdivisions. Interest and dividends from foreign securities and securities of states and their political subdivisions including Iowa shall be included in taxable income for periods beginning on or after January 1, 1980. For tax periods beginning on or after January 1, 1987, subtract interest expense allocable to interest exempt from federal income tax which was disallowed as a deduction under Internal Revenue Code Section 265(b) or 291(e)(1)(B).

For tax years beginning on or after January 1, 1987, add dividends received from regulated investment companies exempt from federal income tax under Section 852(b)(5) of the Internal Revenue Code and subtract the loss on the sale or exchange of a share of a regulated investment company held for six months or less to the extent the loss was disallowed under Section 852(b)(4)(B) of the Internal Revenue Code.

For tax years beginning on or after January 1, 2001, add, to the extent not already included, income from the sale of obligations of the state of Iowa and its political subdivisions and interest and dividend income from these obligations. Gains or losses from the sale or other disposition of bonds issued by the state of Iowa or its political subdivisions, along with interest and dividend income from these bonds, shall be included in Iowa taxable income unless the law authorizing these obligations specifically exempts the income from the sale and interest and dividend income from Iowa franchise tax.

This rule is intended to implement Iowa Code sections 422.35 and 422.61 as amended by 2001 Iowa Acts, House File 715.

701—59.7(422) Safe harbor leases. For tax years ending after January 1, 1981, deductions in determining federal taxable income for sale-leaseback agreements taken as a result of the application of Section 168(f)(8) of the Internal Revenue Code shall be added in determining Iowa taxable income to the extent such deductions cannot be taken under provisions of Sections 162, 163 and 167 of the Internal Revenue Code. The lessor shall add depreciation and interest expense, and the lessee shall add rental expense. When the deduction for depreciation is not allowed under a previous provision of this rule, the lessee shall be allowed a deduction for depreciation on any property involved in a sale-leaseback agreement. The depreciation shall be computed in accordance with Section 168(a) of the Internal Revenue Code. Income received as a result of sale-leaseback agreement shall be deducted in determining Iowa taxable income. The lessee shall deduct interest income and the lessor shall deduct rent income. Each lessor and lessee corporation shall include a copy of federal Form 6793 in its Iowa franchise tax return for the year in which a safe harbor lease is entered into.

This rule is intended to implement Iowa Code sections 422.35 and 422.61.

701—59.8(422) Additional deduction for wages paid or accrued for work done in Iowa by certain individuals. For tax years beginning on or after January 1, 1984, a taxpayer which is considered to be a small business corporation, as defined by subrule 59.8(2), is allowed a deduction for 50 percent of the first 12 months of wages paid or accrued during the tax years for work done in Iowa for employees first hired on or after January 1, 1984.

A handicapped individual domiciled in this state at the time of hiring.

An individual domiciled in this state at the time of hiring who meets any of the following conditions:

1. Has been convicted of a felony in this or any other state or the District of Columbia.
2. Is on parole pursuant to Iowa Code chapter 906.
3. Is on probation pursuant to Iowa Code chapter 907 for an offense other than a simple misdemeanor.
4. Is in a work release program pursuant to Iowa Code chapter 904, division IX.

An individual, whether or not domiciled in this state at the time of the hiring, who is on parole or probation and to whom the interstate probation and parole compact under Iowa Code section 907A.1 applies.

For tax years beginning on or after January 1, 1989, a taxpayer which is considered to be a small business corporation, as defined by 701—subrule 53.11(2), is allowed a deduction for 65 percent not to exceed \$20,000 of the 12 months of wages paid or accrued during the tax year for work done in Iowa for employees first hired after January 1, 1989, who meet the above criteria.

59.8(1) The additional deduction shall not be allowed for wages paid to an individual who was hired to replace an individual whose employment was terminated within the 12-month period preceding the date of first employment. However, if the individual being replaced left employment voluntarily without good cause attributable to the employer or if the individual was discharged for misconduct in connection with the individual's employment as determined by the division of job service of the department of employment services, the additional deduction shall be allowed.

The determination of whether an individual left employment voluntarily without good cause attributable to the employer or if the individual was discharged for misconduct is a factual determination which must be made on a case-by-case basis.

59.8(2) The term "small business corporation" includes the operation of a farm but does not include the practice of a profession. The following conditions apply for the purpose of determining what constitutes a small business corporation.

a. A small business corporation shall not have had more than 20 full-time equivalent positions during each of the 26 consecutive weeks within the 52-week period immediately preceding the date on which the individual for whom an additional deduction for wages is taken was hired. "Full-time equivalent position" means any of the following:

1. An employment position requiring an average work week of 40 or more hours;
2. An employment position for which compensation is paid on a salaried full-time basis without regard to hours worked; or
3. An aggregation of any number of part-time positions which equal one full-time position. For purposes of this subrule each part-time position shall be categorized with regard to the average number of hours worked each week as a one-quarter, half, three-quarter, or full-time position, as set forth in the following table:

<u>Average Number of Weekly Hours</u>	<u>Category</u>
More than 0 but less than 15	¼
15 or more but less than 25	½
25 or more but less than 35	¾
35 or more	1 (full-time)

b. A small business corporation shall not have more than \$1 million in annual gross revenues or after July 1, 1984, \$3 million in annual gross revenues or as the average of the three preceding tax years. "Annual gross revenues" means total interest received from loans and investments, service charges, management fees, fiduciary fees, commissions, and gross proceeds from the sale of securities held as investments as determined in accordance with generally accepted accounting principles.

c. A small business corporation shall not be an affiliate or subsidiary of a business which is dominant in its field of operation. "Dominant in its field of operation" means having more than 20 full-time equivalent employees and more than \$1 million of annual gross revenues, or after July 1, 1984, \$3 million of annual gross revenues or as the average of the three preceding tax years. "Affiliate

or subsidiary of a business dominant in its field of operations” means a business which is at least 20 percent owned by a business dominant in its field of operation, or by partners, officers, directors, majority stockholders, or their equivalent, of a business dominant in that field of operation.

d. “Operation of a farm” means the cultivation of land for the production of agricultural crops, the raising of poultry, the production of eggs, the production of milk, the production of fruit or other horticultural crops, grazing or the production of livestock. Operation of a farm shall not include the production of timber, forest products, nursery products, or sod and operation of a farm shall not include a contract where a processor or distributor of farm products or supplies provides spraying, harvesting or other farm services.

e. “The practice of a profession” means a vocation requiring specialized knowledge and preparation including but not limited to the following: medicine and surgery, podiatry, osteopathy, osteopathic medicine and surgery, psychology, psychiatry, chiropractic, nursing, dentistry, dental hygiene, optometry, speech pathology, audiology, pharmacy, physical therapy, occupational therapy, mortuary science, law, architecture, engineering and surveying, and accounting.

59.8(3) Definitions.

a. The term “*handicapped person*” means any person who has a physical or mental impairment which substantially limits one or more major life activities, has a record of such impairment, or is regarded as having such an impairment.

The term “*handicapped*” does not include any person who is an alcoholic or drug abuser whose current use of alcohol or drugs prevents the person from performing the duties of employment or whose employment, by reason of current use of alcohol or drugs, would constitute a direct threat to the property or the safety of others.

b. The term “*physical or mental impairment*” means any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive; digestive; genitourinary; hemic and lymphatic; skin and endocrine; or any mental or psychological disorder, such as intellectual disability, organic brain syndrome, emotional or mental illness, and specific learning disabilities.

c. The term “*major life activities*” means functions such as caring for one’s self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

d. The term “*has a record of such impairment*” means has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activities.

e. The term “*is regarded as having such an impairment*” means:

1. Has a physical or mental impairment that does not substantially limit major life activities but that is perceived as constituting such a limitation;

2. Has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairment; or

3. Has none of the impairments defined as physical or mental impairments, but is perceived as having such an impairment.

f. The term “*successfully completing a probationary period*” includes those instances where the employee quits without good cause attributable to the employer during the probationary period or was discharged for misconduct during the probationary period.

g. The term “*probationary period*” means the period of probation for newly hired employees, if the employer has a written probationary policy. If the employer has no written probationary policy for newly hired employees, the probationary period shall be considered to be six months from the date of hire.

59.8(4) If a newly hired employee has been certified as either a vocational rehabilitation referral or an economically disadvantaged ex-convict for purposes of qualification for the targeted jobs tax credit under Section 59 of the Internal Revenue Code, that employee shall be considered to have met the qualifications for the additional wage deduction.

A “vocational rehabilitation referral” is any individual certified by a state employment agency as having a physical or mental disability which, for the individual, constitutes or results in a substantial

handicap to employment. In addition, the individual must have been referred to the employer after completion or while receiving rehabilitation services pursuant to either a state- or federal-approved vocational rehabilitation program.

For all other newly hired employees, the employer has the burden of proof to show that the employees meet the qualifications for the additional wage deduction.

59.8(5) The taxpayer shall include a schedule with the filing of the taxpayer's tax return showing the name, address, social security number, date of hiring and wages paid of each employee for whom the taxpayer claims the additional deduction for wages.

59.8(6) If the employee for whom an additional deduction for wages was allowed fails to successfully complete a probationary period and the taxpayer has already filed an Iowa corporation income tax return taking the additional deduction for wages, the taxpayer shall file an amended return adding back the additional deduction for wages. The amended return shall state the name and social security number of the employee who failed to successfully complete a probationary period.

59.8(7) For tax years ending after July 1, 1990, a taxpayer who did not qualify for the additional deduction for wages paid or accrued for work done in Iowa by certain individuals set forth above is allowed an additional deduction of 65 percent not to exceed \$20,000 of the first 12 months of wages paid or accrued for work done in Iowa for employees first hired on or after July 1, 1990, if the new employee is:

a. An individual domiciled in this state at the time of the hiring who meets any of the following conditions:

- (1) Has been convicted of a felony in this or any other state or the District of Columbia.
- (2) Is on parole pursuant to Iowa Code chapter 906.
- (3) Is on probation pursuant to Iowa Code chapter 907, for an offense other than a simple misdemeanor.
- (4) Is in a work release program pursuant to Iowa Code chapter 904, division IX.

b. An individual, whether or not domiciled in this state at the time of the hiring, who is on parole or probation and to whom the interstate probation and parole compact under Iowa Code section 907A.1 applies.

The additional deduction is not allowed for wages paid to an individual who was hired to replace an individual whose employment was terminated within the 12-month period preceding the date of first employment. However, if the individual being replaced left employment voluntarily without good cause attributable to the employer or if the individual was discharged for misconduct in connection with the individual's employment as determined by the Iowa division of job service of the department of employment services, the additional deduction is allowed.

The taxpayer must include a schedule with the filing of the taxpayer's tax return showing the name, address, social security number, date of hiring, and wages paid of each employee for whom the taxpayer claims the additional deduction for wages.

The determination of whether an individual left employment voluntarily without good cause attributable to the employer or if the individual was discharged for misconduct is a factual determination which must be made on a case-by-case basis.

If the employee for which an additional deduction for wages was allowed fails to successfully complete a probationary period and the taxpayer has already filed an Iowa franchise tax return taking the additional deduction for wages, the taxpayer must file an amended return adding back the additional deduction for wages. The amended return must state the name and social security number of the employee who failed to successfully complete a probationary period.

This rule is intended to implement Iowa Code section 16.1 and 2011 Iowa Code Supplement section 422.35 as amended by 2012 Iowa Acts, Senate File 2247.

[ARC 0337C, IAB 9/19/12, effective 10/24/12]

701—59.9(422) Work opportunity tax credit. Where a financial institution claims the federal work opportunity tax credit as provided in Section 51 of the Internal Revenue Code, the amount of credit

allowable shall be a deduction from Iowa taxable income to the extent the credit increased federal taxable income.

This rule is intended to implement Iowa Code sections 422.35 and 422.61.

701—59.10(422) Work incentive program credit. Rescinded IAB 3/15/95, effective 4/19/95.

701—59.11(422) Gains and losses on property acquired before January 1, 1934. Where property was acquired prior to January 1, 1934, the basis as of January 1, 1934, for determining capital or other gains or losses is the higher of cost, adjusted for depreciation allowed or allowable to January 1, 1934, or fair market value as of that date. *City National Bank of Clinton v. Iowa State Tax Commission*, 251 Iowa 603, 102 N.W.2d 381 (1960).

If as a result of this provision a basis is to be used for purposes of Iowa franchise tax which is different from the basis used for purposes of federal income tax, an appropriate adjustment must be made and detailed schedules supplied in the computation of Iowa income subject to franchise tax.

This rule is intended to implement Iowa Code sections 422.35 and 422.61.

701—59.12(422) Federal income tax deduction. For tax years beginning on or after January 1, 1980, a deduction for 50 percent of federal income taxes paid or accrued is not allowed. Cash-basis taxpayers are not allowed a deduction for 50 percent of federal income taxes paid during a tax year beginning on or after January 1, 1980, which represent the preceding year's tax or additional taxes for prior years. Fifty percent of a federal income tax refund received during a tax year beginning on or after January 1, 1980, shall not be reported as income. For tax years beginning on or after January 1, 1990, because the federal environmental tax is deducted in computing federal taxable income and Iowa Code section 422.61(3) "a" does not allow the deduction of federal income taxes, the federal environmental tax must be added to federal taxable income.

This rule is intended to implement Iowa Code sections 422.35 and 422.61.

701—59.13(422) Iowa franchise taxes. Iowa franchise taxes paid or accrued during the tax year as may be applicable under the method of filing are permissible deductions for federal corporation income tax purposes, but not for purposes of determining Iowa net income. To the extent taxes were deducted in the determination of federal taxable income, they shall be added to federal taxable income for Iowa franchise tax purposes. Refunds of Iowa franchise tax to the extent that the returns are included in the determination of federal taxable income shall all be subtracted from federal taxable income.

This rule is intended to implement Iowa Code section 422.61.

701—59.14(422) Method of accounting, accounting period. The return shall be computed on the same basis and for the same accounting period as the taxpayer's return for federal corporation income tax purposes. Permission to change accounting methods or accounting periods for franchise tax purposes is not required provided the taxpayer furnishes the department with a copy of the federal consent.

This rule is intended to implement Iowa Code sections 422.35 and 422.61.

701—59.15(422) Consolidated returns. There is no provision in the Iowa franchise tax law to allow financial institutions to file consolidated Iowa franchise tax returns with another financial institution or another corporation as defined in Iowa Code section 422.32. In the absence of any statutory authority for allowing consolidated Iowa franchise tax returns, separate Iowa franchise tax returns must be filed.

This rule is intended to implement Iowa Code sections 421.14 and 422.68(1).

701—59.16(422) Federal rulings and regulations. In determining whether "taxable income," "net operating loss deduction" or any other deductions are computed for federal tax purposes under, or have the same meaning as provided by, the Internal Revenue Code, the department will use applicable rulings and regulations that have been duly promulgated by the Commissioner of Internal Revenue, unless the director has created rules and regulations or has exercised discretionary powers as prescribed by statute which call for an alternative method for determining "taxable income," "net operating loss deduction,"

or any other deductions, or unless the department finds that an applicable Internal Revenue ruling or regulation is unauthorized according to the Iowa Code.

This rule is intended to implement Iowa Code sections 422.35 and 422.61.

701—59.17(15E,422) Charitable contributions relating to the endow Iowa tax credit. For tax years beginning on or after January 1, 2010, a taxpayer who claims an endow Iowa tax credit in accordance with rule 701—58.13(15E,422) cannot claim a deduction for charitable contributions under Section 170 of the Internal Revenue Code for the amount of the contribution for which the tax credit is claimed for Iowa tax purposes.

This rule is intended to implement Iowa Code section 15E.305.
[ARC 1303C, IAB 2/5/14, effective 3/12/14]

701—59.18(422) Depreciation of speculative shell buildings.

59.18(1) For tax years beginning on or after July 1, 1992, speculative shell buildings constructed or reconstructed after that date may be depreciated as 15-year property under the accelerated cost of recovery system of the Internal Revenue Code. If the taxpayer has deducted depreciation on the speculative shell building on the taxpayer's federal income tax return, that amount of depreciation must be added to federal taxable income in order to deduct depreciation under this rule.

59.18(2) On sale or other disposition of the speculative shell building, the taxpayer must report on the taxpayer's Iowa corporation income tax return the same gain or loss reported on the taxpayer's federal corporation income tax return. If, while owned by the taxpayer, the building is converted from a speculative shell building to another use, the taxpayer must deduct the same amount of depreciation on the taxpayer's Iowa tax return as is deducted on the taxpayer's federal tax return.

59.18(3) For the purposes of this rule, the term "speculative shell building" means a building as defined in Iowa Code section 427.1, subsection (27) "c."

This rule is intended to implement Iowa Code sections 422.35 and 422.63.

701—59.19(422) Deduction of multipurpose vehicle registration fee. For tax years beginning on or after January 1, 1992, and before January 1, 2005, corporations may claim a deduction for 60 percent of the amount of the registration fee paid for a multipurpose vehicle under Iowa Code section 321.124, subsection 3, paragraph "h." In order to qualify for this deduction, no part of the multipurpose vehicle registration fee may have been deducted as an ordinary and necessary business expense.

For tax years beginning on or after January 1, 2005, the deduction for Iowa franchise tax for multipurpose vehicle registration fees is the same as allowed under Section 164 of the Internal Revenue Code for federal tax purposes.

This rule is intended to implement Iowa Code section 422.35.

701—59.20(422) Disallowance of expenses to carry an investment subsidiary for tax years which begin on or after January 1, 1995. A financial institution which has an investment in an investment subsidiary on or after July 1, 1995, must allocate a portion of its total expenses used in computing its federal taxable income on a separate return basis to its investment subsidiary. The expenses which are allocable to the investment in an investment subsidiary are computed by multiplying the financial institution's total expenses used in computing its federal taxable income on a separate return basis by the ratio of the average adjusted basis in its investment subsidiary to the average adjusted basis for all assets of the financial institution. For tax years beginning on or after January 1, 1995, and before December 31, 1995, a financial institution which has an investment in an investment subsidiary on July 1, 1995, must allocate a portion of its total expenses for the entire tax year to its investment in an investment subsidiary even though it did not have an investment in an investment subsidiary for the entire tax year.

A calculation of the average for the tax year of the adjusted bases of a financial institution's investment in investment subsidiaries, and total assets, held each day of the tax year is the most accurate method for determining under Iowa Code subsection 422.61(3) the portion of a financial institution's total expenses that is allocable to the financial institution's investment in investment subsidiaries. However, the department will generally allow the average adjusted bases of an investment in investment

subsidiaries for the tax year to be calculated using the average of the adjusted bases of the investment in investment subsidiaries held by the financial institution at the end of each month within the tax year. The department generally will allow the average bases of all assets of the financial institution for the tax year to be calculated using the average bases of all assets held by the financial institution at the end of each quarter of the tax year. A financial institution may compute for any tax year, without prior permission of the director, the average adjusted bases of investment in investment subsidiaries or total assets on a more frequent basis than set forth above. However, a financial institution may not compute these averages for any tax year on a less frequent basis than quarterly without obtaining prior approval of the director. This permission will be granted only in extraordinary circumstances. In addition, a financial institution may not compute these averages for any tax year on a less frequent basis than it used for the preceding tax year unless the financial institution obtains prior approval of the director. A financial institution that has elected to use an estimate of the adjusted tax bases of its total assets for each of the first three quarters of the taxable year under Internal Revenue Service's Revenue Ruling 90-44 for federal income tax purposes may use this estimate for Iowa franchise purposes.

59.20(1) For the purposes of this rule, the term "affiliate" means a corporation, trust, estate, association, or similar organization:

a. Of which a financial institution, directly or indirectly, owns or controls either a majority of the voting shares or more than 50 percent of the number of shares voted for the election of its directors, trustees, or other individuals exercising similar functions at the preceding election, or controls in any manner the election of a majority of its directors, trustees, or other individuals exercising similar functions; or

b. Of which control is held, directly or indirectly, through share ownership or in any other manner, by the shareholders of a financial institution who own or control either a majority of the shares of such financial institution or more than 50 percent of the number of shares voted for election of directors of such financial institution at the preceding election, or by trustees for the benefit of the shareholders of such financial institution; or

c. Of which a majority of its directors, trustees, or other individuals exercising similar functions are directors of any financial institution; or

d. Which owns or controls, directly or indirectly, either a majority of the voting shares of a financial institution or more than 50 percent of the number of shares voted for the election of directors of a financial institution at the preceding election, or controls in any manner the election of a majority of the directors of a financial institution, or for the benefit of those shareholders or members all or substantially all of the outstanding voting shares of a financial institution is held by trustees; or

e. Which is a bank holding company, as defined by the laws of the United States, of which a financial institution is a subsidiary, and any other subsidiary as defined by the laws of the United States, of a bank holding company.

59.20(2) For the purposes of this rule, the term "average adjusted basis" means the financial institution's average adjusted basis as computed pursuant to Section 1016 of the Internal Revenue Code on a separate company basis.

59.20(3) For purposes of this rule, the term "investment subsidiary" means an affiliate that is owned, capitalized or utilized by a financial institution with one of its purposes being to make, hold, or manage, for and on behalf of the financial institution, investments in securities which the financial institution would be permitted by applicable law to make for its own account.

This rule is intended to implement Iowa Code section 422.61 as amended by 1995 Iowa Acts, chapter 193.

701—59.21(422) S corporation and limited liability company financial institutions. For tax years beginning on or after January 1, 1997, a financial institution as defined in Section 581 of the Internal Revenue Code which has in effect an election under Subchapter S of the Internal Revenue Code must compute an amount of income as if the financial institution were subject to federal corporation income tax. For tax years beginning on or after July 1, 2004, a financial institution organized as a limited liability company under Iowa Code chapter 524 that is taxed as a partnership for federal income tax purposes must

compute an amount of income as if the financial institution were subject to federal corporation income tax. The income is to be computed in the same manner as a financial institution that is subject to or liable for federal income tax under the Internal Revenue Code in effect for the applicable tax would compute its federal taxable income.

This rule is intended to implement Iowa Code section 422.61 as amended by 2004 Iowa Acts, House File 2484.

701—59.22(422) Deduction for contributions made to the endowment fund of the Iowa educational savings plan trust. To the extent that the contribution was not deductible for federal income tax purposes, any gift, grant, or donation to the endowment fund of the Iowa educational savings plan trust may be deducted for Iowa franchise tax purposes. The contribution must be made on or after July 1, 1998, but before April 15, 2004. Effective April 15, 2004, the deduction for contributions made to the endowment fund is repealed.

This rule is intended to implement Iowa Code sections 422.35 as amended by 1998 Iowa Acts, House File 2119, and 422.61.

701—59.23(422) Additional first-year depreciation allowance.

59.23(1) *Assets acquired after September 10, 2001, but before May 6, 2003.* For tax periods ending after September 10, 2001, but beginning before May 6, 2003, the additional first-year depreciation allowance (“bonus depreciation”) of 30 percent authorized in Section 168(k) of the Internal Revenue Code, as enacted by Public Law No. 107-147, Section 101, does not apply for Iowa franchise tax. Taxpayers who claim the bonus depreciation on their federal income tax return must add the total amount of depreciation claimed on assets acquired after September 10, 2001, but before May 6, 2003, and subtract the amount of depreciation taken on such property using the modified accelerated cost recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(k).

If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets.

The adjustment for both depreciation and the gain or loss on the sale of qualifying assets acquired after September 10, 2001, but before May 6, 2003, can be calculated on Form IA 4562A.

See 701—subrule 53.22(1) for examples illustrating how this subrule is applied.

59.23(2) *Assets acquired after May 5, 2003, but before January 1, 2005.* For tax periods beginning after May 5, 2003, but beginning before January 1, 2005, the bonus depreciation of 50 percent authorized in Section 168(k) of the Internal Revenue Code, as amended by Public Law No. 108-27, Section 201, may be taken for Iowa franchise tax. If the taxpayer elects to take the 50 percent bonus depreciation, the depreciation deduction allowed on the Iowa franchise tax return is the same as the depreciation deduction allowed on the federal income tax return for assets acquired after May 5, 2003, but before January 1, 2005.

a. If the taxpayer elects to take the 50 percent bonus depreciation and had filed an Iowa return prior to February 24, 2005, which reflected the disallowance of 50 percent bonus depreciation, the taxpayer may choose between two options to reflect this change. Taxpayer may either file an amended return for the applicable tax year to reflect the 50 percent bonus depreciation provision, or taxpayer may reflect the change for 50 percent bonus depreciation on the next Iowa return filed subsequent to February 23, 2005. Taxpayer must choose only one of these two options. Regardless of the option chosen, taxpayer must complete and attach a revised Form IA 4562A to either the amended return or the return filed subsequent to February 23, 2005.

See 701—subrule 40.60(2), paragraph “a,” for examples illustrating how this subrule is applied.

b. If the taxpayer elects not to take the 50 percent bonus depreciation, taxpayer must add the total amount of depreciation claimed on assets acquired after May 5, 2003, but before January 1, 2005, and subtract the amount of depreciation taken on such property using the modified accelerated cost

recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(k). If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets. The adjustment for both depreciation and the gain or loss on the sale of qualifying assets acquired after May 5, 2003, but before January 1, 2005, can be calculated on Form IA 4562A.

59.23(3) *Assets acquired after December 31, 2007, but before January 1, 2010.* For tax periods beginning after December 31, 2007, but beginning before January 1, 2010, the bonus depreciation of 50 percent authorized in Section 168(k) of the Internal Revenue Code, as amended by Public Law 110-185, Section 103, and Public Law 111-5, Section 1201, does not apply for Iowa franchise tax. Taxpayers who claim the bonus depreciation on their federal income tax return must add the total amount of depreciation claimed on assets acquired after December 31, 2007, but before January 1, 2010, and subtract the amount of depreciation taken on such property using the modified accelerated cost recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(k).

If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets.

The adjustment for both depreciation and the gain or loss on the sale of qualifying assets acquired after December 31, 2007, but before January 1, 2010, can be calculated on Form IA 4562A.

See rule 701—53.22(422) for examples illustrating how this rule is applied.

59.23(4) *Qualified disaster assistance property.* For property placed in service after December 31, 2007, with respect to federal declared disasters occurring before January 1, 2010, the bonus depreciation of 50 percent authorized in Section 168(n) of the Internal Revenue Code for qualified disaster assistance property, as amended by Public Law 110-343, Section 710, does not apply for Iowa franchise tax. Taxpayers who claim the bonus depreciation on their federal income tax return must add the total amount of depreciation claimed on qualified disaster assistance property and subtract the amount of depreciation taken on such property using the modified accelerated cost recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(n).

If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of this property for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of such property.

The adjustment for both depreciation and the gain or loss on the sale of qualifying disaster assistance property can be calculated on Form IA 4562A.

59.23(5) *Assets acquired after December 31, 2009, but before January 1, 2014.* For tax periods beginning after December 31, 2009, but beginning before January 1, 2014, the bonus depreciation authorized in Section 168(k) of the Internal Revenue Code, as amended by Public Law No. 111-240, Section 2022, Public Law No. 111-312, Section 401, and Public Law No. 112-240, Section 331, does not apply for Iowa franchise tax. Taxpayers who claim the bonus depreciation on their federal income tax return must add the total amount of depreciation claimed on assets acquired after December 31, 2009, but before January 1, 2014, and subtract the amount of depreciation taken on such property using the modified accelerated cost recovery system (MACRS) depreciation method applicable under Section 168 of the Internal Revenue Code without regard to Section 168(k).

If any such property was sold or disposed of during the tax year, the applicable depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets.

The adjustment for both depreciation and the gain or loss on the sale of qualifying assets acquired after December 31, 2009, but before January 1, 2014, can be calculated on Form IA 4562A.

See 701—subrule 53.22(3) for examples illustrating how this subrule is applied.

This rule is intended to implement Iowa Code section 422.35 as amended by 2013 Iowa Acts, Senate File 106, and section 422.61.

[ARC 8589B, IAB 3/10/10, effective 4/14/10; ARC 9820B, IAB 11/2/11, effective 12/7/11; ARC 1101C, IAB 10/16/13, effective 11/20/13]

701—59.24(422) Section 179 expensing. For tax periods beginning on or after January 1, 2003, but beginning before January 1, 2006, the increase in the expensing allowance for qualifying property authorized in Section 179(b) of the Internal Revenue Code, as enacted by Public Law No. 108-27, Section 202, may be taken for Iowa franchise tax. If the taxpayer elects to take the increased Section 179 expensing, the Section 179 expensing allowance on the Iowa franchise tax return is the same as the Section 179 expensing allowance on the federal income tax return for tax years beginning on or after January 1, 2003, but beginning before January 1, 2006. In addition, for tax periods beginning on or after January 1, 2008, but beginning before January 1, 2009, the increase in the expensing allowance for qualifying property authorized in Section 179(b) of the Internal Revenue Code, as enacted by Public Law No. 110-185, Section 102, may be taken for Iowa franchise tax. For tax periods beginning on or after January 1, 2009, but beginning before January 1, 2010, the increase in the expensing allowance for qualifying property authorized in Section 179(b) of the Internal Revenue Code, as enacted by Public Law No. 111-5, Section 1202, cannot be taken for Iowa franchise tax purposes. The maximum amount of Section 179 expensing allowed for tax periods beginning on or after January 1, 2009, but beginning before January 1, 2010, is \$133,000 for Iowa franchise tax purposes. For tax years beginning on or after January 1, 2010, the increase in the expensing allowance for qualifying property authorized in Section 179(b) of the Internal Revenue Code, as enacted by Public Law No. 111-240, Section 2021, Public Law No. 111-312, Section 402, and Public Law No. 112-240, Section 315, may be taken for Iowa franchise tax.

59.24(1) If the taxpayer elects to take the increased Section 179 expensing and had filed an Iowa return prior to February 24, 2005, which reflected the disallowance of increased Section 179 expensing, the taxpayer may choose between two options to reflect this change. Taxpayer may either file an amended return for the applicable tax year to reflect the increased Section 179 expensing, or taxpayer may reflect the change for increased Section 179 expensing on the next Iowa return filed subsequent to February 23, 2005. Taxpayer must choose only one of these two options. Regardless of the option chosen, taxpayer must complete and attach a revised Form IA 4562A to either the amended return or the return filed subsequent to February 23, 2005.

See 701—subrule 40.65(1) for examples illustrating how this subrule is applied.

59.24(2) If the taxpayer elects not to take the increased Section 179 expensing, the expensing allowance is limited to \$25,000 for Iowa tax purposes. The difference between the federal Section 179 expensing allowance on such property, if in excess of \$25,000, and the Iowa expensing allowance of \$25,000 can be depreciated using the modified accelerated cost recovery system (MACRS) applicable under Section 168 of the Internal Revenue Code without regard to the bonus depreciation provision in Section 168(k).

If any such property was sold or disposed of during the tax year, the applicable Section 179 and related depreciation catch-up adjustment must be made to adjust the basis of the property for Iowa tax purposes. The gain or loss reported on the sale or disposition of these assets for federal tax purposes must be adjusted for Iowa tax purposes to account for the adjusted basis of assets.

The adjustment for both the Section 179 expensing allowance and related depreciation, along with the gain or loss on the sale of qualifying assets for tax years beginning on or after January 1, 2003, but beginning before January 1, 2006, can be calculated on Form IA 4562A.

See 701—subrule 53.23(2) for examples illustrating how this subrule is applied.

59.24(3) Special filing provision for 2010 change. Taxpayers who did not claim the increased Section 179 expensing on their tax return for the period beginning on or after January 1, 2010, but

before January 1, 2011, as originally filed have two options to reflect this adjustment. Taxpayer may either file an amended return for the applicable tax year to reflect this adjustment, or taxpayer may reflect this adjustment on the next tax return. If the taxpayer elects to reflect this adjustment on the next tax return, the limitation based on income provisions and regulations of Section 179(b)(3) of the Internal Revenue Code is suspended related to the claiming of the adjustment for the next tax year.

EXAMPLE: Taxpayer claimed a \$150,000 Section 179 expense on the federal return for the period ending December 31, 2010. Taxpayer only claimed a \$134,000 Section 179 expense on the Iowa return as originally filed for the period ending December 31, 2010. Taxpayer elects not to file an amended return for the period ending December 31, 2010, but to make the adjustment on the Iowa return for the period ending December 31, 2011. Taxpayer reported a loss on the federal return for the period ending December 31, 2011; therefore, no Section 179 expense can be claimed on the federal return for the period ending December 31, 2011, in accordance with Section 179(b)(3) of the Internal Revenue Code. Taxpayer can claim the \$16,000 (\$150,000 less \$134,000) difference as a deduction on the Iowa return for the period ending December 31, 2011, since the income provision of Section 179(b)(3) is suspended for Iowa tax purposes.

This rule is intended to implement Iowa Code section 422.35 as amended by 2013 Iowa Acts, Senate File 106, and section 422.61.

[ARC 9103B, IAB 9/22/10, effective 10/27/10; ARC 9820B, IAB 11/2/11, effective 12/7/11; ARC 1101C, IAB 10/16/13, effective 11/20/13]

ALLOCATION AND APPORTIONMENT

701—59.25(422) Basis of franchise tax. Iowa Code section 422.60 imposes a franchise tax on financial institutions (as defined in 701—subrule 57.1(2)) for the privilege of doing business within the state. The tax is measured by net income. For financial institutions subject to the tax, the tax is levied and collected only on income which may accrue or be recognized to the financial institutions from business done or carried on in the state plus net income from certain sources without the state which by rule follows the commercial domicile of the financial institution.

If a financial institution carries on business entirely within the state of Iowa, no allocation or apportionment of its income may be made. The financial institution will be presumed to be carrying on its business entirely within the state of Iowa if its activities are carried on only within Iowa, even though it receives income from sources outside the state in the form of interest, dividends, royalties, and other sources of income from intangibles.

59.25(1) Definition—doing business. The term “doing business” is used in a comprehensive sense and includes all activities or any transactions for the purpose of financial or pecuniary gain or profit. Irrespective of the nature of its activities, every financial institution organized for profit and carrying out any of the purposes of its organization shall be deemed to be “doing business.” In determining whether a financial institution is doing business, it is immaterial whether its activities actually result in a profit or loss.

59.25(2) Definition—carrying on business partly within and partly without the state. “Carrying on business partly within and partly without the state” means having business activities in at least one other state sufficient to meet the minimum constitutional standards for doing business in a state under the due process and commerce clauses of the United States Constitution. The determination of whether a financial institution is carrying on business partly within and partly without the state must be made on a tax-year-by-tax-year basis. The activities of past or future years have no bearing on the current year.

The following nonexclusive activities if done on a regular and continuing basis by financial institution officers or employees in at least one other state would constitute the minimum activities which would meet the constitutional standards for doing business in a state under the due process and commerce clauses of the United States Constitution:

- a. Solicitation of loans by traveling loan officers.
- b. Collection of overdue accounts.

c. Any other activities carried on in advancement, promotion, or fulfillment of the business of the financial institution.

This rule is intended to implement Iowa Code sections 422.60 and 422.63.

701—59.26(422) Allocation and apportionment.

59.26(1) The classification of income by the labels customarily given, such as interest, dividends, rents, and royalties, is of no aid in determining whether that income is business or nonbusiness income. Interest, dividends, rents and royalties shall be apportioned as business income to the extent the income was earned as a part of a financial institution's unitary business, a portion of which is conducted in Iowa. *Mobil Oil Corp. v. Commissioner of Taxes*, 455 U.S. 425 (1980); *ASARCO, Inc. v. Idaho State Tax Commission*, 458 U.S. 307, 73 L.Ed.2d 787, 102 S.Ct. 3103 (1982); *F. W. Woolworth Co. v. Taxation and Revenue Dept.*, 458 U.S. 354, 73 L.Ed.2d 819, 102 S.Ct. 3128 (1982); *Container Corporation of America v. Franchise Tax Board*, 463 U.S. 159, 77 L.Ed.2d 545, 103 S.Ct. 2933 (1983). Whether income is part of a financial institution's unitary business income depends upon the facts and circumstances in the particular situation. The burden of proof is upon the taxpayer to show that the treatment of income on the return as filed is proper. There is a rebuttable presumption that an affiliated group of financial institutions in the same line of business have a unitary relationship, although that is not the only element used in determining unitariness.

59.26(2) Application of related expense to nonbusiness income. Subrule 59.26(1) deals with the separation of "net" income, therefore, determination and application of related expenses must be made, as hereinafter directed, before allocation and apportionment within and without Iowa. Related expenses shall mean those expenses directly related.

A directly related expense shall mean an expense which can be specifically attributed to an item of income. Interest expense shall be considered directly related to a specific property which generates, has generated, or could reasonably have been expected to generate gross income if the existence of all of the facts and circumstances described below is established. Such facts and circumstances are as follows:

- a. The indebtedness on which the interest was paid was specifically incurred for the purpose of purchasing, maintaining, or improving the specific property;
- b. The proceeds of the borrowing were actually applied to the specified purpose;
- c. The creditor can look only to the specific property (or any lease or other interest therein) as security for the loan;
- d. It may be reasonably assumed that the return on or from the property will be sufficient to fulfill the terms and conditions of the loan agreement with respect to the amount and timing of payment of principal and interest; and
- e. There are restrictions in the loan agreement on the disposal or use of the property consistent with the assumptions described in "c" and "d" above.

A deduction for interest may not be considered definitely related solely to specific property, even though the above facts and circumstances are present in form, if any of the facts and circumstances are not present in substance. Any expense directly attributable to allocable interest, dividends, rents and royalties shall be deducted from income to arrive at net allocable income.

EXAMPLE: For purposes of this example, it is assumed that the taxpayer has nonbusiness rental income. The taxpayer invests in a 20-story office building. Under the terms of the lease agreements, the taxpayer provides heat, electricity, janitorial services, and maintenance. The taxpayer also pays the property taxes. Construction of the building was funded through borrowings which meet the criteria of a direct expense under the provisions of this paragraph. The directly related expenses to the operation of the property are:

Interest expense	\$1,200,000
Property taxes	500,000
Depreciation	500,000
Electricity	300,000
Heat	200,000
Insurance	150,000
Janitorial services	100,000
Repairs	50,000
Total expenses	<u>\$3,000,000</u>

The directly related expense of the allocable rental income is \$3,000,000.

This rule is intended to implement Iowa Code section 422.63.

701—59.27(422) Net gains and losses from the sale of assets. For purposes of administration of this rule, a capital gain or loss shall mean the sale price or value at the time of disposal of an asset less the adjusted basis, whether reportable as short-term or long-term capital gain or ordinary income for federal income tax purposes.

59.27(1) Gain or loss from the sale, exchange, or other disposition of real or tangible or intangible personal property, if the property while owned by the taxpayer was used in the taxpayer's trade or business, shall be apportioned by the business activity ratio applicable to the year the gain or loss is reported on the federal income tax return and may at the taxpayer's election be included in the computation of the business activity ratio as follows:

a. Gain from the sale, exchange, or other disposition of real property shall be included in the numerator if the property is located in this state.

b. Gain from the sale, exchange, or other disposition of tangible personal property shall be included in the numerator if:

(1) The property has a situs in this state at the time of sale; or

(2) The taxpayer's commercial domicile is in this state and the taxpayer is not taxable in the state in which the property had a situs.

c. Gains from the sale, exchange, or other disposition of intangible personal property shall be included in the numerator if the taxpayer's commercial domicile is in this state.

d. All gains shall be included in the denominator of the activity ratio.

A taxpayer cannot elect to exclude or include gains or loss from the sale of assets where the election would result in an understatement of income reasonably attributable to Iowa. Noninclusive examples of gains or loss from the sale, exchange or other disposition of real or tangible or intangible property which may not be included in the computation of the business activity ratio because to do so would result in an understatement of net income reasonably attributable to Iowa are the gain recognized under an election pursuant to Section 338 of the Internal Revenue Code or gain recognized under Section 631(a) of the Internal Revenue Code.

59.27(2) Gain or loss from the sale, exchange, or other disposition of property not used in the taxpayer's trade or business shall be allocated as follows:

a. Gains or losses from the sale, exchange, or other disposition of real property located in this state are allocable to this state.

b. Gains or losses from the sale, exchange, or other disposition of tangible personal property are allocable to this state if:

(1) The property has a situs in this state at the time of sale; or

(2) The taxpayer's commercial domicile is in this state and the taxpayer is not taxable in the state in which the property had a situs.

c. Gains or losses from the sale, exchange, or other disposition of intangible personal property are allocable to this state if the taxpayer's commercial domicile is in this state.

This rule is intended to implement Iowa Code section 422.63.

701—59.28(422) Apportionment factor. In determining the total net taxable income, the apportionable income attributable to this state, as determined by use of the apportionment fraction, shall be added to the nonapportionable income allocable to this state.

59.28(1) Receipts derived from transactions and activities in the regular course of trade or business which produce business income are included in the denominator of the apportionment factor. Income which is not subject to the Iowa franchise tax shall not be included in the computation of the apportionment factor.

59.28(2) The numerator of the apportionment factor is that portion of the total receipts included in the denominator of the taxpayer attributable to this state during the income year determined as follows:

a. Receipts from the lease, rental, or other use of real property shall be included in the numerator if the real property is located in Iowa.

b. Receipts from the sale of tangible personal property shall be included in the numerator if the property is delivered or shipped to a purchaser in this state regardless of the f.o.b. point or other conditions of the sales.

c. Receipts from the use of tangible personal property shall be included in the numerator of the business activity formula to the extent that property is utilized in Iowa. The extent of utilization of tangible personal property in a state is determined by multiplying the rent by a fraction, the numerator of which is the number of days of physical location of the property in the state during the rental period in the taxable year and the denominator of which is the number of days of physical location of the property everywhere during all rental periods in the taxable year. If the physical location of the property during the rental period is unknown or not ascertainable by the taxpayer, tangible personal property is utilized in the state in which the property was located at the time the rental payer obtained possession.

d. All royalty income from intangible personal property determined to be business income shall be included in the numerator of the business activity formula if the taxpayer's commercial domicile is in Iowa. All royalty income from tangible personal property or real property determined to be business income shall be included in the numerator of the business activity formula if the situs of the tangible personal property or real property is within Iowa.

e. Interest and other receipts from assets in the nature of loans (including federal funds sold and banker's acceptances) and installment obligations shall be attributed to the state where the borrower is located.

f. Interest income from a participating bank's portion of participation loan shall be attributed to the state where the borrower is located.

g. Interest income from loans solicited by traveling loan officers shall be attributed to the state where the borrower is located.

h. Interest or service charges from bank, travel, and entertainment credit card receivables and credit card holders' fees shall be attributed to the state in which the credit card holder resides in the case of an individual or, if a corporation, to the state of the corporation's commercial domicile.

i. Merchant discount income derived from bank and financial corporation credit card holder transactions with a merchant shall be attributed to the state in which the merchant is located. It shall be presumed that the location of the merchant is the address on the invoice submitted by the merchant to the taxpayer.

j. Receipts for the performance of fiduciary services are attributable to the state where the services are principally performed.

k. Receipts from investments of a bank in securities, the income from which constitutes business income, shall be attributed to its commercial domicile except that:

(1) Receipts from securities used to maintain reserves against deposits to meet federal and state reserve deposit requirements shall be attributed to each state based upon the ratio that total deposits in the state bear to total deposits everywhere.

(2) Receipts from securities owned by a bank but held by a state treasurer or other public official or pledged to secure public or trust funds deposited in the bank shall be attributed to the banking office at which the secured deposit is maintained.

l. Receipts (fees or charges) from the issuance of traveler's checks and money orders shall be attributed to the state where the taxpayer's office is located that issued the traveler's checks. If the traveler's checks are issued by an independent representative or agent of the taxpayer, the fees or charges shall be attributed to the state where the independent representative or agent issued the traveler's checks.

m. Fees, commissions, or other compensation for financial services rendered for a customer located in this state or an account maintained within this state.

n. Any other gross receipts resulting from the operation as a financial organization within the state to the extent the items do not represent a recapture of an expense.

o. Receipts from management services if the recipient of the management services is located in this state.

This rule is intended to implement Iowa Code section 422.63.

701—59.29(422) Allocation and apportionment of income in special cases. If a taxpayer feels that the allocation and apportionment method as prescribed by rule 701—59.28(422) in the taxpayer's case results in an injustice, the taxpayer may petition the department for permission to determine the taxable net income, both allocable and apportionable, to the state on some other basis.

The taxpayer must first file the return as prescribed by rule 701—59.28(422) and pay the tax shown due thereon. If a change to some other method is desired, a statement of objections and schedules detailing the alternative method shall be submitted to the department. The department shall require detail and proof within the time as the department may reasonably prescribe. In addition, the alternative method of allocation and apportionment will not be allowed where the taxpayer fails to produce, upon request of the department, any information the department deems necessary to analyze the request for an alternative method of allocation and apportionment. The petition must be in writing and shall set forth in detail the facts upon which the petition is based. The burden of proof will be on the taxpayer as to the validity of the method and its results. The mere fact that an alternative method of apportionment or allocation produces a lesser amount of income attributable to Iowa is, per se, insufficient proof that the statutory method of allocation and apportionment is invalid. *Moorman Manufacturing Company v. Bair*, 437 U.S. 267, 57 L.Ed.2d 197 (1978). In essence, a comparison of the statutory method of apportionment with another formulary apportionment method is insufficient to prove that the taxpayer would be entitled to the alternative formulary apportionment method. *Moorman Manufacturing Company v. Bair*, supra.

One of the possible alternative methods of allocation and apportionment is separate accounting provided the taxpayer's activities in Iowa are not unitary with the taxpayer's activities outside Iowa. Any corporation deriving income from business operations partly within and partly without Iowa must determine that net business income attributable to this state by the prescribed formula for apportioning net income, unless the taxpayer proved by clear and cogent evidence that the statutory formula apportions income to Iowa out of all reasonable proportion to the business transacted within Iowa. *Moorman Manufacturing Company v. Bair*, supra.

Separate accounting is not allowable for a unitary business where the separate accounting method fails to consider factors of profitability resulting from functional integration, centralization of management, and economics of scale. *Shell Oil Company v. Iowa Department of Revenue*, 414 N.W.2d 113 (Iowa 1987).

The burden of proof that the statutory method of apportionment attributes to Iowa income out of all reasonable proportion to the business transacted within Iowa is on the taxpayer. In order to utilize separate accounting, the taxpayer's books and records must be kept in a manner that accurately depicts the exact geographical source of profits. In any petition to utilize separate accounting, the taxpayer must submit schedules which accurately depict net income by division or product line and the amount of income earned within Iowa.

There are alternative methods of separate accounting utilizing different accounting principles. A mere showing that one separate accounting method produces a result substantially different than the

statutory method of apportionment is not sufficient to justify the granting of the separate accounting method shown. The taxpayer must not only show that the separate accounting method advocated by the taxpayer in comparison with the statutory method of apportionment produces a result which, if the statutory method of apportionment were used, would be out of all reasonable proportion to the business transacted within Iowa. The taxpayer must also show that all other conceivable reasonable separate accounting methods would show, when compared with the statutory method of apportionment, that the statutory method of apportionment substantially produces a distorted result.

As used in this rule, “statutory method of apportionment” means the apportionment factor set forth in rule 701—59.28(422).

All requests to use an alternative method of allocation and apportionment submitted to the department will be considered by the compliance division if the request is the result of an audit or by the taxpayer services and policy division if the request is received prior to audit. If the department concludes that the statutory method of allocation and apportionment is, in fact, both inapplicable and inequitable, the department shall prescribe a special method. The special method of allocation and apportionment prescribed by the department may be that requested by the taxpayer or some other method of allocation and apportionment which the department deems to equitably attribute income to business activities carried on within Iowa.

If the taxpayer disagrees with the determination of the department, the taxpayer may file a protest within 60 days of the date of the letter setting forth the department’s determination and the reasons therefor in accordance with rule 701—7.8(17A). The department’s determination letter shall set forth the taxpayer’s rights to protest the department’s determination.

If no protest is filed within the 60-day period, then no hearing will be granted on the department’s determination under this rule. However, this does not preclude the taxpayer from subsequently raising this question in the event that the taxpayer protests an assessment or denial of a timely refund claim, but this issue will only be dealt with for the years involved in the assessment or timely refund claim.

The use of an alternative method of allocation and apportionment would only be applicable to the years under consideration at the time the special method of allocation and apportionment is prescribed. The taxpayer’s continued use of a prescribed method of allocation and apportionment will be subject to review and change within the statutory, or legally extended period(s).

If there is a material change in the business operations or accounting procedures from those in existence at the time the taxpayer was permitted to determine the net income earned within Iowa by an alternative method of allocation and apportionment, the taxpayer shall apprise the department of such changes prior to filing the taxpayer’s return for the current year. After reviewing the information submitted, along with any other information the department deems necessary, the department will notify the taxpayer if the alternative method of allocation and apportionment is deemed applicable.

This rule is intended to implement Iowa Code section 422.63.

CHAPTER 60
ASSESSMENTS, REFUNDS, APPEALS
[Prior to 12/17/86, Revenue Department[730]]

701—60.1(422) Notice of discrepancies.

60.1(1) *Notice of adjustment.* An employee of the department, designated by the director to examine returns and make audits, who discovers discrepancies in returns or learns that the income of the taxpayer may not have been listed, in whole or in part, or that no return was filed when one was due, is authorized to notify the taxpayer of the discovery by ordinary mail. The notice shall not be termed an assessment, and it may inform the taxpayer of the amount due if the information discovered is correct.

60.1(2) *Right of taxpayer upon receipt of notice of adjustment.* A taxpayer who has received notice of an adjustment in connection with a return may pay the additional amount stated to be due. If payment is made, and the taxpayer wishes to contest the matter, the taxpayer should then file claim for refund. However, payment will not be required until assessment has been made (although interest will continue to accrue if payment is not made). If no payment is made, the taxpayer may discuss with the employee who notified the taxpayer of the discrepancy, either in person or through correspondence, all matters of fact and law which the taxpayer considers relevant to the situation. Documents and records supporting the taxpayer's position may be required.

This rule is intended to implement Iowa Code sections 422.25, 422.28 and 422.66.

701—60.2(422) Notice of assessment. If after following the procedure outlined in subrule 60.1(2) no agreement is reached, and the taxpayer does not pay the amount determined to be correct, a notice of assessment shall be sent to the taxpayer by mail. If the period in which the correct amount of tax can be determined is nearly at an end, either a notice of assessment, without compliance with subrules 60.1(1) and 60.1(2), or a jeopardy assessment may be issued. All notices of assessment shall bear the signature of the director.

This rule is intended to implement Iowa Code sections 422.25, 422.30 and 422.66.

701—60.3(422) Refund of overpaid tax. The following are provisions for refunding or crediting to the taxpayer deposits or payments for tax in excess of amounts legally due.

60.3(1) A claim for refund of franchise tax may be made on a form obtainable from the department. Claims for refund should not be mailed in the same envelope or attached to the return. In the case of a claim filed by an agent of the taxpayer, a power of attorney must accompany the claim.

60.3(2) A franchise taxpayer shall not offset a refund or overpayment of tax for one year as a prior payment of tax of a subsequent year on the return of a subsequent year without authorization in writing by the department. The department may, however, apply an overpayment, or a refund otherwise due the taxpayer, to any tax due or to become due from the taxpayer.

60.3(3) When an overpayment of estimated tax is indicated on the face of the return, the overpayment will ordinarily be refunded to the taxpayer by the department without the filing of a formal claim for refund. If a refund of the indicated overpayment is not received within a reasonable period of time, a claim for refund may be filed by the taxpayer on an official form obtainable from the Taxpayer Services Section, Iowa Department of Revenue, P.O. Box 10457, Des Moines, Iowa 50306.

If an overpayment of income tax is claimed as a credit against estimated tax for the succeeding taxable year, such amount shall be considered as a payment of the income tax for the succeeding taxable year and no claim for credit or refund shall be allowed.

When a taxpayer elects to have an overpayment credited to estimated tax for the succeeding year, interest may be properly assessed on a deficiency of income tax for the year in which the overpayment arose. If a taxpayer elects to have all or part of an overpayment shown on the return applied to the estimated income tax for the succeeding taxable year or refunded, the election is binding to the taxpayer.

An overpayment of tax may be used to offset any outstanding tax liability owed by the taxpayer, but once an elected amount is credited as a payment of estimated tax for the succeeding year, it loses its

character as an overpayment for the year in which it arose and thereafter cannot offset any subsequently determined tax liability.

60.3(4) Rescinded IAB 11/24/04, effective 12/29/04.

60.3(5) Refunds—statute of limitations for tax years ending after January 1, 1979. The statute of limitations with respect to which refunds or credits may be claimed is:

a. The later of:

- (1) Three years after the due date of payment upon which refund or credit is claimed; or
- (2) One year after which such payment was actually made.

b. Six months from the date of final disposition of any federal income tax matter with respect to the particular tax year. The taxpayer, however, must have notified the department of the matter within six months after the specified three-year period. The term “matter” includes, but is not limited to, the execution of waivers and commencement of audits. The refund is limited to those matters between the taxpayer and the Internal Revenue Service which affect Iowa taxable income. *Kelly-Springfield Tire Co. v. Iowa State Board of Tax Review*, 414 N.W.2d 113 (Iowa 1987).

c. For federal audits finalized on or after July 1, 1991, the taxpayer must claim a refund or credit within six months of final disposition of any federal income tax matter with respect to the particular tax year regardless when the tax year ended. It is not necessary for the taxpayer to have previously notified the department within the period of limitations specified in 60.3(5)“a”(1) of a matter between the taxpayer and the Internal Revenue Service in order to receive a refund or credit. The term “matter” includes, but is not limited to, the execution of waivers and commencement of audits. The refund or credit is limited to those matters between the taxpayer and the Internal Revenue Service which affect Iowa taxable income. *Kelly-Springfield Tire Co. v. Iowa State Board of Tax Review*, 414 N.W.2d 113 (Iowa 1987).

d. Three years after the due date of the return for the year in which a net operating loss or capital loss occurs, which if carried back results in a reduction of tax in a prior period and an overpayment results.

60.3(6) Rescinded IAB 9/19/12, effective 10/24/12.

60.3(7) Refunds—statute of limitations for taxpayers who paid 90 percent of the tax by the due date and filed the original return in the six-month extended period. If a taxpayer has paid 90 percent of the income tax required to be shown due by the original due date of the return and has filed the original income tax return sometime in the six-month extended period after the original due date, the taxpayer may file an amended return within three years of the extended due date of the return and shall be within the statute of limitations for refund. This position is supported by the Iowa Supreme Court in *Conoco, Inc. v. Iowa Department of Revenue and Finance*, 477 N.W.2d 377 (Iowa 1991). See also 701—subrule 39.2(4) which pertains to the extended period for filing the Iowa income tax return when 90 percent of the tax is paid by the original due date of the Iowa income tax return.

See 701—subrule 55.3(7) for examples illustrating how this rule is applied.

This rule is intended to implement Iowa Code section 422.66 and section 422.73 as amended by 2012 Iowa Acts, Senate File 2328.

[ARC 0337C, IAB 9/19/12, effective 10/24/12]

701—60.4(421) Abatement of tax. For notices of assessment issued on or after January 1, 1995, if the statutory period for appeal has expired, the director may abate any portion of unpaid tax, penalties or interest which the director determines to be erroneous, illegal, or excessive. See rule 701—7.31(421) for procedures on requesting abatement of tax.

This rule is intended to implement Iowa Code section 421.60.

701—60.5(422) Protests. A taxpayer may appeal to the director at any time within 60 days from the date of the notice of the assessment of tax, additional tax, interest or penalties. For assessments issued on or after January 1, 1995, if a taxpayer failed to timely appeal a notice of assessment, the taxpayer may pay the entire assessment and file a refund claim within the period provided by law for filing such claims. In addition, a taxpayer may appeal to the director at any time within 60 days from the date of notice from

the department denying changes in filing methods, denying refund claims, or denying portions of refund claims.

This rule is intended to implement Iowa Code sections 421.10, 421.60 and 422.28.

CHAPTER 61
ESTIMATED TAX FOR FINANCIAL INSTITUTIONS
[Prior to 12/17/86, Revenue Department[730]]

701—61.1(422) Who must pay estimated tax.

61.1(1) General rule. Every corporate taxpayer subject to the franchise tax on financial institutions shall pay estimated tax if the amount of tax payable, less credits, can reasonably be expected to be more than \$1000 for the calendar or fiscal year. The amount of estimated tax paid shall be used as a credit on the Iowa franchise tax return.

61.1(2) Definition. For purposes of this division, “estimated tax” means the amount which the taxpayer estimates to be the tax due and payable under division V of Iowa Code chapter 422.

This rule is intended to implement Iowa Code section 422.85 as amended by 1989 Iowa Acts, Senate File 154.

701—61.2(422) Time for filing and payment of tax.**61.2(1) Time for filing.**

a. General rule. The date for filing the first estimated tax payment is on or before the last day of the fourth month of the tax year. The estimated tax form is to be filed with the Franchise Estimate Processing, P.O. Box 10413, Des Moines, Iowa 50306.

b. Amended estimates. Generally, whenever a taxpayer who is required to make estimated tax payments has reason to believe that its Iowa franchise tax may increase or decrease, an amended estimate shall be filed at such time to reflect the increase or decrease in estimated Iowa franchise tax. The amended estimate shall be made on or before the next installment date. The unpaid balance after amending the estimate should be paid in equal installments on the remaining payment dates.

61.2(2) Payment of estimated tax.

a. General rule. Estimates may be paid in full at the time of the first filing or in four equal installments. The taxpayer may also elect to pay any installment prior to the date prescribed.

b. Calendar year. The first installment for a corporation filing on a calendar year basis is due by April 30. The other installments, if applicable, shall be paid on or before June 30, September 30, and December 31 of the current year.

c. Fiscal year. The installment dates for a financial institution filing on a fiscal year basis are:

Installment No. 1. The last day of the fourth month of the fiscal year.

Installment No. 2. The last day of the sixth month of the fiscal year.

Installment No. 3. The last day of the ninth month of the fiscal year.

Installment No. 4. The last day of the twelfth month of the fiscal year.

This rule is intended to implement Iowa Code sections 422.85 as amended by 1989 Iowa Acts, Senate File 154, and 422.86.

701—61.3(422) Special estimate periods.

61.3(1) Short taxable year. A financial institution having a taxable year of less than 12 months shall pay estimated tax if anticipating an Iowa tax liability of more than \$1,000 for that short taxable year.

a. Short taxable year where a new financial institution first commences doing business. In filing the first estimated tax payment, the taxpayer shall state the tax period that the estimated tax payment covers.

(1) If the tax year is three months or less, no estimated tax payment need be made.

(2) If the tax year is greater than three months, but not more than four months, and estimated tax payment is required to be made on the last day of the fourth month, the estimated tax shall be paid based upon the taxable income for the first three months.

(3) If the tax year is greater than four months, but not more than six months, and the first estimated tax payment is required to be made on the last day of the fourth month, the estimated tax shall be paid in two equal installments. The first installment shall be due the last day of the fourth month based on the first three months' taxable income annualized by multiplying the taxable income by the number of

months in the tax year and dividing by three. The second installment shall be due the last day of the tax year.

If the first estimated tax payment is required to be made after the fourth month, the estimated tax payment shall be made on the last day of the tax year and the estimated tax shall be paid in one installment based upon the taxable income for the first four months if the tax year ends during the fifth month or for the first five months if the tax year ends during the sixth month.

(4) If the tax year is greater than four months, but not more than nine months, and the first estimated tax payment is required to be made on the last day of the fourth month, the estimated tax shall be paid in three equal installments. The first installment shall be due the last day of the fourth month based on the first three months' taxable income annualized by multiplying the taxable income by the number of months in the tax year and dividing by three. The second installment shall be due the last day of the sixth month of the tax year. The third installment shall be due the last day of the tax year.

If the first estimated tax payment is required to be made on the last day of the sixth month of the tax year, the estimated tax shall be paid in two equal installments. The first installment shall be due on the last day of the sixth month based upon the first five months' taxable income annualized by multiplying the taxable income by the number of months in the tax year and dividing by five. The second installment shall be due on the last day of the tax year.

If the first estimated tax payment is required to be made after the last day of the sixth month of the tax year, the estimated tax payment shall be made on the last day of the tax year and the estimated tax shall be paid in one installment based on the taxable income for the first seven months if the tax year ends during the eighth month or for the first eight months if the tax year ends during the ninth month.

(5) If the tax year is greater than four months, but not more than eleven months, and the first estimated tax payment is required to be made on the last day of the fourth month, the estimated tax shall be paid in four equal installments. The first installment shall be due the last day of the fourth month based upon the first three months' income annualized by multiplying the taxable income by the number of months in the tax year and dividing by three. The second installment shall be due on the last day of the sixth month of the tax year. The third installment shall be due on the last day of the ninth month of the tax year. The fourth installment shall be due the last day of the tax year.

If the first estimated tax payment is required to be made on the last day of the sixth month of the tax year, the estimated tax shall be paid in three equal installments. The first installment shall be due on the last day of the sixth month based upon the first five months' taxable income annualized by multiplying the taxable income by the number of months in the tax year and dividing by five. The second installment shall be due the last day of the ninth month of the tax year. The third installment shall be due on the last day of the tax year.

If the first estimated tax payment is required to be made on the last day of the ninth month of the tax year, the estimated tax shall be paid in two equal installments. The first installment shall be due on the last day of the ninth month, based upon the first eight months' taxable income annualized by multiplying the taxable income by the number of months in the tax year and dividing by eight. The second installment shall be due the last day of the tax year.

If the first estimated tax payment is required to be made after the last day of the ninth month of the tax year, the estimated tax payment shall be made on the last day of the tax year and the estimated tax shall be paid in one installment based upon the taxable income for the first nine months if the tax year ends during the tenth month or for the first ten months if the tax year ends during the eleventh month.

(6) If during the tax year, the taxpayer determines that its tax year will be different than the tax year specified in its original payment of estimated tax, the remaining estimated tax payments, if any, shall be based upon the above schedule.

b. Short taxable year where the taxpayer is liquidated during the tax year or where under any provision of the Internal Revenue Code the taxpayer is required to file a return for a period of less than 12 months.

(1) If the tax year is three months or less, no estimated tax payment need be made.

(2) If the tax year is greater than three months, an estimated tax payment shall be made the same as if the taxpayer's tax year is a full 12 months except that the final installment shall be due the last day of the tax year.

(3) Special exception to penalty. If the taxpayer uses the exception under Iowa Code subsection 422.89(1) to avoid the penalty for underpayment of estimated tax, no penalty will accrue if the following conditions are met: (a) The total amount of all payments of estimated tax made on or before the last date prescribed for the payment of estimated tax equals the prior year's tax multiplied by the number of months in the short tax year and divided by 12, and (b) a return for the preceding tax year of a full 12 months showing a tax liability was filed by the taxpayer.

61.3(2) *Doing business for less than a full year.*

a. General rule. A financial institution which commences or ceases to do business during any part of the year shall determine its Iowa estimated tax on that portion of income earned while doing business during the year.

b. Example. A bank which first begins doing business in this state on April 15 and which expects a tax liability of \$1,500 must make its first payment of estimated tax of \$500 by June 30 and pay the remaining balance of \$1,000 in two equal installments of \$500 each by September 30 and December 31 of the tax year.

This rule is intended to implement Iowa Code section 422.92.

701—61.4(422) Reporting forms. Financial institutions which have paid estimated tax in the prior year will receive by mail a preaddressed reporting form. Blank reporting forms are available from the department for those making an estimate for the first time, or when the preaddressed form is misplaced or lost.

This rule is intended to implement Iowa Code section 422.21.

701—61.5(422) Penalties. Failure to file and underpayment of estimated tax.

61.5(1) *Underpayment penalty.*

a. A penalty is imposed for underpayment of the estimated tax by the taxpayer. This underpayment penalty is imposed whether or not there was reasonable cause for the underpayment. The Iowa penalty for underpayment of estimated tax is computed on Form IA 2220.

b. The amount of the underpayment penalty is determined at the statutory rate upon the amount of underpayment of the estimated tax for the period from the date the amount is required to be paid until the last day of the fourth month following the close of the income year, or the date the underpayment is paid, whichever is earlier.

EXAMPLE. A calendar year financial institution is required to make four equal estimated payments of \$2,500 in the current year to meet the exception to the underpayment of estimated tax penalty. The financial institution does not make a first quarter estimated payment which was due on April 30, but makes an estimated payment of \$5,000 for the second quarter on June 30. The financial institution is subject to the underpayment of estimated tax penalty for the period from April 30 to June 30, when the underpayment was paid.

61.5(2) *Exception to imposition of the underpayment penalty.*

a. In general. The underpayment penalty will not be imposed for any underpayment if, on or before the date prescribed for payment, the total amount of all payments made of the estimated tax equals or exceeds the amount which would have been required to be paid on or before such date if the estimated tax were the least of the following amounts:

(1) The tax shown on the return for the preceding taxable year, provided that the preceding taxable year was a taxable year of 12 months and a return showing a tax liability was filed for such year;

(2) An amount equal to a tax determined on the basis of the tax rates for the taxable year but otherwise on the basis of the facts shown on the return for the preceding taxable year if the taxable year was a taxable year of 12 months or, if the preceding taxable year was a taxable year of less than 12 months, then by placing the income on an annual basis and the law applicable to the preceding year, in the case of a taxpayer required to file a return for the preceding taxable year; or

(3) For tax years beginning prior to January 1, 2012, an amount equal to 90 percent of the tax determined by placing on an annual basis the net income for the first 3, 5, 6, 8, 9, or 11 months of the taxable year, whichever is applicable. For tax years beginning on or after January 1, 2012, an amount equal to 100 percent of the tax determined by placing on an annual basis the net income for the first 3, 5, 6, 8, 9, or 11 months of the taxable year, whichever is applicable. The net income so determined shall be placed on an annual basis by multiplying it by 12, and dividing the resulting amount by the number of months in the taxable year for which the net income was so determined.

b. Statement of exception. If there has been an underpayment of the amount of the estimated tax, and the taxpayer believes that one or more of the exceptions to the penalty preclude the assertion of the underpayment penalty, the taxpayer should attach a statement showing the applicability of any exception upon which the taxpayer relies.

61.5(3) *Exception to imposition of the underpayment penalty for taxable years beginning on or after July 1, 1978, and on or before June 30, 1979.* Rescinded IAB 12/20/95, effective 1/24/96.

61.5(4) *Exception to imposition of the underpayment penalty for taxable years beginning on or after July 1, 1977, and on or before June 30, 1978.* Rescinded IAB 12/20/95, effective 1/24/96.

This rule is intended to implement Iowa Code section 422.88 and 2011 Iowa Code Supplement section 422.89 as amended by 2012 Iowa Acts, Senate File 2328.
[ARC 0337C, IAB 9/19/12, effective 10/24/12]

701—61.6(422) Overpayment of estimated tax.

61.6(1) *Refund of overpayment of estimated tax.* Any overpayment of estimated tax, at the taxpayer's election, of \$5 or more will be refunded with interest without a claim for refund being filed. If the overpayment is less than \$5, it will be refunded only if the taxpayer files a claim for refund within 12 months after the due date of the return.

61.6(2) *Interest on refunds of overpayments of estimated tax.* Interest begins to accrue on the first day of the second calendar month following the date of payment or the date the return was due to be filed, or was filed, whichever is the latest. The rate of interest shall be that set forth in rule 701—10.2(421).

61.6(3) *Credit to next year's tax.* In lieu of claiming a refund, the taxpayer may elect to have the overpayment credited to the next year's tax liability. The election may not be changed after the due date for filing the return considering any extension of time to file. If the taxpayer elects to have the overpayment credited to the next year's tax liability, the overpayment will be credited to the first installment if the overpayment arose on or before the due date of the return. If the overpayment arises after the due date of the return, the overpayment will be credited to the first installment due after the date of payment. The taxpayer may by a written election included with the filing of the return elect to have the overpayment credited to a different installment. Revenue Ruling 84-58.

This subrule is effective for tax years beginning on or after January 1, 1984.

61.6(4) *Estimated tax carryforwards and how the carryforward amounts are affected under different circumstances.*

a. Estimated tax carryforward and how the amount of carryover credit is affected by error on return. If a state return is timely filed with an overpayment shown on the return and the overpayment is to be credited to the taxpayer's estimated payments for the following year, the amount credited to estimated payments will be affected by an error on the return. Thus, if the error on the return is corrected and results in a smaller overpayment than was shown when the return was filed, the credit to estimated tax from the return will be reduced accordingly.

EXAMPLE: Financial Institution X filed its 1994 return on April 20, 1995, showing an overpayment of \$400 and a credit to 1995 estimated tax of \$400. During processing of the return, it was determined that interest from municipal bonds was subtracted from net income instead of being added to net income. Correction of this error resulted in an overpayment of \$200 instead of \$400. Thus, the amount credited to the taxpayer's estimated payments for 1995 was \$200 instead of the \$400 shown on the return form. The department notified Financial Institution X of the error and advised that only \$200 was being credited to the taxpayer's estimated tax for 1995 instead of the \$400 shown on the return.

b. Estimated tax credit carryover, the carryforward amount affected by amended return. A taxpayer timely files an original return with an overpayment and with the overpayment credited to the following year's estimated tax payments. If the taxpayer files an amended return correcting an error on the original return and with a different amount credited to estimated tax than on the original return, the credit amount from the amended return will be credited to estimated tax, if the amended return is filed before the last day of the following tax year. Thus, if an amended return for tax year ending September 30, 1995, is filed by September 30, 1996, the amount shown as a credit to estimated tax from that amended return will be the amount credited to the taxpayer's September 30, 1996, estimated tax, instead of the amount credited from the original September 30, 1995, return.

EXAMPLE: Financial Institution Y filed its original September 30, 1995, return on January 15, 1996, with an overpayment of \$500 and all of the overpayment credited to its estimated tax for the tax year ending September 30, 1996. Later, in 1996, Y determined that it had failed to claim a deduction on the return for depreciation on some business equipment it acquired in tax year ending September 30, 1995. Therefore, Y filed an amended Iowa return for tax year ending on September 30, 1995, on July 15, 1996, showing an overpayment of \$700 and a credit to estimated tax of the same amount. Y's amended return was filed on or before September 30, 1996, so the \$700 credit to Y's estimated tax for tax year ending September 30, 1996, from the amended return was allowed.

Note that if the amended return had not been filed until sometime in October 1996, the credit from Y's original return would have been applied to Y's estimated payments for tax year ending September 30, 1996. Since the amended return would have been filed too late for purposes of crediting the overpayment to the taxpayer's estimated tax for the next year, the department would issue Y a refund of \$200 which is the portion of the overpayment from the amended return that had not been credited to estimated tax from the original return for tax year ending September 30, 1995.

c. Estimated tax carryforward and how the amount of carryover credit is affected by state tax liability or other state liability of the taxpayer. A taxpayer who files an Iowa return with an overpayment shown on the return and elects to have the overpayment credited to the taxpayer's estimated tax for the next tax year will not have the overpayment credited to estimated tax, if the taxpayer has tax liabilities or other liabilities with the state that are subject to setoff. Other liabilities with the state that are subject to setoff are those liabilities described in Iowa Code section 8A.504. These liabilities are for district court debts, and any other debts of the taxpayer with a board, commission, department, or other administrative office or unit of the state of Iowa.

EXAMPLE: Financial Institution Z filed its 1994 Iowa return in April 1995 showing an overpayment of \$400 and a credit to 1995 estimated tax of \$400. During processing of Financial Institution Z's 1994 return it was determined that Financial Institution Z had a liability of \$150 from its 1993 Iowa return. Thus, \$150 of the 1994 overpayment was offset against the tax liability from the 1993 return. The remaining portion of the 1994 overpayment of \$250 was credited to Financial Institution Z's estimated tax for 1995.

61.6(5) *Accrual of interest on an assessment of additional tax.* If the taxpayer has not elected to have an overpayment credited to an installment other than the first installment, interest shall accrue on an assessment of additional tax as follows. If the overpayment was credited to the first installment, interest on an assessment of additional tax shall accrue from the due date of the return. If the overpayment was credited to an installment due after the overpayment arose, interest shall accrue from the date the return was filed. Interest on that portion of an assessment greater than the overpayment shall accrue from the due date of the return.

If the taxpayer has elected to have an overpayment of estimated tax credited to an installment other than the first, interest shall accrue on any assessment of additional tax up to the amount of the overpayment from the date the return was filed with the department. Interest on any assessment of additional tax greater than the amount of the overpayment shall accrue from the due date of the return. *Avon Products, Inc. v. United States*, 588 F.2d 342 (2nd Cir. 1978), Revenue Ruling 84-58.

This subrule is effective for tax years beginning on or after January 1, 1984.

This rule is intended to implement Iowa Code section 422.91.

TITLE VIII
MOTOR FUEL

CHAPTER 67

ADMINISTRATION

[Prior to 1/1/96, see 701—Ch 63]

701—67.1(452A) Definitions. For purposes of this chapter, 701—Chapter 68, and 701—Chapter 69, the following definitions shall govern:

“Appropriate state agency” or *“state agency”* means the department of revenue or the state department of transportation, whichever is responsible for control, maintenance, or supervision of the power, requirement, or duty referred to in Iowa Code chapter 452A.

“Aviation gasoline” means any gasoline capable of being used for propelling aircraft which is invoiced as aviation gasoline or is received, sold, stored, or withdrawn from storage for purposes of propelling aircraft. It does not include motor fuel capable of being used for propelling motor vehicles.

“B-11” means biodiesel blended fuel formulated with a minimum percentage of 11 percent by volume of biodiesel, if the formulation meets the standards provided in Iowa Code section 214A.2. A similar notation refers to biodiesel blended fuel containing other percentages of biodiesel. For example, *“B-5”* means biodiesel blended fuel formulated with a minimum percentage of 5 percent by volume of biodiesel, if the formulation meets the standards provided in Iowa Code section 214A.2.

“Biodiesel” means a renewable fuel comprised of mono-alkyl esters of long-chain fatty acids derived from vegetable oils or animal fats, which meets the standards provided in Iowa Code section 214A.2.

“Biodiesel blended fuel” means a blend of biodiesel with petroleum-based diesel fuel which meets the standards, including separately the standard for its biodiesel component, provided in Iowa Code section 214A.2.

“Biodiesel distribution percentage” means the number of gallons of biodiesel blended fuel classified as B-11 or higher that is distributed in this state as expressed as a percentage of the number of gallons of special fuel for diesel engines of motor vehicles distributed in this state during the determination period. The determination period is the previous calendar year.

“Biofuel” means ethanol or biodiesel.

“Blender” means a person who owns and blends two or more fuels, including ethanol or biodiesel, at a nonterminal location to produce ethanol blended gasoline or biodiesel blended fuel. The person is not restricted to blending ethanol with gasoline or biodiesel with diesel. The blend is taxed according to its fuel and alcohol content, which may result in additional tax due or an allowable refund for the blender. See rule 701—68.4(452A).

“Carrier” means and includes any person who operates or causes to be operated any commercial motor vehicle on any public highway in this state.

“Common carrier” or *“contract carrier”* means a person involved in the movement of motor fuel or special fuel from the terminal or movement of the motor fuel or special fuel imported into this state, who is not an owner of the motor fuel or special fuel.

“Commercial motor vehicle” means a passenger vehicle that has seats for more than nine passengers in addition to the driver, any road tractor, any truck tractor, or any truck having two or more axles which passenger vehicle, road tractor, truck tractor, or truck is propelled on the public highways by either motor fuel or special fuel. *“Commercial motor vehicle”* does not include a motor truck with a combined gross weight of less than 26,000 pounds, operated as a part of an identifiable one-way fleet and which is leased for less than 30 days to a lessee for the purpose of moving property which is not owned by the lessor.

“Conventional blendstock for oxygenate blending” means one or more motor fuel components intended for blending with an oxygenate or oxygenates to produce gasoline.

“Dealer” means a person, other than a distributor, who engages in the business of selling or distributing motor fuel or special fuel to the end user in this state.

“Denatured ethanol” means ethanol that is to be blended with gasoline, has been derived from cereal grains, complies with American Society of Testing Materials designation D-4806-95b, and may

be denatured only as specified in Code of Federal Regulations, Titles 20, 21, and 27. Alcohol and denatured ethanol have the same meaning.

“Department” means the department of revenue.

“Diesel fuel” or *“diesel”* means diesel as defined in Iowa Code section 214A.1.

“Director” means the director of the Iowa department of revenue or the director’s authorized representative.

“Distributor” means a person who acquires tax-paid motor fuel, special fuel, or alcohol from a supplier, restrictive supplier, or importer, or another distributor for subsequent sale at wholesale and distribution by tank cars or tank trucks or both. The department may require that the distributor be registered to have terminal purchase rights.

“E-85 gasoline” means ethanol blended gasoline formulated with a minimum percentage of between 70 and 85 percent by volume of ethanol, if the formulation meets the standards provided in Iowa Code section 214A.2.

“Eligible purchaser” means a distributor of motor fuel or special fuel who elects to make delayed payments to a licensed supplier and must use electronic funds transfer.

“End user” of special fuel means a person who has purchased a minimum of 240,000 gallons of special fuel each year in the two preceding years who elects to make delayed payments to a licensed supplier and must use electronic funds transfer.

“Ethanol” means ethyl alcohol that is to be blended with gasoline if the ethanol meets the standards provided in Iowa Code section 214A.2.

“Ethanol blended gasoline” means a formulation of gasoline which is a liquid petroleum product blended with ethanol, if the formulation meets the standards provided in Iowa Code section 214A.2. When “motor fuel” is used in these rules, it includes ethanol blended gasoline.

“Ethanol distribution percentage” means the number of gallons of ethanol blended gasoline that is distributed in this state as expressed as a percentage of the number of gallons of motor fuel, excluding aviation gasoline, distributed in this state during the determination period. The determination period is the previous calendar year.

“Export” means delivery across the boundaries of this state by or for the seller or purchaser from a place of origin in this state.

“Exporter” means a person or other entity who acquires fuel in this state for export to another state.

“Foreign supplier” means a person licensed as a supplier to collect and report the tax, but who does not have jurisdictional connections with this state.

“Fuel(s)” means and includes both motor fuel and special fuel as defined in Iowa Code chapter 452A.

“Fuel taxes” means the per gallon excise taxes imposed under division I of Iowa Code chapter 452A with respect to motor fuel and undyed special fuel.

“Gallon,” with respect to compressed natural gas, means a gasoline gallon equivalent. A gasoline gallon equivalent of compressed natural gas is five and sixty-six hundredths pounds or one hundred twenty-six and sixty-seven hundredths cubic feet measured at a base temperature of 60 degrees Fahrenheit and a pressure of fourteen and seventy-three hundredths pounds per square inch absolute. “Gallon,” with respect to liquefied natural gas, means a diesel gallon equivalent. A diesel gallon equivalent of liquefied natural gas is six and six hundredths pounds.

“Gasoline” means any liquid product prepared, advertised, offered for sale or sold for use as, or commonly and commercially used as, motor fuel for use in a spark-ignition, internal combustion engine, and which meets the specifications provided in Iowa Code section 214A.2.

“Import” means delivery across the boundaries of this state by or for the seller or purchaser from a place of origin outside this state.

“Importer” means a person who imports motor fuel or undyed special fuel in bulk or transport load into the state by truck, rail, or barge.

“Invoiced gallons” means gross gallons as shown on the bill of lading or manifest.

“Iowa urban transit system” means a system whereby motor buses are operated primarily upon the streets of cities for the transportation of passengers for an established fare and which accepts passengers

who present themselves for transportation without discrimination up to the limit of the capacity of each motor bus. "Iowa urban transit system" also includes motor buses operated upon the streets of adjoining cities, whether interstate or intrastate, for the transportation of passengers without discrimination up to the limit of the capacity of the motor bus.

Privately chartered bus services, motor carriers and interurban carriers subject to the jurisdiction of the state department of transportation, school bus services, and taxicabs shall not be construed to be an urban transit system nor a part of any such system.

"*Licensee*" means a person holding an uncanceled supplier's, restrictive supplier's, importer's, exporter's, or blender's license issued by the department or any other person who possesses fuel for which the tax has not been paid.

"*Mobile machinery and equipment*" means vehicles self-propelled by an internal combustion engine but not designed or used primarily for the transportation of persons or property on public highways and only incidentally operated or moved over a highway including, but not limited to, corn shellers, truck-mounted feed grinders, roller mills, ditch-digging apparatus, power shovels, draglines, earth-moving equipment and machinery, and road construction and maintenance machinery such as asphalt spreaders, bituminous mixers, bucket loaders, ditchers, leveling graders, finishing machines, motor graders, paving mixers, road rollers, scarifiers, and earth-moving scrapers. However, "mobile machinery and equipment" does not include dump trucks or self-propelled vehicles originally designed for the transportation of persons or property on public highways and to which machinery, such as truck-mounted transit mixers, cranes, shovels, welders, air compressors, well-boring apparatus or lime spreaders, has been attached.

"*Motor fuel*" means a substance or combination of substances which is intended to be or is capable of being used for the purpose of operating an internal combustion engine, including but not limited to a motor vehicle, and is kept for sale or sold for that purpose and includes the following:

1. All products commonly or commercially known or sold as gasoline (including ethanol blended gasoline, casinghead, and absorption or natural gasoline) regardless of their classifications or uses, and including transmix which serves as a buffer between fuel products in the pipeline distribution process.

2. Any liquid advertised, offered for sale, sold for use as, or commonly or commercially used as a fuel for propelling motor vehicles, which when subjected to distillation of gasoline, naphtha, kerosene, and similar petroleum products (American Society of Testing Materials designation D-86), shows not less than 10 percent distilled (recovered) below 347° F (175° C) and not less than 95 percent distilled (recovered) below 464° F (240° C).

"*Motor fuel*" does not include special fuel and does not include liquefied gases which would not exist as liquids at a temperature of 60° F and a pressure of 14 7/10 pounds per square inch absolute, or naphthas and solvents unless the liquefied gases or naphthas and solvents are used as a component in the manufacture, compounding, or blending of a liquid within paragraph "2," in which event the resulting product shall be deemed to be motor fuel. "Motor fuel" also does not include methanol unless blended with other motor fuels for use in an aircraft or for propelling motor vehicles.

"*Motor vehicle*" means and includes all vehicles (except those operated on rails) which are propelled by internal combustion engines and are of such design as to permit their mobile use on public highways for transporting persons or property. A farm tractor while operated on a farm or for the purpose of hauling farm machinery, equipment, or produce shall not be deemed to be a motor vehicle. "Motor vehicle" shall not include "mobile machinery and equipment."

"*Naphthas and solvents*" means and includes those liquids which come within the distillation specifications for motor fuel, but which are designed and sold for exclusive use other than as a fuel for propelling motor vehicles.

"*Non-ethanol blended gasoline*" means gasoline other than ethanol blended gasoline.

"*Nonrefiner biofuel manufacturer*" means an entity that produces, manufactures, or refines biofuel and does not directly or through a related entity refine, blend, import, or produce a conventional blendstock for oxygenate blending, gasoline, or diesel fuel.

"*Nonterminal storage facility*" means a facility where motor fuel or special fuel, other than liquefied petroleum gas, is stored that is not supplied by a pipeline or a marine vessel. "Nonterminal storage

facility” includes a facility that manufactures products such as ethanol, biofuel, blend stocks, or additives which may be used as motor fuel or special fuel, other than liquefied petroleum gas, for operating motor vehicles or aircraft.

“*Person*” means and includes natural persons, partnerships, firms, associations, corporations, representatives appointed by any court, and political subdivisions of this state or any other group or combination acting as a unit and the plural as well as the singular number applies.

“*Petrodiesel*” means petroleum-based diesel fuel. Petrodiesel contains no biodiesel.

“*Public highways*” means and includes any way or place available to the public for purposes of vehicular travel notwithstanding temporarily closed.

“*Racing fuel*” means leaded gasoline of 110 octane or more that does not meet American Society of Testing Materials designation D-4814 for gasoline and is sold in bulk for use in nonregistered motor vehicles.

“*Refiner*” means a person engaged in the refining of crude oil to produce motor fuel or special fuel, and includes any affiliate of such person.

“*Regional transit system*” means a public transit system serving one county or all or part of a multicounty area whose boundaries correspond to the same boundaries as those of the regional planning areas designated by the governor, except as agreed upon by the department. Each county board of supervisors within the region is responsible for determining the service and funding within its county. However, the administration and overhead support services for the overall regional transit system shall be consolidated into one existing or new agency to be mutually agreed upon by the participating members. Privately chartered bus services and uses other than providing services that are open and public on a shared-ride basis shall not be construed to be a regional transit system.

“*Restrictive supplier*” means a person not otherwise licensed as an importer who imports motor fuel or undyed special fuel into this state in amounts of less than 4,000 gallons in tank wagons or in small tanks.

“*Special fuel*” means fuel oils, kerosene and all combustible gases and liquids suitable for the generation of power for propulsion of motor vehicles or turbine-powered aircraft, and includes any substance used for that purpose, except that it does not include motor fuel. Kerosene and methanol shall not be considered to be special fuels, unless the kerosene or methanol is blended with other special fuels for use in a motor vehicle with a diesel engine.

“*Supplier*” means a person who acquires motor fuel or special fuel by pipeline or marine vessel from a state, territory, or possession of the United States, or from a foreign country for storage at and distribution from a terminal and who is registered under 26 U.S.C. § 4101 for tax-free transactions in fuel; a person who produces in this state or acquires by truck, railcar, or barge for storage at and distribution from a terminal, biofuel, biodiesel, alcohol, or alcohol derivative substances; or a person who produces, manufactures, or refines motor fuel or special fuel in this state. “Supplier” includes a person who does not meet the jurisdictional connection to this state but voluntarily agrees to act as a supplier for purposes of collecting and reporting the motor fuel or special fuel tax. “Supplier” does not include a retail dealer or wholesaler who merely blends alcohol with gasoline or biofuel with diesel before the sale or distribution of the product or a terminal operator who merely handles, in a terminal, motor fuel or special fuel consigned to the terminal operator.

“*Taxpayer*” means anyone responsible for paying fuel taxes directly to the department of revenue under Iowa Code chapter 452A.

“*Terminal*” means a motor fuel, alcohol, or special fuel storage and distribution facility that is supplied by a pipeline or a marine vessel and from which the fuel may be removed at a rack. “Terminal” does not include a facility at which motor fuel or special fuel blend stocks and additives are used in the manufacture of products other than motor fuel or special fuel and from which no motor fuel or special fuel is removed.

“*Terminal operator*” means the person who by ownership or contractual agreement is charged with the responsibility for, or physical control over, and operation of a terminal. If coventurers own a terminal, “terminal operator” means the person who is appointed to exercise the responsibility for, or physical control over, and operation of the terminal.

“*Terminal owner*” means a person who holds a legal or equitable interest in a terminal.

“*Withdrawn from terminal*” means physical movement from a supplier to a distributor or eligible end user or from an alcohol manufacturer to a nonterminal location and includes an importer going out of state and obtaining fuel from a terminal and bringing the fuel into the state, and a restrictive supplier bringing fuel into the state even though not purchased directly from a terminal. Exchange of product by suppliers while in the distribution channel and the physical movement of alcohol from an alcohol manufacturer to an Iowa licensed supplier’s alcohol storage at a terminal are not to be considered “withdrawn from terminal.”

This rule is intended to implement Iowa Code sections 452A.2 and 452A.59.

[ARC 1442C, IAB 4/30/14, effective 6/4/14; ARC 1805C, IAB 1/7/15, effective 2/11/15; ARC 2247C, IAB 11/25/15, effective 12/30/15]

701—67.2(452A) Statute of limitations, supplemental assessments and refund adjustments. After a return is filed, the department must examine it, determine fuel taxes due, and give notice of assessment to the taxpayer. If no return is filed, the department may determine the tax due and give notice thereof. See rule 701—67.5(452A). The period for the examination and determination of the correct amount of tax is unlimited in the case of a false or fraudulent return made with the intent to evade tax or in the case of a failure to file a return.

The department may, at any time within the period prescribed for assessment or refund adjustment, make a supplemental assessment or refund adjustment whenever it is ascertained that any assessment or refund adjustment is imperfect or incomplete in any respect.

If the assessment or refund adjustment is appealed (protested under rule 701—7.8(17A)) and is resolved whether by informal proceedings or by adjudication, the department and the taxpayer are precluded from making a supplemental assessment or refund adjustment concerning the same issue involved in such appeal for the same tax period unless there is a showing of mathematical or clerical error or a showing of fraud or misrepresentation.

The three-year period of limitation may be extended by a taxpayer by signing a waiver agreement form to be provided by the department. The agreement must stipulate the period of extension and must also provide that a claim for refund may be filed by the taxpayer at any time during the period of extension.

This rule is intended to implement Iowa Code section 452A.67 as amended by 1999 Iowa Acts, Senate File 136.

[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—67.3(452A) Taxpayers required to keep records. The records required to be kept by this rule must be preserved for a period of three years and will be open for examination by the department during this period of time. The department, after an audit and examination of the records, may authorize the disposal of the records required to be kept upon written request by the taxpayer. For taxpayers using an electronic data interchange process or technology also see 701—subrule 11.4(4).

67.3(1) Motor fuel and special fuel supplier. Every supplier required to file a monthly return under Iowa Code section 452A.8 is required to keep and preserve the following records relating to the purchase or sale of fuel:

- a. Copies of bills of lading or manifests.
- b. Copies of sales invoices.
- c. Sales records.
- d. Copies of filed returns and supporting schedules.
- e. Record of payment.
- f. Export schedules.

67.3(2) Restrictive supplier. Every restrictive supplier required to file a monthly return under Iowa Code section 452A.8 is required to keep and preserve the following records relating to the purchase or sale of fuel:

- a. Copies of bills of lading or manifests.
- b. Purchase invoices.

- c. Copies of sales invoices.
- d. Purchase records.
- e. Sales records.
- f. Copies of filed returns and supporting schedules.
- g. Record of payment.

67.3(3) Importer. Every importer required to file a semimonthly return under Iowa Code section 452A.8 is required to keep and preserve the following records relating to the purchase or sale of fuel:

- a. Copies of bills of lading or manifests.
- b. Purchase invoices.
- c. Copies of sales invoices.
- d. Purchase records.
- e. Sales records.
- f. Copies of filed returns and supporting schedules.
- g. Record of payment.

67.3(4) Exporter. Every exporter is required to keep and preserve the following records relating to the purchase of fuel for export:

- a. Copies of bills of lading or manifests.
- b. Purchase invoices and purchase records.
- c. Copies of reports, returns, and supporting schedules filed with the importing state.
- d. Record of payment.

67.3(5) Compressed natural gas, liquefied natural gas, and liquefied petroleum gas dealers and users. Every compressed natural gas, liquefied natural gas, and liquefied petroleum gas dealer and user is required to keep and preserve the following records:

- a. Copies of purchase invoice or bills of lading.
- b. Copies of sales invoices and sales records.
- c. Record of payment.
- d. Exemption certificates.
- e. Copies of filed returns and supporting schedules.

67.3(6) Terminal or nonterminal storage facility operator. Every person required to report under Iowa Code section 452A.15(2) or 2002 Iowa Acts, House File 2622, section 25, as an operator of a terminal or nonterminal storage facility shall keep and preserve the following records:

- a. Records to evidence the acquisition of fuel.
- b. Bills of lading or manifests covering the withdrawal of fuel.
- c. Copies of filed reports and supporting schedules.

67.3(7) Distributor. Every distributor handling motor fuel or special fuel is required to preserve and keep the following records:

- a. Delivery tickets.
- b. Sales invoices.
- c. Bills of lading.
- d. Record of payment.

67.3(8) Blender. Every blender is required to keep and preserve the following records:

- a. Purchase invoices for motor fuel, special fuel, and alcohol.
- b. Bills of lading.
- c. Copies of filed returns and supporting schedules.
- d. Record of payment.
- e. Copies of sales invoices.

67.3(9) Dealer. Every dealer (retailer) is required to keep and preserve the following records:

- a. Purchase invoices.
- b. Purchase records.
- c. Delivery tickets.
- d. Sales invoices.
- e. Sales records.

f. Record of payment.

67.3(10) *Microfilm and related record systems.* Microfilm, microfiche, COM (computer on machine), and other related reduction in storage systems will be referred to as “microfilm” in this rule.

Microfilm reproductions of general books of account, such as a cash book, journals, voucher registers, and ledgers, are not acceptable other than those that have been approved by the Internal Revenue Service under Revenue Procedure 76-43, Section 3.02. However, microfilm reproductions of supporting records of detail, such as sales invoices and purchase invoices, may be allowed providing there is no administrative rule or Iowa Code section requiring the original and all of the following conditions are met and accepted by the taxpayer:

- a.* Appropriate facilities are provided to ensure the preservation and readability of the films.
- b.* Microfilm rolls are indexed, cross-referenced, labeled to show beginning and ending numbers or beginning and ending alphabetical listing of documents included, and are systematically filed.
- c.* The taxpayer agrees to provide transcripts of any information contained on microfilm which may be required for purposes of verification of tax liability.
- d.* Proper facilities are provided for the ready inspection and location of the particular records, including modern projectors for viewing and for the copying of records.
- e.* Any audit of “detail” on microfilm may be subject to sample audit procedures, to be determined at the discretion of the director or the director’s designated representative.
- f.* A posting reference must be on each invoice.
- g.* Documents necessary to support claimed exemptions from tax liability, such as bills of lading and purchase orders, must be maintained in an order by which they readily can be related to the transaction for which exemption is sought.

67.3(11) *Automatic data processing records.* Automatic data processing (ADP) is defined in this rule as including electronic data processing (EDP) and will be referred to as ADP.

- a.* An ADP tax accounting system must have built into its program a method of producing visible and legible records which will provide the necessary information for verification of the taxpayer’s tax liability.
- b.* ADP records must provide an opportunity to trace any transaction back to the original source or to a final total. If detailed printouts are not made of transactions at the time they are processed, then the system must have the ability to reconstruct these transactions.
- c.* A general ledger with source references will be produced as hard copy to coincide with financial reports of tax reporting periods. In cases where subsidiary ledgers are used to support the general ledger accounts, the subsidiary ledgers should also be produced periodically.
- d.* Supporting documents and audit trail. The audit trail should be designed so that the details underlying the summary accounting data may be identified and made available to the director or the director’s designated representative upon request. The system should be designed so that the supporting documents, such as sales invoices and purchase invoices, are readily available. (An audit trail is defined as the condition of having sufficient documentary evidence to trace an item from source, such as invoice or payment, to a financial statement or tax return or report; or the reverse, that is, to have an auditable system.)

e. Program documentation. A description of the ADP portion of the accounting program should be available. The statements and illustrations as to the scope of operations should be sufficiently detailed to indicate:

- (1) The application being performed;
- (2) The procedure employed in each application (which, for example, might be supported by flow charts, block diagrams or other satisfactory description of the input or output procedures); and
- (3) The controls used to ensure accurate and reliable processing. Program and systems changes, together with their effective dates, should be noted in order to preserve an accurate chronological record.

f. Storage of ADP output will be in appropriate facilities to ensure preservation and readability of output.

67.3(12) *Electronic data interchange or EDI technology.* The purpose of this subrule is to adopt the “Model Recordkeeping and Retention Regulation” report as promulgated by the Federation of Tax

Administrators' Steering Committee Task Force on EDI Audit and Legal Issues for Tax Administration (March 1996). This subrule defines the requirements imposed on taxpayers for the maintenance and retention of books, records, and other sources of information under Iowa Code sections 452A.10, 452A.12, 452A.55, 452A.60, 452A.62, 452A.69, 452A.76, and 452A.80. It is also the purpose of this subrule to address these requirements where all or part of a taxpayer's records are received, created, maintained, or generated through various computer, electronic, and imaging processes and systems. A taxpayer must maintain all records that are necessary for determination of the correct tax liability as set forth in this subrule and the other subrules within rule 701—67.3(452A). Upon request, all required records must be made available to the department or its authorized representatives as provided in Iowa Code sections 452A.10 and 452A.62. If a taxpayer retains records required to be retained under this subrule in both machine-sensible and hard-copy formats, the taxpayer must make the records available to the department in machine-sensible format upon request of the department. Nothing in this subrule will be construed to prohibit a taxpayer from demonstrating tax compliance with traditional hard-copy documents or reproductions thereof, in whole or in part, whether or not the taxpayer also has retained or has the capability to retain records on electronic or other storage media in accordance with this subrule. However, as previously stated, this will not relieve a taxpayer of the obligation to comply with the requirement to make records available to the department.

a. Definitions. The following definitions are applicable to this subrule:

"Database management system" means a software system that controls, relates, retrieves, and provides accessibility to data stored in a database.

"Electronic data interchange" or *"EDI technology"* means the computer-to-computer exchange of business transactions in a standardized, structured electronic format.

"Hard copy" means any documents, records, reports, or other data printed on paper.

"Machine-sensible record" means a collection of related information in an electronic format. Machine-sensible records do not include hard-copy records that are created or recorded on paper or stored in or by an imaging system such as microfilm, microfiche, or storage-only imaging systems.

"Storage-only imaging system" means a system of computer hardware and software that provides for the storage, retention, and retrieval of documents originally created on paper. It does not include any system, or part of a system, that manipulates or processes any information or data contained on the document in any manner other than to reproduce the document in hard copy or as an optical image.

"Taxpayer" as used in this subrule means any person, business, corporation, fiduciary, or other entity that is required to file a return or report with the department of revenue.

b. Record-keeping requirements — machine-sensible records. A taxpayer that maintains and retains books, records, and other sources of information in the form of machine-sensible records must comply with the following:

(1) General requirements. A taxpayer must comply with the following general requirements regarding the retention of machine-sensible records:

1. Machine-sensible records used to establish tax compliance must contain sufficient transaction-level detail information so that the details underlying the machine-sensible records can be identified and made available to the department upon request. A taxpayer has discretion to discard duplicated records and redundant information provided its responsibilities under this regulation are met.

2. At the time of an examination, the retained records must be capable of being retrieved and converted to a standard record format. The term "standard record format" does not mean that every taxpayer must keep records in an identical manner. Instead, it requires that if a taxpayer utilizes a code system to identify elements of information in each record when creating and maintaining records, the taxpayer is required to maintain a record of the meaning of each code and any code changes so that the department may effectively review the taxpayer's records.

3. Taxpayers are not required to construct machine-sensible records other than those created in the ordinary course of business. A taxpayer that does not create the electronic equivalent of a traditional paper document in the ordinary course of business is not required to construct a traditional paper document for tax purposes.

(2) Electronic data interchange requirements. A taxpayer must comply with the following requirements for records received through electronic data interchange:

1. Where a taxpayer uses an electronic data interchange process and technology, the level of record detail, in combination with other records related to the transactions, must be equivalent to that contained in an acceptable paper record. For example, for motor fuel tax purposes the retained records should contain the following minimal information: bills of lading or manifests; invoices; sales and purchase records; returns, reports, and supporting schedules; records of payments; export schedules; exemption certificates; and delivery tickets. Codes may be used to identify some or all of the data elements, provided that the taxpayer provides a method which allows the department to interpret the coded information.

2. The taxpayer may capture the information necessary to satisfy the requirements set forth in the preceding paragraph at any level within the accounting system and need not retain the original EDI transaction records provided that the audit trail, authenticity, and integrity of the retained records can be established. For example, a taxpayer using electronic data interchange technology receives electronic invoices from its suppliers. The taxpayer decides to retain the invoice data from completed and verified EDI transactions in its accounts payable system rather than to retain the EDI transactions themselves. Since neither the EDI transaction nor the accounts payable system captures information from the invoice pertaining to product description and vendor name (i.e., they contain only codes for that information), the taxpayer also retains the other records such as its vendor master file and product code description lists and makes them available to the department. In this example, the taxpayer need not retain its original EDI transaction for tax purposes.

(3) Electronic data processing accounting systems requirements. The requirements for an electronic data processing accounting system should be similar to that of a manual accounting system, in that an adequately designed accounting system should incorporate methods and records that will satisfy the requirements of this rule. In addition, pursuant to Iowa Code sections 452A.10, 452A.12, 452A.55, 452A.60, 452A.62, 452A.69, 452A.76, and 452A.80, the department must have access to the taxpayer's EDI processing, accounting, or other systems for the purposes of verifying or evaluating the integrity and reliability of those systems to provide accurate and complete records.

(4) Business process information. To verify the accuracy of the records being retained, the taxpayer must comply with the following:

1. Upon the request of the department, the taxpayer shall provide a description of the business process that created the retained records. The description must include the relationship between the records and the tax documents prepared by the taxpayer and include the measures employed to ensure the integrity of the records.

2. The taxpayer must be capable of demonstrating the following:

- The functions being performed as they relate to the flow of data through the system;
- The internal controls used to ensure accurate and reliable processing; and
- The internal controls used to prevent unauthorized addition to, alteration of, or deletion of retained records.

3. The following specific documentation is required for machine-sensible records retained pursuant to this rule:

- Record formats or layouts;
- Field definitions (including a record of any changes in the system or codes and the meaning of all codes used to represent information);
- File descriptions (e.g., data set name); and
- Detailed charts of accounts and account descriptions.

c. *Record maintenance requirements.* The department recommends, but does not require, that taxpayers refer to the National Archives and Record Administration's (NARA) standards for guidance on the maintenance and storage of electronic records such as the labeling of records, the location and security of the storage environment, the creation of backup copies, and the use of periodic testing to confirm the continued integrity of the records. (The NARA standards may be found at 36 Code of Federal Regulations, Part 1234, July 1, 1995, Edition.) The taxpayer's computer hardware and software must accommodate the extraction and conversion of retained machine-sensible records.

d. Access to machine-sensible records. If a taxpayer retains records required to be retained under this regulation in both machine-sensible and hard-copy formats, the taxpayer must make the records available to the department in machine-sensible format upon the request of the department.

(1) The manner in which the department is provided access to machine-sensible records may be satisfied through a variety of means that must take into account a taxpayer's facts and circumstances through consultation with the taxpayer.

(2) Access shall be provided in one or more of the following manners:

1. The taxpayer may arrange to provide the department with the hardware, software, and personnel resources to access the machine-sensible records.

2. The taxpayer may arrange for a third party to provide the hardware, software, and personnel resources necessary to access the machine-sensible records.

3. The taxpayer may convert the machine-sensible records to a standard record format specified by the department, including copies of files, on magnetic medium that is agreed to by the department.

4. The taxpayer and the department may agree on other means of providing access to the machine-sensible records.

e. Taxpayer's responsibility and discretionary authority. In conjunction with meeting the requirements of paragraph "b" of this subrule, a taxpayer may create files solely for the use of the department. For example, if a database management system is used, it is consistent with this subrule for the taxpayer to create and retain a file that contains the transaction-level detail from the database management system and that meets the requirements of paragraph "b" of this subrule. The taxpayer shall document the process that created the separate file to show the relationship between that file and the original records. A taxpayer may contract with a third party to provide custodial or management services of the records. Such a contract will not relieve the taxpayer of its responsibilities under this rule.

f. Alternative storage media. For purposes of storage and retention, taxpayers may convert hard-copy documents received or produced in the normal course of business and required to be retained under this rule to microfilm, microfiche, or other storage-only imaging systems and may discard the original hard-copy documents provided that the rules governing alternative storage media are met. For details regarding alternative storage, see subrule 67.3(9), "Microfilm and related record systems."

g. Effect on hard-copy record-keeping requirements. Except as otherwise provided, the provisions of this subrule do not relieve taxpayers of the responsibility to retain hard-copy records that are created or received in the ordinary course of business as required by existing law and rules. Hard-copy records may be retained on alternative storage media as indicated in paragraph "f" above and subrule 67.3(9).

If hard-copy records are not produced or received in the ordinary course of transacting business (e.g., when the taxpayer uses electronic data interchange technology), hard-copy records need not be created.

Hard-copy records generated at the time of the transaction with the use of a credit or debit card must be retained unless all the details necessary to determine correct tax liability relating to the transaction are subsequently received and retained by the taxpayer in accordance with this rule.

Computer printouts that are created for validation, control, or other temporary purposes need not be retained.

Nothing in this rule shall prevent the department from requesting hard-copy printouts in lieu of retained machine-sensible records at the time of examination.

67.3(13) General requirements. If a tax liability has been assessed and an appeal is pending to the department, state board of tax review, or district or supreme court, books, papers, records, memoranda, or documents specified in this rule which relate to the period covered by the assessment must be preserved until the final disposition of the appeal.

If the requirements of this rule are not met, the records will be considered inadequate and rule 701—67.5(452A), estimate gallonage, applies.

This rule is intended to implement Iowa Code sections 452A.6 and 452A.15 as amended by 2002 Iowa Acts, House File 2622, and sections 452A.8, 452A.9, 452A.10, 452A.17, 452A.59, 452A.60, 452A.62, and 452A.69.

[ARC 1805C, IAB 1/7/15, effective 2/11/15]

701—67.4(452A) Audit—costs. The department has the right and duty to examine or cause to be examined the books, records, memoranda, or documents of a taxpayer for the purpose of verifying the correctness of a return filed or determining the tax liability of any taxpayer. The costs incurred in examining the records of a taxpayer are at the taxpayer's expense when the records are kept at an out-of-state location. Cost will include meals, lodging, and travel expenses, but will not include salaries of department personnel. (See 1976 O.A.G. 611.)

This rule is intended to implement Iowa Code section 452A.10 and 452A.62 as amended by 1995 Iowa Acts, chapter 155, and Iowa Code sections 452A.55 and 452A.69.

701—67.5(452A) Estimate gallonage. It is the duty of the department to collect all taxes on fuel due the state of Iowa. In the event the taxpayer's records are lacking or inadequate to support any return filed by the taxpayer, or to determine the taxpayer's liability, the department has the power to estimate the gallonage upon which tax is due. This estimation will be based upon such factors as, but not limited to, the following: (1) prior experience of the taxpayer, (2) taxpayers in similar situations, (3) industry averages, (4) records of suppliers or customers, and (5) other pertinent information the department may possess, obtain or examine.

This rule is intended to implement Iowa Code section 452A.64.

701—67.6(452A) Timely filing of returns, reports, remittances, applications, or requests. The returns, reports, remittances, applications, or requests required under Iowa Code chapter 452A shall be deemed filed within the required time if (1) postpaid, (2) properly addressed, and (3) postmarked on or before midnight of the day on which due and payable. Any return that is not signed and any return which does not contain substantially all of the pertinent information are not considered "filed" until such time as the taxpayer signs or supplies the information to the department. *Miller Oil Company v. Abrahamson*, 252 Iowa 1058, 109 N.W.2d 610 (1961), *Severs v. Abrahamson*, 255 Iowa 979, 124 N.W.2d 150 (1963). The filing of a return within the period prescribed by law and payment of the tax required to be shown thereon are simultaneous acts, unless remittance is required to be transmitted electronically; and if either condition is not met, a penalty will be assessed. Remittances transmitted electronically are considered to have been made on the date the remittance is added to the bank account designated by the treasurer of the state of Iowa. If the final filing date falls on a Saturday, Sunday, or legal holiday, the next secular or business day is the final filing date. The director may require by rule that reports and returns be filed by electronic transmission. Effective for returns due after July 1, 2006, all licensees must file returns by electronic transmission. All suppliers, restricted suppliers, importers, terminals, blenders, and nonterminal storage facilities with at least 5,000 gallons of product on their return or report must also file the schedules which support the return or report by electronic transmission.

All returns, reports, remittances, applications, or requests should be mailed to: Iowa Department of Revenue, Motor Fuel Unit, Hoover State Office Building, Des Moines, Iowa 50319, unless electronic transmission is required.

In the event a dispute arises as to the time of filing, or a return, report, or remittance is not received by the department, the provisions of Iowa Code section 622.105 are controlling. This rule applies only when the document is not received or the postmark on the envelope is illegible, erroneous, or omitted.

This rule is intended to implement Iowa Code sections 452A.8 and 452A.61.

701—67.7(452A) Extension of time to file. The department may grant an extension for the filing of any required return or tax payment or both.

In order for an extension to be granted, the application requesting the extension must be filed, in writing, with the department prior to the due date of the return or remittance. In determining whether an application for extension is timely filed, the provisions of rule 701—67.6(452A) shall apply. The application for extension must be accompanied by an explanation of the circumstances justifying such extension, and in no event will the extension period exceed 30 days.

In the event an extension is granted, the penalties under Iowa Code section 452A.65 applicable to late-filed returns or remittances will not accrue until the expiration of the extension period, but the interest on tax due under the same section will accrue as of the original filing date.

This rule is intended to implement Iowa Code section 452A.61.

701—67.8(452A) Penalty and interest. See rules 701—10.6(421) and 701—10.2(421) for failure to timely file a return or for failure to timely pay the tax. See rule 701—10.8(421) for penalty exceptions. See rule 701—10.72(452A) for interest on refunds.

701—67.9(452A) Penalty and enforcement provisions. See rule 701—10.71(421).

701—67.10(452A) Application of remittance. All payments are to be first applied to the penalty and then to the interest, and the balance, if any, to the amount of tax then due. If a taxpayer remits a payment on or before the due date, but the payment is insufficient to discharge the tax liability, the entire amount of the payment applies to the tax, and the penalty and interest are based on the unpaid portion of the tax. If the department determines there is additional tax due from a taxpayer, interest and penalty shall accrue on that amount from the date it should have been reported and paid.

This rule is intended to implement Iowa Code section 452A.59 as amended by 1995 Iowa Acts, chapter 155, and Iowa Code sections 452A.65 and 452A.66.

701—67.11(452A) Reports, returns, records—variations. The department will prescribe and furnish forms upon which reports, returns, and applications are to be made to the department under Iowa Code chapter 452A. Claims for refund will be made on forms provided by the department or in any other manner as prescribed by the director. Licensees may substitute forms for their use, other than official forms, if all the requirements in department rule 701—8.3(17A) are met.

If the information required in these documents is presented to the department on forms or in a manner other than the prescribed form, or approved substitute form, the return, application, or claim for refund or credit shall not be deemed “filed.” The forms may be furnished by the department (except those pertaining to division III interstate operations which are available from the department of transportation) and, therefore, the fact that the reporting party does not have the prescribed form is not an excuse for failure to file.

The department may also prescribe the form of the records which the reporting parties are required to keep in support of the reports/returns they file. The department may approve the form of the records which are being kept by any reporting party and must approve the form of record being kept if that form contains all of the information on the prescribed form, the information is compiled in such a manner as to make it easily ascertainable by department personnel, and substantially complies with the prescribed form.

This rule is intended to implement Iowa Code section 452A.60 as amended by 1999 Iowa Acts, Senate File 136.

701—67.12(452A) Form of invoice. Whenever an invoice is required to be kept or prepared by Iowa Code chapter 452A, the invoice must:

1. Be prepared by someone other than the purchaser and include the seller’s name, address, and identification number.
2. Include the purchaser’s name and address.
3. Contain a serial number of three or more digits.
4. Include the calendar date of purchase.
5. Indicate the type of fuel purchased. Diesel fuel must be designated as dyed or undyed.
6. Indicate the quantity of fuel purchased in gross gallons.
7. Indicate the total purchase price and show separately the amount of state and federal fuel tax included in the purchase price or include a statement that all state and applicable federal taxes are included in the purchase price.

8. For ethanol blended gasoline or biodiesel blended fuel, state its designation as provided in Iowa Code section 214A.2.

9. Be prepared on paper which will prevent erasure or alteration or on another form approved by the department.

This rule is intended to implement Iowa Code section 452A.10, section 452A.12 as amended by 2009 Iowa Acts, Senate File 478, section 140, and section 452A.60.

[ARC 8225B, IAB 10/7/09, effective 11/11/09]

701—67.13(452A) Credit card invoices. Credit card invoices are acceptable if they meet substantially all the requirements of rule 701—67.12(452A). (1968 O.A.G. 592)

For refund purposes, presentation of a credit card invoice or billing statement is prima facie evidence that the fuel tax has been paid.

This rule is intended to implement Iowa Code section 452A.60 as amended by 1995 Iowa Acts, chapter 155.

701—67.14(452A) Original invoice retained by purchaser—certified copy if lost. Whenever an invoice is required to be kept under Iowa Code chapter 452A, it must be the original copy which is kept. If the original copy is either lost or destroyed, a copy, certified by the seller as being a true copy of the original, will be acceptable. A copy of any invoice which is required to be kept by the purchaser must be kept by the seller for the same period of time.

This rule is intended to implement Iowa Code sections 452A.10 and 452A.60 as amended by 1995 Iowa Acts, chapter 155.

701—67.15(452A) Taxes erroneously or illegally collected. Licensees, including licensed suppliers, restrictive suppliers, importers, and blenders, are entitled to a return of taxes, penalty, and interest erroneously or illegally collected by the department. The request for the return of the taxes must be (1) in writing, (2) filed with the department within one year of the time the tax was paid if paid prior to July 1, 2002, and within three years of the time the tax was paid if the tax was paid on or after July 1, 2002, (3) filed by the licensee who remitted the tax to the department, and (4) accompanied by documentation supporting the claim for refund. If the erroneous collection was the result of a computational error on the part of the taxpayer and that error is discovered by the department during an examination of the taxpayer's records within three years of the overpayment, the taxes will be refunded and a written request will not be necessary. If the request includes the return of erroneously or illegally collected (assessed) penalty or interest, the interest or penalty shall be refunded in the same proportion as the tax. A refund requested under Iowa Code section 452A.72 will be reduced by sales tax if applicable. There is no minimum refund amount for refunds claimed under the provisions of Iowa Code section 452A.72. See sales tax rule 701—18.37(422,423).

67.15(1) Motor fuel and undyed special fuel suppliers must inform the department upon which bill(s) of lading, by number, and upon which monthly return(s) the tax was erroneously paid. The gallonage upon which a refund is requested on motor fuel or undyed special fuel must be reduced by the distribution allowance provided in Iowa Code section 452A.5. An amended return must be filed for the tax period in which the error occurred.

67.15(2) Restrictive suppliers, importers, and blenders must inform the department upon which bill(s) of lading or invoice, by number, and upon which monthly or semimonthly return(s) the tax was erroneously paid and an explanation of the erroneous payment. An amended return must be filed for the tax period in which the error occurred.

This rule is intended to implement Iowa Code section 452A.72 as amended by 2002 Iowa Acts, Senate File 2305.

701—67.16(452A) Credentials and receipts. Employees of the department have official credentials, and the taxpayer should require proof of the identity of persons claiming to represent the department. No charges are to be made nor gratuities of any kind accepted by an employee of the department for assistance given in or out of the office of the department.

All employees authorized to collect money are supplied with official receipt forms. When cash is paid to an employee of the department, the taxpayer should require the employee to issue an official receipt. Such receipt must show the taxpayer's name, address, and permit or license number; the purpose of the payment; and the amount of the payment. The taxpayer should retain all receipts, and the only receipts which the department will accept as evidence of a cash payment are the official receipts.

This rule is intended to implement Iowa Code section 452A.59 as amended by 1995 Iowa Acts, chapter 155.

701—67.17(452A) Information confidential. Iowa Code section 452A.63, which makes all information obtained from reports, returns, or records required to be filed or kept under Iowa Code chapter 452A confidential, applies generally to the director, deputies, auditors, agents, officers, or other employees of the department. The information may be divulged to the appropriate public officials enumerated in Iowa Code section 452A.63. These public officials include (1) member(s) of the Iowa General Assembly, (2) committees of either house of the Iowa legislature, (3) state officers, (4) persons who have responsibility for the enforcement of Iowa Code chapter 452A, (5) officials of the federal government entrusted with enforcement of federal motor vehicle fuel tax laws, and (6) officials of other states who have responsibility to enforce motor vehicle fuel tax laws and who will furnish like information to the department. An exception to this rule is that the appropriate state agency may make available to the public the total gallons of motor fuel, undyed special fuel, and ethanol blended gasoline withdrawn from terminals or imported into the state by suppliers, restrictive suppliers, and importers. The public request must be made within 45 days following the last day of the month in which the tax is required to be paid. See rule 701—6.3(17A) for procedures for requesting information.

This rule is intended to implement Iowa Code section 452A.63 as amended by 1999 Iowa Acts, Senate File 136.

701—67.18(452A) Delegation to audit and examine. Pursuant to statutory authority, the director of revenue delegates to the coadministrators of the compliance division the power to examine reports, returns, and records, make audits, and determine the correct amount of tax, interest, penalties, and fines due, and to take all actions authorized to collect the same, subject to review by or appeal to the director of revenue. The power so delegated may further be delegated by the coadministrators of the division to auditors, clerks, examiners, and employees of the division.

This rule is intended to implement Iowa Code sections 452A.62 and 452A.76.

701—67.19(452A) Practice and procedure before the department of revenue. The practice and procedure before the department is governed by Iowa Code chapter 17A and 701—Chapter 7.

This rule is intended to implement Iowa Code chapter 17A.

701—67.20(452A) Time for filing protest. Any person wishing to contest an assessment, denial of all or any portion of a refund claim, or any other department action, except licensing, which may culminate in a contested case proceeding, must file a protest with the clerk of the hearings section for the department pursuant to rule 701—7.8(17A) within 60 days of the issuance of the assessment, denial, or other department action contested. If a taxpayer failed to timely appeal a notice of assessment, the taxpayer may make payments pursuant to rule 701—7.8(17A) and file a refund claim within the period provided by law for filing claims.

This rule is intended to implement Iowa Code section 452A.64.

[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—67.21(452A) Bonding procedure. The director may, when necessary and advisable in order to secure the collection of the tax, require any person subject to the tax to file with the department a bond in an amount as the director may fix, or in lieu of the bond, securities approved by the director in an amount as the director may prescribe. Pursuant to the statutory authorization in Iowa Code sections 423.35 and 452A.66, the director has determined that the following procedures will be instituted with regard to bonds:

67.21(1) *When required.*

a. Classes of business. When the director determines, based on departmental records, other state or federal agency statistics, or current economic conditions, that certain segments of the petroleum business community are experiencing above average financial failures such that the collection of the tax might be jeopardized, a bond or security will be required from every licensee operating a business within this class unless it is shown to the director's satisfaction that a particular licensee within a designated class is solvent and that the licensee previously timely remitted the tax. If the director selects certain classes of licensees for posting a bond or security, rule making will be initiated to reflect a listing of the classes in the rules.

b. New applications for fuel tax permits. Notwithstanding the provisions of paragraph "a" above, the director has determined that importers will be required to post a bond in the amount of \$25,000 and other applicants for a new fuel tax permit will be requested to post a bond or security if (1) it is determined upon a complete investigation of the applicant's financial status that the applicant would likely not be able to timely remit the tax, or (2) the new applicant held a prior fuel tax license and the remittance record of the tax under the prior license falls within one of the conditions in paragraph "c" below, or (3) the department experienced collection problems while the applicant was engaged in business under the prior license, or (4) the applicant is substantially similar to a person who would have been required to post a bond under the guidelines as set forth in "c" or such person had a previous fuel tax permit revoked. The applicant is "substantially similar" to the extent that said applicant is owned or controlled by persons who owned or controlled the previous licensee. For example, X, a corporation, had a previous fuel tax permit revoked. X is dissolved and its shareholders create a new corporation, Y, which applies for a fuel tax permit. The persons or stockholders who controlled X now control Y. Therefore, Y will be requested to post a bond or security.

c. Existing licensees—amount of bond or security. The simultaneous late filing of the return and the late payment of the tax will count as one delinquency. See rule 701—67.24(452A). However, the late filing of the return or the late payment of the tax will not count as a delinquency if the license holder can satisfy one of the conditions set forth in Iowa Code section 421.27, penalty waiver.

(1) Suppliers will be requested to post a bond or security when they have had one or more delinquencies in remitting the fuel tax or timely filing monthly returns during the past six months.

The bond or security will be an amount sufficient to cover six months' fuel tax liability or \$5,000, whichever is greater.

(2) Restrictive suppliers will be requested to post a bond or security when they have had two or more delinquencies in remitting the fuel tax or timely filing monthly returns during the past 12 months.

The bond or security will be an amount sufficient to cover 12 months' fuel tax liability or \$2,000, whichever is greater.

(3) Blenders will be requested to post a bond or security when they have had two or more delinquencies in remitting the fuel tax or timely filing monthly returns during the past six months.

The bond or security will be an amount sufficient to cover 12 months' fuel tax liability or \$2,000, whichever is greater.

(4) Compressed natural gas, liquefied natural gas, and liquefied petroleum gas dealers and users will be requested to post a bond or security when they have had two or more delinquencies in remitting the fuel tax or timely filing monthly returns during the past 12 months. The bond or security will be an amount sufficient to cover 12 months' fuel tax liability or \$500, whichever is greater.

d. Eligible purchasers and end users will be required to post a bond or security when they have failed to pay the tax to a supplier. They will not be allowed to register as an eligible purchaser or end user again until the bond or security requirement has been complied with.

The bond or security will be an amount sufficient to cover six months' fuel tax based on previous purchases.

e. Waiver of bond. If a licensee has been requested to post a bond or security or if an applicant for a license has been requested to post a bond or security, upon the filing of the bond or security if the licensee maintains a good filing record for a period of two years, the licensee may request that the department waive the continued bond or security requirement. Importer bonds will not be waived.

67.21(2) *Type of security or bond.* When it is determined that a licensee or applicant for a fuel tax permit is required to post collateral to secure the collection of the fuel tax, the following types of collateral will be considered as sufficient: cash, surety bonds, securities, or certificates of deposit. “Cash” means guaranteed funds including, but not limited to, cashier’s check, money order, or certified check. If cash is posted as a bond, the bond will not be considered filed until the final payment is made, if paid in installments. A certificate of deposit must have a maturity date of 24 months from the date of assignment to the department. An assignment from the bank must accompany the original certificate of deposit filed with the department for the bank to be released from liability. When a licensee elects to post cash rather than a certificate of deposit as a bond, conversion to a certificate of deposit will not be allowed. When the licensee is a corporation, an officer of the corporation may assume personal responsibility for the payment of fuel tax. Security requirements for the officer will be evaluated as provided in 67.21(1) above as if the officer applied for a fuel tax license as an individual.

This rule is intended to implement Iowa Code sections 423.35 and 452A.66.
[ARC 1805C, IAB 1/7/15, effective 2/11/15; ARC 2247C, IAB 11/25/15, effective 12/30/15]

701—67.22(452A) Tax refund offset. The department may apply any fuel tax refund against any other liability outstanding.

This rule is intended to implement Iowa Code sections 452A.17 and 421.17.

701—67.23(452A) Supplier, restrictive supplier, importer, exporter, blender, dealer, or user licenses.

67.23(1) *Requirements for license.* In order to become licensed as a fuel supplier, restrictive supplier, importer, exporter, blender, dealer, or user, the person must file a written application with the department. The license is valid until revoked or canceled, and is nonassignable. The application is to include, but not be limited to, the following information:

- a. The name under which the licensee will transact business in the state.
- b. The location of the principal place of business of the licensee and the mailing address if different.
- c. The social security number or federal identification number of the licensee.
- d. The type of ownership.
- e. The name and complete residency address of the owner(s) of the business or, if a corporation or association, the names and addresses of the principal officers.
- f. The type of license being requested.
- g. Exporters only — the state and license number for that state in which the fuel is being exported.
- h. The signature of the person making the application. For electronically transmitted applications, the application form shall state that, in lieu of the person’s handwritten signature, the person’s E-mail address or the person’s fax signature will constitute a valid signature.

67.23(2) *Assignment of a license.* The following are nonexclusive situations that are considered assignments, and the acquiring person must apply for a new license.

- a. A sale of the taxpayer’s business, even if the new owner operates under the same name.
- b. A change of the name under which the licensee conducts business.
- c. A merger or other business combination which results in a new or different entity.

67.23(3) *Denial of a license.* The department may deny a license to any applicant who is, at the time of application, substantially delinquent in paying any tax due which is administered by the department or the interest or penalty on the tax and will deny a permit of an individual if the department has received a certificate of noncompliance from the child support recovery unit in regard to an individual. If the applicant is a partnership, a license may be denied if a partner is substantially delinquent in paying any tax, penalty, or interest regardless of whether the tax is in any way a liability of or associated with the partnership. If an applicant for a license is a corporation, the department may deny the applicant a license if any officer with a substantial legal or equitable interest in the ownership of the corporation owes any delinquent tax, penalty, or interest of the applicant corporation. See rule 701—13.16(422) for

a characterization of the terms “tax administered by the department” and “substantially delinquent” in paying a tax. If the application for a license is denied, see rule 701—7.23(17A) for rights to appeal.

67.23(4) *Revocation of a license.* The department may revoke the license of any licensee who becomes substantially delinquent in paying any tax which is administered by the department or the interest or penalty on the tax and will revoke a license of an individual if the department has received a certificate of noncompliance from the child support recovery unit in regard to an individual. If a licensee is a corporation, the department may revoke the license if any officer with a substantial legal or equitable interest in the ownership of the corporation owes any delinquent tax, penalty, or interest of the applicant corporation. If the licensee is a partnership, the license may not be revoked for a partner’s substantial delinquency in paying any tax, penalty, or interest which is not a liability of the partnership. See rule 701—13.16(422) for characterizations of the terms “tax administered by the department” and “substantially delinquent” in paying a tax. The department may also revoke the license of any licensee who abuses the privileges for which the license was issued, who files a false return, or who fails to file a return (including supporting schedules), pay the full amount of tax due, produce records requested, or extend cooperation to the department. See rule 701—7.55(17A) for rights to appeal.

67.23(5) *Efficient administration of motor fuel laws.* When in the opinion of the director it is necessary for the efficient administration of Iowa Code chapter 452A, the director may regard persons or facilities in possession of motor fuel, special fuel, biofuel, alcohol, or alcohol derivative substances as blenders, dealers, eligible purchasers, exporters, importers, restrictive suppliers, suppliers, terminal operators, or nonterminal storage facility operators. The department will notify the person or facility of the various requirements under the motor fuel tax laws and will ensure that a license is issued.

This rule is intended to implement Iowa Code sections 452A.4 and 452A.6.
[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—67.24(452A) *Reinstatement of license canceled for cause.* A license canceled for cause will be reinstated only on such terms and conditions as the cause may warrant. Terms and conditions will include payments of any applicable fuel tax liability including interest and penalty which is due the department.

Pursuant to the director’s statutory authority in Iowa Code section 452A.68 to restore licenses after being canceled for cause, the director has determined that upon the cancellation of a motor vehicle fuel tax license the initial time, the licensee will be required to pay all delinquent fuel tax liabilities including interest and penalty, to file returns, and to post a bond and have refrained from activities requiring a license under sections 452A.4 and 452A.6 during the waiting period as required by the director prior to the reinstatement or issuance of a new motor vehicle fuel tax license.

As set forth above, the director may impose a waiting period during which the licensee must refrain from activities requiring a license pursuant to the penalties provided in Iowa Code section 452A.74 for a period not to exceed 90 days as a condition for the restoration of a license or the issuance of a new license after cancellation for cause. The department may require a statement that the licensee has fulfilled all requirements of said order canceling the license for cause and the dates on which the license holder refrained from restricted activities.

Each of the following situations will be considered one offense for the purpose of determining the waiting period to reinstate a license canceled for cause or issuing a new license after being canceled for cause unless otherwise noted.

Failure to post a bond as required.

Failure to file a report or return timely.

Failure to pay tax timely (including unhonored payments, failure to pay and late payments).

Failure to file a return and pay tax as shown on the return (counts as one offense).

The hearing officer or director of revenue may order a waiting period after the cancellation for cause not to exceed:

Five days for one through five offenses.

Seven days for six or seven offenses.

Ten days for eight or nine offenses.

Thirty days for ten offenses or more.

The hearing officer or director of revenue may order a waiting period not to exceed:

Forty-five days if the second cancellation for cause occurs within 24 months of the first cancellation for cause.

Sixty days if the second cancellation for cause occurs within 18 months of the first cancellation for cause.

Ninety days if the second cancellation for cause occurs within 12 months of the first cancellation for cause.

Ninety days if the third cancellation for cause occurs within 36 months of the second cancellation for cause. See 701—subrule 7.24(1) for rights to appeal.

This rule is intended to implement Iowa Code section 452A.68 as amended by 1999 Iowa Acts, Senate File 136.

701—67.25(452A) Fuel used in implements of husbandry. Dyed special fuel is exempt from tax. Motor fuel or undyed special fuel is subject to refund when used in implements of husbandry as defined in Iowa Code section 321.1(32). A vehicle as defined in Iowa Code section 321.1(90) is not an implement of husbandry. The department of revenue, the state department of transportation, the department of public safety, and any other peace officer as requested by such department is empowered to enforce the use of special fuel or motor fuel in any illegal manner, including the inspection and testing of fuel in the fuel supply tank of an implement of husbandry.

This rule is intended to implement Iowa Code section 452A.76 as amended by 1995 Iowa Acts, chapter 155.

701—67.26(452A) Excess tax collected. If a licensee collects tax on exempt fuel or collects more tax than is due, the licensee must return the excess tax paid to the purchaser if the tax has not been paid to the department. If the tax has been paid to the department, the department will return the excess tax paid to the consumer upon appropriate documentation.

This rule is intended to implement 1999 Iowa Acts, Senate File 136, section 66.

701—67.27(452A) Retailer gallons report. The department is required to compile information reported to it by retail dealers regarding the number of gallons of the various fuel classifications sold by retail dealers in the previous calendar year and submit a report to the governor and the legislative services agency by April 1 of each year. Each retail dealer is required to file a report with the department detailing the number of motor fuel gallons sold during the previous calendar year on both a companywide basis and a site-by-site basis as required by the department. The retail dealer report is due by January 31 following the close of the calendar year.

The report filed by the department will include information in the aggregate relating to total sales of gasoline, ethanol blended gasoline, diesel fuel and biofuels. The report will also include appropriate percentage sales of various fuel products. The report will not include individual retail dealer information, trade secret information or confidential information.

This rule is intended to implement Iowa Code section 452A.33 as amended by 2011 Iowa Acts, Senate File 531.

CHAPTER 68
MOTOR FUEL AND UNDYED SPECIAL FUEL
[Prior to 1/1/96, see 701—Ch 64]

701—68.1(452A) Definitions. See 701—67.1(452A).

701—68.2(452A) Tax rates—time tax attaches—responsible party.

68.2(1) The following rates of tax apply to the use of fuel in operating motor vehicles and aircraft:

Gasoline	20.3¢ per gallon (for July 1, 2003, through June 30, 2004) 20.5¢ per gallon (for July 1, 2004, through June 30, 2005) 20.7¢ per gallon (for July 1, 2005, through June 30, 2006) 21¢ per gallon (for July 1, 2006, through June 30, 2007) 20.7¢ per gallon (for July 1, 2007, through June 30, 2008) 21¢ per gallon (for July 1, 2008, through February 28, 2015) 31¢ per gallon (for March 1, 2015, through June 30, 2015) 30.8¢ per gallon (beginning July 1, 2015)
Ethanol blended gasoline	19¢ per gallon (for July 1, 2003, through February 28, 2015) 29¢ per gallon (for March 1, 2015, through June 30, 2015) 29.3¢ per gallon (beginning July 1, 2015)
E-85 gasoline	17¢ per gallon (for January 1, 2006, through June 30, 2007) 19¢ per gallon (for July 1, 2007, through February 28, 2015) 29¢ per gallon (for March 1, 2015, through June 30, 2015) 29.3¢ per gallon (beginning July 1, 2015)
Aviation gasoline	8¢ per gallon (beginning July 1, 1988)
Diesel fuel other than B-11 or higher	22.5¢ per gallon (on and before February 28, 2015) 32.5¢ per gallon (beginning March 1, 2015)
Biodiesel blended fuel (B-11 or higher)	22.5¢ per gallon (on and before February 28, 2015) 32.5¢ per gallon (for March 1, 2015, through June 30, 2015) 29.5¢ per gallon (beginning July 1, 2015)
Aviation jet fuel	3¢ per gallon (on and before February 28, 2015) 5¢ per gallon (beginning March 1, 2015)
L.P.G.	20¢ per gallon (on and before February 28, 2015) 30¢ per gallon (beginning March 1, 2015)
C.N.G.	16¢ per 100 cu. ft. (on and before June 30, 2014) 21¢ per gallon (for July 1, 2014, through February 28, 2015) 31¢ per gallon (beginning March 1, 2015)
L.N.G.	22.5¢ per gallon (on and before February 28, 2015) 32.5¢ per gallon (beginning March 1, 2015)

68.2(2) Fuel distribution percentages.

a. Ethanol distribution percentage.

(1) Except as otherwise provided in this paragraph, for March 1, 2015, through June 30, 2020, this paragraph shall apply to the excise tax imposed on each gallon of motor fuel used for any purpose for the privilege of operating motor vehicles in this state. The rate of the excise tax shall be based on the ethanol distribution percentage. The ethanol distribution percentage is the number of gallons of ethanol blended gasoline that is distributed in this state as expressed as a percentage of the number of gallons of motor fuel, excluding aviation gasoline, distributed in this state. The number of gallons of ethanol blended gasoline and motor fuel distributed in this state shall be based on the total taxable gallons of ethanol blended gasoline and motor fuel as shown on the fuel tax monthly reports issued by the department for January through December for each determination period. The department shall determine the percentage for each determination period beginning January 1 and ending December 31. The rate for the excise tax

shall apply for the period beginning July 1 and ending June 30 following the end of the determination period. The rate for the excise tax shall be as follows:

<u>Ethanol Distribution %</u>	<u>Ethanol Tax</u>	<u>Gasoline Tax</u>
00/50	29.0	30.0
50+/55	29.0	30.1
55+/60	29.0	30.3
60+/65	29.0	30.5
65+/70	29.0	30.7
70+/75	29.0	31.0
75+/80	29.3	30.8
80+/85	29.5	30.7
85+/90	29.7	30.4
90+/95	29.9	30.1
95+/100	30.0	30.0

(2) Except as otherwise provided in this paragraph, after June 30, 2020, an excise tax of 30 cents is imposed on each gallon of motor fuel used for any purpose for the privilege of operating motor vehicles in this state.

b. Biodiesel distribution percentage.

(1) Except as otherwise provided in this paragraph, for July 1, 2015, through June 30, 2020, this paragraph shall apply to the excise tax imposed on each gallon of special fuel for diesel engines of motor vehicles used for any purpose for the privilege of operating motor vehicles in this state. The rate of the excise tax shall be based on the biodiesel distribution percentage. The biodiesel distribution percentage is the number of gallons of biodiesel blended fuel classified as B-11 or higher that is distributed in this state as expressed as a percentage of the number of gallons of special fuel for diesel engines of motor vehicles distributed in this state. The number of gallons of biodiesel blended fuel and special fuel for diesel engines of motor vehicles distributed in this state shall be based on the total taxable gallons of biodiesel blended fuel and special fuel for diesel engines of motor vehicles as shown on the fuel tax monthly reports issued by the department for January through December for each determination period. The department shall determine the percentage for each determination period beginning January 1 and ending December 31. The rate for the excise tax shall apply for the period beginning July 1 and ending June 30 following the end of the determination period. The rate for the excise tax shall be as follows:

<u>Biodiesel Distribution %</u>	<u>B-11 or Higher Tax</u>	<u>Other Than B-11 or Higher Tax</u>
00/50	29.5	32.5
50+/55	29.8	32.5
55+/60	30.1	32.5
60+/65	30.4	32.5
65+/70	30.7	32.5
70+/75	31.0	32.5
75+/80	31.3	32.5
80+/85	31.6	32.5
85+/90	31.9	32.5
90+/95	32.2	32.5
95+/100	32.5	32.5

(2) The determination period for the biodiesel distribution percentage is January through December each calendar year. Prior to July 1, 2015, Iowa licensees did not separately report the total taxable gallons of biodiesel blended fuel classified as B-11 or higher that is distributed in this state. Accordingly, the department cannot calculate the biodiesel distribution percentage for calendar years 2014 and 2015 using the method described in subparagraph 68.2(2)“b”(1). However, the best information available to the department indicates the biodiesel distribution percentage is not greater than 50 percent for calendar years 2014 and 2015. Therefore, for the period between July 1, 2015, and June 30, 2016, and for the period between July 1, 2016, and June 30, 2017, the rates for the excise tax on special fuel for diesel engines of motor vehicles are based on a biodiesel distribution percentage of 00/50%.

(3) Except as otherwise provided in this paragraph, for the period between March 1, 2015, and June 30, 2015, and for the period after June 30, 2020, an excise tax of 32.5 cents is imposed on each gallon of special fuel for diesel engines of motor vehicles used for any purpose for the privilege of operating motor vehicles in this state.

c. Legislative review. The ethanol distribution percentage, the biodiesel distribution percentage, and the corresponding excise tax rates are subject to legislative review at least every six years. The review is based upon a fuel distribution percentage formula status report, which contains the recommendations of a legislative interim committee appointed to conduct a review of the fuel distribution percentage formulas. The report is prepared with the assistance of the Iowa department of revenue and the Iowa department of transportation. The report includes recommendations for changes or revisions to the fuel distribution percentage formulas based upon advances in technology, fuel use trends, and fuel price fluctuations observed during the preceding six-year interval; an analysis of the operation of the fuel distribution percentage formulas during the preceding six-year interval; and a summary of issues that have arisen since the previous review and potential approaches for resolution of those issues. The first report will be submitted to the general assembly no later than January 1, 2020, with subsequent reports developed and submitted by January 1 at least every sixth year thereafter.

68.2(3) The tax attaches when the fuel is withdrawn from a terminal or imported into Iowa. The tax is payable to the department by the supplier, restrictive supplier, importer, blender, or any person who owns the fuel at the time it is brought into the state by a restrictive supplier or importer or any other person who possesses taxable fuel upon which the tax has not been paid. The tax is to be remitted to the department by a supplier, restrictive supplier, or blender by the last day of the month following the month in which the fuel is withdrawn from a terminal or imported. The tax is to be remitted by an importer by the last day of the month for fuel imported in the first 15 days of the month and by the fifteenth day of the following month for fuel imported after the fifteenth day of the previous month. Nonlicensees who possess taxable fuel upon which the tax has not been paid must file returns and pay the tax the same as a restrictive supplier (monthly). All licensees must make payment by electronic funds transfer (see publication 90-201 for EFT requirements).

68.2(4) The department shall determine the actual tax paid for E-85 gasoline in the previous calendar year and compare this amount to the amount that would have been paid using the tax rate imposed in Iowa Code section 452A.3, subsection 1 or 2. If the difference is less than \$25,000, the tax rate for the tax period beginning the following July 1 shall be 17¢ per gallon. If the difference is \$25,000 or more, the tax rate shall be the rate in effect pursuant to Iowa Code section 452A.3, subsection 1 or 2.

Beginning January 1, 2006, retailers of E-85 gasoline must file a report with the department by the last day of the month of each calendar quarter for each retail location showing the number of invoiced gallons of E-85 gasoline sold by the retailer in Iowa during the preceding calendar quarter. The report must also include a listing of the vendors providing E-85 gasoline to the retailer and the number of gallons received from each vendor. If the retailer blends E-85 gasoline, the retailer must show the number of gallons of motor fuel (including both gasoline and alcohol) purchased and blended. The report must be signed under penalty for false certificate.

68.2(5) Persons having title to motor fuel, ethanol blended gasoline, undyed special fuel, compressed natural gas, liquefied natural gas, or liquefied petroleum gas in storage and held for sale on the effective date of an increase in the excise tax rate imposed on motor fuel, ethanol blended gasoline, undyed special fuel, compressed natural gas, liquefied natural gas, or liquefied petroleum gas shall be subject to an

inventory tax based upon the gallonage in storage as of the close of the business day preceding the effective date of the increased excise tax rate of motor fuel, ethanol blended gasoline, undyed special fuel, compressed natural gas, liquefied natural gas, or liquefied petroleum gas which will be subject to the increased excise tax rate.

Persons subject to the tax imposed under this subrule shall take an inventory to determine the gallonage in storage for purposes of determining the tax and shall report the gallonage and pay the tax due within 30 days of the prescribed inventory date.

The amount of the inventory tax is equal to the inventory tax rate times the gallonage in storage. The inventory tax rate is equal to the increased excise tax rate less the previous excise tax rate. The inventory tax does not apply to an increase in the tax rate of a specified fuel, except for compressed natural gas, unless the increase in the tax rate of that fuel is in excess of one-half cent per gallon.

This rule is intended to implement Iowa Code sections 452A.3, 452A.8 and 452A.85.
[ARC 8225B, IAB 10/7/09, effective 11/11/09; ARC 0399C, IAB 10/17/12, effective 11/21/12; ARC 1442C, IAB 4/30/14, effective 6/4/14; ARC 1805C, IAB 1/7/15, effective 2/11/15; ARC 2247C, IAB 11/25/15, effective 12/30/15]

701—68.3(452A) Exemption. Motor fuel or undyed special fuel sold for export or exported from this state to another state, territory, or foreign country is exempt from the excise tax. The fuel is deemed sold for export or exported only if the bill of lading or manifest indicates that the destination of the fuel withdrawn from the terminal is outside the state of Iowa. The mode of transportation is not of consequence. In the event fuel is taxed and then subsequently exported, an amount equal to the tax previously paid will be allowable as a refund, upon receipt by the department of the appropriate documents, to the party who originally paid the tax. If the sale of exported fuel is completed in Iowa, then the sale is subject to Iowa sales tax if it is not exported for resale or otherwise exempt from sales tax. The sale is completed in Iowa if the foreign purchaser takes physical possession of the fuel in this state. *Dodgen Industries, Inc. v. Iowa State Tax Commission*, 160 N.W.2d 289 (Iowa 1968). See sales tax rule 701—18.37(422,423).

Indelible dye meeting United States Environmental Protection Agency and Internal Revenue Service regulations must be added to fuel before or upon withdrawal at a terminal or refinery rack for that fuel to be exempt from tax and the dyed fuel can only be used for a nontaxable purpose listed in Iowa Code section 452A.17, subsection 1, paragraph “a.” However, this exemption does not apply to fuel used for idle time, power takeoffs, reefer units, or pumping credits, or fuel used by contract carriers.

This rule is intended to implement Iowa Code section 452A.3 as amended by 1995 Iowa Acts, chapter 155.

701—68.4(452A) Blended fuel taxation—nonterminal location.

68.4(1) Responsibilities of all blenders at nonterminal locations. A person who blends ethanol blended gasoline or biodiesel blended fuel at a nonterminal location must obtain a blender’s license. Blending ethanol with gasoline, or blending biodiesel with petrodiesel, may result in additional tax due or an allowable refund depending on the alcohol content of the mixture and the tax paid on its components. The blender must make payment to the department for the additional tax due. The blender must obtain a refund permit to receive a refund of the overpayment of tax on the blended product.

EXAMPLE 1. A blender blends three parts ethanol with 17 parts gasoline to create E-15. The E-15 is taxed as ethanol blended gasoline, and the blender may be due a refund for excess tax paid on the gasoline used.

EXAMPLE 2. A blender blends one part biodiesel with four parts petrodiesel to create B-20. The B-20 is taxed as B-11 or higher, and the blender may be due a refund for excess tax paid on the petrodiesel used.

EXAMPLE 3. A blender blends one part biodiesel with 19 parts petrodiesel to create B-5. The B-5 is taxed as diesel other than B-11 or higher, and the blender may owe additional tax to the department on the biodiesel used.

EXAMPLE 4. A blender blends one part B-20 with five parts B-2 to create B-5. The B-5 is taxed as diesel other than B-11 or higher, and the blender may owe additional tax to the department on the B-20 used.

68.4(2) Blenders of ethanol blended gasoline.

a. A blender who owns the alcohol (supplier) being used to blend with gasoline must purchase the gasoline from a supplier and pay the appropriate tax to the supplier. The blender must obtain a blender's license and compute the tax due on the total gallons of blended product and make payment to the department for the additional amount due. For purposes of the following example, the tax rate for gasoline is presumed to be 30¢ per gallon and the tax rate for ethanol blended gasoline is presumed to be 29¢ per gallon. The actual tax rates for the appropriate period are shown in subrule 68.2(1).

EXAMPLE:

Blender purchases 7,200 gallons tax-paid gasoline ($7,200 \times .30$) =	\$2,160.00
Blender adds 800 gallons untaxed alcohol	\$.00
Total tax paid on products	<u>\$2,160.00</u>
Total tax due on 8,000 gallons ethanol blended gasoline ($8,000 \times .29$) =	\$2,320.00
Additional Amount Due	<u>\$160.00</u>

b. A blender who purchases alcohol and gasoline from a supplier must pay tax on both the alcohol purchased and the gasoline purchased. The blender must obtain a refund permit to receive a refund of the overpayment of tax on the blended product. For purposes of the following example, the tax rate for gasoline is presumed to be 30¢ per gallon and the tax rate for ethanol blended gasoline is presumed to be 29¢ per gallon. The actual tax rates for the appropriate period are shown in subrule 68.2(1).

EXAMPLE:

Blender purchases 7,200 gallons tax-paid gasoline ($7,200 \times .30$) =	\$2,160.00
Blender purchases 800 gallons tax-paid alcohol ($800 \times .29$) =	\$232.00
Total tax paid on products	<u>\$2,392.00</u>
Total tax due on 8,000 gallons ethanol blended gasoline ($8,000 \times .29$) =	\$2,320.00
Amount of Refund Allowable	<u>\$72.00</u>

c. Ethanol blended gasoline—blending errors.

Where a blending error occurs and an insufficient amount of alcohol has been blended with gasoline so that the mixture fails to qualify as ethanol blended gasoline as defined in Iowa Code section 452A.2, a 1 percent tolerance applies in determining the tax on the blended product as described in this paragraph:

(1) If the amount of the alcohol erroneously blended with gasoline is at least 9 percent of the total blended product by volume, the alcohol and gasoline blended product is considered ethanol blended gasoline and there is no penalty or assessment of additional tax.

(2) If the amount of alcohol erroneously blended with gasoline is less than 9 percent of the total blended product by volume, the total blend of gasoline and alcohol is subject to tax as gasoline at the prevailing rate of tax.

(3) This paragraph applies only if a blender intends to produce ethanol blended gasoline. If a blender does not intend to produce ethanol blended gasoline when blending alcohol and gasoline, and the mixture contains less than 10 percent alcohol by volume, no error has occurred and the mixture is subject to tax as gasoline.

(4) The following formulas are used to compute blending errors:

Actual gasoline + actual alcohol = total gallons of blended product

Total gallons of blended product $\times .09$ = required alcohol

(5) Examples. The following factors are assumed for all examples:

The blender in each example intends to blend ethanol blended gasoline. Figures are rounded to the nearest whole gallon; ethanol blended gasoline is taxed at \$.29 per gallon; gasoline is taxed at \$.30 per

gallon. The actual tax rates for the appropriate period are shown in subrule 68.2(1). Penalty and interest charges are not computed in the examples.

EXAMPLE 1:

Actual gasoline	=	8,000 gal.
Actual alcohol	=	800 gal.
Total blended product	=	8,800 gal.
$8,800 \times .09$	=	792 gal. required alcohol

The actual alcohol (800 gallons) is more than the required alcohol (792 gallons), which means that the tax is applied according to subparagraph 68.4(2)“c”(1) as follows:

$$8,800 \text{ gal. of blended product} \times \$2.29 = \$2,552 \text{ tax on ethanol blended gasoline}$$

EXAMPLE 2:

Actual gasoline	=	8,010 gal.
Actual alcohol	=	790 gal.
Total blended product	=	8,800 gal.
$8,800 \times .09$	=	792 gal. required alcohol

The actual alcohol (790 gallons) is less than the required alcohol (792 gallons), which means that the entire blend is considered gasoline and the tax is applied according to subparagraph 68.4(2)“c”(2) as follows:

$$8,800 \text{ gal. of blended product} \times \$3.00 = \$2,640 \text{ tax on gasoline}$$

68.4(3) Blenders of biodiesel blended fuel.

a. A blender who owns the biodiesel (supplier) being used to blend with diesel must purchase the diesel from a supplier and pay the appropriate tax to the supplier. The blender must obtain a blender’s license and compute the tax due on the total gallons of blended product and make payment to the department for the additional amount due. For purposes of the following examples, the tax rate for B-11 or higher is presumed to be 29¢ per gallon and the tax rate for diesel other than B-11 or higher is presumed to be 32.5¢ per gallon. The actual tax rates for the appropriate period are shown in subrule 68.2(1).

EXAMPLE 1.

Blender purchases 7,120 gallons tax-paid petrodiesel ($7,120 \times .325$) =	\$2,314.00
Blender adds 880 gallons untaxed biodiesel =	\$0.00
Total tax paid on products =	<u>\$2,314.00</u>

The blended product is 8,000 gallons of diesel, which includes 880 gallons (11% by volume) of biodiesel. Thus, the product is taxed as B-11 or higher.

Total tax due on 8,000 gallons blended B-11 or higher ($8,000 \times .29$) =	\$2,320.00
Additional Amount Due =	<u>\$6.00</u>

EXAMPLE 2.

Blender purchases 7,600 gallons tax-paid petrodiesel ($7,600 \times .325$) =	\$2,470.00
Blender adds 400 gallons untaxed biodiesel =	\$.00
Total tax paid on products =	<u>\$2,470.00</u>

The blended product is 8,000 gallons of diesel, which includes 400 gallons (5% by volume) of biodiesel. Thus, the product is taxed as diesel other than B-11 or higher.

Total tax due on 8,000 gallons diesel other than B-11 or higher ($8,000 \times .325$) =	\$2,600.00
Additional Amount Due =	<u>\$130.00</u>

EXAMPLE 3.

Blender purchases 7,750 gallons tax-paid B-2 ($7,750 \times .325$) =	\$2,518.75
Blender adds 250 gallons untaxed biodiesel =	\$.00
Total tax paid on products =	<u>\$2,518.75</u>

7,750 gallons of B-2 contains 155 gallons (2%) of biodiesel. The blended product is 8,000 gallons of diesel, which includes 405 gallons (155 + 250, or 5% by volume) of biodiesel. Thus, the product is taxed as diesel other than B-11 or higher.

Total tax due on 8,000 gallons diesel other than B-11 or higher ($8,000 \times .325$) =	\$2,600.00
Additional Amount Due =	<u>\$81.25</u>

b. A blender who purchases diesel products from a supplier must pay the appropriate tax on all diesel products purchased. The blender must obtain a blender's license and compute the tax due on the total gallons of blended product and make payment to the department for any additional amount due. The blender must also obtain a refund permit to receive a refund of any overpayment of tax on the blended product. For purposes of the following examples, the tax rate for B-11 or higher is presumed to be 29¢ per gallon and the tax rate for diesel fuel other than B-11 or higher is presumed to be 32.5¢ per gallon. The actual tax rates for the appropriate period are shown in subrule 68.2(1).

EXAMPLE 1.

Blender purchases 7,120 gallons tax-paid petrodiesel ($7,120 \times .325$) =	\$2,314.00
Blender purchases 880 gallons tax-paid biodiesel ($880 \times .29$) =	\$255.20
Total tax paid on products =	<u>\$2,569.20</u>

The blended product is 8,000 gallons of diesel, which includes 880 gallons (11% by volume) of biodiesel. Thus, the product is taxed as B-11 or higher.

Total tax due on 8,000 gallons blended B-11 or higher ($8,000 \times .29$) =	\$2,320.00
Amount of Refund Allowable =	<u>\$249.20</u>

EXAMPLE 2.

Blender purchases 7,600 gallons tax-paid petrodiesel ($7,600 \times .325$) =	\$2,470.00
Blender purchases 400 gallons tax-paid biodiesel ($400 \times .29$) =	\$116.00
Total tax paid on products =	<u>\$2,586.00</u>

The blended product is 8,000 gallons of biodiesel blended fuel, which includes 400 gallons (5% by volume) of biodiesel. Thus, the product is taxed as diesel other than B-11 or higher.

Total tax due on 8,000 gallons blended B-5 ($8,000 \times .325$) =	\$2,600.00
Additional Amount Due =	<u>\$14.00</u>

EXAMPLE 3.

Blender purchases 4,000 gallons tax-paid B-2 ($4,000 \times .325$) =	\$1,300.00
Blender purchases 4,000 gallons tax-paid B-20 ($4,000 \times .29$) =	\$1,160.00
Total tax paid on products =	<u>\$2,460.00</u>

4,000 gallons of B-2 contains 80 gallons (2%) of biodiesel, and 4,000 gallons of B-20 contains 800 gallons (20%) of biodiesel. The blended product is 8,000 gallons of diesel, which includes 880 gallons (80 + 800, or 11% by volume) of biodiesel. Thus, the product is taxed as B-11 or higher.

Total tax due on 8,000 gallons B-11 or higher ($8,000 \times .29$) =	\$2,320.00
Amount of Refund Allowable =	<u>\$140.00</u>

c. Blending errors. Where a blending error occurs and an insufficient amount of biodiesel has been blended with petrodiesel so that the mixture fails to qualify as B-11 or higher as defined in rule 701—67.1(452A), a 1 percent tolerance applies in determining the tax on the blended product as described in this paragraph:

(1) If the amount of the biodiesel erroneously blended with petrodiesel is at least 10 percent of the total blended product by volume, the biodiesel and petrodiesel blended product is considered B-11 or higher and there is no penalty or assessment of additional tax.

(2) If the amount of biodiesel blended with petrodiesel is less than 10 percent of the total blended product by volume, the entire mixture is considered taxable diesel other than B-11 or higher and subject to tax at the prevailing rate.

(3) This paragraph applies only if a blender intends to produce B-11 or higher. If a blender does not intend to produce B-11 or higher when blending biodiesel and petrodiesel, and the mixture contains less than 11 percent biodiesel by volume, no error has occurred and the mixture is subject to tax as diesel other than B-11 or higher.

(4) The following formulas are used to compute blending errors:

Actual biodiesel + actual petrodiesel = total gallons of blended product

Total gallons of blended product $\times .1$ = required biodiesel

(5) Examples. The following factors are assumed for all examples:

The blender in each example intends to blend B-11 or higher. Figures are rounded to the nearest whole gallon; B-11 or higher is taxed at \$.29 per gallon; diesel other than B-11 or higher is taxed at \$.325 per gallon. The actual tax rates for the appropriate period are shown in subrule 68.2(1). Penalty and interest charges are not computed in the examples.

EXAMPLE 1.

Actual petrodiesel	=	8,095 gal.
Actual biodiesel	=	905 gal.
Total blended product	=	9,000 gal.
$9,000 \times .1$	=	900 gal. required biodiesel

The actual biodiesel (905 gallons) is more than the required biodiesel (900 gallons). Thus, the tax is applied according to subparagraph 68.4(3)“c”(1) as follows:

$$\begin{aligned} 9,000 \text{ gal. of blended product} &= \$2,610 \text{ tax on B-11 or higher} \\ \times \$.29 & \end{aligned}$$

EXAMPLE 2.

$$\begin{aligned} \text{Actual petrodiesel} &= 8,105 \text{ gal.} \\ \text{Actual biodiesel} &= 895 \text{ gal.} \\ \text{Total blended product} &= 9,000 \text{ gal.} \\ 9,000 \times .1 &= 900 \text{ gal. required biodiesel} \end{aligned}$$

The actual biodiesel (895 gallons) is less than the required biodiesel (900 gallons). Thus, the tax is applied according to subparagraph 68.4(3)“c”(2) as follows:

$$\begin{aligned} 9,000 \text{ gal. of blended product} &= \$2,925 \text{ tax on diesel other than B-11 or higher} \\ \times \$.325 & \end{aligned}$$

EXAMPLE 3.

A blender erroneously mixes 5,000 gallons of B-2 with 4,500 gallons of B-20 with the intent of creating B-11 or higher. 5,000 gallons of B-2 contains 100 gallons (2%) of biodiesel. 4,500 gallons of B-20 contains 900 gallons (20%) of biodiesel. Thus, the 9,500 gallons (4,500 + 5,000) of blended product includes 1,000 gallons (100 + 900) of biodiesel and 8,500 gallons (9,500 – 1,000) of petrodiesel.

$$\begin{aligned} \text{Actual petrodiesel} &= 8,500 \text{ gal.} \\ \text{Actual biodiesel} &= 1,000 \text{ gal.} \\ \text{Total blended product} &= 9,500 \text{ gal.} \\ 9,500 \times .1 &= 950 \text{ gal. required biodiesel} \end{aligned}$$

The actual biodiesel (1,000 gallons) is greater than the required biodiesel (950 gallons), which means that the entire blend is considered B-11 or higher and the tax is applied according to subparagraph 68.4(3)“c”(1) as follows:

$$\begin{aligned} 9,500 \text{ gal. of blended product} &= \$2,755 \text{ tax on B-11 or higher} \\ \times \$.29 & \end{aligned}$$

This rule is intended to implement Iowa Code section 452A.8 as amended by 2015 Iowa Acts, Senate File 257.

[ARC 2247C, IAB 11/25/15, effective 12/30/15]

701—68.5(452A) Tax returns—computations.

68.5(1) Supplier—nexus.

a. The fuel tax liability for a supplier is computed by multiplying the per gallon fuel tax rate by the total number of invoiced gallons of motor fuel or undyed special fuel withdrawn from the terminal by the supplier within the state or by the supplier with an Iowa nexus from a terminal outside the state during the preceding calendar month, less deductions for fuel exported in the case of in-state withdrawals and the distribution allowance provided for in Iowa Code section 452A.5.

Tax shall not be paid when the sale of alcohol occurs within a terminal from an alcohol manufacturer to a licensed supplier. The tax shall be paid by the licensed supplier when the invoiced gross gallonage of the alcohol or the alcohol part of the ethanol blended gasoline is withdrawn from a terminal for delivery in this state. This makes the licensed supplier responsible for the tax on both the alcohol and the gasoline portions of the ethanol blended gasoline and for the reporting and accounting of this fuel as ethanol blended gasoline on the supplier report.

b. If fuel is withdrawn by a supplier with no nexus in Iowa, but who voluntarily agrees to collect and report the tax, from a terminal outside of Iowa for importation into Iowa, the tax liability is computed in the same manner as in paragraph “*a*” with the exception that no deduction is allowable for exports.

68.5(2) The fuel tax liability for a restrictive supplier is to be computed by multiplying the per gallon fuel tax rate by the total number of invoiced gallons of motor fuel or undyed special fuel imported into Iowa during the preceding calendar month.

68.5(3) The fuel tax liability for an importer is computed by multiplying the per gallon fuel tax rate by the total number of invoiced gallons of motor fuel or undyed special fuel imported into Iowa during the applicable reporting period.

68.5(4) The tax liability for a nonlicensee is computed the same as a restrictive supplier. If motor fuel or undyed special fuel is exported from this state with no tax paid and subsequently returned to this state because all or a portion of it was not delivered where destined, the tax must be paid to the department by the nonlicensee.

All entries on the return for determining the tax liability must be rounded to the nearest whole number.

This rule is intended to implement Iowa Code section 452A.3 as amended by 2001 Iowa Acts, House File 736, and sections 452A.5, 452A.8, and 452A.9.

701—68.6(452A) Distribution allowance. The tax computation for a supplier includes a distribution allowance of 1.6 percent of the motor fuel gallonage and 0.7 percent of the undyed special fuel gallonage removed from the terminal during the reporting period. The distributor purchasing the fuel from the supplier is entitled to 1.2 percent of the motor fuel distribution allowance. The distributor or dealer purchasing fuel from a supplier is entitled to 0.35 percent of the undyed special fuel distribution allowance. The distribution allowance does not apply to fuel exported.

This rule is intended to implement Iowa Code sections 452A.5 and 452A.8 as amended by 1995 Iowa Acts, chapter 155.

701—68.7(452A) Supplier credit—uncollectible account. A licensed supplier who is unable to recover the tax from an eligible purchaser or end user is not liable for the tax and may credit the amount of unpaid tax against a later remittance of tax.

68.7(1) To qualify for the credit, the supplier must notify the department in writing of the uncollectible account no later than ten calendar days after the due date for payment of the tax.

Notification is to be sent to the Iowa Department of Revenue, Examination Section, Compliance Division, P. O. Box 10456, Des Moines, Iowa 50306-0456.

68.7(2) A supplier does not qualify for the credit if the purchaser did not elect to apply for the eligible purchaser or end user status or did not qualify to be an eligible purchaser. Likewise, the credit does not apply if the supplier sells additional fuel to a delinquent eligible purchaser or end user after notifying the department that the supplier has an uncollectible debt with an eligible purchaser.

68.7(3) Upon notification from the supplier that an eligible purchaser is in default of the tax payment, that person’s eligible purchaser or end user status will be canceled by the department. The eligible purchaser or end user status will not be reinstated until such time as the purchaser posts securities to guarantee future tax payments as provided in 701—paragraph 67.21(1)“*d.*”

68.7(4) Eligible purchaser. Any distributor of motor fuel or special fuel or end user of special fuel who requests authorization to make delayed payments of the motor vehicle fuel tax must first register with the department to obtain the eligible purchaser status.

The eligible purchaser must pay the tax to the supplier by electronic funds transfer one business day prior to the date the tax is to be paid by the supplier.

Once approved, the eligible purchaser status is valid until voluntarily canceled by the eligible purchaser or canceled by the department of revenue. See 701—subrule 67.23(4).

This rule is intended to implement Iowa Code section 452A.8 as amended by 1995 Iowa Acts, chapter 155.

701—68.8(452A) Refunds. Refunds are allowable for the tax paid on motor fuel and undyed special fuel in the following situations:

68.8(1) Federal government. Fuel sold to the United States or to any agency or instrumentality of the United States. The tax is subject to refund regardless of how the fuel is used. The following factors, among others, will be considered in determining if any organization is an instrumentality of the United States government: (a) whether it was created by the federal government, (b) whether it is wholly owned by the federal government, (c) whether it is operated for profit, (d) whether it is “primarily” engaged in the performance of some “essential” government function, and (e) whether the tax will impose an economic burden upon the federal government or serve to materially impair the usefulness and efficiency of the organization or to materially restrict it in the performance of its duties if it were imposed. *Unemployment Compensation Commission v. Wachovia Bank & Trust Company*, 215 N.C. 491, 2 S.E.2d 592 (1939); 1976 O.A.G. 823, 827. The American Red Cross, Project Head Start, Federal Land Banks and Federal Land Bank Associations, among others, have been determined to be instrumentalities of the federal government. Receivers or trustees appointed in the federal bankruptcy proceedings are subject to the excise tax. *Wood Brothers Construction Co. v. Bagley*, 232 Iowa 902, 6 N.W.2d 397 (1942).

The refund is not available to employees of the federal government who purchase fuel individually and are later reimbursed by the federal government. The name of the federal agency must appear on the invoice as the purchaser of the fuel or the refund will not be allowed.

68.8(2) Transit systems. Fuel sold to an Iowa urban transit system as defined in 701—67.1(452A) or a company operating a taxicab service under contract with an Iowa urban transit system which is used for a purpose specified in Iowa Code section 452A.57(6) and fuel sold to a regional transit system as defined in 701—67.1(452A) which is used for a purpose specified in Iowa Code section 452A.57(11).

68.8(3) The state and political subdivisions. Fuel sold to the state of Iowa or any political subdivision of the state which is used for public purposes.

The refund is not available to agencies or instrumentalities of a political subdivision, but rather only to the state of Iowa, agencies of the state of Iowa, and political subdivisions of the state of Iowa. The general attributes and factors in determining if an entity is a political subdivision of the state of Iowa are: (a) the entity has a specific geographic area, (b) the entity has public officials elected at public elections, (c) the entity has taxing power, (d) the entity has a general public purpose or benefit, and (e) the foregoing attributes, factors or powers were delegated to the entity by the state of Iowa. (1976 O.A.G. 823)

The refund is also not available to employees of a governmental unit who purchase fuel individually and are later reimbursed by the governmental unit. The name of the governmental unit must appear on the invoice as the purchaser of the fuel or the refund will not be allowed. *Alabama v. King & Boozer*, 314 U.S. 1 (1941).

68.8(4) Contract carriers. Motor fuel and undyed special fuel sold to a contract carrier who has a contract with a public school under Iowa Code section 285.5 for the transportation of pupils of an approved public or nonpublic school is refundable. If the contract carrier also uses fuel for purposes other than the transportation of pupils, the refund will be based on that percentage of the total amount of fuel purchased which reflects the pupil transportation usage.

A refund requested by contract carriers will be reduced by the applicable sales tax unless otherwise exempt. The name of the contract carrier must appear on the invoice as the purchaser of the fuel or the refund will not be allowed. *Alabama v. King & Boozer*, 314 U.S. 1 (1941).

68.8(5) Fuel used in unlicensed vehicles, stationary engines, machinery and equipment used for nonhighway purposes, implements used in agricultural production, and fuel used for home heating.

68.8(6) Fuel used for producing denatured alcohol.

68.8(7) Fuel used in the watercraft of a commercial fisher, licensed and operating under an owner’s certificate for commercial fishing gear issued pursuant to Iowa Code section 482.4.

68.8(8) Fuel placed in motor vehicles, whether registered or not registered, not operated on public highways, and used in the extraction and processing of natural deposits.

68.8(9) Idle time. Persons who wish to claim a refund for idle time (the engine is running but not propelling the vehicle) must first apply to the department and provide statistical information on how the refund amount will be calculated. Normally, to qualify for a refund the vehicle must be equipped with

an on-board monitoring device which will record the actual time the engine is idling and the amount of fuel consumed while idling. If the device only records the idle time and not fuel used, the refund amount will be calculated at one-half gallon of fuel consumed per one hour of idle time. The computation must also consider the miles driven in Iowa versus total miles driven. The department will require a review of interstate carrier reports before approval of the computation method.

68.8(10) Power takeoff. Persons operating vehicles which have auxiliary equipment that is powered by the power takeoff may apply for a refund for that portion of the fuel used for powering the auxiliary equipment.

The person requesting the refund must furnish the department with statistical information on how the exempt percentage is established. The percentage can be established by using the following noninclusive methods.

- Determine the actual fuel usage by the hour while the auxiliary equipment is in use compared to total hours the engine is running.
- Establish total miles per gallon for the vehicle when auxiliary equipment is not in use compared to miles per gallon while the equipment is in use.
- Other computation methods to be reviewed by the department prior to approval.

It has been predetermined that tax on fuel used in the mixing of cement into concrete, the off-loading of the concrete, and the loading and off-loading of solid waste will be refunded on the basis of 30 percent of the fuel placed in the fuel supply tank of the vehicle provided proper records are maintained. Proper records shall consist of records of fills for each vehicle from tax-paid bulk storage tanks or sales tickets where fuel is purchased directly from a service station. Each vehicle must be identifiable by a unit number so the department can trace fuel usage to specific vehicles. An additional allowance will be granted where it can be substantiated through the use of separate meters which operate to measure the fuel when the vehicle is stationary or the use of separate tanks which fuel the vehicle only when the vehicle is stationary that the actual nonhighway fuel usage exceeds 30 percent.

68.8(11) Refrigeration units (reefers). Tax paid on motor fuel and undyed special fuel is subject to refund. The person must maintain records of fuel purchases to substantiate the tax-paid purchases. Invoices must meet the criteria set forth in rule 701—67.12(452A). In addition, the invoices must separately state fuel purchased and placed in the reefer unit. Liquefied petroleum gas may be purchased tax-free for use in reefer units. See rule 701—69.10(452A).

68.8(12) Pumping credits. A refund will be allowed for taxes paid on fuel once that fuel has been placed in the fuel supply tank of a motor vehicle when the motor of that vehicle is used as a power source for off-loading procedures. Meter readings from the pump used in the off-loading procedure or the invoice, manifest or bill of lading number covering the product off-loaded must be retained. The claims for refund, unless a different amount can be proven, will be (a) one-half gallon credit for each 1,000 gallons of liquid products pumped and three-tenths of a gallon credit for each ton of dry products pumped when using motor fuel or special fuel (diesel) to power the motor and (b) one gallon credit for each 1,000 gallons of liquid products pumped and three-tenths of a gallon credit for each ton of dry products pumped when using special fuel (L.P.G.) to power the motor.

68.8(13) Transport diversions. When a transport load of motor fuel or undyed special fuel is sold tax-paid with a destination in this state and later diverted to a destination outside the state, the person who actually paid the Iowa tax is entitled to a refund. To secure a refund, the person must file a completed claim form provided by the department with supporting documentation including a copy of the bill of lading, invoices or document showing where and to whom the fuel was delivered, a copy of the reporting form and evidence of payment to the state where the fuel was actually delivered.

68.8(14) Casualty loss. In the event fuel is lost or destroyed through fire, explosion, lightning, flood, storm, earthquake, terrorist attack, or other casualty, the taxpayer must inform the department in writing of such loss within 10 days of the loss; and the notification must contain the amount of gallon-age lost or destroyed which must be in excess of 100 gallons. An application for refund must be submitted to the department within 60 days of the notification and contain a notarized affidavit sworn to by the person having immediate custody of the fuel at the time of the loss or destruction setting forth, in full detail, the circumstances of the loss or destruction and the number of gallons. If the fuel was in storage where

several fuel purchases were commingled, it is a rebuttable presumption that the fuel lost through casualty was a part of the last delivery into the storage just prior to the loss. No refund is allowable for fuel lost through evaporation, theft, normal leakage, or unknown causes. Leakage resulting from a major accident or catastrophe is subject to refund.

68.8(15) Exports by eligible purchasers (distributors). Distributors who have purchased tax-paid motor fuel or undyed special fuel and sell the fuel to consumers outside the state may apply for a refund of the Iowa tax paid. The distributor must retain records as provided in rule 701—67.3(452A) to support the request for refund.

68.8(16) Blending errors for special fuel. Dyed special fuel commingled with undyed special fuel and motor fuel commingled with special fuel. If dyed special fuel is inadvertently mixed with tax-paid undyed special fuel to the extent that the undyed fuel must have additional dye added to meet federal dyeing requirements to qualify as exempt dyed fuel, the tax is refundable on the undyed special fuel. The refund request must contain the number of gallons of undyed fuel lost through the mixing error and documentation as to how the gallonage was determined. If motor fuel is blended in error with dyed special fuel to produce a commingled product that must be destroyed or refined for subsequent use, the tax-paid fuel is subject to refund. The request for refund must contain documentation that the commingled product was destroyed or sold for purposes of refinement at a terminal.

68.8(17) Watercraft. Special fuel used in watercraft. This subrule is retroactive to July 1, 1996.

68.8(18) Refund of tax—Indians. Sales by Indians to other Indians of their own tribe on federally recognized Indian reservations or settlements of which they are tribal members are exempt from the tax. However, Indian sellers are subject to the record-keeping requirements of Iowa Code chapter 452A. The fuel must be purchased by the Indian seller with the tax included in the purchase price, unless the seller's status as a particular licensee authorizes the seller to purchase fuel tax-free. The tax exemption is allowed to the Indian purchaser by the purchaser's filing a claim for refund of the tax paid or the tribe of which the Indian purchaser is a member filing a claim for refund of the tax paid by the tribe on fuel sold to the Indian purchaser.

68.8(19) Racing fuel.

68.8(20) Benefited fire districts if the fuel is used for public purposes.

This rule is intended to implement Iowa Code section 452A.17 as amended by 2005 Iowa Acts, House File 216, and Iowa Code section 452A.71.

701—68.9(452A) Claim for refund—payment of claim. In order to receive a refund, the claimant must hold a refund permit.

68.9(1) Persons requesting a refund for fuel used for any exempt purpose will do so by providing all or a portion of the following: (a) refund permit number, (b) type of fuel, (c) total number of gallons/tons of fuel used to calculate the refund amount, (d) the beginning and ending dates of the tax period, (e) net cost of fuel, (f) Iowa sales tax due (net cost of fuel times sales tax rate), (g) other items depending on the type of permit and claim type, (h) the total amount of refund claimed, and (i) additional information as required.

Persons requesting a refund for casualty loss, transport diversions, blending errors of motor fuel and alcohol, and blending errors of special fuel must file in writing on the forms provided by the department and must attach supporting documents explaining why a refund is due.

68.9(2) Refunds are made and the amount of the refund is paid to the person who actually paid the tax with the following exception: Persons requesting a refund for idle time, power takeoff, reefer units, pumping credits, or transport diversions may designate another person as an agent to file the claim and receive the refund. The person acting as an agent for others must provide the department with the following information including, but not limited to, the name, address, and federal identification number or social security number of the person on whose behalf they are requesting the refund. Once a person is designated as an agent, this designation remains in force until the department is notified in writing the agency agreement no longer exists. A governmental agency may designate another governmental agency as an agent for filing and receiving any tax refund authorized in Iowa Code section 452A.17.

68.9(3) Deposit of refund. If the person so designates on the application, the department will direct deposit the refund in the person's designated bank account. If this option is selected on the application, additional forms will be provided to secure the needed information for direct deposit. In lieu of direct deposit, the permit holder will receive a state warrant.

68.9(4) A claim for refund will not be allowed unless the claimant has accumulated \$60 in credits for one calendar year. A claim for refund may be filed anytime the \$60 minimum has been met within the calendar year. If the \$60 minimum has not been met in the calendar year, the credit must be claimed on the claimant's income tax return unless the claimant is not required to file an income tax return in which case a refund will be allowed. An income tax credit may not be claimed for any year in which a claim for refund was filed. Once the \$60 minimum has been met, the claim for refund must be filed within one year if met prior to July 1, 2002, and within three years if met on or after July 1, 2002.

EXAMPLE: A claim for refund in the amount of \$200 is filed in March of 1996. During the remainder of 1996 an additional \$50 in credits is accumulated. The claimant cannot claim this \$50 credit on the claimant's 1996 income tax return because an income tax credit cannot be filed for any year in which a claim for refund was filed. The claimant must file a claim for refund of the \$50 even though it is below the \$60 minimum.

EXAMPLE: The claimant does not have a refund permit. The claimant accumulates \$40 in credits during January of 2002 and \$50 in credits during June of 2002. The claimant may claim a \$90 credit on the claimant's 2002 income tax return or apply for a refund permit and claim a refund within one year of June 2002 which is the date the \$60 minimum was met. If the \$60 minimum is met on or after July 1, 2002, the claim for refund must be filed within three years of the date the \$60 minimum was met.

68.9(5) A refund will not be paid with respect to any motor fuel taken out of this state in supply tanks of watercraft, aircraft, or motor vehicles or any undyed special fuel taken out of this state in aircraft or motor vehicles.

68.9(6) Rescinded IAB 11/3/99, effective 12/8/99.

This rule is intended to implement Iowa Code sections 452A.17, 452A.19, 452A.21, and 452A.72 as amended by 2002 Iowa Acts, Senate File 2305.

701—68.10(452A) Refund permit. To obtain the refund provided for in Iowa Code chapter 452A and rule 68.8(452A), the claimant must have an uncanceled refund permit. The application for a refund permit is provided by the department and will contain, but not be limited to, the following information: (1) the name and location of the business and the mailing address if different, (2) the type of ownership, (3) the social security number or federal identification number of the applicant, and (4) the type of refund requested. The refund permit is issued without cost and remains in effect until revoked, canceled or until the permit becomes invalid. All refund permit holders are required to keep invoices and copies of returns if filed, supporting schedules and studies for documentation to support the refund.

This rule is intended to implement Iowa Code section 452A.18 as amended by 1995 Iowa Acts, chapter 155.

701—68.11(452A) Revocation of refund permit. The following violations will result in the revocation of the permit: (1) using a false or altered invoice in support of a claim, (2) making a false statement in a claim for refund or in response to an investigation by the department of a claim for refund, (3) refusal to submit the claimant's books and records for examination by the department, and (4) nonuse for a period of three years. If the permit is revoked for reason (1), (2), or (3) above, the permit will not be reissued for a period of at least one year. If the permit is revoked for reason (4) above, the permit will be reissued upon proper application. (See rule 701—7.23(17A) for revocation procedure.)

This rule is intended to implement Iowa Code section 452A.19.

[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—68.12(452A) Income tax credit in lieu of refund. In lieu of applying for a refund permit, a person or corporation may claim the refund allowable under Iowa Code section 452A.17 as an income tax credit. If a person or corporation holds a refund permit and elects to receive an income tax credit, the person

or corporation must cancel the refund permit within 30 days after the first day of its year or the permit becomes invalid and application must be made for a new permit. Once the election to receive an income tax credit has been made, it remains in effect until the election is changed. The income tax credit is not available for refunds relating to casualty losses, transport diversions, pumping credits, blending errors, idle time, power takeoffs, reefer units, exports by distributors, and excess tax paid on ethanol blended gasoline.

This rule is intended to implement Iowa Code sections 422.110, 452A.17(2), and 452A.21 as amended by 1999 Iowa Acts, Senate File 136.

701—68.13(452A) Reduction of refund—sales and use tax. Under Iowa Code section 423.3(56), the sales price from the sale of motor fuel and special fuel consumed for highway use or in watercraft or aircraft where the fuel tax has been imposed and paid, and no refund has been or will be allowed, is exempt from Iowa sales and use tax. Therefore, unless the fuel is used for some other exempt purpose under Iowa Code section 423.3 (e.g., used for processing, used for agricultural purposes, used by an exempt government entity, used by a private nonprofit educational institution), or the fuel is lost through a casualty, the refund of taxes on motor fuel or special fuel will be reduced by the applicable sales and use tax. See sales tax rule 701—18.37(422,423). The sales price upon which the sales and use tax will be applied shall include all federal excise taxes, but will not include the Iowa fuel tax. *Gurley v. Rhoden*, 421 U.S. 200 (1975).

This rule is intended to implement Iowa Code section 452A.17.
[ARC 2247C, IAB 11/25/15, effective 12/30/15]

701—68.14(452A) Terminal withdrawals—meters. Any refinery or terminal within this state must be fixed with meters which totalize the gross gallons withdrawn. All bills of lading or manifests must show the gross gallons withdrawn. A temperature-adjusted or other method shall not be used except as it applies to liquefied petroleum gas and the sale or exchange of petroleum products between petroleum refiners. All fuel withdrawn from a refinery or terminal within this state must pass through these meters.

This rule is intended to implement Iowa Code sections 452A.2, 452A.8, 452A.15(2), and 452A.59 as amended by 1995 Iowa Acts, chapter 155.

701—68.15(452A) Terminal and nonterminal storage facility reports and records. Each terminal and nonterminal storage facility operating in Iowa must file a monthly inventory report with the department. The report shall include, but not be limited to, the following information:

1. The name and license number of the company that owns and operates the terminal or nonterminal storage facility.
2. The location of the terminal or nonterminal storage facility.
3. The month and year covered by the report.
4. The terminal code assigned by the Internal Revenue Service or the storage facility license number assigned by the department.
5. The beginning inventory.
6. The total receipts for the month including for each receipt: (a) the gross gallons received by schedule code, by fuel type and, if diesel fuel, whether dyed or undyed fuel, (b) the bill of lading number, (c) the date of receipt, (d) the seller, (e) the carrier, (f) the mode of transportation, and (g) the destination state.
7. The total withdrawals for the month, including for each withdrawal: (a) the gross gallons withdrawn by schedule code and by fuel type and, if diesel fuel, whether dyed or undyed fuel, (b) the bill of lading number, (c) the date of withdrawal, (d) the consignor, (e) the consignee, (f) the mode of transportation, (g) the destination state, (h) the origin state, and (i) the carrier.
8. The actual ending inventory and any gains or losses.
9. The signature or electronic signature of the person responsible for preparing the report.
10. Such additional information as the department may require.

For periods beginning on or after July 1, 2002, the director may impose a civil penalty against any person who fails to file the reports required under the motor fuel tax laws. The penalty shall be \$100 for the first violation and shall increase by \$100 for each additional violation occurring in the calendar year in which the first violation occurred.

The director may require that reports be filed by electronic transmission. All licensees must file reports by electronic transmission beginning September 1, 2006.

This rule is intended to implement Iowa Code section 452A.15(2).

701—68.16(452A) Method of reporting taxable gallonage. The exclusive method of determining gallonage of any purchase or sale of motor fuel or special fuel and distillate fuel is to be on gross-volume basis. A temperature-adjusted or other method cannot be used, except as it applies to liquefied petroleum gas and the sale or exchange of petroleum products between petroleum refineries.

This rule is intended to implement Iowa Code section 452A.8 as amended by 1995 Iowa Acts, chapter 155.

701—68.17(452A) Transportation reports. The reports required under Iowa Code section 452A.15(1) are to be filed by railroad carriers, common carriers, contract carriers, distributors transporting fuel for others, and anyone else transporting fuel from without the state and unloading it at other than terminal storage within the state. The report must include all fuel which was imported into Iowa and unloaded at other than terminal storage, all fuel withdrawn from Iowa terminal storage and delivered in Iowa, and all fuel withdrawn from Iowa terminal storage and exported from Iowa. These reports must be filed monthly and show as to each delivery:

1. The name, address, and federal identification number or social security number of the person to whom actually delivered.
2. The name, address, and federal identification number or social security number of the originally named consignee, if delivered to anyone other than the originally named consignee.
3. The point of origin, the point of delivery, and the date of delivery.
4. The number and initials of each tank car and the number of gallons contained therein, if shipped by rail.
5. The name of the boat, barge, or vessel, and the number of gallons contained therein, if shipped by water.
6. The registration number of each tank truck and the number of gallons contained therein, if transported by motor truck.
7. The manner, if delivered by other means, in which the delivery is made.
8. Such additional information relative to shipments of motor fuel or special fuel as the department may require.

For periods on or after July 1, 2002, the director may impose a civil penalty against any person who fails to file the reports required under the motor fuel tax laws. The penalty shall be \$100 for the first violation and shall increase by \$100 for each additional violation occurring in the calendar year in which the first violation occurred.

The director may require that reports be filed by electronic transmission.

This rule is intended to implement Iowa Code section 452A.15 as amended by 2002 Iowa Acts, House File 2622 and Senate File 2305.

701—68.18(452A) Bill of lading or manifest requirements. Whenever a bill of lading or manifest is required to be issued, carried, retained, or submitted by these rules, it shall meet the following minimum requirements:

1. Contain the name and address of the refinery, terminal, ethanol plant, biodiesel plant or point of origin.
2. Contain the date of withdrawal or import.
3. Contain the name of the shipper-supplier-consignor.
4. Contain the name of the purchaser-consignee.

5. Contain the place of actual destination.
6. Contain the name of the transporter.
7. Contain the gross gallons by fuel type.
8. Contain the designation for ethanol blended gasoline or biodiesel blended fuel as provided in Iowa Code section 214A.2.
9. Contain a statement designating whether diesel fuel is dyed or undyed.
10. Have machine printed thereon a serial number of not less than four digits.

This rule is intended to implement Iowa Code sections 452A.10, 452A.12, 452A.60, and 452A.76.
[ARC 8225B, IAB 10/7/09, effective 11/11/09]

701—68.19(452A) Right of distributors and dealers to blend conventional blendstock for oxygenate blending, gasoline, or diesel fuel using a biofuel.

68.19(1) A dealer or distributor may blend a conventional blendstock for oxygenate blending, gasoline, or diesel fuel using the appropriate biofuel, or sell unblended or blended gasoline or diesel fuel on any premises in this state. This subrule does not apply to the extent that the use of the premises is restricted by federal, state, or local law.

68.19(2) A refiner, supplier, terminal operator, or terminal owner who in the ordinary course of business sells or transports a conventional blendstock for oxygenate blending, gasoline unblended or blended with a biofuel, or diesel fuel unblended or blended with a biofuel shall not refuse to sell or transport to a distributor or dealer any conventional blendstock for oxygenate blending, unblended gasoline, or unblended diesel fuel that is at the terminal, based on the distributor's or dealer's intent to use the conventional blendstock for oxygenate blending, or blend the gasoline or diesel fuel with a biofuel.

68.19(3) This rule shall not be construed to do any of the following:

a. Prohibit a distributor or dealer from purchasing, selling or transporting a conventional blendstock for oxygenate blending, gasoline that has not been blended with a biofuel, or diesel fuel that has not been blended with a biofuel.

b. Affect the blender's license requirements under Iowa Code section 452A.6.

c. Prohibit a dealer or distributor from leaving a terminal with a conventional blendstock for oxygenate blending, gasoline that has not been blended with a biofuel, or diesel fuel that has not been blended with a biofuel.

d. Require a nonrefiner biofuel manufacturer to offer or sell a conventional blendstock for oxygenate blending, gasoline that has not been blended with a biofuel, or diesel fuel that has not been blended with a biofuel.

68.19(4) A refiner, supplier, terminal operator, or terminal owner who violates this rule is subject to a civil penalty of not more than \$10,000 per violation. Each day that a violation continues is deemed a separate offense. For more information on enforcement of this penalty, see 701—subrule 10.71(8).

This rule is intended to implement Iowa Code section 452A.6A.

CHAPTER 69
LIQUEFIED PETROLEUM GAS—
COMPRESSED NATURAL GAS—LIQUEFIED NATURAL GAS

[Prior to 1/1/96, see 701—Ch 65]

701—69.1(452A) Definitions. For the purpose of this chapter, the following definitions shall govern:

“*C.N.G.*” shall mean compressed natural gas.

“*Department*” means the department of revenue.

“*Director*” means the director of the Iowa department of revenue or the director’s authorized representative.

“*Distributor*” means any person who sells compressed natural gas or liquefied petroleum gas in bulk for highway use.

“*Gallon,*” with respect to compressed natural gas, means a gasoline gallon equivalent. A gasoline equivalent of compressed natural gas is five and sixty-six hundredths pounds or one hundred twenty-six and sixty-seven hundredths cubic feet measured at a base temperature of 60 degrees Fahrenheit and a pressure of fourteen and seventy-three hundredths pounds per square inch absolute. “*Gallon,*” with respect to liquefied natural gas, means a diesel gallon equivalent. A diesel gallon equivalent of liquefied natural gas is six and six hundredths pounds.

“*Invoiced gallons*” means gross gallons as shown on the bill of lading or invoice. A temperature-adjusted method may be used as it applies to liquefied petroleum gas.

“*Licensed compressed natural gas, liquefied natural gas, and liquefied petroleum gas dealer*” means a person in the business of handling untaxed compressed natural gas, liquefied natural gas, or liquefied petroleum gas who delivers any part of the fuel into a fuel supply tank of any motor vehicle.

“*Licensed compressed natural gas, liquefied natural gas, and liquefied petroleum gas user*” means a person licensed by the department who dispenses compressed natural gas, liquefied natural gas, or liquefied petroleum gas, upon which the special fuel tax has not been previously paid, for highway use from fuel sources owned and controlled by the person into the fuel supply tank of a motor vehicle, or commercial vehicle owned or controlled by the person.

“*Licensed metered pumps or metered pumps*” shall mean pumps which have been metered, inspected, tested for accuracy, sealed and licensed by the state department of agriculture pursuant to Iowa Code section 452A.8(2)“e.”

“*Licensed metered storage or metered storage*” shall mean storage facilities which are fixed with “licensed metered pumps.”

“*L.N.G.*” shall mean liquefied natural gas.

“*L.P.G.*” shall mean liquefied petroleum gas.

“*Owner*” shall mean and include the owner or the employees, agents, or persons under the control of the owner.

“*Special fuel*” means liquefied petroleum gas, liquefied natural gas, or compressed natural gas.

“*Use*” means the receipt, delivery, or placing of liquefied petroleum gas by a licensed liquefied petroleum gas user into a fuel supply tank of a motor vehicle while the vehicle is in the state, except that with respect to natural gas used as a special fuel, “use” means the receipt, delivery, or placing of the natural gas into equipment for compressing the gas for subsequent delivery into the fuel supply tank of a motor vehicle.

In addition to the preceding definitions, applicable definitions contained in Iowa Code section 452A.2 and rule 701—67.1(452A) shall govern the rules in this chapter where applicable.

This rule is intended to implement Iowa Code chapter 452A.

[ARC 1805C, IAB 1/7/15, effective 2/11/15]

701—69.2(452A) Tax rates—time tax attaches—responsible party—payment of the tax. See 701—subrule 68.2(1) for tax rates. The excise tax on L.P.G. attaches when the special fuel is placed in a fuel supply tank of a motor vehicle. The excise tax on C.N.G. and L.N.G. attaches at the time of delivery into equipment for compressing the gas for subsequent delivery into the fuel supply tank of a

motor vehicle. The person responsible for the tax must collect the tax from the purchaser and remit the tax to the department. The person responsible for the tax is:

1. The licensed L.P.G., L.N.G., or C.N.G. dealer, or
2. The licensed L.P.G., L.N.G., or C.N.G. user.

The person responsible for placing L.P.G. into the fuel supply tank of a vehicle and the person responsible for placing C.N.G. or L.N.G. into compressing equipment must hold a license as a dealer or user as defined in Iowa Code section 452A.4.

The return and tax are due no later than the last day of the month following the month the L.P.G. was placed in a vehicle or C.N.G. or L.N.G. was placed into compressing equipment. The tax must be remitted by means of electronic funds transfer, unless the licensee can show that this method of payment would cause undue hardship on the licensee and must be rounded to the nearest whole number. The return must be remitted by means of electronic transmission.

This rule is intended to implement Iowa Code section 452A.8 as amended by 2014 Iowa Acts, Senate File 2338.

[ARC 1805C, IAB 1/7/15, effective 2/11/15]

701—69.3(452A) Penalty and interest. See rules 701—10.6(421) and 701—10.2(421) for failure to timely file a return or for failure to timely pay the tax. See rule 701—10.8(421) for penalty exceptions. See rule 701—10.72(452A) for interest on refunds.

701—69.4(452A) Bonding procedure.

69.4(1) When required, classes of business and new applications for fuel tax permit. See 701—subrule 67.21(1), paragraphs “a” and “b.”

69.4(2) Existing license holders. Existing license holders will be requested to post a bond or security when they have had two or more delinquencies in remitting the fuel tax or filing returns timely during the past 12 months when filing returns on a monthly basis. The bond or security will be an amount sufficient to cover 12 months’ fuel tax liability or \$500, whichever is greater. The simultaneous late filing of the return and the late payment of the tax will count as one delinquency. However, the late filing of the return or late payment of the tax will not count as a delinquency if the license holder can satisfy one of the conditions set forth in Iowa Code section 421.27 (penalty waiver). For waiver of bond see 701—paragraph 67.21(1)“e.”

69.4(3) Type of security. See 701—subrule 67.21(2).

701—69.5(452A) Persons authorized to place L.P.G., L.N.G., or C.N.G. in the fuel supply tank of a motor vehicle. The only persons authorized to place L.P.G., L.N.G., or C.N.G. into the fuel supply tank of a motor vehicle are: licensed L.P.G., L.N.G., or C.N.G. dealers, or licensed L.P.G., L.N.G., or C.N.G. users.

69.5(1) *L.P.G., L.N.G., or C.N.G. dealer’s license.* Anyone who delivers L.P.G. into the fuel supply tank of a motor vehicle or places C.N.G. or L.N.G. into compression equipment which tank is owned by some other person must be licensed as an L.P.G., L.N.G., or C.N.G. dealer. A dealer may also fuel the dealer’s own vehicles under this license.

69.5(2) *L.P.G., L.N.G., or C.N.G. user’s license.* Anyone who delivers L.P.G., L.N.G., or C.N.G. into the fuel supply tank of a motor vehicle, which tank is owned or leased by the person delivering it, must be licensed as an L.P.G., L.N.G., or C.N.G. user. If that same person delivers the fuel into tanks owned by others, that person must be licensed as a dealer in lieu of being licensed as a user.

69.5(3) *L.P.G. “mobile” tank exemption.* When a person has an L.P.G. storage tank which is “mobile” and the storage is moved from location to location, that person may be issued an L.P.G. user’s license. This licensee will be allowed to move the storage tank to a new location without procuring a new license for each new location. The issuance of this license is discretionary with the director, and the license will be issued only when the person requesting the license shows a need for mobile storage. The license will be issued to the licensee at the licensee’s principal place of business, and each mobile storage tank is deemed a separate pump at that location.

The operation of such licensed mobile storage shall be subject to the following conditions:

- a. Each mobile storage tank must be fixed with licensed, metered pumps.
- b. Each mobile storage tank shall be assigned a separate number, and the gallonage shall be reported on a per-tank basis.
- c. Each mobile storage tank shall have printed thereon, in strokes not less than six inches in height and three-fourths inches in width, the unit number and licensee's license number.
- d. There may be a total of only nine mobile storage tanks operated under a single license. If the licensee operates more than nine such storage tanks, the licensee must obtain a separate license for each multiple of nine or fraction thereof.
- e. When a licensee changes the licensee's principal place of business, the license shall be canceled and the person must apply for a new license.
- f. All records required to be kept shall be maintained at the licensee's principal place of business.
- g. Except for the requirement of having a separate license for each location where L.P.G. is used, the licensee shall be subject to all the requirements of other licensed L.P.G. users.

69.5(4) Exemption for emergency filling by distributors. Upon request from a stranded motorist, an L.P.G. distributor may place up to 20 gallons of L.P.G. into the fuel supply tank of the stranded vehicle without being considered by the department in violation of Iowa Code section 452A.74(5) (acting as an L.P.G. dealer without a license); however, the distributor must remit the tax thereon on a licensed dealer form and pay the tax before the last day of the month following the month of the emergency fill.

This rule is intended to implement Iowa Code section 452A.8.
[ARC 1805C, IAB 1/7/15, effective 2/11/15]

701—69.6(452A) Requirements to be licensed. To become licensed as an L.P.G., L.N.G., or C.N.G. user or dealer, a person must file with the department a completed application form for the appropriate license. A separate license is required for each place of business or location where L.P.G., L.N.G., or C.N.G. is regularly delivered or placed into the fuel supply tank of motor vehicles. See Iowa Code section 452A.4 and 701—subrule 67.23(1) for licensing requirements.

This rule is intended to implement Iowa Code section 452A.8.
[ARC 1805C, IAB 1/7/15, effective 2/11/15]

701—69.7(452A) Licensed metered pumps. Before an L.P.G., L.N.G., or C.N.G. dealer's or user's license can be issued, all pumps designed to fuel motor vehicles at the location to be licensed must be (1) metered, (2) inspected, (3) tested for accuracy, (4) sealed, and (5) licensed by the department of agriculture and land stewardship. (See 1970 O.A.G. 2.) If there is more than one pump at a location to be licensed, each pump will be assigned a separate pump number, and the licensee shall report the gallonage each month with reference to such number.

Each special fuel L.P.G. distributor, dealer, or user may elect to measure L.P.G. for the tax purposes either temperature compensated to 60° F, or without temperature compensation. If the special fuel L.P.G. distributor, dealer or user elects to measure L.P.G. temperature compensated to 60° F for tax purposes, the L.P.G. distributor, dealer or user must use meters which are of an automatic temperature compensating type which shall compute gross gallons corrected to 60° F.

This rule is intended to implement Iowa Code section 452A.8.
[ARC 1805C, IAB 1/7/15, effective 2/11/15]

701—69.8(452A) Single license for each location. A single license is required for each separate place of business or location where L.P.G., L.N.G., or C.N.G. is delivered into the fuel supply tank of a motor vehicle. For reporting purposes (see rule 701—69.2(452A)), a licensee may file a separate return for each license; or, if arrangements have been made with the department, the licensee may file a consolidated return reporting all sales made at all locations for which a license is held. However, a consolidated return may not be used to combine dealer and user operations. All working papers used in the preparation of the information required must be available for examination by the department. All dealer or user operations at that location will be conducted under that license. A licensee may have a different type of license (dealer, user) for each separate location where L.P.G., L.N.G., or C.N.G. is dispensed. For instance,

if a licensee holds an L.P.G., L.N.G., or C.N.G. dealer's license for location A and an L.P.G., L.N.G., or C.N.G. user's license for location B, the licensee may sell fuel to others or fuel the licensee's own vehicles at location A, but may only fuel the licensee's own vehicles at location B.

This rule is intended to implement Iowa Code section 452A.8.

[ARC 1805C, IAB 1/7/15, effective 2/11/15]

701—69.9(452A) Dealer's and user's license nonassignable. An L.P.G., L.N.G., or C.N.G. dealer's license or user's license cannot be assigned. The following nonexclusive situations will be considered an assignment:

1. A change in the name under which the licensee conducts business.
2. A change in the location where the business is conducted.
3. A sale of the business (even if the new owner(s) operates under the same business name).
4. A merger or other business combination which results in a new or different entity.

This rule is intended to implement Iowa Code section 452A.8.

[ARC 1805C, IAB 1/7/15, effective 2/11/15]

701—69.10(452A) Separate storage—bulk sales—highway use. If a person is operating as an L.P.G. dealer's or user's licensee and also makes bulk sales for nonhighway use, there must be separate storage for bulk sales and sales for highway. If any amount of L.P.G. in a storage facility is to be used directly from that storage for highway purposes or if the storage is connected to a device which is designed in such a way as to be able to fuel motor vehicles, all fuel dispensed from the storage shall be dispensed through licensed metered pumps. Tax will be paid on the fuel dispensed which is not exempt as evidenced by exemption certificates.

This rule is intended to implement Iowa Code section 452A.8.

701—69.11(452A) Combined storage—bulk sales—highway sales or use. If a person is operating as an L.P.G. dealer's or user's licensee, L.P.G. may be dispensed for bulk nontaxable sales and for taxable highway sales from the same storage if, and only if, the following requirements are complied with:

1. All pumps which are of such a design to be able to fuel motor vehicles must be licensed, sealed, metered, and inspected as provided in rule 69.5(452A).
2. All fuel passing through the pumps is taxed unless supported by exemption certificates.
3. All pumps which are not licensed, sealed, metered, and inspected must be of such a design that it is impossible to use them to place fuel into the fuel supply tank of a motor vehicle.
4. Accurate records must be kept showing all purchases of fuel and all nontaxable bulk sales of fuel.

All L.P.G. which is placed in this combined storage is presumed to be for highway use and taxable unless supported by exemption certificates (for fuel passing through the licensed pumps) or detailed records showing bulk sales for nonhighway use or to other users or dealers (for fuel passing through the nonlicensed pumps). (See 1968 O.A.G. 592.) If at any time the licensee fails to comply with the requirements of this rule, separate storage for taxable sales and nontaxable bulk sales will be required under rule 69.10(452A).

This rule is intended to implement Iowa Code section 452A.8.

701—69.12(452A) Exemption certificates. If L.P.G. is dispensed from metered highway storage for other than highway purposes, an exemption certificate must be completed by the seller and signed by the purchaser. The certificate is to be retained by the dealer or user. The exemption certificate must include, but not be limited to, the following information: the date, the seller's name, the seller's dealer (user) license number, the invoice number covering the fuel sold (if sold by a dealer), an indication of the use to which the fuel will be put, and the name, address, and signature of the purchaser (user). The exemption certificate will be provided by the department or a dealer or user may provide the exemption certificate provided it contains all information required by the director.

These exempt sales of L.P.G. from metered highway storage shall be limited to the following uses:

1. Placed directly into a fuel supply tank which is connected to the heating or cooling unit installed on a highway “reefer” unit, provided the fuel supply tank is not connected nor has provisions for connection directly or indirectly to the power source of the highway motor vehicle.

2. Placed directly into the fuel supply tank of a nonhighway motor vehicle.

3. L.P.G. placed into carry-out containers.

All other sales for other than highway use must be from bulk storage and not from metered highway storage. (See rule 701—68.13(452A), sales tax.)

This rule is intended to implement Iowa Code section 452A.8.

701—69.13(452A) L.P.G. sold to the state of Iowa, its political subdivisions, contract carriers under contract with public schools to transport pupils or regional transit systems.

69.13(1) If L.P.G. is sold to the state of Iowa, its agencies, a political subdivision of the state, or a regional transit system for public use, or a use specified in Iowa Code section 452A.57(11), and placed in storage, it may be sold tax-free. Fuel sold by a dealer and delivered directly into the fuel supply tank of a motor vehicle must be sold tax-paid. Since the L.P.G. delivered into storage is not subject to tax, the governmental unit or regional transit system need not be licensed as a special fuel user. However, if the L.P.G. is used by a governmental unit or regional transit system for other than “public purposes,” or a purpose specified in Iowa Code section 452A.57(11), it must obtain a user’s license and pay the tax on all highway L.P.G. used from the storage.

69.13(2) L.P.G. sold to a contract carrier under contract with public schools to transport pupils. When special fuel is sold directly to contract carriers who have a contract with a public school under Iowa Code section 285.5 for the transportation of pupils of an approved public or nonpublic school, the fuel shall be sold tax-paid.

If the contract carrier is licensed as an L.P.G. fuel dealer or user, the licensee may buy the fuel tax-free, but the tax must be remitted on the monthly dealer or user return.

Any contract carrier who has paid the tax is entitled to a refund. A refund requested by contract carriers will be reduced by the applicable sales tax, unless otherwise exempt. All contract carriers must apply to the department for a refund registration even if they currently hold a motor fuel tax license.

The refund will be allowed pursuant to the provisions of 701—subrule 68.8(4).

This rule is intended to implement Iowa Code sections 452A.3 and 452A.17.

701—69.14(452A) Refunds. Refunds of taxes paid on L.P.G. used for other than highway use are available. See rule 701—68.8(452A). The refunds are available if the tax has been paid, the L.P.G. is used other than to propel motor vehicles, the person requesting the refund has a refund permit, and the claim is filed within the appropriate time and in the appropriate manner. The income tax credit set forth in rule 701—68.12(452A) shall apply equally to special fuel.

This rule is intended to implement Iowa Code section 452A.17.

701—69.15(452A) Notice of meter seal breakage. Whenever a meter is required under Iowa Code chapter 452A, pursuant to the director’s power granted under Iowa Code section 452A.59, and said meter is required to be sealed by Iowa Code chapter 452A, (C.N.G. or L.P.G. dealer and user meters) the department must be notified within 24 hours of the breaking of the seal for any reason. Notice shall contain, but not be limited to, the following information:

1. The name, address, and license number of the person who controls the meter.
2. The meter number.
3. The type of fuel pumped through the meter.
4. The date of seal breakage.
5. The name and address of the person(s) responsible for the seal breakage.
6. The reason for seal breakage.
7. The meter reading before seal breakage.
8. The meter reading after the meter is resealed.
9. The signature of the person who controls the meter.

For reporting purposes, the meter shall be considered two meters, one before the seal breakage and one after, and should be reported on that basis, noting the seal breakage on the return. The meter readings of the meter before the seal breakage shall be reported by meter number as usual. The meter readings after the meter was resealed shall be reported by using the meter number plus the letter "A." The two readings must appear on the same return schedule.

This rule is intended to implement Iowa Code sections 452A.3 and 452A.8 as amended by 1999 Iowa Acts, Senate File 136, and Iowa Code sections 452A.59 and 452A.62.

701—69.16(452A) Location of records—L.P.G. or C.N.G. users and dealers. The records required to be prepared and kept by L.P.G. or C.N.G. dealers and users under Iowa Code section 452A.10 and 701—subrule 67.3(5) must be maintained at the location that appears on the license unless the following conditions are met:

69.16(1) If the licensee has more than one license, all of the records for each separate license may be kept at a central location so long as the records for each license are kept separated.

69.16(2) The central location where the records are kept is within the state unless:

a. The licensee agrees to bring the records back into the state when requested to do so by the department for purposes of audit, or

b. The licensee agrees to pay the cost (as defined in rule 701—67.4(452A)) of an out-of-state audit. This rule is intended to implement Iowa Code sections 452A.10 and 452A.74(2).

All rules in 701—Chapters 67 and 68 apply if not specifically stated in this chapter.

The rules in 701—Chapters 67, 68, and 69 are effective for periods beginning on or after January 1, 1996.

See 701—Chapters 63, 64 and 65 for rules in effect on or prior to December 31, 1995.

TITLE IX
PROPERTY
CHAPTER 70
REPLACEMENT TAX AND STATEWIDE PROPERTY TAX

DIVISION I
REPLACEMENT TAX

701—70.1(437A) Who must file return. Each taxpayer, as defined in Iowa Code Supplement section 437A.3(30), shall file a true and accurate return with the director. The return shall include all of the information prescribed in Iowa Code sections 437A.8(1)“a” through “f” and any other information or schedules requested by the director. The return shall be signed by an officer or other person duly authorized by the taxpayer and must be certified as correct. If the taxpayer was inactive or ceased the conduct of any activity subject to the replacement tax during the tax year, the return must contain a statement to that effect.

701—70.2(437A) Time and place for filing return. The return must be filed with the director on or before March 31 following the tax year. There is no authority for the director to grant an extension of time to file a return. Therefore, any return which is not filed on or before March 31 following the tax year is untimely.

A taxpayer whose replacement tax liability before credits is \$300 or less is not required to file a return. A taxpayer should not file a replacement tax return under such circumstances.

When the due date falls on a Saturday or Sunday, the return will be due the first business day following the Saturday or Sunday. If a return is placed in the mails, properly addressed and postage paid in ample time to reach the director or the department on or before the due date for filing, no penalty will attach should the return not be received until after that date. The functional meaning of this requirement is that if the return is placed in the mails, properly addressed and postage paid, on or before the due date for filing, no penalty will attach. Mailed returns should be addressed to Department of Revenue, Attention: Property Tax Division, Hoover State Office Building, Des Moines, Iowa 50319.

701—70.3(437A) Form for filing. Returns must be made by taxpayers on forms supplied by the department. Taxpayers not supplied with the proper forms shall make application for same to the department in ample time to have their returns made, verified and filed on or before the due date. Each taxpayer shall carefully prepare the taxpayer’s return so as to fully and clearly set forth the data required. All information shall be supplied and each direction complied with in the same manner as if the forms were embodied in these rules.

Failure to receive the proper forms does not relieve the taxpayer from the obligation of making the replacement tax return.

Returns received which are not completed, but merely state “see schedule attached,” “no tax due,” or some other conclusionary statement are not considered to be a properly filed return and may be returned to the taxpayer for proper completion. This may result in the imposition of penalties and interest due to the return’s being filed after the due date.

701—70.4(437A) Payment of tax. Payment of tax shall not accompany the filing of the replacement tax return with the director. Payment of tax shall never be made to the director or the state of Iowa. Payment of the proper amount of tax due shall be made to the appropriate county treasurer upon notification by the county treasurer to the taxpayer of the taxpayer’s replacement tax obligation.

701—70.5(437A) Statute of limitations.

70.5(1) The director has three years after a return is filed to determine the tax due if the return is found to be incorrect and to give notice to the taxpayer of the determination. This three-year statute of limitations does not apply in the instances specified in 70.5(2).

70.5(2) If a taxpayer files a false or fraudulent return with the intent to evade any tax, the correct amount of tax due may be determined by the director at any time after the return has been filed.

70.5(3) If a taxpayer fails to file a return, the three-year period of limitations does not begin to run until the return is filed with the director.

70.5(4) Waiver of statute of limitations. The department and the taxpayer may extend the three-year period of limitations provided in 70.5(1) above by signing a waiver agreement form provided by the department. The agreement shall designate the period of extension and the tax year for which the extension applies. The agreement shall provide that the taxpayer may file a claim for refund of replacement tax at any time prior to the expiration of the agreement.

701—70.6(437A) Billings.

70.6(1) Notice of adjustments.

a. An agent, auditor, clerk, or employee of the department, designated by the director to examine returns and make audits, who discovers discrepancies in returns or learns that items subject to tax may not have been listed or included as taxable, in whole or in part, or that no return was filed when one was due, is authorized to notify the person of this discovery by ordinary mail. This notice is not an assessment. It informs the person what amount would be due if the information discovered is correct. A copy of such notice shall also be sent to the appropriate county treasurer.

b. Right of person upon receipt of notice of adjustment. A person who has received notice of an adjustment in connection with a return may pay the additional amount stated to be due to the appropriate county treasurer. If payment is made, and the person wishes to contest the matter, the person should file a timely claim for refund. However, payment will not be required until an assessment has been made (although interest will continue to accrue if timely payment is not made). If no payment has been made, the person may discuss with the agent, auditor, clerk, or employee who notified the person of the discrepancy, either in person or through correspondence, all matters of fact and law which may be relevant to the situation. This person may also ask for a conference with the Department of Revenue, Property Tax Division, Hoover State Office Building, Des Moines, Iowa. Documents and records supporting the person's position may be required.

c. Power of agent, auditor, or employee to compromise tax claim. No employee of the department has the power to compromise any tax claims. The power of the agent, auditor, clerk, or employee who notified the person of the discrepancy is limited to the determination of the correct amount of tax.

70.6(2) Notice of assessment. If, after following the procedure outlined in 70.6(1) "b," no agreement is reached and the person does not pay the amount determined to be correct to the appropriate county treasurer, a notice of the amount of tax due shall be sent to the taxpayer. This notice of assessment shall bear the signature of the director and will be sent by ordinary mail to the taxpayer with a copy sent to the appropriate county treasurer.

A taxpayer has 60 days from the date of the notice of assessment to file a protest according to the provisions of rule 701—7.8(17A) or, if the taxpayer fails to timely appeal a notice of assessment, the taxpayer may make payment pursuant to rule 701—7.8(17A) to the appropriate county treasurer and file a refund claim with the director within the applicable period provided in Iowa Code section 437A.14(1) "b" for filing such claims.

70.6(3) Supplemental assessments and refund adjustments. The director may, at any time within the period prescribed for assessment or refund adjustment, make a supplemental assessment or refund adjustment whenever it is ascertained that any assessment or refund adjustment is imperfect or incomplete in any respect.

If an assessment or refund adjustment is appealed (protested under rule 701—7.8(17A)) and is resolved whether by informal proceedings or by adjudication, the director shall notify the appropriate county treasurer. Such resolution shall preclude the director and the taxpayer from making a supplemental assessment or refund adjustment concerning the same issue involved in the appeal for the same tax year unless there is a showing of mathematical or clerical error or showing of fraud or misrepresentation.

[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—70.7(437A) Refunds.

70.7(1) A claim for refund of replacement tax may be made on a form obtainable from the department. All claims for refund should be filed with the director, and not with the county treasurer. In the case of a refund claim filed by an agent or representative of the taxpayer, a power of attorney must accompany the claim. All claims for refund must be in writing.

70.7(2) A taxpayer shall not offset a refund or overpayment of tax for one tax year as a prior payment of tax of a subsequent tax year on the tax return of a subsequent year unless the provisions of Iowa Code section 437A.8(7) are applicable.

70.7(3) Refunds—statute of limitations. The statute of limitations with respect to which refunds or credits may be claimed are:

a. The later of three years after the due date of the tax payment upon which the refund or credit is claimed; or one year after which such payment was actually made.

b. Ninety days after the due date of the tax payment upon which refund or credit is claimed if the tax is alleged to be unconstitutional.

70.7(4) No credit or refund of taxes alleged to be unconstitutional shall be allowed if such taxes were not paid to the appropriate county treasurer under written protest which specifies the particulars of the alleged unconstitutionality.

70.7(5) The taxpayer responsible for paying the tax, or the taxpayer's successors, are the only persons eligible to file claims for refund or credit of the tax with the director and are the only persons eligible to receive such refunds or credits.

70.7(6) The director will promptly notify the appropriate county treasurer of the acceptance or denial of any refund claim or credit. The county treasurer shall pay the refund claim or portion thereof accepted by the director.

70.7(7) A taxpayer has 60 days from the date of the notice of denial of a refund or credit, in whole or in part, to file a protest according to the provisions of rule 701—7.8(17A).

[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—70.8(437A) Abatement of tax. The provisions of rule 701—7.31(421) are applicable to replacement tax. In the event that the taxpayer files a request for abatement with the director, the appropriate county treasurer shall be notified. The director's decision on the abatement request shall be sent to the taxpayer and the appropriate county treasurer.

[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—70.9(437A) Taxpayers required to keep records.

70.9(1) Records required. The records required in this rule must be made available for examination upon request by the director or the director's authorized representative. The records must include all of those which would support the entries required to be made on the tax return. These records include but are not limited to:

a. Records associated with the number of taxable kilowatt-hours of electricity delivered to consumers by the taxpayer within each electric competitive service area during the tax year. Such records shall also include those for calendar year 1998.

b. Records associated with the number of taxable kilowatt-hours of electricity consumed within each electric competitive service area during the tax year where the delivery of such electricity is not subject to the replacement delivery tax.

c. Records associated with the average centrally assessed property tax liability allocated to electric service of each taxpayer, other than a municipal utility, principally serving an electric competitive service area and of each generation and transmission electric cooperative for the assessment years 1993 through 1997. For municipal utilities, such records shall be for the 1997 assessment year and shall also include records associated with items in 1999 Iowa Acts, Senate File 473, section 30.

d. Records associated with the number of taxable kilowatt-hours of electricity generated within the state of Iowa during the tax year. Such records shall also include those for calendar year 1998.

e. Records associated with taxable pole miles of transmission lines owned or leased by the taxpayer for each of the line voltage tiers subject to tax imposed in Iowa Code section 437A.7. Such records shall also include those for calendar year 1998.

f. Records associated with the excess property tax liability of each generation and transmission electric cooperative assigned to the electric competitive service areas principally served on January 1, 1999, by its distribution electric cooperative members and by those municipal utilities which were purchasing members of a municipal electric cooperative association that is a member of the generation and transmission electric cooperative. Such records shall include those for calendar year 1998. "Excess property tax liability" means the amount by which the average centrally assessed property tax liability for the assessment years 1993 through 1997 of a generation and transmission electric cooperative exceeds the tentative generation and transmission taxes which would have been imposed on such generation and transmission electric cooperative under Iowa Code sections 437A.6 and 437A.7 for calendar year 1998.

g. Records associated with the number of taxable therms of natural gas delivered to consumers by the taxpayer within each natural gas competitive service area during the tax year. Such records shall also include those for calendar year 1998.

h. Records associated with the number of taxable therms of natural gas consumed within each natural gas competitive service area during the tax year where the delivery of such natural gas is not subject to the replacement delivery tax.

i. Records associated with the average centrally assessed property tax liability allocated to natural gas service of each taxpayer, other than a municipal utility, principally serving a natural gas competitive service area for the assessment years 1993 through 1997. For municipal utilities, such records shall be for the 1997 assessment year and shall also include records associated with items in 1999 Iowa Acts, Senate File 473, section 30.

j. Records associated with the taxpayer's calculation of the tentative replacement taxes due for the tax year and required to be shown on the tax return.

k. Records associated with increases or decreases in the tentative replacement tax required to be shown to be due where the electric and natural gas delivery tax rates are subject to recalculation under the provisions of Iowa Code section 437A.8(7).

l. Records associated with the kilowatt-hours of electricity and the therms of natural gas entitled to be exempted from the taxes imposed by Iowa Code sections 437A.4 to 437A.7 by the enumerated exemptions therein.

m. Records associated with kilowatt-hours of electricity and therms of natural gas delivered in a manner set forth in Iowa Code sections 437A.4(7) and 437A.5(6).

n. All work papers associated with any of the records described in this rule.

o. Records pertaining to any additions or deletions of property described as exempt from local property tax in Iowa Code section 437A.16.

p. Records associated with allocation of property described in paragraph "o" above among local taxing districts.

70.9(2) The records required to be maintained by these rules shall be maintained by taxpayers for a period of ten years following the later of the original due date for the filing of a tax return in which the replacement taxes are reported, or the date on which such return is filed. Upon application to the director and for good cause shown, the director may shorten the period for which any records should be maintained by a taxpayer.

701—70.10(437A) Credentials. Employees of the department have official credentials, and the taxpayer should require proof of the identity of persons claiming to represent the department. No charges shall be made nor gratuities of any kind accepted by an employee of the department for assistance given in or out of the office of the department.

701—70.11(437A) Audit of records. The director or the director's authorized representative shall have the right to examine or cause to be examined the books, papers, records, memoranda or documents of a taxpayer for the purpose of verifying the correctness of a tax return filed, of information presented,

or for estimating the tax liability of a taxpayer. When a taxpayer fails or refuses to produce the records for examination upon request, the director shall have authority to require, by a subpoena, the attendance of the taxpayer and any other witness(es) whom the director deems necessary or expedient to examine and compel the taxpayer and witness(es) to produce books, papers, records, memoranda or documents relating in any manner to the replacement tax.

701—70.12(437A) Collections/reimbursements. Neither the director nor the department is empowered to receive any payment of replacement tax. Therefore, taxpayers should never pay any replacement tax to the director or the state of Iowa. All payments of replacement tax are to be made to the appropriate county treasurer.

70.12(1) A person in possession of a renewable energy tax credit certificate issued pursuant to Iowa Code chapter 476C or a wind energy tax credit issued pursuant to Iowa Code chapter 476B may apply to the director for a reimbursement of the amount of taxes imposed and paid by the person pursuant to Iowa Code chapter 437A in an amount not more than the person received in renewable energy tax credit certificates or wind energy tax credit certificates. To obtain the reimbursement, the person shall include with the return required under Iowa Code section 437A.8 the renewable energy tax credit certificates or the wind energy tax credit certificates and provide any other information the director may require. The director shall direct that a warrant be issued to the person for an amount equal to the tax imposed and paid by the person. Any credit in excess of the person's tax liability may be claimed as a refund for the following seven years. Pursuant to Iowa Code section 437A.14, a taxpayer may file a claim for refund with the director within three years after the replacement tax became due. If the renewable energy or wind energy tax credit claim exceeds the replacement tax due in a year, the taxpayer has seven years to carry over the excess credit. Pursuant to Iowa Code section 476C.4(6), a person may not receive both a renewable energy tax credit and a wind energy tax credit. For the wind energy tax credit, the reimbursement applies to a qualified facility placed in service on or after July 1, 2005, but before July 1, 2012. For the renewable energy tax credit, the reimbursement applies to a qualified facility placed in service on or after July 1, 2005, but before January 1, 2017. The utilities board shall notify the department of revenue of the amount of kilowatt hours of electricity purchased from a renewable energy facility or the amount of kilowatt hours generated and purchased from a qualified wind energy facility or generated and used on site by the qualified wind energy facility. The department of revenue shall calculate the amount of the tax credit and issue the tax credit certificate. Wind energy and renewable energy tax credit certificates may be transferred, and a replacement tax credit certificate may reflect a different type of tax than the type of tax noted on the original tax credit certificate.

70.12(2) A person in possession of a soy-based transformer fluid tax credit certificate issued pursuant to Iowa Code chapter 476D may apply to the director for a reimbursement of the amount of taxes imposed and paid by the person pursuant to Iowa Code chapter 437A in an amount not more than the person received in soy-based transformer fluid tax credit certificates. To obtain the reimbursement, the person shall attach to the return required under section 437A.8 the soy-based transformer fluid tax credit certificates issued to the person and provide any other information the director may require. The director shall direct a warrant to be issued to the person for an amount equal to the tax imposed and paid by the person pursuant to Iowa Code chapter 437A but for not more than the amount of the soy-based transformer fluid tax credit certificates attached to the return. This subrule is rescinded December 31, 2009.

This rule is intended to implement Iowa Code sections 437A.17B and 437A.17C and chapters 476B and 476D and chapter 476C as amended by 2014 Iowa Acts, Senate File 2343.

[ARC 1665C, IAB 10/15/14, effective 11/19/14]

701—70.13(437A) Information confidential. Iowa Code subsections 437A.14(2) and (3) apply generally to the director, deputies, auditors, and present or former officers and employees of the department. Disclosure of the kilowatt-hours of electricity or therms of natural gas delivered by a taxpayer in a competitive service area disclosed on a tax return, return information, or investigative or audit information is prohibited. Other persons having acquired this confidential information will be

bound by the same rules of secrecy under these Iowa Code provisions as any member of the department and will be subject to the same penalties for violations as provided by law.

DIVISION II
STATEWIDE PROPERTY TAX

701—70.14(437A) Who must file return. Each taxpayer shall file a true and accurate return with the director. The return shall include all of the information prescribed in Iowa Code section 437A.21 and any other information or schedules requested by the director. The return shall be signed by an officer or other person duly authorized by the taxpayer and must be certified as correct. If the taxpayer was inactive or ceased the conduct of any activity for which the taxpayer's property was subject to the statewide property tax during the tax year, the return must contain a statement to that effect.

701—70.15(437A) Time and place for filing return. The return must be filed with the director on or before March 31 following the tax year. There is no authority for the director to grant an extension of time to file a return. Therefore, any return which is not filed on or before March 31 following the tax year is untimely.

When the due date falls on a Saturday or Sunday, the return will be due the first business day following the Saturday or Sunday. If a return is placed in the mails, properly addressed and postage paid in ample time to reach the director or the department on or before the due date for filing, no penalty will attach should the return not be received until after that date. The functional meaning of this requirement is that if the return is placed in the mails, properly addressed and postage paid, on or before the due date for filing, no penalty will attach. Mailed returns should be addressed to Department of Revenue, Attention: Property Tax Division, Hoover State Office Building, Des Moines, Iowa 50319.

701—70.16(437A) Form for filing. Replacement tax rule 70.3(437A) is incorporated herein by reference.

701—70.17(437A) Payment of tax. Payment of the tax required to be shown due on the statewide property tax return shall accompany the filing of the return. All checks shall be made payable to Treasurer, State of Iowa. Failure to pay the tax required to be shown due on the tax return by the due date shall render the tax delinquent.

701—70.18(437A) Statute of limitations. Replacement tax rule 70.5(437A) is incorporated herein by reference.

701—70.19(437A) Billings.

70.19(1) Notice of adjustments. Replacement tax subrule 70.6(1) is incorporated herein by reference.

70.19(2) Notice of assessment. If, after following the procedure outlined in 70.6(1)“b,” no agreement is reached and the person does not pay the amount determined to be correct to the director, a notice of the amount of tax due shall be sent to the taxpayer. This notice of assessment shall bear the signature of the director and will be sent by ordinary mail to the taxpayer.

A taxpayer has 60 days from the date of the notice of assessment to file a protest according to the provisions of rule 701—7.8(17A) or, if the taxpayer fails to timely appeal a notice of assessment, the taxpayer may make payment pursuant to rule 701—7.8(17A) to the director and file a refund claim with the director within the applicable period provided in Iowa Code sections 437A.22 and 437A.14(1)“b” for filing such claims.

70.19(3) Supplemental assessments. Replacement tax subrule 70.6(3) is incorporated by reference.
[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—70.20(437A) Refunds. Replacement tax subrules 70.7(1) to 70.7(3), 70.7(5) and 70.7(7) are incorporated herein by reference.

No credit or refund of taxes alleged to be unconstitutional shall be allowed if such taxes were not paid under written protest which specifies the particulars of the alleged unconstitutionality.

701—70.21(437A) Abatement of tax. The provisions of rule 701—7.31(421) are applicable to the statewide property tax.

[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—70.22(437A) Taxpayers required to keep records.

70.22(1) Records required. The records required in this rule must be made available for examination upon request by the director or the director's authorized representative. The records must include all of those which would support the entries required to be made on the tax return. These records include but are not limited to:

a. Records associated with the assessed value and base year assessed value of property subject to the statewide property tax.

b. Records associated with the computation of the statewide property tax required to be shown due on the tax return.

c. Records associated with the book value of the local amount of any major addition by local taxing district.

d. Records associated with the book value of the statewide amount of any major addition.

e. Records associated with the transfer or disposal of all operating property in the preceding calendar year, by local taxing district.

f. Records associated with the book value of all other taxpayer property subject to the statewide property tax.

g. Records associated with the book value of any major addition, by situs, eligible for the urban revitalization exemption provided for in Iowa Code chapter 404.

h. All work papers associated with any of the records described in this rule.

i. Records associated with allocation of property subject to statewide property tax among local taxing districts.

70.22(2) The records required to be maintained by these rules shall be maintained by taxpayers for a period of ten years following the later of the original due date for the filing of a tax return in which the statewide property tax is reported, or the date on which such return is filed. Upon application to the director and for good cause shown, the director may shorten the period for which any records should be maintained by a taxpayer.

701—70.23(437A) Credentials. Replacement tax rule 70.10(437A) is incorporated herein by reference.

701—70.24(437A) Audit of records. Replacement tax rule 70.11(437A) is incorporated herein by reference.

These rules are intended to implement Iowa Code chapter 437A as amended by 2007 Iowa Acts, Senate File 278.

CHAPTER 71
ASSESSMENT PRACTICES AND EQUALIZATION
[Prior to 12/17/86, Revenue Department[730]]

701—71.1(405,427A,428,441,499B) Classification of real estate.

71.1(1) Responsibility of assessors. All real estate subject to assessment by city and county assessors shall be classified as provided in this rule. It shall be the responsibility of city and county assessors to determine the proper classification of real estate. There can be only one classification per property under this rule, except as provided for in paragraph 71.1(5)“b.” An assessor shall not assign one classification to the land and a different classification to the building or separate classifications to the land or separate classifications to the building. A building or structure on leased land is considered a separate property and may be classified differently than the land upon which it is located. The determination shall be based upon the best judgment of the assessor following the guidelines set forth in this rule and the status of the real estate as of January 1 of the year in which the assessment is made. The assessor shall classify property according to its present use and not according to its highest and best use. See subrule 71.1(9) for an exception to the general rule that property is to be classified according to its use. The classification shall be utilized on the abstract of assessment submitted to the department of revenue pursuant to Iowa Code section 441.45. See rule 701—71.8(428,441).

71.1(2) Responsibility of boards of review, county auditors, and county treasurers. Whenever local boards of review, county auditors, and county treasurers exercise assessment functions allowed or required by law, they shall classify property as provided in this rule and adhere to the requirements of this rule.

71.1(3) Agricultural real estate.

a. Generally. Agricultural real estate shall include all tracts of land and the improvements and structures located on them which are in good faith used primarily for agricultural purposes except buildings which are primarily used or intended for human habitation as defined in subrule 71.1(4). Land and the nonresidential improvements and structures located on it shall be considered to be used primarily for agricultural purposes if its principal use is devoted to the raising and harvesting of crops or forest or fruit trees, the rearing, feeding, and management of livestock, or horticulture, all for intended profit. Agricultural real estate shall also include woodland, wasteland, and pastureland, but only if that land is held or operated in conjunction with agricultural real estate as defined in paragraph “a” or “b” of this subrule.

b. Vineyards. Beginning with valuations established on or after January 1, 2002, vineyards and any buildings located on a vineyard and used in connection with the vineyard shall be classified as agricultural real estate if the primary use of the land and buildings is an activity related to the production or sale of wine.

c. Algae cultivation and production. Beginning with valuations established on or after January 1, 2013, real estate used directly in the cultivation and production of algae for harvesting as a crop for animal feed, food, nutritionals, or biofuel production shall be classified as agricultural real estate if the real estate is an enclosed pond or land which contains a photobioreactor. Pursuant to 2013 Iowa Acts, House File 632, section 1, a photobioreactor is not attached to land upon which it sits and shall not be assessed and taxed as real property.

(1) Determining direct usage. To determine if real estate is used “directly” in the cultivation and production of algae, one must first ensure that the real estate is used to perform activities that cultivate and produce algae and is not used for activities that occur before or after the cultivation and production of algae. If the real estate is used to perform activities for the cultivation and production of algae, to be “directly” so used, the real estate must be used to perform activities that are integral and essential to the cultivation and production, as distinguished from activities that are incidental, merely convenient to, or remote from cultivation and production. The fact that real estate is used for activities that are essential or necessary to the cultivation and production of algae does not mean that the real estate is also “directly” used in production. Even if the real estate is used for activities that are essential or necessary

to the cultivation and production of algae, if the activities are far enough removed from the cultivation or production of algae, the real estate would not qualify for the agricultural designation.

(2) Examples. The following are nonexclusive examples of real estate which would not be directly used in the cultivation and production of algae:

1. Real estate that is used to store, assemble, or repair machinery and equipment that is used for cultivation and production of algae.
2. Real estate that is used in the management, administration, advertising, or selling of algae.
3. Real estate that is used in the management, administration, or planning of the cultivation and production of algae.
4. Real estate that is used for packaging of the algae which has been produced and cultivated.

71.1(4) Residential real estate. Residential real estate shall include all lands and buildings which are primarily used or intended for human habitation containing fewer than three dwelling units, as that term is defined in subparagraph 71.1(5)“a”(5), including those buildings located on agricultural land. Buildings used primarily or intended for human habitation shall include the dwelling as well as structures and improvements used primarily as a part of, or in conjunction with, the dwelling. This includes but is not limited to garages, whether attached or detached, tennis courts, swimming pools, guest cottages, and storage sheds for household goods. “Used in conjunction with” means that the structure or improvement is located on the same parcel, on contiguous parcels, or on a parcel directly across a street or alley as the building or structure containing the dwelling and when marketed for sale would be sold as a unit. Residential real estate located on agricultural land shall include only buildings as defined in this subrule. Buildings for human habitation that are used as commercial ventures, including but not limited to hotels, motels, rest homes, and structures containing three or more separate living quarters shall not be considered residential real estate. However, regardless of the number of separate living quarters, multiple housing cooperatives organized under Iowa Code chapter 499A and land and buildings owned and operated by organizations that have received tax-exempt status under Section 501(c)(3) of the Internal Revenue Code, if the rental income from the property is not taxed as unrelated business income under Iowa Code section 422.33(1A), shall be considered residential real estate.

An apartment in a horizontal property regime (condominium) referred to in Iowa Code chapter 499B which is used or intended for use for human habitation shall be classified as residential real estate regardless of who occupies the apartment. Existing structures shall not be converted to a horizontal property regime unless building code requirements have been met.

71.1(5) Multiresidential real estate. Multiresidential real estate shall include all parcels or portions of a parcel which are primarily used or intended for human habitation containing three or more separate dwelling units as well as structures and improvements used primarily as a part of, or in conjunction with, the dwelling units. For purposes of this rule, “used in conjunction with” means that the structure or improvement is located on the same parcel, on contiguous parcels, or on a parcel directly across a street or alley as the building or structure containing the dwelling units and when marketed for sale would be sold as a unit. Multiresidential real estate shall include mobile home parks, manufactured home communities, land-leased communities, and assisted living facilities. Multiresidential real estate shall exclude properties referred to in Iowa Code section 427A.1(8) or properties subject to valuation under Iowa Code section 441.21(2).

a. Definitions. For purposes of this subrule, the following definitions apply:

(1) “Mobile home park” means any land upon which three or more mobile homes, as defined in Iowa Code section 435.1, or manufactured homes, as defined in Iowa Code section 435.1, or a combination of such homes, are placed on developed spaces and operated as a for-profit enterprise with water, sewer, or septic, and electrical services available. “Mobile home park” does not include homes where the owner of the land is providing temporary housing for the owner’s employees or students.

(2) “Manufactured home community” means any site, lot, field, or tract of land under common ownership upon which ten or more occupied manufactured homes, as defined in Iowa Code section 435.1, are harbored, either free of charge or for revenue purposes, and shall include any building, structure, or enclosure used or intended for use as part of the equipment of the community.

“Manufactured home community” shall not be construed to include homes, buildings, or other structures temporarily maintained by any individual, educational institution, or company on their own premises and used exclusively to house their own labor or students. “Manufactured home community” means the same as “land-leased community” as defined in Iowa Code sections 335.30A and 414.28A.

(3) “Land-leased community” means any site, lot, field, or tract of land under common ownership upon which ten or more occupied manufactured homes are harbored, either free of charge or for revenue purposes, and shall include any building, structure, or enclosure used or intended for use as part of the equipment of the land-leased community. “Land-leased community” shall not be construed to include homes, buildings, or other structures temporarily maintained by any individual, educational institution, or company on their own premises and used exclusively to house their own labor or students.

(4) “Assisted living facility” means real estate that provides housing with services which may include but are not limited to health-related care, personal care, and assistance with instrumental activities of daily living to three or more tenants in a physical structure which provides a homelike environment. “Assisted living facility” also includes a health care facility, as defined in Iowa Code section 135C.1, an elder group home, as defined in Iowa Code section 231B.1, a child foster care facility under Iowa Code chapter 237, or property used for a hospice program as defined in Iowa Code section 135J.1.

(5) “ Dwelling unit” means an apartment, group of rooms, or single room which is occupied as separate living quarters or, if vacant, is intended for occupancy as separate living quarters, in which a tenant can live and sleep separately from any other persons in the building. A vacant dwelling unit that does not have active utility services is not considered to be intended for occupancy.

b. Dual classification. Assessors shall use dual classification on parcels where the primary use of the parcel is commercial or industrial and a portion or portions of the parcel are used or intended for human habitation, regardless of the number of dwelling units. For the assessment year beginning January 1, 2015, a parcel where the primary use is multiresidential shall not receive a dual classification but instead shall be classified multiresidential for the entire parcel.

For assessment years beginning January 1, 2016, and after, assessors shall use dual classification on properties where the primary use of the parcel meets the requirements of the multiresidential classification and a portion or portions of the parcel meet the requirements of the commercial classification under subrule 71.1(6) or the industrial classification under subrule 71.1(7). If the primary use of a parcel is for human habitation and the parcel contains fewer than three separate dwelling units, it shall be classified as residential real estate under subrule 71.1(4).

The only permissible combinations of dual classifications are commercial and multiresidential or industrial and multiresidential. The assessor shall assign to that portion of the parcel that satisfies the requirements the classification of multiresidential property and to such other portions of the parcel the property classification for which such other portions qualify. The assessor shall maintain the valuation and assessment of property with a dual classification on one parcel record.

c. Section 42 housing. Property that has elected special valuation procedures under Iowa Code section 441.21(2) and is rented or leased to low-income individuals and families as authorized by Section 42 of the Internal Revenue Code shall not be classified as multiresidential property as required by 2014 Iowa Acts, House File 2466, section 3.

d. Short-term leases. A hotel, motel, inn or other building where rooms or dwelling units are usually rented for less than one month shall not be classified as multiresidential property.

71.1(6) Commercial real estate. Commercial real estate shall include all lands and improvements and structures located thereon which are primarily used or intended as a place of business where goods, wares, services, or merchandise is stored or offered for sale at wholesale or retail. Commercial realty shall also include hotels, motels, and property that is rented or leased to low-income individuals and families as authorized by Section 42 of the Internal Revenue Code and has not been withdrawn from Section 42 assessment procedures under Iowa Code section 441.21(2). Commercial real estate shall also include data processing equipment as defined in Iowa Code section 427A.1(1) “j,” except data processing equipment used in the manufacturing process. However, regardless of the number of separate living quarters or any commercial use of the property, single- and two-family dwellings, multiple housing cooperatives organized under Iowa Code chapter 499A, and land and buildings used primarily for human

habitation and owned and operated by organizations that have received tax-exempt status under Section 501(c)(3) of the Internal Revenue Code, if the rental income from the property is not taxed as unrelated business income under Iowa Code section 422.33(1A), shall be classified as residential real estate.

An apartment in a horizontal property regime (condominium) referred to in Iowa Code chapter 499B which is used or intended for use as a commercial venture, other than leased for human habitation, shall be classified as commercial real estate. Existing structures shall not be converted to a horizontal property regime unless building code requirements have been met.

71.1(7) Industrial real estate.

a. Land and buildings.

(1) Industrial real estate includes land, buildings, structures, and improvements used primarily as a manufacturing establishment. A manufacturing establishment is a business entity in which the primary activity consists of adding to the value of personal property by any process of manufacturing, refining, purifying, the packing of meats, or the combination of different materials with the intent of selling the product for gain or profit. Industrial real estate includes land and buildings used for the storage of raw materials or finished products and which are an integral part of the manufacturing establishment, and also includes office space used as part of a manufacturing establishment.

(2) Whether property is used primarily as a manufacturing establishment and, therefore, assessed as industrial real estate depends upon the extent to which the property is used for the activities enumerated in subparagraph 71.1(7) "a"(1). Property in which the performance of these activities is only incidental to the property's primary use for another purpose is not a manufacturing establishment. For example, a grocery store in which bakery goods are prepared would be assessed as commercial real estate since the primary use of the grocery store premises is for the sale of goods not manufactured by the grocery and the industrial activity, i.e., baking, is only incidental to the store premises' primary use. However, property which is used primarily as a bakery would be assessed as industrial real estate even if baked goods are sold at retail on the premises since the bakery premises' primary use would be for an industrial activity to which the retail sale of baked goods is merely incidental. See *Lichty v. Board of Review of Waterloo*, 230 Iowa 750, 298 N.W. 654 (1941).

Similarly, a facility which has as its primary use the mixing and blending of products to manufacture feed would be assessed as industrial real estate even though a portion of the facility is used solely for the storage of grain, if the use for storage is merely incidental to the property's primary use as a manufacturing establishment. Conversely, a facility used primarily for the storage of grain would be assessed as commercial real estate even though a part of the facility is used to manufacture feed. In the latter situation, the industrial use of the property — the manufacture of feed — is merely incidental to the property's primary use for commercial purposes — the storage of grain.

(3) Property used primarily for the extraction of rock or mineral substances from the earth is not a manufacturing establishment if the only processing performed on the substance is to change its size by crushing or pulverizing. See *River Products Company v. Board of Review of Washington County*, 332 N.W.2d 116 (Iowa Ct. App. 1982).

b. Machinery.

(1) Machinery includes equipment and devices, both automated and nonautomated, which is used in manufacturing as defined in Iowa Code section 428.20. See *Deere Manufacturing Co. v. Beiner*, 247 Iowa 1264, 78 N.W.2d 527 (1956).

(2) Machinery owned or used by a manufacturer but not used within the manufacturing establishment is not assessed as industrial real estate. For example, "X" operates a factory which manufactures building materials for sale. In addition, "X" uses some of these building materials in construction contracts. The machinery which "X" would primarily use at the construction site would not be used in a manufacturing establishment and, therefore, would not be assessed as industrial real estate.

(3) Machinery used in manufacturing but not used in or by a manufacturing establishment is not assessed as industrial real estate. See *Associated General Contractors of Iowa v. State Tax Commission*, 255 Iowa 673, 123 N.W.2d 922 (1963).

(4) Where the primary function of a manufacturing establishment is to manufacture personal property that is consumed by the manufacturer rather than sold, the machinery used in the manufacturing

establishment is not assessed as industrial real estate. See *Associated General Contractors of Iowa v. State Tax Commission*, 255 Iowa 673, 123 N.W.2d 922 (1963).

71.1(8) Point-of-sale equipment. As used in Iowa Code section 427A.1(1)“j,” the term “point-of-sale equipment” means input, output, and processing equipment used to consummate a sale and to record or process information pertaining to a sale transaction at the time the sale takes place and which is located at the counter, desk, or other specific point at which the transaction occurs. As used in this subrule, the term “sale” means the sale or rental of goods or services and includes both retail and wholesale transactions. Point-of-sale equipment does not include equipment used primarily for depositing or withdrawing funds from financial institution accounts.

71.1(9) Housing development property.

a. Ordinances adopted or amended on or after January 1, 2011.

(1) Adoption of ordinance by board of supervisors. A county board of supervisors may adopt an ordinance providing that property acquired and subdivided for development of housing on or after January 1, 2011, shall continue to be assessed for taxation in the manner it was assessed prior to the acquisition. Each lot shall continue to be taxed in the manner it was taxed prior to acquisition for housing until the lot is sold for construction or occupancy of housing or 5 years from the date of subdivision, whichever occurs first.

(2) Amendments to ordinance by board of supervisors. On or after July 27, 2011, the board of supervisors of a county may amend an ordinance adopted or otherwise made effective under 2011 Iowa Code Supplement section 405.1(1)“a” to extend the 5-year time period for a period of time not to exceed 5 years beyond the end of the original 5-year period established under 2011 Iowa Code Supplement section 405.1(1). Thus, the maximum special assessment time for ordinances adopted on or subsequent to January 1, 2011, is 10 years. An extension of an ordinance under 2011 Iowa Code Supplement section 405.1(1)“a” may apply to all or a portion of the property that was subject to the original ordinance.

(3) Amendments to ordinance by city council. A city council may adopt an ordinance, affecting all or a portion of the property located within the incorporated area of the city subject to the county ordinance adopted under 2011 Iowa Code Supplement section 405.1(1)“a,” extending the county ordinance not previously extended by the board of supervisors up to 5 years. An ordinance by a city council providing for an extension under 2011 Iowa Code Supplement section 405.1(3) shall be subject to the 5-year limitation under 2011 Iowa Code Supplement section 405.1(2). Thus, the maximum time to appeal an ordinance adopted on or subsequent to January 1, 2011, is 10 years if the city council amends an ordinance originally adopted by the county board of supervisors.

(4) Sale of lot; expiration of 5-year or extended period. Upon the sale of the lot for construction or occupancy for housing or upon the expiration of the 5-year or extended period, the property shall be assessed for taxation as residential or commercial multifamily property, whichever is applicable.

(5) Definition of “subdivide.” As used in both paragraphs 71.1(9)“a” and “b,” “subdivide” means to divide a tract of land into three or more lots.

b. Ordinances adopted on or after January 1, 2004, but prior to January 1, 2011.

(1) Ordinances adopted under 2011 Iowa Code Supplement sections 405.1(1) and 405.1(2), to the extent such ordinances affect the assessment of property subdivided for development of housing on or after January 1, 2004, but before January 1, 2011, shall remain in effect or otherwise be made effective, and such ordinances:

1. Adopted under 2011 Iowa Code Supplement section 405.1(1), applicable to counties with a population of less than 20,000, shall be extended, from a period of 5 years, to apply to a period of 10 years from the date of subdivision.

2. Adopted under 2011 Iowa Code Supplement section 405.1(2), applicable to counties with a population of 20,000 or more, shall be extended, from a period of 3 years, to apply to a period of 8 years from the date of subdivision.

Each lot shall continue to be taxed in the manner it was taxed prior to acquisition for housing until the lot is sold for construction or occupancy of housing, or 10 years pursuant to paragraph “1” above or 8 years pursuant to paragraph “2” above (or the extended period, if applicable) from the date of subdivision, whichever occurs first.

(2) Amendments to ordinance by board of supervisors. On or after July 27, 2011, the board of supervisors of a county may amend an ordinance adopted under 2011 Iowa Code Supplement section 405.1(1) or 405.1(2) to extend the 10- and 8-year periods, respectively, for a period of time not to exceed 5 years beyond the end of the 10- and 8-year periods established under 2011 Iowa Code Supplement section 405.1(1)“b.” Thus, the maximum special assessment time for ordinances adopted on or after January 1, 2004, but prior to January 1, 2011, for counties with a population of less than 20,000 shall be 15 years. For counties with a population of 20,000 or more, the maximum shall be 13 years.

(3) Amendments to ordinance by city council. A city council may adopt an ordinance, affecting all or a portion of the property located within the incorporated area of the city subject to the county ordinance adopted under 2011 Iowa Code Supplement sections 405.1(1) and 405.1(2), extending the county ordinances not previously extended by the board of supervisors up to 5 years. An ordinance by a city council providing for an extension under 2011 Iowa Code Supplement section 405.1(3) shall be subject to the 5-year limitation under 2011 Iowa Code Supplement section 405.1(2). Thus, the maximum time to appeal an ordinance adopted on or after January 1, 2004, but prior to January 1, 2011, for counties with a population of less than 20,000 shall be 15 years if the city council amends an ordinance originally adopted by the board of supervisors. For counties with a population of 20,000 or more, the maximum special assessment time shall be 13 years.

(4) Sale of lot. Upon the sale of the lot for construction or occupancy for housing or upon the expiration of the 10- or 8-year or extended period, the property shall be assessed for taxation as residential or commercial multifamily property, whichever is applicable.

71.1(10) Assessment of platted lots.

a. When a subdivision plat is recorded pursuant to Iowa Code chapter 354 on or after January 1, 2011, the individual lots within the subdivision plat shall not be assessed, in the aggregate, in excess of the total assessment of the land as acreage or unimproved property for 5 years after the recording of the plat or until the lot is actually improved with permanent construction, whichever occurs first. When an individual lot has been improved with permanent construction, the lot shall be assessed for taxation purposes as provided in Iowa Code chapters 428 and 441.

b. For subdivision plats recorded pursuant to Iowa Code chapter 354 (relating to division and subdivision of land) on or after January 1, 2004, but before January 1, 2011, the individual lots within the subdivision plat shall not be assessed, in the aggregate, in excess of the total assessment of the land as acreage or unimproved property for 8 years after the recording of the plat or until the lot is actually improved with permanent construction, whichever occurs first. When an individual lot has been improved with permanent construction, the lot shall be assessed for taxation purposes as provided in Iowa Code chapters 428 and 441.

c. 2011 Iowa Code Supplement section 441.72 does not apply to special assessment levies.

This rule is intended to implement Iowa Code sections 405.1, 427A.1, 428.4 and 441.22 and chapter 499B and Iowa Code Supplement section 441.21 as amended by 2002 Iowa Acts, House File 2584. [ARC 8559B, IAB 3/10/10, effective 4/14/10; ARC 0400C, IAB 10/17/12, effective 11/21/12; ARC 1196C, IAB 11/27/13, effective 1/1/14; ARC 1765C, IAB 12/10/14, effective 1/14/15; ARC 2146C, IAB 9/16/15, effective 10/21/15]

701—71.2(421,428,441) Assessment and valuation of real estate.

71.2(1) Responsibility of assessor. The valuation of real estate as established by city and county assessors shall be the actual value of the real estate as of January 1 of the year in which the assessment is made. New parcels of real estate created by the division of existing parcels of real estate shall be assessed separately as of January 1 of the year following the division of the existing parcel of real estate.

71.2(2) Responsibility of other assessing officials. Whenever local boards of review, county auditors, and county treasurers exercise assessment functions allowed or required by law, they shall follow the provisions of subrule 71.2(1) and rules 701—71.3(421,428,441) to 701—71.7(421,427A,428,441).

This rule is intended to implement Iowa Code sections 421.17, 428.4 and 441.21.

701—71.3(421,428,441) Valuation of agricultural real estate. Agricultural real estate shall be assessed at its actual value as defined in Iowa Code section 441.21 by giving exclusive consideration to its productivity and net earning capacity. In determining the actual value of agricultural real estate,

city and county assessors shall use the Iowa Real Property Appraisal Manual and any other guidelines issued by the department of revenue pursuant to Iowa Code section 421.17(18).

71.3(1) Productivity.

a. In determining the productivity and net earning capacity of agricultural real estate, the assessor shall also use available data from Iowa State University, the United States Department of Agriculture (USDA) National Agricultural Statistics Service (NASS), the USDA Farm Service Agency (FSA), the Iowa department of revenue, or other reliable sources. The assessor shall also consider the results of a modern soil survey, if completed. The assessor shall determine the actual valuation of agricultural real estate within the assessing jurisdiction and distribute such valuation throughout the jurisdiction so that each parcel of real estate is assessed at its actual value as defined in Iowa Code section 441.21.

b. In distributing such valuation to each parcel under paragraph 71.3(1)“*a*,” the assessor shall adjust non-cropland. The adjustment shall be applied to non-cropland with a corn suitability rating (CSR) that is greater than 50 percent of the average CSR for cropland for the county. The adjustment shall be determined for each county based upon the five-year average difference in cash rent between non-irrigated cropland and pasture land as published by NASS. The assessor may utilize the USDA FSA-published Common Land Unit digital data or other reliable sources in determining non-cropland. Counties shall implement the adjustments under this paragraph on or before the 2017 assessment year. The department of revenue may, in a case involving hardship, extend the implementation of the adjustments required under this paragraph to the 2019 assessment year. No extension of time shall be granted unless the county makes a written request to the department of revenue for such action.

c. A taxpayer may apply to the county for the adjustment to non-cropland under paragraph 71.3(1)“*b*” beginning with the 2014 assessment and until the county’s full implementation of this subrule. Upon application, and subsequent approval by the assessor, the county assessor shall adjust non-cropland as provided in paragraph 71.3(1)“*b*.” Once a taxpayer applies for the adjustment, and upon approval, the assessor shall make the adjustment to the assessment year for which the application was submitted and until the county’s full implementation of this subrule, without the need to reapply for the adjustment.

d. EXAMPLE. The following is an example of the calculation used to compute adjustment on land determined to be non-cropland with a CSR that is greater than 50 percent of the average CSR for cropland for the county:

Average county CSR rating for cropland	80 CSR
50% of average cropland CSR	40 CSR
Example of non-cropland soil 11b CSR rating	58 CSR
Non-cropland CSR points to be adjusted	$58 - 40 = 18$ CSR points
5-year average rent for non-irrigated cropland	\$163.60
5-year average rent for pasture land	\$48.30
Percent difference (rounded)	$1 - (\$48.30/\$163.60) = 70\%$
Apply the percent difference to points to be adjusted	$18 \text{ CSR points} \times (1 - .70) = 5.40$ adjusted CSR points
Adjusted CSR non-cropland	$40 + 5.40 = 45.40$ adjusted CSR points

71.3(2) Agricultural factor. In order to determine a productivity value for agricultural buildings and structures, assessors must make an agricultural adjustment to the market value of these buildings and structures by developing an “agricultural factor” for the assessors’ jurisdictions. The agricultural factor for each jurisdiction is the product of the ratio of the productivity and net earning capacity value per acre as determined under subrule 71.12(1) over the market value of agricultural land within the assessing jurisdiction. The resulting ratio is then applied to the actual value of the agricultural buildings and structures as determined under the Iowa Real Property Appraisal Manual prepared by the department. The agricultural factor must be applied uniformly to all agricultural buildings and structures in the assessing jurisdiction. As an example, if a building’s actual value is \$500,000 and the agricultural factor is 30 percent, the productivity value of that building is \$150,000. See *H & R Partnership v. Davis*

County Board of Review, 654 N.W.2d 521 (Iowa 2002). The 2007, 2008, and 2009 average of the market value of land will be used in determining the agricultural factor for assessment year 2011. A five-year market value average of land for years used to determine the productivity formula will be used to determine the agricultural factor for assessment year 2013 and subsequent assessment years.

71.3(3) Classification. Land classified as agricultural real estate includes the land beneath any dwelling and appurtenant structures located on that land and shall be valued by the assessor pursuant to rule 701—71.3(421,428,441). An assessor shall not value a part of the land as agricultural real estate and a part of the land as if it is residential real estate.

This rule is intended to implement Iowa Code sections 421.17, 428.4 and 441.21.

[ARC 8542B, IAB 2/24/10, effective 3/31/10; ARC 9478B, IAB 4/20/11, effective 5/25/11; ARC 0770C, IAB 5/29/13, effective 7/3/13]

701—71.4(421,428,441) Valuation of residential real estate. Residential real estate shall be assessed at its actual value as defined in Iowa Code section 441.21.

In determining the actual value of residential real estate, city and county assessors shall use the appraisal manual issued by the department of revenue pursuant to Iowa Code section 421.17(18) as well as a locally conducted assessment/sales ratio study, an analysis of sales of comparable properties, and any other relevant data available.

This rule is intended to implement Iowa Code sections 421.17, 428.4 and 441.21.

701—71.5(421,428,441) Valuation of commercial real estate. Commercial real estate shall be assessed at its actual value as defined in Iowa Code section 441.21. In determining the actual value of commercial real estate, city and county assessors shall use the appraisal manual issued by the department of revenue pursuant to Iowa Code section 421.17(18) as well as a locally conducted assessment/sales ratio study, an analysis of sales of comparable properties, and any other relevant data available.

71.5(1) Property of long distance telephone companies. The director of revenue shall assess the property of long distance telephone companies as defined in Iowa Code section 476.1D(10) which property is first assessed for taxation on or after January 1, 1996, in the same manner as commercial real estate.

71.5(2) Low-income housing subject to Section 42 of the Internal Revenue Code.

a. Productive and earning capacity. In assessing property that is rented or leased to low-income individuals and families as authorized by Section 42 of the Internal Revenue Code which limits the amount that the individual or family pays for the rental or lease of units in the property, the assessor shall use the productive and earning capacity from the actual rents received as a method of appraisal and shall take into account the extent to which that use and limitation reduces the market value of the property.

b. Direct capitalization method. The income approach to valuation shall be applied using the direct capitalization method. The assessor may use the discounted cash flow method as a test of the reasonableness of the results produced by the direct capitalization method. The direct capitalization method of the income approach involves dividing the Net Operating Income (NOI) on a cash basis by an overall capitalization rate to derive an indication of the value of the property for the assessment year.

In applying the direct capitalization method, the assessor shall develop a normalized measure of annual NOI based on the productive and earning capacity of the development utilizing (1) the actual rent schedule applicable for each of the available units as of January 1 of the year of assessment indicating the actual rent to be paid by the resident plus any Section 8 rental assistance or other direct cash rental subsidy provided to the resident by federal, state or local rent subsidy programs as limited pursuant to Section 42 of the Internal Revenue Code, (2) a normal vacancy/collection allowance, (3) the prior year's actual and current year's projected annual operating expenses associated with the property, excluding noncash items such as depreciation and amortization, but including property taxes and those actual costs expected to be incurred and paid as required by Internal Revenue Code Section 42 regulations, provisions, and restrictions as applicable to the assessment year, and (4) an appropriate provision for replacement reserves.

If no separate line item is included for reserves for replacement in the historic income and expense data, then the maintenance and repair categories of the historic expense data must be itemized. For

properties that have attained a normalized operating history, the NOI results of the prior three years (as represented in the statements variously named as the Income and Loss Statement, the Profit and Loss Statement, the Income Statement, the Actual to Budget Comparison Statement, Balance Sheet, or some name variation of these) may be used to provide the basis for determining the normalized NOI used for purposes of applying the direct capitalization method for the year of assessment, provided an appropriate replacement reserve is included in the NOI determination and provided any additional costs required as a result of Section 42 regulation or compliance changes for the assessment year are included as an operating expense in the NOI determination. In addition, the assessor may utilize the current year operating budget to develop a measure of NOI for the assessment year. The assessor, in developing the measure of annual NOI on a cash basis, shall not consider as income any potential rental income differential that could otherwise be received from the property if the rents were not limited pursuant to Section 42 of the Internal Revenue Code, any tax credit equity, any tax credit value, or other subsidized financing.

c. Filing of reports. It shall be the responsibility of the property owner to file income and expense data with the local assessor by March 1 of each year. The assessor may require the filing of additional information if deemed necessary.

d. Capitalization rate. The overall capitalization rate to be used in applying the direct capitalization method for a Section 42 property is developed through the band-of-investment technique. The capitalization rate will be calculated annually by the Iowa department of revenue and distributed to all Iowa assessors by March 1. The capitalization rate is a composite rate weighted by the proportions of total property investment represented by debt and equity. The capital structure weights equity at 80 percent and debt at 20 percent unless actual market capital structure can be verified to the assessor. The yield, or market rate of return, for equity is calculated using the capital asset pricing model (CAPM). The yield for debt is equivalent to the average yield on 25-year Treasury bonds referred to as the Treasury long-term average rate. An example of the band-of-investment technique to be utilized is as follows:

	<u>% to Total</u>	<u>Yield</u>	<u>Composite</u>
Equity	80%	11.05%	8.84%
Debt	20%	5.94%	1.19%
	<u>100%</u>		<u>10.03%</u>

e. Capital asset pricing model. The capital asset pricing model (CAPM) is utilized to develop the equity rate. The formula is:

$$Re = B (Rm - Rf) + Rf$$

Where:

- Re = return on equity
- B = beta
- Rm = return on the market
- Rf = risk-free rate of return
- Rm - Rf = market-risk premium

The beta is assumed to be 1 which indicates the risk level to be consistent with the market as a whole. The risk-free rate is calculated by finding the average of the three-month and six-month Treasury bill. The return on the market is calculated by taking the average of the return on the market for the Merrill Lynch Universe and Standard and Poor’s 500 or by reference to other published secondary sources.

f. Properties under construction. For Section 42 properties under construction, the assessor may value the property by applying the percentage of completion to the replacement cost new (RCN) as calculated from the Iowa Real Property Appraisal Manual and adding the fair market value of the land. Alternatively, projected income and expense data may be utilized if available.

g. Negative or minimal NOI. If the Section 42 property shows a negative or minimal net operating income (NOI), the indicator of value as set forth in these rules shall not be utilized.

h. Eligibility withdrawn. The property owner shall notify the assessor when property is withdrawn from Section 42 eligibility under the Internal Revenue Code. The notification must be provided by March 1 of the assessment year or the owner is subject to a penalty of \$500.

This rule is intended to implement Iowa Code sections 421.17, 428.4, 441.21 as amended by 2004 Iowa Acts, Senate File 2296, and 476.1D(10).

701—71.6(421,428,441) Valuation of industrial land and buildings. Industrial real estate shall be assessed at its actual value as defined in Iowa Code section 441.21.

In determining the actual value of industrial land and buildings, city and county assessors shall use the appraisal manual issued by the department of revenue pursuant to Iowa Code subsection 421.17(18), and any other relevant data available.

This rule is intended to implement Iowa Code sections 421.17, 428.4 and 441.21.

701—71.7(421,427A,428,441) Valuation of industrial machinery. Industrial machinery as referred to in Iowa Code section 427A.1(1)“e” shall include all machinery used in manufacturing establishments and shall be assessed as real estate even though such machinery might be assessed as personal property if not used in a manufacturing establishment.

In determining the actual value of industrial machinery assessed as real estate, the assessor shall give consideration to the “Industrial Machinery and Equipment Valuation Guide” issued by the department of revenue and any other relevant data available.

This rule is intended to implement Iowa Code sections 421.17, 427A.1, 428.4 and 441.21.

701—71.8(428,441) Abstract of assessment. Each city and county assessor shall submit annually to the director of revenue at the times specified in Iowa Code section 441.45 an abstract of assessment for the current year. The assessor shall use the form of abstract prescribed and furnished by the department of revenue, and shall enter on the abstract all information required by the department. However, the department may approve the use of a computer-prepared abstract if the data is essentially the same format as on the form prescribed by the department. The information entered on the abstract of assessment shall be reviewed and considered by the director of revenue in equalizing the valuations of classes of properties.

This rule is intended to implement Iowa Code sections 428.4 and 441.45.

701—71.9(428,441) Reconciliation report. The assessor’s report of any revaluation required by Iowa Code section 428.4 shall be made on the reconciliation report prescribed and furnished by the department of revenue. The assessor shall enter on the report all information required by the department. The reconciliation report shall be a part of the abstract of assessment required by Iowa Code section 441.45 and shall be reviewed and considered by the director in equalizing valuations of classes of property.

This rule is intended to implement Iowa Code sections 428.4 and 441.45.

701—71.10(421) Assessment/sales ratio study.

71.10(1) Basic data. Basic data shall be that submitted to the department of revenue by county recorders and city and county assessors on forms prescribed and provided by the department, information furnished by parties to real estate transactions, and information obtained by field investigations made by the department of revenue.

71.10(2) Responsibility of recorders and assessors. County recorders and city and county assessors shall complete the prescribed forms as required by Iowa Code subsection 421.17(6) and rule 701—79.3(428A) in accordance with instructions issued by the department. Assessed values entered on the prescribed form shall be those established as of January 1 of the year in which the sale takes place.

71.10(3) Normal sales. All real estate transfers shall be considered by the department of revenue to be normal sales unless there exists definite information which would indicate the transfer was not an arms-length transaction or is of an excludable nature as provided in Iowa Code section 441.21.

This rule is intended to implement Iowa Code section 421.17.

701—71.11(441) Equalization of assessments by class of property. Commencing in 1977 and every two years thereafter, the director of revenue shall order the equalization of the levels of assessment of each class of property as provided in rule 701—71.12(441) by adding to or deducting from the valuation of each class of property, as reported to the department on the abstract of assessment and reconciliation report which is a part of the abstract, the percentage in each case as may be necessary to bring the level of assessment to its actual value as defined in Iowa Code section 441.21. Valuation adjustments shall be ordered if the director determines that the aggregate valuation of a class of property as reported on the abstract of assessment submitted by the assessor is at least 5 percent above or below the aggregate valuation for that class of property as determined by the director pursuant to rule 701—71.12(441). Equalization orders of the director shall be restricted to equalizing the aggregate valuations of entire classes of property among the several assessing jurisdictions. All classifications of real estate shall be applied uniformly throughout the state of Iowa.

Equalization percentage adjustments determined for residential realty located outside incorporated areas and not located on agricultural land shall apply to buildings located on agricultural land outside incorporated areas, which are primarily used or intended for human habitation, as defined in subrule 71.1(4).

Equalization percentage adjustments determined for residential realty located within incorporated cities and not located on agricultural land shall apply to buildings located on agricultural land within incorporated cities which are primarily used or intended for human habitation as defined in subrule 71.1(4).

This rule is intended to implement Iowa Code sections 441.21, 441.47, 441.48 and 441.49.

701—71.12(441) Determination of aggregate actual values.

71.12(1) Agricultural real estate.

a. Use of income capitalization study. The equalized valuation of agricultural realty shall be based upon its productivity and net earning capacity and shall be determined in accordance with the provisions of this subrule. Data used shall pertain to crops harvested during the five-year period ending with the calendar year in which assessments were last equalized. The equalized valuation of agricultural realty shall be determined for each county as follows:

(1) Computation of county acres. This information shall be obtained from the USDA National Agricultural Statistics Service.

1. Total acres in farms: Total acreage used for agricultural purposes.
2. Corn acres: Sum of corn acres harvested including silage, popcorn and acres planted for sorghum.
3. Oats and wheat acres: Sum of oats and wheat acres harvested.
4. Soybean acres: Soybean acres harvested.
5. Hay acres: All hay acres harvested.
6. Pasture acres: All pasture acres. Total pasture acres shall be determined by multiplying the total acres in farms reported by the USDA National Agricultural Statistics Service by the percentage which total pasture land as reported in the most recent U.S. Census of Agriculture bears to the total acreage in farmland also reported in the most recent U.S. Census of Agriculture. The amount of tillable and nontillable pasture acres shall be determined as follows:

1.	From the most recent U.S. Census of Agriculture obtain the following:		
	Cropland used only for pasture and grazing	_____	acres
	Woodland pasture	_____	acres
	Pasture land and rangeland (other than cropland and woodland pasture)	_____	acres
	TOTAL PASTURE LAND (total of above):	_____	acres
2.	Determine what percentage of the total pasture land is cropland used only for pasture:	_____	%
3.	Apply the percentage in "2" above to the 5-year average total acres of pasture as determined above to determine the pasture acres to be classified as tillable pasture. The remainder of the 5-year average shall be classified as nontillable pasture land.	_____	acres

7. Government programs: Determine the 5-year average acres participating in applicable government programs. Obtain data from the USDA Farm Service Agency, including but not limited to acreage devoted to the Payment-In-Kind (PIK), diverted and deficiency programs.

8. Other acres: The difference between the total acreage for land uses listed above and the total of all land in farms. Add the total of the corn, oats, soybeans, hay, tillable and nontillable pasture and diverted acres. Subtract this total from total acres in farms. The residual is classified as other acres.

(2) Computation of county yields. This information shall be obtained for each county from the USDA National Agricultural Statistics Service.

1. Corn yield (including silage): Number of bushels of corn harvested for grain per acre.
2. Oat yield (including wheat): Number of bushels of oats harvested per acre.
3. Soybean yield: Number of bushels per acre harvested.
4. Hay yield in tons: Number of tons per acre harvested.

(3) Computation of county gross income.

1. Corn: One-half of the 5-year average production multiplied by the 5-year average price received for corn.

2. Silage: One-half of the 5-year average number of acres devoted to the production of silage multiplied by the 5-year average production per acre for corn. The amount of production so determined shall be added to the 5-year average production for corn and included in the determination of the gross income for corn.

3. Soybeans: One-half of the 5-year average production multiplied by the 5-year average price received.

4. Oats: One-half of the 5-year average production of oats and wheat multiplied by the 5-year average price received for oats.

5. Price adjustment: For corn, soybeans, hay, and oats, the prices used shall be as obtained from the USDA National Agricultural Statistics Service and shall be adjusted to reflect any individual county price conditions prior to the 2007 crop year. For the 2007 crop year and later, the USDA National Agricultural Statistics Service district prices shall be used and shall be adjusted to reflect any individual county price conditions.

6. Government programs: Gross income shall be one-half of the 5-year average amount of cash payments or equivalent (such as PIK bushels) including but not limited to diverted, deficiency and PIK programs as reported by the USDA Farm Service Agency.

7. Hay: Gross income shall be a cash rent amount determined by multiplying the 5-year average number of acres devoted to hay by the product obtained by multiplying one-fourth of the 5-year average hay yield by the 5-year average price received for all types of hay.

8. Tillable pasture: Gross income shall be a cash rent amount determined by multiplying the 5-year average number of acres devoted to tillable pasture by the product obtained in “hay” above.

9. Nontillable pasture: Gross income shall be a cash rent amount determined by multiplying the 5-year average number of acres devoted to nontillable pasture by one-half the product obtained in “hay” above.

10. Other acres: Income shall be the product of the number of other acres multiplied by 17 percent of the net income per acre for all other land uses.

(4) Computation of county production costs. The following data and procedures shall be used to determine specific county production costs.

1. Basic average landlord production costs. Landlord production costs for corn, soybeans, oats, diverted acres, hay, tillable pasture, nontillable pasture, fertilizer costs, and facilities’ costs shall be obtained for each year from Iowa State University.

2. Production cost adjustment. The production costs for corn, soybeans, oats, and hay are adjusted for each county by multiplying the difference between the 5-year state average yield per acre and the 5-year county average yield per acre by the 5-year average facilities’ costs. If a county’s yield exceeds the state yield, production costs are increased by this amount. If a county’s yield is less than the state yield, production costs are reduced by this amount.

3. Fertilizer cost adjustment. The adjustment for fertilizer costs is determined as follows: Multiply the difference between the 5-year state average corn yield per acre and the 5-year county average corn yield per acre obtained from the USDA National Agricultural Statistics Service by the fertilizer cost amount per bushel determined by dividing the statewide average cost of landlord’s share of fertilizer cost per acre from Iowa State University by the statewide average corn yield per acre to produce the corn fertilizer cost per bushel adjustment. This amount is then multiplied by the 5-year county average corn acres determined in (2) above.

4. Expense adjustments. If a county’s 5-year average corn yield is greater than the state 5-year average corn yield, this amount is allowed as an additional expense. If the county’s average is less than the state average, this amount is an expense reduction.

5. Liability insurance cost adjustment. The 5-year average per acre cost of obtaining tort liability insurance shall be determined.

(5) Computation of county net income. From the total gross income, subtract the total expenses. Divide the resulting total by the total number of acres.

(6) Computation of dwelling adjustment factor. The amount determined in (5) above shall be reduced by 10.6 percent.

(7) Computation of county tax adjustment. Subtract the 5-year average per acre real estate taxes levied for land and structures including drainage and levee district taxes but excluding those levied against agricultural dwellings from the amount determined in (6) above. Taxes shall be the tax levied for collection during the 5-year period as reported by county auditors, and reduced by the amount of the agricultural land tax credit.

(8) Calculation of county valuation per acre. Divide the net income per acre ((7) above) for each county as determined above by the capitalization rate specified in Iowa Code section 441.21. The quotient shall be the actual per acre equalized valuation of agricultural land and structures for the current equalization year.

b. Use of other relevant data. The director may also consider other relevant data, including field investigations conducted by representatives of the department of revenue, to determine the level of assessment of agricultural real estate.

c. Determination of value. The aggregate actual value of agricultural real estate in each county shall be determined by multiplying the equalized per acre value by the number of acres of agricultural real estate reported on the abstract of assessment for the current year, adjusted where necessary by the results of any field investigations conducted by the department of revenue and any other relevant data available.

71.12(2) *Residential real estate outside and within incorporated cities.*

a. Use of assessment/sales ratio study. Basic data shall be that set forth in rule 701—71.10(421) refined by eliminating any sales determined to be abnormal or by adjusting the sales to eliminate the effects of factors which resulted in the sales having been determined to be abnormal. The basic data used shall be the assessment/sales ratio study conducted for sales taking place during the calendar year immediately preceding the year in which the equalization order is issued. The director may also supplement the assessment/sales ratio study with appraisals made by department of revenue appraisal personnel for the year immediately preceding the year in which the equalization order is issued. The assessment/sales ratio study including relevant appraisals, if any, shall be used to determine the aggregate actual valuation of residential real estate in each assessing jurisdiction. The director of revenue may consider sales and appraisal data for prior years if it is determined the use of the sales and appraisal data for the year immediately preceding the year in which the equalization order is issued is insufficient to determine market value. If such sales and appraisal data for prior years is used, consideration shall be given for any subsequent changes in either assessed value or market value.

Assessors shall provide any known facts or circumstances regarding reported sales transactions and department appraisals which would indicate abnormal or unusual conditions or reporting discrepancies which would necessitate exclusion or adjustment of sales or appraisals from the determination of aggregate actual values. Assessors shall provide those facts within 45 days of receipt from the department of information concerning sales and appraisal data proposed for assessment/sales ratio and equalization purposes.

b. Use of other relevant data. The director may also consider other relevant data, including field investigations conducted by representatives of the department of revenue to determine the level of assessment of residential real estate.

c. Equalization appraisal selection procedures for residential real estate. Residential properties to be appraised by department of revenue personnel for use in supplementing the assessment/sales ratio study shall be selected for each jurisdiction in the following manner:

(1) The department appraiser assigned to the jurisdiction shall determine a systematic random sequence of numbers equal to the number of appraisals required and document the following steps.

1. The department appraiser assigned to the jurisdiction shall compute the interval number by dividing the total number of improved properties in the classification to be sampled by the number of appraisals to be performed.

EXAMPLE: In this example, ten appraisals are needed with a total of 1,397 improved residential units. Dividing 1,397 by 10, 139.7 is arrived at, which is rounded down to 139. This is the interval number.

2. The selection of the first sequence number shall be accomplished by having an available disinterested person randomly select a number from one through the interval number.

EXAMPLE: In this example a number from 1 to 139 is to be selected. The person randomly selected number 20.

3. The department appraiser shall develop a systematic sequence of numbers equal to the number of appraisals required. Starting with the randomly selected number previously picked by the disinterested person, add the interval number to this number and to each resulting number until a systematic sequence of numbers is obtained.

EXAMPLE: In this example ten appraisals are needed, so a sequence of ten numbers must be developed. Starting with number 20 and adding the interval number of 139 to it, each resulting number provides the following systematic sequence: 20, 159, 298, 437, 576, 715, 854, 993, 1,132, 1,271.

(2) Number of improved properties.

County jurisdictions—Put the name of each city or township having improved units in the classification to be sampled into a hat. Draw each one out of the hat and record its name in the order of its draw. Likewise, record the respective number of improved units for each. Then consecutively number all the improved units and document the procedure.

EXAMPLE:

City or Township	Number of Improved Residential Units	Code Numbers
Franklin Twp.	57	1-57
Pleasant View	160	58-217
Jackson Twp.	56	218-273
Johnston	300	274-573
Polk Twp.	110	574-683
Washington Twp.	114	684-797
Maryville	306	798-1103
Camden Twp.	110	1104-1213
Salem	184	1214-1397
Total	<u>1,397</u>	

(3) Determine the location of the improved properties selected for appraisal and document the procedure.

EXAMPLE:

City or Township	Number of Improved Residential Units	Code Numbers	Sequence Number	Entry on Rolls
Franklin Twp.	57	1-57	20	20
Pleasant View	160	58-217	159	102
Jackson Twp.	56	218-273		
Johnston	300	274-573	298,437	25,164
Polk Twp.	110	574-683	576	3
Washington Twp.	114	684-797	715	32
Maryville	306	798-1103	854,993	57,196
Camden Twp.	110	1104-1213	1132	29
Salem	184	1214-1397	1271	58
Total	<u>1,397</u>			

1. The department appraiser shall locate the property to be appraised by finding the relationship between the sequence numbers and the code numbers and identify the property.

EXAMPLE: The first sequence number is 20. Since the improved residential properties in Franklin Township have been assigned code numbers 1 to 57, sequence number 20 is in that location.

To identify this property, examine the Franklin Township assessment roll book and stop at the twentieth improved residential entry.

Document the parcel number, owner's name, and legal description of this property.

2. The department appraiser shall appraise the property selected unless it is ineligible because of any of the following restrictions:

- Current year sale
- Partial assessment
- Prior equalization appraisal
- Tax-exempt
- Value established by court action
- Value is not more than \$10,000
- Building on leased land

3. The department appraiser shall determine a substitute property if the originally selected one is ineligible. In ascending order, select code numbers until an eligible property is found.

EXAMPLE: If code number 20 is ineligible, use code number 21 as a substitute. If code number 21 is ineligible, use code number 22, etc., until an eligible property is found.

If the procedure described in 71.12(2)“c”(3)“3” moves the substitute property to another city or township, select substitute code numbers in descending order until an eligible property is found.

If the procedure described in the previous paragraph moves the substitute property to a preceding city or township, go back to the procedure of 71.12(2)“c”(3)“3” even if it moves the substitute property to a subsequent city or township.

4. Select an alternate property for the originally selected property which also would be eligible. This is necessary because at the time of appraisal the property may be found to be ineligible due to one of the restrictions in 71.12(2)“c”(3)“2.” Alternate properties are selected by using the same procedure described in 71.12(2)“c”(3)“3.”

5. Follow procedures 71.12(2)“c”(3), items “1” to “4,” for each of the other originally selected sequence numbers.

71.12(3) Multiresidential real estate.

a. *Use of assessment/sales ratio study.* Basic data shall be that set forth in rule 701—71.11(421), refined by eliminating any sales determined to be abnormal or by adjusting same to eliminate the effects of factors which resulted in the sales having been determined to be abnormal. The basic data used shall be the assessment/sales ratio study conducted for sales taking place during the calendar year immediately preceding the year in which the equalization order is issued. The director may also supplement the assessment/sales ratio study with appraisals made by department of revenue appraisal personnel for the year immediately preceding the year in which the equalization order is issued. The assessment/sales ratio study including relevant appraisals, if any, shall be used to determine the aggregate actual valuation of multiresidential real estate in each assessing jurisdiction. The director of revenue may consider sales and appraisal data for prior years if it is determined the use of sales and appraisal data for the year immediately preceding the year in which the equalization order is issued is insufficient to determine market value. If such sales and appraisal data for prior years is used, consideration shall be given for any subsequent changes in either assessed value or market value.

b. *Use of other relevant data.* The director may also consider other relevant data, including field investigations conducted by representatives of the department of revenue, to determine the level of assessment of multiresidential real estate.

Assessors shall provide any known facts or circumstances regarding reported sales transactions and department appraisals which would indicate abnormal or unusual conditions or reporting discrepancies which would necessitate exclusion or adjustment of sales or appraisals from the determination of aggregate actual values. Assessors shall provide those facts within 45 days of receipt from the department of information concerning sales and appraisal data proposed for assessment/sales ratio and equalization purposes.

c. *Equalization appraisal selection procedures for multiresidential real estate.* To the extent possible, multiresidential properties to be appraised by department of revenue personnel for use in supplementing the assessment/sales ratio study shall be selected for each jurisdiction in the manner outlined in paragraph 71.12(4)“c.”

The following restrictions shall render a property ineligible for the appraisal selection for multiresidential property:

Vacant building

Current-year sale

Partial assessment

Tax-exempt

Only one portion of a total property unit (example—a parking lot of a grocery store)

Value established by court action

Value is not more than \$10,000

Building on leased land

71.12(4) Commercial real estate.

a. Use of assessment/sales ratio study. Basic data shall be that set forth in rule 701—71.10(421), refined by eliminating any sales determined to be abnormal or by adjusting same to eliminate the effects of factors which resulted in the sales having been determined to be abnormal. The basic data used shall be the assessment/sales ratio study conducted for sales taking place during the calendar year immediately preceding the year in which the equalization order is issued. The director may also supplement the assessment/sales ratio study with appraisals made by department of revenue appraisal personnel for the year immediately preceding the year in which the equalization order is issued. The assessment/sales ratio study including relevant appraisals, if any, shall be used to determine the aggregate actual valuation of commercial real estate in each assessing jurisdiction. The director of revenue may consider sales and appraisal data for prior years if it is determined the use of sales and appraisal data for the year immediately preceding the year in which the equalization order is issued is insufficient to determine market value. If such sales and appraisal data for prior years is used, consideration shall be given for any subsequent changes in either assessed value or market value. Properties receiving a dual classification with the primary use being commercial shall be included.

b. Use of other relevant data. The director may also consider other relevant data, including field investigations conducted by representatives of the department of revenue, to determine the level of assessment of commercial real estate. The diverse nature of commercial real estate precludes the use of a countywide or citywide income capitalization study.

Assessors shall provide any known facts or circumstances regarding reported sales transactions and department appraisals which would indicate abnormal or unusual conditions or reporting discrepancies which would necessitate exclusion or adjustment of sales or appraisals from the determination of aggregate actual values. Assessors shall provide those facts within 45 days of receipt from the department of information concerning sales and appraisal data proposed for assessment/sales ratio and equalization purposes.

c. Equalization appraisal selection procedures for commercial real estate. Commercial properties to be appraised by department of revenue personnel for use in supplementing the assessment/sales ratio study shall be selected for each jurisdiction in the manner outlined below. Properties receiving a dual classification with the primary use being commercial shall be included.

(1) The department appraiser assigned to the jurisdiction shall determine a systematic random sequence of numbers equal to the number of appraisals required and document the following steps.

1. The department appraiser shall compute the interval number by dividing the total number of improved properties in the classification to be sampled by the number of appraisals to be performed.

EXAMPLE: In this example, ten appraisals are needed with a total of 397 improved commercial units. Dividing 397 by 10, 39.7 is arrived at, which is rounded down to 39. This is the interval number.

2. The selection of the first sequence number shall be accomplished by having an available disinterested person randomly select a number from one through the interval number.

EXAMPLE: In this example a number from 1 to 39 is to be selected. The person randomly selected number 2.

3. The department appraiser shall develop a systematic sequence of numbers equal to the number of appraisals required. Starting with the randomly selected number previously picked by the disinterested person, add the interval number to this number and to each resulting number until a systematic sequence of numbers is obtained.

EXAMPLE: In this example ten appraisals are needed, so a sequence of ten numbers must be developed. Starting with number 2 and adding the interval number of 39 to it, each resulting number provides the following systematic sequence: 2, 41, 80, 119, 158, 197, 236, 275, 314, 353.

(2) Number of improved properties.

1. City jurisdictions—Utilizing the assessment book or a computer printout which follows the same order as the assessment book, consecutively number all the improved units and document the procedure.

2. County jurisdictions—Put the name of each city or township having improved units in the classification to be sampled into a hat. Draw each one out of the hat and record its name in the order

of its draw. Likewise, record the respective number of improved units for each. Then consecutively number all the improved units and document the procedure.

EXAMPLE:

City or Township	Number of Improved Commercial Units	Code Numbers
Franklin Twp.	4	1-4
Pleasant View	60	5-64
Jackson Twp.	9	65-73
Johnston	100	74-173
Polk Twp.	10	174-183
Washington Twp.	14	184-197
Maryville	106	198-303
Camden Twp.	10	304-313
Salem	84	314-397
Total	397	

(3) The department appraiser shall determine the location of the improved properties selected for appraisal and document the procedure.

EXAMPLE:

City or Township	Number of Improved Commercial Units	Code Numbers	Sequence Number	Entry on Rolls
Franklin Twp.	4	1-4	2	2
Pleasant View	60	5-64	41	37
Jackson Twp.	9	65-73		
Johnston	100	74-173	80,119,158	7,46,85
Polk Twp.	10	174-183		
Washington Twp.	14	184-197	197	14
Maryville	106	198-303	236,275	39,78
Camden Twp.	10	304-313		
Salem	84	314-397	314,353	1,40
Total	397			

1. The department appraiser shall locate the property to be appraised by finding the relationship between the sequence numbers and the code numbers and identify the property.

EXAMPLE: The first sequence number is 2. Since the improved commercial properties in Franklin Township have been assigned code numbers 1 to 4, sequence number 2 is in that location.

To identify this property, examine the Franklin Township assessment roll book and stop at the second improved commercial entry.

The department appraiser shall document the parcel number, owner's name, and legal description of this property.

2. The department appraiser shall appraise the property selected unless it is ineligible because of any of the following restrictions:

- Vacant building
- Current-year sale
- Partial assessment
- Prior equalization appraisal

Tax-exempt

Only one portion of a total property unit (example—a parking lot of a grocery store)

Value established by court action

Value is not more than \$10,000

Building on leased land

3. The department appraiser shall determine a substitute property if the originally selected one is ineligible. In ascending order, select code numbers until an eligible property is found.

EXAMPLE: If code number 2 is ineligible, use code number 3 as a substitute. If code number 3 is ineligible, use code number 4, etc., until an eligible property is found.

If the procedure described in 71.12(4) “c”(3)“3” moves the substitute property to a city or township, select substitute code numbers in descending order until an eligible property is found.

If the procedure described in the previous paragraph moves the substitute property to a preceding city or township, go back to the procedure of 71.12(4) “c”(3)“3” even if it moves the substitute property to a subsequent city or township.

4. Select an alternate property for the originally selected property which also would be eligible. This is necessary because at the time of appraisal the property may be found to be ineligible due to one of the restrictions in 71.12(4) “c”(3)“2.” Alternate properties are selected by using the same procedure described in 71.12(4) “c”(3)“3.”

5. Follow procedures 71.12(4) “c”(3), items “1” to “4,” for each of the other originally selected sequence numbers.

71.12(5) Industrial real estate. It is not possible to determine the level of assessment of industrial real estate by using accepted equalization methods. The lack of sales data precludes the use of an assessment/sales ratio study, the diverse nature of industrial real estate precludes the use of a countywide or citywide income capitalization study, and the limited number of industrial properties precludes the use of sample appraisals. The level of assessment of industrial real estate can only be determined by the valuation of individual parcels of industrial real estate. Any attempt to equalize industrial valuations by using accepted equalization methods would create an arbitrary result. However, under the circumstances set forth in Iowa Code subsection 421.17(10), the director may correct any errors in such assessments which are brought to the director’s attention, including errors related to property with a dual classification if the primary use of the property is from the industrial portions.

71.12(6) Centrally assessed property. Property assessed by the director of revenue pursuant to Iowa Code chapters 428 and 433 to 438, inclusive, is equalized internally by the director in the making of the assessments. Further, the assessments are equalized with the aggregate valuations of other classes of property as a result of actions taken by the director of revenue pursuant to rule 701—71.11(441).

71.12(7) Miscellaneous real estate. Since it is not possible to use accepted equalization methods to determine the level of assessment of mineral rights and interstate railroad and toll bridges, these classes of property shall not be subject to equalization by the director of revenue. However, under the circumstances set forth in Iowa Code section 421.17(10), the director may correct any errors in assessments which are brought to the director’s attention.

This rule is intended to implement Iowa Code sections 441.21, 441.47, 441.48 and 441.49.

[ARC 7726B, IAB 4/22/09, effective 5/27/09; ARC 9478B, IAB 4/20/11, effective 5/25/11; ARC 1765C, IAB 12/10/14, effective 1/14/15]

701—71.13(441) Tentative equalization notices. Prior to the issuance of the final equalization order to each county auditor, a tentative equalization notice providing for proposed percentage adjustments to the aggregate valuations of classes of property as set forth in rule 701—71.12(441) shall be mailed to the county auditor whose valuations are proposed to be adjusted. The tentative equalization notice constitutes the ten days’ notice required by Iowa Code section 441.48.

This rule is intended to implement Iowa Code sections 441.47 and 441.48.

701—71.14(441) Hearings before the director.

71.14(1) Protests. Written or oral protest against the proposed percentage adjustments as set forth in the tentative equalization notice issued by the director of revenue shall be made only on behalf of the

affected assessing jurisdiction. The protests shall be made only by officials of the assessing jurisdiction, including, but not limited to, an assessing jurisdiction's city council or board of supervisors, assessor, or city or county attorney. An assessing jurisdiction may submit a written protest in lieu of making an oral presentation before the director, or may submit an oral protest supported by written documentation. Protests against the adjustments in valuation contained in the tentative equalization notices shall be limited to a statement of the error or errors complained of and shall include such facts as might lead to their correction. No other factors shall be considered by the director in reviewing the protests. Protests and hearings on tentative equalization notices before the director are excluded from the provisions of the Iowa Administrative Procedure Act governing contested case proceedings.

71.14(2) *Conduct of hearing.* The director shall schedule each hearing so as to allow the same amount of time within which each assessing jurisdiction can make its presentation. During the hearing each assessing jurisdiction shall be afforded the opportunity to present evidence relevant to its protest. The director or the director's designated representative shall preside at the hearing which shall be held at the time and place designated by the director or such other time and place as may be mutually agreed upon by the director and the protesting assessing jurisdiction.

This rule is intended to implement Iowa Code section 441.48.

701—71.15(441) Final equalization order. After the tentative equalization notice has been issued and an opportunity for a hearing described in rule 701—71.14(441) has been afforded, the director shall issue a final equalization order by mail to the county auditor. The order shall specify any percentage adjustments in the aggregate valuations of any class of property to be made effective for the county as of January 1 of the year in which the order is issued. The final equalization order shall be issued on or before October 1 unless for good cause it cannot be issued until after October 1. The final equalization order shall be implemented by the county auditor.

An assessing jurisdiction may appeal a final equalization order to the state board of tax review. The protest must be filed or postmarked not later than ten days after the date the final equalization order is issued.

This rule is intended to implement Iowa Code sections 441.48 and 441.49.

701—71.16(441) Alternative method of implementing equalization orders.

71.16(1) *Application for permission to use an alternative method.* A request by an assessing jurisdiction for permission to use an alternative method of applying the final equalization order must be made in writing to the director of revenue within ten days from the date the county auditor receives the final equalization order. The written request shall include the following information:

a. Facts evidencing the need to use an alternative method of implementing the final equalization order. Such facts shall clearly show that the proposed method is essential to ensure compliance with the provisions of Iowa Code section 441.21.

b. The exact methods to be employed in implementing the requested alternative method for each class of property.

c. The specific method of notifying affected property owners of the valuation changes.

d. Evidence that the alternative method will result in an aggregate property class valuation adjustment equivalent to that prescribed in the director's final equalization order.

The director of revenue shall review each written request for an alternative method and shall notify the assessing jurisdiction of acceptance or rejection of the proposed method by October 15. The assessing jurisdiction shall immediately inform the county auditor of the director's decision. The county auditor shall include a description of any approved alternative method in the required newspaper publication of the final equalization order. In those instances where the approved alternative method includes individual property owner notification, the publication shall not be considered proper notice to the affected property owners.

71.16(2) *Implementation of alternative method.* If an alternative method is approved by the director of revenue, any individual notification of property owners shall be completed by the assessor by not later than October 25.

71.16(3) Appeal by property owners. If an alternative method is approved by the director of revenue, the special session of the local board of review to hear equalization protests shall be extended to November 30. In such instances, protests may be filed up to and including November 4.

This rule is intended to implement Iowa Code section 441.49.

701—71.17(441) Special session of boards of review.

71.17(1) Grounds for protest. The only ground for protesting to the local board of review reconvened in special session pursuant to Iowa Code section 441.49 is that the application of the director's final equalization order results in a value greater than that permitted under Iowa Code section 441.21.

71.17(2) Authority of board of review. When in special session to hear protests resulting from equalization adjustments, the local board of review shall only act upon protests for those properties for which valuations have been increased as a result of the application of the director of revenue's final equalization order.

The local board of review may adjust valuations of those properties it deems warranted, but under no circumstance shall the adjustment result in a value less than that which existed prior to the application of the director's equalization order. The local board of review shall not adjust the valuation of properties for which no protests have been filed.

71.17(3) Report of board of review. In the report to the director of revenue of action taken by the local board of review in special session, the board of review shall report the aggregate valuation adjustments by class of property as well as all other information required by the director of revenue to determine if such actions may have substantially altered the equalization order.

71.17(4) Meetings of board of review. If the final equalization order does not increase the valuation of any class of property, the board of review is not required to meet during the special session. If the final equalization order increases the valuation of one or more classes of property but no protests are filed by the times specified in Iowa Code section 441.49, the board of review is not required to meet during the special session.

This rule is intended to implement Iowa Code sections 421.17(10) and 441.49.

701—71.18(441) Judgment of assessors and local boards of review. Nothing stated in these rules should be construed as prohibiting the exercise of honest judgment, as provided by law, by the assessors and local boards of review in matters pertaining to valuing and assessing of individual properties within their respective jurisdictions.

This rule is intended to implement Iowa Code sections 441.17 and 441.35.

701—71.19(441) Conference boards.

71.19(1) Establishment and abolition of office.

a. As referred to in Iowa Code section 441.1, the term "federal census" includes any special census conducted by the Bureau of the Census of the U.S. Department of Commerce as well as the Bureau's decennial census.

b. Within 60 days of receiving the certified results of a federal census indicating the population of a city having its own assessor has fallen below 10,000, the city council of the city shall repeal the ordinance providing for its own assessor.

c. Whenever the office of city assessor is abolished, all moneys in the assessment expense fund and the special appraiser fund shall be transferred to the appropriate accounts in the county assessor's office, and all equipment and supplies shall be transferred to the county assessor's office. Employees of the city assessor's office may, at the discretion of the county assessor, become employees of the county assessor. However, any deputy assessor of the city may not be appointed a deputy county assessor unless certified as eligible for appointment pursuant to Iowa Code sections 441.5 and 441.10.

71.19(2) Membership.

a. *County conference boards.* A county conference board consists of the county board of supervisors, the mayor of each incorporated city in the county whose property is assessed by the county assessor, and one member of the board of directors of each high school district in the county, provided

the member is a resident of the county. Members representing school districts serve one-year terms, and the board of directors each year must notify the clerk of the conference board of its representative on the conference board. A member of the board of directors of a school district may serve on the county conference board even though the member lives in a city having its own assessor (1978 O.A.G. 466).

b. City conference boards. A city conference board consists of the county board of supervisors, the city council, and the entire board of directors of each school district whose property is assessed by the city assessor.

71.19(3) Voting.

a. Votes on matters before a conference board shall be by units as provided in Iowa Code section 441.2. At least two members of each voting unit must be present in order for the unit to cast a vote (1960 O.A.G. 226). In the event the vote of the members of a voting unit ends in a tie, that unit shall not cast a vote on the particular matter before the conference board.

b. If a member of a conference board is absent from a meeting, the member's vote may not be cast by another person, except that a mayor pro tem as provided in Iowa Code section 372.14(3) may vote for the mayor when the mayor is absent from or unable to perform official duties.

This rule is intended to implement Iowa Code section 441.2.

701—71.20(441) Board of review.

71.20(1) Membership.

a. Occupation of members. One member of the county board of review must be actively engaged in farming as that member's primary occupation. However, it is not necessary for a board of review to have as a member one licensed real estate broker and one registered architect or person experienced in the building and construction field if the person cannot be located after a good faith effort to do so has been made by the conference board (1966 O.A.G. 416). In determining eligibility for membership on a board of review, a retired person is not considered to be employed in the occupation pursued prior to retirement, unless that person remains in reasonable contact with the former occupation, including some participation in matters associated with that occupation.

b. Residency of members. A person must be a resident of the assessor jurisdiction served to qualify for appointment as a member of the board of review. However, a member changing assessing jurisdiction residency after appointment to the board may continue to serve on the board until the member's current term of office expires.

c. Term of office. The term of office of members of boards of review shall be for six years and shall be staggered as provided in Iowa Code section 441.31. In the event of the death, resignation, or removal from office of a member of a board of review, the conference board or city council shall appoint a successor to serve the unexpired term of the previous incumbent.

d. Membership on other boards. A member of a board of review shall not at the same time serve on either the conference board or the examining board, or be an employee of the assessor's office (1948 O.A.G. 120, 1960 O.A.G. 226).

e. Number of members. A conference board or city council may at any time change the composition of a board of review to either three or five members. To reduce membership from five members to three members, the conference board or city council shall not appoint successors to fill the next two vacancies which occur (1970 O.A.G. 342). To increase membership from three members to five members, the conference board or city council shall appoint two additional members whose initial terms shall expire at such times so that no two board members' terms expire at the end of the same year. Also, the conference board or city council may increase the membership of the board of review by an additional two members if it determines that a large number of protests warrant the emergency appointments. If the board of review has ten members, not more than four additional members may be appointed by the conference board. The terms of the emergency members will not exceed two years.

f. Removal from office. A member of a board of review may be removed from office by the conference board or city council but only after specific charges have been filed by the conference board or city council.

g. Appointment of members. Members of a county board of review shall be appointed by the county conference board. Members of a city board of review shall be appointed by the city conference board in cities with an assessor or by the city council in cities without an assessor. A city without an assessor can only have a board of review if the population of the city is 75,000 or more. A city with a population of more than 125,000 may appoint a city board of review or request the county conference board to appoint a ten-member county board of review.

71.20(2) Sessions of boards of review.

a. It is mandatory that a board of review convene on May 1 and adjourn no later than May 31 of each year. However, if either date falls on a Saturday, Sunday, or legal holiday, the board of review shall convene or adjourn on the following Monday.

b. Extended session. If a board of review determines it will be unable to complete its work by May 31, it may request that the director of revenue extend its session up to July 15. The request must be signed by a majority of the membership of the board of review and must contain the reasons the board of review cannot complete its work by May 31. During the extended session, a board of review may perform the same functions as during its regular session unless specifically limited by the director of revenue.

c. Special session. If a board of review is reconvened by the director of revenue pursuant to Iowa Code section 421.17, the board of review shall perform those functions specified in the order of the director of revenue and shall perform no other functions.

71.20(3) Actions initiated by boards of review.

a. Internal equalization of assessments. A board of review in reassessment years as provided in Iowa Code section 428.4 has the power to equalize individual assessments as established by the assessor, but cannot make percentage adjustments in the aggregate valuations of classes of property (1966 O.A.G. 416). In nonreassessment years, a board of review can adjust the valuation of an entire class of property by adjusting all assessment by a uniform percentage. Nothing contained in this rule shall restrict the director from exercising the responsibilities set forth in Iowa Code section 421.17.

b. Omitted assessments. A board of review may assess for taxation any property which was not assessed by the assessor, including property which the assessor determines erroneously is not subject to taxation by virtue of enjoying an exempt status (*Talley v. Brown*, 146 Iowa 360, 125 N.W. 248 (1910)).

c. Notice to taxpayers. If the value of any property is increased by a board of review or a board of review assesses property not previously assessed by the assessor, the person to whom the property is assessed shall be notified by regular mail of the board's action. The notification shall state that the taxpayer may protest the action by filing a written protest with the board of review within five days of the date of the notice. After at least five days have passed since notifying the taxpayer, the board of review shall meet to take final action on the matter, including the consideration of any protest filed. However, if the valuations of all properties within a class of property are raised or lowered by a uniform percentage in a nonreassessment year, notice to taxpayers need be provided only by newspaper publication as described in Iowa Code section 441.35.

71.20(4) Appeals to boards of review.

a. A board of review may act only upon written protests which have been filed with the board of review between April 16 and May 5, inclusive. In the event May 5 falls on a Saturday or Sunday, protests filed the following Monday shall be considered to have been timely filed. Protests postmarked by May 5 or the following Monday if May 5 falls on a Saturday or Sunday shall also be considered to have been timely filed. All protests must be in writing and signed by the taxpayer or the taxpayer's authorized agent. A written request for an oral hearing must be made at the time of filing the protest and may be made by checking the appropriate box on the form prescribed by the department of revenue. Protests may be filed for previous years if the taxpayer discovers that a mathematical or clerical error was made in the assessment, provided the taxes have not been fully paid or otherwise legally discharged. The protester may combine on one form assessment protests on parcels separately assessed if the same grounds are relied upon as the basis for protesting each separate assessment. If an oral hearing is requested on more than one of the protests, the person making the combined protests may request that the oral hearings

be held consecutively. A board of review may allow protests to be filed in electronic format. Protests transmitted electronically are subject to the same deadlines as written protests.

b. Grounds for protest. Taxpayers may protest to a board of review on one or more of the grounds specified in Iowa Code section 441.37. The grounds for protest and procedures for considering protests are as follows:

(1) The assessment is not equitable when compared with those of similar properties in the same assessing district. If this ground is a basis for the protest, the protest must contain the legal descriptions and assessments of the comparable properties. The comparable properties selected by the taxpayer must be located within the same assessing district as the property for which the protest has been filed (*Maytag Co. v. Partridge*, 210 N.W.2d 584 (Iowa 1973)). In considering a protest based upon this ground, the board of review should examine carefully all information used to determine the assessment of the subject property and the comparable properties and determine that those properties are indeed comparable to the subject property. It is the responsibility of the taxpayer to establish that the other properties submitted are comparable to the subject property and that inequalities exist in the assessments (*Chicago & N. W. Ry. Co. v. Iowa State Tax Commission*, 257 Iowa 1359, 137 N.W.2d 246(1965)).

(2) The property is assessed at more than its actual value as defined in Iowa Code section 441.21. If this ground is used, the taxpayer must state both the amount by which the property is overassessed and the amount considered to be the actual value of the property.

(3) The property is not assessable and should be exempt from taxation. If using this ground, taxpayers must state the reasons why it is felt the property is not assessable.

(4) There is an error in the assessment. An error in the assessment would most probably involve erroneous mathematical computations or errors in listing the property. The improper classification of property also constitutes an error in the assessment. If this ground is used, the taxpayer's protest must state the specific error alleged.

A board of review must determine:

1. If an error exists, and
2. How the error might be corrected.

(5) There is fraud in the assessment. If this ground of protest is used, the taxpayer's protest must state the specific fraud alleged, and the board of review must first determine if there is validity to the taxpayer's allegation. If it is determined there is fraud in the assessment, the board of review shall take action to correct the assessment and report the matter to the director of revenue.

(6) There has been a change of value of real estate since the last assessment. The board of review must determine that the value of the property as of January 1 of the current year has changed since January 1 of the previous reassessment year. This is the only ground upon which a protest pertaining to the valuation of a property can be filed in a year in which the assessor has not assessed or reassessed the property pursuant to Iowa Code section 428.4. In a year subsequent to a year in which a property has been assessed or reassessed pursuant to Iowa Code section 428.4, a taxpayer cannot protest to the board of review based upon actions taken in the year in which the property was assessed or reassessed (*James Black Dry Goods Co. v. Board of Review for City of Waterloo*, 260 Iowa 1269, 151 N.W.2d 534 (1967); *Commercial Merchants Nat'l Bank and Trust Co. v. Board of Review of Sioux City*, 229 Iowa 1081, 296 N.W. 203 (1941)).

c. Disposition of protests. After reaching a decision on a protest, the board of review shall give the taxpayer written notice of its decision. The notice shall contain the following information:

- (1) The valuation and classification of the property as determined by the board of review.
- (2) If the protest was based on the ground the property was not assessable, the notice shall state whether the exemption is allowed and the value at which the property would be assessed in the absence of the exemption.
- (3) The specific reasons for the board's decision with respect to the protest.

(4) That the board of review's decision may be appealed to the district court within 20 days of the board's adjournment or May 31, whichever date is later. If the adjournment date is known, the date shall be stated on the notice. If the adjournment date is not known, the notice shall state the date will be no

earlier than May 31. Notice of the appeal shall be served on the chairperson, presiding officer, or clerk of the board of review after the written notice of appeal has been filed with the clerk of district court.

This rule is intended to implement Iowa Code sections 441.31 to 441.37 and Iowa Code Supplement section 441.38 as amended by 2006 Iowa Acts, House File 2794.

701—71.21(421,17A) Property assessment appeal board. This rule applies to appeals filed before January 1, 2015, in which the property assessment appeal board has jurisdiction to hear appeals from the action of a local board of review. Appeals filed on or after January 1, 2015, are governed by 701—Chapter 126.

71.21(1) Establishment, membership, and location of the property assessment appeal board.

a. A statewide property assessment appeal board is created for the purpose of establishing a consistent, fair, and equitable property assessment appeal process. The statewide property assessment appeal board is established within the department of revenue. The board's principal office shall be in the office of the department of revenue.

b. The property assessment appeal board shall consist of three members appointed by the governor and subject to confirmation by the senate. The members shall be appointed to staggered six-year terms beginning initially on January 1, 2007, and ending as provided in Iowa Code section 69.19. Members' subsequent terms shall begin and end as provided in Iowa Code section 69.19. The governor shall appoint from the members a chairperson, subject to confirmation by the senate, of the board to a two-year term. Vacancies on the board shall be filled for the unexpired portion of the term in the same manner as regular appointments are made.

Each member of the property assessment appeal board shall be qualified by virtue of at least two years' experience in the area of government, corporate, or private practice relating to property appraisal and property tax administration. Two members of the board shall be certified real property appraisers and one member shall be an attorney practicing in the area of state and local taxation or property tax appraisals. No more than two members of the board may be from the same political party as that term is defined in Iowa Code section 43.2.

c. The property assessment appeal board shall organize by appointing a secretary who shall take the same oath of office as the members of the board. The board may employ additional personnel as it finds necessary. All personnel employed by the board shall be considered state employees and are subject to the merit system provisions of Iowa Code chapter 8A, subchapter IV.

71.21(2) Powers and duties of the board. The property assessment appeal board shall:

a. Review any final decision, finding, ruling, determination, or order of a local board of review relating to assessment protests, valuation, or application of an equalization order.

b. Affirm, reverse, or modify a final decision, finding, ruling, determination, or order of a local board of review.

c. Order the payment or refund of property taxes in a matter over which the board has jurisdiction.

d. Grant other relief or issue writs, orders, or directives that the board deems necessary or appropriate in the process of disposing of a matter over which the board has jurisdiction.

e. Subpoena documents and witnesses and administer oaths.

f. Adopt administrative rules pursuant to Iowa Code chapter 17A for the administration and implementation of its powers, including rules for practice and procedure for protests filed with the board, the manner in which hearings on appeals of assessments shall be conducted, filing fees to be imposed by the board, and for the determination of the correct assessment of property which is the subject of an appeal.

g. Adopt administrative rules pursuant to Iowa Code chapter 17A necessary for the preservation of order and the regulation of proceedings before the board, including forms or notice and the service thereof, which rules shall conform as nearly as possible to those in use in the courts of this state.

h. If an appeal to district court is taken from the action of the property assessment appeal board, notice of appeal shall be served as an original notice on the secretary of the board after the written notice of appeal has been filed with the clerk of district court.

71.21(3) General counsel. The property assessment appeal board shall employ a competent attorney to serve as its general counsel, and assistants to the general counsel as it finds necessary for the full and efficient discharge of its duties. The general counsel is the attorney for, and legal advisor of, the board. The general counsel or an assistant to the general counsel shall provide the necessary legal advice to the board in all matters and shall represent the board in all actions instituted in a court challenging the validity of a rule or order of the board. The general counsel shall devote full time to the duties of the office. During employment as general counsel to the board, the counsel shall not be a member of a political committee, contribute to a political campaign, participate in a political campaign, or be a candidate for partisan political office. The general counsel and assistants to the general counsel shall be considered state employees and are subject to the merit system provisions of Iowa Code chapter 8A, subchapter IV.

71.21(4) Compensation. The members of the property assessment appeal board shall receive a salary set by the governor within a range established by the general assembly. The members of the board shall be considered state employees for purposes of salary and benefits and are subject to the merit system provisions of Iowa Code chapter 8A, subchapter IV. Members of the board and any employees of the board, when required to travel in the discharge of official duties, shall be paid their actual and necessary expenses incurred in the performance of their duties.

71.21(5) Applicability and scope. These subrules set forth herein govern the proceedings for all cases in which the property assessment appeal board (board) has jurisdiction to hear appeals from the action of a local board of review. For the purpose of these subrules, the following definitions shall apply:

“*Appellant*” means the party filing the notice of appeal with the secretary of the property assessment appeal board.

“*Board*” means the property assessment appeal board as created by Iowa Code section 421.1A and governed by Iowa Code chapter 17A and section 441.37A.

“*Department*” means the Iowa department of revenue.

“*Local board of review*” means the board of review as defined by Iowa Code section 441.31.

“*Party*” means each person or entity named or admitted as a party or properly seeking and entitled as of right to be admitted as a party.

“*Presiding officer*” means the chairperson, member or members of the property assessment appeal board who preside over an appeal of proceedings before the property assessment appeal board.

“*Secretary*” means the secretary for the property assessment appeal board.

71.21(6) Appeal and jurisdiction. Notice of appeal confers jurisdiction for the board. The procedure for appeals and parameters for jurisdiction are as follows:

a. Jurisdiction is conferred upon the board by written notice of appeal given to the secretary. The written notice of appeal shall include a petition setting forth the basis of the appeal and the relief sought. The written notice of appeal shall be filed with the secretary within 20 calendar days after the date of adjournment of the local board of review or May 31, whichever is later. Appeals postmarked within this time period shall also be considered to have been timely filed. The appellant may appeal the action of the board of review relating to protests of assessment, valuation, or the application of an equalization order. No new grounds in addition to those set out in the protest to the local board of review can be pleaded, but additional evidence to sustain those grounds may be introduced. The appeal is a contested case.

b. Notice of appeal may be delivered in person, mailed by first-class mail, delivered to an established courier service for immediate delivery, or e-mailed to the board at paab@iowa.gov.

c. For an appeal filed by e-mail to be timely, it must be received by the board by 11:59 p.m. on the last day for filing as established within the time period set forth in paragraph 71.21(6) “*a.*”

71.21(7) Form of appeal. The notice of appeal shall include:

- a.* The appellant’s name, mailing address, e-mail address, and telephone number;
- b.* The address of the property being appealed and its parcel number;
- c.* A copy of the letter of disposition by the local board of review;
- d.* A short and plain statement of the claim showing that the appellant is entitled to relief;
- e.* The relief sought; and
- f.* If the party is represented by an attorney or designated representative, the attorney or designated representative’s name, mailing address, e-mail address, and telephone number.

71.21(8) Scope of review. The board shall determine anew all questions arising before the local board of review which relate to the liability of the property to assessment or the amount thereof. There shall be no presumption as to the correctness of the valuation of the assessment appealed from. The burden of proof is on the appellant; however, when the appellant offers competent evidence by at least two disinterested witnesses that the market value of the property is less than the market value determined by the assessor, the burden of proof thereafter shall be upon the party seeking to uphold the valuation.

71.21(9) Notice to local board of review. The secretary shall mail a copy of the appellant's written notice of appeal and petition to the local board of review whose decision is being appealed. Notice to all affected taxing districts shall be deemed to have been given when written notice is provided to the local board of review.

71.21(10) Certification by local board of review.

a. Initial certification. Within 21 days after notice of appeal is given, the local board of review shall certify to the board the original notice of assessment if any, the petition to the board of review, and a copy of the board of review's letter of disposition.

The local board of review shall also submit to the board in writing the name, address, telephone number, and e-mail address of the attorney representing the local board of review before the board. The local board of review may request additional time to certify a copy of its record to the board by submitting a request in writing or by e-mail to the board at paab@iowa.gov.

b. Full record certification prior to hearing. At least 21 calendar days prior to the contested case hearing, the local board of review shall certify to the board the complete property record card for the subject property, the protest hearing minutes of the local board of review kept pursuant to Iowa Code chapter 21, and any information provided to or considered by the local board of review as part of the protest. The local board of review shall also send a copy of the full record to the opposing party.

71.21(11) Docketing. Appeals shall be assigned consecutive docket numbers. Records consisting of the case name and the corresponding docket number assigned to the case shall be maintained by the secretary. The records of each case shall also include each action and each act done, with the proper dates as follows:

- a.* The title of the appeal including jurisdiction and parcel identification number;
- b.* Brief statement of the grounds for the appeal and the relief sought;
- c.* Postmarked date of the local board of review's letter of disposition;
- d.* The manner and date/time of service of notice of appeal;
- e.* Date of notice of hearing;
- f.* Date of hearing; and
- g.* The decision by the board, or other disposition of the case, and date thereof.

71.21(12) Appearances. Any party may appear and be heard on its own behalf, or by its designated representative. A designated representative shall file a notice of appearance with the board for each case in which the representative appears for a party. Filing a motion or pleadings on behalf of a party shall be equivalent to filing a notice of appearance. A designated representative who is not an attorney shall also file a power of attorney. When acting as a designated representative on behalf of a party, the designated representative acknowledges that the representative has read and will abide by the board's rules.

71.21(13) Service and filing of papers. After the notice of appeal and petition have been filed, all motions, pleadings, briefs, and other papers shall be served upon each of the parties of record contemporaneously with their filing with the board.

a. Service on a party—how and when made. The parties may agree to exchange the certified record, motions, pleadings, briefs, exhibits, and any other papers with each other electronically or via any other means. All documents are deemed served at the time they are delivered in person to the opposing party; delivered to an established courier service for immediate delivery; mailed by first-class mail, so long as there is proof of mailing; or sent electronically if the parties have agreed to service by such means.

b. Filing with the board—when made. Except where otherwise provided by law, a document is deemed filed at the time it is delivered to the board; delivered to an established courier service for immediate delivery; mailed by first-class mail, so long as there is proof of mailing; or sent by e-mail as permitted by the applicable subrules of this rule.

- (1) For most filings in a docket made with the board, only an original is required.
- (2) For exhibits and other documents to be introduced at hearing, three copies are required. For a nonoral submission, only one copy is required.
- (3) The board or presiding officer may request additional copies.

c. Proof of mailing. Proof of mailing includes: a legible United States Postal Service postmark on the envelope, a certificate of service, a notarized affidavit, or a certification in substantially the following form:

I certify under penalty of perjury and pursuant to the laws of Iowa that, on (date of mailing), I mailed copies of (describe document) addressed to the Property Assessment Appeal Board and to the names and addresses of the parties listed below by depositing the same in a (United States post office mailbox with correct postage properly affixed).

(Date)

(Signature)

71.21(14) Motions. No technical form for motions is required. All prehearing motions shall be in writing, shall be filed with the secretary and shall contain the reasons and grounds supporting the motion. The board shall act upon such motions as justice may require. Motions based on matters which do not appear of record shall be supported by affidavit. Any party may file a written response to a motion no later than 10 days from the date the motion is filed, unless the time period is extended or shortened by the board or presiding officer. The presiding officer may schedule oral argument on any motion.

a. Motions pertaining to the hearing, except motions for summary judgment, must be filed and served at least 10 days prior to the date of hearing unless there is good cause for permitting later action or the time for such action is lengthened or shortened by the board or presiding officer.

b. Motions for summary judgment. Motions for summary judgment shall comply with the requirements of Iowa Rule of Civil Procedure 1.981 and shall be subject to disposition according to the requirements of that rule to the extent such requirements are not inconsistent with the provisions of this rule or any other provision of law governing the procedure in contested cases.

Motions for summary judgment must be filed and served no later than 90 days after service of the notice of appeal, unless good cause is shown for a later filing. Good cause may include, but is not limited to, information the moving party obtains through discovery. Any party resisting the motion shall file and serve a resistance within 20 days, unless otherwise ordered by the board or presiding officer, from the date a copy of the motion was served. The time fixed for hearing or nonoral submission shall be not less than 30 days after the filing of the motion, unless a shorter time is ordered by the presiding officer. A summary judgment order rendered on all issues in a contested case is subject to rehearing pursuant to subrule 71.21(34).

71.21(15) Authority of board to issue procedural orders. The board may issue preliminary orders regarding procedural matters. The secretary shall mail copies of all procedural orders to the parties.

71.21(16) Members participating. Each appeal may be considered by one or more members of the board, and the chairperson of the board may assign members to consider appeals. If the appeal is considered by less than the full membership of the board, the determination made by such members shall be forwarded to the full board for approval, rejection, or modification. Decisions shall affirm, modify, or reverse the decision, order, or directive from which an appeal was made. In order for the decision to be valid, a majority of the board must concur on the decision on appeal.

71.21(17) Notice of hearing. Unless otherwise designated by the board, the hearing shall be held in the hearing room of the board. All hearings are open to the public. If a hearing is requested, the secretary shall mail a notice of hearing to the parties at least 30 days prior to the hearing. The parties may jointly waive the 30-day notice by following the provisions of subrule 71.21(18). The notice of hearing shall contain the following information:

- a.* A statement of the date, time, and place of the hearing;
- b.* A statement of legal authority and jurisdiction under which the hearing is to be held;
- c.* A reference to the particular sections of the statutes and rules involved;
- d.* That the parties may appear and present oral arguments;

- e.* That the parties may submit evidence and briefs;
- f.* That the hearing will be electronically recorded by the board;
- g.* That a party may obtain a certified court reporter for the hearing at the party's own expense;
- h.* That audio visual aids and equipment are to be provided by the party intending to use them;
- i.* A statement that, upon submission of the appeal, the board will take the matter under advisement. A letter of disposition will be mailed to the parties; and
- j.* A compliance notice required by the Americans with Disabilities Act (ADA).

71.21(18) *Waiver of 30-day notice.* The parties to the appeal may jointly waive the 30-day written notice requirement for a hearing. The waiver must be in writing or by e-mail to paab@iowa.gov and signed by the parties or their designated representatives. By waiving notice, the parties acknowledge they are ready to proceed with the hearing. The parties will be contacted when a hearing date is available but notice for said date may be less than 30 days. The parties will have the right to accept or reject the hearing date.

71.21(19) *Transcript of hearing.* All hearings shall be electronically recorded. Any party may provide a certified court reporter at the party's own expense. Any party may request a transcription of the hearing. The board reserves the right to impose a charge for copies and transcripts.

71.21(20) *Continuance.* Any hearing may be continued for "good cause." Requests for continuance prior to the hearing shall be in writing or by e-mail to paab@iowa.gov and promptly filed with the secretary of the board immediately upon "the cause" becoming known. An emergency oral continuance may be obtained from the board or presiding officer based on "good cause" and at the discretion of the board or presiding officer. In determining whether to grant a continuance, the board or presiding officer may consider:

- a.* Prior continuances;
- b.* The interests of all parties;
- c.* The likelihood of informal settlement;
- d.* The existence of an emergency;
- e.* Any objection;
- f.* Any applicable time requirements;
- g.* The existence of a conflict in the schedules of counsel, parties, or witnesses;
- h.* The timeliness of the request; and
- i.* Other relevant factors, including the existence of a scheduling order.

71.21(21) *Telephone proceedings.* The board or presiding officer may conduct a telephone conference in which all parties have an opportunity to participate to resolve preliminary procedural motions. Other proceedings, including contested case hearings, may be held by telephone. The board will determine the location of the parties and witnesses for telephone hearings. The convenience of the witnesses or parties, as well as the nature of the case, will be considered when the location is chosen.

71.21(22) *Disqualification of board member.* A board member or members must, on their own motion or on a motion from a party in the proceeding, withdraw from participating in an appeal if there are circumstances that warrant disqualification.

a. A board member or members shall withdraw from participation in the making of any proposed or final decision in an appeal before the board if that member is involved in one of the following circumstances:

- (1) Has a personal bias or prejudice concerning a party or a representative of a party;
- (2) Has personally investigated, prosecuted, or advocated in connection with the appeal, the specific controversy underlying that appeal, or another pending factually related matter, or a pending factually related controversy that may culminate in an appeal involving the same parties;
- (3) Is subject to the authority, direction, or discretion of any person who has personally investigated, prosecuted, or advocated in connection with that matter, the specific controversy underlying the appeal, or a pending factually related matter or controversy involving the same parties;
- (4) Has acted as counsel to any person who is a private party to that proceeding within the past two years;

- (5) Has a personal financial interest in the outcome of the appeal or any other significant personal interest that could be substantially affected by the outcome of the appeal;
 - (6) Has a spouse or relative within the third degree of relationship who:
 1. Is a party to the appeal, or an officer, director or trustee of a party;
 2. Is a lawyer in the appeal;
 3. Is known to have an interest that could be substantially affected by the outcome of the appeal;
- or
4. Is likely to be a material witness in the appeal; or
 - (7) Has any other legally sufficient cause to withdraw from participation in the decision making in that appeal.

b. Motion for disqualification. If a party asserts disqualification on any appropriate ground, including those listed in paragraph “*a*,” the party shall file a motion supported by an affidavit pursuant to Iowa Code section 17A.11. The motion must be filed as soon as practicable after the reason alleged in the motion becomes known to the party. If, during the course of the hearing, a party first becomes aware of evidence of bias or other grounds for disqualification, the party may move for disqualification, but must establish the grounds by the introduction of evidence into the record.

If a majority of the board determines that disqualification is appropriate, the board member shall withdraw. If a majority of the board determines that withdrawal is not required, the board shall enter an order to that effect. A party asserting disqualification may seek an interlocutory appeal and a stay as provided under 701—Chapter 7.

c. The term “personally investigated” means taking affirmative steps to interview witnesses directly or to obtain documents or other information directly. The term “personally investigated” does not include general direction and supervision of assigned investigators, unsolicited receipt of information which is relayed to assigned investigators, review of another person’s investigative work product in the course of determining whether there is probable cause to initiate a proceeding, or exposure to factual information while performing other functions of the board, including fact gathering for purposes other than investigation of the matter which culminates in an appeal. Factual information relevant to the merits of an appeal received by a person who later serves as presiding officer or a member of the board shall be disclosed if required by Iowa Code section 17A.11 and this rule.

d. Withdrawal. In a situation where a presiding officer or any other board member knows of information which might reasonably be deemed to be a basis for disqualification and decides voluntary withdrawal is unnecessary, that person shall submit the relevant information for the record by affidavit and shall provide for the record a statement of the reasons for the determination that withdrawal is unnecessary.

71.21(23) Consolidation and severance. The board or presiding officer may determine if consolidation or severance of issues or proceedings should be performed in order to efficiently resolve matters on appeal before the board.

a. Consolidation. The presiding officer may consolidate any or all matters at issue in two or more appeal proceedings where:

- (1) The matters at issue involve common parties or common questions of fact or law;
- (2) Consolidation would expedite and simplify consideration of the issues involved; and
- (3) Consolidation would not adversely affect the rights of any of the parties to those proceedings.

b. Severance. The presiding officer may, for good cause shown, order any appeal proceedings or portions of the proceedings severed.

71.21(24) Withdrawal. An appellant may withdraw the appeal prior to the hearing. Such a withdrawal of an appeal must be in writing or by e-mail to paab@iowa.gov and signed by the appellant or the appellant’s designated representative. Unless otherwise provided, withdrawal shall be with prejudice and the appellant shall not be able to refile the appeal. Within 20 days of the board granting a withdrawal of appeal, the appellant may make a motion to reopen the file and rescind the withdrawal based upon fraud, duress, undue influence, or mutual mistake.

71.21(25) Prehearing conference. An informal conference of parties may be ordered at the discretion of the board or presiding officer or at the request of any party for any appropriate purpose.

Any agreement reached at the conference shall be made a part of the record in the manner directed by the board or presiding officer.

71.21(26) Scheduling orders.

a. When required. For appeals involving properties classified commercial or industrial and assessed at \$2 million or more, a scheduling order shall be sent to the parties to set dates for discovery, designation of witnesses, filing of motions, exchange of evidence, and a contested case hearing. In any other appeal, the parties may jointly enter a scheduling order or the board may, on its own motion, issue a scheduling order. The dates established in a scheduling order under this subrule shall supersede any dates set forth in other subrules of this rule.

b. Prehearing conference. A party may request a prehearing conference to resolve scheduling issues.

c. Modification. The parties may jointly agree to modify a scheduling order. If one party seeks to modify a scheduling order, the party must show good cause for the modification.

d. Failure to comply. A party that fails to comply with a scheduling order shall be required to show good cause for failing to comply with the order and that the other party is not substantially prejudiced. Failing to comply with a scheduling order may result in sanctions including, but not limited to, the exclusion of evidence or dismissal of the appeal.

71.21(27) Hearing procedures. A party to the appeal may request a hearing, or the appeal may proceed without a hearing. The local board of review may be present and participate at such hearing. Hearings may be conducted by the board or by one or more of its members.

a. Authority of presiding officer. The presiding officer presides at the hearing and may rule on motions, require briefs, issue a decision, and issue such orders and rulings as will ensure the orderly conduct of the proceedings.

b. Representation. Parties to the appeal have the right to participate or to be represented in all hearings. Any party may be represented by an attorney or by a designated representative.

c. Participation in hearing. The parties to the appeal have the right to introduce evidence relevant to the grounds set out in the protest to the local board of review. Subject to terms and conditions prescribed by the presiding officer, parties have the right to introduce evidence on issues of material fact, cross-examine witnesses present at the hearing as necessary for a full and true disclosure of the facts, present evidence in rebuttal, and submit briefs and engage in oral argument.

d. Decorum. The presiding officer shall maintain the decorum of the hearing and may refuse to admit or may expel anyone whose conduct is disorderly.

e. Conduct of the hearing. The presiding officer shall conduct the hearing in the following manner:

(1) The presiding officer shall give an opening statement briefly describing the nature of the proceedings;

(2) The parties shall be given an opportunity to present opening statements;

(3) The parties shall present their cases in the sequence determined by the presiding officer;

(4) Each witness shall be sworn or affirmed by the presiding officer and shall be subject to examination and cross-examination. The presiding officer may limit questioning in a manner consistent with law; and

(5) When all parties and witnesses have been heard, parties may be given the opportunity to present final arguments.

71.21(28) Discovery.

a. Discovery procedure. Discovery procedures applicable in civil actions under the Iowa Rules of Civil Procedure are available to parties in cases before the board. Unless lengthened or shortened by these rules, the board or presiding officer, time periods for compliance with discovery shall be as provided in the Iowa Rules of Civil Procedure.

b. Discovery motions. Prior to filing any motion related to discovery, parties shall make a good-faith effort to resolve discovery disputes without the involvement of the board or presiding officer. Any motion related to discovery shall allege that the moving party has made a good-faith attempt to resolve the discovery issues involved with the opposing party. Opposing parties shall be given the opportunity to respond within 10 days of the filing of the motion unless the time is shortened by order

of the board or presiding officer. The board or presiding officer may rule on the basis of the written motion and any response or may have a hearing or other proceedings on the motion.

c. Admissibility of evidence. Evidence obtained in discovery may be used in the case proceeding if that evidence would otherwise be admissible in that proceeding.

71.21(29) Subpoenas.

a. Issuance of Subpoena for Witness.

(1) An agency subpoena shall be issued to a party on request. The request shall be in writing and include the name, address, and telephone number of the requesting party. In absence of good cause for permitting later action, a request for subpoena must be received at least 10 days before the scheduled hearing.

(2) Except to the extent otherwise provided by law, parties are responsible for service of their own subpoenas and payment of witness fees and mileage expenses.

b. Issuance of Subpoena for Production of Documents.

(1) An agency subpoena shall be issued to a party on request. The request shall be in writing and include the name, address, and telephone number of the requesting party. In absence of good cause for permitting later action, a request for subpoena must be received at least 20 days before the scheduled hearing.

(2) Except to the extent otherwise provided by law, parties are responsible for service of their own subpoenas.

c. Motion to quash or modify. Upon motion, the board or presiding officer may quash or modify a subpoena for any lawful reason in accordance with the Iowa Rules of Civil Procedure.

71.21(30) Evidence.

a. Admissibility. The presiding officer shall rule on admissibility of evidence and may take official notice of facts in accordance with all applicable requirements of law.

b. Stipulations. Stipulation of facts by the parties is encouraged. The presiding officer may make a decision based on stipulated facts.

c. Scope of admissible evidence. Evidence in the proceeding shall be confined to the issues contained in the notice from the board prior to the hearing, unless the parties waive their right to such notice or the presiding officer determines that good cause justifies expansion of the issues. Admissible evidence is that which, in the opinion of the board, is determined to be material, relevant, or necessary for the making of a just decision. Irrelevant, immaterial or unduly repetitious evidence may be excluded. A finding shall be based upon the kind of evidence on which reasonably prudent persons are accustomed to rely for the conduct of their serious affairs, and may be based upon such evidence even if it would be inadmissible in a jury trial. Hearsay evidence is admissible. The rules of privilege apply in all proceedings before the board.

d. Exhibits, exhibit and witness lists, and briefs. The party seeking admission of an exhibit must provide an opposing party with an opportunity to examine the exhibit prior to the ruling on its admissibility. Copies of documents to be used as evidence, exhibit lists, and a list of witnesses intended to be called at hearing shall be served on the opposing party at least 21 calendar days prior to the hearing, unless the time period is extended or shortened by the board or presiding officer or the parties have entered a scheduling order under subrule 71.21(26). All exhibits and briefs admitted into evidence shall be appropriately marked and be made part of the record. The appellant shall mark exhibits with consecutive numbers. The appellee shall mark exhibits with consecutive letters.

e. Objections. Any party may object to specific evidence or may request limits on the scope of examination or cross-examination. Such an objection shall be accompanied by a brief statement of the grounds upon which the objection is based. The objection, the ruling on the objection, and the reasons for the ruling shall be noted in the record. The presiding officer may rule on the objection at the time it is made or may reserve a ruling until the written decision.

f. Offers of proof. Whenever evidence is ruled inadmissible, the party offering that evidence may submit an offer of proof on the record. The party making the offer of proof for excluded oral testimony shall briefly summarize the testimony or, with permission of the presiding officer, present the testimony.

If the excluded evidence consists of a document or exhibit, it shall be marked as part of an offer of proof and inserted in the record.

71.21(31) Settlements. Parties to a case may propose to settle all or some of the issues in the case at any time prior to the issuance of a final decision. A settlement of an appeal shall be jointly signed by the parties, or their designated representatives, and filed in writing or by an electronic copy e-mailed to paab@iowa.gov. The board will not approve settlements unless the settlement is reasonable in light of the whole record, consistent with law, and in the public interest. Board adoption of a settlement constitutes the final decision of the board on issues addressed in the settlement.

71.21(32) Records access.

- a. *Location of record.* A request for access to a record should be directed to the custodian.
- b. *Office hours.* Open records shall be made available during all customary office hours, which are 8 a.m. to 4:30 p.m. Monday through Friday excluding holidays.
- c. *Request for access.* Requests for access to open records may be made in writing, in person, by e-mail, or by telephone. Requests shall identify the particular records sought by name or description in order to facilitate the location of the record. Mail, e-mail, and telephone requests shall include the name, address, and telephone number of the person requesting the information. A person shall not be required to give a reason for requesting an open record.
- d. *Response to requests.* Access to an open record shall be provided promptly upon request unless the size or nature of the request makes prompt access infeasible. If the size or nature of the request for access to an open record requires time for compliance, the custodian shall comply with the request as soon as feasible. Access to an open record may be delayed for one of the purposes authorized by Iowa Code section 22.8(4) or 22.10(4). The custodian shall promptly give notice to the requester of the reason for any delay in access to an open record and an estimate of the length of that delay and, upon request, shall promptly provide that notice to the requester in writing. The custodian of a record may deny access by members of the public to the record only on the grounds that such a denial is warranted under Iowa Code sections 22.8(4) and 22.10(4), or that it is a confidential record, or that its disclosure is prohibited by a court or board order. Access by members of the public to a confidential record is limited by law and, therefore, may generally be provided only in accordance with the applicable provisions of law.
- e. *Security of record.* No person may, without permission from the secretary, search or remove any record from board files. Examination and copying of board records shall be supervised by the secretary. Records shall be protected from damage and disorganization.
- f. *Copying.* A reasonable number of copies of an open record may be made in the board's office. If photocopy equipment is not available, the custodian shall permit examination of the record and shall arrange to have copies promptly made elsewhere.

g. *Fees.*

(1) When charged. The board may charge fees in connection with the examination or copying of records only if the fees are authorized by law. To the extent permitted by applicable provisions of law, the payment of fees may be waived when the imposition of fees is inequitable or when a waiver is in the public interest.

(2) Copying and postage costs. Price schedules for published materials and for photocopies of records supplied by the board are available from the custodian. Copies of records may be made by or for members of the public on board photocopy machines or from electronic storage systems at cost as determined and made available by the custodian. When the mailing of copies of records is requested, the actual costs of such mailing may also be charged to the requester.

(3) Supervisory fee. An hourly fee may be charged for actual board expenses in supervising the examination and copying of requested records when the supervision time required is in excess of one hour. The custodian shall provide the hourly fees to be charged for supervision of records during examination and copying. That hourly fee shall not be in excess of the hourly wage of a board clerical employee who ordinarily would be appropriate and suitable to perform this supervisory function.

(4) Advance deposits.

1. When the estimated total fee chargeable under this paragraph exceeds \$25, the custodian may require a requester to make an advance payment to cover all or a part of the estimated fee.

2. When a requester has previously failed to pay a fee chargeable under this paragraph, the custodian may require advance payment of the full amount of any estimated fee before the custodian processes a new request from that requester.

71.21(33) Motion to reopen records. The board or presiding officer, on the board's or presiding officer's own motion or on the motion of a party, may reopen the record for the reception of further evidence. A motion to reopen the record may be made anytime prior to the issuance of a final decision.

71.21(34) Rehearing and reconsideration.

a. Application for rehearing or reconsideration. Any party to a case may file an application for rehearing or reconsideration of the final decision. The application for rehearing or reconsideration shall be filed within 20 days after the final decision in the case is issued.

b. Contents of application. Applications for rehearing or reconsideration shall specify the findings of fact and conclusions of law claimed to be erroneous, with a brief statement of the alleged grounds of error. Any application for rehearing or reconsideration asserting that evidence has arisen since the final order was issued as a ground for rehearing or reconsideration shall present the evidence by affidavit that includes an explanation of the competence of the person to sponsor the evidence and a brief description of the evidence sought to be included.

c. Notice to other parties. A copy of the application shall be timely mailed by the applicant to all parties of record not joining therein. If the application does not contain a certificate of service, the board shall serve copies on all parties.

d. Requirements for objections to applications for rehearing or reconsideration. An answer or objection to an application for rehearing or reconsideration must be filed within 14 days of the date the application was filed with the board, unless otherwise ordered by the board.

e. Disposition. Any application for a rehearing shall be deemed denied unless the board grants the application within 20 days after its filing.

71.21(35) Dismissal. If a party fails to appear or participate in an appeal hearing after proper service of notice, the presiding officer may dismiss the appeal unless a continuance is granted for good cause. If an appeal is dismissed for failure to appear, the board shall have no jurisdiction to consider any subsequent appeal on the appellant's protest.

71.21(36) Waivers.

a. In response to a request, or on its own motion, the board may grant a waiver from a rule adopted by the board, in whole or in part, as applied to a specific set of circumstances, if the board finds, based on clear and convincing evidence, that:

(1) The application of the rule would pose an undue hardship on the person for whom the waiver is requested;

(2) The waiver would not prejudice the substantial rights of any person;

(3) The provisions of the rule subject to a petition for waiver are not specifically mandated by statute or another provision of law; and

(4) Substantially equal protection of public health, safety, and welfare will be afforded by means other than that prescribed in the rule for which the waiver is requested.

b. Persons requesting a waiver may submit their request in writing. The waiver request must state the relevant facts and reasons the requester believes will justify the waiver, if the reasons have not already been provided to the board in another pleading.

c. Grants or denials of waiver requests shall contain a statement of the facts and reasons upon which the decision is based. The board may condition the grant of the waiver on such reasonable conditions as appropriate to achieve the objectives of the particular rule in question. The board may at any time cancel a waiver upon appropriate notice and opportunity for hearing.

71.21(37) Appeals of board decisions. A party may seek judicial review of a decision rendered by the board by filing a written notice of appeal with the clerk of the district court where the property is located within 20 days after the letter of disposition of the appeal by the board is mailed to the appellant. Iowa Code chapter 17A applies to judicial review of the board's final decision. The filing of the petition does not itself stay execution or enforcement of the board's final decision. The board may grant a stay on appropriate terms or other temporary remedies during the pendency of judicial review.

71.21(38) *Stays of agency actions.* Any party to a contested case proceeding may petition the board for a stay or other temporary remedies pending judicial review of all or part of that proceeding. The petition shall state the reasons justifying a stay or other temporary remedy. In determining whether to grant a stay, the board or presiding officer shall consider the factors listed in Iowa Code section 17A.19(5) “c.” A stay may be vacated by the board upon application of any other party.

71.21(39) *Time requirements.* Time shall be computed as provided in Iowa Code section 4.1(34).

71.21(40) *Judgment of the board.* Nothing in this rule should be construed as prohibiting the exercise of honest judgment, as provided by law, by the board in matters pertaining to valuation and assessment of individual properties.

This rule is intended to implement Iowa Code sections 421.1, 421.1A as amended by 2013 Iowa Acts, Senate File 295, division VI, 421.2, 441.37A as amended by 2013 Iowa Acts, Senate File 295, division VI, 441.38 and 441.49 and chapter 17A.

[ARC 9877B, IAB 11/30/11, effective 1/4/12; ARC 1306C, IAB 2/5/14, effective 3/12/14; ARC 1496C, IAB 6/11/14, effective 5/20/14; ARC 2108C, IAB 8/19/15, effective 9/23/15]

701—71.22(428,441) Assessors.

71.22(1) *Conflict of interest.* An assessor shall not act as a private appraiser, or as a real estate broker or option agent in the jurisdiction in which serving as assessor (1976 O.A.G. 744).

71.22(2) *Listing of property.*

a. Forms. Assessors may design and use their own forms in lieu of those prescribed by the department of revenue provided that the forms contain all information contained on the prescribed form, are not substantially different from the prescribed form, and are approved by the director of revenue.

b. Assessment rolls. Assessment rolls must be prepared in duplicate for each property in a reassessment year as defined in Iowa Code section 428.4. However, the copy of the roll does not have to be issued to a taxpayer unless there is a change in the assessment or the taxpayer requests the issuance of the duplicate copy.

c. Whenever a date specified in Iowa Code chapter 441 falls on a Saturday, Sunday, or legal holiday, the action required to be completed on or before that date shall be considered to have been timely completed if performed on or before the following day which is not a Saturday, Sunday, or holiday.

d. Buildings erected or improvements made by a person other than the owner of the land on which they are located are to be assessed to the owner of the buildings or improvements. Unpaid taxes are a lien on the buildings or improvements and not a lien on the land on which they are located.

71.22(3) *Notice of protest.* If a protest or appeal is filed with the board of review, property assessment appeal board, or district court against the assessment of property valued at \$5 million or more, the assessor shall provide notice to the school district in which the property is located within ten days of the filing of the protest or the appeal, as applicable.

This rule is intended to implement Iowa Code chapter 428 and Iowa Code chapter 441 as amended by 2006 Iowa Acts, House File 2797.

701—71.23(421,428,441) Valuation of multiresidential real estate. Multiresidential real estate shall be assessed at a percent of its actual value as defined in Iowa Code section 441.21. In determining the actual value of multiresidential real estate, city and county assessors shall use the appraisal manual issued by the department of revenue pursuant to Iowa Code section 421.17(18) as well as a locally conducted assessment/sales ratio study, an analysis of sales of comparable properties, and any other relevant data.

This rule is intended to implement Iowa Code sections 421.17, 428.4 and 441.21 as amended by 2013 Iowa Acts, Senate File 295.

[ARC 1765C, IAB 12/10/14, effective 1/14/15]

701—71.24(421,428,441) Valuation of dual classification property. Real estate with a dual classification of commercial/multiresidential or industrial/multiresidential shall be assessed at its actual value as defined in Iowa Code section 441.21.

71.24(1) *Allocation of dual classification values.* The assessor shall value as a whole properties that have portions classified as multiresidential and portions classified as commercial or industrial using

the methodology found in rule 701—71.23(421,428,441). After the assessor has assigned a value to the property, the value shall be allocated between the two classes of property based on the appropriate appraisal methodology. The assessor shall allocate land value proportionately by class.

71.24(2) Notice of valuation. The valuation notice issued pursuant to Iowa Code section 441.23 shall include a breakdown of the valuation by class for the current year and the prior year.

71.24(3) Protest of assessment. The valuation and assessment of property with a dual classification shall be considered one assessment, and any protest of assessment brought under Iowa Code section 441.37 or subsequent appeal must be made on the entire assessment. Protests of assessments on the valuation of only one class of property are not permitted. The board of review shall review the valuation in total as both classifications are subject to the board's adjustment in any review proceeding. Likewise, any tribunal or court reviewing the board's decision shall base its review on the entire assessment.

This rule is intended to implement Iowa Code sections 421.17, 428.4 and 441.21 as amended by 2013 Iowa Acts, Senate File 295.

[ARC 1765C, IAB 12/10/14, effective 1/14/15]

701—71.25(441,443) Omitted assessments.

71.25(1) Property subject to omitted assessment.

a. Land and buildings. An omitted assessment can be made only if land or buildings were not listed and assessed by the assessor. The failure to list and assess an entire building is an omission for which an omitted assessment can be made even if the land upon which the building is located has been listed and assessed. See *Okland v. Bilyeu*, 359 N.W.2d 412 (Iowa 1984). However, the failure to consider the value added as a result of an improvement made does not constitute an omission for which an omitted assessment can be made if the building or land to which the improvement was made has been listed and assessed.

b. Previously exempt property. Property which has been erroneously determined to be exempt from taxation may be restored to taxation by the making of an omitted assessment. See *Talley v. Brown*, 146 Iowa 360, 125 N.W. 243 (1910). An omitted assessment is also made to restore to taxation previously exempt property which ceases to be eligible for an exemption.

71.25(2) Officials authorized to make an omitted assessment.

a. Local board of review. A local board of review may make an omitted assessment of property during its regular session only if the property was not listed and assessed as of January 1 of the current assessment year. For example, during its regular session which begins May 1, 1986, a local board of review may make an omitted assessment only of property that was not assessed by the assessor as of January 1, 1986. During that session, the board of review could not make an omitted assessment for an assessment year prior to 1986.

b. County auditor and local assessor. The county auditor and local assessor may make an omitted assessment. However, no omitted assessment can be made by the county auditor or local assessor if taxes based on the assessment year in question have been paid or otherwise legally discharged. For example, if a tract of land was listed and assessed and taxes levied against that assessment have been paid or legally discharged, no omitted assessment can be made of a building located upon that tract of land even though the building was not listed and assessed at the time the land was listed and assessed. See *Okland v. Bilyeu*, 359 N.W.2d 412, 417 (Iowa 1984).

c. County treasurer. The county treasurer may make an omitted assessment within two years from the date the tax list which should have contained the assessment should have been delivered to the county treasurer. For example, for the 1999 assessment year, the tax list is to be delivered to the county treasurer on or before June 30, 2000. Thus, the county treasurer may make an omitted assessment for the 1999 assessment year at any time on or before June 30, 2002. The county treasurer may make an omitted assessment of a building even if taxes levied against the land upon which the building is located have been paid or legally discharged. See *Okland v. Bilyeu*, 359 N.W.2d 412, 417 (Iowa 1984). The county treasurer may not make an omitted assessment if the omitted property is no longer owned by the person who owned the property on January 1 of the year the original assessment should have been made.

d. Director of revenue. The director of revenue may make an omitted assessment of any property assessable by the director at any time within two years from the date the assessment should have been made.

This rule is intended to implement Iowa Code chapter 440 and sections 443.6 through 443.15 as amended by 1999 Iowa Acts, chapter 174.

701—71.26(441) Assessor compliance. The assessor shall determine the value of real property in accordance with rules adopted by the department of revenue and in accordance with forms and guidelines contained in the Iowa Real Property Appraisal Manual prepared by the department. The assessor may use an alternative manual to value property if it is a unique type of property not covered in the manual prepared by the department.

If the department finds that an assessor is not in compliance with the rules of the department relating to valuation of property or has disregarded the forms and guidelines contained in the real property appraisal manual, the department shall notify the assessor and each member of the conference board for that assessing jurisdiction. The notice shall be mailed by restricted certified mail and shall specify the areas of noncompliance and the steps necessary to achieve compliance. The notice shall also inform the assessor and conference board that if compliance is not achieved, a penalty may be imposed.

The conference board shall respond to the department within 30 days of receipt of the notice of noncompliance. The conference board may respond to the notice by asserting that the assessor is in compliance with the rules, guidelines, and forms of the department or by informing the department that the conference board intends to submit a plan of action to achieve compliance. If the conference board responds to the notification by asserting that the assessor is in compliance, a hearing before the director of revenue shall be held on the matter within 60 days of receipt of the notice of noncompliance. If it is agreed that the assessor is not in compliance, the conference board shall submit a plan of action within 60 days of receipt of the notice of noncompliance.

The plan shall contain a time frame under which compliance shall be achieved, which shall be no later than January 1 of the following assessment year. The plan of action shall contain the signature of the assessor and of the chairperson of the conference board. The department shall review the plan to determine whether the plan is sufficient to achieve compliance. Within 30 days of receipt of the plan, the department shall notify the assessor and the chairperson of the conference board that it has accepted the plan or that it is necessary to submit an amended plan of action.

By January 1 of the assessment year following the calendar year in which the plan was submitted to the department, the conference board shall submit a report to the department verifying that the plan of action was followed and compliance has been achieved. The department may conduct a field inspection to ensure that the assessor is in compliance. By January 31, the department shall notify the assessor and the conference board, by restricted certified mail, either that compliance has been achieved or that the assessor remains in noncompliance. If the department determines that the assessor remains in noncompliance, the department shall take steps to withhold up to 5 percent of the reimbursement payment authorized in Iowa Code section 425.1 until the director of revenue determines that the assessor is in compliance.

If the conference board disputes the determination of the department, the chairperson of the conference board may appeal the determination to the state board of tax review.

This rule is intended to implement Iowa Code Supplement section 441.21.

CHAPTER 72
EXAMINATION AND CERTIFICATION OF ASSESSORS AND DEPUTY ASSESSORS
[Prior to 12/17/86, Revenue Department[730]]

701—72.1(441) Application for examination.

72.1(1) The application for the examination shall be made on a form prescribed by the director and shall constitute an integral part of the examination. The application form shall require information as to the education, training, and experience of the applicant and such other information as the director may deem pertinent. Applications must be received by the department at least three days prior to the date of the examination. Applications filed on or after the effective date of this rule shall be considered public records pursuant to Iowa Code chapter 22 (*City of Dubuque v. Telegraph Herald, Inc.*, 297 N.W.2d 523 (Iowa 1980); 1982 O.A.G. 3).

72.1(2) Upon receipt of a properly filed application, the department shall issue to the applicant a card granting the applicant admission to the examination. No applicant shall be admitted to the examination without presenting the admission card to the examination monitor.

72.1(3) Whenever there occurs a vacancy in the office of assessor, the director shall, upon the written request of the examining board or conference board, forward to the board a copy of any applications requested by either board. When a vacancy occurs in the office of deputy assessor, the director shall, upon the written request of the assessor, forward to the assessor a copy of any applications requested by the assessor.

This rule is intended to implement Iowa Code section 441.5.

701—72.2(441) Examinations.

72.2(1) *Examination questions.* Examination questions and answers shall not be made available to persons other than employees of the department authorized by the director to have access to them. Persons who take the examination shall not discuss with anyone the specific questions contained in the examination, nor shall they reveal any specific examination question to another person. This shall not restrict persons who have taken the examination from discussing the general subject matter of the examination.

72.2(2) *Materials and supplies.* All examination materials shall be furnished by the department and must be returned to the monitor prior to the applicants' leaving the examination room site. During the examination, applicants may be permitted to use their own slide rules or electronic calculators as long as their use does not disturb other applicants. Applicants shall not be permitted to bring any other materials into the examination room, nor shall they be permitted to take any materials from the examination room except their own slide rules or electronic calculators.

72.2(3) *Personal conduct during examination.* To preserve the integrity of the examinations and the assessing profession, each person taking an examination shall exhibit behavior which is not disruptive to other applicants and no person shall cheat or attempt to cheat on an examination in any manner.

72.2(4) *Monitors.* The director shall, prior to the examination, provide all applicants with a copy of subrules 72.2(1), 72.2(2), and 72.2(3). Examination monitors shall have the authority to enforce these rules in accordance with subrule 72.2(5).

72.2(5) *Violations.* Any person who intentionally violates any of the provisions of subrule 72.2(1), 72.2(2), or 72.2(3) shall be subject to the penalties specified in this subrule. If an infraction of subrule 72.2(1), 72.2(2), or 72.2(3) occurs and is detected and confirmed during the examination, the examination of the person committing the infraction shall be confiscated by the monitor and shall not be scored. If the infraction is detected and confirmed after the examination of the person committing the infraction has been scored, the score resulting from that examination shall be reduced to a failing grade and, if necessary, the list of candidates eligible for the position of city or county assessor or deputy assessor shall be adjusted accordingly.

72.2(6) *Review of examination.* Persons who have taken the examination may, after presenting proper identification, review their examinations in the office of the department's property tax division within 60 days after the date the examination has been administered. The review shall consist only of

examining the person's own answer sheet indicating the questions answered incorrectly and the question book. Persons reviewing their examinations shall not be permitted to take notes or otherwise transcribe information during this review, nor shall they have access to the answers to questions contained in the examination. Persons who review their examinations shall be permitted to do so only once, and shall not be eligible to take an examination for the position of assessor or deputy assessor for a period of at least 30 days following the date of the review of the examinations.

72.2(7) Assessor examination scores. The scores of persons who take the assessor or deputy assessor examination shall be considered public records pursuant to Iowa Code chapter 22.

72.2(8) Rescinded effective April 3, 1985.

72.2(9) Length of examination. The director shall determine the appropriate amount of time in which persons may take the examination. Any person who arrives at the examination site after the examination has begun shall not be permitted to complete the examination after the time scheduled for its completion.

72.2(10) Retaking examination. A person who takes the examination for the position of city or county assessor shall not be eligible to take the examination again for a period of at least 30 days following the date the examination was taken, subject also to the restrictions contained in subrule 72.2(5).

72.2(11) Frequency of examination. At the discretion of the director, statewide examinations for the positions of assessor or deputy assessor may be held more than twice a year in Des Moines.

72.2(12) Make-up examination prohibited. Special make-up examinations shall not be held for persons who applied to take the examination for the position of assessor or deputy assessor but who did not for any reason appear at the scheduled examination site.

This rule is intended to implement Iowa Code section 441.5.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—72.3(441) Equivalent of high school diploma. Only persons who possess a high school diploma or its equivalent are eligible to take the examination. The equivalent of high school diploma shall consist of a high school equivalency certificate issued by the department of public instruction pursuant to Iowa Code chapter 259A, a similar document issued by the U.S. armed forces, or a similar document issued by another state.

This rule is intended to implement Iowa Code section 441.5.

701—72.4(441) Appraisal-related experience. Appraisal-related experience shall include only such experience as may have been obtained through full-time paid employment consisting of the actual appraisal and valuation of property. The experience shall have included the physical inspection of property as part of the appraisal process and the setting of values for parcels of property.

This rule is intended to implement Iowa Code section 441.5.

701—72.5(441) Regular certification.

72.5(1) To obtain regular certification, a person must pass the examination and (a) possess two years' appraisal-related experience at the time of passing the examination, or (b) have obtained temporary certification, received a provisional appointment as assessor, and successfully completed the course of study prescribed by the director as provided in Iowa Code section 441.5.

72.5(2) If subsequent to passing the examination a person who has not received a provisional appointment as assessor attains two years' appraisal-related experience, the person must again pass the examination to obtain regular certification.

72.5(3) A regular certificate expires two years after the most recent date certification is granted by the director. However, the regular certificate of a person who receives an appointment as assessor remains valid until the person's resignation or removal from the position of assessor, even though more than two years may have expired since certification was last granted.

72.5(4) A regular certificate may at any time be renewed if the person possessing such a certificate passes the assessor examination. A regular certificate so renewed shall remain valid for a period of two years from the date certification was last granted, except as provided in subrule 72.5(3).

This rule is intended to implement Iowa Code section 441.5.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—72.6(441) Temporary certification.

72.6(1) To obtain temporary certification, a person who does not possess two years' appraisal-related experience must pass the examination for the position of assessor.

72.6(2) The temporary certificate of a person who does not receive a provisional appointment as assessor shall expire two years after the date the certification is granted by the director.

72.6(3) The temporary certificate of a person who does not receive a provisional appointment as assessor may be renewed if the person retakes and passes the assessor examination. A temporary certificate so renewed shall remain valid for a period of two years from the date temporary certification was last granted.

72.6(4) The temporary certificate of a person who receives a provisional appointment as assessor shall expire upon the person's successful completion of the course of study provided in Iowa Code section 441.5 and the granting of regular certification by the director.

72.6(5) The director shall revoke the temporary certificate of a person who receives a provisional appointment as assessor and who does not complete the course of study provided in Iowa Code section 441.5 within 18 months of the person's appointment as assessor. Upon the revocation of an assessor's temporary certificate, the director shall notify the person of the revocation and shall notify the appropriate conference board of the revocation and that the assessor whose temporary certificate has been revoked is no longer eligible to hold the position of assessor.

This rule is intended to implement Iowa Code section 441.5.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—72.7(441) Restricted certification. Rescinded IAB 4/22/09, effective 5/27/09.

701—72.8(441) Deputy assessors—regular certification.

72.8(1) A person who passes the examination for assessor or deputy assessor shall be granted regular deputy assessor certification by the director and shall be eligible for appointment to a deputy assessor position.

72.8(2) A deputy assessor regular certificate shall expire two years after the most recent date certification is granted, except as provided in subrule 72.8(3).

72.8(3) The deputy assessor regular certificate of a person who is appointed deputy assessor shall remain valid until the person's resignation or removal from the position of deputy assessor, or until the death, resignation, or removal of the assessor who appointed the person as deputy assessor. However, in the event of the death, resignation, or removal of the assessor, the deputy assessor certificate of the chief deputy shall remain valid until a new assessor is appointed. Nothing contained in this rule shall be construed to relieve a deputy assessor holding a restricted certificate of the continuing education requirements for the retention of the deputy assessor's position as provided in Iowa Code section 441.8.

72.8(4) A deputy assessor regular certificate may at any time be renewed if the person possessing such a certificate passes the assessor or deputy assessor examination. A deputy assessor certificate so renewed shall remain valid for a period of two years from the date certification was last granted, except as provided in subrule 72.8(3).

This rule is intended to implement Iowa Code section 441.5.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—72.9(441) Deputy assessors—restricted certification. Rescinded IAB 4/22/09, effective 5/27/09.

701—72.10(441) Appointment of deputy assessors.

72.10(1) The appointments of deputy assessors holding regular certificates shall expire upon the death, resignation, or removal of the assessor, except that the appointment of the chief deputy assessor shall not expire until the appointment of a new assessor, nor shall the restricted certificate of a deputy assessor expire at that time.

72.10(2) After the appointment of a new assessor, the assessor may appoint one or more deputy assessors from the registers of persons certified as eligible for appointment as assessor or deputy assessor. The assessor shall notify the director immediately of persons appointed as deputy assessors, the vacating of office by a deputy assessor, or a change in a deputy assessor's legal name.

This rule is intended to implement Iowa Code sections 441.5, 441.10 and 441.11.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—72.11(441) Special examinations. The conference board of the city or county in which a special examination is held shall reimburse the department for all expenses incurred in the administration of the examination. In determining the amount of reimbursement, the director shall take into consideration the costs of traveling to and from the examination site, meals and lodging, if any, for the monitor administering the examination, the costs of preparing and grading the examinations, and the salary of the monitor during the time expended on the examination.

This rule is intended to implement Iowa Code sections 441.5 to 441.7.

701—72.12(441) Register of eligible candidates. Following the administration and grading of an examination for assessor or deputy assessor, the director shall establish updated registers containing the names, in alphabetical order, and addresses of all persons eligible for appointment. The registers shall not contain test scores, but the scores shall be given to the city or county conference board upon request. Eligible candidates shall remain on the register for two years following the date of certification by the director after which time the person must successfully retake the examination to be placed on the register. However, assessors and deputy assessors with six years of consecutive service shall be placed on the register permanently without further testing being required. "Consecutive service" means service in which there was not more than 30 days' break in service. Assessor and deputy assessor service cannot be combined to meet the six-year consecutive service requirement.

Assessors and deputy assessors must complete the continuing education requirements provided in Iowa Code sections 441.5 and 441.10 to be reappointed to their present position or appointed to the same position in a different assessing jurisdiction. This provision does not apply to persons not presently serving as an assessor or deputy assessor. It shall be the duty of the conference board in the case of assessor appointments and the duty of the assessor in the case of deputy assessor appointments to receive written verification from the director of continuing education requirement compliance. An assessor or deputy assessor appointed as such without having complied with continuing education requirements shall be removed from office on order of the director. No continuing education requirements need be met for an assessor to be appointed a deputy assessor nor for a deputy assessor to be appointed an assessor.

This rule is intended to implement Iowa Code sections 441.5 and 441.10.

701—72.13(441) Course of study for provisional appointees. A person who possesses temporary certification and receives a provisional appointment as assessor shall within 18 months of the appointment complete a course of study prescribed and administered by the department of revenue. The course of study shall include the following: (1) attendance of at least one basic assessment school conducted by the department of revenue; (2) field instruction by appraisal personnel of the department of revenue; (3) the actual appraisal of representative properties in each class of real estate; and (4) attendance at the annual school of instruction sponsored by the department of revenue and the Iowa State Association of Assessors. In the event a person is unable to attend the annual school of instruction due to circumstances beyond the person's control, the director may, upon the request of the person, substitute comparable instruction for the fulfillment of this requirement. At three-month intervals following the appointment of the assessor, department of revenue appraisal personnel shall complete a

review of the assessor's performance and discuss the review with the assessor. If the review indicates unsatisfactory progress is being made toward developing a working knowledge of appraisal principles, the assessor shall be informed as to how the assessor's performance could be improved. Not less than 60 nor more than 90 days before the expiration of the 18-month period, the director of revenue shall inform the assessor and the conference board of the assessor's jurisdiction of the director's determination as to whether the assessor satisfactorily completed the course. If the assessor satisfactorily completes the course, the assessor shall be granted regular certification. If the assessor does not satisfactorily complete the course, the director shall revoke the assessor's temporary certificate and notify the assessor and the conference board of the revocation and that the person is no longer eligible to hold the position of assessor.

This rule is intended to implement Iowa Code section 441.5.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—72.14(441) Examining board.

72.14(1) *Membership.* Each voting unit of the conference board shall appoint a member of the examining board. Members of the examining board shall not be members of the conference board, a body which selects a member of the conference board, or the local board of review (1960 O.A.G. 226). A person must be a resident of the assessing jurisdiction served to qualify for appointment as a member of the examining board. A member changing assessing jurisdiction residency after appointment to the board may continue to serve on the board until the member's current term of office expires.

72.14(2) *Terms of members.* Members of the examining board shall be appointed for terms of six years. In the event of death, resignation, or removal from office of a member of the examining board, the appropriate voting unit of the conference board shall appoint a successor to serve the unexpired term of the previous incumbent.

72.14(3) *Removal of member.* A member of an examining board may be removed from office only after specific charges have been filed against the member and a public hearing has been held if requested by the member.

72.14(4) *Duties.* The examining board may, at its discretion, contact all or some of the persons on the register of candidates eligible for appointment as assessor. The examining board may conduct interviews with interested persons and may administer such further examinations as may enable the board to submit a recommendation to the conference board. In arriving at its recommendation, the examining board may set other professional standards including, but not limited to, examination scores, education, and experience.

72.14(5) *Report to conference board.* The report to the conference board required pursuant to Iowa Code section 441.6 should contain a complete description of the examining board's investigations and activities. The report may, at the discretion of the examining board, contain recommendations to the conference board.

72.14(6) *Time for action.* The examining board shall take all steps necessary to comply with the time frames set forth in Iowa Code section 441.6.

This rule is intended to implement Iowa Code sections 441.2, 441.3, 441.4, and 441.6.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—72.15(441) Appointment of assessor.

72.15(1) *Meeting the conference board.* At the time specified in Iowa Code section 441.6, the conference board shall hold a meeting and take action to appoint an assessor or request permission to hold a special examination. Within ten days of this meeting, the conference board shall notify the director of the appointment or request a special examination.

72.15(2) *Time for action.* A conference board shall adhere to the time frames specified in Iowa Code section 441.6 in appointing an assessor to fill a vacant position.

72.15(3) *Special examination.* A request for a special examination shall be made only after the conference board has made a good faith attempt to appoint an assessor from the current register of

eligible candidates. The request shall state the reason or reasons the conference board feels the director of revenue should grant permission to hold the special examination.

This rule is intended to implement Iowa Code section 441.6.

701—72.16(441) Reappointment of assessor.

72.16(1) *Time for reappointment.* A conference board must decide whether to reappoint an incumbent assessor at least 90 days before the expiration of the incumbent's term. If the incumbent is not to be reappointed, the conference board shall so notify the incumbent in writing at least 90 days before the expiration of the incumbent's term. Failure of the conference board to provide timely notification of the decision not to reappoint the assessor shall result in the assessor being reappointed.

72.16(2) *Continuing education.* A conference board shall not reappoint an incumbent assessor if the board has not received from the assessor education advisory committee certification that the incumbent assessor has satisfied all continuing education requirements.

This rule is intended to implement Iowa Code Supplement section 441.8.

701—72.17(441) Removal of assessor. An assessor may be removed from office for the reasons stated in Iowa Code section 441.9, but only after the charges have been substantiated.

This rule is intended to implement Iowa Code section 441.9.

701—72.18(421,441) Courses offered by the department of revenue.

72.18(1) *Class size.* The director may determine the maximum number of students for a particular class in order to maintain a suitable learning environment. Applications to take a course shall be accepted in the order in which they are received by the department. If the number of applications received as of a specific mail delivery results in the receipt of more applications than there are spaces for the class, those applications received in that mail delivery shall be subject to a drawing by lot to determine those which shall be accepted for the class. However, persons who are not currently serving as assessors or deputy assessors shall not be admitted to a course ahead of persons serving as assessors or deputy assessors, regardless of the date on which their applications were received.

72.18(2) *Examinations during the course.* Examination questions and answers shall not be made available to persons other than employees of the department authorized by the director to have access to such information. Persons who take the examination shall not discuss with anyone the specific questions contained in the examination, nor shall they reveal any specific examination question to another person. This shall not restrict persons who have taken a course examination from discussing the general subject matter of the examination.

72.18(3) *Materials and supplies.* All examination materials shall be furnished by the department and must be returned to the monitor prior to the students leaving the examination. During the examination, students may be permitted to use their own slide rules or electronic calculators as long as their use does not disturb other students. Students shall not be permitted to bring any other materials into the examination room, nor shall they be permitted to take any materials from the examination room except their own slide rules or electronic calculators.

72.18(4) *Personal conduct during course and examination.* To preserve the integrity of the examinations and the assessing profession, each person taking an examination shall not exhibit behavior which is disruptive to other persons taking the examination, nor shall a person cheat or attempt to cheat on an examination in any manner.

72.18(5) *Violations.* Any person who intentionally violates any of the provisions of subrule 72.18(2), 72.18(3), or 72.18(4) shall be subject to the penalties specified in this subrule. If an infraction of subrule 72.18(2), 72.18(3), or 72.18(4) occurs and is detected and confirmed during the examination, the examination of the person committing the infraction shall be confiscated by the instructor and shall not be scored. If the infraction is detected and confirmed after the examination of the person committing the infraction has been scored, the score resulting from that examination shall be reduced to a failing grade and the director shall notify the assessor education advisory committee of the action taken. If the

infraction is detected and confirmed during the course, the instructor shall expel the student from the classroom, and the student shall not be permitted to take the examination for the course.

72.18(6) *Instructors.* Course instructors shall inform all students of the provisions of subrules 72.18(2), 72.18(3), and 72.18(4). The instructors shall have the authority to enforce these rules in accordance with subrule 72.18(5).

72.18(7) *Retaking examination.* A person who receives a failing score on the examination for a course may retake the examination by submitting a request to the director within ten days of the date the director notifies the person of the examination score. The examination shall be retaken at the office of the department in Des Moines or at the site of any scheduled course examination, and shall be retaken within 30 days of the date the original examination was taken. A person who retakes an examination may not again take that particular course for credit until at least 30 days have passed from the date the examination was retaken. A special examination may be taken only once for a particular course, regardless of the number of times a student takes the course. A special examination shall be given only if the student took and failed the examination given at the end of a course taken for credit.

72.18(8) *Review of examination.* Persons who have taken a course examination may, after presenting proper identification, review their examinations in the office of the department's property tax division within 60 days after the date the examination has been administered. The review shall consist only of examining the person's own answer sheet and the question book. Persons reviewing their examinations shall not be permitted to take notes or otherwise transcribe information during this review, nor shall they have access to the answers to questions contained in the examination. Persons who review their examinations shall be permitted to do so only once, and shall not be eligible to take the same examination for a period of at least 30 days following the date of the review of the examinations.

72.18(9) *Length of examination.* The director shall determine the appropriate amount of time in which persons may take each examination. Any person who arrives at the examination site after the examination has begun shall not be permitted to complete the examination after the time scheduled for completion.

This rule is intended to implement Iowa Code section 441.8.

CHAPTER 73
PROPERTY TAX CREDIT AND RENT REIMBURSEMENT
[Prior to 12/17/86, Revenue Department[730]]

701—73.1(425) Eligible claimants. The property tax credit and rent reimbursement programs are available to claimants who: (1) were at least 23 years of age or a head of household on December 31 of the base year, (2) were not or will not be claimed as a dependent on another person's federal or state income tax return for the base year in the case of a claimant who is not disabled or at least 65 years of age, (3) did not have household income in excess of the indexed amount determined pursuant to Iowa Code section 425.23(4) during the base year, and (4) are domiciled in Iowa at the time the claim is filed or were at the time of the claimant's death.

In the case of a claim for rent reimbursement, the claimant must have occupied and rented the property during any part of the base year. In the case of a claim for property tax credit, the claimant must have occupied the property during any part of the fiscal year beginning July 1 of the base year.

If a homestead is occupied by two or more eligible claimants, each person may file a claim based upon each person's income and each person's share of the rent paid or property taxes due.

The computed credit or reimbursement shall be determined in accordance with the applicable schedule provided in Iowa Code section 425.23(1) as adjusted by the indexed amount determined in section 425.23(4).

This rule is intended to implement Iowa Code section 425.17(2) as amended by 1999 Iowa Acts, chapter 152, and section 425.23, and is effective for property tax credit and rent reimbursement claims filed on or after January 1, 2000.

701—73.2(425) Separate homesteads—husband and wife property tax credit. If a husband and wife are both qualified homeowners living in and maintaining separate and distinct homesteads and each is actually liable for and will pay the property tax for their respective homesteads, each is eligible to file an individual credit claim for property tax due.

This rule is intended to implement Iowa Code section 425.17(4).

701—73.3(425) Dual claims. A claimant changing homesteads during the base year who will make property tax payments during the fiscal year following the base year and who also made rent payments during the base year is entitled to receive both a property tax credit and rent reimbursement.

Separate claim forms for the property tax credit and the rental reimbursement shall be filed with the county treasurer and the Iowa department of revenue, respectively.

The claims are to be based on the actual property tax due and rent constituting property tax paid with a combined maximum of \$1000 upon which the credit and reimbursement can be calculated.

EXAMPLE: \$800 property tax due

\$400 rent constituting property taxes paid

The claim form for calculating the property tax credit shall reflect the entire \$800 amount.

The claim form for calculating the rent reimbursement shall reflect only the remaining \$200 of the \$1000 maximum allowance.

The Iowa department of revenue will issue refund warrants for rent reimbursement claims. The county treasurer will apply the property tax credits.

This rule is intended to implement Iowa Code section 425.24.

701—73.4(425) Multipurpose building. A multipurpose building is a building which is used for other purposes in addition to being used for living accommodations. If a portion of a homestead property is utilized for business purposes, the property is considered to be a multipurpose building.

The portion of the property tax due or rent constituting property tax paid attributable to the homestead only is to be used in determining the allowable credit or reimbursement. This portion is to be calculated by determining the percentage of the homestead square footage to the square footage of

the entire multipurpose structure. This percentage is then to be applied to the property tax due in the current fiscal year or rent constituting property tax paid for the base year.

This rule is intended to implement Iowa Code section 425.17(8).

701—73.5(425) Multidwelling. A multidwelling is a structure which houses more than one homestead. This includes, but is not limited to: apartment buildings, duplexes, condominiums, town houses, nursing homes and rooming houses.

A claimant owning a multidwelling whose homestead is a portion of the multidwelling is entitled to a credit for only that portion of the property tax due attributable to the homestead.

This calculation of the credit or reimbursement is to be performed the same as for a multipurpose building as described in rule 73.4(425).

This rule is intended to implement Iowa Code section 425.17(8).

701—73.6(425) Income. Income includes the amount of in-kind assistance received by the claimant for housing expenses such as federal rent subsidy payments made directly to the landlord on behalf of the claimant and energy assistance benefits received by the claimant from or through a public utility.

In determining income, net operating losses and net capital losses are not to be considered. If the comparison of gains and losses results in a net gain, such amount shall be considered income. If the comparison results in a net loss, the net loss shall be disregarded.

This rule is intended to implement Iowa Code section 425.17(7) as amended by 1993 Iowa Acts, chapter 180.

701—73.7(425) Joint tenancy. Joint tenancy for purposes of a property tax credit is the common ownership of a homestead by two or more persons either as joint tenants with right of survivorship or tenants in common.

This rule is intended to implement Iowa Code section 425.17(8).

701—73.8(425) Amended claim. An amended claim can only be filed by a claimant who has timely filed a claim for property tax credit or rent constituting property tax paid for the appropriate base year.

The amended claim must be filed within three years from October 31 of the year in which the original claim was filed.

The amended claim shall be clearly marked by the claimant with the word “AMENDED.”

If upon review by the Iowa department of revenue an additional credit or reimbursement is indicated, the claimant shall be reimbursed the additional amount.

This rule is intended to implement Iowa Code section 425.27.

701—73.9(425) Simultaneous homesteads. A person who owns or rents one property and also owns or rents another property for a simultaneous period of time is limited to claiming a property tax credit or rent reimbursement on the property which is considered the person’s domicile.

This rule is intended to implement Iowa Code section 425.17(4).

701—73.10(425) Confidential information. Income tax information contained on a property tax credit claim form is confidential except that the information may be conveyed by the department of revenue to county treasurers for purposes of eligibility verification for tax credit claims. Information contained on a rent reimbursement claim form is confidential except that the information may be released to an employee of the department of inspections and appeals to assist in the performance of an audit or investigation. See rule 701—6.3(17A).

This rule is intended to implement Iowa Code section 425.28 as amended by 1999 Iowa Acts, chapter 139.

701—73.11(425) Mobile, modular, and manufactured homes. An eligible claimant whose homestead is a mobile, modular, or manufactured home which the claimant owns and which was assessed as real

estate resulting in property tax due may file a claim for credit for property tax due on the home and the land on which the home is located, provided the land is owned by the claimant.

An eligible claimant whose homestead is a mobile, modular, or manufactured home subject to the annual tax as provided in Iowa Code chapter 435 may file a claim for credit for property taxes due on the land upon which the home is located provided the land is owned by the claimant. Rent paid for occupancy of a home and the space occupied by the home is subject to reimbursement regardless of how the home is taxed.

This rule is intended to implement Iowa Code subsection 425.17(4).

701—73.12(425) Totally disabled. A person who is totally disabled must be unable to engage in any substantial gainful employment by reason of any medically determinable physical or mental impairment. In addition, the impairment must have lasted or is reasonably expected to last for a continuous period of 12 months or is expected to result in death. This disabled condition must be the determining factor in the person's inability to engage in gainful employment. A claimant is considered totally disabled only if the physical or mental impairment or impairments are of such severity that the claimant is not only unable to do work previously performed but cannot, considering the claimant's age, education, and work experience, engage in any other kind of substantial gainful work which exists in the national economy, regardless of whether such work exists in the immediate area in which the claimant lives, or whether a specific job vacancy exists or whether the claimant would be hired if the claimant applied for work. See 42 U.S.C. §423. Examples of physical conditions which could possibly constitute total disability would include, but are not limited to: loss of major function of one or both legs or arms; progressive diseases which have resulted in the loss of one or both legs or arms or which have caused them to become useless; severe arthritis; diseases of the heart, lungs or blood vessels which have resulted in serious loss of heart or lung reserve; diseases of the digestive system which have resulted in severe malnutrition, weakness and anemia prohibiting gainful employment; damage to the brain or brain abnormality which has resulted in severe loss of judgment, intellect, orientation or memory; or, paralysis or diseases of the nervous system which prohibit coordination or major functioning of the body so as to prevent gainful employment.

For purposes of this rule, a person shall not be considered unable to engage in substantial gainful employment unless the person has attained the age of 18 on or before December 31 of the base year.

This rule is intended to implement Iowa Code subsection 425.17(11).

701—73.13(425) Nursing homes. A claimant whose homestead is a nursing home is eligible to file a reimbursement claim for rent constituting property tax paid unless the person is eligible for a property tax credit on an owned homestead.

This rule is intended to implement Iowa Code section 425.17(4).
